★ 2. Allotted to a financial organization for credit to a savings or checking account of the allotter as authorized by I-TFM 3-9000 (reference (ai)). Any employee whose place of employment is within the continental United States, may authorize allotments to any U.S. bank, savings bank, savings and loan association or similar institution, or federal or state chartered credit union. Allotments must be in fixed whole dollar amounts, minimum \$1, to be deducted in each successive pay period and must not exceed two such allotments per employee at any one time. Moneys thus credited to the allotter's account (savings or checking) may be used for any purpose in accordance with the desires and direction of the allotter as long as that purpose does not circumvent any statute, Executive Order or other applicable regulation. A completed SF 1199A including the endorsement of the financial institution, an FMS Form 2231, or a DD Form 2762 serves as the request and authority for the allotment.

- C. Payment of commercial insurance premiums on the life of the allotter.
- D. Payment of U.S. Government Life Insurance or National Service Life Insurance premiums.
- E. Voluntary liquidation of indebtedness to the U.S. Government, including voluntary payment of back taxes.
- F. Repayment of loans obtained for the purchase of a home or automobile.

G. Payment of certain state and District of Columbia income taxes when an employee has a legal obligation to pay, but the agency has no legal obligation to withhold, as authorized by 5 C.F.R. 550.351 (reference (l)).

H. Payment of certain city and/or local taxes when an employee has a legal obligation to pay, but the agency has no legal obligation to withhold, as authorized by 5 C.F.R. 550.351 (reference (l)).

★ I. Payment of labor organization dues as authorized by 5 U.S.C. 7115 (reference (b)) and DoD 1400.25-M, subchapter 711 (reference (u)).

1. Allotment Authorization. Any eligible employee has the right to make a voluntary allotment for the payment of dues to not more than one eligible labor organization. An SF 1187 (Request and Authorization for Voluntary Allotment of Compensation for Payment of Labor Organization Dues) shall be used to request and authorize an allotment of pay. Such allotments shall become effective the first pay period beginning after receipt of the properly executed SF 1187.

2. Amount of Employee's Deductions. Unless the negotiated agreement specifies otherwise, the procedure for setting and changing dues rates shall be as follows. When the amount of an employee's dues is stated on an SF 1187 in terms of an annual amount (covering a period of 12 months), the figure shall be divided by 26. When an amount is stated in terms of a monthly amount, the figure shall be multiplied by 12 and the result divided by 26. This amount shall remain unchanged until the appropriate official in the labor organization certifies that the amount of the regular dues has changed. Upon input, the civilian payroll office shall begin to withhold the certified amount of the dues on the first complete pay period for which the deductions are made or a later date if requested by the labor organization. When an employee is in a nonpay status for an entire pay period, withholding shall not be made to cover that pay period from future earnings nor shall the employee deposit the amount that would have been withheld if the employee had been in a pay status during that period. If an employee is in a nonpay status for only a part of such pay period, and the salary is not sufficient to cover the full deduction, none shall be made.

3. Termination of Allotments

a. An employee may submit a request to revoke the allotment for the payment of union dues at any time; however, such revocation shall be effective only at the beginning of the first pay period which begins on or after the 1-year anniversary of the effective date of the employee's initial allotment of union dues. Thereafter, revocation of an allotment shall be effective at 1-year intervals. (Previously, dues could be revoked at 6-month intervals. Negotiated agreements providing for 6-month revocation periods can be continued and may still exist. In such situations, revocation shall occur at the beginning of the first pay period after the termination dates of the 6-month intervals which commonly are March 1 and September 1.)

b. Dues withholding procedures are negotiable to the extent they are consistent with applicable law and regulation. This includes bargaining on yearly intervals for revoking dues and the date from which the 1-year interval is measured. Activities are responsible for certifying the effective date of dues revocations.

c. An employee shall use an SF 1188 (Revocation of Voluntary Authorization for Allotment of Compensation for Payment of Labor Organization Dues) to voluntarily revoke an allotment. However, a written request for revocation of an allotment that is otherwise in order and signed by the employee shall be accepted and acted upon, even though it is not submitted on a SF 1188. Unless the collective bargaining agreement provides otherwise, the employing activity is responsible for furnishing the SF 1188 to employees upon request.

d. Allotments of all union members are terminated automatically when the union loses its eligibility for exclusive recognition. Termination shall be effective at the beginning of the first pay period after notification is received concerning the loss of recognition.

e. An allotment is terminated when an employee is suspended or expelled from union membership. Termination of dues shall be effective at the beginning of the first pay period after written notification is received that an employee was suspended or expelled from membership.

f. An allotment is terminated when an employee no longer is a member of the exclusive bargaining unit, e.g., an employee separates from the employing activity or is promoted to a supervisory position. Termination of dues shall be effective with the final pay check or at the beginning of the first pay period after notification that an employee left the exclusive bargaining unit, as appropriate.

g. Dues allotments may continue for a reasonable time where a question arises as to whether an exclusive bargaining unit remains appropriate or needs to be clarified, or whether an employee left the bargaining unit. The need to clarify a unit, or determine its appropriateness, could arise where a transfer of function or reorganization impacts the unit and could require the gaining organization to continue dues withholding. Termination of dues would be effective at the beginning of the first pay period after notification is received concerning the resolution of the representational question.

J. Charitable contributions to a CFC as authorized by DoD Directive 5035.1 (reference (al)) and DoD Instruction 5035.5 (reference (am)). See 5 C.F.R. 550-341-550.342 (reference (l)).

1. An employee may initiate a CFC allotment only when employed in an area in which a CFC exists that has been authorized by the OPM. Generally, employees serving under an appointment of 1 year or less may not make an allotment. Such an employee may make an allotment when an official of the employing agency decides that the employee will be employed long enough to justify it. This includes part-time and intermittent employees who are regularly employed.

★ 2. Employees or CFC agents shall submit completed authorization forms for the CFC allotment to the CSR by the date established by the CSR each year; however, if forms are received after that date, they should be accepted and processed.

3. An allotment shall be voluntary, based on the employee's written authorization. Authorization forms in standard format shall be printed by the CFC campaign organizations at each location and shall be distributed to employees along with other campaign materials at the time charitable contributions are solicited.

4. Allotments must be 1-year term allotments. They shall start with the first full pay period starting in January and end with the last pay period starting in December. An employee not on duty for 1 full year can submit an allotment if he or she has enough service time remaining to make it practical. Three months or more is a reasonable period for an allotment.

5. Employees shall make a single allotment of an equal amount to be deducted each pay period during the year. The minimum amount is \$1 biweekly or \$2 if paid on a monthly basis. Amounts deducted for teachers paid for less than 1 year shall be accelerated for the term of employment. No change of amounts can be authorized during the term of the allotment; however, an employee voluntarily may discontinue the allotment (in writing) at any time. If the allotment is canceled, it cannot be reinstated.

6. If an employee transfers within the Department during the 1-year term of the allotment, the allotment continues unless the transfer is to or from an OCONUS area.

K. Purchase of savings bonds. Employees can have the maximum number of savings bond allotments that the payroll and/or bond accounting system can accommodate.

1. An employee shall authorize an allotment for the purchase of U.S. Series EE Savings Bonds on SBD 2104 (Authorization for Purchase and Request for Change United States Series EE Savings Bonds). An SBD 2104 may be obtained from the nearest HRO. The SBD 2104 shall remain in effect until canceled or changed in writing. Requests for savings bonds allotments that are otherwise complete but lack the payee's SSN shall not be processed.

2. Payroll Deductions. U.S. Series EE Savings Bonds with a minimum face value of \$100 may be purchased through payroll deduction. The minimum payroll deduction for these bonds is \$5 per pay period. Amounts greater than \$5 per pay period may be established if that amount divides evenly into the total purchase price of the bond(s). If the earnings for a given pay period do not cover the authorized bond deduction, do not take the deduction for that pay period.

3. Bond Dating. A bond is dated as of the first day of the month in which at least one-half of the purchase price is accumulated, regardless of the number of payroll deductions required to complete the full purchase price for issuance of the bond. This provision

permits the purchase of larger denomination of bonds without loss of interest. The full purchase price must be deducted before the bond is issued.

4. Authorization and Discontinuance

a. Employee completes and submits SBD 2104 to:

(1) Authorize payroll deduction,

(2) Change deduction, bond denomination, bond ownership or address, or:

(3) Stop deduction.

b. A separate authorization (SBD 2104) is required for each allotment.

5. Employee Transfers

★ a. Individual transfers. For employees transferred within the same DoD Component or from another federal agency, the CSR shall require that the employee file a new SBD 2104 to continue bond deductions. Retroactive bond deductions are not authorized.

b. Mass transfers. Refer to subparagraph 060303.C.4 for procedures involving mass transfers.

★ L. Payment of dues to a professional or other association. An employee may have only one allotment at a time to an association. Dues for these organizations are allowed under 5 C.F.R. 550.311/550.331 (reference (l)) and DoD 1400.25-M, subchapter 251 (reference (u)).

M. Voluntary allotment for alimony and/or child support. The pay regulations of the OPM in 5 C.F.R. 550.371 (reference (l)) provide for the use of voluntary allotments to effect payment for child support and/or alimony. Garnishment orders issued for alimony and/or child support obligations shall continue to be enforced as involuntary deductions as discussed in section 0412, above. Requests for voluntary allotment for alimony and/or child support shall be verified against legal agreements or court orders to ensure proper registration. A written request from the employee to the civilian payroll office shall be used to substantiate the allotment. The request shall contain the name and address of the designated allottee, the amount of the allotment, and the signature of the prospective allotter. The allotment may be in dollars and cents. The employee shall agree that any dispute regarding the voluntary allotment is a matter between the allotter and the allottee.

★ N. An allotment to a political action committee was approved by the DoD Deputy Comptroller's memorandum of May 26, 1994 (reference (f)).

041403. Allotments Not Authorized. The following allotments are not authorized:

- A. Collection of debts to private creditors and nongovernmental agencies;
- B. Contributions to charities, except as authorized in subparagraph 041402.J.;
- C. Payment of insurance premiums, except as authorized in subparagraphs 041402.C. and 041402.D.; and
- D. Payment of dues to civic, fraternal or other organizations, except as authorized in this paragraph.

041404. Eligibility Rules. Eligibility for the making of an allotment is dependent on such factors as residence of employee, place of employment and type of allotment desired. The specified rules listed below are summarized in Table 4-6. The table must be used in conjunction with the specific rules listed below.

A. An employee may make an allotment of pay as provided in subparagraphs 041402.A., 041402.B.1., and 041402.C. through F., and 041402.K. through M. when the employee is:

- 1. Assigned to an OCONUS post of duty;
- 2. Working on an assignment away from their regular post of duty when the assignment is expected to continue for 3 months or more; or
- 3. Serving as an officer or member of a crew of a vessel under the control of the U.S. Government.

B. An employee whose place of employment is within the continental United States (CONUS) may authorize an allotment of pay as provided in subparagraphs 041402.B.2., 041402.E., and 041402.K. through M.

C. An employee working outside his or her state of residence who has a legal obligation to pay income taxes to the state or the District of Columbia, but the agency has no legal obligation to withhold those taxes, may make an allotment of pay for the purpose specified in subparagraph 041402.G.

D. An employee who has a legal obligation to pay city and/or local taxes, but the agency has no legal obligation to withhold those taxes, may make an allotment of pay for the purpose specified in subparagraph 041402.H.

★ E. An employee who meets the eligibility requirements prescribed in DoD 1400.25-M, subchapter 711 (reference (u)) as a labor organization member may make an allotment of pay for the purpose of payment of labor organization dues as specified in subparagraph 041402.I.

F. An employee who meets the eligibility requirements prescribed in DoD Directive 5035.1 (reference (al)) may make an allotment of pay for charitable contributions to CFC as specified in subparagraph 041402.J.

041405. Emergency Allotments. Allotments may be authorized to become effective during an emergency evacuation. Such allotments will not become effective until an evacuation order has been issued. See 5 C.F.R. 550.401-550.407 (reference (l)).

041406. Allotments for Foreign Nationals. Foreign nationals employed by the Department and working outside their own country on assignments of 3 or more months duration may be permitted to make allotments for any of the purposes authorized in paragraph 041402., providing all other provisions of section 0414 are observed.

1. Foreign nationals employed by DoD Components to work in their own countries or in the Canal Zone may be permitted to make allotments for the purposes shown in subparagraphs 041402.I. and J. and to pay premiums on group health benefits and group life insurance subject to the provisions of any agreement between the U.S. Government and the foreign national's country of citizenship.

2. Foreign nationals may be permitted to make other allotments from pay when such allotments are based on local customs and practices or are pursuant to treaties or country-to-country agreements.

041407. Allotment Limitations

A. A power of attorney will not be accepted to establish, change, or discontinue an allotment.

B. Allotment payments shall be made in accordance with the schedule established by the Department provided such allotment checks are not issued until the related earnings have accrued. This shall be stipulated as a requirement for the allotment.

C. Except as provided by subparagraphs 041402.B., K., and M., a DoD employee shall not have more than one allotment payable to the same allottee at the same time.

D. Allotments will not exceed the pay due the allotter.

041408. Discontinuance of Allotments. Allotments shall be discontinued under the following conditions--

A. Upon receipt of:

1. Notice of retirement or separation of the allotter.

2. Notice that the allotter has been placed in an extended LWOP status.
 3. Written notice from the allotter to cancel the allotment, unless this right is otherwise restricted by law or established labor agreement.
 4. Notice of death of the allotter. Payment will not be made after notice of the allotter's death, even though deductions were made from the allotter's pay and not paid to the allottee.
 5. Notice of death of allottee. Upon notice of the death of any person to whom an allotment is payable, the civilian payroll office shall stop the allotment and notify the allotter. All nonnegotiated allotment checks must be returned to the disbursing officer for cancellation. After these checks are canceled, the civilian payroll office shall refund the money to the allotter.
 6. Notice that the whereabouts of the allottee is unknown.
- ★
7. FMS Form 2231 or DD Form 2762 with the "cancel" block marked.
 8. SF 1199A with \$0.00 in the allotment amount block.
- B. When the conditions under which an allotment was permitted no longer exist.
- C. When the allotter transfers to an installation serviced by a different civilian payroll office, except for:
1. An allotment for CFC contribution, or
 2. A labor organization dues authorization (when the employee remains within the same bargaining unit).

041409. Allotments - Savings

A. Procedures

1. Allotment Changes or Cancellations

★ a. Changes. A change in the amount of the allotment, financial organization, or savings account to be credited requires a new SF 1199A, FMS Form 2231, or DD Form 2762 to be executed in accordance with instructions on the form. Insert the new allotment amount, not the amount of the change, in the amount block.

b. Cancellations. Refer to paragraph 041408 for conditions under which an allotment is stopped.

2. Payroll Procedures

★ a. Effective Date. Deductions for allotments will be made the first pay period beginning after receipt of the properly executed SF 1199A, FMS Form 2231, or DD Form 2762.

b. Allotment Deductions. Deductions for allotments shall be made each pay period and shall be taken in accordance with the order of precedence outlined in section 0402. If the net pay, after applying all payroll deductions otherwise required, is less than the allotment amount when only one allotment is authorized, the allotment shall be nullified for that pay period. If the net pay is less than the aggregate amount when two such allotments are authorized, both shall be nullified for that pay period.

c. Routing Number. A nine-digit number shall identify each financial institution. Rand McNally and Company, agent for the American Banker's Association, assigns the routing number. This number is the identification information which Automated Clearing House (ACH) distributes payments to financial institutions. An ACH is a facility that performs inter-bank clearing of paperless entries for participating financial institutions.

B. OCONUS Allotment Procedures

1. An employee shall meet one of the requirements below before they can make an OCONUS allotment. The employee must be:

- a. Assigned to an OCONUS post of duty;
- b. Working on an assignment away from his or her their regular post of duty that is expected to continue for 3 months or more; or
- c. Serving as an officer or member of a vessel under the control of the U.S. Government.

2. Only allotments in whole dollar amounts (or equivalent in value) shall be permitted. Refer to paragraph 041404 for authorized allotments for OCONUS employees.

041410. Withholding

A. Full deductions shall be effected each pay period if the salary is enough to cover the deduction, even if an employee is in a pay status for only part of a pay period. No deductions shall be made if the salary amount is insufficient to cover the deduction.

B. Retroactive deductions shall not be made for a period in which the employee's net pay was not enough to withhold the allotment. Adjustments shall not be made in future pay periods for amounts the civilian payroll office failed to deduct in the current pay period,

unless requested by the employee in writing. The civilian payroll office shall make adjustments for overdeductions.

0415 THRIFT SAVINGS PLAN

★ 041501. General. The Thrift Savings Plan (TSP) is a retirement savings and investment plan for federal employees. The Congress established the plan as part of the Federal Employees' Retirement System Act of 1986 (P. L. 99-335) (reference (e)) and (5 U.S.C. 8431-8440d) (reference (b)). The plan offers both FERS and CSRS employees tax deferral advantages similar to those on an individual retirement account (IRA). The Federal Retirement Thrift Investment Board which operates the plan solely for the benefit of the participants and their beneficiaries, administers the plan. The recordkeeper for the plan is the NFC in New Orleans, Louisiana. The NFC issues TSP Bulletins providing necessary guidance relating to TSP operations. All Bulletins are to be retained pending NFC's disposition instructions. See 5 U.S.C. 8331(3) (reference (b)) and TSP Bulletin 96-33 (reference (an)) for the definition of basic pay for determining TSP contributions. TSP deductions for reemployed annuitants are based on the gross salary, not the net amount after subtraction of the offset. Temporary Appointment Pending Establishment of a Register (TAPER), Term, and indefinite appointees may participate in TSP. Employees on temporary (not to exceed 1 year) or intermittent appointments are not generally covered by FERS or CSRS and are not eligible to participate in TSP (TSP Bulletin 87-22) (reference (an)).

 041502. Participation Rules. Both FERS and CSRS employees are eligible to join the TSP plan.

 A. FERS employees may contribute up to 10 percent of their basic pay per pay period to the plan.

 B. FERS employees receive agency matching contributions up to 5 percent of their basic pay contributed each pay period. The matching is dollar for dollar on the first 3 percent contributed and fifty cents on the dollar for the next 2 percent.

 C. FERS employees receive agency automatic contribution of one percent of basic pay whether or not they contribute to their TSP accounts.

 D. CSRS employees may contribute up to 5 percent of basic pay per pay period. CSRS employees, however, do not receive any agency matching or automatic contributions.

 E. All contributions must be made through payroll deductions. Lump-sum contributions are not permitted. See Table 4-8 for the annual elective deferral amounts.

 F. Employees may contribute either a whole percentage of pay or a whole dollar amount.

 041503. When to Begin TSP Deductions. Elections made during an open season become effective no earlier than the first full pay period beginning in the last month of that open

season. Initial enrollment or a change to an enrollment can only occur during the TSP open season. The choice to stop contributing to TSP is permitted at any time, however, and is effective at the end of the pay period in which that election is accepted by the HRO.

041504. Enrollment

★ A. Employees obtain the Form TSP-1 (TSP Election Form) from the HRO. If available, employees may also enroll by accessing an interactive voice response (IVR) system or WEB site to make the appropriate TSP election.

B. FERS and CSRS employees can allocate contributions among three investment plan funds.

1. G Fund which consists of investment in U.S. Government securities.

2. F Fund which is invested in guaranteed private-sector investment contracts, certificates of deposit and other securities that offer a specified interest rate.

3. C Fund which is invested in an index of common stocks.

★ C. A copy of the Form TSP-1 is forwarded to the civilian payroll office from the HRO. For those civilian payroll offices using the personnel-pay interface, the data to establish the TSP contributions in the master record will flow electronically to the civilian payroll office. However, all offices must work closely with the HRO to ensure accurate data is established for the employee in accordance with the information provided on the Form TSP-1. For employees who enroll by accessing an IVR system or WEB site, the automated election is processed electronically using the personnel-pay interface and no hard copy of the TSP-1 is forwarded to the civilian payroll office.

041505. Biweekly Processing and Accounting Procedures

A. A no-check-issue procedure is used to transfer to the NFC the amount collected from employee TSP deductions, as well as the agency contributions. Under this procedure, the disbursing office does not use a check as the means of payment to the NFC. Funds are transferred to the NFC using the DoD accounting procedure and the TSP Journal Voucher (Form TSP-2 or certified automated listing).

B. Credit the amounts due the NFC to the following accounts:

--F3886.6010, Employing Agency Automatic Contributions to FERS Thrift Savings Plan. (Includes the automatic 1 percent of salary contribution by the employing agency on behalf of all FERS employees.)

--F3886.6020, Employing Agency Contribution to Thrift Savings Plan G.

--F3886.6030, Employing Agency Contribution to Thrift Savings Plan F.

--F3886.6040, Employing Agency Contribution to Thrift Savings Plan C.

--F3886.6060, Employee Contribution to Thrift Savings Plan G.

--F3886.6070, Employee Contribution to Thrift Savings Plan F.

--F3886.6080, Employee Contribution to Thrift Savings Plan C.

★ C. Prepare Form TSP-2 in accordance with the TSP voucher/summary type output product that is produced from the automated system or use a certified automated listing. After certification, the journal voucher (or certified listing) is forwarded to the NFC together with the TSP file produced for that pay period. The NFC requests receipt of the journal voucher (or certified listing) and file no later than 2 workdays prior to the actual payroll payment date. If the Acknowledgment of Processing Letters issued by the NFC do not arrive within 10 work days for CONUS civilian payroll offices or within 15 workdays at overseas locations after the TSP file has been transmitted to the NFC, contact the recordkeeper to determine if a processing letter was issued or what type of problem exists concerning the processing cycle in question.

★ D. A TSP file processing log shall be maintained to monitor TSP file transmissions to the NFC. The log, at a minimum, must include report number, pay date, pay period number, date of certification, date transmitted, date processed by the NFC and amounts processed. The contribution amounts contained on the original journal voucher (or certified listing) shall be compared with the processed TSP contributions per the Acknowledgment of Processing Letters, the Payroll Recapitulation Report (rejected items), and the TSP contributions per the Statement of Transactions to ensure that the amounts processed by the Recordkeeper agree or can be reconciled with amounts submitted by the civilian payroll office. The log need not be limited to the above items. It can include such additional data as date of initial run, recycle dates, date of the final run or other data that would be helpful in the TSP file processing cycle.

041506. Correction Procedures

A. The NFC has published regulations governing the correction of errors (TSP Bulletin 97-3) (reference (an)). Procedures for reporting payments and adjustments for previous calendar years are contained in TSP Bulletin 90-22 (reference (an)).

B. Civilian payroll offices shall process TSP adjustments within 14 days of when the rejections or deletions are received.

041507. TSP Discrepancies

★ A. TSP discrepancies are differences between amounts entered in and charges made by the Department of the Treasury to the DoD TSP clearing account based on transactions transmitted to the NFC on TSP files and adjustment record input. The differences may be caused

by changes made to the TSP file before it is sent to the NFC, where entries are not adjusted accordingly; or transactions that were rejected by the NFC but were not resubmitted, resulting in no charge to the TSP clearing account.

★ B. The civilian payroll office shall ensure that all transactions involving money amounts submitted on the TSP file or as adjustments have a corresponding entry.

0416 TSP LOAN PROGRAM

041601. General. Under 5 U.S.C. 8433(i) (reference (b)), all TSP participants currently employed are eligible to obtain a TSP loan. A maximum of two TSP loans per employee can be current.

★ 041602. Types of Loans. Loans can be made for the following purposes:

- A. Residential; and
- B. General purpose.

For additional information, see TSP Bulletin 96-33 (reference (an)).

041603. Loan Minimum. The minimum amount of a TSP loan is \$1,000. Employees may borrow only their own contributions and earnings.

041604. Interest Rate. The interest rate shall be the posted rate for the G Fund at the time the terms of the loan are established. The rate is fixed at that level for the life of the loan, and the interest paid on the loan shall go back to the employee's own TSP account and is not tax deductible.

041605. Biweekly Processing and Accounting Procedures

A. The civilian payroll office shall receive Form TSP-22 (TSP Loan Payment Allotment Form) from the NFC after it has issued a payment to the employee. An official at the NFC must properly certify this form. The certified Form TSP-22 shall contain the TSP loan number, pertinent employee data, the repayment information and the DD/EFT routing number.

B. Loan repayment via DD/EFT. This procedure shall be used for installations having DD/EFT capabilities. TSP loan repayments shall be established as allotments in the employee's master record. Accounting procedures are the same as those currently used for disbursement of net pay and other types of allotments except the same type of checkless remittance and TSP clearing account procedures used for TSP savings deductions are to be utilized.

C. Loan repayment using other than DD/EFT procedures. Utilize the same type of checkless remittance and TSP clearing account procedures currently used for TSP savings deductions (see paragraph 041505). The TSP loan clearance account is --X3886.6090. Prepare the

TSP loan payment input and related journal vouchers in accordance with the procedures provided in TSP Bulletin 88-26 (reference (an)). Loan payment data and the journal voucher shall be express mailed to the NFC.

★0417 LOST TSP EARNINGS DUE TO AGENCY ERROR

★ 041701. Authority. Title 5 C.F.R. Part 1606 (reference (l)) implemented section 2 of P.L. 101-335 (reference (e)), which provides statutory authority for employing agencies to pay to the TSP amounts representing lost earnings resulting from agency errors. If an employee receives pay from which employee contributions should have been deducted, but as a result of agency error, all or any part of those deductions were not made, then even if the employee makes up those employee contributions, the belated employee contributions shall not be subject to lost earnings. The following are conditions that require payment of lost earnings:

★ A. Delayed or Erroneous Contributions When Employee Received Pay

★ 1. If an employee receives pay, but as a result of an agency error all or any part of the Agency Automatic Contributions (1 percent) associated with that pay are not timely received by the TSP Recordkeeper, the belated contributions shall be subject to lost earnings.

★ 2. If an employee receives pay from which his or her contributions were properly deducted but, as a result of an agency error, all or any part of the associated agency matching contributions were not timely received by the TSP Recordkeeper, then the belated contributions will be subject to lost earnings.

★ 3. If an employee receives pay from which his or her contributions were properly deducted but, as a result of an agency error all or any part of those employee contributions were not timely received by the TSP Recordkeeper, the belated contributions will be subject to lost earnings.

★ B. Agency Delay in Basic Pay. Where, as the result of an agency error, an employee does not timely receive all or any part of basic pay to which entitled, all such belated employee contributions, Agency Automatic Contributions (1 percent), and agency matching contributions shall be subject to lost earnings.

★ C. Fund Errors. An employing agency will be required to pay lost earnings on contributions that, due to an agency administrative error, are incorrectly invested.

★ D. Late Payroll Submissions. All contributions contained in a payroll submission received by the TSP Recordkeeper more than 30 days after the pay date associated with that payroll submission shall be subject to lost earnings.

★ E. Loan Allotments. Loan allotments deducted from an employee's pay but not timely received by the TSP Recordkeeper due to agency error shall be subject to lost earnings.

★ 041702. Minimum Dollar Amount. Lost earnings on loan allotments and late contributions shall be calculated by the TSP system only for those contributions and loan allotments that are \$1 or more.

★ 041703. Agency Responsibility. The employing agency whose error caused a late or erroneous investment of money in the TSP is responsible for payment of any lost earnings resulting from that error. The civilian payroll office that submitted payment records or loan allotments that are subject to lost earnings is also responsible for submitting the appropriate lost earnings records relating to those submissions. The amount of lost earnings that is calculated shall be charged to the TSP clearing account of the submitting civilian payroll office. Where another employing agency caused the late or erroneous submission by the submitting civilian payroll office, the civilian payroll office that was charged for the amount of lost earnings calculated should seek reimbursement from the other civilian payroll office.

★ 041704. TSP Clearing Account. The civilian payroll office shall prepare the TSP record (51-record) and the TSP-2-E (Request to Calculate Lost Earnings: Certification of Transfer of Funds and Journal Voucher) for submission to the NFC for processing and calculation of the lost earnings. The NFC shall forward detailed reports back to the civilian payroll office. The civilian payroll office shall prepare and process an SF 1081 (Voucher and Schedule of Withdrawals and Credits) to charge the employing activity fund and credit the TSP clearing account --F3886 for the amount of lost earnings. Ensure that the SF 1081 is processed expeditiously once the detailed reports are received from the NFC in order to avoid the TSP lost earnings clearing account reflecting a negative balance at month end. The amount of lost earnings calculated by the NFC shall be charged to the civilian payroll office TSP account --F3886 as reported on the TSP-2-E.

★ 041705. For detailed information concerning the lost earnings process, refer to TSP Bulletins 90-39, 90-40, 90-41, 90-42, 91-3, 91-4, 91-34, 92-29, 95-13, and 98-21 (reference (an)). The TSP Bulletins are available on the Internet at <http://www.tsp.gov>.

0418 TAX LEVY FOR UNPAID FEDERAL INCOME TAX

041801. Levying Official and Levy Restrictions. IRS District Directors are authorized under 26 U.S.C. 6331 (reference (ad)) to collect delinquent federal income taxes by levy on the salary or wages of any U.S. or D.C. employee. The levy is served against the "take-home pay" of the employee and shall attach only to the salary check or cash disbursement the employee would receive on payday if it were not for the levy. Employees shall not be allowed to increase or add any voluntary allotments after a levy is received in the civilian payroll office. Changes that increase existing voluntary allotments are only authorized after the total tax liability has been paid or arrangements made with the IRS.

041802. Procedures. Form 668-W (Notice of Levy (NOL)) shall be served in person or by mail. Service by mail is limited to the United States, its territories and possessions, and ships at sea. The NOL is served on the civilian payroll office responsible for payments to the employee. All civilian payroll offices will honor the NOL whether served in person or by mail. Once an NOL is received, it shall continue in effect until the collection is complete or until the IRS releases the

levy. The IRS shall send an original and two copies of the NOL. The civilian payroll office shall sign and date all copies and enter the time of receipt on the forms.

041803. Authorization to Start Deductions. The civilian payroll office shall make deductions from the current salary of indebted employees if one of the conditions below exist:

- A. The NOL is served by an employee of the IRS in person or by mail.
- B. Agreement in writing has been made between an indebted employee and the IRS to liquidate the debt through regular deductions.

041804. Wages Subject to Levy

A. The NOL attaches the gross amount of the accrued wages or salary, less the following:

- 1. Social Security and/or Medicare deductions,
- 2. Retirement deductions,
- 3. FEHB deductions,
- 4. FEGLI deductions,
- 5. Pay attached or garnished for child support or alimony,
- 6. Overpayments due the U.S. Government,
- 7. Allowable personal exemptions, certified on Form 668-W, parts 5 and 6 subtitled "Statement of Exemptions."

B. All voluntary allotments and bond allotments are considered items of pay that may be subject to the NOL. The civilian payroll office shall not start a new voluntary allotment or bond allotment after the levy is received. Unless the IRS instructs the civilian payroll office that a deduction should not be allowed, the taxpayers payroll deductions which were in effect when the levy was received shall be allowed when determining the employee's take home pay. The civilian payroll office shall send the IRS the taxpayer's take home pay minus the allowable exceptions. This action shall be continued until the full amount of the levy has been paid to the IRS. The NOL shall contain instructions for figuring the allowable exceptions from the levy. The IRS may notify the payroll office when different procedures should be followed for specific employees.

041805. Notice to Employees

A. Parts 3, 4, and 5 of Form 668-W permit a biweekly personal exemption for the employee and a biweekly exemption for each dependent. The IRS changes the amounts each

year. See IRS Publication 1494 (reference (ao)). A copy of the current amounts is included with the NOL. The employee shall certify his or her exemptions on parts 3 and 4 of the form.

B. Upon receipt of the NOL, the civilian payroll office immediately shall advise the employee in writing. The letter must include Form 668-W, parts 2, 3, 4, and 5, as an enclosure. For a sample letter see Figure 4-2.

C. Normally, an employee is allowed 3 workdays to return parts 3 and 4 of Form 668-W after receipt. Civilian payroll offices shall establish timely follow-up procedures to ensure that Form 668-W is returned within 3 workdays after receipt of the notification letter. The return date for Form 668-W shall be determined by estimating the mail transit time and adding 3 workdays. The civilian payroll office shall request guidance from the IRS office that issued the levy if known circumstances exist (employee is on leave, TDY, etc.) that may delay return of the form. When parts 3 and 4 are not returned within the 3-day period, and no unusual circumstances exist, a dependency exemption shall not be allowed until the form is returned. The minimum personal exemption amount shall be allowed the employee for each pay period until parts 3 and 4 of Form 668-W are received in the civilian payroll office.

D. The civilian payroll office shall return the original part 1 of Form 668-W to the IRS office that ordered the collection with the check for the first deduction made under NOL. The civilian payroll office shall return part 3 to the IRS with the check for the first deduction made after the employee returns the properly completed part 3. If the employee is required by a court judgment (made before the date of the levy) to contribute to the support of minor children, that amount of salary, wages, or other income is already exempt from the levy. Therefore the employee must not list these minor children, as exemptions on parts 3, 4, and 5 of Form 668-W.

E. If the civilian employee has been reassigned to an organization serviced by another civilian payroll office, the losing civilian payroll office shall inform the cognizant IRS District Director of the employee's new address. The losing civilian payroll office shall mail the complete NOL package to the new civilian payroll office for processing.

F. If the employee has moved from overseas, transferred to another federal agency, separated or retired, the civilian payroll office will:

1. Return the NOL to the IRS District Director; and
2. Note the employee's new address, if known, on the bottom of the NOL.

G. If the civilian payroll office receiving the NOL has no record that payroll service has been furnished the employee, annotate that fact on the bottom of the NOL and return it to the cognizant IRS District Director.

041806. Evidence Received That the Tax Has Been Paid

A. If an employee produces evidence that the full amount of the tax has been paid, the civilian payroll office shall record on the NOL:

1. The date of payment;
2. The manner in which the levy was paid; and
3. The office of the IRS District Director to which payment was made.

B. Adequate evidence of payment shall be the stub of the money order or the canceled check showing payment to the IRS. If payment was made by money order, the number and location of the issuing agent shall be shown on the stub. If payment was made by check, the name and location of the bank, and endorsement by the IRS shall be shown. There are two forms issued by the IRS that are also acceptable as evidence of payment: Form 668-R (Release of Levy on Wages, Salary, and Other Income) and Form 668-G (Provisional Release of Levy on Wages, Salary, and Other Income). Either form serves as valid notice of payment or release. If no deductions were made from an employee's salary or wages, the civilian payroll office shall return all annotated copies of the NOL to the issuing IRS Center. The civilian payroll office shall not keep the NOL. If an overdeduction has been made, the civilian payroll office shall annotate the amount on the Form 668-R or 668-G and return the form to the IRS. The IRS shall then provide a refund to the employee of any excess money collected. The civilian payroll office shall inform the employee of this process and instruct them to contact the IRS office that issued the NOL if no refund is received within 60 days after the civilian payroll office has forwarded amounts from the levy to the IRS.

Lump-Sum Annual Leave Repayment

REPAYMENT OF LUMP-SUM ANNUAL LEAVE		Date
To:	From:	
<p>Under the provisions of the Lump-Sum Payment Act (December 21, 1944), the following statement is furnished for submission with your federal and state income tax returns for calendar year _____</p> <p>_____</p> <p style="text-align: center;">Name and Number of Employee</p> <p>refunded during the calendar year _____ the sum of \$_____, representing refund of Lump-Sum Annual Leave payment under the provisions of the Lump-Sum Payment Act. The Form W-2 (Wage and Tax Statement) for calendar year _____ has not been decreased by this amount.</p>

Figure 4-1 (Lump-Sum Annual Leave Repayment Sample Format)

Sample Notice of Levy Letter

Dear _____,

This office has received a Notice of Levy for federal income tax against your pay for \$_____. This attachment against your pay shall remain in effect until the total debt has been collected.

From receipt of this letter, you have three working days to complete the enclosed IRS Form 668-W. Return parts 3 and 4 in the enclosed self-addressed envelope; parts 2 and 5 are for your records.

If you do not return the IRS Form 668-W, within 3 working days, a personal exemption of \$_____ per pay period will be your biweekly salary. The remainder of your check will be forwarded to the IRS.

If you have any questions concerning this levy, contact the IRS through the 1-800 number that appears on the attached IRS Form 668-W.

If we can be of any further assistance, please contact our office at _____ between the hours of 7:30 a.m. and 4:00 p.m. Monday through Friday.

Sincerely,

Enclosures

	****				****

*The maximum tax may vary based on cost of living increases. The Secretary of Health and Human Services publishes in the Federal Register, by November 1 of each year, the amount of gross pay from which deductions is to be made.

** The combined rate of Social Security/Medicare for 1984 was 7 percent. Employees were given a .3 percent credit applied to the portion.

*** Beginning in 1991, maximum gross wages were separated for Social Security and Medicare purposes. The maximum gross pay allowed for Social Security is listed first followed by the maximum for Medicare.

**** There are no maximum gross wages subject to Medicare tax and no maximum tax.

★Table 4-6 (Allotments of Pay)

CHAPTER 5**LEAVE****0501 GENERAL REQUIREMENTS**

★ 050101. Eligibility. The type, amount, and nature of leave benefits are dependent on the type and length of employment, military status, and other eligibility requirements. See DoD 1400.25-M, subchapter 630 (reference (u)), 5 U.S.C., chapter 63 (reference (b)), and 5 C.F.R., Part 630 (reference (l)).

050102. Objectives. The leave objectives to be met by payroll operations and systems are as follows. Leave records shall be properly maintained for each employee; leave shall be accurately accrued; leave taken shall be properly authorized and reported; and information on leave use and accrual shall be accurately determined and promptly reported to facilitate collection of certain leave-related debts from employees and for preparation of financial reports, including those for cost accounting purposes.

050103. Documentation. Leave records shall be maintained to show the following for each employee: rate of accrual for each type of leave; hours or days accrued and used by leave type; and hours or days advanced by leave type. Additional documentation requirements for specific types of leave are described in this chapter in the paragraphs discussing the type of leave. The mechanized leave record is created automatically from accession leave data obtained from information on the SF 50 and SF 1150. Annual and sick leave balances for employees transferring in are furnished to the civilian payroll office on the SF 1150. Prior to receipt of the SF 1150, the leave balances from the last LES issued the employee by the losing civilian payroll office may be used. Upon receipt of the SF 1150, the gaining civilian payroll office makes any necessary adjustments. See subparagraph 090202.C. for additional guidance.

050104. Accruals

A. The leave year begins with the first full pay period starting in the calendar year. For leave accruals, the civilian payroll system shall contain accurate information on the type of appointment for each employee and the leave hours or days to which the employee is entitled. Leave earned shall be accurately accrued for each type of leave using correct rates effective at the proper times. Reductions shall be made at the beginning of each leave year for accumulated leave exceeding statutory limits. Reductions shall be made in accruals for annual and sick leave when necessary to reflect extended leave without pay or absence without leave.

B. Annual and sick leave earned shall be posted to an employee's record each pay period before leave taken in that period is charged against leave balances. During a pay period in which an employee's service is interrupted by a non-leave-earning period, he or she earns leave on a pro rata basis (5 C.F.R. 630.204) (reference (l)). For example, leave shall be prorated when an employee has reemployment rights in connection with military service, both at the time of

separation and at the time of reemployment, and both separation and reemployment occur within the normal biweekly pay period; when an employee is in receipt of injury compensation, both at the beginning and at the end of the nonpay status, and the nonpay status begins and ends within the normal biweekly pay period; when an employee transfers to an agency having a different pay period; when an employee is restored after a period of unwarranted suspension or removal for which retroactive compensation is paid; and when an employee is attending school or college as a student trainee. Full-time and part-time employees who change to an intermittent work schedule during the pay period are eligible to have their leave accruals prorated. See Table 5-1 for proration of leave.

050105. Approval. To support the time and attendance record, employees shall request approval of leave. Leave used shall be documented and approved in writing by a supervisor designated to make such approvals. Documentation for leave used shall show the dates, times, and types of leave taken. Employees may not be compensated for leave taken in excess of leave accrued except for religious observances taken for which compensatory time off for religious reasons was not worked in advance and for authorized advance leave.

★ 050106. Minimum Charge. Unless an agency establishes a minimum charge of less than 1 hour, or establishes a different minimum charge through negotiations, the minimum charge for leave is 1 hour, and additional charges are in multiples thereof. It is Department policy, as stated in DoD 1400.25-M, subchapter 630 (reference (u)), that minimum charges of less than six minutes shall not be established.

050107. Interfaces. The payroll system shall be integrated or interfaced with general ledger and cost accounting systems to ensure prompt and accurate collection of health and life insurance premiums from employees on unpaid leave, when required, and court reimbursements for time served as a juror while on court leave, when required. Amounts of leave accrued and used and their related values shall be maintained to compute leave expenses and liabilities by designated general ledger and cost accounting classifications and to report externally.

050108. Conversions. See Table 5-2 for conversions when there is an insufficient amount of the type of hours requested.

0502 ANNUAL LEAVE

050201. General. Annual leave is absence with pay for personal and emergency purposes. An absence that is otherwise chargeable to sick leave may be charged to annual leave if requested by the employee and approved by the supervisor. Other than for the liquidation of advance sick leave indebtedness, the retroactive substitution of annual leave for sick leave is not authorized. A substitution of annual leave for sick leave may not be made retroactively for the purpose of avoiding a forfeiture of annual leave at the end of the leave year.

050202. Amount of Annual Leave Earned

A. Full-time and part-time employees earn annual leave. Intermittent employees (that is, employees with no scheduled tour of duty) do not earn annual leave. Employees who are appointed to positions not limited to less than 90 days are entitled to annual leave earning upon completion of the first biweekly pay period. Employees whose current employment is limited to less than 90 days are entitled to annual leave earning only after being currently employed for a continuous period of 90 days under successive appointments without a break in service. After completing the 90-day period, employees are entitled to be credited with the leave that would have accrued during those 90 days.

B. The amount of annual leave earned depends on the length of service. Full-time employees with less than 3 years of service earn 4 hours of annual leave per biweekly pay period. Full-time employees with 3 years, but less than 15 years of service, earn 6 hours per biweekly pay period. In the last full pay period of the calendar year, they earn 4 additional hours. Full-time employees with 15 or more years of service earn 8 hours per biweekly pay period. Employees must be employed for the full biweekly pay period to be entitled to accrue annual leave for that period. An employee is considered to have been employed for a full biweekly pay period if he or she is employed during the days falling within that period, exclusive of holidays and nonworkdays established by federal statute, Executive Order, or administrative order (5 U.S.C. 6302(b)) (reference (b)).

★ C. Each time the number of hours in a nonpay status, which includes all nonpay hours, in a full-time employee's leave year equals the number of base pay hours in a pay period, the civilian payroll system shall reduce his or her credits for leave by an amount equal to the amount of leave the employee earns during the pay period. When an employee's number of hours of nonpay status does not require a reduction of leave credits, the civilian payroll system shall drop those hours of nonpay status at the end of the employee's leave year. An employee in the Office of Workers Compensation Program does not accrue leave; therefore, reduction in leave credits is not required.

D. Part-time employees with regularly scheduled tours of duty earn leave for the time they are in a pay status. Part-time employees with less than 3 years of service earn 1 hour of annual leave for each 20 hours in a pay status. Part-time employees with 3 years, but less than 15 years of service, earn 1 hour of annual leave for each 13 hours in a pay status. Part-time employees with 15 or more years of service earn 1 hour of annual leave for each 10 hours in a pay status. Hours in a pay status in excess of an activity's basic working hours (normally 80 hours) in a pay period are disregarded in computing the leave earnings of a part-time employee. Part-time employees may carry over from one pay period to the next those excess hours that are not evenly divisible by 10, 13, or 20 hours, as applicable. These hours will be added to the next pay period work hours for leave accrual. See 5 C.F.R. 630.202 (b) and 630.303 (reference (l)).

E. Annual leave earned shall be posted to an employee's record each pay period before annual leave taken in that period is charged against annual leave.

050203. Uncommon Tours of Duty, Leave Accruals, and Charges to Leave

★ A. Employees who work a 24-hour shift or a 72-hour workweek, such as firefighters, accrue and use leave based on the uncommon tours of duty. The 72-hour workweek leave accrual for up to 3 years of service is 7 hours 12 minutes per biweekly pay period. For 3 to 15 years of service, the accrual is 10 hours 48 minutes per biweekly pay period and 18 hours for the last full pay period. For 15 or more years of service, the accrual is 14 hours 24 minutes per biweekly pay period. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ B. Employees with up to 3 years of service who work standby tours of 56-hour workweeks, such as fire chiefs, accrue 5 hours and 36 minutes per biweekly pay period. Employees with 3 to 15 years of service accrue 8 hours and 24 minutes per biweekly pay period and 14 hours the last full pay period. Employees with 15 or more years of service accrue 11 hours and 12 minutes per biweekly pay period. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ C. Employees who work uncommon tours of duty are charged leave on an hour-for-hour basis for time off. For example, an employee working a 72-hour workweek would be charged 72 hours for a week's absence. See 5 C.F.R. 630.210 (reference (l)) and DoD 1400.25-M, subchapter 630 (reference (u)).

050204. Limitations and Variances

A. The maximum carried forward from one leave year to another is usually 240 hours. See paragraph 050408 regarding unlimited annual leave carryover for civilian DoD employees who are employed at installations that are facing planned base closures. Employees stationed outside the United States, who meet the conditions for eligibility established by 5 U.S.C. 6304(b) (reference (b)) and 5 C.F.R. 630.302 (reference (l)), may carry forward a maximum of 360 hours. Employees returning from an OCONUS assignment outside the continental United States (OCONUS) may carry forward the balance of leave to their credit at the end of the pay period which includes the date the employee departs for reassignment. If an employee is placed on detail to another OCONUS assignment, the date he or she ceases to perform duty at the detailed post is considered the date the employee departs for reassignment. Annual leave in excess of 240 hours, which was accumulated under 5 U.S.C. 6304(b) (reference (b)) by an employee who becomes subject to the 240 hour maximum carry forward, remains to the credit of the employee until used. The excess annual leave is reduced at the beginning of the first full biweekly pay period occurring in a leave year, by the amount of annual leave the employee used during the preceding year that is in excess of the amount which accrued during that year. This process continues until the employee's accumulated leave does not exceed 240 hours.

★ B. The following formula is used to arrive at the maximum hour accumulation for a newly assigned standby employee who has a 30-day maximum accumulation. Multiply 240 times the number of hours in the standby workweek; then divide the result by 40. Using this formula, the maximum accumulation for an employee with a 72-hour standby workweek would be 432 hours. For an employee with a 56-hour standby workweek, the maximum accumulation would be 336 hours.

C. There is a 90-day (720-hour) maximum limitation on the amount of annual leave that an SES member may carry over from one leave year to the next. SES members with accumulated annual leave that exceeds 90 days (720 hours) are allowed to retain their excess annual leave in a personal leave ceiling as of the first day of the first applicable pay period beginning after October 13, 1994. The amount of annual leave credited to an SES member's personal leave ceiling will be based on the amount of annual leave accumulated by the employee as of the end of the pay period preceding the first applicable pay period beginning after October 13, 1994. Annual leave accrued for any pay period during only a portion of which the employee served under an appointment to the SES shall be prorated.

★ D. Executive Schedule employees generally do not accrue leave (5 U.S.C. 6301(2)(x)) (reference (b)). Any unused annual leave that remains to his or her credit immediately before an employee moves to an appointment under the Executive Schedule shall be liquidated by a lump-sum payment (5 U.S.C. 5551(b)) (reference (b)). Lump-sum annual leave payments are based on the rate of pay the employee was receiving immediately before the date became applicable to him or her (5 U.S.C. 6301(2)(x)) (reference (b)). If a career appointee is appointed at a rate of basic pay which is equal to or greater than the rate payable for Level V of the Executive Schedule, the career appointee may elect to continue under leave provisions as if the career appointee had remained in the SES position from which appointed. If the appointee elects to continue under leave provisions, the liquidation of leave by lump-sum payment would not apply. See 5 U.S.C. 3392 (reference (b)) for additional information.

E. Annual leave may be changed to sick leave, if the employee becomes ill during a period of annual leave.

★ 050205. Advance Criteria. The current leave year accrual of annual leave may be advanced if approved by the supervisor and if there is reasonable assurance the employee will be in a duty status long enough to earn the advanced leave. Doubtful cases shall be disapproved. Subsequent loss of accrual may result in an indebtedness situation. An employee separating from federal service must repay any advanced annual leave unless the separation is caused by death, disability retirement, or a disability that prevents return to duty or continued service, and which is the basis of the separation as determined by the employing office on medical evidence acceptable to it. See 5 C.F.R. 630.209 (reference (1)).

050206. Unused Annual Leave. Upon separation from federal employment, all employees are entitled to a lump-sum payment for the balance of their annual leave account. Refer to 5 U.S.C. 5551 (reference (b)) for additional information. Employees who enter on active duty in the Armed Forces are entitled to elect to have the leave remain to their credit until they return from active duty. See section 0307 for additional information on lump sum leave payments.

★ 050207. Transferred Employees. Employees who transfer to another DoD or non-DoD civilian payroll office are not required to repay unearned annual leave until they separate from federal service. For transferred employees, see subparagraph 090202.C. for the instructions for the SF 1150 to transfer annual leave balances.

0503 SICK LEAVE

050301. General. Sick leave is provided for an employee's use when sick, injured, confined by pregnancy, required to give care to a member of his or her immediate family who is afflicted with a contagious disease, or the health of others would be jeopardized by his or her presence on duty because of exposure to a contagious disease, or for medical, dental, or optical appointments. Sick leave usage information under the Family and Medical Leave Act is in section 0504 of this volume. Sick leave usage information under the Family Friendly Leave Act is in section 0505 of this volume.

050302. Amount of Sick Leave Earned

A. Full-time employees earn 4 hours of sick leave for each full biweekly pay period. Employees on uncommon tours of duty accrue 7 hours and 12 minutes of sick leave per pay period for a 72-hour workweek and 5 hours and 36 minutes of sick leave per pay period for a 56-hour workweek. Each time the number of hours in a nonpay status, which includes all nonpay hours except OWCP, in a full-time employee's leave year equals the number of base pay hours in a pay period, the civilian payroll system shall reduce his or her credits for sick leave by an amount equal to the amount of sick leave the employee earns during the pay period. Part-time employees earn 1 hour of sick leave for each 20 hours in a pay status. They may not earn more than 4 hours of sick leave for 80 hours in a pay status during any biweekly pay period. Intermittent employees do not earn sick leave.

B. Sick leave earned shall be posted to an employee's record each pay period before sick leave taken in that period is charged against the sick leave balance.

050303. Limitations and Variances

★ A. There is no limit on accrued balances of sick leave. Sick leave is reccredited after a break in service to an employee, who returns to federal employment on or after December 2, 1994, unless the sick leave was forfeited upon reemployment in the federal government before December 2, 1994. See 5 C.F.R. 630.502 (reference (l)). The exception is when sick leave has been used in the computation of an annuity for an employee (5 C.F.R. 630.407) (reference (l)).

B. Executive Schedule employees generally do not accrue leave (5 U.S.C. 6301(2)(x) (reference (b))). Any unused leave that remains to his or her credit when an employee moves to an appointment under the Executive Schedule will be certified on an SF 1150 by the civilian payroll office. The SF 1150 will be sent to the human resources organization (HRO) for retention in the Official Personnel Folder (OPF), until the employee is reemployed in a leave-accruing position or separated from the Executive Schedule position. Career appointees appointed at a rate of basic pay equal to or greater than the rate payable for Level V of the Executive Schedule, may elect to continue to have leave provisions as if the career appointee remained in the SES position from which appointed.

★ 050304. Advance Criteria. In cases of serious disability or illness, employees, except those serving under a limited appointment or with a specified termination date, may be advanced up to 30 days sick leave, or equivalent for uncommon tours of duty. Example: An employee with an 80-hour biweekly tour of duty may be advanced up to 240 hours, and an employee on a 144-hour biweekly uncommon tour of duty may be advanced 432 hours. Employees should submit requests in writing for advance sick leave to the leave-approving official. Advance sick leave should not be granted if it appears likely that the employee will not return to duty long enough to earn the leave. Employees separating from federal service must repay any advanced sick leave unless the separation is caused by death, disability retirement, or a disability which prevents the employee from returning to duty or continuing in the service, and which is the basis of the separation as determined by the employing office on medical evidence acceptable to it. See 5 C.F.R. 630.209 (reference (l)).

050305. Unused Sick Leave. Employees are not paid for unused sick leave upon separation. The unused sick leave balance upon retirement or death is shown in the remarks column under "Service History" on the SF 2806/3100. See 5 C.F.R. 630.209 (reference (l)).

★ 050306. Transferred Employees. Employees who transfer to another DoD or non-DoD civilian payroll office are not required to repay unearned sick leave until they separate from federal service. For employees transferred, see subparagraph 090202.C. for the instructions for the SF 1150 to transfer sick leave balances.

★ 050307. Sick Leave for Adoption. Section 629(b) of P.L. 103-329 (reference (e)) authorizes federal employees to use sick leave for purposes related to the adoption of a child. Employees may use sick leave for appointments with adoption agencies, social workers, and attorneys; court proceedings; required travel; and any other activities necessary to allow the adoption to proceed. This entitlement is in addition to unpaid leave for the placement of a child with an employee for adoption under the Family and Medical Leave Act. Refer to 5 C.F.R. 630.401 and 630.409 (reference (l)) for additional information on sick leave usage for adoption.

★0504 FAMILY AND MEDICAL LEAVE ACT

★ 050401. General. The Family and Medical Leave (FML) Act of 1993, P.L. 103-3 (reference (e)), provides a total of up to 12 administrative workweeks of unpaid leave (LWOP) during any 12-month period to take care of specified family and medical needs for employees covered by the sick and annual leave provisions of 5 U.S.C. Chapter 63, subchapter V (reference (b)) and 5 C.F.R. Part 630, Subpart L (reference (l)), and certain other federal employees.

★ 050402. Entitlement. The employee must have completed at least 12 months of federal service. Temporary or intermittent employees are not entitled to FML. A total of up to 12 administrative workweeks of unpaid leave will be available during any 12-month period (which begins when the FML is first used and ends 12 months later). An employee may elect to substitute annual, sick, or educator leave, or leave made available to the employee under the Voluntary Leave Transfer Program or the Voluntary Leave Bank Program for the LWOP. The employee's work schedule will be the basis for computing the number of hours of FML available for the

12 administrative workweeks. For example: An 80-hour full-time employee will have 480 hours available for FML - 40 hours per week times 12 weeks.

- ★ 050403. Usage. The FML may be used for:
- A. The birth of a son or daughter and care of the newborn; or
 - B. The placement of a son or daughter with the employee for adoption or foster care; or
 - C. The care of a spouse, son, daughter, or parent with a serious health condition; or
 - D. A serious health condition of the employee that makes the employee unable to perform the duties of his or her position.

★ 050404. Conditions. Under certain conditions, FML may be taken intermittently, or the employee may work under a work schedule that is reduced by the number of hours of leave taken as family and medical leave. The FML is in addition to other paid time off available to an employee.

★ 050405. Advance Notice and Medical Certification. The employee must provide notice of intent to take FML not less than 30 days before leave is to begin or as soon as is practicable. The agency may request medical certification for FML taken to care for an employee's spouse, son, daughter, or parent who has a serious health condition or for the serious health condition of the employee.

★0505 THE FAMILY FRIENDLY LEAVE ACT

★ 050501. General. Title 5 United States Code, section 6311 (reference (b)) and 5 C.F.R. Part 630, subpart D (reference (l)) allow for the use of sick leave for family care or bereavement. Employees who accrue sick leave under 5 U.S.C. 6307 (reference (b)) may use the total number of hours of sick leave normally accrued by that employee during a leave year for family care or bereavement purposes.

★ 050502. Entitlement. A full-time federal employee may use up to 104 hours (13 days) of sick leave in a leave year for family care or bereavement. The part-time employee or an employee with an uncommon tour of duty may use up to the number of hours of sick leave normally accrued by that employee during the leave year. The full-time employee may use 40 hours (5 days) of sick leave without regard to his or her current sick leave balance. A part-time employee or an employee with an uncommon tour of duty may use the average number of hours of work in the employee's scheduled tour of duty each week. An additional 64 hours (8 days) may be used if the employee maintains a balance of at least 80 hours of sick leave in his or her sick leave account. The part-time employee or an employee with an uncommon tour of duty may use an

additional amount equal to twice the average number of hours of work in the employee's scheduled tour of duty.

★0506 BONE-MARROW OR ORGAN DONOR LEAVE. Title 5 United States Code, section 6327 (reference (b)) provides up to 7 days of paid leave in a calendar year (in addition to sick or annual leave) to serve as a bone-marrow or organ donor.

★0507 NONAPPROPRIATED FUND (NAF) TRANSFER OF LEAVE UNDER EMPLOYEE BENEFIT PORTABILITY PROGRAM

★ 050701. General. In accordance with DoD 1404.1-M (reference (ap)), an employee who transfers from a NAF position to an appropriated position or the reverse without a break in service of more than three days, shall transfer all leave without limit. An employee may not be paid for any accumulated hours of leave. Leave will be administered in accordance with the rules of the gaining employment system (civil service or NAF). The employee shall be credited with the full amount of leave even in those cases where the employee may receive a higher rate of pay from the gaining employment system (civil service or NAF).

★ 050702. Provisions. Service in the losing employment system (civil service or NAF) shall be credited in determining the appropriate leave accrual rate. All provisions are applied exactly the same regardless of whether the move is voluntary or involuntary, and regardless of the direction of the move, civil service to NAF or NAF to civil service.

0508 RESTORED LEAVE

050801. General. Except as otherwise authorized by regulation, annual leave restored under 5 U.S.C. 6304(d) (reference (b)) must be scheduled and used not later than the end of the leave year ending 2 years after the date:

A. Of restoration of the annual leave forfeited because of administrative error;
or

B. Fixed by the agency head, or his designated official, as the termination date of the exigency of the public business which resulted in forfeiture of the annual leave; or

C. The employee is determined to be recovered and able to return to duty if the leave was forfeited because of sickness.

050802. Approval Requirements. The following requirements must be met before forfeited annual leave can be considered for restoration:

A. Use of the annual leave must have been scheduled in writing before the start of the third biweekly pay period prior to the end of the leave year; and

B. The determination that an exigency is of major importance and, therefore, annual leave may not be used, must be made by the head of an activity no lower than a major field headquarters or major field installation.

050803. Time Limit. For an extended exigency of the public business, the time period for use of restored leave is 2 years for each calendar year, or part thereof, during which the exigency existed. This time period starts at the beginning of the leave year following the leave year in which the exigency is declared to be ended. An extended exigency is one that threatens the national security, safety or welfare; lasts more than three calendar years; affects a segment of an agency or occupational class; and precludes subsequent use of both restored and accrued annual leave within the time limit specified in 5 U.S.C. 6304(d) (reference (b)) and 5 C.F.R. 630.306 and 630.309 (reference (l)). The time limit established under 5 C.F.R. 630.306 (reference (l)), during which restored leave must be used in order to avoid forfeiture, is not changed by entry into the SES.

050804. Separate Leave Account. The payroll system shall maintain three separate restored leave accounts for each calendar year. Restored annual leave must be credited to a separate leave account identifying the date of restoration, the date of forfeiture, the amount credited for use, the amount of usage, and the unused balance. Restored annual leave is not included in, and does not increase, the maximum annual leave carryover for an employee.

050805. Time and Attendance Reports. Timekeeping instructions in paragraph 020203 specify the method to be used to identify the leave account to be charged.

050806. Forfeiture of Annual Leave. Restored annual leave, if unused at the expiration of the time limitation, is forfeited with no further right to restoration.

★ 050807. Lump-Sum Payment. Upon separation, employees entitled to lump sum payment shall be paid for their unused restored annual leave if such leave has not been forfeited. If the leave is forfeited because of an administrative error, a claim must be filed within 3 years of the discovery of the administrative error leading to the forfeiture (5 U.S.C. 6304(e)) (reference (b)). Employees entering active duty in the Armed Forces may elect to have leave remain to their credit until their return from active duty (5 U.S.C. 5552 and 6304) (reference (b)). See section 0307 for additional information on lump sum leave payments.

050808. Maximum Annual Leave Accumulation

★ A. Title 5, United States Code, section 6304(d) (reference (b)) was amended so that civilian DoD employees who are employed at installations that are facing planned base closures may carry into the next leave year more than 240 hours of annual leave. Annual leave accumulated in excess of 240 hours at closing bases under this provision shall be considered restored leave. It applies to the period beginning October 1, 1992, and ending on December 31, 1997. As of September 23, 1996, leave restored under 5 U.S.C. 6304(d)(3) (reference (b)) must be liquidated by lump sum payment when an employee transfers to another federal agency outside of the Department or to a position within the Department not located at an installation being closed or realigned.

B. The HROs shall furnish civilian payroll offices with listings by the end of each leave year that identify each employee who is eligible (including those who were eligible in prior years and those who are newly eligible) for restoration of annual leave under this provision. The list shall contain each eligible employee's full name, SSN, and employing activity. The list should be labeled "Employees eligible for annual leave restoration under Section 4434 of P.L. 102-484" (reference (e)) or an equivalent heading, and it should be signed by the personnel officer. This listing should be separate and distinct from any employee listing, form, or memorandum which is used to inform civilian payroll offices that an employee's annual leave is to be restored under provisions of 5 C.F.R. 630.306 (reference (l)).

0509 RESTORED LEAVE RESULTING FROM CORRECTION OF UNJUSTIFIED OR UNWARRANTED PERSONNEL ACTION

★ 050901. General. Annual leave that is restored to an employee as a result of the correction of an unjustified or unwarranted personnel action in excess of the maximum leave accumulation authorized by law shall be credited to a separate leave account for use by the employee (5 C.F.R. 550.805(g)) (reference (l)). This restored leave shall be referred to as reinstated leave. Annual leave in such a separate account must be scheduled and used as provided in the following subparagraphs. If leave is not used within the prescribed time frames, it shall be forfeited. Refer to 5 U.S.C. 5596(b)(1)(B) (reference (b)) for additional information.

A. Full-Time Employees. Excess annual leave of 416 hours or less must be scheduled and used by the end of the leave year ending 2 years after the date on which the leave is credited to the separate account. This period is extended by 1 year for each additional 208 hours of excess annual leave or any portion thereof. See Table 5-3.

B. Part-Time Employees. These employees shall schedule and use excess annual leave in an amount equal to or less than 20 percent of the employee's scheduled tour of duty over a period of 52 calendar weeks by the end of the leave year ending 2 years after the date on which the annual leave is credited to the separate account. This period shall be extended by 1 leave year for each additional number of hours of excess annual leave or any portion thereof, equal to 10 percent of the employee's scheduled tour of duty over a period of 52 calendar weeks. See Table 5-3.

0510 COMPENSATORY TIME USED

★ 051001. General. Compensatory time off in lieu of overtime pay derives from entitlement to pay for overtime work (i.e., work in excess of 8 hours in a day or 40 hours in a week, ordered in advance by management). At the request of an employee, the head of an agency may grant an eligible employee compensatory time off from the employee's scheduled tour of duty instead of payment for an equal amount of time spent in irregular or occasional overtime work. An agency may provide that an FLSA exempt employee whose rate of basic pay exceeds the maximum rate for GS-10 shall be compensated for irregular or occasional overtime work with an equivalent

amount of compensatory time off in lieu of payment for overtime worked. Refer to 5 U.S.C. 5543, 5544, 6122, 6123, 6127, and 6128 (reference (b)) and 5 C.F.R. 550.114 (reference (l)).

★ 051002. Usage. Compensatory time off shall be granted to an employee within a reasonable time after the overtime is worked. The limit for the use of compensatory time is the end of the 26th pay period after that in which the overtime was worked. The unused compensatory time then shall be paid at the overtime rate at which it was earned. Compensatory time earned before June 8, 1997, was placed in an "old compensatory time" account on June 7, 1998, and thereafter shall be charged only if the employee has insufficient current compensatory time to cover the compensatory time off requested. National Guard employees are not paid for unused compensatory time worked. They shall use their compensatory time by the end of the 26th pay period after it is earned or forfeit it.

051003. Separation or Transfer. When a DoD employee separates or transfers to another DoD Component or federal agency, unused compensatory time balances shall be paid at the overtime rate in effect when the compensatory time was earned. Title 32 National Guard technicians shall forfeit any unused compensatory time when they separate or transfer to another DoD Component or federal agency.

0511 COMPENSATORY TIME OFF FOR RELIGIOUS REASONS. Compensatory time off for religious observances is provided for in 5 U.S.C. 5550a (reference (b)). An employee whose personal religious beliefs require not working during certain periods of time may elect to work compensatory time for the time lost to meet those religious requirements. An employee who works compensatory time for religious reasons shall be granted equal compensatory time off from the scheduled tour of duty (5 C.F.R. 550.1002) (reference (l)). See subparagraph 030302.F. for additional information regarding compensatory time off for religious reasons.

0512 LEAVE-SHARING PROGRAMS (VOLUNTARY LEAVE TRANSFER AND VOLUNTARY LEAVE BANK)

★ 051201. General. The "Federal Employees Leave Sharing Amendments Act of 1993," P.L. 103-103 (reference (e)), made permanent the voluntary leave transfer and voluntary leave bank programs. The Act requires all agencies to operate a leave transfer program, allows all agencies to establish leave banks at any time, permits employees to participate in both programs, eliminates the requirement to count any advanced leave an employee may have when determining whether the employee qualifies to be a leave recipient, and permits leave recipients who exhaust transferred leave to use leave accrued while in a transferred leave status. The Act took effect on February 5, 1994.

051202. Voluntary Leave Transfer Program. In accordance with 5 C.F.R. 630.901 et seq. (reference (l)), federal employees may donate annual leave to other employees who need leave because of a medical emergency. Medical emergency used herein is defined as a medical condition of an employee or a family member of an employee (as defined in 5 C.F.R. 630.902) (reference (l)) that may require an employee's absence from duty for a prolonged period of time and result in a substantial loss of income to the employee because of the unavailability of paid leave.

A. Interagency leave transfer is mandatory if any of the following conditions are met:

1. If a family member of a leave recipient is employed by another agency and requests the transfer of annual leave to the leave recipient.

2. If, in the judgment of the leave recipient's employing agency, the amount of annual leave transferred from leave donors employed by the leave recipient's employing agency may not be sufficient to meet the needs of the leave recipient.

3. If, in the judgment of the leave recipient's employing agency, acceptance of leave transferred from another agency would further the purpose of the Voluntary Leave Transfer Program (5 C.F.R. 630.906(f) (reference (l))).

B. Leave donors may not contribute to an immediate supervisor. The annual leave donated must be accrued and available at the date of donation. The maximum amount of annual leave that may be donated during the leave year shall be the lesser of:

1. One-half of the amount of annual leave he or she would be entitled to accrue during the leave year in which the donation is made; or

2. The number of hours remaining in the leave year (as of the date of the transfer) for which the leave donor is scheduled to work and receive pay. These limitations may be waived according to the agency's established written criteria. The waivers shall be documented in writing.

C. The recipient only for the documented medical emergency may use the donated leave. It may not be used for any other purpose. The law provides that a leave recipient shall earn annual and sick leave while using donated leave, but only up to 40 hours of each, which are placed in separate accounts for use after the recipient exhausts all donated leave or the medical emergency ends. An employee may use any annual or sick leave accrued while in a shared leave status if the medical emergency continues after the leave recipient exhausts all transferred leave. Leave accruals for employees who use donated leave intermittently shall be prorated between the regular leave accounts and the separate leave accounts until the maximum accrual is reached or termination of the emergency. Accruals are prorated based on the number of hours of donated leave used within the pay period.

D. Upon termination of the medical emergency, the unused donated leave shall be transferred pro rata back to each donor (5 C.F.R. 630.911) (reference (l))). Each donor has an election as to how the leave is to be recredited from the following options:

1. Crediting the donated annual leave to the donor's annual leave account in the current leave year;

2. Crediting the donated annual leave to the donor's annual leave account effective as of the first day of the first leave year beginning after the date of election; or

3. Donating such leave in whole or part to another leave recipient.

E. The civilian payroll office shall process all leave balances, restore unused balances and track the identified civilian payroll office cost.

051203. Voluntary Leave Bank Program. Under the Voluntary Leave Bank Program (5 U.S.C. 6361-6373) (reference (b)) and (5 C.F.R. 630.1001 et seq.) (reference (l)), employees can make a specified contribution of annual leave to their agency's leave bank in order to become leave bank members. See 5 C.F.R. 630.1004 (g) through (i) (reference (l)) for minimum leave contributions. Should a leave bank member experience a medical emergency, he or she can apply to the leave bank board for withdrawal of annual leave from the leave bank.

051204. Participation in Both Programs. The law permits an employee to participate in both leave transfer and leave bank programs in the same agency for the same medical emergency if his or her agency has established both programs.

0513 HOLIDAY

051301. When No Work Is Performed. An employee in a pay status on either the regularly scheduled workday preceding a holiday or on the regularly scheduled workday succeeding a holiday is entitled to straight-time pay for the holiday, regardless of his status on the holiday not worked.

A. Regular full-time employees receive their regular straight-time pay, including night and shift differential, for holidays on which they are not required to work.

B. Part-time employees receive their regular pay for holidays falling on their regularly scheduled workdays. When an installation is closed for an "in lieu of" holiday that falls on a part-time employee's regularly scheduled workday and the employee is prevented from working on that day, the installation may excuse the employee from duty by an administrative order or grant the employee annual leave or LWOP for the hours scheduled to be worked on that day.

C. Intermittent employees, including experts and consultants, with no regularly scheduled tour of duty receive no compensation unless actual work is performed.

051302. When Work Is Performed. See holiday premium pay provisions in paragraph 030305.

0514 CREDIT HOURS

★ 051401. General. Credit hours are any hours within a flexible schedule established under 5 U.S.C. 6122 (reference (b)), that are in excess of an employee's basic work requirement, and that the employee elects to work to vary the length of a workweek or a workday.

★ 051402. Requirements. Only employees on flexible schedules may work credit hours. Credit hours are used within the tour of duty. Credit hours shall be earned and used in the same increments as other absences with pay. The hours are in excess of the employee's basic work requirement (8 hours in a day, 40 hours in a week, or 80 hours in the biweekly pay period). Credit hours are distinguished from overtime hours in that they are not officially ordered in advance by management. See 5 U.S.C. 6121-6126 (reference (b)).

051403. Accumulation. A full-time employee may accumulate not more than 24 credit hours to be carried forward for credit against a later pay period. The 24 credit hours carried forward must be accounted for the same as other types of absences with pay. (5 U.S.C. 6126) (reference (b)).

051404. Part-Time Employees. A part-time employee is limited to the credit hours to be carried forward on a pro rata basis. For carry-over purposes, a part-time employee may carry over credit hours from one biweekly pay period to a subsequent biweekly pay period, in an amount equal to 25 percent of the biweekly scheduled hours of work.

051405. Payment. The employee receives no additional pay for credit hours when these hours are credited to his or her account. Credit hours are considered a part of the basic work requirement (nonovertime work) in the biweekly pay period to which they are applied. An employee is entitled to his or her basic rate of pay for credit hours. Credit hours shall be paid at the employee's current hourly rate when an employee is no longer subject to a flexible work schedule program, transfers to another employing activity, or upon separation (5 U.S.C. 6126(b)) (reference (b)). For full-time employees not more than 24 accumulated credit hours can be paid. For part-time employees, credit hours that are not more than 25 percent of such employee's biweekly scheduled hours can be paid.

051406. Entitlement. An employee shall not use credit hours to increase the entitlement to overtime pay. An employee shall not be paid Sunday pay or holiday pay for credit hours. Whether an employee is entitled to night pay for credit hours on the workday in which taken depends on the rules for night pay. Credit hours shall be considered daytime hours whenever possible. For example, if an employee's schedule includes daytime and nighttime hours, credit hours may be applied only to the daytime portion of the schedule. An employee has the right to use earned credit hours, subject to the activity's authority to approve the time at which they may be used (5 U.S.C. 6123(c)) (reference (b)).

★ 051407. Biweekly Pay Period. There is no limit on the number of credit hours that may be accumulated during the biweekly pay period; however, a supervisor may limit the number of credit hours accumulated during the biweekly pay period. Any credit hours worked in a pay period that exceed the 24-hour maximum carryover must be taken during that pay period, or they will be forfeited. Credit hours must be earned before they are used. Employees may carry forward

only 24 credit hours into the succeeding pay period. Credit hours under a maxiflex schedule may be used during the pay period in which they are earned.

0515 TIME OFF AS AN INCENTIVE AWARD. Authorized by 5 U.S.C. 4502(e) (reference (b)), a time-off award may be granted in lieu of cash (5 C.F.R. 451.301-451.307) (reference (l)). A time-off award is an absence with pay. See subparagraph 031102.C for additional information.

0516 EXCUSED ABSENCE

★ 051601. General. Excused absence is an absence from duty, administratively authorized, without loss of pay and without charge to leave. Agency heads or their designees have authority to grant excused absence in limited circumstances for the benefit of the agency's mission or a government-wide recognized and sanctioned purpose. The following are some of the more common situations in which agencies generally excuse absence without charge to leave. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ 051602. Blood Donation. Employees who serve as blood donors shall be excused from work without charge to leave for the time necessary to donate the blood, for recuperation following blood donation, and for necessary travel to and from the donation site (30 Comp. Gen. 521 (1951)) (reference (p)). This provision does not cover an employee who gives blood for his or her personal use or receives compensation for giving blood. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ 051603. Closure of Installations or Activities. Administrative leave may be granted when employees are prevented from working due to extreme weather conditions or other severe disruptions.

★ 051604. Tardiness and Brief Absence. Comptroller General decisions limit discretion to grant excused absence to situations involving brief absences. Where absences are for other than brief periods of time, a grant of excused absence is not appropriate unless the absence is in connection with furthering a function of the Department. The absence also may be compensated for by additional work or may be charged against any compensatory time the employee may have to his or her credit or may be charged to annual leave, LWOP (with the employee's consent), or AWOL. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ 051605. Registering and/or Voting. Excusal from duty is authorized for registering and/or voting in any election or referendum for a reasonable period of time. Generally, employees are excused from duty to permit them to report for work 3 hours after the polls open or to leave work 3 hours before the polls close, whichever results in the lesser amount of time off. Employees on flexible work schedules will be excused only for those hours that cannot be accommodated by their flexible schedules. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ 051606. Taking Examinations. This applies only to examinations given by or taken at the request of the employing activity. Employees shall be excused, without charge to leave or loss of pay, for all examinations required for converting to career-conditional appointments or for

required noncompetitive examinations within the same employing activity. See DoD 1400.25-M, subchapter 630 (reference (u)).

★ 051607. Attending Conferences or Conventions. Employees may be excused to attend conferences or conventions when it is determined that the attendance will serve the best interest of the federal service. Such absences may be restricted to those situations in which the employee is an official representative of the organization involved or is a contributor on the agenda. Employees shall not be excused to attend conferences or conventions of political parties or partisan political groups or committees.

★ 051608. Representing Employee Organizations. Representative leave hours shall be reported by three separate categories. The categories are negotiations, grievance and appeals, and on-going labor and management committees. Absence charged as representative leave may be subject to the provisions of local negotiated agreements and/or supervisory approval. See 5 C.F.R. 551.424 (reference (l)) for additional information.

★ 051609. Official Duty Status - Funerals of Fellow Federal Law Enforcement Officers or Federal Firefighters. Excused absence from duty without loss of pay or leave may be granted for a federal firefighter or federal law enforcement officer to attend the funeral of a fellow federal firefighter or federal law enforcement officer who was killed in the line of duty. See 5 U.S.C. 6327 (reference (b)). When excused from duty, attendance at the service shall be considered official duty for the firefighter or officer for the purposes of 31 U.S.C. 1345(1) (reference (d)).

0517 COURT LEAVE

051701. General. Employees are authorized court leave with pay when summoned in connection to serve as a juror; or as a witness in a nonofficial capacity on behalf of any party in connection with any judicial proceeding to which the United States, the District of Columbia, or a state or local government is a party. See 5 U.S.C. 6322 (reference (b)).

051702. Annual Leave. If an employee is on annual leave when called for jury duty or witness service, court leave shall be substituted. No charge shall be made to annual leave for the court service.

051703. Requirements. An employee who is under proper summons from a court to serve on a jury should be granted court leave for the entire period, regardless of the number of hours per day or days per week he actually serves on the jury during the period. Jury service for which an employee is entitled to court leave does not include periods when the employee is excused or discharged by the court, either for an indefinite period, subject to call by the court or for a definite period in excess of 1 day. Therefore, an employee may be required to return to duty or be charged annual leave if excused from jury service for 1 day or even a substantial part of a day. The employee may not, however, be required to return to duty if it would cause a hardship.

051704. Intermittent Employees. Intermittent employees are not eligible for court leave (49 Comp. Gen. 287 (1969)) (reference (p)).

051705. Nonexempt Employees. Nonexempt employees shall not have their pay reduced under FLSA (reference (n)) due to court leave for jury duty or witness service during their regularly scheduled tour of duty (5 U.S.C. 6322) (reference (b)). The Comptroller General has determined that the court leave provision provides authority to pay nonexempt employees the same pay as they otherwise would receive for their regularly scheduled tour of duty in the biweekly pay period under FLSA (62 Comp. Gen. 216 (1983)) (reference (p)).

051706. Documentation. When an employee is called for court service (as a witness or juror), the court order, subpoena, or summons, if one was issued, must be presented to the supervisor as far in advance as possible.

051707. Jury Duty Service Payment. Employees who perform jury duty service on behalf of:

- A. A state or local court is paid jury duty fees;
- B. The United States or District of Columbia Government are not paid jury duty fees (5 U.S.C. 5537) (reference (b)).

051708. Witness Service Payment. Employees who perform witness service on behalf of:

- A. A state or local government in a nonofficial capacity is paid witness fees.
- B. A private party in a nonofficial capacity to which the United States, District of Columbia, or a state or local government is a party is not paid witness fees.

051709. Certificate of Attendance. The employee cannot retain fees received for jury duty and witness service performed in subparagraphs 051707.A. and 051708.A. The employee must submit fees received for jury or witness service by money order or personal check to the employing activity. A certificate of attendance from the clerk of the court must also be submitted. The certificate shows inclusive dates of jury duty or witness service and amount of fees the court paid to the employee. The certificate of attendance separately should identify fees and allowances. Fees received by the employee are collected while allowances are not collected. If the certificate of attendance does not identify allowances separately, all moneys are considered fees and shall be collected. The employee may keep reimbursements for expenses received from the court, authority, or party that caused the employee to be summoned and may keep fees that exceed the employee's compensation for the days of service. An employee serving on a jury in a state or local court who waives or refuses to accept jury fees is still liable to the U.S. Government for the fees he or she would have received.

★ 051710. Retention of Fees. Fees should not be paid for jury duty or witness service performed in subparagraphs 051707.B. and 051708.B. If fees are paid to an employee while serving in a nonofficial capacity, however, the employee cannot retain those paid fees. Such fees must be

turned in to the customer service representative (CSR) at the employing activity. An employee may keep reimbursements for expenses received from the court, authority, or party that caused the employee to be summoned.

051711. Official Capacity. Employees who perform witness service in an official capacity on behalf of the U.S. or District of Columbia Government, a state or local government, or a private party shall not be paid witness fees nor shall the time served as a witness be charged to court leave or annual leave. The time shall be recorded as official duty. If any fees are paid, they must be turned in to the employing activity.

051712. Nonofficial Capacity. Employees who testify in a nonofficial capacity on behalf of a private party to which the United States, the District of Columbia, a state, or local government is not a party are not entitled to court leave. The employee must take annual leave or LWOP. He or she is entitled to the fees and expenses related to such witness service.

051713. Holiday. When a holiday occurs during the time an employee is on jury duty or witness service, the employee can keep the jury duty or witness service fee paid for the holiday.

051714. Nonworkday. If an employee is called to jury duty on a nonworkday, the employee may keep the fees paid.

★ 051715. Submission of Fees. Moneys submitted to the payroll office from the CSR for fees collected by employees for jury duty or witness service shall be accounted for on a DD Form 1131. Under 5 U.S.C. 5515 (reference (b)), the appropriation and accounting classification that paid the employee's salary while on jury duty or witness service will be credited with these moneys.

051716. Employee Absence. See Table 5-4 for employee absences for court or court-related services.

051717. Payroll Deduction. Fees not submitted in a timely manner are subject to payroll deduction. Payroll deductions to collect the fees will be made in the next regular pay period.

0518 MILITARY LEAVE

051801. General. Public Law 96-431 (reference (e)), as codified at 5 U.S.C. 6323 (reference (b)), provides, that effective October 1, 1980, military leave shall be made available to eligible employees on a fiscal year rather than a calendar year basis; unused military leave up to 15 calendar days shall be allowed to accumulate for subsequent use; and eligible part-time employees, as defined by 5 U.S.C. 3401(2) (reference (b)), are entitled to military leave on a prorated basis. Employees with temporary appointments of 1 year or less, or intermittent work schedules are not entitled to military leave. Employees with appointments exceeding one year are entitled to military leave.

★ 051802. Reduction of Civilian Pay. Under the provisions of 5 U.S.C. 5519 (reference (b)), an employee's civilian pay is reduced by the amount (other than a travel, transportation, or per diem allowance) received by the employee for military service as a member of the Reserve or National Guard for a period for which he is granted military leave for law enforcement assistance under 5 U.S.C. 6323(b) or (c) (reference (b)). When the employee uses annual leave or compensatory time, the offset rules do not apply and the employee receives full military pay and full civilian pay. Refer to subparagraph 080512. for further information.

★ 051803. Weekend Drills. Civilian employees whose regular workweek includes Sunday, may not take military leave under 5 U.S.C. 6323(a) (reference (b)) to attend weekend drills since an employee, as a member of a Reserve Component of the Armed Forces, is entitled to military leave under 5 U.S.C. 6323(a) (reference (b)) only if on active duty. Weekend drills are considered inactive duty. See Comp. Gen. B-202564 (reference (p)).

051804. Recording Military Leave. At the beginning of each fiscal year (1 October) eligible full-time employees shall be credited with 15 calendar days of military leave. Eligible part-time employees shall be credited with leave on a prorated basis. The percentage is determined by dividing 40 into the number of hours in the employee's regularly scheduled workweek during that fiscal year. Any portion of the leave unused at the end of the fiscal year, not to exceed 15 days, shall be carried forward to the next fiscal year. New eligible employees and new members of Reserve components shall be credited with the full 15 days (prorated if employed part-time) when entering upon duty or upon joining the Reserve unit. It shall not be prorated for a partial year.

051805. Military Leave Charges. To substantiate leave charges, an employee is required to submit a copy of the orders directing him or her to active military duty and a certified verification of attendance indicating completion of training duty upon return to duty from military leave. Military leave is charged on a calendar-day basis. No charge is made to nonworkdays at the beginning and end of a period of absence on active military duty, but all intervening nonworkdays falling within the period of active military duty must be charged to military leave. If an employee has separate sets of orders or orders which cover separate periods of time, with return to civilian status between the periods covered in the orders, military leave shall not be charged for the time the employee is returned to civilian status. Military leave may be taken intermittently, a day at a time, or all at one time, regardless of the number of training sessions.

051806. Effective Date of Separation for Military Duty. Before a Reserve or National Guard member is separated from civilian employment, the member must be given the chance to use any accrued military leave. If a member takes military leave and is then separated, the date the separation is effective shall be the date the military leave expires.

051807. Pay Status Required. A maximum of 30 days of military leave can be used in any fiscal year. The military leave may be used during one or more periods of military duty during the fiscal year. Employees can take the full 15 days of military leave immediately at the beginning of a fiscal year even if up to a maximum of 30 days had been taken during the prior fiscal year and even if the military duty is continuous (70 Comp. Gen. 263 (1991)) (reference (p)).

051808. Nonexempt Employees. Nonexempt employees shall not have their pay reduced under FLSA due to military leave for training. Employees shall receive the same pay as they would otherwise receive for their regularly scheduled biweekly tour of duty.

★ 051809. Reserve or National Guard Members. Permanent or temporary indefinite (including all appointments exceeding one year) employees who as Reserve or National Guard members provide military aid to enforce the law or assistance to civil authorities in the protection or saving of life or property or the prevention of injury are also entitled to leave not to exceed 22 workdays in a calendar year. At the employee's request, the period the employee is absent to perform service may be charged to the employee's accrued annual leave or available compensatory time balance. It may not be charged to sick leave. See 5 U.S.C. 6323(b) (reference (b)). A copy of the orders and a certificate of attendance is required. Leave granted for these purposes are charged in hours. The 22 workdays are converted to 176 hours and charged on the same basis as annual and sick leave. An employee working an uncommon tour of duty shall have this additional leave entitlement adjusted on a pro rata basis (49 Comp. Gen. 233 (1969)) (reference (p)).

★ 051810. National Guard of the District of Columbia. Employees who are members of the National Guard of the District of Columbia are entitled to leave without loss in pay or leave for each day of a parade or encampment ordered or authorized under title 39, District of Columbia Code (reference (aq)). This covers each day of service, or a portion thereof, the National Guard is ordered to perform by the commanding general. See 5 U.S.C. 6323(c) (reference (b)).

★ 051811. Military Reserve Technicians. Under P.L. 104-106 (reference (e)), employees who are defined by 5 U.S.C. 8401(30) (reference (b)) as military reserve technicians are entitled to an additional 44 workdays of military leave in a calendar year. See 5 U.S.C. 6323(d) (reference (b)). This military leave is in addition to the military leave already available under 5 U.S.C. 6323(a), (b), and (c) (reference (b)). To be eligible for military leave, the military reserve technician must be on active duty without pay under section 12301(b) or 12301(d) of 10 U.S.C. (reference (ar)) (other than active duty during a war or national emergency declared by the President of Congress) for participation in noncombat operations outside the United States, its territories, and possessions. A copy of the military orders or a statement by the employee's commanding officer which shows either 10 U.S.C. 12301(b) or 12301(d) (reference (ar)) authority is required as acceptable evidence that the military duty was performed and was without military pay. The compensation of an employee granted leave under 5 U.S.C. 6323(d)(1) (reference (b)) shall not be reduced by reason of such absence. An employee shall receive the same pay he or she would have received for the regularly scheduled work. The carryover of all or a portion of the 44 workdays is not permitted. There is no charge for holidays and nonworkdays. At the employee's request, the period the employee is absent to perform service may be charged to the employee's accrued annual leave or available compensatory time. It may not be charged to sick leave. See 5 U.S.C. 6323(d)(2) (reference (b)).

0519 EDUCATORS LEAVE. See subparagraph 070201.M. for provisions on educator's leave.

0520 SHORE LEAVE

052001. General. An officer, crew member, or other employee serving aboard an oceangoing vessel on an extended voyage may be granted leave of absence under 5 U.S.C. 6305(c) (reference (b)) and 5 C.F.R. 630.701-630.704 (reference (l)) at a rate not to exceed 1 day for each 15 calendar days of absence on one or more extended voyages. An employee has an absolute right to use shore leave, subject to the right of the head of the agency to fix the time at which shore leave may be used.

052002. Extended Voyage. Shore leave accrues for service by employees on an extended voyage. An extended voyage must be at least 7 consecutive calendar days long, including voyage-preparation time on board the vessel.

052003. Employee Record. An employee earns shore leave at the rate of 1 day of shore leave for each 15 calendar days of absence on one or more extended voyages. The master of the vessel will keep a record of accrual and use of shore leave for each employee.

052004. Time and Attendance Report. Civilian payroll offices shall accept shore leave taken on the time and attendance report.

052005. Request by Employee. Shore leave may be granted during a voyage at the request of the employee. An employee must submit the request in writing; if the shore leave is denied, the denial must be in writing.

052006. Limitation. Shore leave is in addition to annual leave. It may be accumulated for future use without limitation.

052007. Minimum Charge. The minimum charge for shore leave is 1 day. Additional charges are in whole days.

052008. Lump-Sum Leave Payment. Shore leave is not included for lump-sum leave payment.

052009. Forfeiture. Shore leave is forfeited if not granted before:

A. Separation from the service; or

B. Official assignment (other than for temporary detail) to a position in which the employee does not earn shore leave. To the extent administratively practicable, the employing activity shall give an employee an opportunity to use the shore leave to his or her credit either before the reassignment, or not later than 6 months after the date of the reassignment when the employing activity is unable to grant the shore leave before the reassignment.

052010. Transfer. At the time of an employee's transfer to a position at another employing activity or agency, accumulated shore leave shall be transferred if:

A. He or she is entitled to shore leave in the new position, and

B. There is no break in service.

0521 HOME LEAVE

★ 052101. General. Employees who met the requirements of 5 U.S.C. 6304(b) (reference (b)) for the accumulation of a maximum of 45 days of annual leave earn home leave. Home leave is earned from the day of arrival in a post of duty outside the United States or on the date of entrance on duty when recruited abroad. Employees earn 5, 10, or 15 days of leave based on the criteria established in 5 C.F.R. 630.604(a) (reference (l)). Employees may be granted home leave after completion of a one-time basic service period of 24 months of continuous service abroad. The minimum charge is 1 day and multiples thereof. There is no maximum accumulation. Balances shall be retained on the SF 1150 for future use. Home leave is to be granted only during an employee's period of service abroad, or within a reasonable period after return from service abroad when it is contemplated that the employee will return to service abroad immediately or on completion of an assignment in the United States (unpub. Comp. Gen. Decision, B-147031, September 11, 1961, and February 5, 1962) (reference (p)).

052102. Indebtedness. An employee is indebted for the home leave used when he or she fails to return to service abroad after the period of home leave, or after the completion of an assignment in the United States. However, a refund for this indebtedness is not required when the employee has completed not less than six months' service in an assignment in the United States following the period of home leave; the employing activity determines that the employee's failure to return was due to compelling personal reasons of a humanitarian or compassionate nature, such as involving physical or mental health or circumstances over which the employee has no control; or the employing activity which granted the home leave determines that it is in the public interest not to return the employee to the overseas assignment. Home leave can only be used in the United States, Commonwealth of Puerto Rico, or a territory or possession of the United States. For additional information, see 5 U.S.C. 6305(a) (reference (b)) and 5 C.F.R. 630.601-630.607 (reference (l)).

052103. Transfer and Recredit of Home Leave. An employee is entitled to have the home leave account transferred or recredited when he or she moves between agencies or is reemployed without a break in service of more than 90 days. No lump-sum payment is made for home leave.

0522 FUNERAL LEAVE

052201. General. Funeral leave is granted to allow an employee to make arrangements for, or to attend, the funeral or memorial service for an immediate relative who died as a result of wounds, disease, or injury incurred while serving as a member of the Armed Forces in a combat zone. Title 5, United States Code, section 6326 (reference (b)) requires an activity to grant an employee funeral leave as is needed and requested, not to exceed 3 workdays, without loss of or reduction in pay, leave to which he or she is otherwise entitled, or credit for time or service, and without adversely affecting his or her performance or efficiency rating. The 3 days need not be

consecutive, but if not, the employee shall furnish the approving authority satisfactory reasons justifying a grant of funeral leave for nonconsecutive days. Combat zone means those areas determined by the President under the authority of 26 U.S.C. 112 (reference (ad)). An activity may grant funeral leave only from a prescribed tour of duty, including regularly scheduled overtime. Immediate relatives are the following relatives of the deceased member of the Armed Forces:

- A. Spouse and his or her parents;
- B. Children, including adopted children, and their spouses;
- C. Parents;
- D. Brothers and sisters, and their spouses;

E. Any person related by blood or affinity whose close association with the deceased was the equivalent of a family relationship. See 5 C.F.R. 630.801-630.804 (reference (l)) and 5 U.S.C. 6326 (reference (b)).

★ 052202. Official Duty Status. Refer to paragraph 051609 for information concerning the official duty status of an employee in connection with funerals of fellow federal law enforcement officers or federal firefighters under second 5 U.S.C. 6327 (reference (b)).

0523 CONTINUATION OF PAY (COP) AND OFFICE OF WORKERS' COMPENSATION PROGRAM (OWCP). For information on COP and OWCP, see section 0312. See subparagraph 050104.B. for proration of leave.

0524 FURLOUGH

052401. General

★ A. Use. A furlough action is the placement of an employee in a temporary nonduty and nonpay status on a continuous basis (for example, 10 consecutive days), or a noncontinuous basis (for example, one day a week) because of lack of work or funds or for other nondisciplinary reasons. An SF 50 must be issued for furlough. Reduction-in-Force (RIF) procedures under 5 C.F.R. 351.201 (reference (l)) must be followed to furlough an employee when the furlough will be for more than 30 consecutive days (or more than 22 workdays if done on a noncontinuous basis), if caused by one of the reasons in 5 C.F.R. 351.201 (reference (l)), and is not in accordance with preestablished conditions of employment. See 5 C.F.R. Part 752 (reference (l)) for additional information.

B. Time Limit. An employee may be furloughed for up to 1 year. The 1-year limit begins the day after the notice period ends and when the furlough begins.

C. Exclusions

★ 1. Placement in nonpay and nonduty status in accordance with preestablished conditions of employment is not a RIF action, but is covered by the requirements in 5 C.F.R. Part 340 (reference (l)).

2. A furlough for 30 days or less (or 22 workdays or less if done on a noncontinuous basis) is not a RIF action but is covered by the adverse action procedures.

0525 ABSENCE FOR MILITARY DUTY

★ 052501. General. Whether an employee is placed on a leave of absence or military separation while absent on military duty depends on the authority under which the employee enters on military duty. A member of a Reserve Component who performs active duty for training or inactive duty training covered under 38 U.S.C. 2024(d) (reference (as)) must be granted a leave of absence upon request. Similarly, an employee is entitled to a leave of absence for the period required to report for induction, enlistment, or to determine by preinduction or other examination the employee's physical fitness to enter the Armed Forces under 38 U.S.C. 2024(e) (reference (as)).

★ 052502. Provisions Under 5 U.S.C. Chapter 83. An absence to perform military duty under any other section of Title 38, United States Code, (reference (as)) ordinarily should be processed as a military separation except during a period of war or national emergency when the provisions of 5 U.S.C. 8332(g) (reference (b)) have been explicitly invoked. In this situation, all employees who enter on military duty will be granted a leave of absence unless an employee has applied for and received a lump-sum credit under 5 U.S.C. Chapter 83 (reference (b)). See 38 U.S.C. 2021 et seq. (reference (as)) and 5 C.F.R. Part 353 (reference (l)). Refer to paragraph 051805. for additional information.

0526 LEAVE WITHOUT PAY (LWOP)

★ 052601. Employee Request. LWOP is a temporary nonpay status and absence from duty granted at the employee's request. Employee requests for paid leave absence, such as annual or sick leave, when such absence converts to LWOP because of insufficient leave available, are considered to be the requests for LWOP.

052602. Authorization. Authorizing LWOP is a matter of administrative discretion. An employee cannot demand LWOP as a matter of right except as follows:

A. Disabled veterans are entitled to LWOP if required for medical treatment under Executive Order 5396, July 17, 1960, (reference (s)).

B. Reserve and National Guard members are entitled to LWOP if required to perform military training duties under 38 U.S.C. 2024(d) (reference (as)). See paragraph 052501.

C. For limited periods, employees are entitled to LWOP if receiving injury compensation under 5 U.S.C. chapter 81 (reference (b)).

052603. Leave Conversion. LWOP granted an employee may not, at a later time, be converted to annual or sick leave except in the case of administrative error, participation in the voluntary leave transfer or voluntary leave bank programs, disability retirement and employee compensation cases in which claims are disallowed or when there has been a settlement or an order of an arbitrator, administrative law judge, or federal judge in an employee dispute.

052604. Reduction of Leave Accrual. When the number of LWOP status hours in a full-time employee's leave year equals his or her biweekly tour of duty (i.e., 80, 112, 144 hours), the employee's leave accrual is reduced by an amount equal to the amount of leave (sick and annual) earned during a pay period. When reduction of accrual is required during the last pay period in the calendar year for an employee in the 6-hour leave accrual category (entitled to accrue 10 hours of leave in such period), leave accrual for that period shall be reduced only by 6 hours. When an employee has one or more breaks in service during the leave year, include all hours in a LWOP status (other than nonpay status during a fractional pay period when no leave accrues). When an employee's number of LWOP hours at the end of the leave year is less than his or her biweekly tour of duty, the LWOP hours are dropped.

0527 ABSENCE WITHOUT LEAVE (AWOL)

052701. General. An absence from duty which is not authorized or approved, or for which a leave request has been denied, is properly charged as AWOL although disciplinary action may be taken on the basis of AWOL. It does not necessarily mean that the employee has insufficient reason for requesting leave but that the employee's presence was required and the reason for requesting leave was one for which approval is not mandatory. AWOL shall be charged on the time and attendance report and leave record for the exact amount of time the employee is AWOL.

052702. Reduction of Leave Accrual. When the number of AWOL status hours in a full-time employee's leave year equals his or her biweekly tour of duty (i.e., 80, 112, 144 hours), the employee's leave accrual is reduced by an amount equal to the amount of leave (annual and sick) earned during the pay period. When reduction of accrual is required during the last pay period in the calendar year for an employee in the 6-hour leave accrual category (entitled to accrue 10 hours of leave in such period), leave accrual for that period shall be reduced only by 6 hours. When an employee has one or more breaks in service during the leave year, include all hours in a AWOL status (other than nonpay status during a fractional pay period when no leave accrues). When an employee's number of AWOL hours at the end of the leave year is less than his or her biweekly tour of duty, the AWOL hours are dropped.

0528 SUSPENSION. Suspension is the placement of an employee in a temporary nonpay and nonduty status for disciplinary reasons. An SF 50 must be issued for all suspensions. See 5 U.S.C. chapter 75 (reference (b)) and 5 C.F.R. Part 752 (reference (l)).

Leave Proration for Fractional Pay Periods

Biweekly Pay Period	Hourly Accrual Rate		
	Category 4 *	Category 6	Category 8
1	1	1	1
2	1	1	2
3	1	2	2
4	2	2	3
5	2	3	4
6	2	4	5
7	3	4	6
8	3	5	6
9	3	5	7
10	4	6	8

* This column may be applied for sick leave purposes.

Table 5-1 (Leave Proration for Fractional Pay Periods)

Leave Conversion Matrix

If the hours available to an employee are insufficient to cover the hours used or requested, the precedence for charging the excess is as follows:

TYPE OF HOURS USED OR REQUESTED	COMP TIME *	ANNUAL LEAVE WITH USE OR LOSE	ANNUAL LEAVE WITH NO USE OR LOSE	RESTORED LEAVE (OLDEST ACCOUNT FIRST)	LEAVE WITHOUT PAY	CREDIT HOURS	DONATED LEAVE FOR FAMILY	DONATED LEAVE FOR EMPLOYEE	REIN- STATED LEAVE
ANNUAL LEAVE	1			2	6	5	4		3
SICK LEAVE	2	1	5	3	8	7		6	4
COMP TIME		1	4	2	6	5			3
MILITARY LEAVE	2	1	5	3	7	6			4
RESTORED LEAVE**	2	1	4		6	5			3
TRAUMATIC INJURY (COP)					1				
MILITARY LEAVE FOR LAW ENFORCE- MENT	2	1	5	3	7	6			4
HOME LEAVE	2	1	5	3	7	6			4
SHORE LEAVE	2	1	5	3	7	6			4
EDUCATORS LEAVE***					1				
REINSTATED LEAVE	2	1	4	3	6	5			
CREDIT HOURS	2	1	5	3	6				4
PGS INCENTIVE					1				
TIME OFF AWARDS ****	2	1	5	3	7	6			4
ANY PURPOSE LEAVE					1				

If no hours are available, LWOP should be charged.

* The oldest compensatory time within the 26 pay period limitation will be charged first, then any grandfathered compensatory time in the separate compensatory time account, if available. DCPS implementation is scheduled for June 1998.

** All restored leave account balances will be used prior to converting to annual leave.

*** Educators leave converts directly to LWOP. Usable annual leave that is grandfathered is kept manually.

**** This conversion occurs if the payroll office has not received notification of the granting of the award within two pay periods after the usage.

Table 5-2 (Leave Conversion Matrix)

Time Limitations for Use of Reinstated Leave

Full-Time Employees	
Hours in excess of maximum accumulation	Time limitation for use of reinstated leave (end of leave year in progress after)
416 or less	2 years
417 – 624	3 years
625 – 832	4 years
833 – 1040	5 years
1041 – 1248	6 years

Part-Time Employees	
Hours in excess of maximum accumulation	Time limitation for use of reinstated leave (end of leave year in progress after)
If 208 or less multiply tour of duty by 20% (1040 x 20% = 208)	2 years
209 – 312 multiply tour of duty by 10% (1040 x 10% = 104)	3 years
313 – 416	4 years
417 – 520	5 years
521 – 624	6 years

Table 5-3 (Time Limitations for Use of Reinstated Leave)

Employee Absences for Court or Court-Related Services

Nature of Service	Type of Absence			Fees			Government Travel Expenses	
	Court leave	Official duty	Annual leave or LWOP	No	Yes		No	Yes*
					Retain	Turn in to agency		
I. JURY SERVICE								
A. U.S. or D.C. court	X			X			X	
B. State or local court	X					X	X	
II. WITNESS SERVICE								
A. On behalf of U.S. or D.C. Government		X		X				X
B. On behalf of state or local government:								
1. Official capacity		X				X		X
2. Non-official capacity	X					X	X	
C. On behalf of a private party:								
1. Official capacity		X				X		X
2. Non-official capacity:								
a. When party is U.S., D.C. or state or local government	X					X	X	
b. When party is not U.S., D.C. or state or local government			X		X		X	

* Offset to the extent paid by the court, authority or party that caused the employee to be summoned.

Table 5-4 (Employee Absences for Court or Court-Related Services)

CHAPTER 6

MISCELLANEOUS ACTIONS (SPECIAL ACTIONS)0601 UNEMPLOYMENT COMPENSATION FOR FEDERAL EMPLOYEES

★ 060101. General. The Secretary of Labor administers the Unemployment Compensation for federal Employees (UCFE) Program under 5 U.S.C. chapter 85 (reference (b)), and prescribes regulations necessary to carry out its provisions. See 20 C.F.R. Part 609 (reference (x)). Each DoD Component has responsibility for managing the UCFE program within that Component. The appropriate human resources organization (HRO) at all DoD employing activities has primary responsibility for UCFE management. The civilian payroll office has the responsibility to assist the HRO by providing wage data needed to complete the Department of Labor ES Form 931 (Request for Wage and Separation Information) and any other information within its control requested by a state, the Department of Labor, other federal agencies, or other DFAS offices. State employment security agencies determine entitlement to compensation and the amount of benefits payable to unemployed federal civilian employees under the applicable state unemployment insurance law. See 20 C.F.R. 609.9 (reference (x)).

060102. Civilian Payroll Office Responsibilities

★ A. The civilian payroll office shall report accurate wages to the HRO to support an accurate state determination. Monetary information that can affect the claim, such as lump-sum annual leave payments and severance pay, also must be accurately reported.

★ B. The state agency prepares an ES Form 931 from information gathered during the claimant's interview and the employee's copy of the SF 8 (Notice to Federal Employee About Unemployment Insurance). Three copies of the ES Form 931 are mailed to the appropriate HRO, and a response must be returned within four workdays after receipt.

★ 1. The DCPS provides a biweekly interface extract to support the Injury Compensation-Unemployment Compensation (IC/UC) application developed by the DoD Civilian Personnel Management Service (CPMS). The HRO staff uses this data in completing the ES Form 931. When requested, the civilian payroll office will provide additional information to the HROs for employees recently transferred to the DCPS. If pay information cannot be provided within the time limits, the civilian payroll office must notify the HRO immediately and the procedures in 20 C.F.R. 609.21(b) (reference (x)) must be followed.

★ 2. The central point of contact for all UCFE matters is the HRO. The civilian payroll office shall refer all state queries, telephone calls, and UCFE documentation to the HRO. For example, if a state wants clarification of wage data, the query must go to the HRO for control purposes. The HRO then shall contact the civilian payroll office for any additional information.

060103. Base-Period Wages and Annual Leave Information

★ A. Base-Period Wages. State agencies determine the amount and duration of unemployment compensation entitlement from the amount of federal employment performed and gross federal wages paid (or earned) in a 52-week base-period (1-year period specified by the state law) which precedes the date of claim. States require 6 or 8 quarters of information to be reported.

1. Federal wages are defined as allowances and pay in any medium (5 U.S.C. 8501) (reference (b)). This includes all payments for leave. Do not report lump-sum payments for annual leave and severance payments as base-period wages. These items are reported separately.

2. The amounts to be reported as base-period wages are gross wages before deductions for Social Security/Medicare, CSRS or FERS, TSP, and federal, state, and local taxes. Gross wages include allowances and pay in any medium. Do not include expenses for official business, such as taxi fares, other cost, per diem, or mileage. Also, do not include payments for uniform allowances. The following shall be included in gross wages:

a. Foreign and nonforeign differentials and allowances. Exemption from federal income tax does not exclude any such item from gross wages for the purposes of unemployment compensation.

b. Back Pay. This includes wages paid during the base-period, even though earned prior to that period.

★ c. Salaries paid by the Department to reemployed annuitants. This is the amount equal to the difference between the salary of the position and the annuity received. The annuity paid by the OPM is not “federal wages” for UCFE purposes.

d. Increases in rates of compensation authorized by acts of the Congress. Such increases shall be reported as wages for the pay period in which paid. This is required even if the first payment covers a retroactive period. If the base period begins or ends during the pay period in which this payment was made, the entire payment should be allocated to the second week of the pay period.

3. Report wages the same way the records are kept. Do not attempt to add or subtract wages earned by the employee for any days before the beginning of the quarter or the remaining days between the last payroll cutoff date and the end of the quarter. For example, if the pay period ends March 28, do not add March 29 through 31 to the wages reported for the January 1-March 31 quarter. Do not report wages for periods other than, or in addition to, those periods requested. If the claimant had no base-period wages, so indicate.

B. Lump-Sum Annual Leave and Severance Pay. Report these items separately from gross wages (base-period wages).

1. If the employee received a lump-sum payment for annual leave after the beginning date of the base period, furnish the following:

a. Amount of payment; date(s) of payment; amount of annual leave (days and hours); and period of annual leave (for example, from 0700, July 8, 1999, to 1400, July 23, 1999).

★ 2. If the employee receives or is entitled to receive severance pay, report the information to the HRO via the interface supporting IC-UC. States whose laws require an offset of severance pay against unemployment benefits must be advised whether the former employee is receiving or will receive severance pay. The state agency obtains severance pay details from the employee's copy of the SF 50 and/or the ES Form 931, if appropriate.

3. If annual leave is payable, but has not been paid, report "annual leave payment due, but not paid," and provide details (period covered, amount of payment, when it will be paid) if known.

★ 060104. Employees on LWOP. Upon the HRO's receipt of an ES Form 931, the nonpay status of an employee must be reported to the state agency. The HRO shall report the employee on LWOP from the starting date, through the ending date, and any other pertinent data. If the employee is in a nonpay status for more than 30 days, the SF 50 provides the LWOP information. For LWOP of 30 days or less, the biweekly interface extract provides this information to the HRO.

A. The HRO shall indicate whether employees on LWOP are awaiting OWCP for an on-the-job injury or disability retirement.

B. If an employee is awaiting an OWCP determination, the state agency is responsible for contacting the OWCP for any necessary data it needs.

060105. Back Pay Notification

A. If an employee is entitled to back pay, the HRO shall determine if the employee applied for UCFE within the last 52 weeks. If the employee applied for or received UCFE, the HRO shall promptly notify the state agency of the date of back pay payment, amount, and period covered. The state agency may be required to redetermine benefits. The HRO shall suspense its notification for state reply. If a reply is not received in 60 days, the HRO shall send a follow up. If no answer to the follow up is received from the state in 30 days, request assistance for resolution.

B. The Department will not deduct from the back pay the amount of UCFE paid during the period covered by the back pay. UCFE must be deducted from back pay awards however, when state law requires the employer, rather than the employee, to reimburse the state for overpayments and when appropriate, the state agency has determined that an overpayment has occurred and has notified the employing agency (65 Comp. Gen. 865 (1986)) (reference (p)).

060106. Obtaining Data from the National Personnel Records Center (NPRC)

A. How Obtained. If records necessary to furnish wage data to the HRO have been sent to the NPRC, they should be obtained via the telephone or facsimile. Since this information is subject to the Privacy Act of 1974 (reference (e)), it must be handled in accordance with the provisions of that Act. The NPRC gives priority to such requests. The request must:

1. Be addressed to the NPRC, Civilian Personnel Records, 111 Winnebago Street, St. Louis, Missouri 63118-4199.

2. Clearly identify the office sending the request.

★ 3. Read "Unemployment insurance request for wages for 4 calendar quarters, enter period as shown on the ES Form 931, and statement of reasons for separation for (last name, first name, and middle initial), (name under which employed, if different), (date of birth), and SSN."

B. Prohibited Actions. The HRO or civilian payroll office shall not send the ES Form 931 to the NPRC for completion. The state agency should not be asked to obtain data from the NPRC. State agencies shall be advised when the information is being requested.

C. Record Center Reply. A written reply will be received from the NPRC. The NPRC will mail a photocopy of the individual pay record to the civilian payroll office. The civilian payroll office shall furnish wage data to the HRO on the basis of data furnished in the NPRC reply. Upon receipt of the pay record, wage data furnished the HRO shall be compared with the pay record. If an error is discovered, the HRO shall be notified and it shall in turn notify the state agency.

0602 UNEMPLOYMENT INSURANCE FOR CANADIAN EMPLOYEES060201. The Canadian Unemployment Insurance Program

A. The U.S. Government takes part in the Canadian Unemployment Insurance Program for Canadians employed in Canada by the Department.

B. U.S. participation in this program began at the start of the first pay period after June 30, 1956.

C. The civilian payroll office shall follow the procedures in this section for unemployment insurance withholdings and contributions for covered employees.

D. Installations that employ or might employ personnel in Canada shall request the following publications from the nearest Unemployment Insurance Commission (UIC) Office:

1. 443C (Information Regarding the Bulk Payment Method of Making Contributions).

2. 651A (Workers Handbook on Unemployment Insurance).

3. 651B (Employer's Handbook on Unemployment Insurance).

If these publications are not available locally, copies may be requested from the Unemployment Insurance Commission Office, Vancouver, British Columbia, Canada.

060202. Policies Governing DoD Participation

A. Modifications. The civilian payroll office shall follow procedures in UIC 443C; however, the following requirements do not apply to the Department:

1. Standing deposit of one month's combined contribution;

2. Application to operate on a calendar year basis. DoD installations will operate on the basis of a payroll year which, for this purpose, will be a calendar year; and

3. Remittance of contributions and withholding by certified check.

B. Coverage

1. The civilian payroll office shall use UIC 651B to determine insurable employment and earnings for withholding. Exceptions are in item 2, below.

2. Contributions shall not be withheld for Canadian employees who are spouses of U.S. citizens employed by DoD Components and for U.S. civilians paid from appropriated and nonappropriated funds.

a. The Canadian employee must notify the civilian payroll office, through the HRO, of any change in marital status that affects insurability.

b. Deductions for Canadian Unemployment Insurance will stop at the end of the pay period in which notice of marriage is received.

c. Deductions shall start at the beginning of the next pay period after notice of divorce is received.

C. Refund of Deductions. If refund of deductions is required, DoD installations will refund only amounts totaling \$1 or more.

D. Retroactive Payments. The Department shall not make retroactive payments of deductions to the Canadian Unemployment Insurance Commission if the employee concerned

has not given true information to the employing installation. This includes cases that have been adjudicated.

E. Audit by the Canadian Unemployment Insurance Commission. DoD records of deductions, contributions, and remittances are subject to audit. The audit requirements can be met by sending copies of records of covered personnel and insurance remittance documents to the proper District Audit Office. The civilian payroll office shall send copies of records required by Canadian authorities on request.

060203. Amount of Contributions

A. Employee's Share. Funds shall be withheld from the pay of all insurable employees at rates set in UIC 651B.

B. Employer's Share. The employer's share shall equal the amount withheld from the employees' pay on each payroll voucher. The contribution shall be charged to the fund from which the employees' salaries are paid.

060204. Disposition of Contributions

A. Payroll Collection. The employee and employer contributions shall be made as a voucher deduction on the payroll voucher. For example, the accounting classification for the DoD civilian payroll offices will be deposit fund account 97X6875, "Suspense, Department of Defense."

B. Remittance to Canadian Unemployment Insurance Commission. The civilian payroll office shall request a bulk payment permit and information on deviation from remittance procedures from the Chief Coverage Officer, Unemployment Insurance Commission, Ottawa 1, Ontario, Canada. An SF 1049 (Public Voucher for Refunds) shall be used to make the biweekly remittance to the Commission from the deposit fund account --X6875.

0603 MASS TRANSFER OF PAY ACCOUNTS

060301. A mass transfer is the movement of a number of employee accounts from one civilian payroll office to another, and the losing civilian payroll office remains operational. Refer to section 0105 for procedures concerning DoD civilian payroll operations that are being disestablished in accordance with consolidation initiatives.

★ 060302. Requests for mass transfer or transfer of payroll function must be sent, with justification, to the Director, DFAS, via the major command or claimant. The Director, or designated official, must approve all such requests in writing. These actions may also be initiated by the Director to improve efficiency and economy of the payroll operation.

060303. Losing Civilian Payroll Office Responsibilities

★ A. The losing civilian payroll office affected by the mass transfer must notify all the affected parties receiving support (refer to the following list). It is recommended that these parties be notified at least 90 days in advance of the proposed transfer but not less than 30 days prior to the date of the actual transfer. Below is a list of affected parties:

★ 1. The HROs that provide support to the employees being transferred. The HROs are responsible for notifying labor organizations and professional associations.

2. Each IRS District to which payments for tax levies are remitted for employees affected by a mass transfer.

★ 3. The DFAS-Cleveland Center for employees with court-ordered garnishments. The DFAS-CL/L will notify each court to which alimony, child support, and bankruptcy payments are remitted for employees affected by the mass transfer.

★ 4. Other federal agencies (e.g., Department of Veterans Affairs or Department of Education) and DoD functional areas (e.g., travel, hospitals, etc.) for whom debts are being collected.

5. The Defense Manpower Data Center (DMDC).

6. State and local taxing authorities if the transfer closes out the account.

★ 7. The TSP recordkeeper at NFC by the TSP-19 (Transfer of Thrift Savings Plan Information between Agencies).

8. FEHB insurance carriers.

★ 9. CSRs.

★ 10. Disbursing office for SF 1195 data.

★ 11. The Department of Labor for ongoing OWCP cases.

★ 12. The employing activity that is responsible for notifying the employees, source data automation systems, and accounting activities of the transfer.

★ 13. Employees with debts being collected and employees with outstanding debt collection letters. Employees will be notified that debts are being transferred to new civilian payroll offices and be provided with a point of contact at the gaining civilian payroll office.

★ B. The losing civilian payroll office shall prepare employee substantiating document files as stated in subparagraphs 010504.B.1. through 4. Every effort shall be made to transfer data electronically through automated processes. Hard-copy documents, original or copy as

appropriate, shall be forwarded to the gaining civilian payroll office for the following even if the data has been transferred electronically:

- ★ 1. Indebtedness to the U.S. Government. Copies of all documentation to support current collections including all on going DoD and non-DoD debts with the unpaid balance of the debt on the transfer date and the remittance address.
- 2. Form 668-W. Forward the original IRS tax levy showing the unpaid balance on the transfer date.
- ★ 3. Court-Ordered Bankruptcy. Forward the original court order and addendum with balance due on the current order on the transfer date. Also, furnish a copy to DFAS-CL/L if there is a pending commercial garnishment.
- ★ 4. SF 1190. Advances of pay received by DoD civilian employees proceeding to or arriving at a post of assignment in a foreign area are authorized an advance of up to 3 months of gross pay. Provide a copy of the SF 1190 and the unpaid balance and biweekly deduction.
- 5. NAF 401k Authorizations. Forward a copy of the authorization that supports employee contributions to an NAF 401k plan allowable by the Portability of Benefits for NAF Employees Act (reference (e)).
- 6. Form TSP-1-NAF (TSP Election Form for Retroactive Contributions - NAF Employees). Forward a copy of the TSP-1-NAF for any employee who is currently making retroactive TSP contributions allowable by the Portability of Benefits for NAF Employees Act (reference (e)).
- ★ 7. SF 2806. Forward all hard-copy retirement records on file.
- 8. Form TSP-22. Forward a copy of all Forms TSP-22 that support TSP loan information.
- 9. SF 1150 and SF 1150A. Prepare an SF 1150 in accordance with “The Guide to Processing Personnel Actions,” subchapter 21 (reference (r)) to reflect all leave balances as of the end of the last pay period paid by the losing civilian payroll office. Prepare an SF 1150A for the transfer of donated leave. Forward the original of the SF 1150/1150A to the losing HRO to be included in the OPF and forwarded to the gaining HRO. After receipt in the gaining HRO, the SF 1150/1150A will be forwarded to the gaining civilian payroll office. File a copy in the employee's substantiating document file.
- ★ 10. Buy Back of Leave. Forward copies of documentation to support the buy back of leave.

11. OPM Form 1514. Forward all OPM Form 1514 information, including unpaid balance and biweekly deduction, to reestablish any unpaid balance on the day prior to transfer.

C. Complete Final Pay Period Processing. The losing civilian payroll office must complete processing for the last pay period for which it has responsibility for the employees affected by the mass transfer. Completion of these actions will allow the employee's records to contain the most current information.

1. Compute and process final salary and other payments. Prior to processing the final pay period, ensure that all time and attendance reports and all documentation from HROs have been processed.

2. Reconcile and clear/remit any deposit fund accounts for the employees affected by the mass transfer.

3. Produce SFs 2806/3100.

a. SFs 2806/3100 shall be forwarded to the OPM when the transfer is from one Component's to another Component's civilian payroll office, or from a Component's civilian payroll office to a DoD (code 97) civilian payroll office.

b. SFs 2806 shall be forwarded to the gaining civilian payroll office when the transfer is from a losing civilian payroll office within the same Component or between DoD (code 97) civilian payroll offices. SFs 3100 shall be forwarded to OPM.

★ 4. Bond balances shall be transferred and not refunded to the employees upon a transfer from one DoD civilian payroll office to another DoD civilian payroll office. Bond balances shall be refunded and not transferred when the transfer is outside the Department.

★ 5. Compensatory hours and religious compensatory hours shall be paid for all transfers from one DoD Component to another DoD Component. Credit hour balances shall be paid for all transfers from one employing activity to another employing activity.

★ 6. The losing civilian payroll office shall make any retroactive adjustments necessary for an employee previously paid by their office and send to the gaining civilian payroll office for payment/collection.

060304. Gaining Civilian Payroll Office Responsibilities. The gaining civilian payroll office shall establish employee substantiating document files with the employee's SSN and name.

★0604 DOUBTFUL OR QUESTIONABLE CLAIMS

★ 060401. General. The General Accounting Office Act of 1996, P.L. No. 104-316 (reference (e)) transferred the claims settlement functions previously performed by GAO to certain executive branch agencies. As specified in Volume 5 of this Regulation, claims are received on a continuing basis from present or former civilian employees for additional compensation for various reasons. All such claims must receive individual processing to determine administratively whether or not the employee is entitled to the amount claimed. If the claim relates to the determination of an entitlement or similar matter, which is the responsibility of the HRO, it should be negotiated and documented through the employing activity's personnel channels. If the matter remains unsettled and the employee wishes an OPM review, the civilian payroll office shall fully document the case, including the review processes, and forward the file to the DFAS-CO Directorate of Debt and Claims Management Office, Denver, Colorado.

060402. Procedures

A. Filing a Claim. Claims should be filed with the activity at which the individual was/is employed during the period for which additional compensation is claimed. The claim shall be fully documented and sent to the address identified in paragraph 060401 for all claims related to civilian pay matters which cannot be resolved at the base or major command/claimant level.

B. Processing Claims

★ 1. Approved Claims. Claims received by the civilian payroll office from the claimant may be approved and paid when there is no question of law or fact. Claims for pay under Title 5, U.S.C. (reference (b)) must be filed within 6 years of the date the right to payment accrued. Claims for overtime pay under the FLSA (reference (n)) filed on or before June 30, 1994, are also subject to the 6 year statute of limitations; those filed after that date are subject to a 2-year statute. See Comp. Gen. B-250051 and B-256938.2 (reference (p)) for additional information. Any claim received from the OPM, including those originally received by the offices identified in paragraph 060401 but forwarded to the OPM for approval, shall be acted upon in accordance with instructions in the letter transmitting the claim to the civilian payroll office. These claims shall be paid only at the direction of the OPM or the appropriate office identified in paragraph 060401. When payment is to be made by the civilian payroll office, the claim shall be paid as part of the regular payroll.

★ 2. Disapproved Claims. Claims not received through the OPM that are disapproved administratively by the civilian payroll office shall be returned to the claimant with a letter containing the basis for the disapproval. The claim shall be forwarded to OPM via the appropriate office identified in paragraph 060401 if the disapproval is appealed by the employee,

C. Documents. Generally, documents required to support a claim are:

1. A letter of transmittal prepared by the civilian payroll office, addressed to the appropriate office identified in paragraph 060401. The following shall be included:

- a. The claimant's name, SSN, address and agency;
 - b. A statement of the pertinent facts out of which the claim arose;
 - c. A statement of the doubt or other reason for forwarding the claim;
 - d. A recommendation for the proper disposition of the claim;
 - e. A citation to pertinent supporting documents;
 - ★ f. A statement that the claim has not been and will not be paid until certified in the name of the OPM;
 - g. A complete symbol citation to the applicable appropriation or fund.
2. A claim letter submitted by the claimant, legal representative, or other lawful claimant. The letter includes name, SSN, and address of the claimant.
3. The original and one copy of any supporting document. These documents include the following depending on the type of claim involved:
- a. Any pertinent vouchers;
 - b. Any pertinent time and attendance reports;
 - c. Individual pay record;
 - d. Certified copy of the SF 1150;
 - e. Certified copies of the SF 50;
 - f. Transcript of service history;
 - g. Overtime authorizations;
 - h. Leave applications, doctor's statement, etc.;
 - i. Other required documents.
4. An unpaid voucher from the civilian payroll office, in original and the appropriate number of copies, for all cases when the amount may be due, including doubtful cases. One copy is kept on file. The appropriate federal, state, and local tax withholdings, life insurance, retirement, or Social Security and/or Medicare deductions are to be indicated in the appropriate places on the voucher. The employer's contributions to retirement, life insurance, and Social

Security and/or Medicare, etc. are also to be indicated. The complete accounting classification is to be included, whether the recommendation is for or against the claim.

5. If an attorney presents a claim for an employee, verification that he or she has authority to act for the employee, e.g., a copy of a signed fee agreement, a letter from the employee or a duly executed power of attorney.

★ 060403. Payment. Claims that have administratively been determined correct by the OPM are settled and paid by the civilian payroll office.

★ 060404. Claims Required To Be Submitted To OPM. The following classes of claims may not be paid or administratively denied, but must be forwarded to the OPM, Claims Adjudication Unit, Office of General Counsel, 1900 E Street NW, Washington, DC 20415. These claims are forwarded to OPM via the offices identified in paragraph 060401 for adjudication unless otherwise specifically provided by law.

★ A. Claims that involve doubtful questions of law or fact, except those under \$25, and claims that have been the subject of an advance decision by applicable authority, in which case, a reference to the decision must appear on the voucher supporting the payment. When a claim contains items that involve doubt, and items, which the DFAS Centers can settle administratively, only the doubtful portions over \$25 should be referred to OPM through DFAS-HQ for settlement.

★ B. Claims, regardless of doubt, which are required by statute, or by decision of applicable authority, to be settled by the OPM before payment is made or denied.

C. Reclaims of items previously denied in an administrative review by the DFAS Centers, unless it is determined administratively that the action taken was clearly in error and properly can be corrected by the DFAS Centers.

★ D. Claims that appear to be barred by the applicable statute of limitation at the time of receipt for administrative review by the DFAS Centers. If the statutory period of limitations will soon expire, claimants shall submit their claims directly to the Claims Division of OPM. In order to protect the interests of claimants, claims received as to which the right of payment accrued 4 years or more before the date of receipt and which cannot promptly be approved and paid in the full amount claimed shall immediately be referred to the Claims Division of the OPM. These claims shall be recorded in OPM, after which they shall be returned for payment, denial, or referral back to OPM for adjudication.

★ 060405. Advance Decisions. Requests for an advance decision from the Defense Office of Hearings and Appeals (DOHA) shall be processed as prescribed in Volume 5 of this Regulation. In addition to normal submission channels prescribed in Volume 5 of this Regulation, requests to the DOHA involving the determination of an entitlement or similar matter which is the responsibility of the HRO shall be negotiated and documented through the appropriate human resources channel.

CHAPTER 7

SPECIAL CATEGORY EMPLOYEES0701 OVERSEAS EMPLOYEES

★ 070101. The general pay provisions for GS employees stateside also apply to GS employees overseas. The DoD 1400.25-M, subchapter 1250, "Overseas Allowances and Differentials" (reference (u)) authorizes and governs the payment of allowances and differentials to DoD civilian employees who are citizens of the United States and who are located in foreign areas. The DSSR (reference (t)) prescribes the eligibility requirements to be met by employees, the applicable rates to be paid, and the provisions to be observed in paying overseas foreign area allowances and differentials.

070102. Foreign Nationals

★ A. Authority. The legal basis for setting pay for foreign national employees is section 408 of the "Foreign Service Act of 1980" (P.L. 96-465) (reference (e)) (22 U.S.C. 3968) (reference (at)). The DoD 1400.25-M, subchapter 1231 (reference (u)), Employment of Foreign Nationals, delegates the authority to each Military Department for redelegation to Service Component Commanders to establish salaries, wages, fringe benefits, related compensation items, and other terms of employment for foreign national employees. The DoD Manual for Foreign National Compensation (DoD 1416.8-M) (reference (av)) prescribes the procedures and instructions for the development of compensation programs for foreign nationals employed by the U.S. Forces in foreign areas.

★ B. Entitlements. The CPMS Wage and Salary Division establishes wage schedules for foreign national employees based on locality wage surveys or other available data as provided by the activity labor agreement between the U.S. Government and the government of the foreign country. The basis for salary determination and deductions are contained in the employing activity's applicable inter-country agreements and personnel regulations.

070103. Panama Employees

A. General. The wages for the Panama Canal Employment System are approved by the Panama Area Personnel Board under 35 C.F.R. 251 (reference (v)).

1. Transfer of Function Pre-Treaty Employees. These are employees that transferred from the former Canal Zone Government to DoD activities in the Republic of Panama. Their leave entitlements differ from the other types of employees.

a. These employees accrue leave at the rate of 11 hours a pay period for 25 pay periods and 9 hours for the 26th pay period. If there are 27 leave periods in the leave year, no leave is accrued for the 27th pay period. Leave accrued by Panama employees is used for

all purposes. The maximum accrual for the leave year is 284 hours. The maximum annual leave ceiling (carryover) is 760 hours. When these employees voluntarily are reassigned to a DoD non-transfer of function office, they revert to the regular federal employees leave system.

b. Leave Balance upon Movement of Transfer of Function Pre-Treaty Employees. When an employee described in subparagraph 070103.A.1.a. departs for an assignment outside the Republic of Panama, that employee is entitled to carry forward the balance of leave credited at the end of the pay period including the date the employee departs for such assignment. The annual leave carry forward balance may not exceed a maximum of 760 hours unless the employee has been authorized a greater balance. See 5 C.F.R. 630.302 (reference (l)) and 5 U.S.C. 6304(c) (reference (b)). If any such balance is in excess of 240 hours and is reduced as of the end of the leave year, the reduced amount becomes the new carry forward balance.

2. Pre-Treaty Employees. These are employees hired before the Treaty of October 1, 1979.

a. Pre-Treaty non-U.S. citizens are subject to CSRS (no Medicare), FEHB and FEGLI. The FEHB plan is under the Panama Canal Area Benefits plan as officially listed by the OPM (see paragraph 040808). Not all of these employees, however, are under the FEHB. In 1982, these employees were allowed to choose to receive their health benefits from the Panama Social Security System or the FEHB.

b. When a Pre-Treaty non-U.S. citizen retires or separates, his or her retirement record is transferred to the OPM. No identifying number is shown on the SF 2806; however, it is annotated with the statement "This is a non-U.S. citizen."

3. Post-Treaty Employees. These employees, hired on or after October 1, 1979, are not covered by the Department of Labor Workers Compensation Act. They are covered by Panama Social Security for on-the-job injury.

a. Post-Treaty Panamanians are subject to Panama Social Security tax that includes their health benefit coverage. They also have Panamanian life insurance.

b. Post-Treaty third country employees are covered under the Panama Social Security System.

4. Non-U.S. Citizen DoDDS Teachers. These employees are included in section 0702.

★ B. Identification Numbers. The Panamanian Government assigns a Cedula number to each non-U.S. official resident of Panama. The Panamanian Government uses this number for similar purposes as the United States uses the SSN. The Cedula number is assigned at birth or when a foreigner becomes an official resident of Panama.

★ 1. The Cedula number consists of alphanumeric characters in several configurations. The number is used to report Panamanian income tax.

2. Each Panamanian is assigned two other numbers, i.e., the Seguro, (or Panamanian social security) and individual personal number (which is used for various reporting purposes).

a. The Seguro is currently a 7-digit number assigned by the Panama Social Security Hospital System. It is assigned to all local Panamanian and third country persons. It is used only for hospital, health care and retirement.

b. The individual personal number is a 5-or 6-digit number used by employers to pay into an employee's retirement account and health care within the Panamanian Social Security System. This number is used in place of the SSN to identify Panamanian foreign nationals in the civilian payroll systems.

C. Deductions. Panamanians are authorized to contribute to the CFC, have union dues deductions, and participate in the TSP. All Panamanians are subject to the Panama income tax and educational taxes.

D. Dual Appointments. Dual appointments for Panama are governed by the same rules as other federal employees, with the exception of the pseudo SSN. For Panamanians, a pseudo individual personal number is used in place of the pseudo SSN.

E. FLSA. The FLSA does not apply to civilian employees working in Panama regardless of citizenship.

070104. Canadian Employees

A. General. Canadian national direct-hire employees receive compensation comparable to that paid to Canadian Government employees in the same locality and performing essentially the same work with relatively the same degree of responsibility.

★ B. Authority. DoD Directive 1400.6, DoD Civilian Employees in Overseas Areas (reference (aw)), and DoD 1400.25-M, subchapter 1231, Employment of Foreign Nationals (reference (u)), contain the authority for the administration of foreign nationals, including Canadians.

C. Entitlements

1. Hours of Duty. The workday is 7 ½ hours and the workweek is 37 ½ hours.

2. Holidays. Canadian legal holidays are observed with no charge to leave. If an emergency requires work on a Canadian holiday, an additional day's pay is provided or the employee is given compensatory time off. The following are the legal Canadian holidays:

- a. New Year's Day (Jan 1)
- b. Good Friday (Mar-Apr)
- c. Easter Monday (Mar-Apr)
- d. Victoria Day (May 24)
- e. Canada Day (July 1)
- f. Civic Holiday (1st Mon. in Aug)
- g. Labor Day (1st Mon. in Sep)
- h. Thanksgiving Day (Oct-Nov)
- i. Remembrance Day (Nov 11)
- j. Christmas Day (Dec 25)
- k. Boxing Day (Dec 26).

3. Absence and Leave. Sick leave is accrued at the rate of 4 ¼ hours each pay period except for the last pay period of the leave year. During the last pay period, 6 ¼ hours accrue. The total annual accumulation is 112 ½ hours or 15 days of sick leave.

4. Work-Related Injury or Illness. Compensation for work-related injuries or illness is covered by the FECA (reference (e)).

D. Pay. Salaries are based on rates in approved agreements between the Treasury Board of Canada and the Public Service Alliance of Canada for Canadian Civil Service Employees. The effective dates are the same as in the basic Canadian agreements. Pay is in Canadian dollars on a biweekly basis.

E. Step Increases. Step increases are made annually, until the top step is reached, upon written certification by the supervisor that an employee has demonstrated an acceptable level of competence during the waiting period. Certification is completed and forwarded to the human resources organization (HRO) for processing prior to the effective date of the step increase. Step increases are effective at the beginning of the first pay period following the effective date of the anniversary.

F. Retroactive Pay. Retroactive pay adjustments are made on the basis of agreements covering Canadian Civil Service employees. These adjustments are payable to employees separated during the retroactive period.

G. Leave Without Pay (LWOP). Aggregate periods of LWOP of more than 80 hours during the waiting period for a step increase delays the increase. Extended periods of LWOP also affect leave accruals.

H. Canada Pension Plan. Employees' contributions to the Canada Pension Plan are deducted from their salaries. The U. S. Government pays the employer's contribution.

I. Registered/Retirement Pension Plan. The U.S. Government pays an amount equivalent to the employees' contributions up to a legal maximum of annual salaries.

J. Severance Pay. Employees are paid a lump-sum amount according to the following:

1. Lay-Off. Two weeks of pay for the first complete year of continuous employment and one week of pay for each additional complete year of continuous employment with a maximum benefit of 28 weeks of pay.

2. Resignation. On resignation with 10 or more years of continuous employment, one-half week of pay for each complete year of continuous employment up to a maximum of 26 years with a maximum benefit of 13 weeks of pay.

3. Retirement. On retirement, when an employee would be entitled to an immediate annuity or to an immediate annual allowance had the employee been under the Canadian Government Public Service Superannuation Act (reference (ax)), one week of pay is paid for each complete year of continuous employment with a maximum benefit of 28 weeks of pay.

4. Death. If an employee dies, one week of pay is paid to the employee's estate for each complete year of continuous employment with a maximum benefit of 28 weeks of pay, regardless of any other benefits payable.

K. Ontario Health Insurance Plan. Employees enrolled in the Ontario health insurance plan are reimbursed an amount equivalent to the Canadian Government contributions under the plan. Claims for reimbursement, supported by receipts, are submitted annually by the end of the calendar year.

L. Unemployment Insurance. The U.S. Government contributes the amount equal to that, which would be paid by a Canadian Government employer to the Canadian fund. Employee contributions are deducted from their salary. More information on unemployment insurance for Canadian employees is in section 0602.

M. Canadian Income Tax. Employees' contributions are deducted from their salaries.

N. Occidental Life Insurance. Contributions are deducted from the salary at the employee's request.

O. Awards. Canadian National employees are eligible for all awards generally, except quality increases.

0702 DEPARTMENT OF DEFENSE EDUCATION ACTIVITY (DODEA) EMPLOYEES

070201. Teaching Position (TP) Pay Plan - Educators

A. General. Title 20, United States Code sections 901-907 (reference (ay)), as implemented by DoD Directive 1400.13 (reference (az)), governs the salaries and personnel practices applicable to educators employed by DoD Dependents Schools (DoDDS) on a school-year basis overseas. The pay and personnel practices are implemented by policies and regulations issued by the Office of Dependents Education and the DoDEA. These policies and regulations differ considerably from those applicable to other federal civilian employees paid under Title 5 United States Code or other statutes. The DoDDS educator salaries are authorized under the TP pay plan and are earned during a school-year (seasonal) work schedule and are paid on a school-year or calendar-year basis, depending upon the work schedule (i.e., 190- or 222-duty days). A TP educator does not earn annual, sick, or home leave under Title 5 United States Code. Normally, a TP educator is not scheduled to work on recess days (including holidays) during the school year, nor does a TP educator earn pay for recess days. Biweekly pay is computed differently for a TP educator. A TP educator employed by DoDDS to instruct in the Junior Reserve Officer Training Corps (JROTC) program is compensated under the provisions of 10 U.S.C. 2031(d) (reference (ar)). Pay practices and procedures unique to the TP employment system and how it affects computation are discussed in the following paragraphs.

B. School Year Calendars

1. The "school-year" for most TP educators consists of 190 scheduled working (duty) days, including normally 183 days during which classroom instruction occurs. Included in the 190 duty days is the time required before and after the dates school is in session when the services of all or a majority of the educators are required to prepare for the opening and closing of school. As long as 190 duty days are required and not less than 175 days of work occur on classroom instructional days, the work schedule may be adjusted after the school year begins with no resultant change in school-year salary. Additional compensation is not authorized for make-up days required to meet the 175 classroom instructional day minimum. Should work beyond the 190 duty days during a given school year (August 1 through July 31) be required, an educator shall be compensated at the appropriate daily rate as of the 191st working day. Should an emergency preclude completion of a full school year at one or more schools, an educator must be furloughed, separated, or the salary continued until the full school-year salary has been paid.

2. The "school year" for a school principal and assistant principal consists of 222 working (duty) days, including any time when the services of a majority of educators at the school are required. As long as the 222 duty days are required and not less than 175 days of work occur on classroom instruction days, the work schedule of the principal and assistant principal may be adjusted with no resultant loss of school year salary. Additional compensation is not authorized for make-up days required to meet the 175 classroom instructional day minimum. Should work be required beyond 222 duty days during a given school year (August 1 through July 31), the principal or assistant principal shall be paid the appropriate daily rate as of the 223rd working day. Should an emergency preclude completion of the full school year, the principal or assistant principal must be furloughed, separated, or salary continued until the full school-year salary has been paid.

3. Each year before the school year begins, each overseas DoDDS regional headquarters prepares a school-year calendar for the schools within the region. The calendars may vary among and within the regions due to local customs and holidays. The calendars identify the first and last duty days of the school year (i.e., duty days for educators and instructional days for students) and the recess days for educators and students. Recess days are days that educators are in a nonduty and nonpay status. Recess days include federal holidays and other nonduty days occurring during the school year such as Thanksgiving Day and the following Friday when educators are not required to work and are not charged leave. Each overseas DoDDS regional headquarters shall submit a copy of all applicable school calendars to the servicing DoD civilian payroll office not later than 4 weeks prior to the first duty day of the new school year. Any changes to the calendars shall be submitted as soon as possible.

C. Work Schedules. All TP pay plan educators are scheduled to work and take leave in full or half-day increments. This includes school-level administrators as well as substitute teachers. Substitutes performing certain itinerant services, however, such as extra-duty type work and tutoring in the home of sick students, may accumulate time in half-day increments and be paid accordingly.

★ D. Salary Schedules. The CPMS Wage and Salary Division issues TP pay schedules following completion of the annual survey. Such schedules are typically issued in April or May of the current school year. The TP schedules are retroactive to August 1 of the current school year (i.e., the prior calendar year). Until the salary schedules for the current school year are issued, TP educator salaries are based upon the prior school-year salary schedules. Separate salary schedules are prepared for educator, management, specialist, and administrator positions assigned to overseas school-level positions with school-year (seasonal) work schedules. Salary schedules are further differentiated by academic salary lane (i.e., Bachelor's, Bachelor's plus 15, Bachelor's plus 30, Master's, Master's plus 15, Master's plus 30, and Doctorate's degree), and step. Most TP salary schedules also contain 14 annual steps and 4 longevity steps. The following TP salary schedules exist:

★	<u>ScheduleCategory</u>	<u>Duty Days</u>
A	Substitutes	190
B	Junior Reserve Officers' Training Corps Instructors	190
C	Comprehensive Schedule for Educators and Specialists	190
D	Schedule for Social Workers	190
E	Schedule for Guidance Counselor	190
F	Schedule for School Psychologists	190
M	Schedule for Management and Education Specialist Positions	190
N	Schedule for Management and Education Specialist Positions	190
K	School Principals	222
L	Assistant Principals	222

Additional TP salary schedules are published for other categories of educators assigned to schools in Panama. The gross amount of the retroactive adjustment computed due to the new salary schedules is subject to applicable withholdings (e.g., retirement (CSRS & FERS); federal income tax; Social Security/Medicare; and state income tax). Biweekly deduction amounts for basic and additional optional FEGLI shall increase in many cases for TP educators who have elected those benefits. TSP contributions shall also be adjusted for participating educators who have elected to have a percentage deducted from their pay. For FERS educators who are eligible, the TSP basic one percent and matching employer contribution also must be adjusted. When applicable, foreign post allowance also may be adjusted. The HRO shall send the SF 1190 data to the civilian payroll office for each affected educator when allowance amounts change as a result of new TP salary schedules. When applicable, foreign post differential shall be adjusted because it is computed as a percentage of base pay.

E. Daily/Biweekly Pay. See paragraph 070203 regarding compensation for TP educators, principals and assistant principals.

F. Step Increases

1. Eligibility

a. Each full-time TP educator assigned to a 190-day school-year work schedule may receive a regular (annual) step increase (steps 1 through 14) provided he or she has been in a pay status at least 150 working days during his or her last previous school year as a TP educator. Substitutes are not eligible for step increases.

b. Each full-time TP educator assigned to a 190-day school-year work schedule may receive a longevity step increase (steps 15 through 18) provided he or she has been in pay status at least 150 working days during each of the previous four school years as a TP educator.

c. Each half-time TP educator assigned to a 190-day school-year work schedule may receive a regular (annual) step increase provided he or she has been in a pay status at least one-half of 150 working days during each of the previous 2 school years. A half-time

TP educator may receive a longevity step increase (steps 15 through 18) after he or she has been in a pay status at least one-half of the 150 working day minimum during each of the previous 8 school years.

d. Each full-time TP educator assigned to a 222-day school-year work schedule may receive an annual step increase (steps 1 through 10) provided he or she has been in a pay status at least 175 working days during his or her last previous school year as a TP principal or assistant principal.

★ e. Each full-time TP educator assigned to a 190-day school-year work schedule may be entitled to receive an annual step increase (or service credit towards a longevity step) for the last satisfactory year of service, plus an additional annual step (or service credit) for the first year of absence only, upon return to duty after successfully completing a program of study or employment of 1 or more years under the Administrative Reemployment Rights program.

2. Effective Date. Step increases are effective as of August 1 of each school year. A promotion or demotion does not change the effective date of a step increase. Step increases shall be effective prior to when a promotion, demotion, or other movement becomes effective.

G. Late Arrival at Post

1. A TP educator newly recruited from the CONUS is appointed with the understanding that the educator shall serve for an entire school year (i.e., the 190 or 222 duty-day school-year work schedule) or a specified part thereof. A TP educator who, through no personal fault, and as a result of transportation or processing delays after selection for appointment, arrives late at the post of assignment shall be administratively excused. This educator shall be paid as if the educator had arrived on time and actually served during the lost time.

2. A TP educator, other than as described in subparagraph 070201.G.1., who arrives late at the post of assignment after the start of the school year, shall not be paid for the working days occurring prior to the day of arrival at the assigned post unless granted paid leave by the supervisor.

H. Early Arrival at Post

1. A TP educator who arrives at the post of assignment prior to the start of the school year is not compensated for nonduty days prior to the start of the school year.

2. A TP educator who is appointed to a temporary TP educator position to perform work prior to the start of the school year shall be compensated at the educator's daily salary rate for the prior school year (this salary is not subject to retroactive adjustment) for each day of such work performed. In such an instance, the SF 50 data from the HRO notifies the civilian payroll office.

I. Late Departure from Post

1. A TP educator who is unable to depart promptly after the end of the school year for personal reasons or because of circumstances beyond his or her control, (e.g., lack of available transportation) is not entitled to basic compensation for the period between the end of the school year and the date of departure.

2. A TP educator who is appointed to a temporary TP educator position to perform work after the end of the school year shall be compensated at the educator's daily salary rate for the prior school year (this salary is not subject to retroactive adjustment) for each day of such work performed. In such an instance, the SF 50 data from the HRO notifies the civilian payroll office.

J. During Travel. While enroute during a PCS between school years, a TP educator is in a nonpay status; therefore, basic compensation is not received.

K. Work at More than One Post of Assignment. When a PCS is effected during a school year, action shall be taken to ensure that, after working the scheduled duty days during the remaining pay periods at the new post of assignment, the TP educator will have received the full school year salary to which entitled. If the total of days actually worked during the school year (to include paid leave) at both posts of assignment exceeds 190, the TP educator shall be paid at the daily rate for any days worked in excess of 190 days.

L. Substitutes. A substitute teacher shall receive the flat daily rate prescribed in the TP Salary Schedule A. The minimum increment earned and paid for substitute work is one-half day. The daily rate for a summer school substitute teacher is provided in the TP Salary Schedule for "Other Compensation," and is two-thirds of the regular substitute teacher rate established for the prior school year (this salary is not subject to retroactive adjustment). For example, the prior school-year rate for a 1993 summer school substitute teacher is published in the 1992-93 salary schedules. The minimum increment earned and paid is one-half day (one-third of the regular substitute teacher rate).

M. Leave

1. Accrual. Under 20 U.S.C. 904 (reference (ay)), a TP educator (other than an individual employed as a substitute) is entitled to cumulative leave with pay. This leave is identified as educator leave. When the educator's school year includes more than 8 months of work, the educator shall be entitled to earn 10 days of cumulative educator's leave with pay. For 8 months or less during the school year, educator's leave accrues at the rate of 1 day for each calendar month worked or part thereof. The full school year accumulation of educator's leave is credited to the educator's leave record when the school year begins (normally in August) or whenever the educator enters on duty (e.g., after the start of the school year). Should an educator be separated for any reason before the school year ends, any leave credited but not earned by the educator must be subtracted from the individual's leave balance or if already used, a debt must be established and appropriate collection action taken.

a. Part-Time Educators. A TP educator who is regularly employed on a part-time basis earns leave in an amount proportionate to the amount of time the part-time educator is regularly employed compared to full-time employment.

Example 1: A part-time TP educator was appointed to a part-time position for the full school year. The educator is scheduled to work one-half day on each duty day during the regular school year. The educator is entitled to accrue 10 half days (5 full days) of educator's leave.

Example 2: A part-time TP educator was appointed to a part-time position for the full school year. The educator is scheduled to work each Tuesday and Thursday during the regular school year. The educator is entitled to accrue two-fifths (4 days) of the 10 days of educator's leave that would be earned during full-time employment.

Example 3: A part-time TP educator was appointed to a part-time position for the last semester (one-half) of the school year. The educator is scheduled to work one-half day on each scheduled duty day during the semester. The educator is entitled to accrue one-fourth (2.5 days) of educator's leave.

b. Substitutes. Substitutes are employed in TP positions only on a temporary intermittent basis and are not entitled to earn leave.

c. Summer Recess Appointments. Leave is not earned during summer recess period appointments to TP positions, to include summer school educator positions and other temporary appointments.

2. Use

a. Minimum Charge. The minimum charge for educator's leave is one-half day, and additional charges are in multiples thereof. An occasional absence from duty of less than one-half day may be excused for adequate reasons without charge to educator's leave, at the discretion of administrative authority. Leave charges are reported to the civilian payroll office on the educator's time and attendance report.

b. Authorized Absences. A TP educator may use accrued educator's leave during the school year for:

- (1) Maternity purposes;
- (2) Illness of the educator;
- (3) Illness, contagious disease, or death in the immediate family of the educator that requires his or her absence;
- (4) Any personal emergency; and

(5) Any purpose. With the appropriate advance notice and prior approval of the supervisor, not to exceed 3 days of educator's leave, in a given school year, leave may be used for any purpose. Educator's leave used for any purpose may not normally be used during orientation week or the first or last week of the school year. An exception may be made when an educator has been accepted for an educational program and must report prior to the end of the school year.

c. Summer Recess. Accrued educator's leave may not be used during any summer recess educator appointment. An absence during a summer recess appointment is without pay.

d. Nonwork Days. Saturdays, Sundays, regularly scheduled holidays (including U.S. holidays and host-nation holidays) and other administratively authorized nonwork days are not days of leave. See 20 U.S.C. 904(b) (reference (ay)). Therefore, a TP educator who is in a nonpay status immediately preceding and following a scheduled holiday is not charged LWOP for the scheduled holiday.

3. Advance. Under unusual circumstances, 30 days of educator's leave (above the amount already credited for the current school year) may be advanced to an educator for use on any scheduled duty day within the school year. Such advance is subject to subsequent earning of educator leave, or repayment upon separation for leave advanced but not earned. The immediate supervisor may approve requests for up to 10 days of advance educator leave. Requests in excess of 10 days of advance educator leave must be submitted to the district superintendent or regional director, as appropriate. Approved requests are then submitted to the civilian payroll office by the approval official.

4. Leave Without Pay (LWOP). Up to 3 days of LWOP may be requested by a TP educator and approved by the immediate supervisor. The district superintendent or director may approve LWOP requests for TP educators in excess of 3 days but less than 30 days. The regional director may approve LWOP requests of 30 days or more.

5. Conversion

a. A TP educator is credited with sick leave to his or her credit immediately prior to the effective date of his or her conversion, transfer, promotion, or reappointment to a TP educator position. He or she must be an employee of the federal government or the District of Columbia, however, and be transferred without a break in service, from a position under a different leave system to a TP educator position. Sick leave so credited is included in the educator's balance of educator's leave.

b. Annual leave is not credited, except for educators who were initially converted from GS/GM positions to TP salary schedule K and L educator positions on October 11, 1987.

6. Transfer and Recredit

a. When a TP educator is separated from a DoDDS TP educator position and is reappointed in another DoDDS position with a break in service of no more than 3 school years, his or her educator's leave account is certified to the employing agency for credit as sick leave on the SF 1150.

b. When a TP educator is separated from an educator position and is reappointed to a position subject to another leave act without a break in service, his or her leave account is certified to the employing agency for credit in accordance with 5 C.F.R. 630.501 (reference (l)).

c. If a TP educator accepts temporary employment with the federal government in a non-TP educator position during a summer recess, the TP educator's leave account shall not be transferred to the leave account of the summer position. Any sick leave earned during the temporary summer employment shall be credited and any unused sick leave balance shall be transferred to the educator's leave account when the educator returns to duty in his or her regular TP educator position.

7. Liquidation Upon Separation

a. Any annual leave earned under a different leave system and remaining to the credit of a TP educator upon separation shall be liquidated by a lump-sum payment in accordance with 5 U.S.C. 5551 (reference (b)) and 20 U.S.C. 904(f) (reference (ay)).

b. Educator's leave earned by a TP educator or included in the educator's leave balance per subparagraph 070201.M.5.a., may not be liquidated upon separation through lump-sum payment.

8. Sabbatical Leave. Year-long education leave at half pay (sabbatical leave) may be authorized for a DoDDS educator appointed to a TP position for educational purposes, when the course of study is determined to be appropriate by the regional director. An SF 50 is not required. The approved request for training, however, should reflect that the educator will be in an LWOP status one-half of each day during the year-long period.

a. Benefits and Entitlements. Educators granted sabbatical leave at half pay shall continue to receive life insurance and health benefits coverage in the same manner as if they were in full pay status. Retirement contributions shall be deducted for only one-half year; however, the educator is entitled to a full year's credit for retirement. Educator leave is not earned, nor should it be deducted (i.e. used) from the educator's leave account during the training period. Any pay step increase that would have been authorized should be granted as if the educator had worked a full school year.

b. Pay-status Reporting. The educator's work schedule should not change. Therefore, the time and attendance report for each pay period should reflect that the educator is in a LWOP status one-half of each day.

N. Allowances and Differentials. Entitlement of a TP educator to government quarters, cost-of-living allowance, and post differential is determined in accordance with the DSSR (reference (t)), and DoD 1400.25-M, subchapter 1250 (reference (u)). A TP educator employed as a substitute is not entitled to government quarters, quarters allowance, cost-of-living allowance, post differential, or storage of household goods.

070202. Pay Status During School Year and Summer Recess

A. School Year. A TP educator's school year consists of 190 duty days. In most overseas locations, these duty days fall on days during the normal workweek (i.e., Monday through Friday). However, a TP educator does not work every Monday through Friday during the school year because of nonduty days during recess periods (i.e., Thanksgiving, winter and spring recess; federal holidays; and certain host-nation holidays). As a result, the school year (i.e., from the educator's first through last duty day) may span to 22 pay periods, with approximately 213 days, Monday through Friday, between the educator's first and last duty day of the school year. Thus, there are typically 21 full pay periods, plus 3 additional days in the 22nd pay period in a given school year.

B. Summer Recess. During the summer recess period, while school is not in session, nonadministrative TP educators ordinarily are in a nonpay status. No SF 50 is required to place educators in a nonpay status or to return them to duty status at the beginning of the following school year. Educators who are returning to duty for the following full school year are entitled to have living quarters allowance payments continued during the summer recess period, in accordance with the DSSR, chapter 100 (reference (t)), although in a nonpay status. Civilian payroll offices, however, retain such educators in a pay status during the summer recess solely to facilitate payment of living quarters allowance. The DoDDS Personnel Center will notify the servicing civilian payroll office of any change (e.g., transfer, resignation, retirement, etc.) in the status of DoDDS educators.

070203. Compensation

A. The 190-Day School Year Educators

1. Daily/Biweekly Rate. A payment method that provides for a uniform biweekly payment during the school year has been adopted for TP educators assigned to a 190-duty day schedule. This method provides for consistent biweekly pay amounts throughout the year. Otherwise, the seasonal work schedule of a TP educator, in conjunction with the recess periods, would cause varying amounts of pay to be received during each pay period of the school year. It must be recognized that a TP educator earns pay at a rate that differs from the rate used to pay out the salary. The following must be understood to compute a TP educator's pay:

a. Duty Days = 190. This is the actual number of duty days and is the standard divisor used to determine a TP educator's daily salary rate, or "190-Rate."

b. School-Year Days = Duty Days plus Monday through Friday recess days. This is the total number of days (Monday through Friday) falling within an educator's first to last duty day during the regular school year. Thus, in addition to the 190 actual duty days, the school-year days also include all nonwork recess days (Monday through Friday) during the regular school year. Recess days are those days such as federal holidays (e.g., Labor Day) and school recess days (e.g., spring recess) when educators are not scheduled to work. For most school years, the school-year days will equal 213. The school-year days is used to determine an educator's school-year rate, or "213-Rate." The school-year rate is obtained simply by dividing the school-year salary by the number of school-year days published on the regional school-year calendar for the school to which the educator is assigned. The school-year rate is the daily rate used to provide a uniform payment for each biweekly pay period. This rate is multiplied by 10 days to arrive at an educator's biweekly base pay amount.

c. Foreign Post Allowance/COLA Days = School-Year Days plus weekend days. This is the total number of calendar days elapsed during the school-year calendar period. The number of foreign post allowance/COLA days is used to determine the "COLA daily rate" used to compute the biweekly amount paid for COLA in those areas where applicable.

2. Reducing Pay for Absences Without Pay. Computing a TP educator's pay using the school-year rate (see subparagraph 070203.A.1.) provides for uniform pay amounts each pay period but is not truly accurate when periods of non-paid absence are involved. For periods of non-paid absence such as LWOP or AWOL, an educator's biweekly pay must be reduced by 1/190th of the annual salary for each scheduled duty day that the educator is in a nonduty/nonpay status (i.e., for each scheduled duty day not worked and not in a paid leave status). Because an educator typically does not work on federal holidays or recess periods (e.g., spring break), the educator's pay is not reduced when he or she is in a nonpay status before or after a federal holiday or recess day.

3. TP Educators Beginning Work After Start of School Year. When a TP educator is appointed after the school year has begun, the educator's school year salary must be adjusted based upon the number of actual duty days remaining in the school year that the educator is scheduled to work. This means that the number of remaining actual duty days must be counted. The educator's daily salary rate (190-Rate) then is multiplied by the number of scheduled duty days remaining in the school year to obtain the educator's adjusted school-year salary entitlement. To determine how the adjusted school-year salary shall be paid out in uniform installments during the remaining pay periods, the adjusted school-year salary is then divided by the number of school-year days remaining in the school year to arrive at the adjusted daily school-year rate. Use the following formula:

a. $190\text{-Rate} \times \text{duty days} = \text{adjusted school-year salary}$

b. Adjusted school-year salary / school-year days equals adjusted school-year rate

c. Biweekly base pay equals adjusted school-year rate x 10 days

Example of an educator who reports for work after the beginning of the school year: An educator would receive a salary of \$38,000 for working a full school year (i.e., 190 duty days). The educator would have a 190-Rate (daily salary rate) of \$200.00 (\$38,000/190). This salary normally would be paid out over 213 school-year days. The educator in this example begins work on October 1. Because of the educator's late start, 23 actual duty days (August through September) will not be worked. The school-year calendar indicates that 167 actual duty days remain to be worked during the school year. Thus, the adjusted salary entitlement would be \$33,400 (\$200.00 x 167). To determine how the adjusted \$33,400 school-year salary will be paid out, the remaining school year is identified. In this example, 188 school-year days remain. The adjusted school-year salary / school-year days provide: \$33,400 / 188 equals \$177.66. The biweekly base pay equals the adjusted school year rate multiplied by 10: \$177.66 x 10 equals \$1,776.60.

4. TP Educators Separating Before the End of the School Year. When a TP educator separates (i.e., resigns, retires, or dies) before the school year ends, the educator's school year salary must be adjusted based upon the number of actual duty days that the educator worked. This means that the number of actual duty days worked must be counted. The daily salary rate (190-Rate) is then multiplied by the number of actual duty days (including any days in a paid leave status) to obtain the educator's adjusted salary entitlement. Use the following formula:

$$190\text{-Rate} \times \text{duty days} = \text{adjusted school-year salary}$$

Example of an educator who separates before the end of the school year: An educator receiving a school-year salary of \$38,000 would have a 190-Rate (daily salary rate) of \$200.00 (\$38,000/190). This salary normally would be paid out over 21 full and 1 partial pay periods. Should the educator resign after working only 120 of the scheduled 190 duty days in the school year, the adjusted salary entitlement would be \$24,000 (\$200.00 x 120). Any difference between the adjusted salary entitlement and the salary actually received to date must be reconciled.

B. 222-Day School Year Administrators

1. Daily/Biweekly Rate. Because of the longer 222 duty-day work year for TP educators in principal and assistant principal positions, the method used for payment is different from that used for other TP educators. Simply stated, the school-year salary is paid over 26 pay periods. This, in turn, provides for uniform biweekly payments throughout the year. Otherwise, the seasonal work schedule of a principal and assistant principal, in conjunction with the recess periods, would cause varying amounts of pay to be received during each pay period over the 222 duty day period. As TP educators, principals and assistant principals earn pay at a rate that differs from the rate used to pay out the salary. The following must be understood to compute a principal's and assistant principal's pay:

a. Duty Days equal 222. This is the actual number of duty days and is the standard divisor used to determine a TP educator's daily salary rate, or "222-Rate."

b. School-Year Days. This is 260 days per year and is the total number of days (Monday through Friday) in a calendar year, inclusive of the 222-duty days. Thus, the school-year day's figure includes days that fall within, as well as outside of the school year. The school-year days also includes all nonwork recess days (Monday through Friday) during the regular school year. Recess days are those days such as federal holidays (e.g., Labor Day) and school recess days (e.g., spring recess) when principals and assistant principals are not normally scheduled to work. The school-year days are used to determine a principal's and assistant principal's school-year rate. The school-year rate is obtained simply by dividing the school-year salary by 260. The school-year rate is the daily rate used to provide a uniform payment for each biweekly pay period. This rate is multiplied by 10 days to arrive at a principal's or assistant principal's biweekly base pay amount.

c. Foreign Post Allowance/COLA Days = 365 (366 during leap year).

2. Reducing Pay for Absences Without Pay. Computing pay for a principal or assistant principal using the school-year rate provides for uniform pay amounts each pay period but is not truly accurate when periods of nonpaid absence are involved. For periods of nonpaid absence such as LWOP or AWOL, a principal's or assistant principal's biweekly pay must be reduced by 1/222nd of the annual salary for each scheduled duty day that the principal or assistant principal is in a nonduty/nonpay status (i.e., for each scheduled duty day not worked and not in a paid leave status). It must be noted, however, that as long as 222 full duty days are worked (to include days in a paid leave status) during the August 1 through July 31 period, including not less than 175 days during which classroom instruction is in session, a principal's and assistant principal's work schedule may be adjusted after the school year begins with no resultant change in salary. Because a principal or assistant principal typically does not work on federal holidays or recess periods (e.g., spring break), the pay of a principal and assistant principal is not reduced when he or she is in a nonpay status before or after a federal holiday or recess day.

3. School Principals or Assistant Principals Beginning Work After Start of the School Year. When a principal or assistant principal is appointed after the work year has commenced, and the principal or assistant principal will not work 222 full duty days before July 31, the principal's or assistant principal's salary must be adjusted based upon the number of actual duty days scheduled for the year ending on July 31. This means that the number of remaining actual duty days must be counted. The daily salary rate for a principal or assistant principal (222-Rate) is multiplied by the number of actual duty days remaining in the year ending July 31 to obtain the adjusted school-year salary entitlement. To determine how the adjusted school-year salary shall be paid out in uniform installments, the adjusted school-year salary is then divided by the number of calendar year days, Monday through Friday, remaining in the year ending July 31 to arrive at the adjusted daily calendar-year salary rate. Use the following formula:

a. $222\text{-Rate} \times \text{duty days} = \text{adjusted school-year salary}$

b. Adjusted school-year salary / school-year days = adjusted school-year rate

c. Biweekly base pay = adjusted school-year rate x 10

Example for a school principal who reports for work after the beginning of the school year: A principal would receive a salary of \$55,500 for working a full school year (i.e., 222 duty days). The principal has a 222-Rate (daily salary rate) of \$250.00 (\$55,500/222). This salary normally would be paid out in even payments over 26 pay periods. The principal in this example begins work on September 15. Because of the principal's late start, it will be possible to work only 189 actual duty days by July 31. Thus, the adjusted salary entitlement would be \$47,250 (\$250.00 x 189). To determine how the adjusted \$47,250 school-year salary shall be paid out, the remaining calendar year days, Monday through Friday, are identified. In this example, 228 school-year days remain. The adjustment is: $\$47,250 / 228 = \207.24 . The biweekly base pay equals the adjusted school-year rate multiplied by 10 ($\$207.24 \times 10 = \$2,072.40$).

4. School Principals or Assistant Principals Separating Before End of School Year. When a principal or assistant principal separates (i.e., resigns, retires, or dies) before the year ends, the school-year salary must be adjusted based upon the number of actual duty days that the principal or assistant principal worked. This means that the number of actual duty days worked must be counted. The daily salary rate (222-Rate) is then multiplied by the number of actual duty days (including any days in a paid leave status) to obtain the principal's or assistant principal's adjusted salary entitlement. Use the following formula:

$$222\text{-Rate} \times \text{duty days} = \text{adjusted school-year salary}$$

Example of a principal or assistant principal who separates before the end of the school year: A principal receiving a school-year salary of \$55,500 has a 222-Rate (daily salary rate) of \$250.00 (\$55,500 / 222). This salary normally would be paid out over 26 pay periods. Should the educator resign after working only 120 of the scheduled 222 duty days in the school year, the adjusted salary entitlement would be \$30,000 (\$250.00 x 120). Any difference between the adjusted salary entitlement and the salary actually received to date must be reconciled.

C. Premium Pay, Sunday Work and Holiday Work

1. A TP educator is ineligible for overtime pay or compensatory time off.
2. A TP educator appointed to a 190-day school-year position whose regular work schedule requires work on a Sunday is entitled to basic pay, plus a premium of 25 percent of the 190-Rate (daily rate). Premium pay is not authorized for TP educators appointed to principal and assistant principal positions.
3. A TP educator whose regular work schedule requires work on any of the following holidays is entitled to basic pay, plus premium pay at a rate equal to the 190-Rate (daily rate):

- a. New Year' Day, January 1 or observed day
- b. Dr. Martin Luther King's Day, third Monday in January
- c. Washington's Birthday, third Monday in February
- d. Memorial Day, last Monday in May
- e. Independence Day, July 4 or observed day
- f. Labor Day, first Monday in September
- g. Columbus Day, second Monday in October
- h. Veteran's Day, November 11, or observed day
- i. Thanksgiving Day, fourth Thursday in November
- j. Christmas Day, December 25, or observed day.

D. Appointments Between School Years. A TP educator employed between school years shall be given a temporary limited appointment for the period of actual need, not to exceed the beginning of the school year. A TP educator given a temporary limited appointment is compensated at a daily rate of 1/190th (or, if a school principal or assistant principal, at 1/222nd) of the school-year salary. When an educator has served on a nontemporary appointment during the preceding school year and is expected to continue during the following school year, a temporary appointment between the 2 school years is similar to a return to duty and the appointment is exempt from the dual pay provisions of 5 U.S.C. 5533(d)(7)(b) (reference (b)). The appointment is not subject to CSRS, FERS, or FEGLI.

E. Foreign Post Allowance

1. Daily Rate. The amount of the foreign post allowance due an eligible TP educator is based upon his or her school-year salary. The full annual amount is payable over the period of the school year. The TP educator employed on a 222-duty day work schedule (i.e., school principals and assistant principals) receives a foreign post allowance on the same basis as GS employees (i.e., on a calendar-year basis). To pay foreign post allowance to a TP educator on a 190-day work schedule, however, a different daily rate is used because of the shorter school year. To determine the foreign post allowance daily rate for TP educators assigned to 190-duty day work schedule, divide the annual foreign post allowance amount shown on the SF 1190 by the total number of foreign post allowance days occurring between the educator's first and last duty day during the school year. The foreign post allowance daily rate is multiplied by 14 to compute the biweekly amount paid each full pay period of the school year.

2. Adjustment of a Foreign Post Allowance. Any adjustment in an educator's annual salary shall cause the authorized foreign post allowance to be adjusted correspondingly. For example, the current post differential authorized an educator in Okinawa is 10 percent of the educator's basic compensation. If the educator's basic compensation during the current school year is \$45,000, but for reason is adjusted downward to \$37,000, the adjusted post differential amount authorized for payment to the educator would be \$3,700. The authorized foreign post allowance percentage would not change. It would remain consistent with the dollar amount paid the educator during that school year.

F. Extra-Duty Program. This program applies to certain personnel employed by DoDDS who are assigned extra-duty assignments. Extra-duty compensation is provided when particular extra-duty assignments are completed that are in addition to regular school duties. Such extra-duty assignments as coaching and activity sponsorship, as well as dormitory work, are included in this program.

1. Compensation for Extra-Duty Assignments

★ a. When a TP educator is selected to perform an extra-duty assignment, the he or she and the school principal sign a memorandum of understanding. The memorandum indicates the activity to be performed, the estimated number of hours to complete the activity, the hourly range the duty is to be performed within, and the amount of compensation established for that range, according to the "Other Compensation" salary schedule rates established annually by the CPMS Wage and Salary Division. The authorized hourly ranges for extra-duty activities are:

- (1) 1 - 19 Hours
- (2) 20 - 39 Hours
- (3) 40 - 79 Hours
- (4) 80 - 119 Hours
- (5) 120 - 159 Hours
- (6) 160 - 199 Hours
- (7) 200 Hours and Over

b. When an extra-duty assignment is completed satisfactorily in fewer hours than the hourly range established, the compensation must be reduced. If the school principal determines the extra-duty assignment has been completed satisfactorily in less time than identified in the approved memorandum of understanding, the educator shall be compensated at the rate established for the appropriate lower hourly range. Should the hours worked fall short of the original range, or an educator is unable to complete the extra-duty assignment for a reason

acceptable to management, a lesser payment than the amount indicated in the approved memorandum of understanding may be paid on a pro rata basis. The formula for computing a lesser payment is the mid-point hour of the appropriate hourly range divided into the hours actually worked. The resulting quotient is then multiplied by the dollar value assigned to the regular hourly category. For the 200 and over range, the mid-point = 220.

c. Upon completion of the extra-duty assignment, the school principal shall certify that the assignment has been completed satisfactorily and that compensation is authorized. This certification must be submitted to the civilian payroll office as soon as possible, but not later than May 31, to facilitate payment by the end of the school year.

★ d. Substitute teachers who substitute as dormitory counselors shall be compensated in accordance with Schedule A rates published by the CPMS Wage and Salary Division.

e. School principals and assistant principals are eligible to receive extra-duty compensation only for additional work performed while on temporary assignment (detail) as a staff development specialist.

2. Additional Compensation for Dormitory Counselors. A TP educator assigned to a dormitory counselor or supervisory dormitory counselor position and who is assigned an irregular tour of duty (which includes work on all nights, Sundays, and holidays, as well as sleep-in time), may receive additional compensation identified as "Condition of Employment Compensation." Such an educator also may be eligible to receive "Additional Hours Compensation," for hours worked beyond the scheduled hours of work. A dormitory counselor and a supervisory dormitory counselor is scheduled to work 80 hours per pay period during the school year and is additionally required to sleep-in according to an established work schedule.

a. The Remarks section of the counselor's SF 50 shall indicate any eligibility to receive condition of employment compensation. Eligibility for condition of employment compensation also established eligibility to receive additional hours compensation.

★ b. Condition of employment compensation is established as an annual rate by the CPMS Wage and Salary Division. The rate to be used depends upon the type of work schedule established for dormitory operations and whether the individual dormitory counselor or supervisory dormitory counselor is required to work on a 5-day dormitory operations schedule or a 7-day schedule. The CPMS Wage Setting Division establishes the annual compensation payable in the "Other Compensation" salary schedule. The payable rate of additional compensation per school year is identified as either the 5-day, 40-hour rate or the 7-day 40-hour rate.

c. Additional hours compensation is paid on an "as worked" basis and is for work performed by a dormitory counselor or a supervisory dormitory counselor who is required to work in excess of 80 hours per pay period. Additional hours compensation may be paid for each full hour worked (scheduled or unscheduled) in the performance of his or her professional duties, not to exceed the annual maximum value established for a particular school year.

Additional hours compensation is paid biweekly upon completion and certification of any full hours worked. The hourly rate is computed by dividing the annual maximum amount of additional hours compensation by 190. The annual maximum amount in a 5-day dormitory schedule is determined by subtracting the 5-day, 40-hour amount of additional compensation per school year, from the 5-day, 45-hour amount of additional compensation per school year, as identified on the "Other Compensation" salary schedule. The annual maximum amount payable in a 7-day dormitory schedule is determined by subtracting the 7-day, 40-hour amount of additional compensation per school year, from the 7-day, 45-hour amount of additional compensation per school year, as identified on the "Other Compensation" salary schedule. Regardless of the number of hours required to be worked, the maximum amount of additional hours compensation paid during a given school year may not exceed the annual rate established for additional hours compensation.

G. Acceleration of FEGLI and FEHB Deductions for an Educator Assigned to a 190-Day Position. A TP educator assigned to a position with a 190-duty day work schedule, who has elected coverage under FEGLI and/or FEHB, must pay the total annual premium amount that is applicable to the school year salary that he or she is eligible to receive. This is to provide coverage during the summer recess, during which time a 190-day educator neither earns nor receives pay. The normal period of extended coverage is from the first duty day of a school year until the day prior to the first duty day of the next school year. Therefore, deductions must be accelerated to withhold more than the normal biweekly amounts paid by other federal employees. Accelerated deductions are not required for an educator assigned to a 222-duty day work schedule.

1. Calculation of Accelerated Deductions. To determine the biweekly amount to be deducted from a 190-day educator's pay for FEGLI, first find the normal (i.e., 26 pay period) biweekly amount deducted for other federal employees in the same salary bracket. For FEHB, find the biweekly withholding amount for the plan in which the employee is enrolled. After finding the normal biweekly withholding amount, multiply by 26 (to arrive at the amount to be paid for an entire calendar year) then divide by 22 (the number of full pay periods over which 190-day educators normally are paid their school year salary) to determine the amount to be deducted each pay period for an educator.

2. Coverage Upon Separation or Movement. For a 190-day educator who resigns at the close of the school year and who has elected coverage under FEGLI and/or FEHB, the actual date of separation shall be delayed sufficiently to ensure extended coverage for the period of time for which the educator has paid through the accelerated withholdings. The period of extended coverage for an educator employed for a full school year shall be through the day prior to the first scheduled duty day of the following school year. When an educator desires earlier separation, the educator's resignation must specify the earlier date for termination of coverage and acknowledge that health benefits and life insurance coverage shall continue only 31 days after the date of separation. When an educator assigned to a position with a 190-duty day work schedule is converted or appointed to a 222 or calendar year work schedule, all or an appropriate portion of any accelerated payments must be refunded should the effective date of such conversion or appointment occur during the prepayment period and withholdings relative to the new position begin. When an educator is separated before the end of the school year, the educator will be reimbursed

proportionately if the separation date is earlier than the end of the extended period of prepaid FEHB coverage.

3. Calculation of Coverage After the Beginning of the School Year.

Should a 190-day educator begin work after the first scheduled duty day of the school year, reduce the total annual premium amount for FEGLI and FEHB by the proportionate amount for the coverage period remaining through the day prior to the first scheduled duty day of the next school year. Then proceed to calculate the biweekly amount using an appropriate reduction in the number of pay periods remaining.

H. Other Deductions

1. Allotments

a. Organization Dues

(1) Allotments for employee organization dues shall be effective on the second pay period in October of each school year for a 190-day TP educator. The amount of these allotments shall be the designated dues identified on each SF 1187 initiated by a unit employee or on a list provided by each local or regional unit divided by 12 full pay periods unless mutually agreed otherwise between the parties.

(2) Unit members who enter the dues-withholding agreement at a time when less than 12 full pay periods remain in the school year shall have their dues prorated over the remaining full pay periods within the dues-withholding period.

(3) Authorization using an SF 1187 for dues withholding shall continue in full force and effect if a "not-to-exceed" employee is given another excepted appointment in the bargaining unit prior to the expiration of the not-to-exceed appointment.

(4) The civilian payroll office shall prepare the remittance at the close of each pay period for which deductions are made. Remittances shall be prepared and forwarded on the same pay schedule as for unit employees after the close of each pay period. Remittance shall be sent to the appropriate address in each region. Each remittance shall be accompanied by a listing of names and amounts withheld. See subparagraph 090203.H. for guidance on preparing this report.

(5) Dues withholding authority is carried forward automatically to the next school year unless notification to stop the deduction is requested. Educators can request that deductions for organization dues be stopped only once a year either on September 1 or the anniversary date on which the employee initially authorized dues withholding, whichever is later. A revocation must be received in the civilian payroll office prior to the appropriate date as indicated above.

(6) Local or regional units must provide a list of employees who are to have dues withheld no later than 2 weeks prior to the beginning date of the pay period in which withholding is to begin for that unit. The listing must identify the bargaining unit name or number, location, address, point(s) of contact and phone number(s). Employee information required includes employee name, SSN, location assigned and amount of dues to be withheld for that school year.

b. Savings Allotments and Allotment Allowed for 190-Day TP Educators Assigned in Overseas Areas. Savings and other allotments, as authorized in chapter 4, may be deducted over the number of full pay periods in the school year.

c. Savings Bonds. Savings bonds are authorized separately without regard to the number of savings allotments. Savings bonds are continued automatically into the next school year unless canceled by the employee.

2. TSP. A TP educator may elect to have either a percentage or dollar deduction for TSP in accordance with guidelines set forth in section 0415. TSP deductions shall be taken from the annual retroactive salary adjustment given to educators each year only if the educator has specified that a percentage be withheld.

I. Compensation of TP Educators Appointed as Junior Reserve Officer Training Corps (JROTC) Instructors

1. The DoDDS employs retired military officers and non-commissioned officers as TP educators in its JROTC overseas program. The school-year salary of JROTC instructors is an amount equivalent to the active duty pay and allowances that the instructor would receive if ordered to active duty at the location of the DoDDS school to which assigned. This salary is reduced by the amount received as retired pay.

★ 2. The CPMS Wage Setting Division establishes an additional annual amount of supplemental pay. The supplemental amount is not part of a JROTC instructor's basic compensation.

3. A JROTC instructor's salary is paid on the same basis as other 190-day TP educator's pay during the school year. The additional annual amount of supplemental pay authorized is prorated over the normal 22 pay periods.

4. Because the base salary of a JROTC instructor employed by DoDDS includes an amount equivalent to basic allowance for housing for his or her military grade (including a variable housing allowance), an instructor's pay must be reduced in an equivalent amount should the instructor reside in rent-free government quarters.

J. Waiver of Erroneous Payments of Pay and Allowances. The procedures outlined in paragraph 080306 generally will be followed when processing applications for waiver of erroneous payments of pay and allowances submitted by DoDDS employees. Applications of

DoDDS employees received by the civilian payroll office shall be forwarded to the DoDEA Personnel Center for adjudication rather than the Defense Debt and Claims Management Office of the appropriate DFAS Center.

★ 070204. DoD Domestic Dependent Elementary and Secondary Schools (DDESS). Title 10 United States Code, section 2164 (reference (ar)) authorizes the Secretary of Defense to provide for the elementary or secondary education of the dependents of members of the Armed Forces and, under certain conditions, for dependents of civilian employees residing on a military installation in the United States, if a determination is made that appropriate educational programs are not available.

0703 OTHER THAN FULL-TIME CAREER EMPLOYEES

070301. Part-Time Employment. Part-time employment generally is no less than 16 and no more than 32 hours a week under a schedule consisting of an equal or varied numbers of hours per day. Employment may be between 32 and 64 hours in a biweekly pay period in the case of a flexible or compressed work schedule (5 U.S.C. 3401 (2)) (reference (b)). It does not include employment on a temporary or intermittent basis. To be considered part-time, an employee must have a regular schedule, set in advance, of at least one hour in each administrative workweek in each biweekly pay period. See P.L. 95-437 (reference (e)), 5 U.S.C. 3401-3408 (reference (b)), and 5 C.F.R. Part 340 (reference (l)).

A. Pay. Gross basic pay is computed by multiplying the employee's hourly rate of pay by the total of the hours worked and the hours of paid leave during the pay period.

1. Overtime Pay. Under 5 U.S.C. 5542 (reference (b)), overtime pay for eligible part-time employees is provided only for work over 8 hours a day or 40 hours in a week.

2. Compensatory Time Off. Under 5 U.S.C. 5542 (reference (b)), part-time employees may elect to take compensatory time off in lieu of overtime pay to which entitled. Part-time employees may elect to perform compensatory overtime work to replace time taken off for religious observances.

3. Sunday Pay. Part-time employees are not entitled to Sunday premium pay for working on Sundays.

4. Night Differential Pay. Part-time employees are entitled to night pay for work performed between 6:00 p.m. and 6:00 a.m. as part of their regularly scheduled administrative workweek.

5. Shift Differential Pay. Federal Wage System part-time employees who work a regular scheduled shift of 8 hours or less are entitled to night shift differential. However, more than half of the hours they work must be on the second or third shift. The hours for the second and third shifts are outlined in subparagraph 030303.B.

B. Leave

1. Annual Leave. To earn annual leave, part-time employees must have a regularly assigned tour of duty on at least one day of each week in the biweekly pay period. Maximum carryover at the end of the leave year is the same as for a full-time employee. Hours in a pay status include straight time and overtime hours up to a total of the basic working hours in a pay period (normally 80 hours). Leave is charged for absence during the hours the employees are scheduled to work.

a. Part-time employees with less than 3 years of service earn 1 hour of annual leave for each 20 hours in a pay status.

b. Part-time employees with at least 3 years but less than 15 years of service earn 1 hour of annual leave for each 13 hours in a pay status.

c. Part-time employees with 15 or more years of service earn 1 hour of annual leave for each 10 hours in a pay status.

2. Sick Leave. Part-time employees, for whom a regularly scheduled tour of duty has been established, earn and shall be credited with 1 hour for each 20 hours in a pay status.

3. Other Leave. Part-time employees are eligible for other leave categories, e.g., AWOL, LWOP, court leave, funeral leave, or excused absences on the same basis as full-time employees.

4. Military Leave. Each Member of a Reserve Component who is an officer or employee of the United States, (i.e., permanent, temporary indefinite, or part-time), is entitled to leave of absence from his or her duties without loss of pay, time, or efficiency rating for each day, but no more than 15 days in any fiscal year in which he or she is on active duty or training. Eligible part-time employees accrue military leave prorated on the basis of the tour of duty (5 U.S.C. 6323(a)(2)) (reference (b)). See section 0514 for guidance on recording and charging military leave.

5. Holidays. Part-time employees are not entitled to a holiday that falls outside the tour of duty. If a holiday falls on a day that a part-time employee is scheduled to work and the employee does not work, he or she is paid for the number of hours scheduled for that day. If a part-time employee works during his or her scheduled hours on a holiday, the employee is entitled to holiday premium pay only for those hours scheduled. When an installation is closed for an “in lieu of” holiday that falls on a regularly scheduled workday and the employees are prevented from working on that day, the installation may excuse part-time employees from duty by administrative order or grant annual leave or LWOP for the hours scheduled to be worked on that day. An in-lieu-of holiday is granted to replace the day designated as a holiday by federal statute or executive order when the holiday falls on a full-time employee’s nonworkday. A part-time employee who

works on an “in lieu of” holiday shall be paid straight time for hours worked. A part-time employee is not otherwise entitled to an “in lieu of” holiday.

C. Deductions

1. Retirement. Part-time employees are subject to deductions on the same basis as full-time employees.

2. Health Insurance. Part-time employees are eligible to participate in the FEHB program. The cost to the employee is the total cost of health benefits (both the employee's and the employer's share) less the government's prorated share. See subparagraph 040802.D. for more information on FEHB for part-time employees.

a. Payroll deductions and employer's contributions shall be based on the particular plan for which employees enroll and the employee's established pay periods. A career part-time employee who pays a prorated government's share of health benefits is responsible for payment of premiums for periods of nonpay status at the same rate that would be withheld if he or she was in a pay status. Enrollment may continue during nonpay status for up to 365 days.

b. When a part-time employee becomes a full-time employee in the middle of a pay period, the amount to be withheld is prorated based on part-time rules.

3. Life Insurance

a. Part-time Eligibility. A part-time employee is eligible for the FEGLI program. The actual amount of insurance (which cannot be less than \$10,000) for which the employee is eligible is based on the annual salary derived from his or her scheduled hours. If the employee is in a nonpay status for an entire pay period, no withholding to cover that pay period shall be made from future pay nor shall the employees deposit the amount which would have been withheld if he or she had been in a pay status during that period. There is no government contribution for that pay period. When a part-time employee becomes a full-time employee in the middle of a pay period, the Federal Employees Group Life Insurance Handbook for Personnel and Payroll Offices (reference (z)) requires the amount to be withheld for basic life insurance to be based on the amount of insurance last in force for the employee during the pay period (that is, the full-time rate).

b. Part-time Rates. For life insurance purposes, the annual pay for a part-time employee is the basic pay applicable to his or her tour of duty in a 52-week work year. For example, an employee whose pay is \$22,692 per annum, but is employed half-time, would have an annual pay for insurance purposes of \$11,346. If an individual is employed on a part-time basis in more than one federal agency and is eligible for FEGLI coverage in one of the positions under the Federal Employees Group Life Insurance Handbook for Personnel and Payroll Offices, subchapter S3 (reference (z)), the agency that pays the higher of the salaries must contact the other employing office, confirm the salaries paid, and assume responsibility for withholding all of the required premiums from the salary which it pays. The agency that pays the higher salary to the

individual also must provide the government contribution for basic insurance based on the aggregate amount of basic coverage the employee has from all covered positions. This will eliminate the need for the other employing office to make partial withholdings and government contributions.

★ 070302. Intermittent Employment. This is nonfull-time employment in which employees serve under an excepted or competitive service appointment without a regularly scheduled tour of duty (See 5 C.F.R. Part 340 (reference (I))). An intermittent work schedule is appropriate for a position in which the nature of work is sporadic and unpredictable so that a tour of duty cannot be regularly scheduled in advance. Intermittent employees are paid only for hours worked. Intermittent employees are entitled to overtime.

A. Pay. Gross basic pay is computed by multiplying the employee's hourly rate of pay by the total of the hours worked during the pay period. Intermittent employees are not eligible for holiday pay. Wage board intermittent employees are eligible for night shift differential; however, General Schedule intermittent employees are not eligible for night differential unless temporarily assigned to a regular tour of duty with night work.

B. Leave. Intermittent employees do not accrue annual or sick leave. When part-time or full-time employees are changed to intermittent, unused sick leave is held in abeyance until employees return to a scheduled tour or separate and forfeit the leave after a 3-year break in service. Any unused annual leave is paid as a lump sum, except in a situation involving a continuing program under which employees are required to return to full-time or part-time employment after a period of intermittent employment (e.g., student trainee).

C. Deductions

1. Retirement. Intermittent employees are not eligible for retirement coverage except when the intermittent employment follows employment in a covered position and there has not been a break in service of more than 3 days. Intermittent employees are subject to Social Security and Medicare deductions.

2. Health Insurance. Intermittent employees are not eligible for health insurance coverage except when the intermittent employment follows employment in a covered position and there has not been a break in service of more than 3 days.

3. Life Insurance. Intermittent employees are not eligible for life insurance coverage except when the intermittent employment follows employment in a covered position and there has not been a break in service of more than 3 days and the employee is expected to return to a covered position. The annual pay for intermittent employees is the annual rate that they were receiving at the end of the pay period or in the event of death or dismemberment, the annual rate they were receiving at the time of death or accident. For example, if an intermittent employee is paid \$7.65 per hour, the employee's annual rate of pay fixed by law is \$15,966 ($7.65 \times 2,087 = \$15,966$). If such an employee works only 2 days or 16 hours during a particular pay period, the annual rate of pay for insurance purposes is based on actual time worked during that pay

period. In this example, \$3,193 is the annual rate of pay for insurance purposes (.20 x \$15,966 = \$3,193/yr). However, insured employees whose annual pay is \$8,000 or less are covered for the minimum \$10,000 of basic insurance.

★ 070303. Seasonal Employment. Seasonal employment is defined as recurring periods of work lasting less than 12 months each year (see 5 C.F.R. Part 340 (reference (l))). Seasonal employees are placed in nonduty/nonpay status and recalled to duty in accordance with preestablished conditions of employment.

A. Pay. Gross basic pay is computed by multiplying the employee's hourly rate of pay by the total of the hours worked and the hours of paid leave during the pay period.

B. Leave. Seasonal employees earn leave during the time in pay status and during the first 80 hours in nonpay status each year.

C. Deductions. Regularly scheduled seasonal employees under career or career-conditional appointments, who are expected to work at least 6 months per year, are subject while in a pay status to deductions (e.g., retirement, health insurance and life insurance) on the same basis as full-time employees.

★ 070304. On-Call Employment. On-call employment is work on an as-needed basis during periods of heavy workload, with an expected cumulative service period of at least 6 months in pay status each year. See 5 C.F.R., part 340 (reference (l))). On-call employees work on regularly scheduled tours of duty while in a pay status, and subject to workload, are placed in a nonpay status, and are recalled to duty in accordance with preestablished conditions of employment.

A. Pay. Gross basic pay is computed by multiplying the employee's hourly rate of pay by the total of the hours worked and the hours of paid leave during the pay period.

B. Leave. On-call employees earn leave during the time in a pay status and during the first 80 hours in nonpay status each year.

C. Deductions. On-call employees under career or career-conditional appointments are subject to deductions (such as retirement, health insurance, and life insurance) on the same basis as full-time employees.

★ 070305. Piecework Employees. General authority for scheduling work and excusing absences of piecework employees is granted under 56 Comp. Gen. 393 (1977) (reference (p)) and 5 U.S.C. 6101 and 6104 (reference (b))). Piecework employees excluded from health insurance coverage are employees paid on a piecework basis except those whose work schedule provides for regular or full-time service or for part-time service with a regular tour of duty. Refer to the OPM Operating Manual, Federal Wage System (reference (q)) for information on piece rate schedules. For life insurance purposes, the annual pay for a pieceworker is the total basic earnings exclusive of premium earnings for overtime or holidays, for the previous calendar (52-week) year. Whenever the piecework rate changes, annual pay is adjusted by applying the percentage increase or decrease

in rate. If the pieceworkers had LWOP during the year, the year's earnings or adjusted earnings are divided by the number of days for which they were paid (work and leave with pay) and the average daily rate so obtained multiplied by 260 to determine annual pay. For new employees, use the first year's annual pay during the previous calendar year for pieceworkers doing similar work in their group, subject to any further adjustment of the average during the first year. Unless covered by an exception, employees paid on a piecework basis, except those whose work schedule provides for regular or full-time service, are excluded from retirement coverage by the OPM regulation. See the CSRS and FERS Handbook for Personnel and Payroll Offices (reference (i)) and 5 C.F.R. 831.201(a) (reference (l)).

0704 REEMPLOYED ANNUITANTS

070401. General

A. Employees Retired from Competitive Service

1. Regulations Governing Reemployment. Instructions governing the reemployment of employees retired from the regular competitive service under CSRS and FERS are contained in the CSRS and FERS Handbook for Personnel and Payroll Offices (reference (i)). At the time of appointment, an SF 2806/3100 is prepared for each new employee subject to the CSRS or FERS, except for a reemployed annuitant who may qualify for a supplemental annuity as defined in the CSRS and FERS Handbook for Personnel and Payroll Offices (reference (i)), when chapters 100-102 are published. In that case the SF 2806/3100, showing service history only, is prepared at the time of separation.

2. Disabled Annuitants Who Recover Before Reaching Age 60. Annuity payments shall be discontinued during their reemployment and retirement deductions shall be taken from their salary.

3. Annuitants Involuntarily Separated (for Reasons Other than Age). When an annuitant's reemployment is subject to a retirement system, the annuity payments shall be discontinued and deductions shall be taken from his or her salary. When their reemployment is not subject to the retirement system, annuity payments shall be continued, and the agency shall reduce the employee's pay by the amount of the annuity, and no retirement deductions shall be taken. See the CSRS and FERS Handbook for Personnel and Payroll Offices (reference (i)).

4. All Other Reemployed Annuitants. Annuity payments shall be continued during an annuitant's reemployment. The agency shall reduce the employee's pay by the amount of the annuity, and no retirement deductions shall be taken from his or her salary. See the CSRS and FERS Handbook for Personnel and Payroll Offices (reference (i)).

B. Former Members of Congress

1. Continued Annuity. Under P.L. 86-604 (reference (e)), the retirement annuity of former members of the Congress shall continue with no resulting increase, when

reemployed by a federal agency subsequent to December 31, 1958. Such reemployment shall be in an appointive position on an intermittent service basis with compensation, or on a full-time or substantially full-time basis without compensation (5 U.S.C. 8344(d)) (reference (b)).

2. Notice to OPM. The OPM Retirement and Insurance Programs, Annuitant Services Division, Washington, DC 20415, shall be notified immediately of the name of any former member of the Congress when employed in an appointive position on an intermittent service basis with compensation or on a full-time or substantially full-time basis without compensation.

070402. Reimbursement to the Office of Personnel Management For Annuity Paid to Retired Civil Service Employees While Reemployed

A. General. Activities employing retired Civil Service employees, whose annuities continue during reemployment, are required to reimburse the Civil Service Retirement and Disability Fund for the gross amount of the annuity paid by the OPM allocable to the period of actual employment. The payment to the OPM is shown on DD Form 592 as "Annuitants Cost to OPM."

B. Reimbursement. The gross amount of an annuity paid by the OPM to a reemployed annuitant, applicable to each pay period, shall be entered on the SF 2812. This will serve as a schedule of voucher deductions. The completed SF 2812 is forwarded to the OPM. In addition to other items, this form must show the agency's 8-digit payroll office number, the pay period from and to dates and the amount being remitted.

C. Separation of Reemployed Annuitant. Upon separation of a reemployed annuitant, the OPM shall be notified. Each notice shall contain the annuitant's name, date of birth, SSN, retirement claim number (if available), and date of separation. In the event an annuitant is eligible for a supplemental annuity, the civilian payroll office shall prepare an SF 2806/3100, listing all service subsequent to retirement. The SF 2806/3100 should be forwarded to the OPM as provided in the CSRS and FERS Handbook for Personnel and Payroll Offices, chapter 41 (reference (i)), together with the annuitant's new SF 2801 (Application for Immediate Retirement-CSRS) or SF 3107 (Application for Immediate Retirement-FERS).

070403. Prorating Annuities for Appropriate Reductions of Wage and General Schedule Salaries

A. General. Upon reemployment, the HRO provides the SF 50 data to the civilian payroll office as to the amount of annuity being received by a reemployed annuitant.

B. Employees Retired from the Competitive Service. A reemployed annuitants who retain his or her annuity shall have his or her salary reduced by a sum equal to the retirement annuity allocable to the period of actual employment. The appropriate reduction and adjusted salary shall be determined as follows:

1. An annuitant reemployed on an annual pay basis shall have his or her per annum salary reduced by the amount of the annual annuity. The remainder of the salary is computed in amounts payable on a biweekly pay period basis. Payment for overtime worked is based on an annuitant's full rate of basic pay before any reduction by the amount of their annuity.

2. An annuitant reemployed on an hourly pay basis shall have his or her daily or hourly rate of pay converted to the per annum equivalent. The per annum rate reduced by the total amount of the annuity being received by the employee. The remainder shall be reconverted to a per diem or per hour rate, as appropriate.

3. The civilian payroll office adjusts the reimbursement to the OPM following increases in an annuity as provided in the CSRS and FERS Handbook for Personnel and Payroll Offices (reference (i)), and the OPM instructions issued with periodic cost-of-living adjustments.

C. Former Members of Congress. Former members of the Congress who are employed in an appointive position on an intermittent service basis and who retain their annuities shall have their salaries reduced by a sum equal to the retirement annuity allocable to the period of actual employment. The amount of annuity allocable to each pay period shall be processed as a payroll deduction rather than as a reduction in pay period earnings as is the case with reemployed competitive service annuitants. Therefore, annuities withheld shall not reduce earnings for tax and other purposes. Annuities withheld in the case of former members of the Congress shall be remitted to the OPM as prescribed in paragraph 070402.

070404. Processing. Retirement deductions are optional for CSRS reemployed annuitants, and there is no requirement for a matching government contribution. Retirement deductions are required for FERS reemployed annuitants however, and government contributions are also required. These deductions are computed on the reemployed annuitant's basic pay before any offset due to receipt of an annuity. Deductions for Medicare (CSRS employees) or Social Security/Medicare (FERS employees) are computed on the amount remaining after subtraction of the annuity offset, in accordance with SSA guidance. Federal, state, and local taxes are computed on the amount remaining after subtraction of the annuity offset. TSP contributions are computed for a reemployed annuitant using the base salary prior to the salary offset for the annuity (TSP Bulletin 97-12) (reference (an)). Sick leave reported to the OPM cannot be reccredited upon reemployment (5 C.F.R. 630.407) (reference (l)).

070405. Computation of Lump-Sum Leave Pay. Under the provisions of 5 U.S.C. 8344 (reference (b)), the lump-sum payment for unused annual leave due a reemployed annuitant upon separation, including those retired from the competitive service and former members of Congress, shall be computed on the basis of the employee's wage or salary rate fixed for his or her position or occupation without reduction for the amount of annuity received by the employee.

0705 DECEASED EMPLOYEES

★ 070501. General. See 5 U.S.C. 5581-5583 (reference (b)). An SF 1152 (Designation of Beneficiary Unpaid Compensation of Deceased Civilian Employee) and an SF 1153 (Claim for Unpaid Compensation of Deceased Civilian Employee) are forwarded by the HRO to the civilian payroll office. Deceased civilian employees include former employees who die after separation from the employing installation and before receipt of final pay and allowances. Refer to paragraph 070508. for information on the death gratuity payment authorized under P.L. 104-208 (reference (e)). Unpaid compensation includes all pay, allowances, or other amounts due at the time of death, such as:

- A. Current salary (including any retroactive salary)
- B. Savings bonds (if no co-owner or beneficiary was designated) and savings bond balance
- C. Unclaimed or non-negotiated checks. A collection voucher is required to be prepared for non-negotiated returned checks
- D. Cash awards
- E. Foreign and nonforeign area differentials and allowances
- F. Lump-sum annual leave payment
- G. Travel reimbursement
- H. Severance pay.

★ 070502. Payment. Upon notice of the death of a civilian employee, the civilian payroll office takes action to prepare an SF 1154 (Public Voucher for Unpaid Compensation Due a Deceased Civilian Employee) to permit prompt payment of the amounts due. In accordance with the OPM regulations issued pursuant to 5 U.S.C. 5581-5583 (reference (b)), in certain instances the amounts due may be paid directly as indicated on the SF 1153 from the HRO. In certain other instances outlined in subparagraph 070502.B, however, the amounts due may be made only after being authorized by the OPM on the basis of claims forwarded to the OPM.

A. Direct Payment. Direct payment is permitted to claimants legally entitled to such payments. When paying more than one beneficiary, the civilian payroll office shall apply percentages due each beneficiary as specified by the deceased. If the deceased did not specify any percentages, the civilian payroll office shall divide the total amount equally among the eligible claimants. The legal claimants are determined based on the following order of precedence:

1. The beneficiary or beneficiaries designated by the employee in writing to receive such compensation. The designation must have been filed with the employee's employing activity prior to the employee's death;

2. The widow or widower of the employee;

3. The child or children of the employee, and descendants of deceased children by representation;

4. The parents or surviving parent of the employee;

5. The duly appointed legal representative of the estate of the employee, or if none, the person or persons entitled under the laws of the domicile of the employee.

★ B. Payment After OPM Certification. Certain claims are sent to the Claims Division of the OPM for certification before payment is made. After the OPM certifies the SF 1154, it is returned to the civilian payroll office for payment. These include claims when doubt exists either as to the amount or validity of the claim or as to the person or persons properly entitled to payment.

★ C. Submission for OPM Certification. For those claims required to be settled by the OPM before payment, the civilian payroll office shall perform the following actions.

1. Write a letter of transmittal to the office identified in paragraph 060401. The following shall be included:

a. Statement regarding designation of beneficiary.

★ b. Reason why referral to the OPM is recommended. As appropriate, cite unusual circumstances surrounding the death of the employee, or eligibility of the claimant(s) to receive the unpaid compensation.

c. Amount and nature of indebtedness, if any.

d. Statement that the claim has not been and will not be paid until certified in the name of the Comptroller General.

2. Attach the following to the letter of transmittal:

★ a. Original, with the required number of copies, of the SF 1154 and subvouchers. On the SF 1154 in the block for the name of the payee, place the phrase "Payment After OPM Certification."

b. Certified copy of the leave record.

c. Copy of time and attendance report for the period covered by the voucher.

070503. Computation of Amount Due. Pay earned through the date of death and lump-sum payment for unused annual leave shall be computed and shown on a regular biweekly payroll disbursement voucher or a special payroll voucher with a charge to the applicable appropriation and other applicable accounting information. The following instructions govern deductions from unpaid salary:

A. Retirement. If the employee was covered by a retirement system, deduct the retirement contribution from unpaid salary earned through the date of death.

B. Social Security and Medicare Portions of the FICA Tax. If the employee was subject to Social Security/Medicare, deduct for Social Security/Medicare tax from unpaid salary earned before the date of death and from lump-sum payment for unused annual leave earned after December 31, 1950 (IRS Circular E) (reference (h)). Gross wages earned in the calendar year through the date of death, subject to the statutory limitation, are subject to Social Security/Medicare. Social Security/Medicare taxes will be withheld on wages paid to a beneficiary or to the estate of the deceased employee in the calendar year of death. If payment is made after the calendar year of death, such wages are exempt from Social Security/Medicare taxes.

C. Federal Income Tax. Do not deduct FITW from unpaid salary earned by an employee through the date of death (IRS Circular E) (reference (h)).

D. State Tax. Do not deduct withholding for state or (territory or District of Columbia) income tax from the unpaid salary and lump-sum leave earned by an employee through the date of death.

E. Local Tax. Do not deduct withholding for local taxes from the unpaid salary and lump-sum leave earned by an employee through the date of death.

F. FEHB. If the employee had premium withholdings for FEHB, and there is a survivor eligible to continue the enrollment, make withholdings and contributions for the periods for which pay is due. This includes the pay period during which death occurred, subject to the applicable 4-day rule provisions in subparagraphs 040802.B.8. and 040802.B.10.

G. FEGLI. If the employee was subject to FEGLI, deduct for premiums for the periods for which pay is due, including the pay period during which death occurred.

H. Savings Bonds. Do not deduct for savings bonds from unpaid wages nor issue bonds after date of death.

I. TSP. Deductions for TSP and for any TSP loans outstanding will be made.

J. Allotments. Make no deduction for the pay period in which death occurred.

K. Other Deductions. Make any additional deductions required under specific cases, such as indebtedness.

070504. Lump-Sum Payment for Accrued Leave. Do not deduct retirement, federal, state, or local income tax, health benefits, life insurance, or savings bonds from lump-sum payment.

070505. Preparation of the Withholding Tax Statement

A. Decedent Form W-2. Include gross amounts for final pay for the pay period of death and lump-sum annual leave payments as "Social Security Wages" or "Medicare Wages and Tips" only if these amounts are paid to the estate or beneficiary in the same year as the death of the employee occurs. Do not include gross amounts for final pay for the pay period of death or lump-sum annual leave payments as "Wages, Tips, Other Compensation" on the decedent's Form W-2.

B. Form 1099-MISC. Prepare an Form 1099-MISC for amounts payable to the decedent's estate or beneficiary(s). Include in "Prizes, Awards, Etc." the gross amounts for final pay for the pay period of death, lump-sum annual leave, and other moneys such as travel reimbursements received.

C. Federal Income Tax. Deceased employee's unpaid wages are not subject to federal income tax withholding in either the calendar year in which the employee died or afterwards.

070506. Transfer of Funds. The unpaid compensation is placed in deposit fund account --X6875 (Suspense) pending receipt of a claim for the compensation. If a claim has not been received within 1 year from the date the amount was placed in the deposit fund account, transfer the funds as follows:

A. Transfer to deposit fund account 20X6133 (Payment of Unclaimed Moneys) unpaid compensation that meets the following criteria: amount is \$25 or more; a refund, upon claim, would be absolutely justified; there is no doubt as to legal ownership of the funds; and a named individual can be identified with the item. Subsequent payment of claims from this account shall be made by preparing an SF 1154 citing account 20X6133 and the account of the disbursing officer that supports the consolidated civilian payroll office.

B. Transfer to miscellaneous receipt account --1060 (Forfeitures of Unclaimed Money and Property) if the claim for unpaid compensation is less than \$25 or amounts greater than \$25 that do not meet all the provisions for account 20X6133. Subsequent payment of claims from this account shall be made by preparing an SF 1154 citing account 20X1807 (Refund of Money Erroneously Received and Recovered) and the account of the disbursing officer that supports the consolidated civilian payroll office.

070507. Processing of Agency Certification of Life Insurance Status for Employee Death Cases Within DoD. When an employee dies, the SF 2821 (Agency Certification of Insurance Status) is processed under the guidance in the Federal Employees Group Life Insurance Handbook for Personnel and Payroll Offices (reference (z)). The same official cannot make the two certifications of personnel and payroll record data on the SF 2821. To help reduce the time survivors or beneficiaries must wait on insurance benefits from the Office of Federal Employees' Group Life Insurance, the following expedited processing of SF 2821 shall be accomplished within DoD.

A. For collocated HROs and civilian payroll offices. The HRO completes and forwards the SF 2821 upon notification of death of the employee, to the servicing civilian payroll office for certification. The civilian payroll office certification shall be completed and all copies of the SF 2821 returned to the HRO within 24 hours after receipt by the civilian payroll office.

B. For HROs geographically separated from civilian payroll offices. The HRO completes and mails the SF 2821, upon notification of death of the employee, to the civilian payroll office for certification. The civilian payroll office's certification shall be completed within 24 hours after receipt by the civilian payroll office. The civilian payroll office shall express-mail all copies of the SF 2821 back to the HRO.

★ 070508. Death Gratuity Payment. P.L. 104-208 (reference (e)) authorizes payment of a death gratuity to the personal representative of an employee who dies from an injury sustained in the line of duty on or after August 2, 1990.

★ A. Documentation. The civilian payroll office must receive a letter of authorization from the HRO before payment is issued. The letter must contain the following:

1. Deceased employee name
2. Employee SSN
3. Amount of gratuity to be paid
4. Name and address of the personal representative to receive the payment
5. Name and telephone number of the responsible individual to be contacted for the appropriate fund cite to be charged for payment.

★ B. Payment. An SF 1049 shall be prepared in the amount indicated and made payable to the personal representative. Payment shall be made by the close of business the following work day after receipt of the fund cite. The death gratuity payment is not considered wages for the purpose of Social Security, Medicare, or federal, state or local tax withholding.

★ C. Reporting. Form 1099-R (Statement for Recipients of Total Distributions From Pensions, Annuities, Retirement or Profit-Sharing Plans, etc.) shall be prepared by the civilian payroll office and forwarded to the personal representative with a copy of the SF 1049 and the

authorization letter from the HRO. The civilian payroll office shall retain a copy of the completed SF 1049, Form 1099-R, and the authorization letter received from the HRO.

0706 EXPERTS AND CONSULTANTS

★ 070601. General. Title 5, United States Code, Chapter 31 (reference (b)) prescribes the conditions governing employment of experts and consultants. The civilian payroll office pays experts and consultants based on the SF 50 data received from the HRO.

070602. Compensation to be Paid. Determination of the specific rate to be paid experts and consultants, including the decision to pay no compensation, is made on an individual case basis. The rate for experts and consultants is not to exceed the amount authorized by the statute under which the individual's services are obtained. Normally compensation is equivalent to salaries in the GS-13 through GS-15 range. These grades are excluded from entitlement to interim geographic adjustment and locality pay.

070603. Overtime and Limitation on Pay. Because experts and consultants generally are paid on a daily rate basis, they are not entitled to more than the daily rate prescribed in the appointment documents for each day of service regardless of the number of hours worked. The designation of a regular tour of duty in the appointment documents does not necessarily preclude receipt of compensation at the agreed daily rate for work performed outside of that tour of duty-- for example, if such an employee works 6 days a week, the 6th day is paid at the straight time rate rather than the overtime rate. Experts and consultants employed on a daily basis may be paid the rate of basic compensation for work on days outside the prescribed tour of duty, provided the compensation within any biweekly pay period does not exceed the rate of basic pay for Level V of the Executive Schedule (58 Comp. Gen. 90 (1978)) (reference (p)).

070604. Salary Increases. Unless the appointment documents prescribe that General Schedule increases under 5 U.S.C. 5305 (reference (b)) automatically apply to these individuals, and without administrative action authorizing a consequent increase under 5 U.S.C. 5307 (reference (b)), an expert or consultant is not entitled to a pay increase on the basis of an increase in the General Schedule. The SF 50 data from the HRO notifies the civilian payroll office of the proper salary increase.

070605. Holiday Pay. Unless the appointment documents expressly provide for holiday pay, an expert or consultant employed on a daily basis is not entitled to compensation for holidays on which no work was performed (Comp. Gen. Decision B-131259, January 23, 1976) (reference (p)). The SF 50 data from the HRO notifies the civilian payroll office of the proper holiday pay, by an express statement that the employee is entitled to holiday pay.

★ 070606. Offset of Uniformed Services Retired Pay. As required by 5 U.S.C. 5532 (reference (b)), certain former members of the uniformed services are subject to reduction in retired pay if employed in the federal service (including experts and consultants). The employing activity is responsible for notifying the supporting DFAS Center which determines the amount of retired pay, if any, to be withheld (5 C.F.R. 550.601-603) (reference (l)).

070607. Exception from Dual Pay Restriction. Generally, an individual is prohibited by statute from receipt of basic pay from more than one position for more than an aggregate of 40 hours of work in one calendar week. Under one exception to this restriction, an individual is entitled to pay for service on an intermittent basis from more than one consultant or expert position, provided the pay is not received for the same hours of the same day per 5 U.S.C. 5533(d)(1) (reference (b)).

070608. Annual and Sick Leave

A. An expert, consultant, or other employee who serves on an intermittent or other basis without a prearranged regular tour of duty does not earn annual and sick leave (5 U.S.C. 6301(2)(ii)) (reference (b)).

B. An expert, consultant, or other employee who serves on a regularly prescribed tour of duty, full-time or part-time, does earn annual and sick leave. The HRO should determine the regular tour of duty in advance and should annotate the appointment document specifically to show whether the employee earns leave (58 Comp. Gen. 167 (1978)) (reference (p)) and (5 C.F.R. 630) (reference (l)). The accrual rate is the same as for other full-time and part-time federal employees as discussed in 5 C.F.R. 630 (reference (l)).

070609. Retirement, Life Insurance, and Health Benefits. An expert, consultant, or other employee whose service is intermittent or temporary for 1 year or less is not covered under the retirement systems and is ineligible for life insurance and health benefits. Coverage is continued, however, if an employee currently covered by retirement, life insurance, or health benefits is appointed as an intermittent or temporary (full-time or part-time) expert or consultant without a break in service or after a separation from the service of 3 days or less. To continue life insurance coverage for an intermittent employee, there must be an expectation that the employee will return to the previous position on a full-time basis.

0707 LEGALLY INCOMPETENT EMPLOYEES

070701. General. The HRO notifies the civilian payroll office in writing when an employee is found to be legally incompetent. The HRO sends the civilian payroll office the SF 50 data that shows the employee's separation because of mental incompetence. The employee also may be on an extended leave of absence, and the HRO shall so inform the civilian payroll office. The civilian payroll office makes no payments to the employee once it has been informed that the employee is declared legally incompetent. A claim must be filed on the employee's behalf before the pay account can be settled. No specific form is required to file a claim for amounts due mentally incompetent employees or former employees. The claim must be filed in writing over the signature of the person claiming on behalf of the incompetent. If the claim is from other than a guardian or committee, the Office of General Counsel that supports the servicing payroll office should be consulted prior to making payment.

A. Guardian or Committee. The initial claim filed by the guardian or committee of the estate of a legally incompetent employee must be accompanied by a certificate of the court showing the appointment and qualification of the claimant as guardian or committee. After the first payment has been made, subsequent recurring payments may be made to the same payee without further claim as long as the appointment as guardian or committee remains in effect and the matter is otherwise free from doubt. Subsequent payment vouchers will include a citation to the voucher upon which the initial claim was paid.

B. Other than Guardian or Committee. If a guardian or committee has not been or will not be appointed, the initial claim must be supported by a sworn statement that identifies:

1. The claimant's relationship to the legally incompetent employee, if any;
2. The name and address of the person having care and custody of the legally incompetent employee;
3. A remark that any amount paid to the claimant shall be applied only to the use and benefit of the legally incompetent employee;
4. A remark that no appointment of a guardian or committee is contemplated.

070702. Claim Action. Upon receipt of a claim, consider the proposed date of separation to determine whether compensation is due currently or a payroll voucher for final settlement should be processed. To avoid invalid payments when the employee is carried on extended paid leave, the HRO will monitor the case for any changes in the employees condition, and advises the civilian payroll office immediately. File the claim in the employee's file of documents.

070703. Processing Claims. The civilian payroll office may pay claims for unpaid amounts due to legally incompetent employees unless it doubts the amount or validity of the claim or it doubts the claimant's proper entitlement to the payment.

A. Any unclaimed, undelivered, or uncashed salary checks drawn in favor of the employee are to be returned to the disbursing officer for cancellation and credit to the appropriation or fund originally charged.

B. The net amount of any returned check is to be posted to the pay record. Adjustment of the items originally deducted from the gross pay is not required if the proceeds of the check are due the employee. If the proceeds of the check are not due, prepare an SF 1098 (Schedule of Canceled or Undelivered Checks) to cancel the check and make proper adjusting entries for the deductions from gross pay.

C. Compute the amount to be paid to the claimant. Process any further payments due to the employee each pay period in the regular payroll cycle; for example, payments due when the employee is carried on sick leave.

1. Prepare a statement for all arrears of pay due. Include the net amount of any uncashed checks if the proceeds are due.

2. Enter the following on the payroll voucher (such as on a DD Form 592 under "OTHER"):

a. "Mentally Incompetent Employee." In addition, enter the name of the proper claimant and capacity in which serving, followed by the name and SSN of the mentally incompetent employee.

b. Citation of the designated deposit fund account.

c. Amount due the claimant.

3. On receipt of a properly executed claim and/or court certificate, prepare an SF 1049 to effect the disbursement of the funds from the deposit fund account designated on the payroll voucher to the claimant. The claimant's name and address appear on the voucher along with the employee's name and SSN, and the pay period. The voucher is forwarded to the disbursing officer for payment.

4. Forward a copy of the processed voucher to the claimant. A copy should also be filed in the employee's file.

5. Include in the final payment any lump-sum payment for annual leave, refund of bond balances, and any other salary amount to which the employee is entitled.

6. Record in the payroll records the official date that the employee is declared legally incompetent. Also, the name and address of the claimant shall be recorded in the payroll records.

★ 070704. Processing Doubtful Claims for OPM Certification. Doubtful claims shall be submitted to the OPM following the procedures outlined in section 0604.

★ A. Prepare the voucher for the net amount due a mentally incompetent employee per paragraph 070703. This voucher (along with the required number of copies) is sent to the OPM. After the OPM certifies the voucher, it will be returned to the submitting office for payment.

★ B. Enter "Local Payment After OPM Certification" on the face of the voucher. The OPM adds the name and legal capacity of the claimant on the voucher.

C. Certify the voucher and attach the following:

1. Claimant's legal authorization, including any certificate of the court showing appointment and qualifications of the claimant.

2. Claim from the claimant (such as letter from the guardian, administrator, etc.)

★ 3. Statement of the doubtful aspects and the reason the civilian payroll office recommends referral of the claim to the OPM.

★ 4. Certificate stating that the claim has not been and will not be paid until certified.

D. Retain a copy of the voucher and supporting documents in the employee's file.

0708 MISSING PERSONS, CAPTURED OR INTERNED

070801. General. Civilian personnel who are determined officially to be missing are entitled to continued pay and allotments from their pay under the Missing Persons Act (5 U.S.C. 5561-5568) (reference (b)) and the Terrorism Compensation Act (5 U.S.C. 5569) (reference (b)). Missing status includes persons:

A. Missing

B. Missing-in-action

C. Interned in a foreign country

D. Captured, beleaguered, or besieged by a hostile force

E. Detained in a foreign country against the employee's will.

070802. Actions by the Civilian Payroll Office

A. Upon receipt of an official determination that a civilian employee is in a missing status, return any unclaimed or uncashed checks to the disbursing area.

B. The civilian payroll office retains responsibility for the employee's pay, leave and retirement records.

C. The initiation, continuance, discontinuance, increase, decrease, suspension, or resumption of an allotment from the pay and allowances of an employee in a missing status, is

authorized when that action is in the interests of the employee, the dependents, or the United States (5 U.S.C. 5563) (reference (b)). These allotments shall comply with section 0414.

1. Allotments authorized by an employee before the missing status began normally are continued for the period of absence.

2. The missing employee's dependents may receive an allotment of the employee's pay. Dependent payments cannot exceed the employee's net pay. The needs of the dependents, the number of dependents and their relationship to the employee, however, should be considered when determining the payment amount. If possible, reserve a reasonable amount each pay period to ensure that the employee will have funds available upon return.

D. The pay and allowances of a missing employee in a captive status may be allotted to an interest bearing savings fund established by the Secretary of the Treasury (5 U.S.C. 5569) (reference (b)). Captive status means a missing status which, as determined by the President, arises because of a hostile action and is a result of the individual's relationship with the government. All or any portion of the employee's pay and allowances may be allotted to the extent that such pay and allowances are not subject to an allotment under 5 U.S.C. 5563 (reference (b)) as outlined in subparagraph 070802.C.

E. Maintain the pay account on a pay-period basis. Include normal deductions for retirement, FICA, federal and state income tax withholding, FEHB, FEGLI, and savings bond deductions in the totals for the regular payroll voucher. Schedule savings bonds for issuance when the full purchase price has been deducted on the individual pay record. Savings bonds are mailed to the person(s) in whose name(s) the bonds are registered. If not mailable, savings bonds are kept in safekeeping at the supporting DFAS Center.

F. Establish a special leave account to restore any annual leave forfeited by an employee while in a missing status after January 1, 1965.

070803. Termination of Absence. Do not separate employees while they are entitled to pay and allowances under the Missing Persons Act (5 U.S.C. 5561-5568) (reference (b)).

A. When an employee returns from a missing status, the civilian payroll office promptly vouchers the balance withheld from the employee and furnishes a resume of allotments started and paid in the employee's absence. Charge the accounting classification that was current when the pay accrued. The employee initiates any allotment discontinuances or change documents for any allotments that may have been started or changed during the absence. The civilian payroll office pays future salaries using normal payroll procedures.

B. When the employee returns from missing status, furnish a statement of the special leave account balance to the employee's HRO. The employee elects, in writing, whether payment or credit for the leave is desired. If payment is requested, make the payment at the employee's rate of pay in effect when the leave was forfeited.

C. Upon receipt of official notice of the employee's death or presumed death, take actions outlined in section 0705.

D. Charge the pay adjustment or final settlement, including local allotment payments to dependents, to the appropriated fund account that bore the employee's salary.

0709 EMPLOYEES TRANSFERRED TO INTERNATIONAL ORGANIZATIONS

070901. General. Under 5 C.F.R. 352.301-352.314 (reference (l)), an employee who transfers to an international organization (IO) may elect to keep coverage for CSRS, FEGLI, and FEHB. Refer to subparagraphs 070901.A. and 070901.B. for TSP contributions. The employee is required to deposit the amount of the employee payments for these programs with the civilian payroll office. The employee's employing activity pays employer contributions for retirement, insurance, and health benefits coverage. The HRO notifies the civilian payroll office in writing when a transferred employee wishes to keep any one or all of these benefits.

A. A CSRS and CSRS-Offset employee who transfers to an IO can continue his or her CSRS retirement coverage. (Note: the CSRS-Offset employee reverts to full CSRS coverage during the transfer to the IO.) If an employee transferred prior to October 1, 1988, he or she can contribute to the TSP. If an employee transferred on or after October 1, 1988, he or she cannot contribute to the TSP (5 U.S.C. 8347(o)) (reference (b)).

B. A FERS employee who transfers to an IO is eligible to continue his or her retirement coverage under special procedures if he or she continues Social Security coverage (the CSRS and FERS Handbook for Personnel and Payroll Offices, chapter 12) (reference (i)). Since the employee is covered by FERS, he or she can contribute to the TSP.

070902. Computation of Payments

A. Compute amounts for retirement and FEGLI on the rate of basic compensation the employee was receiving at the time of transfer. If these amounts are changed by law or regulations while an employee is serving with an IO, recompute the amounts based on notification from the HRO and notify the employee and the IO (if applicable) of the effective date and new amount.

B. Compute FEHB on the cost of the plan of the employee's choice. If the enrollment cost changes while the employee is serving with an IO, recompute the amount based on notification from the HRO and notify the employee and the IO (if applicable) of the effective date and new amount.

C. When the SF 50 data is received showing a step increase, or general pay increase, recompute the amounts due under subparagraph 070902.A.

070903. Time of Payments. The HRO advises transferred employees to make payments promptly for each pay period. Payments are considered current, however, if received within 3 months after the end of the pay period covered by the payment (5 C.F.R. 352.309(c)) (reference (1)). The civilian payroll office advises the HRO (and carrier for FEHB) of any delayed payments. Failure to deposit payments on time ends the employee's coverage.

070904. Accounting for Payments. A DD Form 1131 (Cash Collection Voucher) is used to deposit, into a deposit fund established for such purposes, amounts received either from the individual or the employing organization. An SF 1081 (Voucher and Schedule of Withdrawals and Credits) is used to transfer the employer's contribution, if required, from the appropriation which would have been charged for the employee's pay to the proper deposit fund account. Total amounts (employee payments and contributions) are included on the current SF 2812, or prepare a supplemental, to make the total payment to the OPM. The employee's SF 2806/3100 is posted with the total annual retirement costs paid by the employee. The employee's status is shown in the Remarks section. The IO keeps an SF 2806/3100 for the entire term of employment, unless the OPM asks for it.

★ 070905. Leave Account. Employees who are transferred to an IO may elect to receive payment for accumulated annual leave or have it remain to their credit until they return to federal employment. Employees may also request payment at any time before reemployment. The HRO sets the date of separation to allow employees to use all accumulated annual leave that might otherwise be forfeited. The civilian payroll office prepares and delivers an extra copy of the SF 1150 to the employee. Upon reemployment, the civilian payroll office uses a copy of the SF 1150 to recredit sick leave and annual leave, if applicable. If the employee accepts a lump-sum payment and is reemployed within 6 months after transfer to the IO, the employee must refund the amount of the lump sum (5 U.S.C. 3582, reference).

070906. Equalization Allowances. Title 5, United States Code, section 3582(b) (reference (b)) authorizes those employees transferred to an IO, upon reemployment, to be paid an equalization allowance if the IO pay and other monetary allowances are less than the employees would have received had they been detailed from their federal jobs (5 U.S.C. 3343) (reference (b)). For conditions of entitlement, see 5 C.F.R. 352.310 (reference (1)).

A. The equalization allowance applies to employment with an IO that occurs after December 29, 1969.

B. Employees transferred to an IO are entitled to be paid an amount equal to the difference between the pay, allowances, post differential, and other monetary benefits paid by the IO and the pay, allowances, post differential, and other monetary benefits that would have been paid by the federal employer had the employees been detailed to the IO under 5 U.S.C. 3343 (reference (b)). This applies to employees (1) on reemployment, or (2) on death, if it occurs while transferred to, or during the period after separation from, an IO when the employees are exercising, or could exercise, their reemployment rights, or (3) if the employees cannot exercise their reemployment rights because of a disability incurred while transferred to an IO

C. To determine the difference, the Secretary of State defines pay for the federal government as the amount paid an employee after deductions of federal, state, and local taxes (5 C.F.R. 352.310(a)(1)) (reference (l)). Pay for IOs following the Common System of Salaries and Allowances of the United Nations and Specialized Agencies is the amount paid an employee after deduction of the staff assessment. Pay for other IOs is the tax-free pay plus a pro rata amount equal to the corresponding United Nations staff assessment. In cases when pay is subject to federal, state, and local taxes, this is the pay before deduction of the taxes.

D. Allowances, post differential, and other monetary benefits are defined by the Secretary of State as follows:

1. Federal Government. The amount that would have been paid under 5 U.S.C. 5921-5925 (reference (b)), applicable provisions of chapters 100, 200, and 500 of the DSSR (reference (t)) , and implementing agency regulations had the employees been detailed to an IO under 5 U.S.C. 3343 (reference (b)).

2. IOs Following the Common System of Salaries and Allowances of the United Nations and Specialized Agencies. The amount paid under pertinent provisions of the Staff Regulations and Rules of the United Nations and Specialized Agencies.

3. Other IOs Not Under the Common System of Salaries and Allowances of the United Nations and Specialized Agencies. The amount paid under pertinent conditions of service applied by the organizations as determined to be appropriate by the releasing agency with the concurrence of the Secretary of State.

E. Travel and subsistence expenses, transportation of effects, and leave are not considered monetary benefits for equalization allowance.

F. In exceptional circumstances when a hardship or an inequity would otherwise occur, the Secretary of State, on the recommendation of the head of the agency, may specify allowances or other monetary benefits instead of, or in addition to, those specified above.

G. The payment of equalization allowance is chargeable to the appropriation current at the time of disbursement and is subject to federal and state income tax deductions.

0710 EMPLOYEES TRANSFERRED TO STATE, LOCAL, OR INDIAN TRIBAL GOVERNMENTS OR TO INSTITUTIONS OF HIGHER EDUCATION AND OTHER ELIGIBLE ORGANIZATIONS

★ 071001. General. Title 5, Code of Federal Regulations, part 334, (reference (l)) contains information regarding temporary assignment of employees between executive agencies and states, local governments, Indian Tribal Governments, institutions of higher education, and

other eligible organizations. An employee's pay and leave provisions are in the employee's assignment agreements. If procedural problems arise in complying with the assignment agreements, contact the HRO.

0711 EMPLOYEES WHOSE WHEREABOUTS ARE UNKNOWN

071101. General. In the event an employee's whereabouts is unknown and payment cannot be made to the employee, the amount should be transferred to a suspense account. If the money is still unclaimed after 1 year, transfer the amount to the deposit fund account 20X6133 (Payment of Unclaimed Moneys).

0712 AIR TRAFFIC CONTROLLERS

071201. Retirement. Air traffic controllers have a unique retirement deduction percentage for CSRS and FERS employees. These rates are published by the OPM in the CSRS and FERS Handbook for Personnel and Payroll Offices, chapters 30 and 46 (reference (i)).

071202. Leave. Leave accruals are based on guidelines published in 5 C.F.R. part 630 (reference (l)).

071203. Overtime Computation. For an employee who occupies a non-managerial position, the overtime rate of pay is an amount equal to one and one-half times the hourly rate of basic pay of the employee. The entire amount is considered premium pay. To be eligible for such pay, the duties of a non-manager's position must be critical to the immediate daily operation of the air traffic control system, directly affect aviation safety, and involve physical or mental strain or hardship.

0713 PERSONNEL ON LONG TERM FULL-TIME TRAINING

071301. General. Long term full-time training is defined as a training period of 120 consecutive workdays or more (5 U.S.C. Chapter 41) (reference (b)) (5 C.F.R. Part 410) (reference (l)). Employees on long term full-time training are authorized payment of salary.

071302. Leave. Leave is reported via the time and attendance reporting mechanism and is administered as specified for the following leave types:

A. Annual Leave. Personnel on long term full-time training shall continue to accrue annual leave. Ordinarily, an employee will be charged with annual leave during school vacation periods which fall on government workdays, unless he or she returns to the work site or has made documented arrangements with his or her DoD point of contact to be actively involved in academic work. These documented arrangements should be accomplished well in advance of the vacation periods. Annual leave charges are reported to the civilian payroll office on the employee's time and attendance report.

B. Sick Leave. Personnel on long term full-time training shall continue to accrue sick leave. Sick leave should be charged when the person is unable to attend classes due to illness. Such sick leave charges are reported to the civilian payroll office on the employee's time and attendance report.

0714 EMERGENCY MEDICAL TECHNICIAN (EMT)

071401. Tour of Duty. The EMT works a special tour of duty of 24 hours on and 48 hours off. Schedules and changes to tours of duty for an EMT working irregular tours must be on file in the employing activity/timekeeper site. Eating and sleeping time also must be documented. The hourly rate is multiplied by 40 hours, and the base pay and premium pay is based on this weekly rate regardless of the hours in the scheduled tour of duty for that week.

071402. Eating and Sleeping. Adequate sleeping facilities must be provided for employees in order to exclude sleep time in calculating pay entitlements. If an employee cannot get an aggregate of 5 hours of sleep because of employing activity-initiated interruption, the entire sleep period is considered actual work time. For all 24-hour shifts, the two-thirds rule shall apply. This means that unless actual eating and sleeping time of less than 8 hours is documented on the employee's time and attendance report, 8 hours shall be deducted from scheduled hours to determine actual hours worked. When an employee takes 24 hours of leave, 8 hours of eating and sleeping time for that employee are deducted from actual hours of work under FLSA. Eating and sleeping time for days of partial leave must be documented on the time and attendance report so that actual hours of work are shown. Eating and sleeping time scheduled during leave periods shall be added to total eating and sleeping time so that total hours of actual work and total hours of eating and sleeping time will be shown. If an employee works an additional 24-hour overtime shift, 8 hours of eating and sleeping time are deducted unless otherwise documented as worked. If the overtime shift is less than 24 hours, no eating and sleeping time is deducted.

★ 071403. Overtime Computation. If leave is taken during a workweek, leave hours are included as actual hours worked under FLSA. Actual hours, however, shall not include scheduled eating and sleeping time for a 24-hour shift or documented eating and sleeping time for partial days of leave. Overtime computations are based on 40 hours per week instead of 80 hours per biweekly pay period.

★ 071404. Leave Accrual. Employees on uncommon tours of duty who repeating on a cycle of more than one biweekly pay period (e.g., a three biweekly pay period cycle) accrue leave based on the average hours in the biweekly tour. An EMT on a tour of duty of 96 hours for one biweekly pay period, and 120 hours for each of the following two biweekly pay periods, works an average tour of 112 hours per pay period, accrues leave based on a 112-hour tour of duty. See DoD 1400.25-M, subchapter 630 (reference (u)).

071405. Premium Pay. The amount of the premium pay for the irregular tour of duty shall be determined by the HRO and reported on the SF 50. An EMT employed as intermittent is not entitled to premium pay on an annual basis, nor is he or she entitled to paid leave. An EMT is paid under regular overtime rules.

★ 071406. Refer to 5 C.F.R. Part 551 (reference (l)) for additional guidance on pay administration for EMTs under the FSLA (reference (n)).

0715 JUDGES

071501. Administrative Law Judges

A. Authority. Under 5 U.S.C. 3105 (reference (b)), the Department appoints administrative law judges as necessary for proceedings required to be conducted in accordance with 5 U.S.C. 556 and 557 (reference (b)). Administrative law judges are assigned to cases in rotation so far as practicable. These employees may not perform duties inconsistent with their duties and responsibilities as administrative law judges.

B. Pay for Administrative Law Judges. Title 5, United States Code, section 5372 (reference (b)) established the administrative law judge pay system. The minimum rate for administrative law judge positions is set at 65 percent of Level IV of the Executive Schedule and the maximum rate is set at 100 percent of Level IV of the Executive Schedule. The administrative law judge positions are (lowest to highest) AL-3, Rate A; AL-3, Rate B; AL-3, Rate C; AL-3, Rate D; AL-3, Rate E; AL-3, Rate F; AL-2; and AL-1.

★ 071502. U.S. Court of Military Appeals Judges. The U.S. Court of Military Appeals is established under Article I of the United States Constitution, and 10 U.S.C. 941 through 946 (reference (ar)). The President of the United States, with the advice and consent of the United States Senate, appoints the judges of the court for a term of 15 years. The court consists of five judges. The court is located within the Department of Defense for administrative purposes. The judges are employees as defined under 5 C.F.R. Part 213 (reference (l)). They are not considered administrative law judges. The salaries of the judges are equal to that of the judges of the United States Courts of Appeals (that is, General Schedule Salary Table, Schedule 7, Judicial Salaries). The maximum annual salary is that of Level I of the Executive Schedule.

A. Entitlements. The judges are entitled to regular base pay only. They are excluded from the leave provisions of 5 U.S.C. 6301(2) (reference (b)). As federal judges under 5 U.S.C. 5541(2)(i) (reference (b)), they also are excluded from the provisions of premium pay under 5 U.S.C. Chapter 55, Subchapter V (reference (b)).

B. Deductions

1. Judges under CSRS are required to contribute 8 percent for retirement. Judges under FERS have the same deduction rate as other FERS employees. See the CSRS and FERS Handbook for Personnel and Payroll Offices, chapter 30 (reference (i)).

2. The FEGLI for the judges is based on Level II of the Executive Schedule.

3. The judges are subject to the Social Security/Medicare maximum salary limitations.

4. Judges, upon becoming eligible for retirement, may, under the provisions of 10 U.S.C. 945(i) (reference (ar)), elect to retire either under CSRS or FERS (if they otherwise meet the conditions of those systems) or to receive a retirement annuity under 10 U.S.C. Article 145 (reference (ar)).

★ C. Special Retirement and Survivor Benefits for Judges of the United States Court of Military Appeals. Under Article 145, 10 U.S.C. 941 through 946 (reference (ar)), judges upon becoming eligible may elect to receive a retirement annuity from the Defense Military Retirement Fund. The DFAS-Denver Center serves as the "payroll office" for employees receiving these benefits. It carries out activities such as:

★ 1. Maintain individual retirement records of individuals who elect annuity benefits under 10 U.S.C. 945 (reference (ar)).

★ 2. Issue annuity payments from moneys in the Defense Military Retirement Fund, including the collection of applicable federal and state income taxes, and collections of debts owed the U.S. Government.

★ 3. Arrange with the OPM for transfer of moneys, including interest payments authorized under 10 U.S.C. 945(a))3)(C) (reference (ar)), from the Civil Service Retirement Fund to the Defense Military Retirement Fund.

★ 4. Withhold, as appropriate, contributions from annuity for payment of federal health and life insurance premiums, make correct agency contributions, and transmit these moneys to the Civil Service Retirement Fund.

★ 5. Readjust annuity payment when events change retiree or survivor entitlements.

★ 6. Account for retirement moneys received from the OPM and disbursed to benefit recipients, insurance carriers, and federal and state tax entities.

★ 7. Cease annuity payment if employee receiving annuity elects judiciary retirement benefits under 10 U.S.C. 945(g) (reference (ar)).

★ D. Judges of the United States Court of Appeals for the Armed Forces. Judges in receipt of annuity under 10 U.S.C. 945 (reference (ar)) are responsible for advising Washington Headquarters Service (WHS) of dual compensation circumstances under 10 U.S.C. 945(f) (reference (ar)) and elections of judicial retirement benefits under 10 U.S.C. 945(g) (reference (ar)).

0716 AUXILIARY CHAPLAINS

071601. General. Civilian clergy may be assigned to perform essential religious services of the chapel program that are beyond the staffing capabilities of the Armed Forces chaplains. These auxiliary chaplains normally perform their services on military installations, except for emergency ministrations. To serve as auxiliary chaplains, civilian clergy must be ordained or accredited by a faith group recognized by the Armed Forces Chaplain Board. They must meet those additional qualifications required by the Armed Forces.

071602. Appointing and Paying Auxiliary Chaplains

A. Auxiliary chaplains may be appointed by the HRO on a "when actually employed" basis. They are paid on a fee basis from the employing activity's appropriated funds for civilian personnel (such as Operation and Maintenance funds). The HRO may appoint these chaplains under the authority of 5 C.F.R. Part 213 (reference (I)).

B. Additionally, the installation contracting office may obtain auxiliary chaplain services under non-personal services contracts. Auxiliary chaplains placed on a non-personal services contract are not paid through the civilian payroll system. They are paid through the commercial vendor process.

C. Work Schedules. Auxiliary chaplains employed on a "when actually employed" basis have no work schedule. They are paid for religious services performed.

D. Absence and Leave. There is no entitlement for leave.

★ E. Entitlements. The pay scale for auxiliary chaplains is determined by the employing activity's HRO. Because chaplains are excluded from the definition of a GS employee in 5 U.S.C. 5102 (reference (b)), they are also excluded from the entitlement to interim geographic adjustments. Social Security, Medicare, federal and state income tax withholdings are made in accordance with the tax documents filed by the chaplain. Social Security, Medicare, federal and state income tax withholdings do not apply to chaplains under non-personal service contracts.

★0717 SERVICE SECRETARIES

★ 071701. Secretaries of the Military Departments (Army, Navy, and Air Force) are paid 24 pay periods a year on a semi-monthly basis on the 1st and the 15th of the month.

★ 071702. Time and attendance is not reported. Accrual and usage of annual and sick leave is not authorized. Service Secretaries are not eligible for premium pay.

★ 071703. Deductions for FEHB and FEGLI must be calculated on a semi-monthly basis. Federal, state and local taxes are calculated on a semi-monthly basis. Deductions are made for Social Security, Medicare, retirement, and TSP.

CHAPTER 8**UNDERPAYMENTS AND INDEBTEDNESS****0801 UNDERPAYMENTS**

080101. Salary underpayments to civilian employees or former employees resulting from errors (such as in computing the federal withholding tax, retirement deductions, Social Security/Medicare tax, rate of pay, or in reporting time and attendance) may be corrected by increasing or decreasing the pay factors affected on the first payroll prepared after the error is discovered. Salary payments to civilian employees shall be made in accordance with the time and attendance reported and certified by the employee's supervisor. Time and attendance reported which is less than an employee's normal work schedule shall be presumed to reflect accurately the hours of work and nonwork. Employees or former employees who believe they have not been credited with pay due them may follow the claims procedures prescribed in section 0604.

080102. Special Payments. Salary underpayments to civilian employees may be corrected by making special payments to employees, that is, payments to employees other than through normal payroll processing.

A. The primary guideline for making a special payment (for an underpayment) is that the employee must have received less than 90 percent of his or her regular biweekly pay and allowances. Special payments shall be made for the following reasons:

1. Beneficiary payments, upon request.
2. Employees who erroneously are omitted from the payroll.

★ 3. Employees who are paid for less than 90 percent of their regular biweekly pay and allowances, when a special payment is requested by the commanding officer/director of the employing activity or his or her designee.

4. Employees who are placed in an LWOP status for payroll processing, and subsequently substitute advanced leave, annual or sick, and/or donated leave upon certification. The commanding officer/director, after reviewing each case for hardship, may request a special payment for employees provided the 90 percent guideline has been met.

B. Requests for partial payment of salary before the regular payday shall not be honored.

C. Special payments for overtime worked but not reported and, therefore, not paid in the corresponding pay period shall not be allowed.

D. Employees shall receive payment depending upon the normal distribution of their net pay. An EFT submission shall be sent to the employee's financial institution or a Treasury check shall be express mailed to the employee at his or her address of record. Payment shall be released by the close of business on the workday following receipt, by the civilian payroll office, of documentation required to substantiate payment. Payments to beneficiaries shall be made via Treasury check and mailed to the address of record. The following documentation is required to substantiate payment:

1. Beneficiaries may request a special payment by sending a letter, to the civilian payroll office, stating that payment is needed to defray expenses. The special payment shall be issued providing the civilian payroll office has received all the documentation to support the claim from the human resources organization (HRO). The civilian payroll office forwards a payment voucher and beneficiary's request to the disbursing office for payment.

2. For an individual erroneously omitted from the payroll, an SF 50 verifies the individual's employment and the supervisor's request, and certifies number of hours the employee worked together with source documents to support deductions, is needed to support payment.

3. For an employee paid for less than 90 percent of his or her regular biweekly pay and allowances, a copy of the time and attendance report or corrected time and attendance report and a request by the commanding officer/director are required to support payments.

4. For an employee placed in a LWOP status, who meet the primary 90 percent guideline, time and attendance certifier will provide corrected time and attendance reports and the commanding officer's request to the civilian payroll office to support the payment request.

E. The DoD civilian payroll offices shall use DD Form 592 as the voucher for requesting special payments.

★ F. Computation of Special Payments. Special payments shall be computed using the "gross-to-net" method. Gross-to-net payments represent the regular biweekly pay and allowances normally due the employee less any required deductions and withholdings. Deductions and withholdings may be for retirement (CSRS and FERS), Social Security and Medicare, federal tax, health benefits premiums, group life insurance premiums (basic and optional), state tax, city or local tax, TSP, or TSP loan repayment, indebtedness, military service credit deposits, and garnishments. Deductions and withholding amounts and the applicable appropriations shall be annotated on the payment voucher for direct disbursement. The following procedures are applicable for gross-to-net special payment processing:

1. No pay received. The employee shall be paid gross entitlements less applicable deductions and withholdings listed in subparagraph 080102.F. Exclude deductions for voluntary allotments and savings bonds. The employee is responsible for any existing voluntary

allotments. All deductions and withholdings shall resume the following pay cycle, including voluntary allotments and savings bonds.

2. Less than 90 percent of regular biweekly pay and allowances received.

The employee is entitled to the difference between what was paid and what should have been paid. The civilian payroll office shall deduct additional amounts for applicable items listed in subparagraph 080102.F., unless previous payroll processing has satisfied the deductions. The employee shall be responsible for any existing voluntary allotments that were not deducted during previous processing. All deductions and withholdings shall resume the following pay cycle.

3. Final special payment. An employees who received his or her final pay as a special payment should be paid gross entitlements less all required deductions and withholdings of items listed in subparagraph 080102.F. Additionally, the employee may receive a payment for accrued savings bond balances for which bonds have not been issued. The employee is responsible for voluntary allotments. The employee's final pay is subject to withholdings to liquidate any unsatisfied government indebtedness.

G. Processing of special payments made after the last regular pay period of the pay year, but before the end of the calendar year.

★ 1. Federal, state, and local taxes, Social Security and/or Medicare withheld from special payments made after the last regular pay date, but before the end of the calendar year, shall be forwarded to the applicable offices as soon as possible after the end of the year. (Note: When computing or making deductions for Social Security, the civilian payroll office shall ensure the employee has not reached maximum withholdings for the year.) In completing the supplemental DD Form 592 for any canceled checks or special payments, the civilian payroll office shall include all deductions and contributions for Social Security and/or Medicare, federal, state, and local taxes. If the Forms W-2 (Wage and Tax Statement) have not been printed, the civilian payroll office shall process updates to ensure special payments or canceled checks are included in the history totals for subsequent Form W-2 printing. If Forms W-2 have been printed, the civilian payroll office shall issue Forms W-2c (Corrected Wage and Tax Statement) in accordance with IRS Circular E (reference (h)) and Form 941c.

2. Process an SF 1081 (Voucher and Schedule of Withdrawals and Credits) to correct an employee's CSRS or FERS retirement deductions withheld from a special payment. Input the SF 1081 during the next pay cycle to correct both the prior year-to-date and cumulative retirement deductions and the current year opening balance.

3. Special payments for TSP participants are subject to TSP deductions provided the employee has not reached the maximum deduction or contribution level established by law. TSP deductions withheld from special payments after the last regular pay date in the pay year, but before the end of the calendar year, shall be combined with the next pay cycle for reporting and submission to the NFC.

H. Since a special payment is an off-line process and employees do not receive a regular LES, the civilian payroll office shall provide information to the employee of the effects of the special payment.

I. Taxation of Retroactive Payments

1. Time and Attendance. All time and attendance retroactive transactions shall be taxed using the rate associated with the current Form W-4. Combine the retroactive wages with the wages from the last pay period prior to the current to determine the basis to recompute tax withholdings. Recompute the taxes and determine the retroactive tax withholdings by subtracting the taxes withheld during the last pay period from the recomputed taxes.

2. Retroactive Wage Increases. Retroactive wage increases shall be considered as supplemental wages and taxed at the flat 28 percent rate if taxes were withheld from regular wages during the last preceding payroll period in which wages were paid within the same calendar year. If taxes were not withheld from those regular wages, the rate associated with the current Form W-4 should be used.

3. Supplemental Payments (Awards, Lump-Sum Leave, Separation Pay Incentives). Supplemental payments shall be taxed at the flat withholding rate of 28 percent if taxes were withheld from regular wages during the last preceding payroll period in which wages were paid within the same calendar year. If taxes were not withheld from wages, the rate associated with the current Form W-4 rate should be used.

0802 INDEBTEDNESS

080201. General

★ A. The Department shall collect indebtedness due the United States promptly in accordance with the Debt Collection Improvement Act of 1996, section 31001 of P.L. 104-134 (reference (e)), the Debt Collection Act of 1982, P.L. 97-365, as amended (reference (e)), the Federal Claims Collection Standards, 4 C.F.R. Parts 101-105 (reference (ba)), 5 C.F.R. Parts 179 and 550 (Subpart K) (reference (l)), and DFAS Regulation Number 005 (reference (w)). Volume 5 of this Regulation also should be consulted regarding indebtedness and debt collection. There are four ways to collect debts owed to the United States by civilian employees:

1. The employee consents to pay or permits withholding from pay;
2. The government collects involuntarily from the employee's current salary or pay where authorized by statute;
3. The government collects involuntarily by offset from any other amounts payable to the employee by the government when authorized by statute; or
4. The government files suit in court against the employee and prevails.

B. When specific statutory authority exists for the collection of a particular debt, the provisions of that statute and its implementing regulations must be used in determining the applicable collection procedures (64 Comp. Gen. 142 (1984)) (reference (p)). When a more specific statute that authorizes collection in a particular case does not exist, use the collection authority (either 5 U.S.C. 5514 (reference (b)) for offset from current pay or 31 U.S.C. 3716 (reference (d)) for offset from other amounts due, as appropriate) to collect debts to the United States.

1. Title 5, United States Code, section 5514 (reference (b)) authorizes collection from those civilian employees who are indebted to the United States. Generally, the amount deducted may not exceed 15 percent of disposable pay (as defined in subparagraph 080307.B.2.) unless the employee gives written consent that a greater percentage may be deducted. The employee must be given an opportunity for a hearing, in addition to other due process requirements, before offset is initiated. See section 0803 for processing collections under this statute.

2. Title 31, United States code, section 3716 (reference (d)) authorizes collection of debts from final pay and lump sum leave payments of civilian employees. This statute is, in effect, a catchall provision that applies only when there is no other offset statute available. There is no limit on the maximum rate of collection under this statute, and all money payable to a person by the government is subject to offset. See paragraph 080309 for procedures used in processing collections under this statute.

C. Under 4 C.F.R. 102.3(b)(5) (reference (ba)), salary or administrative amounts payable to employees shall be offset involuntarily before initiation of, or at any time during, due process procedures if failure to take the offset would substantially prejudice the civilian payroll office's ability to collect the debt; time before payment must be made does not reasonably permit completion of the procedures; and such prior offset is promptly followed by due process procedures.

D. When an employee owes more than one debt to the United States, deductions currently being made normally shall continue until the debt is paid. However, the civilian payroll office shall change the priority of the deductions when necessary to ensure maximum amounts are collected before any statute of limitations expires. Debts owed by employees to more than one DoD Component or another federal agency shall be collected in the following priority sequence:

1. Debt to the employee's employing agency or department.
2. Debt to other DoD Components
3. Debt to other federal agencies

080202. Overpayments of Pay and Allowances

★ A. Overpayments to employees result from such causes as errors in computing federal withholding tax, CSRS or FERS deductions, or Social Security and/or Medicare deductions, improper rates of pay, errors in reporting time worked, and erroneously accrued annual leave. These may be discovered both inside and outside the civilian payroll office. The head of each DoD civilian payroll activity has the overall responsibility for ensuring that all overpayments are recovered expeditiously from the recipients or that other appropriate disposition, such as waiver of the indebtedness, is accomplished. He or she also is shall ensure that employees are afforded all legal rights relative to the indebtedness arising from overpayments. These responsibilities may be delegated to another appropriate official within the financial community.

B. The following debts are not authorized as payroll deductions:

1. Collection of debts to private creditors, except as authorized by P.L. 103-94, "Hatch Act Reform Amendments of 1993" (reference (e)).

2. Contributions to charities, except as authorized in subparagraph 041402.J.

3. Payment of insurance premiums, except as authorized in subparagraphs 041402.C. and D., international agreements, or arrangements with foreign governments.

4. Payment of dues to civic, fraternal, or other organizations, except as authorized in subparagraph 041402.I.

5. Collection of state and local/city tax indebtedness.

6. Collection of debts owed to NAF instrumentalities.

0803 RECOVERY OF OVERPAYMENTS OF PAY AND ALLOWANCES FROM CURRENT DOD EMPLOYEES

080301. General. The authority to collect overpayments of pay and allowances resulting from civilian payroll operations by salary offset is 5 U.S.C. 5514 (reference (b)). The civilian payroll office:

A. Computes the amount of the overpayment

B. Notifies the HRO immediately if corrective personnel action is required.
Continued payments of erroneous pay and allowances shall not be authorized

C. Provides the employee due process before collecting an overpayment of pay and allowances paid by the civilian payroll office

- D. Corrects the employee's records when appropriate.

080302. Debts for Health Benefits or Life Insurance Coverage

A. If an employee elects coverage or changes coverage in a federal benefits program (e.g., the FEHB or FEGLI program), and the amount to be collected accumulated over four pay periods or less, under 5 C.F.R. 550.1104(c) (reference (l)) all deductions pertaining to the period of coverage may be made without the necessity of affording the employee full due process (written notification, opportunity for a hearing, etc.) under 5 U.S.C. 5514 (reference (b)). In such cases, the civilian payroll office notifies the employee either in advance or concurrent with the actual collection that, (1) because of the employee's election, future salary shall be reduced to cover the period between the effective date of the election and the first regular withholding, and (2) the employee may dispute the amount of the retroactive collection by notifying the civilian payroll office for resolution of the dispute. An appropriate notice on the LES may meet the requirement for notification.

B. The Federal Employees Health Benefits Handbook for Personnel and Payroll Offices (reference (y)) states that a reasonable installment rate to liquidate the debt should not be set above 25 percent of the employee's net pay unless the employee requests a higher rate, or the expected period of continued employment is such that a higher rate is needed to complete recovery in the time available. If processing delays exceed four pay periods, full due process procedures prescribed under 5 U.S.C. 5514 (reference (b)) shall be extended to the employee as outlined in section 0803. The Federal Employees Health Benefits Handbook for Personnel and Payroll Offices (reference (y)) contains the procedures pertaining to debts arising from the payment of health benefit premiums for periods of nonpay status or when salary is insufficient to cover the required premiums.

080303. Notification

A. Under the provisions of 5 C.F.R. 550.1104 (reference (l)), the civilian payroll office, or another official responsible for collection of the debt, shall issue an appropriate written demand for voluntary lump-sum payment. The demand letter shall be issued as soon as possible following the discovery of the overpayment, and shall request that the payment be made within 30 days from the date of the letter. Debts not paid by the date specified in the demand letter are delinquent unless other satisfactory payment arrangements have been made by that date, or if at any time later, the employee fails to satisfy obligations under a repayment agreement. Only one written demand is required. The civilian payroll office or the official responsible for collection of the debt must be able to demonstrate that the employee has received the demand letter. Therefore, if hand delivery and execution of a receipt is not practical, a certified or registered notice with return receipt requested should be used. Care must be exercised to ensure that the letter either is mailed or hand delivered on the same day it is dated. When employees are given time limits to reply to civilian payroll office correspondence, 15 additional days will be allowed if the correspondence must go through non-U.S. mail systems. See Figure 8-1 for a copy of the demand letter and Figure 8-2 for a sample voluntary repayment agreement. The letter must contain the following information

1. A complete statement of facts showing the origin and amount of the debt and the basis on which the determination of indebtedness was made:
2. A request that the debt be repaid by check or money order within 30 days of notification.
3. The intention to collect the debt by means of payroll deductions if payment is not received within 30 days.
4. The amount, frequency, proposed beginning date, and duration of the deductions.
5. An explanation of policy concerning interest, penalties, and administrative costs, including a statement that such assessments must be made unless excused per the Federal Claims Collection Standards.
6. The right of the employee and his or her representative to inspect and copy government records relating to the debt or to request a copy of such records within 10 days from receipt of this letter.
7. The opportunity for the employee to establish a schedule for the voluntary repayment of the debt or to enter into a written agreement to establish a schedule for repayment of the debt in lieu of offset.
8. A statement that, if the employee has any question regarding the indebtedness, he or she may ask for and receive an explanation from the civilian payroll office. Also, a statement advising that, if the employee wishes to contest the indebtedness (request a reconsideration), he or she may do so by submitting a written statement to that effect within 15 calendar days of the date of the notification. This right of reconsideration is separate from, and may be used in addition to, the right to request a hearing discussed in paragraph 080305.
9. A statement identifying the employee's opportunity for a hearing on the determination concerning the existence, or the amount, of the debt; or when a repayment schedule is established other than by written agreement, a hearing concerning the terms of the repayment schedule. The statement also shall advise that a request for a hearing on either the existence of the debt, the amount of the debt, or the repayment schedule must be made in writing within 30 days of the receipt of the notice of indebtedness or within 45 days after the receipt of the records relating to the debt, if such records are requested by the employee.
10. Notice, if a hearing is given, of the employee's right to receive a written decision from the official holding the hearing within 60 days after the filing of the petition unless the employee requests, and the hearing official grants, a delay in the proceedings.

11. A statement that the timely filing of a petition for a hearing shall stay the beginning of collection proceedings, and that interest and penalty charges shall not accrue during the period from the timely filing of a petition for a hearing until issuance of the hearing official's decision.

12. A statement that any knowingly false or frivolous statements, representations, or evidence may subject the employee to:

a. Disciplinary procedures appropriate under 5 U.S.C. chapter 75 (reference (b)); 5 C.F.R. 752 (reference (l)), or any other applicable statutes or regulations;

b. Penalties under the False Claims Act, 31 U.S.C. 3729-3733 (reference (d)), or any other applicable statutory authority; or

c. Criminal penalties under 18 U.S.C. 286, 287, 1001, and 1002 (reference (bb)) or any other applicable statutory authority.

13. A statement that the employee may request a waiver of the overpayment of pay in accordance with 5 U.S.C. 5584 (reference (b)) (see paragraph 080306.).

14. A statement that amounts paid or deducted for the debt, which are later waived or found not to be owed to the U.S. Government, shall be refunded promptly to the employee upon his or her request.

15. The specific address to which all correspondence shall be directed regarding the debt.

B. The civilian payroll office is encouraged to notify an employee informally by telephone of an overpayment of \$100 or less. If an employee agrees with repayment of the overpayment, the civilian payroll office forwards a voluntary repayment agreement (see Figure 8-2) for the employee to complete and return. After receiving the signed voluntary repayment agreement, the civilian payroll office shall begin collecting the indebtedness as indicated on the agreement. If requested by the employee, and agreed to by the civilian payroll office, the remittance can be deferred for up to two pay periods with the agreement adjusted to reflect that deferral. If, for any reason, the civilian payroll office does not receive payment or a signed voluntary repayment agreement, the civilian payroll office prepares the formal written notification prescribed by subparagraph 080303.A.

080304. Inquiries and Reconsiderations

A. The civilian payroll office must respond courteously and factually to any questions raised by the employee as a result of his or her receipt of the demand letter. Copies of relevant documents requested by the employee must be furnished. The civilian payroll office must be prepared to respond not only to inquiries regarding pay and leave entitlements, but also to inquiries regarding the nature of the employee's rights and how to exercise these rights. Although

the submission by the employee of a written statement contesting the debt does not abrogate the employee's right to a hearing, all reasonable efforts shall be made to satisfy an employee's doubts regarding the amount or validity of the debt within the civilian payroll office's own resources, thus precluding the need for a hearing in most instances. If the employee requests reconsideration of the debt, the request shall be made within 15 days of receipt of the demand letter.

B. If the employee does submit a written statement contesting the debt, the civilian payroll office shall respond, in writing, stating its conclusion in a clear manner. Such determinations are to be delivered to the employee within 15 days of receipt of the employee's letter. If additional time is needed to investigate the issue, the employee shall be advised of the delay in an interim response. This response shall also provide an estimate of when a final determination can be expected. If the civilian payroll office concurs with the employee's position, the letter shall so inform the employee.

C. If the civilian payroll office's determination reaffirms the employee's indebtedness, then the written response again shall advise his or her of the employee's right either to petition for a hearing or to request a waiver. The time period for requesting a hearing (normally 30 days from notification) shall be extended by the time elapsed between the employee's written request for reconsideration and the civilian payroll office's response. For example, if the employee seeks reconsideration of the debt on the 12th day following receipt of the notification and the civilian payroll office reaffirmed the indebtedness 8 days later, the letter reaffirming the debt shall advise that a hearing request must be received within 18 days following the reaffirmation.

080305. Hearings. Hearings are a due process requirement of 5 U.S.C. 5514 (reference (b)) which must be afforded employees before their current salary can be involuntarily offset to collect an indebtedness to the U.S. Government. One exception relates to collections for debts for health benefits or life insurance coverage as discussed in paragraph 080302. Employees may petition for a hearing to contest the following items: (1) the existence of the debt; (2) the debt amount; and (3) the amount of an involuntary offset schedule. If an employee wants a hearing concerning the existence or amount of the debt or the proposed offset schedule, he or she must file a petition with the civilian payroll office not later than 30 days from the date that he or she received the notification of the intent to collect by salary offset or within 45 days after receipt of records, if such records were requested by the employee. The employee's petition or statement shall identify and explain with reasonable specificity and brevity the facts and evidence that he or she believes support his or her position.

A. General

★ 1. All hearings are arranged and conducted in accordance with 4 C.F.R. 102.3(c) (reference (ba)) and Volume 5 of this Regulation. Hearings for debts owed to any DoD Component by a DoD employees should be held by eligible DoD Components according to Volume 5, Table 30-1 of this Regulation. The Defense Debt and Claims Management Office of the DFAS-Denver Center shall process all requests for hearings. There are two basic types of hearings--oral hearings and administrative hearings (written submissions). If an employee petitions for a hearing after the receipt of a demand letter, the civilian payroll office must determine whether the

employee is entitled to an oral hearing or an administrative hearing (comprised of written submissions). Unless specifically waived by the employee, an oral hearing must be provided when:

- a. An applicable statute authorizes or requires the agency to consider waiver of the indebtedness involved, the employee requests waiver of the indebtedness and the waiver determination is based on an issue of credibility or veracity; or
- b. The employee requests reconsideration of the debt and the civilian payroll office decides that the question of the indebtedness cannot be resolved solely on review of the documentary evidence.

2. An oral hearing is not required if the particular indebtedness is of the type that rarely involves issues of credibility or veracity, and the civilian payroll office, with the concurrence of the DFAS Office of General Counsel, has determined that a review of the written record is generally adequate in such cases. An employee who has petitioned for a hearing, but under the above criteria is not entitled to an oral hearing, shall be provided an administrative hearing. The determinations of the hearing regarding the existence or amount of the debt or the terms of the offset schedule shall be made based on written submissions by the employee and the civilian payroll office. The timely filing of a petition for a hearing will stay the beginning of collection procedures until after the results of the hearing have been rendered except as identified in subparagraph 080201.C.

B. Oral Hearings

1. Since civilian payroll overpayments seldom present issues of credibility or veracity, the need for oral hearings under the guidelines contained in subparagraph 080305.A.1. will be extremely rare. When a civilian payroll office has received a petition for an oral hearing and it is of the opinion, with the concurrence of the DFAS Office of General Counsel, that an oral hearing is required under the criteria specified in subparagraph 080305.A.1, an official hearing should be arranged in accordance with the guidance outlined in Volume 5, Chapter 30 of this Regulation. Once the identity of the hearing official is determined, the civilian payroll office shall be instructed to make specific arrangements with that official, to include the identification of a fund cite for travel expenses if necessary.

2. In the case of oral hearings, the civilian payroll office is responsible for informing the employee that, in addition to the requirements contained in subparagraph 080305.C. for administrative hearings, the employee also must state in the petition the identity of the witnesses that will be called to testify on the employee's behalf and their anticipated testimony. The civilian payroll office advises the employee also to provide a copy of the records the employee intends to introduce at the hearing if they differ from the ones provided by the civilian payroll office. The civilian payroll office also advises the employee of the requirement for naming any person that he or she wishes to be represented by at the hearing.

3. The civilian payroll office is responsible for notifying the employee of the time, date, and location of the hearing. To the extent feasible, a location convenient for the

employee shall be selected. The employee will be responsible for paying his or her own travel expenses. Civilian payroll office personnel will represent the government at the oral hearing, and will maintain a summary record of the hearing. In addition, the civilian payroll office must advise both the hearing official and the employee of any witnesses it plans to call and a summary of its anticipated testimony. No later than 15 days prior to the hearing, the civilian payroll office also will provide the employee and the hearing officer a copy of the records in the agency's possession relating to the debt, .

4. If an employee has been granted an oral hearing, he or she may waive that right in favor of a written submission. Such an election must be made in writing and must be received by the civilian payroll office at least 3 working days before the original hearing date. If the employee fails to file a petition for a hearing before the deadline date, fails to file the required submissions, or fails to appear at a scheduled hearing, the right to a hearing is forfeited. The employee may petition the hearing official for a determination that the employee had good cause for the failure to comply with the established deadline date. If the employee fails to appear at the hearing, then he or she may petition the hearing official for a determination that the employee had good cause for failure to appear at the hearing. In either instance, the hearing official may then find that the employee has not waived the right, and may direct that a hearing be scheduled or rescheduled.

C. Administrative Hearings. An employee shall be advised to send his or her petition for a hearing directly to the civilian payroll office. A single document shall serve both as the petition for a hearing and the employee's complete, documented position as to why the he or she disagrees with the civilian payroll office regarding the existence of the debt or the amount of the debt. The precise contents of the petition are described in Figure 8-1 of attachment 1. There is no standardized format for these petitions. The civilian payroll office shall review all petitions. Petitions regarding erroneous overpayment shall include the information (in detail) as described by the checklist in Figure 8-3. If the civilian payroll office concurs with the employee's position, it will notify the employee in writing of its concurrence. If, after considering the statement and supporting documentation, the civilian payroll office reaffirms its previously stated position, it will prepare a letter indicating the reasons for its position. The letter, which will include the employee's petition as an enclosure, shall be submitted to the location identified in Volume 5, Table 30-1 of this Regulation. A copy of the submission shall be sent to the employee.

D. Determination

1. Within 60 days after the filing of the petition, the hearing official shall render a written decision on the merits of the hearing that discusses the basic facts offered and the hearing official's findings and conclusions. Both the civilian payroll office and the employee shall receive a copy of the determination. If the determination upholds the position of the civilian payroll office, that office shall recommence collection action after sending the employee a letter which states the following (see Figure 8-4 for a sample of the required letter):

- a. A brief statement of the hearing official's decision:

b. A request that the employee repay the debt in full within 15 calendar days following the date of the letter, authorize a voluntary one-time offset to repay the debt, or arrange an installment liquidation schedule with the civilian payroll office.

c. A statement that, unless the employee informs the civilian payroll office of his or her decision regarding the above options by the deadline indicated, a salary offset shall begin with the pay period in which the deadline expires. The letter shall be specific as to the payday on which the offset shall occur.

d. The amount of the offset and its estimated duration. This shall be equal to the amount of the debt, or 15 percent of the employee's disposable pay, whichever is less.

e. A statement regarding the assessment of interest, administrative expenses, and penalties.

f. A reminder of the employee's right to request waiver of the overpayment.

2. If the hearing official's determination upholds the employee's position as to the existence of the debt, the civilian payroll office shall inform the employee that the debt no longer is considered valid under 5 U.S.C. 5514 (reference (b)). The hearing official's decision is final as to the issue of involuntary offset, but not final as to the issue of whether the debt is owed. If the hearing official reduces the amount of the debt, the civilian payroll office shall issue a letter to inform the employee, and begin collection action for the new amount.

E. Hearings versus Reconsiderations. An employee who disputes the existence or amount of a debt has a right to request reconsideration and/or a hearing. Since hearings are a more formal and costly means of resolving these disputes, every effort shall be made to use the reconsideration right as an alternative to a hearing. The employee, however, has a statutory right to a hearing and must be granted this right whether or not the employee has attempted and failed to seek reconsideration of the debt. See paragraph 080304 for a discussion on reconsiderations.

080306. Waivers of Erroneous Payments of Pay and Allowances

★ A. General. Authority is provided by 5 U.S.C. 5584 (reference (b)) and 4 C.F.R. Parts 91 and 92 (reference (ba)) for the waiver of claims of the United States against a civilian employee arising out of an erroneous payment of pay or allowances made after June 30, 1960. The Comptroller General of the United States issued implementing standards authorizing the head of an executive agency to waive such claims in an amount aggregating not more than \$1500. The Under Secretary of Defense (Comptroller) has delegated this waiver authority to the Director, DFAS by memorandum dated January 29, 1992 (reference (k)). The DFAS Director redelegated this authority to the Director of the DFAS-Denver Center. The exercise of this authority shall be coordinated with the affected DoD Component, where appropriate. See DFAS Regulation Number 005 (reference (w)). The Defense Debt and Claims Management Office at the DFAS-Denver Center is exercising waiver authority within the Department except for the waiver authority that has

been delegated to the Director of DoDEA for DoDEA employees by DoD Directive 1342.20 (reference (bc)).

1. Under 4 C.F.R. 91.5 (reference (ba)), a waiver may be granted only when the collection would be against equity and good conscience and not in the best interests of the United States. Generally, these criteria will be met by a finding that the erroneous payment occurred through administrative error and there is no indication of fraud, misrepresentation, fault, or lack of good faith by the employee or any other person having an interest in obtaining a waiver of the claim.

2. Generally, a waiver is precluded when an employee or other person who has an interest in obtaining a waiver receives a significant unexplained increase in pay or allowances, or otherwise knows, or reasonably should know, that an erroneous payment has occurred, and fails to make inquiries or bring the matter to the attention of appropriate officials. A waiver under this standard depends upon the facts existing in each particular case. The Comptroller General, however, has long held that a waiver shall not be granted if it appears the employee had records (such as LESSs) which, if reviewed, would have indicated an overpayment, and the employee failed to review such documents for accuracy or otherwise failed to take corrective action. Such failure on the part of the employee renders the employee partially at fault. See Comp. Gen. B-253969, November 1, 1993 (reference (p)) and Comp. Gen. B-226465, March 23, 1988, (reference (p)).

3. Economic or financial considerations play no role in the determination of a waiver request.

★ 4. The Defense Office of Hearings and Appeals (DOHA) or the DFAS-Denver Center must receive application for waiver within 3 years from the date the erroneous payment was discovered. Date of discovery, for the purposes of starting the 3-year period, is the date that an appropriate official first determines that an erroneous payment has been made.

★ 5. The application for waiver shall be considered as the application for refund, and (if the claim is subsequently waived), the agency shall refund the amount collected to the employee. However, no refund shall be paid where the employee cannot reasonably be located within 2 years after the effective date of the waiver. See 4 C.F.R. 92.6 (reference (ba)).

★ B. Manner of Submission. Indebted employees shall be notified of overpayments of pay and allowances by the civilian payroll office. A copy of the waiver request instructions shall be included in the debt notification letter the civilian payroll office sends to the employee. The submission of waiver requests must be limited to cases in which all doubt regarding the validity or amount of a debt has been resolved. If an employee decides to apply for a waiver, he or she shall prepare an application for waiver of erroneous payments and send it to the civilian payroll office. The civilian payroll office shall provide additional information in the form of a written report containing a chronological summary of the facts and circumstances (4 C.F.R. 92.3) (reference (ba)), attach copies of pertinent records, and forward the complete package to the

Defense Debt and Claims Management Office of the DFAS-Denver Center, Attn: DFAS-DE/FYCT, 6760 East Irvington Place, Denver, CO 80279-7300.

C. Suspension of Collection. Collection of a debt should not routinely be suspended pending waiver determination per 4 C.F.R. 104.2(c)(2) (reference (ba)). The civilian payroll office shall determine in each case (per Comp. Gen. Decision B-185466, August 19, 1976) (reference (p)) whether suspension of collection would be appropriate based on the following criteria:

1. Waiver will probably be granted
2. Erroneous payment can be recovered if waiver is not granted
3. Collection of the debt would cause undue hardship.

D. Final Action

★ 1. After the waiver approval authority adjudicates the waiver, he or she will notify the civilian payroll office that submitted the waiver package. This notification authorizes refund of any amount collected and subsequently waived. The civilian payroll office is responsible for processing refunds. The application for waiver shall be construed as an application for a refund. The civilian payroll office must immediately refund any amount collected to the employee.

2. The civilian payroll office immediately shall initiate further collection action when informed of a waiver denial and collection action has been suspended.

★ 3. When waiver is denied, the notification of that decision to the claimant shall state the basis for that decision and that, upon request, the agency or department will forward an appeal to DOHA pursuant to 4 C.F.R. 92.2 (reference (ba)).

E. Action by the Designated Waiver Authority

1. General. The designated waiver authorities will:
 - a. Receive and review each request for waiver or application for refund and the associated reports for claims;
 - b. Make a determination as to whether claims aggregating not more than \$1500 will be waived or whether a claim in any amount will be denied; and
 - c. Notify the involved civilian payroll office of the determination.

★The DFAS-DE/FYCT also will notify the claimant of the determination.

★ 2. Referral Of Claims. The designated waiver authorities shall refer the following types of claims to the DOHA for decision:

 a. Requests for waiver and requests for waiver and refund that indicate favorable consideration, together with an appropriate reports of circumstances, if the claims of the United States is in an amount aggregating more than \$1500;

 b. All doubtful cases;

★ c. Claims, together with the reports of circumstances and recommendations, from civilian payroll offices for referral to the DOHA for litigation;

★ d. Appeals to waiver denials.

★ 080307. Collections Under 5 U.S.C. 5514. The Debt Collection Improvement Act of 1996 (P.L. 104-134 section 31001 (reference (e))), amended 5 U.S.C. 5514 (reference (b))). The procedures in this paragraph can apply at any stage of the debt collection process. The employee may elect to repay the debt after receiving the initial demand letter, after receiving a further explanation of the debt from the civilian payroll office, after a determination by a hearing official, or after a decision on a request for waiver of the overpayment. Repayment of the debt, subject to refund, can also be accomplished while any of the above actions are pending.

★ A. Collecting Overpayments Through Routine Pay Adjustments

★ 1. As of April 26, 1996, of the Debt Collection Improvement Act of 1996, section 31001 (reference (e)), amended 5 U.S.C. 5514 (reference (b))), relieving payroll offices from the requirement to give the full panoply of due process for the overpayment of pay and allowances due to routine intra-agency pay adjustments that have occurred within the four pay periods preceding the adjustment for any adjustments that amounts to \$50 or less or that are attributable to:

★ a. Clerical errors

★ b. Administrative errors

★ c. Delays in processing pay documents.

★ 2. The actual overpayment must have occurred after April 26, 1996, and the following streamlined due process procedures shall be implemented upon receipt retroactive to that date, if full due process had not already been extended to the employee.

★ 3. The provisions of 5 U.S.C. 5514(a)(1) (reference (b)) concerning the limitation of the amount that may be collected are still applicable to those adjustments no longer requiring full due process. Specifically, the amount deducted may not exceed 15 percent of disposable pay, unless you have the written consent of the individual. If the adjustment exceeds

15 percent of disposable pay, the initial adjustment may be for the full 15 percent and the remaining adjustment may be made during the next pay period(s).

★ 4. Intra-agency adjustments are defined as collection actions taken that result from overpayments caused by the DoD Components that are attributable to clerical or administrative errors or delays in processing pay documents that have occurred within the four pay periods preceding the adjustment. If a DoD employee's account is moved from one payroll office to another payroll office within the Department, the employee's new payroll office has authority to collect an overpayment made by the former payroll office using these procedures.

★ 5. Routine adjustments include but are not limited to overpayments due to corrected or late time and attendance data, SFs 50, and SFs 1190. Adjustments for health benefits and life insurance premiums made within four pay periods are already covered by 5 C.F.R. 550.1104(C) (reference (1)).

★ 6. Any adjustment of \$50 or less can be made under streamlined due process procedures. This pertains to any type of adjustment regardless of when the overpayment occurred. This includes adjustments of health benefits and life insurance premiums.

★ 7. The individual must be provided written notification by the payday for the pay period in which the adjustment is processed, or as soon thereafter as practical.

B. Voluntary Repayment

1. Cash Repayment. The term "cash repayment" encompasses payments by personal check, money order, or other negotiable instrument. The collection will be recorded on a DD Form 1131. The accounting data shall include the appropriation or fund that funded the overpayment.

2. Payroll Deductions

a. One-Time Deduction. If an employee voluntarily wants to have the indebtedness repaid, the civilian payroll office shall arrange for he or she to sign a completed agreement as shown in Figure 8-2. The civilian payroll office shall retain the original signed agreement. If requested by the employee, and agreed to by the civilian payroll office, the remittance can be deferred for up to two pay periods and the agreement changed to reflect that adjustment. Also, a one-time deduction can be combined with a cash payment as a means of liquidating an indebtedness. For example, a cash payment of \$200 and a one-time deduction of \$300 can liquidate a \$500 indebtedness. If the one-time deduction does not fully liquidate the deficit, the agreement accordingly should be adjusted.

b. Installment Deductions

(1) Employees may spread their repayments over more than 1 pay period for other than minor indebtedness amounts. Although employees are permitted to make a

series of cash payments at regularly established intervals; the preferred method of liquidation is by deductions each payday in the same amount until the indebtedness is liquidated. Any amount remaining unpaid at the time of separation or retirement will be collected from final payments of any nature, such as final salary payments, lump-sum leave, and bonuses. The employee consents to installment liquidation by signing an agreement such as illustrated in Figure 8-4. The civilian payroll office shall retain the original signed agreement.

(2) In determining a suitable repayment schedule, the civilian payroll office is permitted a certain degree of discretion. While the primary concern of the civilian payroll office always must be to ensure that the U.S. Government recovers the debt within the shortest practical period of time, this consideration must be influenced to some degree by the financial impact on the employee. The employee should not be required to suffer undue deprivation by having to repay the debt. On the other hand, some degree of sacrifice should be expected, and the employee's obligation to repay the debt should be given equal status to other financial obligations that the employee may have incurred. Generally, the debt should be at least 5 percent of the employee's disposable pay (defined in subparagraph 080307.B.2.) in order to qualify for installment liquidation. Installment payments will be at least \$25 per pay period and will be sufficient to liquidate the debt within 3 years.

C. Involuntary Repayment

1. General. Recovery of an indebtedness by involuntary salary offset is reserved for those instances in which the employee has failed either to make a cash remittance, authorize a voluntary one-time payroll deduction, or enter into an agreement with the civilian payroll office for installment deductions. Before executing an involuntary repayment, the civilian payroll office must ensure that the employee has been given a written statement required by paragraph 080303; and that the employee either failed to exercise the rights enumerated in the written statement or, having exercised one or more of those rights, was still determined to be indebted, and neither made a cash remittance nor authorized voluntary withholdings from his or her pay. The civilian payroll office shall ensure that such involuntary offsets, when warranted by the above circumstances, are initiated in time to be reflected in the pay for the pay period designated in the demand letter. When practical, the employee shall be notified on the LES that the offset action has been taken.

2. Disposable Pay. All involuntary offsets under 5 C.F.R. 550.1103 (reference (1)) and 5 U.S.C. 5514 (reference (b)) are limited to a maximum of 15 percent of the employee's disposable pay. Involuntary offsets shall normally be established at this maximum rate. Disposable pay is defined as that part of current pay remaining after the deduction from earnings of any amount required by law to be withheld. See 5 C.F.R. 581.105 (reference (1)). Disposable pay is computed by making the following deductions:

a. Amounts withheld for federal, state, or local income tax purposes, if the withholding of the amounts is authorized or required by law and if the amounts withheld are not greater than would be the case if the individual claimed all dependents as defined in the federal, state, and local tax codes, to which entitled. For computing disposable pay, no additional federal

tax amounts shall be deducted unless the employee presents evidence of a tax obligation supporting the additional deduction;

- b. Amounts withheld for Social Security and Medicare taxes;
- c. Amounts deducted as health insurance premiums;
- d. Amounts deducted as normal retirement contributions (CSRS, FERS, and NAF retirement) including TSP contributions. Amounts voluntarily contributed toward additional civil service annuity benefits are not included as normal retirement contributions; and
- e. Amounts deducted as health insurance and normal life insurance premiums from salary. This includes amounts deducted for basic FEGLI; however, all optional FEGLI premiums are not considered normal life insurance premiums.

3. Amounts Not Deductible When Determining Disposable Pay. The following amounts are not deductible when determining disposable pay:

- a. Existing debts being collected for a DoD Component or other federal agency including late payment charges.
- b. Court-ordered garnishments.
- c. Court judgments.
- d. Bankruptcy payments that are court-ordered under chapter 13 of the Revised Bankruptcy Act (reference (e)).
- e. Voluntary allotments for child support.
- f. Union dues deductions.
- g. Charity deductions.
- h. Savings bonds deductions.
- i. IRS federal tax levies.
- j. Savings allotments.
- k. TSP loans.
- l. Military Service Deposits.

4. Extreme Financial Hardship. An employee who does not contest the existence or amount of the debt may assert that the maximum allowable rate of involuntary offset (15 percent of disposable pay) imposes extreme financial hardship. Such an assertion can also be raised when the employee has petitioned for a hearing under the provisions of paragraph 080305, and the hearing official has affirmed the existence or amount of the debt. In either case, the civilian payroll office shall attempt to establish a satisfactory voluntary repayment schedule in accordance with subparagraph 080307.A.2.b.(2). Alternatively, although the employee may decline to sign a voluntary consent to offset, the two parties may agree to a reasonable rate of involuntary offset that is less than the maximum rate specified by this subparagraph. Occasionally, the employee and the civilian payroll office may be unable to agree on whether an involuntary offset produces extreme personal hardship. In making such a determination, the civilian payroll office shall use the following standards.

a. An offset produces an extreme financial hardship for an employee if the offset prevents the employee from meeting the costs necessarily incurred for essential subsistence expenses of the employee and the employee's spouse and dependents. These essential subsistence expenses include costs incurred for food, housing, necessary public utilities, clothing, transportation, and medical care.

b. In determining whether the offset would prevent the employee from meeting the essential subsistence expenses described above, the civilian payroll office shall consider the following:

(1) The income from all sources of the employee, the employee's spouse, and dependents;

(2) The extent to which the assets of the employee and the employee's spouse and dependents are available to meet the offset and the essential subsistence expenses;

(3) Whether these essential subsistence expenses have been minimized to the greatest extent possible;

(4) The extent to which the employee or the employee's spouse can borrow money to meet the offset and other essential expenses; and

(5) The extent to which the employee and the employee's spouse and dependents have other exceptional expenses that should be taken into account and whether these expenses have been minimized.

5. Employee Documentation. After applying the above set of criteria, the civilian payroll office shall explain the rationale for its decision to the employee. If the employee still contends that the rate of offset advocated by the civilian payroll office would produce an extreme financial hardship, the employee shall be instructed to provide the following items:

a. A petition for a hearing (see paragraph 080305). The employee must file the petition no later than 30 days from the date the demand letter is received that contains the intent to collect by salary offset. If the employee requests copies of the records relating to the debt, then the employee has within 45 days after receipt of such records to file the petition for a hearing;

b. A proposed alternative offset schedule with supporting documents showing why the civilian payroll office's schedule would produce an extreme financial hardship for the employee. The supporting documents shall include specific details concerning income and expenses of the employee, the employee's spouse, and dependents for 1 year preceding the initial demand letter; and projected income and expenses during the repayment period proposed by the civilian payroll office;

c. A copy of the records the employee intends to introduce at a hearing; and

d. In the case of oral hearings, a list of witnesses the employee intends to call and a summary of their anticipated testimony.

6. Civilian Payroll Office Response to Documentation. Upon receipt of the documentation in subparagraphs 080307.B.4. or 080307.B.5, the civilian payroll office may elect to accept the alternative amount proposed by the employee. If so, it shall inform the employee of that acceptance within 15 days from the date of receipt, and shall begin offset at the new reduced rate immediately. Otherwise, the civilian payroll office shall follow the provisions of paragraph 080305 whether to determining the type of hearing to be conducted and the submission of the required material. This submission must be accomplished no later than 15 days following receipt of the employee's petition and must contain the following information in addition to the materials submitted by the employee:

a. A statement setting forth the reasons why the civilian payroll office's proposed offset schedule does not produce an extreme financial hardship; and

b. In the case of oral hearings, a list of witnesses that the civilian payroll office intends to call at the hearing, and a summary of their anticipated testimony. The employee must also be furnished a copy of the above information. Pending the results of the hearing, the civilian payroll office shall begin offset at the rate stated in the employee's petition. The determination by the hearing official should be self-explanatory. If the employee's proposed rate is accepted, then the offset already in place shall be reduced.

080308. Interest, Penalties, and Administrative Costs

A. General. The preferred method of liquidating debts owed by employees or former employees is by cash remittance for the full amount of the debt prior to the due date expressed in the demand letter. Any debt or portion of a debt that remains unpaid by that date is subject to the assessment of interest and administrative expenses under 31 U.S.C. 3717 (reference

(d)), 4 C.F.R. 102.13 (reference (ba)), and 5 C.F.R. 550.1104(n) (reference (l)). Debts or the portion of debts that remain outstanding for more than 90 days following the due date are subject to penalties. The following subparagraphs discuss the computation of interest, penalties, and administrative costs, as well as circumstances under which such costs can be or should be waived. All collections for late payment charges (i.e., interest, penalties, and administrative costs) are deposited to the appropriate miscellaneous receipt account as follows:

1. Interest--3210 (General Fund Proprietary Receipts, Defense Military, Not Otherwise Classified)
2. Penalties--1099 (Fines, Penalties, and Forfeitures Not Otherwise Classified)
3. Administrative Costs--1099 (Fines, Penalties, and Forfeitures Not Otherwise Classified)

B. Interest. Under 31 U.S.C. 3717 (reference (d)), interest is accrued or assessed. The intent of interest is to stimulate prompt payment of debts and to recover the cost of the U.S. Treasury borrowing necessitated by unpaid debts. Any debt or portion of a debt that remains unpaid by the due date specified in the demand letter is subject to interest charges. Interest accrues from the date of the mailing or hand delivery of the demand letter that must contain a specific notice of the requirements concerning interest, penalties, and administrative costs, but automatically will be waived if paid within 30 days from the date of the letter. It is not necessary, therefore, to compute interest of less than 30 days. The rate of interest assessed will be the rate of the current value of funds to the U.S. Treasury. This rate is known as the "Treasury Tax and Loan Rate," and is prescribed and published by the Secretary of the Treasury annually or quarterly per 31 U.S.C. 3717 (reference (d)). This rate will be announced by the DFAS to all civilian payroll offices each time that the rate changes. Changes in the rate have no effect on those debts that began accruing interest under a previously existing rate. The rate of interest, as initially assessed, shall remain fixed for the duration of the indebtedness unless the repayment agreement is modified or nullified, in which case the rate in effect at the time of a new agreement will govern the remaining lifetime of the debt. For example, an initial demand letter issued in the month of September will state the interest rate in effect at that time, despite the knowledge that a new rate may be in effect when the debt becomes delinquent in October. The rate in effect in September shall then continue to be used for the lifetime of the debt. The amount of interest will be calculated by using the formula $I = DNF$. The I represents the amount of interest; D represents the principal amount of the debt; N represents the number of days in the computation period; and F represents the interest rate per day (365- or 366-day year). Interest should not be charged on interest, penalties, or administrative costs (4 C.F.R. 102.13(c)) (reference (ba)).

C. Administrative Costs. These costs relate only to delinquent debts as defined in 4 C.F.R. 101.2(b) (reference (ba)). They are assessed in order to cover expenses incurred in the recovery of these delinquent debts. A debt is delinquent if it has not been paid by the due date specified in the demand letter unless other satisfactory payment arrangements have been made by that date. A debt is delinquent any time thereafter an employee fails to satisfy obligations under a

payment agreement. The civilian payroll office, as the activity responsible for the collection of debts, either shall accumulate actual costs or conduct cost analyses that establish an average of additional costs incurred against delinquent debts. Such analyses shall be based on an aggregate of other DoD civilian payroll offices. Expenses shall be limited to personnel costs and specifically identifiable overhead items. The crucial factor is that the civilian payroll office must be able to justify its figures based on costs associated only with delinquent debts and apportioned over the number of delinquent debts. The recoupment of administrative expenses takes precedence over the collection of interest.

D. Penalties. A penalty of 6 percent a year shall be assessed on any debt or portion of a debt that is delinquent for more than 90 days under 31 U.S.C. 3717(c)(2) (reference (d)) and 4 C.F.R. 102.13(e) (reference (ba)). The charge need not be calculated until the 91st day of delinquency, but shall accrue from the date of delinquency. Thus, the initial penalty shall be for a 3-month period from the due date until 3 months after the due date. A debt is delinquent and subject to penalties if it has not been paid by the due date specified in the demand letter unless other satisfactory payment arrangements have been made by that date. A debt is delinquent any time thereafter an employee fails to satisfy obligations under a payment agreement.

E. Responsibility for Calculation. In the case of overpayments of pay, the civilian payroll office shall have the responsibility for computing interest, penalties, and administrative costs. The civilian payroll office always shall calculate administrative costs that arise from its own operation. The primary responsibility in connection with other forms of indebtedness rests with the activity or organization that has initial responsibility for the recovery of the debt. When transferring a debt to the civilian payroll office for salary offset purposes, that activity or organization shall inform the civilian payroll office of the following:

1. The principal amount of the debt
2. The interest accrued as of the date of referral
3. The administrative costs incurred as of the date of referral
4. The penalty assessed as of the date of referral
5. The interest rate applicable to the debt
6. The date of delinquency.

The transferring activity or organization also shall state its opinion as to whether further interest, penalties, and administrative costs should be waived.

F. Decisions Not to Accrue or Assess Interest, Penalties, and Administrative Costs

1. The official who has initial responsibility for the collection of a debt also has the responsibility for determining whether interest, penalties, and administrative costs are to be accrued or assessed. The debt collection official must use personal judgment in advancing the interests of the government, while giving proper consideration to the financial interests of the employee. Decisions not to accrue or assess late payment charges (i.e., interest, penalties, and/or administrative costs) are made on a case-by-case basis according to the following criteria:

a. When a debt is subject to waiver statutes and collection action is suspended pending outcome of the waiver, these charges shall not accrue or be assessed while the waiver request is being considered and finalized.

(1) Charges accrued before receipt of a waiver request shall not be assessed if the civilian payroll office receives the request within 30 days of mailing of the debt notice to the employee. The 30-day period is extended to 45 days if the debt notice goes through non-U.S. mail systems or is sent to an APO/FPO address.

(2) These charges shall not accrue or be assessed on any part of a debt principal balance that is waived.

(3) Charges shall again begin to accrue on any portion of the debt principal not waived from the date the employee is formally notified of the final waiver determination.

b. When an employee entitled to a hearing, petitions for a hearing, these charges shall not accrue from the date the petition is received until the employee formally is notified of the hearing decision. Charges that accrued before the petition for a hearing is received shall be assessed on that portion of the debt principal upheld by the decision of the hearing official.

c. When an employee is entitled to--and has petitioned for--a hearing, these charges shall not accrue or be assessed while a debt is being reconsidered.

d. When the debt of the employee arose under the tariff laws of the United States, the Social Security Act, or the Internal Revenue Code of 1954, these charges shall not accrue or be assessed.

e. When the civilian payroll office is requested to collect a debt for another DoD creditor organization or federal agency, these charges shall not accrue or be assessed by the civilian payroll office that accomplishes the collection for the other creditor organization or agency. Note that the creditor organization or agency requesting collection assistance has authority to accrue and assess applicable late payment charges and these charges should be included in the total amount identified for collection.

f. When an applicable statute or regulation prohibits application of these charges to the debt involved, no such charges shall not accrue or be assessed.

g. When these charges would not be in the best interest of the government, would cause extreme hardship, or if facts and circumstances indicate that charges accrued would not be collected per subparagraph 080308.G., no charges shall be assessed.

2. Blanket decisions not to accrue or assess late payment charges are not authorized. Documentation shall support every decision not to accrue or assess these charges. If there is documentation in the employee's debt file or associated with the debt transaction that clearly supports and explains the reason(s) for the decision not to accrue or assess these charges, no further documentation is required. An exception is the requirement in subparagraph 080308.F.1.g., above.

G. Decisions Not to Collect Interest, Penalty, and Administrative Costs. Once accrued and assessed, these charges normally shall be collected. A decision not to collect these charges, however, can be made on a case-by-case basis by the official who has the initial responsibility for the collection of the debt. The decision not to collect shall be documented and retained in the official debt file. Blanket decisions not to collect interest, penalty, or administrative charges are not authorized. The following are examples of when the civilian payroll office normally would decide not to collect these charges:

1. The amount of the debt principal is below the dollar limit imposed by regulation for write off.

2. The debt is paid within 30 days of notification. Interest shall not be collected on a debt or on any part of a debt paid within 30 days after the date interest began to accrue. The 30-day period can be extended for an additional 30 days on a case-by-case basis.

3. Collection of these charges would be against equity and good conscience or not in the best interest of the government; and

a. These charges accrued and were assessed on a debt principal balance that was incurred through no fault or lack of good faith on the part of the employee; or

b. Financial inability of the employee to pay the accrued and assessed charges within a reasonable period of time; or

c. The underlying debt principal balance has been waived by the appropriate authority or other administrative review process such as hearing or reconsideration has determined that it is not valid; or

d. Reasonable doubt exists concerning the government's ability to prove that charges are owed because of the issues involved or a bona fide dispute as to facts; or

e. The amount of charges that could be collected is less than the cost of collection; or

f. Reasonable efforts to locate the employee have been unsuccessful.

★ 080309. Collections From Final Salary and Lump-Sum Payments Under 31 U.S.C. 3716 (reference (d)), when an employee separates by resignation, retirement, death, or termination of appointment, final pay, including lump-sum leave, shall be applied in full or in part to the extent necessary to recover an indebtedness. Unpaid compensation due to deceased employees also shall be applied to the liquidation of any indebtedness. If a debt balance for a deceased employee remains after offsetting final pay, do not pursue collection from the employee's beneficiary. Forward the debt case to the Defense Debt and Claims Management Office of the DFAS-Denver Center. Other payments due from any source, such as amounts claimed for travel and transportation can also be applied. See 5 U.S.C. 5514(a)(1) (reference (b)), 4 C.F.R. 102.4 (reference (ba)), and 5 U.S.C. 5705 (reference (b)).

A. When an employee separates by resignation, retirement, death, or termination of appointment before collection of a debt is completed and collections against current salary are being made, either voluntarily or involuntarily under 5 U.S.C. 5514 (reference (b)), the 15 percent limitation on disposable pay does not apply (64 Comp. Gen. 907 (1985)) (reference (p)). Instead, apply final salary, including the amount payable for lump-sum leave, to the extent necessary to liquidate the debt.

B. When an employee separates by resignation, retirement, death, or termination of appointment, and there are no preceding collections being made from current salary under the authority of 5 U.S.C. 5514 (reference (b)), collection of the debt is treated as an administrative offset under 31 U.S.C. 3716 (reference (d)). All money payable to the employee may be applied to collect the debt. In these cases, employees must be provided written notification advising them of the following:

1. The fact that all final pay shall be applied to the unliquidated debt balance.
2. The reason for the debt and the debt amount.
3. An opportunity to inspect and copy the agency's records relating to the debt.
4. The rights available to the employee, such as reconsideration or waiver, and the time period (usually 30 calendar days) and the method for requesting these actions. The civilian payroll office is not required to provide the employee an opportunity for a hearing or administrative review as explained in paragraph 080305.
5. An opportunity to repay the full amount of the debt or enter into a written repayment agreement in lieu of offset from final pay.

C. Collection of an indebtedness from an employee's severance pay is permissible under 31 U.S.C. 3716 (reference (d)). Since this statute has no limit on the maximum rate of collection, all money due and payable to the employee by the government is subject to offset.

Since severance pay represents wages credited to the employee's account even if offset under 31 U.S.C. 3716 (reference (d)), compute the deductions to be taken from severance pay before offset. Tax statements should be prepared in accordance with the rules set out in Revenue Ruling 79-311, 1979-2 Cumulative Bulletin 25 (reference (d)). It is the net amount that is available for administrative offset under 31 U.S.C. 3716 (reference (d)). In addition, under 5 C.F.R. 581.103 (reference (l)), severance pay is subject to court-ordered garnishments (for alimony, child support, and commercial debts).

D. Offset under 31 U.S.C. 3716 (reference (d)) may not be used to collect debts for state and local governments or debts arising from payments made under the Social Security Act (reference (ad)), the Internal Revenue Code (reference (ad)), or the tariff laws of the United States. See 31 U.S.C. 3716(c)(2) (reference (d)).

080310. Refunds. When, at any point in the debt collection process, the debt is waived or successfully reconsidered or otherwise found not to be due the United States (unless expressly prohibited by statute or regulation), a prompt refund shall be made of all amounts collected prior to that determination. A refund shall also be made if directed by an administrative or judicial order. Amounts of valid debts collected improperly shall be refunded if requested by the employee. For example, if collections exceeding 15 percent of disposable pay were made due to an error in the computation of disposable pay, the employee may request and receive a refund of the difference between the amounts collected and the amounts that were properly withheld. Refunds shall not be made under any other circumstances. Refunds shall not bear interest, but interest already collected may be refunded along with the principal amount.

0804 RECOVERY OF OVERPAYMENTS OF PAY AND ALLOWANCES FROM TRANSFERRED OR FORMER DOD EMPLOYEES

080401. General. The instructions contained in this paragraph apply regardless of the point in the debt collection cycle when separation occurs. For example, the employee may separate while installment liquidations are taking place, while a waiver request is being considered, while a petition for a hearing is pending, or while the written demand letter is being prepared. If, due to subsequent events, the indebtedness is nullified, a refund shall be made for amounts withheld from both current and final pay. These refunds shall be made without requiring a claim from the former employee. Unfinished actions shall be terminated in the case of hearings regarding the amounts of involuntary offsets. All other actions shall continue.

080402. Transfer Within the Department that Results in a Change of Civilian Payroll Office

A. In accordance with 5 C.F.R. 550.1108 (reference (l)), the losing civilian payroll office shall advise the gaining civilian payroll office by letter of the following information:

1. The identity of the indebted employee,

2. The amount of the debt, including assessments of interest, penalties, and administrative expenses, when appropriate,
3. The accounting classification for credit,
4. The nature of the debt, and the original due date (generally 30 days from the initial demand letter),
5. Copies of all correspondence sent to, or received from, the employee, including waiver requests, hearing petitions, decisions on waiver requests, and determinations of hearing officials,
6. The original of any voluntary pay offset authorizations. If none exists, a statement of the biweekly percentage of involuntary offsets must be included,
7. The date the right to collect the debt first occurred. Generally this is the date the overpayment occurred. However, if offset has already begun, the date of the last offset shall be given;
8. A statement regarding the status of any unfinished actions which may be pending. When such action is completed, the gaining civilian payroll office will be advised immediately,
9. A request that the offset be accomplished or continued.
10. A copy of DD Form 2481 (Request for Recovery of Debt Due the United States by Salary Offset) properly completed and certified.

B. Upon receipt of the above information, the gaining civilian payroll office shall assume full responsibility for collection of the debt pending receipt of previously unfinished actions as indicated in subparagraph 080402.A.8. Any agreements reached regarding periodic installment repayments or the decision not to accrue or assess interest, penalties, and administrative expenses (see paragraph 080308) shall be binding on the gaining civilian payroll office. If the debt is subject to interest, the gaining civilian payroll office shall make the necessary computations. Installment deductions already begun shall continue uninterrupted.

★ 080403. Transfer to Another Government Agency. When an employee transfers to another federal agency outside the Department, forward the debt case to the Defense Debt and Claims Management Office, DFAS-Denver Center, for collection.

080404. Recovery from Retirement Funds

A. Action by the Civilian Payroll Office

1. General. If the amounts withheld from the sources described in

paragraph 080309. still are inadequate to satisfy the indebtedness, the civilian payroll office shall apply to the OPM for moneys that are due and payable to the separated employee from the Civil Service Retirement and Disability Fund or FERS basic benefits. The procedures in this subparagraph apply only when the former employee has been provided the due process rights enumerated in section 0803. See 5 C.F.R. 831.1801-831.1808 (reference (1)) and 5 C.F.R. 845.401-845.408 (reference (1)).

2. Scope. The procedures contained in this subparagraph apply to all debts that the civilian payroll office was collecting on behalf of the Department with the exception of debts resulting from an individual's failure to pay health benefit premiums while he or she was in a nonpay status or while his or her salary was not sufficient to cover the cost of premiums. These procedures are covered in 5 C.F.R. 845.405(b)(4)(i) (reference (1)).

3. Notice to the Employee. Immediately prior to sending a debt claim to the OPM, the civilian payroll office shall notify the employee in writing that the claim is being sent for offset against the Civil Service Retirement and Disability Fund or FERS basic benefits. The letter shall state the amount of the debt at separation, the amount recouped from final pay and other sources, and the balance due. The letter also shall inform the employee that if he or she makes full payment of the unrecouped portion, the claim shall be dropped. Subparagraph 080307.A.2.b. contains general guidance regarding the acceptability of repayment offers. Only in the rarest of cases should the installment period exceed 3 years. It is preferable, but not essential, that an agreement be reached prior to submission of the claim. In the absence of an agreement, a decision shall be made based on the facts available, and the decision communicated on the claim. See 5 C.F.R. 845.401-845.408 (reference (1)).

4. Submission of Claims to the OPM. Claims shall be submitted to the OPM in accordance with 5 C.F.R. 845.405(b)(5) (reference (1)).

a. Complete Claims. Claims shall be made on an SF 2805 (Request for Recovery of Debt Due the United States) which will be prepared in duplicate. Submission will be made to the Office of Personnel Management, Retirement and Insurance Group, Employee Service and Records Center, Boyers, PA 16017. Attach a copy of the employee notification (prepared in accordance with subparagraph 080404.A.3.) and two copies of the following signed certification to the SF 2805:

(1) A statement that the debt is owed to the United States;

(2) The amount and reason for the debt and whether additional interest accrues. Refer to paragraph 080308. Note that for those debts that are subject to interest beyond that already calculated, the civilian payroll office must advise the OPM of the dollar value of the additional accrual;

(3) The date the government's right to collect the debt first accrued;

(4) A statement that the civilian payroll office has complied with the applicable statutes, regulations, and the OPM procedures;

(5) A promise that if a competent administrative or judicial authority issues an order directing the OPM to pay the employee an amount previously paid to the Department (regardless of the reasons behind the order), the Department shall reimburse the OPM or pay the employee directly within 15 days of the date of the order;

(6) A listing by date of actions taken pursuant to section 0803. Copies of the correspondence are not required.

The OPM is aware that civilian payroll offices will not be able to obtain the employee's consent to the collection in every case; therefore, such claims from civilian payroll offices shall be honored upon receipt of the civilian payroll office's certification. Every attempt to obtain the employee's consent should be made, however, when the process has resulted in a compromised amount (an amount less than the total debt) or, in the case of an annuitant, a specific monthly installment is agreed upon.

b. Incomplete Claims. Occasionally, a separation may occur before due process procedures or the actions in paragraph 080309 have been completed. In other instances, the civilian payroll office may be required to submit the indebted employee's SF 2806/3100 before the proper amount of offset from the employee's monthly annuity has been determined. In such cases, it must notify the OPM in order to prevent payment to the employee. This is particularly important when the employee is entitled to a refund of his or her contributions. Notification shall be effected by a remark in Column 8 of the SF 2806/3100. The SF 2806/3100 shall be accompanied by a statement that the debt is owed to the United States, the date the debt first occurred, and the basis for and amount of the debt.

★ 5. Transfer of Debt Case. Once the SF 2805 has been sent to the OPM, the debt shall be transferred to the Defense Debt and Claims Management Office, DFAS-Denver Center, in accordance with paragraph 080405.

B. Action by the OPM

1. Refunds

a. Complete Claims. If a refund already has been paid, the civilian payroll office submitting the SF 2805 shall be advised that no moneys are available for application against the indebtedness. If the employee's application has been received, but not yet processed at the time a complete claim is received, the OPM shall honor the claim and make remittance to the civilian payroll office. If the employee has not applied for a refund, the civilian payroll office shall be advised that its claim will be retained pending a future application. If the application is received more than 1 year following the date of the SF 2805, the civilian payroll office shall be contacted to verify that the debt is still current. If the debt has been transferred per paragraph 080405, the civilian payroll office shall refer such inquiries to the gaining office. If the civilian payroll office

has not yet transferred the debt, but has still not made full collection, it must contact the employee to provide him or her the opportunity to establish whether his or her changed financial circumstances would make the offset unjust. A decision whether to pursue the offset or to attempt collection by other means shall be made based on the employee's response. As a general rule, the offset shall be pursued unless the success of alternative collection action is relatively certain.

b. Incomplete Claims. If the employee has filed an application for a refund, the civilian payroll office shall be notified. It will be given 120 days from the date of notification to furnish a complete claim. This deadline may be extended by an additional 60 days if the civilian payroll office so requests. Failure to meet the deadline or extended deadline, if applicable, shall result in payment to the employee from the employee's retirement funds.

2. Annuities

a. Complete Claims. When possible, the OPM will make a one-time offset against the retiree's annuity payment in accordance with 5 C.F.R. 845.407 (reference (I)). Installment deductions are required, however, if liquidation of the debt would require offset of more than 50 percent of the retiree's net monthly annuity. All installment deductions should ensure liquidation within 3 years. For debts that are subject to continuing interest payments (see paragraph 080308), the OPM must be advised of the new amount of the debt at least 90 days prior to the final payment. Whether the debt is repaid by one-time offset or by installment deductions, the OPM will begin the process for the next available annuity payment following its receipt of the completed claim. If the monthly annuity payment has not yet been established, offset will begin with the first regular annuity payment. Offsets shall not be made against advance annuity payments. As in the case of refunds, offsets are dependent on the receipt by the OPM of an application by the retiree. SFs 2805 received in advance of applications shall be retained pending receipt of the applications. If any application is received more than 1 year following receipt of the SF 2805, the OPM will contact the civilian payroll office in order to determine the current status of the debt. If the civilian payroll office has transferred the debt in accordance with paragraph 080405, the inquiry will be referred to the gaining office for response. If the debt has not been transferred, see subparagraph 080404.B.1.a. for the requirement to determine whether the retiree's changed financial conditions would make the offset unjust.

b. Incomplete Claims. Unlike the situation that prevails in the case of refunds, the OPM processing of annuity applications shall not be affected by receipt of an incomplete claim from the civilian payroll office. When such a claim is received, the civilian payroll office will be advised to complete the procedures necessary to file a completed claim.

080405. Post Separation Recovery Actions

★ A. Debts of personnel who are not current DoD employees shall be transferred to the Defense Debt and Claims Management Office, DFAS-Denver Center, in accordance with established procedures. All transfers shall include the following:

1. The employee's full name and SSN

2. The employee's last known mailing address
3. The date of the employee's separation/retirement
4. The amount of the debt including principal, interest, penalties, and administrative costs
5. Copies of all correspondence related to the case
6. The accounting classification for credit, including amounts for interest, penalties, and administrative expenses when applicable
7. The date the debt was originally due, as stated in the demand letter.

★ B. For out-of-service debts collected by the Defense Debt and Claims Management Office, DFAS-Denver Center, pertinent data shall be provided to the civilian payroll office to affect the necessary changes (i.e., SF 2812, SF 2806/3100, Form W-2, Form 941, etc.).

0805 RECOVERY OF OTHER DOD DEBTS

080501. General. The civilian payroll office is responsible for providing the required debt notification to the employee before collecting an overpayment of pay and allowances paid by the civilian payroll office under 5 C.F.R. 550.1108 (reference (l)). Other creditor organizations (such as employing agencies) and functional areas outside civilian pay also must certify completion of due process requirements to the civilian payroll office when requesting involuntary salary offset to collect a debt that originated outside the civilian payroll office. In general, the civilian payroll office shall not question the merits of debts originating outside the payroll office.

080502. Collections of Unearned Advance Per Diem and Mileage Allowance and Unearned Temporary Quarters Subsistence Expense

A. Under 5 U.S.C. 5705 (reference (b)), a federal employee who is entitled to per diem or mileage allowances may receive a travel advance. Any amounts of the travel advance that are not used for allowable expenses are required to be collected. The travel functional area gives the employee an immediate opportunity to pay the amount due. If immediate payment is not made, offset may be made against all accrued pay, retirement credit, or any other amounts due the employee, without limitation, as long as the offset does not cause extreme financial hardship. For purposes of this paragraph, the guidance on extreme financial hardship, as discussed in Volume 5, paragraph 300208 of this Regulation, generally applies. The civilian payroll office is notified in writing of these debts. A copy of the employee's signed repayment agreement is sent to the civilian payroll office, when applicable.

B. The debt shall be collected in one lump-sum or in installments in accordance with the employee's signed voluntary repayment agreement or written instructions provided by the travel functional area or the employing activity.

080503. Overpayment of Travel Allowances. Salary offset is authorized subject to the limitations of up to 15 percent of disposable pay (see subparagraph 080307.B.2.) for debts owed for an overpayment of travel allowances. An official must certify to the civilian payroll office on DD Form 2481 that due process has been performed under 5 U.S.C. 5514 (reference (b)) or other applicable regulation.

★ 080504. Excess Costs Due to Shipment of Personal Property. A debt for excess cost is created when an employee's shipment of personal property exceeds the authorized weight allowance. If an employee has excess cost, a DD Form 2481 is received by the employee's civilian payroll office to make collection under 5 U.S.C. 5724(a)(2) (reference (b)). The collection of such excess costs from an employee's pay record is considered a voluntary offset, since the employee signs DD Form 1299 (Application for Shipment and/or Storage of Personal Property) before the actual shipment of the property, agreeing to repay excess costs caused by the personal property shipment.

A. Upon receipt of the DD Form 2481, the civilian payroll office notifies the employee of the indebtedness. The employee has 30 days to submit a reconsideration letter, make a cash payment, or make arrangements for a voluntary repayment plan through payroll deduction.

B. An employee may submit a reconsideration letter when he or she believes the excess cost charges are incorrect. The employee forwards such letter to his or her employing activity's transportation management representative.

C. After the adjudication of the reconsideration letter, the civilian payroll office is notified to begin collection of any balance due. While there is no limitation on the amount that can be withheld under such a voluntary offset, the civilian payroll office shall determine a repayment schedule that protects both the government's and the employee's financial interests.

080505. Collection of Employee Training Expenses. When an employee fails to fulfill a training agreement and he or she voluntarily does not repay the employing activity, collection of training expenses from the employee's pay account is authorized under 5 U.S.C. 4108 (reference (b)). In accordance with 5 C.F.R. 410.509 (reference (l)), the employing activity must give the employee the opportunity to request a reconsideration of the amount to be recovered or to appeal for a waiver of the activity's right to recover.

A. Documents required to support this type of collection are:

1. A copy of DD Form 1556 (Request, Authorization, Agreement, Certification of Training and Reimbursement) showing the employee's signed consent to the terms of the training agreement.

2. A copy of at least one demand letter to the employee by the training office that pursued voluntary repayment of the training costs.

B. The civilian payroll office forwards a copy of the document identified in subparagraph 080505.A. to the employee with written notification advising the employee of the payroll deduction amount and the pay period deduction will start.

★ 080506. Collection For Reports of Survey (also known as Government Property Lost or Damaged) Debts. Report of survey channels, as prescribed in the cognizant DoD Component regulations, must be exhausted before involuntary salary offset under 5 U.S.C. 5514 (reference (b)) is invoked. Collection by the payroll office will be initiated upon receipt of the DD Form 2481. Collections received from employees are credited to the receipt account established for recoveries of government property lost or damaged. If the property is either stock or industrial funds, however, the collections are credited to that appropriate fund.

080507. Unofficial Telephone Use. When directed by the telephone officer and subject to the telephone officer's certification on DD Form 2481 that due process has been performed under 5 U.S.C. 5514 (reference (b)) or other applicable regulation, the civilian payroll office will effect salary offset from employees who have incurred liability for unofficial use of government telephones. Offsets are subject to the limitations of up to 15 percent of disposable pay (see subparagraph 080307.B.2.).

080508. Hospital Bills. Salary offset is authorized subject to the limitations of up to 15 percent of disposable pay (see subparagraph 080307.B.2.) for debts owed to DoD Component hospitals. An official designated by the hospital must certify to the civilian payroll office on a DD Form 2481 that due process has been performed under 5 U.S.C. 5514 (reference (b)) or other applicable regulation.

080509. Commissary Stores. Subject to the limitations of up to 15 percent of disposable pay (see subparagraph 080307.B.2.) and under a certification of due process on a DD Form 2481 by an appropriate official of the commissary store, salary offset will be initiated in the case of employees who are indebted to the Defense Commissary Agency for reasons such as having issued dishonored personal checks.

080510. Court Fees. Under certain circumstances, employees refund fees received from a court for service as a juror or a witness (see section 0513). Table 5-4 provides guidance on absences of employees and retention of fees in connection with court leave. Fees can be collected by cash refund or by payroll deduction. See Comp. Gen. B-179161, August 29, 1973 (reference (p)) and Comp. Gen. B-219496, January 22, 1986 (reference (p)). Under 5 U.S.C. 5515 (reference (b)), collected fees are to be refunded to the appropriation or fund from which the employee is paid.

080511. Double Negotiation of U.S. Treasury Checks. The negotiation of an original check that has been replaced by a recertified check is considered to be an illegal, incorrect, or improper payment for purposes of pecuniary liability. The disbursing officer that issues the duplicate payment is responsible for collection of such payments from a payee. The disbursing

officer shall give the payee an opportunity to dispute whether the payee actually endorsed both instruments and that the payee consents to a full one-time salary offset. Upon receiving the signed statement from the disbursing officer, together with evidence that negotiation of both instruments has occurred, the civilian payroll office will inform the employee that the amount of the indebtedness will be deducted in full from the next salary payment. The disbursing officer shall provide direction as to how the proceeds are to be applied. If, for any reason, the disbursing officer cannot produce a written consent from the employee, the civilian payroll office must treat the case as an overpayment, and initiate the written demand letter required by paragraph 080303. If the employee does not authorize voluntary deductions, involuntary deductions will be made under 5 U.S.C. 5514 (reference (b)) provisions at the maximum rate of 15 percent of disposable pay after the required due process procedures have been fulfilled. Interest shall be assessed per paragraph 080308.

080512. Military Pay of Reserve or National Guard Members For Duty To Aid Law Enforcement

A. Under the provisions of 5 U.S.C. 5519 and 6323(b) and (c) (reference (b)), an employee's civilian pay is reduced by the gross military pay and allowances (other than travel, transportation, or per diem allowance) received by the employee for military service as a member of the Reserve or National Guard for which the employee is entitled to leave under 5 U.S.C. 6323(c) (reference (b)) for duty to provide military aid to enforce the law for the purpose of providing assistance to civil authorities in the protection of life or property or the prevention of injury, and for parades or encampments under Title 39, District of Columbia Code (reference (aq)). This applies whether payment for military service was paid from federal or state funds. Deduct for income tax withholding, Social Security and/or Medicare, or retirement based on the resulting balance. Do not reduce the civilian pay by the military pay received for service on nonworkdays.

B. The civilian payroll office shall accomplish the reduction of an employee's civilian pay as described in subparagraph 080512.A., above, by cash collection or by payroll deduction. The civilian payroll office is encouraged to notify the employee informally by telephone of the requirement of 5 U.S.C. 5519 (reference (b)).

C. Credit the collection to the appropriation from which the employee's civilian pay was paid.

D. Specific information as to the military pay entitlement of the employee should be obtained from the military organization concerned if the employee is unable to produce specific and documented information from which the civilian pay reduction may be determined.

★ 080513. Collection of Dishonored Personal Checks. Collection of dishonored personal checks shall be made in accordance with Chapter 4 of Volume 5 of this Regulation.

0806 SALARY OFFSET REQUESTS FROM NON-DOD FEDERAL AGENCIES

080601. General

★ A. When non-DoD federal agencies (except IRS and U.S. Courts (see sections 0417 and 0807)) identify DoD employees as having outstanding debts, those agencies shall address their salary offset requests to the Secretary of Defense designee, i.e., the DFAS-Cleveland Center, 1240 East 9th Street, Cleveland, OH 44199. These requests shall certify that due process rights have been afforded to the indebted employees by the non-DoD federal creditor agency. After these requests for salary offset are approved by the DFAS-Cleveland Center and the payroll office of the employee is located, the DFAS-Cleveland Center shall forward the approved request to the civilian payroll office that maintains the employee's pay account.

B. Some creditor agencies may elect to inform the employee of the anticipated amount of the offset prior to certification of due process. Civilian payroll offices shall cooperate with creditor agencies that inquire as to the amount of an employee's disposable pay.

C. Although most debts collected through this program have incurred interest, administrative expenses, or penalties, calculations of the debt amount shall be performed only by the creditor agencies. Therefore, the creditor agency may adjust the originally certified debt amount to include interest that has accrued since the initial certification. In this event, the creditor agency shall recertify the debt amount using the same procedure as the original debt certification.

★ D. The Department may not honor a request to collect a debt by salary offset that first accrued more than 10 years prior to the request, except as set forth in the Federal Claims Collection Standards, 4 C.F.R. Parts 101-105 (reference (ba)).

★ E. Requests from non-DoD federal creditor agencies that are sent to the civilian payroll office directly, i.e., without going through DFAS-CL and DMDC, shall be returned without action. The civilian payroll office shall inform the non-DoD federal agency of the correct procedures as outlined in this section.

★ F. The debt collections will begin the next officially established pay period.

G. The National Security Agency (NSA) shall work with the DMDC to accomplish matches for NSA, Defense Intelligence Agency, and Central Imagery Office personnel. These matches shall be conducted at the NSA Headquarters.

★ 080602. Processing Actions. Upon receipt of the salary offset request from the DFAS-CL, the civilian payroll office:

A. Computes 15 percent of the employee's disposable pay or a lesser percentage dictated by the creditor agency. See subparagraph 080307.B.2.

★ B. Notifies the employee in writing of the amount of the salary offset and the pay period when salary offset will start.

C. Processes the payroll deduction in accordance with payroll system user instructions.

D. Receives from the employee and forwards to the creditor agency proof that the debt is paid in full, discharged under bankruptcy, or voluntary payments are current under a negotiated repayment schedule. The civilian payroll office also advises the employee to resolve the debt issue directly with the creditor agency so that DFAS-CL is officially notified that the debt has been canceled. If the employee produces compelling documents (e.g., canceled checks, receipts, or letters from the creditor agency) which indicate the debt is no longer valid, offset should be suspended pending reverification or official termination by the creditor agency.

E. Forwards payment each pay period to the creditor agency along with a report of each collection made. See subparagraph 090203.G.1. for guidance on preparing this report.

★ F. Sends a biweekly report of collections on delinquent debts for non-DoD federal agencies to the DFAS-CL. See subparagraph 090203.G.2. for guidance on preparing this report.

G. Ensures that the total amount collected is reflected on the civilian payroll voucher as salary offsets for the creditor agency.

080603. Transferred Employees

A. When an employee transfers to another DoD payroll office before collection of the debt is completed, the losing civilian payroll office:

1. Forwards a copy of the original debt notification document to the gaining civilian payroll office;

2. Certifies the amount collected prior to the employee's transfer on the original debt notification document and the remaining unliquidated amount of the debt. One copy of the certification letter must be furnished to the employee, another to the creditor agency; and

★ 3. Notifies the DFAS-CL of the date the employee transferred, the amount collected prior to the transfer, and the new payroll office name (if known).

B. The gaining DoD civilian payroll office continues salary offset upon receipt of the documentation forwarded by the losing DoD civilian payroll office. The amount of the salary offset should be recomputed in accordance with subparagraph 080601.C.

C. When an employee transfers to a non-DoD agency before collection of the debt is completed, the losing civilian payroll office shall follow the guidance in paragraph 080604.

★ 080604. Separated Employees. When an employee separates before collection of the debt is completed, final pay, including lump-sum leave and awards shall be applied in full or in part

to the extent necessary to recover the debt. The losing civilian payroll office shall notify the creditor agency and DFAS-CL of the date the employee separated, the amount collected prior to the separation date, and the new employing agency (if known).

0807 RECOVERY OF COURT-ORDERED INDEBTEDNESS

080701. Judgment Offsets. When a court of the United States, in an action or suit brought against a federal employee by the United States, determines that the employee is indebted to the United States and enters a judgment against the employee, section 124 of P.L. 97-276 (reference (e)) published as a note to 5 U.S.C. 5514 (reference (b)), allows collection of the debt by deduction from the employee's current pay account. The employee's consent is not required. Any federal agency requesting salary offset under Section 124 of P.L. 97-276 (reference (e)) shall send a letter requisitioning offset to the civilian payroll office with an attested copy attached of the judgment entered against the employee. If there is concern as to the validity or interpretation of the judgment, the DFAS General Counsel shall review the judgment. After the validity or interpretation of the judgment is confirmed, the civilian payroll office:

A. Computes the amount collected each pay period using the percentage specified in the offset request. The maximum amount deducted for a pay period may not exceed 25 percent of the employee's disposable pay unless a greater percentage is necessary to recover the amount owed within the time of the anticipated employment. See subparagraph 080307.B.2. for computing disposable pay. Deductions may be made from basic pay, or in the case of an individual not entitled to basic pay, other authorized pay.

B. Collects the total unpaid balance as specified in the offset request. This amount may include accumulated interest and administrative charges. The agency requesting offset should notify the civilian payroll office approximately 90 days before completion of the judgment offset with the final judgment amount which include the balance of accrued interest charges.

C. Forwards a copy of the offset request to the employee with written notification advising the employee of the deduction amount and pay period the deduction will start.

D. Applies final pay (salary and lump sum leave) to any unliquidated debt balance as provided by 31 U.S.C. 3716 (reference (d)) if the employee retires, resigns, dies, or if employment otherwise ends.

E. Forwards payment each pay period to the agency requesting salary offset.

080702. Garnishments

A. Authority. Title 42, United States Code, section 659 (reference (ae)) provides consent by the United States to garnishment and similar proceedings for enforcement of child support and alimony obligations against civilian employees. P.L. 103-94 (reference (e)) authorizes the garnishment of civilian employees' pay for commercial debts.

B. Procedures

1. For garnishments for child support and alimony, the commanding officer or his or her designated representative shall notify the employee of the garnishment or attachment order and its effect on his or her pay and shall forward the court order to the civilian payroll office after the order is determined to be valid by qualified legal counsel. If the activity is served with more than one garnishment order with respect to the same pay due or payable to any employee, then such pay shall be available to satisfy the court order on a first-come, first-served basis. See section 0412 for processing garnishment collections.

2. All federal employees with an outstanding debt are subject to garnishment for commercial debts. A court order from a state court is required prior to the garnishment becoming effective. See section 0412 for procedures for processing garnishment collections.

080703. Debtors Involved In Bankruptcy Proceedings

A. Wage Earner's Plan Cases. Except in cases of court-ordered child support and/or alimony as provided by 42 U.S.C. 659 (reference (ae)), civilian employees (wage earners) cannot be deprived of their pay by any civil process of attachment or levy. Federal employees may, however, file for bankruptcy under the provisions of 11 U.S.C., Chapter 13 (reference (af)) (the so-called "wage earner's plan").

1. Under Chapter 13, an employee must submit a plan to the bankruptcy court that provides, among other things, that all or such portion of future income as is necessary to pay priority claims under the plan, must be submitted to the control of the bankruptcy trustee. Once the bankruptcy court confirms a plan, it may order any employer to pay all or part of an employee's future income to the trustee named in the order. A separate check is authorized to meet the terms of the order. Sometimes, the wage earner's name appears as payee on the check with the address of the trustee (11 U.S.C. 1322 and 1325) (reference (af)). Normally, however, the check is made payable to the trustee.

2. In cases when doubt exists as to the validity or the interpretation (including the determination of amounts to be paid to a trustee) of the court order, the DFAS Deputy General Counsel reviews the wage earner's plan court order before processing.

3. Process the collection in accordance with the instructions in the court order.

B. Bankruptcy Proceedings. The civilian payroll office notifies the Office of the DFAS General Counsel immediately upon becoming aware that a civilian employee owing money to a DoD Component, is initiating bankruptcy proceedings. The notification must be prompt to ensure that a claim is filed within statutory time limitations.

0808 CORRECTIONS

080801. Corrections due to errors and cancellation of paychecks are outlined in Table 8-1.

080802. Corrections for Underpayment of Earnings. For active or separated employees, there is no distinction between payment for a current or prior calendar year. The adjusting payment is reported as wages at the time it is made. No correction on Form 941 is required. Form W-2 for the current year shall show corrections for underpayments as outlined in Table 8-1.

A. For active employees, the civilian payroll office shall:

1. Process the payment in the next regular biweekly pay cycle
2. Report the gross wages subject to Social Security/Medicare taxes withheld as current quarterly earnings on Form 941
3. Include the earnings and Social Security/Medicare taxes withheld on the Form W-2 for the current year.

B. For separated employees, the civilian payroll office shall:

1. Reestablish the employee on the payroll and process the payment in the current biweekly pay cycle
2. Follow the procedures in subparagraph 080802.A
3. Prepare Form W-2c if a Form W-2 was issued.

080803. Corrections for Overpayment of Earnings in the Current Year

A. For active employees, the civilian payroll office shall:

1. Instruct the employee to refund the overpayment in accordance with due process procedures.
2. Record the amount as a reversal in the base pay, gross pay, net pay or other pay as applicable, after receipt of the refund or returned check from the employee, the civilian payroll office.

B. For separated employees, the civilian payroll office shall follow debt collection procedures as outlined in Volume 5 of this Regulation.

1. Reestablish the employee on the payroll and process the reversals in the current biweekly pay cycle.

2. Prepare a Form W-2c if a Form W-2 was issued.

080804. Corrections for Overpayment of Earnings for a Prior Year. If the overpayment occurred in a previous calendar year, no correction of earnings for federal, state, or local withholding taxes shall be made for the current calendar year.

A. For active employees, the civilian payroll office shall:

1. Request a written statement from the employee that a claim for tax refund or credit has not been made for the amount of the overdeduction.

2. If the year of repayment is still within the 3-year statute of limitations for Social Security and/or Medicare tax refunds, prepare a Form W-2c in accordance with IRS Circular E (reference (h)) for the prior year to reduce the gross wages subject to Social Security/Medicare and Social Security and/or Medicare taxes withheld. Send copies to the employee and copy A to the SSA. A separate Form W-3 (Transmittal of Wage and Tax Statements) must be sent with the corrected Form W-2 to the SSA, upon completion of the correction procedures. If the repayment is beyond the 3-year statute of limitations, no corrections will be made to prior year Forms W-2 and Forms 941.

3. Attach the employer's copy of the Form W-2c to the retained Form W-2 previously issued for the prior year.

4. Prepare a Form 941c (Statement to Correct Information Previously Reported on the Employer's Federal Tax Return) to adjust the gross wages subject to Social Security/Medicare and the Social Security/Medicare taxes.

5. Attach the Form 941c to the current quarterly Form 941 and enter the amount of the adjustment on line 9 of Form 941. Retain copies of the two forms in the civilian payroll office.

6. Prepare a statement for the employee after collection of the amount due from the employee (see Figure 8-5 for a sample format). The amount entered on the statement shall be the total of the reverse deductions plus the amount the employee repaid. The employee shall receive any federal, state, city, and local income tax adjustment when he or she files a tax return.

B. For separated employees, the civilian payroll office shall:

1. Follow procedures outlined in subparagraphs 080804.A.1. through 6.

2. Keep a copy of the Form W-2c and Form 941c in the current year quarterly tax folder. (This is used to balance the annual federal tax deposits.)

C. The civilian payroll office manually shall note the amount of the correction and the date of the collection on the employee's prior year individual pay record.

D. If an employee was overpaid in previous calendar years, collections against the overpayment may cover more than two calendar years. The civilian payroll office shall give the employee a statement that contains the following:

1. A description of the circumstances
2. The amount of the overpayment
3. The amount collected during the year
4. The year or years to which the payment was applied.

Sample Demand Letter

FROM: (1)

TO: (2)

SUBJECT: Overpayment of Pay and/or Allowances

This is to inform you that you have been overpaid as the result of ____ (3) _____. Unfortunately, this overpayment causes you to be indebted to the United States in the gross amount of \$ ____ (4) ____, and as a result, we are required by law and regulations to initiate collection action.

Please send a personal check or money order payable to ____ (5) ____ in the amount of \$ ____ (6) ____ along with a copy of this letter to ____ (7) ____ within 30 days. If you are financially unable to pay the full amount, you and the civilian payroll office may establish a written agreement for repayment of the debt by installment deductions from your pay. Please advise the civilian payroll office within 30 days if you wish to request this method of repayment.

If you do not repay the debt in full or establish a repayment schedule within 30 days, we are required to collect the debt involuntarily from your pay, beginning on ____ (8) _____. The maximum amount deductible under these circumstances is 15 percent of your disposable pay each pay period until the debt is repaid in full. Our estimates of your disposable pay, based on current payroll information, is \$ ____ (9) _____. Therefore, the maximum deductions would be \$ ____ (10) _____ and repayment of the principal amount of the debt would take approximately ____ (11) _____ pay periods.

If you repay this debt in the same year that the overpayment occurred, you may repay the debt in the net amount, and we accordingly will adjust your taxable wages and taxes withheld. If you do not repay your debt in full in the same year as the overpayment occurred, you are also will be required to pay all income taxes applicable to the unpaid debt balance. You will receive a statement that you may file with your tax return indicating you repaid an overpayment that occurred in a prior tax year.

We encourage that you promptly pay this debt since interest, computed at the Treasury tax and loan rate, will be assessed from the date of this letter on any part of the debt not paid within 30 days of the date of this letter. Also, an administrative charge to cover the cost of processing a delinquent debt will be assessed on any part of the debt not paid within 30 days. In addition, a penalty charge of 6 percent per annum will be assessed on any portion of the debt that is delinquent for more than 90 days.

★Figure 8-1 (Demand Letter for Overpayment of Pay and/or Allowances)

You have the right to inspect and copy all records relating to this debt within 10 days from receipt of this letter. If you personally cannot do so, you may request that the civilian payroll office provide you a copy of any of these records. This request must also be made within 10 days from receipt of this letter.

If you have any questions about the nature of the debt, please contact the civilian payroll office for an explanation. If, after hearing the civilian payroll office's explanation, you still believe that you do not owe the debt or that you owe an amount other than what is shown above, you may submit a written statement of your position to the civilian payroll office. This right has no relationship to your ability or willingness to repay the debt, but only to determining whether the debt is a valid one. If you elect to exercise this right, you must do so within 15 calendar days from the date of this letter.

You also have a right to a hearing as to the amount or the validity of the debt, or if the involuntary deductions discussed above would cause an extreme hardship. Hearings are conducted by an official, designated by the Defense Finance and Accounting Service, who is not under the control of the creditor agency. If you wish to request a hearing, you must do so within 30 days from the receipt of this letter. Attachment 1 contains guidance regarding requests for hearings.

If you acknowledge the validity of the debt, but believe that you should not be required to repay this debt, you may submit a written request for waiver of the indebtedness. Attachment 2 contains guidance regarding waiver requests. Requesting a waiver is not normally an alternative to making arrangements to repay the debt (plus any accrued interest, administrative costs, and penalties). Therefore, even if you elect to submit a waiver request, you still should either repay the debt or arrange with the civilian payroll office for installment payments. Any decision to suspend collection action during the period of consideration of the waiver is made on a case-by-case basis.

If we can be of further assistance, please contact _____ (12).

Sincerely,

(Signature Element)

Attachments:

As stated

Figure 8-1 (Demand Letter for Overpayment of Pay and/or Allowances (continued))

Explanation of Blank Spaces on Sample Demand Letter

- (1) The title or office symbol/code of the civilian payroll office.
- (2) The full name of the employee.
- (3) A brief but comprehensive explanation of how the overpayment occurred (e.g., overaccrued annual leave, premature step increase, or overtime paid but not worked). Always include the pay periods for which the overpayments occurred and the dollar amount for each pay period. If the computation is complex, it may be included as an attachment to the letter. In some cases, a three-column table may be helpful. The three columns reflect amount entitled, amount paid, and the differences (the amount of the indebtedness).
- (4) The gross dollar amount of the debt.
- (5) The office to which the check or money order is to be made payable.
- (6) The net dollar amount of the debt.
- (7) The mailing address of the disbursing office.
- (8) The date the involuntary deduction from pay begins.
- (9) The estimated amount of disposable pay.
- (10) Fifteen percent of (9).
- (11) Divide (4) by the amount determined in (10) and round to the next highest number.

Note: For debts in which (10) is greater than (4), this entire sentence and the one preceding it can be deleted from the letter.

- (12) Identify the name, phone number and office symbol/code of the point-of-contact in the civilian payroll office who can answer questions regarding this debt.

Figure 8-1 (Demand Letter for Overpayment of Pay and/or Allowances (continued))

Guidance Pertaining to Hearings

An employee is entitled to an opportunity for a hearing on the determination of the civilian payroll office concerning the existence or amount of the debt, or the terms of the repayment schedule if it is established other than by written agreement. The employee must make any such challenge within 30 days of the receipt of the notice of indebtedness or within 45 days after receipt of the records relating to the debt, if the employee requests such records. If a hearing is given, the employee also must be given the opportunity to receive a written decision from the official holding the hearing at the earliest practical date, but not later than 60 days after the filing of a petition. Normally, a hearing will consist of written submissions by both the employee and the civilian payroll office. Therefore, an employee who wishes a hearing shall make his or her wishes known by filing a petition with the same official who issued the written demand for payment. The petition shall state that the employee is seeking a hearing under the provisions of 5 U.S.C. 5514 and, if the employee is contesting the determination of the debt or its amount, the petition will contain the following items:

1. The reason the employee believes that the civilian payroll office's determination of the debt is erroneous. The statement shall include all facts on which the employee bases his/her belief and any arguments supporting the belief.
2. Written submission from any persons that can substantiate the employee's contentions.
3. A copy of any records the employee believes can substantiate his/her contentions.

If the employee is contesting the offset schedule, the petition shall contain the following items:

1. A proposed alternative offset schedule with supporting documents showing why the civilian payroll office's schedule would produce an extreme financial hardship for the employee. The supporting documents should include specific details concerning income and expenses of the employee, his/her spouse, and dependents for 1 year preceding the demand letter, and projected income and expenses during the repayment period proposed by the civilian payroll office.
2. Written submissions from any persons that can substantiate the employee's contentions.
3. A copy of any records the employee believes can substantiate his/her contentions.

★Figure 8-1 (Attachment 1 of the Demand Letter for Overpayment of Pay)

The timely filing of a petition for hearing shall stay the beginning of collection proceedings until the results of the hearing have been rendered.

Employees are advised that any knowingly false or frivolous statements, representations or evidence may subject the employee to:

1. Disciplinary procedures appropriate under 5 U.S.C. Chapter 75; 5 C.F.R. 752, or any other applicable statutes or regulations;
2. Penalties under the False Claims Act, 31 U.S.C. 3729-3731, or any other applicable statutory authority; or
3. Criminal penalties under 18 U.S.C. 286, 287, 1001, and 1002, or any other applicable statutory authority.

The timely filing of a request for a hearing will stay the beginning of collection proceedings. Interest and penalty fees shall not accrue during the period from the filing of a petition for hearing until the date of a hearing official's determinations.

Figure 8-1 (Attachment 1 of the Demand Letter for Overpayment of Pay (continued))

Guidance Pertaining to Waivers

In order to receive favorable waiver consideration, the determination must be made that collection action would be against equity and good conscience and not in the best interests of the United States. Generally, these criteria will be met by finding that the erroneous payment occurred through administrative error and that there is no indication of fraud, misrepresentation, fault or lack of good faith on the part of the employee. Any significant unexplained increase in an employee's pay and/or allowances, which would require a reasonable person to make inquiry concerning the correctness of his or her pay, ordinarily would preclude a waiver, whether or not the employee fails to bring the matter to the attention of appropriate officials. Waiver of overpayments under this standard depends on the facts existing in each particular case. However, the Comptroller General of the United States has held that a waiver will not be granted if it appears the employee had records (such as Leave and Earnings Statements) which, if reviewed, would have indicated an overpayment, and the employee failed to review such documents for accuracy or otherwise failed to take corrective action. Economic or financial considerations play no role in the determination of a waiver request.

An employee who wishes to request a waiver must submit an application for waiver of erroneous payment to the civilian payroll office that made the erroneous payment. If the civilian payroll office has been disestablished, the application is to be sent to the successor civilian payroll office. The application must contain or cover the following information or points:

1. The employee's name and address,
2. The reason for requesting the waiver,
3. A clear, concise, certified statement that the employee was or was not aware of being erroneously paid,
4. A statement detailing the employee's efforts to question the correctness of the payment,
5. The date and manner in which the employee became aware of the overpayment(s),
6. A statement relative to the availability of wage/salary tables or schedules, if applicable and
7. The employee's request for refund of any collection of the debt.

★Figure 8-1 (Attachment 2 of the Demand Letter for Overpayment of Pay (continued))

Sample Voluntary Repayment Agreement

To Whom It May Concern:

I _____, SSN _____ agree to repay my indebtedness of \$_____ by the following method(s).

\$_____ One-time payroll deduction in the pay period ending _____.

\$_____ Payroll deduction in the amount of \$ _____per pay period beginning with the pay period ending _____ until the debt principal and interest at the current Treasury rate is paid in full.

\$_____ Cash payment by personal check (must be received within 5 workdays).

\$_____ Net amount due (current calendar year).

In the event that should I retire or resign before collection of the debt is completed, all final pay (salary, lump-sum payments, and awards) shall be applied to the unliquidated debt balance without additional notification.

Signature

Date

Daytime Phone Number

★Figure 8-2 (Sample Voluntary Repayment Agreement)

I. Items Required From the Employee

A. The petition for the hearing:

1. Name
2. SSN
3. Date
4. Reason(s) for requesting the hearing, e.g.,
 - a. Contesting the validity of the debt
 - b. Contesting the amount of the debt
 - c. Contesting the terms of the offset
5. Reason(s) for contesting the debt
 - a. When contesting validity and/or amount of the debt, the employee shall

(1) Provide a statement why he or she believes the civilian payroll office's determination of the validity and/or the amount of the debt is erroneous. Also provide a complete description of the facts, evidence, and a summary of testimony of any witnesses which support the employee's belief.

(2) Copies of any pertinent records that the employee wishes to have considered at the hearing if they differ from those records previously provided by the civilian payroll office.

b. When contesting the terms of the offset schedule proposed by the civilian payroll office, the employee shall

(1) Propose an alternate schedule, i.e., how much can be repaid each pay period.

(2) Enclose an affidavit of financial status.

(3) Provide copies of any records he/she wishes to be considered at the hearing if they differ from the records previously provided by the civilian payroll office.

6. Employee's signature

Figure 8-3 (Checklist for a Hearing on Overpayment of Civilian Pay and/or Allowances)

II. Items Required From the Civilian Payroll Office:

- A. Full name and SSN of the employee.
- B. Exact date the error was discovered.
- C. Exact date and manner (due process notification) in which the employee was advised of the debt.
- D. Aggregate (total) amount of the debt.
- E. Computation of the amount of the debt including/excluding interest-to-date, and administrative fees, if applicable.
- F. Detailed circumstances that led up to, and under which, the erroneous payment(s) was made.
- G. Statement(s) corroborating and/or refuting the statement(s) made by the employee.
- H. Copies of Leave and Earnings Statements for 3 pay periods prior to the error and the first 3 pay periods beginning with the first overpayment.
- I. Copies of all other documents pertaining to the case.
- J. Annual leave cases require special documentation. They should include the following documents:
 - 1. Copy of the erroneous SF 50 data.
 - 2. Copy of the corrected SF 50 data.
 - 3. The balance brought forward (and the date) from the last year in which the correct leave accrual was used.
 - 4. Employee's leave record.
 - 5. The hourly rate of pay and changes.
 - 6. A copy of the SF 2806/3100.

Figure 8-3 (Checklist for Hearing on Overpayment of Civilian Pay and/or Allowances (continued))

Sample Post-Hearing Demand Letter

FROM: (1)

TO: (2)

SUBJECT: Indebtedness to the United States as a Result of an Overpayment of Pay and/or Allowances

Reference: (a) (3)
(b) (4)
(c) (5)

Reference (a) advised of your indebtedness to the United States in the amount of \$ (6) as a result of an overpayment of pay and/or allowances. By reference (b), you submitted a petition for a hearing based on the (7) of the debt. Reference (c) is the hearing official's determination of your indebtedness in the amount of \$ (8).

In order to liquidate the debt in full, you are requested to prepare a personal check or money order payable to (9), and send this instrument to the civilian payroll office at (10) no later than 15 days from the date of this letter. Regulations also permit the indebtedness to be liquidated by deductions from your current pay. If you prefer this method of repayment, please inform the civilian payroll office of your preference and it will arrange for a one-time voluntary payroll deduction. Depending on the amount of the debt in relation to your pay and your other expenses, it may be possible for you and the civilian payroll office to establish a written agreement for repayment of the debt by periodic installment deductions from your pay.

Reference (a) explained that delinquent debts were subject to the assessment of interest, penalties, and administrative expenses, and stated the policy relative to the excusal of these assessments. Under this policy, these assessments have not yet been made. They may continue to be excused if you now repay the debt in full or are able to reach an agreement with the civilian payroll office regarding installment liquidation of the debt.

If you do not repay the debt, consent to a one-time payroll deduction, or establish a repayment schedule, this office intends to collect the debt involuntarily from your pay beginning on (11). You must contact the civilian payroll office by that date in order to avoid this offset. This deduction would begin with the payday on (12). Reference (a) advised as to the estimated amount and duration of the payroll deduction. If this deduction from your pay would, in your opinion, cause you to experience extreme financial hardship, then you are urged to contact the civilian payroll office to arrange a more lenient schedule.

Figure 8-4 (Sample Post-Hearing Demand Letter for Overpayment of Pay and/or Allowances)

Reference (a) also explained your right to a waiver of the overpayment. You may still exercise that right. In view of the time that has already elapsed, however, you either must repay the debt or make arrangements for payroll deductions concurrent with the submission and processing of your waiver request. In the event that your request is granted, all amounts deducted shall be refunded.

Our point-of-contact in this matter is (13) .

(Signature Element)

EXPLANATION OF BLANK SPACES ON SAMPLE POST-HEARING DEMAND LETTER

- (1) The title or office symbol/code of the civilian payroll office.
- (2) The full name of the employee.
- (3) The initial demand letter.
- (4) The employee's petition for a hearing.
- (5) The hearing official's determination.
- (6) The amount of the debt in the initial demand letter.
- (7) Either "existence", "amount" or "the terms of the proposed offset schedule", as appropriate.
- (8) The amount of the debt as determined by the hearing official. If the hearing official affirmed the civilian payroll office's contention, the amount will be the same as blank (6).
- (9) The office to which the check or money order is to be made payable.
- (10) Identify the mailing address of the civilian payroll office.
- (11) The date the involuntary deduction from pay begins.
- (12) The payday for the pay period indicated in blank (11).
- (13) Include the name, phone number and office symbol/code of the point-of-contact in the civilian payroll office who can answer questions regarding this debt.

A - Active Employee; I - Inactive Employee

Yes - Requires a correction

* Prepare a corrected Form W-2 only if a Form W-2 was issued.

** For a prior year overpayment, the employee must repay the net amount plus deductions for federal, state, city or local tax, union, charity, allotments, bonds, indebtedness owed the United States and any other deductions for which the employee received value but which cannot be collected.

Table 8-1 (Current and Prior Year Pay Correction Table)

CHAPTER 9**RECORDS, FILES AND REPORTS****0901 RECORDS AND FILES****090101. Payroll Documentation**

A. A voucher shall be prepared for each disbursement or group of disbursements. A duly authorized certifying officer shall certify each voucher before payment. No employee shall certify his or her own disbursements.

★ 1. Deductions for CSRS and FERS, life insurance, and health benefit programs with employer contributions are routinely paid to the OPM each pay period. The SF 2812 shall be used to report these deductions. A consolidated SF 2812 shall be submitted biweekly to the OPM by RITS.

2. Federal income, Social Security, and Medicare taxes withheld shall be paid to the IRS as provided by the TFM (reference (ai)) and Circular E (reference (h)). State or city/local income taxes withheld shall be paid to the appropriate taxing authority in accordance with the TFM (reference (ai)).

3. Deductions and employer contributions for the TSP and TSP loan repayments shall be paid to the Department of Agriculture NFC.

4. Other amounts withheld shall be paid in accordance with regulations or instructions furnished by the employee.

B. Payments to those for whom deductions are authorized to be paid shall be reconciled on a cyclical basis, at least annually, with the amounts withheld plus the related employer contributions, if any, as shown by the pay or other records. This procedure is necessary to determine whether the correct amounts are being reported to those authorized to receive deductions and contributions that are deducted from the employee's pay.

1. The amounts reported on the annual Form W-2 furnished each individual shall agree with the total amounts withheld during the year as shown by the civilian payroll office records.

2. As an integral part of the DoD financial accounting systems, a related control account and an SF 2806/3100 for each civilian employee for whom retirement deductions are made shall be kept in accordance with the OPM requirements.

3. A master employee record shall be kept for each employee for whom savings bond deductions are made, showing the deductions, purchases or refunds, and unapplied balances.

4. Each DoD civilian payroll office shall keep, for each calendar year, a record of the total amounts withheld from employees' salaries and the total amount of the employer's contributions for group life insurance. These records shall be kept in a ledger or other appropriate form or shall be represented by file copies of vouchers from which such information has been reported to the OPM.

★ 5. A record of the employee deductions and the employer's contributions for health benefits shall be kept by each enrollment code number. The enrollees included in this record shall be reconciled within the payroll office, quarterly or more often if necessary, with the enrollees reported to each carrier. The civilian payroll office shall reconcile the employees enrolled, by code, to the carriers' records based on the SFs 2809 and SFs 2810 sent in support of the SFs 2811. This joint reconciliation between the civilian payroll office and the carriers shall be accomplished quarterly or, if necessary, more often.

6. The payroll records shall provide a clear audit trail from the gross pay calculation to the net pay received by the employee by pay period and by year-to-date totals.

7. A record shall be kept for each employee for whom TSP deductions and agency contributions to TSP are made.

★ 090102. Payroll Records Required for Retroactive Computations Involving Former Civilian Payroll Offices

★ A. When retroactive payroll computations are required that involves one or more former civilian payroll offices, the consolidated civilian payroll office has overall responsibility for the adjustment process. If it is determined that a former payroll office is involved, the consolidated civilian payroll office shall be responsible for contacting each former payroll office to obtain the necessary information.

★ B. Provided below are procedures to be followed if the consolidated civilian payroll office is unable to obtain documentation necessary to perform the retroactive calculation.

★ 1. Request documents from the National Personnel Records Center (NPRC) for records that should have been archived. When copies of the SF 135 are unavailable at either the former or consolidated offices, the consolidated civilian payroll office shall complete a NARA Optional Form 11 (Reference Request - Federal Records Centers) with all available information. Include in the description and remarks section, the employee's name, SSN, known places of employment, names and payroll office numbers of applicable civilian payroll offices, and year(s) for which the records are requested. Forward the form to NPRC, Civilian Personnel Records, 111 Winnebago Street, St. Louis, Missouri 63118-4199.

★ 2. Contact the Appropriate Human Resources Organization. If the NPRC cannot locate the records, the civilian payroll office shall prepare a memorandum to the appropriate HRO requesting copies of the SFs 50 or other related pay and/or leave information. Since there may have been consolidations of both civilian payroll and the appropriate HRO prior to the DCPS consolidations, it is imperative that both offices work together to obtain information that will assist in the determination of pay and leave adjustments for the employee.

★ 3. Contact the Employee. If the civilian payroll office is unable to locate documentation from the NPRC or the appropriate HRO, the employee may be contacted for documentation. If the employee has copies of the SFs 50 and/or the LESs, the civilian payroll office can accept this information for use in the reconstruction of the pay and/or leave records.

★ 4. Contact OPM. If the transmittal letters to the OPM and/or copies of the retirement records cannot be located, the civilian payroll office shall submit a written request to the OPM to obtain copies of these records. The information on the retirement records can also be used for reconstruction of pay information for adjustments.

0902 REPORTS

090201. General. DoD civilian payroll systems must support the various legal and regulatory requirements by generating reports at regular intervals, on an as-needed basis or by producing reports to meet special requirements. They also shall support management by generating reports that provide the necessary information to ensure the system's integrity. Under the provisions of Title 6 of the GAO Policy and Procedures Manual for Guidance of Federal Agencies (reference (bd)), reports shall be:

A. Prepared accurately and promptly and distributed to the appropriate recipients to ensure receipt when the information will be of maximum benefit.

B. Based on, supported by, and periodically validated against appropriate detailed information in the payroll system.

C. Sent in a timely manner to officials who authorized, or were responsible for, processed payroll transactions and shall be reviewed by those officials for completeness and accuracy. However, producers of these reports shall be responsible for correcting errors due to inaccurate reading or entering of data. Discrepancies in reporting, transmitting, or depositing funds shall be resolved promptly.

D. Discussed periodically with users and modified or eliminated as appropriate to meet user needs.

E. Retained and disposed of in accordance with the General Records Schedule 2, (reference (g)), with sensitive data as defined by 5 U.S.C. 552a (reference (b)) handled in accordance with the provisions of the Privacy Act (reference (e)).

090202. As-Required Reports

A. City/Local Income and Employment Tax Reports. These reports shall be submitted to cities/localities that have reached an agreement with the Secretary of the Treasury and to cities/localities where voluntary deductions have been made from employees. The reports are sent to the city/local taxing authorities based on the frequency prescribed by each municipality.

B. State Income Tax Reports. These reports are required by states that have reached an agreement with the Secretary of the Treasury. The reports are sent to the state taxing authorities based on the frequency prescribed by each state.

C. Report on Transfer of Employee

★ 1. When an employee transfers within the Department to another civilian payroll office or to another federal agency, the losing civilian payroll office prepares an SF 1150 at the time of separation. All blocks on the SF 1150 pertinent to the employee must be completed accurately (see Table 9-1). This form shall be used to report transferred leave balances and other pertinent information for the employee. This information is included under the Remarks section of the form. This includes, but is not limited to, information on the employee's year-to-date wages for Social Security and/or Medicare tax purposes, year-to-date TSP deductions, last deduction for FEHB and FEGLI, date through which the insurance deductions were made, and overseas or territorial differential data. Mechanized SFs 1150 shall include the information contained in the printed standard form.

★ a. After the losing civilian payroll office completes the SF 1150, shall be is forwarded to the losing HRO. The losing HRO includes it in the employee's Official Personnel Folder (OPF) and forwards to the gaining HRO. After the SF 1150 is received by the gaining HRO, it is forwarded to the gaining civilian payroll office.

★ b. To expedite the forwarding of the SF 1150 within the Department, the losing civilian payroll office shall forward a copy to the gaining civilian payroll office, if known, at the time the original SF 1150 is forwarded to the losing HRO. Upon receipt of the original SF 1150, the gaining civilian payroll office must verify that the SF 1150 data has not previously been recorded in the payroll system. The losing civilian payroll office retains a duplicate copy of the SF 1150 for audit purposes.

c. For leave adjustments over 3 years old, the current civilian payroll office is responsible instead of the losing civilian payroll office.

2. Delayed Receipt of SF 1150. If the OPF containing the SF 1150 is delayed in reaching the appropriate gaining HRO, and the employee is taking leave, the gaining civilian payroll office is responsible for determining the employee's leave balance. If necessary, the leave balance shall be requested by message or facsimile. This information is subject to the Privacy Act (reference (e)) and must be handled in accordance with the provisions of that Act. Also, the

gaining civilian payroll office is authorized to use the leave balance shown on the employee's last LES, subject to verification upon receipt of the SF 1150.

3. SF 1150A (addendum to SF 1150). This form records the transfer of leave for leave recipients covered by the voluntary leave transfer program. It shall be used when a current leave recipient transfers to another civilian payroll office or federal agency without a break in service. It will be attached to the SF 1150.

D. Request for Wage and Separation Information. The civilian payroll office shall report wage data to the appropriate HRO in accordance with section 0601. A file copy of all data furnished to the appropriate HRO is maintained for 2 years in accordance with the General Records Schedule 2 (reference (g)) and then destroyed.

E. SF 2806/3100. In accordance with section 0403, the civilian payroll office will prepare and maintain the SF 2806/3100.

★ F. Form W-2c and Form W-3.

1. Prepare a Form W-2c (Corrected Wage and Tax Statement) in accordance with IRS Circular E (reference (h)) to correct prior year wages and tax withholdings as applicable. Send copies to the employee and copy A to the SSA. A separate Form W-3 (Transmittal of Wage and Tax Statements) must be sent with the corrected Form W-2c to the SSA, upon completion of the correction procedures.

2. Retain the employer's copy of the Form W-2c in the payroll office.

3. Prepare a Form 941c (Statement to Correct Information Previously Reported on the Employer's Federal Tax Return) to adjust the gross wages subject to Social Security and/or Medicare and the Social Security and/or Medicare taxes.

4. Attach the Form 941c to the current quarterly Form 941 and enter the amount of the adjustment on the Form 941. Retain copies of the two forms in the civilian payroll office.

5. Keep a copy of the Form W-2c and Form 941c in the current year quarterly tax folder. (This is used to balance the annual federal tax deposits.)

090203. Biweekly reports

A. LES. An LES showing gross pay, deductions, and net pay for the current pay period and cumulative totals for the current year, along with leave balances at the end of the pay period and year-to-date, should be mailed to the employee's nonwork address every pay period.

B. SF 2812 and SF 2812A. The amount collected for employee retirement (CSRS and FERS), FEHB, and FEGLI deductions, military service deposits, reemployment offset,

and the agency's contributions for retirement (CSRS and FERS), FEHB, and FEGLI are transferred to the OPM. Under procedures prescribed by the OPM, the civilian payroll office uses a no-check-issue procedure as the means of payment to the OPM. Funds are transferred to the OPM using the SF 2812. The SF 2812A reports the total employee deductions and agency contributions for health benefits by health benefits plan enrollment code for the pay period.

C. Retirement Insurance Transfer System (RITS)

1. RITS is a subsystem for the On-Line Payment and Collection (OPAC) System developed by the OPM and the Department of the Treasury to report civilian retirement and insurance contributions. The automated RITS interface with the payroll system replaces the manual submission to the OPM of the SF 2812/2812A.

2. To process the RITS transactions, the civilian payroll office shall provide the disbursing office with the payroll system generated hard copy of the DD Form 592 (Payroll for Personal Services - Certification and Summary), the SF 2812/2812A and, if applicable, any disbursement vouchers for cash payments.

a. Cash payments received from employees for military deposits, health benefits payments, etc. are considered current transactions. The funds are collected and disbursed from the deposit fund account 97X6875 (Suspense). The total of the DD Form 592 and cash disbursement voucher should equal the total of the SF 2812. Cash collections for health benefit indebtedness received from pay accounts not carried forward from former payroll offices must be reported to the OPM separately on a supplemental SF 2812 using the Off-Line Bulk Data Transfer RITS software.

b. The disbursing office shall ensure the voucher amounts agree and the vouchers contain proper certifying signatures before authorizing the transmission of the file to the OPM. The delay between the payroll system file creation and transmission is a necessary step in the process to establish adequate internal controls for the disbursement of government funds. If the file is transmitted before the payment date, the OPM shall warehouse the data until the settlement date.

c. The OPAC transaction is a direct payment to the OPM. Report the transaction on the SF 1219 (Statement of Accountability) by increasing line 2.8 and line 4.1. The civilian payroll office no longer charges account 24X8135 to offset the SF 2812 payment.

d. The disbursing office generally can confirm the transactions on 1 to 2 workdays following the OPAC payment date by accessing the OPAC system and selecting number 6 - Print Bills charged to the payroll office Agency Locator Code. The system provides prompts to enter data that identifies the report to print. Cite the confirmed OPAC document reference number on the original vouchers to show payment via OPAC.

3. RITS provides the capability to report on a regular biweekly basis, as well as to report adjustments in a supplemental off cycle mode. Reporting during the regular

biweekly cycle is the preferred method and automated capabilities of the payroll system must be fully utilized in order to do so. Use of a supplemental reporting cycle should be limited to the greatest extent possible.

4. Consolidated civilian payroll offices using RITS may have the occasion to report adjustments applicable to former payroll offices as well as adjustments applicable to the consolidated office. The following procedures for these situations have been developed:

a. Adjustments for accounts that have not been transferred to the consolidated civilian payroll office. These accounts were inactive on former payroll office records and did not convert to the consolidated office. Responsibility for these adjustments has been affixed with the consolidated payroll operation as a part of the DFAS civilian payroll concept of operations. These adjustments could involve correction of a retirement plan or cash collection for military deposits or health benefit indebtedness.

(1) Retirement Plan Correction. These adjustments shall be reported to the OPM via a hard copy SF 2812 citing the Payroll Office Number that originally reported the deductions and contributions. Corrected retirement records and registers citing the former payroll office also shall be prepared and forwarded to the OPM. Copies of the SF 2812, registers, and records shall be forwarded to the departmental reporter for the former payroll office so that cumulative balances may be adjusted.

(2) Cash Collections for Military Deposits. Cash collections for military deposits must be reported via a hard copy SF 2812 citing the Payroll Office Number that originally reported the deductions. Corrected retirement records and registers citing the former payroll office must be prepared and forwarded to the OPM. Copies of the SF 2812, registers, and records must also be forwarded to the departmental reporter for the former payroll office so that cumulative balances may be adjusted.

(3) Cash Collections for Health Benefit Indebtedness. Cash collections for health benefit indebtedness should be reported via the RITS as a supplemental SF 2812/2812A from the consolidated payroll office using the consolidated Payroll Office Number.

b. Adjustments for accounts which have been transferred to the consolidated civilian payroll office. These accounts were active on former civilian payroll office records and converted to the consolidated office. Adjustments may be for accounts that have become inactive since consolidation or for those still in an active status. Responsibility for these adjustments has been affixed with the consolidated payroll operation as a part of the DFAS payroll concept of operations. Records for both the former and consolidated payroll offices may have to be corrected, depending on the effective date of the correction involved.

(1) Retirement Plan Correction. The adjustment may involve both hard copy reporting via the SF 2812 and reporting via RITS. Adjustments that are effective prior to the transfer to the consolidated office shall be reported to the OPM via the SF 2812 citing the former civilian Payroll Office Number. Corrected retirement records and registers for that portion

applicable to the former payroll office must be prepared and forwarded to the OPM. A copy of the SF 2812, registers, and records also shall be forwarded to the departmental reporter for the former civilian payroll office so that cumulative balances may be adjusted. That portion of the adjustment applicable to the consolidated payroll office shall be corrected through the payroll system and reported via the RITS regular biweekly cycle. Adjustments for accounts that have become inactive since consolidation shall be corrected through the payroll system by reactivating the account.

(2) Cash Collections for Military Deposits. Cash collections for military deposits shall be reported via RITS during the regular reporting cycle. Collections for accounts that have become inactive since consolidation must be corrected through the payroll system by reactivating the account. Correction through the payroll system is necessary in order to maintain the proper sequencing of system assigned register numbers.

(3) Cash Collections for Health Benefit Indebtedness. Cash collections for health benefit indebtedness shall be reported via RITS during the regular biweekly reporting cycle.

D. Form TSP-2 (Certification of Transfer of Funds and Journal Voucher). A no-check-issue procedure is used to transfer the amount collected for employee's TSP deductions as well as the agency contributions to the NFC. Funds are transferred to NFC using the Form TSP-2.

E. DD Form 592. This is a payroll voucher used for certification of the accuracy of the payment. It also provides accounting data in connection with civilian payroll. Clear text appropriation data is in Part II of the DD Form 592 to permit departmental reporting to the Components. This data is in addition to the unique job order data.

F. Civilian Employment Expense Reports. In support of DoD Instruction 7720.22 (reference (be)), the civilian payroll office shall gather information on the costs of civilian employment. This financial and statistical information serves as the basis for budget and apportionment estimates and is used for reporting such estimates to the OMB and the Office of the Secretary of Defense. This information also is used for monitoring budget activities at departmental levels. The civilian payroll office either provides this cost information biweekly as feeder data (if a consolidated civilian payroll office) or prepares an expense report on the costs of civilian employment to the Components monthly (if a non-consolidated civilian payroll office).

G. Reports of Salary Offsets for Non-DoD Federal Agencies

1. Report of Collections. The civilian payroll office shall forward a biweekly report to each creditor agency of the collections made for the pay period. This report shall include, at a minimum, the non-DoD agency to which the collections apply, the civilian payroll office name and address, the employee's name, the amount collected for each employee, the time frame for which the collection applies, and the total amount of collections remitted to the non-DoD agency.

2. Report of Employees with Salary Offset. The civilian payroll office forwards a biweekly report of employees with salary offsets for non-DoD federal agencies to the DFAS Center that originally forwarded the salary offset request to the civilian payroll office. This report shall include, at a minimum, the employee's name, SSN, creditor agency, amount of the last biweekly collection amount, pay date of the last collection, and the debt balance amount. In the case of employees with more than one debt to a non-DoD federal agency, the above information shall be provided for each debt.

★ H. Reporting Union Dues to Labor Organizations or Associations of Management Officials or Supervisors. For each pay period, the civilian payroll office shall prepare a listing for each recipient of withheld dues. At a minimum, the listing shall include the name and address of the civilian payroll office, the labor organization or association for which the listing pertains, employees' names and amount of dues deducted for each, total amount collected, and system generated remarks that explain the lack of deductions.

★ I. Combined Federal Campaign Report. The payroll office shall provide a remittance report to each CFC organization to include:

1. The employing agency, e.g., Army, Navy, Air Force,
2. The number of employees with a deduction by employing agency,
3. The total pay period amount deducted, and
4. The pay period date of the CFC data.

A summary report by CFC organization indicating the total number of employees with deductions, the amount deducted for all employing agencies, and the payroll office will retain the pay period date. See 5 C.F.R. 950.901 (reference (I)).

★ J. Voluntary Separation Incentive (VSI) Agency Contributions Report

1. Section 1106 of the National Defense Authorization Act for Fiscal Year 1998, P.L. 105-85 (reference (e)), mandates that agencies make certain contributions to the Civil Service Retirement and Disability Fund (CSRDF) due to VSI payments. The Department is required to remit to the OPM for deposit into the CSRDF an amount equal to 15 percent of the final basic pay for all employee who separate on or after October 1, 1997, and receive a VSI payment authorized by 5 U.S.C. 5597 (reference (b)).

2. The reports for the accounting activities and departmental reporters provide information to record obligations and make payment to the OPM.

090204. Monthly Reports

A. Monthly Report of Federal Civilian Employment, Interagency Report Control Number (IRCEN) 1032-OPM-MO. This report is required by the OPM and shall be prepared by each office maintaining operating budget/allotment ledgers. It reports obligations for wages and salaries earned by, and lump-sum leave payments made to, civilian employees and wages and salaries of foreign national, direct-hire personnel. This report has been cleared in accordance with the Federal Information Resources Management Regulation (FIRMR) 201-9.202-2 (reference (bf)), and assigned IRCEN 1032-OPM-MO.

B. Manpower and Funding Report. See subparagraph 090203.F.

★ C. Full-Time Equivalent or Work Year Reporting. The civilian payroll office shall provide feeder data to DMDC for reporting to the OMB.

090205. Quarterly Reports

A. Continuation of Pay for Disabling, Job Related Traumatic Injuries Sustained by Federal Employees, IRCEN 0063 DOL-QU. The Department of Labor requires a quarterly report on COP. The requirement was established by 20 C.F.R. 10.206 (reference (x)) and applies to all civilian payroll offices including National Guard units. This report has been cleared in accordance with FIRMR 201-9.202-2 (reference (bf)), and assigned IRCEN 0063 DOL-QU.

B. Employment Statistics Program, IRCEN 0184 DOL-XX. Upon request, the civilian payroll office furnishes feeder data to the appropriate HRO on total wages paid to civilian employees for specific calendar quarters. The appropriate HRO shall prepare and submit the final report. This report has been cleared in accordance with FIRMR 201-9.202-2 (reference (bf)), and assigned IRCEN 0184 DOL-XX.

C. Employer's Quarterly Federal Tax Return, Form 941. Each civilian payroll office shall report tax payment information to the IRS on Form 941. The report shall be completed and filed by the due date established by the IRS. This is normally the end of the month following the close of the quarter. If all the taxes for the quarter are deposited when due, file the Form 941 by the 10th day of the second month following the close of the quarter. The tax payment information required under Schedule B (Record of Federal Tax Deposits) shall come from the payment records. The total amount of tax payments during a quarter shall agree with the total taxes due, with no further payment required to be made with the Form 941. The Form 941 can be obtained from the nearest IRS office.

1. Civilian payroll offices with the capability shall utilize FEDTAX to report Form 941 data to the IRS. FEDTAX is a Department of the Treasury-developed software application that utilizes the Government On-Line Accounting Link System to eliminate hard copy reporting of Form 941 quarterly and issuing U.S. Treasury checks to the IRS.

2. The civilian payroll office forwards the IRS disbursement vouchers (i.e., the SF 1049) to the disbursing office at an agreed- upon time preceding the payment date for transmitting the voucher data through FEDTAX to the IRS.

3. The disbursing office returns the Form 941 printout to the civilian payroll office the day following each IRS disbursement. This printout reflects the cumulative totals for the quarter.

4. The civilian payroll office corrects any discrepancies as needed.

★ D. Health Benefits Reconciliation Report. Each payroll office shall send the quarterly report of enrollees to all health plans, listing enrollees' names and total amount (withholdings and contributions). The quarterly report shall include enrollment data for all health plans for the payroll paid during the 1st through the 15th of March, June, September and December. If there are two payrolls paid during that period, the civilian payroll office shall report only enrollment data for the last payroll paid. The data in this report first shall be sorted by FEHB enrollment code and then SSN. The report shall provide a subtotal for each enrollment code and a grand total for each plan.

★ E. Transportation Fringe Benefits. Public Law 102-486 (reference (e)) requires employers to report the value of fringe benefits as taxable income for amounts that exceed the established IRS threshold. See paragraph 031502. for additional information. The parking fringe benefit valuation shall be reported by the employing activity directly to the servicing civilian payroll office on a quarterly basis to ensure proper reporting on the Form W-2 of income and collection of taxable wages. The monthly value of the fringe benefit and the reportable taxable benefit shall be included in the report.

★ F. Civilian Direct Deposit Participation Report. When directed, the civilian payroll office shall furnish data to the appropriate functional organization on civilian employees participating in DD/EFT. This feeder-type information is used by DoD managers to report to the Department of the Treasury Financial Management Service payment volumes and the percentage of payments made by EFT. The DoD report is due to the Department of the Treasury within 25 days following the end of each quarter.

090206. Semiannual Reports

A. U.S. Savings Bonds Payroll Savings Report, IRCN 0215-TD-SA-T

1. In accordance with Volume 5 of this Regulation, the consolidated civilian payroll offices shall provide feeder-type data on bond participation statistics to the recipients in subparagraph 090206.A.2. This report has been cleared in accordance with FIRMR 201-9.202-2 (reference (bf)), and assigned IRCN 0215-TD-SA-T. This data shall be submitted twice yearly on or before the 25th day following the end of each semiannual calendar period (March 31 or September 30). The report shall include the following:

- a. Pay period ending date;
- b. The reporting payroll office;
- c. Summarized data by Component by Geographic Location Code;
- d. A column with the total number of employees;
- e. A column with the number of employees enrolled in the payroll savings plan;
- f. A column with the percentage participation; and
- g. A column with the total dollar amount withheld from employees for the pay period.

2. The civilian payroll offices shall submit the report to the following:

★

- a. For Department of Army activities:

U.S. Army Finance Command
Attn: SFFM-FC-OD
8899 East 56th Street
Indianapolis, IN 46249-3060

★

- b. For Department of Navy activities:

Administrator
Navy Savings Bond Program
Bureau of Naval Personnel
(PERS 662J)
2 Navy Annex
Washington, DC 20370-6620

★

- c. For Department of Air Force activities:

HQ AFPC/DPSTS5
550 C Street West, Suite 35
Randolph AFB, TX 78150-4737

★ B. Report of Withholdings and Contributions for Retirement, Group Life Insurance, and Employees Health Benefits, IRCN 1064 OPM-AN. The OPM has requirements for a semiannual head count required for the last pay period paid during the 1st through the 15th of March and September, in conjunction with the quarterly reporting of enrollment in all health benefits plans (see 090205.D.). The OPM Payroll Office Letter contains line-by-line instructions for completing the head count together with illustrative examples of data the OPM requires. The OPM Form 1523 must be attached to and submitted with the SF 2812 and SF 2812A covering the same period. This report has been cleared in accordance with FIRMR 201-9.202-2 (reference (bf)) and assigned IRCN 1064 OPM-AN.

090207. Annual Reports

A. Report of Work-Years and Personnel Cost, IRCN 0197-OPM-AN. This report provides information required by the OMB requires to estimate the cost of proposed federal pay increases, evaluate the financial effects of proposed legislation on civilian personnel compensation and benefits, and prepare analysis of pay and personnel benefits of federal employees. The consolidated civilian payroll office provides feeder-type data on the leave data for part C of this report. This report has been cleared in accordance with FIRMR 201-9.202-2 (reference (bf)), and assigned IRCN 1097 OPM-AN.

B. Report of Personnel and Payroll Outlays by Operating Locations, Report Control Symbol (RCS): DD-DA&M(A) 1600. The civilian payroll office provides system-generated, feeder-type information in accordance with DoD Instruction 7710.3 (reference (bg)). This report contains statistical information on civilian employment and DoD payroll outlays by location.

C. Wage and Tax Statements

1. Wage and Tax Statements to SSA. Form W-2 is used to report taxable income to the SSA and the IRS. The civilian payroll office shall issue a Form W-2 to employees no later than January 31 of the year following the applicable tax (calendar) year. This also applies to employees who died or separated during the year. Individuals may request the form at an earlier date by making their request in writing to the civilian payroll office. In such instances, the form is to be issued within 30 calendar days of receipt of the request or of the final payment, whichever is later. The DoD civilian payroll offices are required to use the DFAS approved standardized Form W-2 each year.

2. Wage and Tax Statements to States

a. The civilian payroll office provides this information to states that have Treasury-state withholding agreements.

b. The civilian payroll office provides annual information returns on Form W-2. (Other forms prescribed by states shall not be used).

c. Reports to states for wages earned and taxes withheld shall be submitted as required by the reporting requirements for each state. Reports shall include:

(1) Employees employed in the state and subject to tax (whether or not tax is withheld); and

(2) Employees who have established voluntary allotments for that state's income tax.

d. The civilian payroll office includes in the returns only the information on Forms W-2 employee's name, address, SSN, wages and taxes withheld, if any.

e. The civilian payroll office shall submit Forms W-2 or magnetic tape to report to states. If the state taxing authorities have agreed to accept magnetic tape, the civilian payroll office shall submit the information on a separate tape file. The civilian payroll office shall file all returns in accordance with instructions issued by the state taxing authorities. The civilian payroll office must request approval from state agencies before reporting by magnetic tape. Civilian payroll offices can get a list of state agency contacts from the regional SSA office or from SSA, P.O. Box 2137, Baltimore, Maryland 21203.

f. The civilian payroll office may have to report information to more than one taxing authority for the same employee. If so, it shall supply a copy of Form W-2 to the proper taxing authorities on request. Those authorities will decide if the employee is liable for any tax.

g. A state requirement to file information returns monthly does not affect existing arrangements to submit Forms W-2 only once a year.

3. Wage and Tax Statements to Cities or Other Localities

a. The civilian payroll office provides this information to cities/localities that have Treasury-city/locality withholding agreements and to cities/localities where voluntary deductions have been made.

b. The civilian payroll office provides annual returns on Form W-2. (Other forms prescribed by cities/localities shall not be used). Reports shall include:

(1) Employees employed in the city/locality and subject to tax (whether or not tax is withheld); and

(2) Employees who have established voluntary allotments for that city/locality's income tax.

c. The civilian payroll office includes in the returns only the information on Forms W-2: employee name, address, SSN, wages and taxes withheld, if any.

d. The civilian payroll office shall submit Forms W-2 or magnetic tape to report to cities/localities. If the city or locality taxing authorities have agreed to accept magnetic tape, the civilian payroll office shall submit the information on a separate tape file. The civilian payroll office shall file all returns in accordance with instructions issued by the city and locality taxing authorities. The civilian payroll office must request approval from city or local agencies before reporting by magnetic tape.

e. A city or locality requirement to file information returns monthly does not affect existing arrangements to submit Forms W-2 only once a year.

4. Wage and Tax Statements to Employees

a. The civilian payroll office must give annual Forms W-2 to:

(1) Employees subject to mandatory withholding;

(2) Employees subject to the tax, but not the withholding, because they do not reside in the state in which the city or locality is located--this includes those who did not elect voluntary withholding--and

(3) Employees subject to the tax, but not the withholding, because their regular place of duty is outside the city or locality, if they have elected voluntary withholding.

b. The civilian payroll office shall mail annual wage and tax information returns to each employee's nonwork address by January 31 of the next year. The Form W-2 shall include:

(1) Employee's name, SSN, and address.

(2) Wages subject to Social Security/Medicare, federal, state, city or local withholding.

(3) Social Security and/or Medicare, federal, state, or local tax withheld, if any.

(4) Name of state, city or county.

(5) City or county assigned EIN.

★ c. The civilian payroll office shall mail corrections to the annual wage and tax information returns to an employee's nonwork address as soon as an error is discovered. Refer to subparagraph 090202.F. for information on the Form W-2c and Form W-3.

D. SF 2811 (Transmittal and Summary Report to Carrier - Federal Employees Health Benefits Program)

★ 1. The SF 2811 transmits SFs 2809/2810 to the FEHB carriers. In cases where the appropriate HRO forwards the FEHB enrollment changes directly to the carriers, the SF 2811 is not required. Instead, the OPM has approved the use of a special transmittal sheet that provides the following data elements: the employing agency name and address; the number of SFs 2809/2810 transmitted; and a contact person and telephone number for questions concerning the transmittal.

2. The civilian payroll office prepares an original and two copies of the SF 2811 to cover the transmittal of SFs 2809/2810 that are accumulated for no more than 1 week. Transmittal of these forms should not be delayed to coincide with applicable payroll deductions. The SF 2811 is prepared as follows:

a. Carrier's Name, Address, and Code. Indicate the carrier's name, address and code from the OPM Payroll Office Letters issued annually that transmit FEHB information. The carrier code is the first two digits of the enrollment code.

b. Payroll Office Number.

c. Report Number. The SF 2811 "report number" begins with a two-digit number designating the calendar year and runs in numerical sequence starting with number 1. Thus, 98-1 would be the number of the first SF 2811 sent on or after January 1, 1998. The second SF 2811 in that year would be 98-2. Begin a new series of numbered transmittals starting with the number 1 with the first transmittal in the calendar year. Use a separate numbering series for each carrier.

d. Date of Report. Indicate the transmission date of the SF 2811.

e. Part A, Transmittal. Record in the spaces provided the number of SFs 2809/2810 being transmitted.

★ f. Part B, Summary Report of Number of Enrollees:

(1) Sorting. To facilitate preparation of the report and assist the carrier, sort SFs 2809/2810 and attach to the SF 2811 in the order in which the count is recorded. For example, for new enrollees, sort the SFs 2809 according to the last digit of the enrollment code number. These SFs 2809 would be the first group of attachments. For changes of enrollment code, sort SFs 2809 the same way and make these the second group of attachments. SFs 2810, showing a change in the name of the enrollee (part F) only, are the last attachment, and are not included in the count under "add" or "deduct" entries explained below.

(2) Add:

(a) New Enrollees (SF 2809). Include employees enrolling for the first time and employees changing from one carrier's plan to another.

(b) Changes in Code (SF 2809). Include employees changing enrollment code number within the same plan (when parts B and C of the SF 2809 show the same carrier). The entry on this line should correspond with the code number in part B of the SF 2809.

(c) Transfers in (SF 2810). Include transfers into the payroll office from other payroll offices (part D of the SF 2810).

(d) Other (See Remarks). Report other additions to enrollments not shown on the preceding lines. Examples: reinstatements (part G of the SF 2810); void actions; and corrections in count requested by carrier. Support line entries with a brief explanation under Remarks.

(3) Deduct:

(a) Cancellations (SF 2809). Include voluntary cancellations only (part D, item 2 of the SF 2809).

(b) Changes in Code (SF 2809). Include employees changing enrollment code number with the same plan (when parts B and C of the SF 2809 show the same carrier). The entry on this line should correspond with the code number in part C of the SF 2809. NOTE: The adds and deducts for changes in code must agree in the total column.

(c) Changes in Plan (SF 2809). Include when parts B and C of the SF 2809 are completed to change enrollment from one plan to another.

(d) Terminations (SF 2810). Include when part B of the SF 2810 is completed.

(e) Transfers Out (SF 2810). Used for transfers to another civilian payroll office (part C of the SF 2810).

(f) Other (See Remarks). Report other deductions in enrollments not shown on the five preceding lines. Example: Suspensions (part F of the SF 2810); void actions; and deduct corrections in count requested by carriers. Support line entries with brief explanation under Remarks.

g. Part C, Certification. Show the civilian payroll office name and address as registered with the OPM. The civilian payroll office supervisor, or other designated individual, signs the form in the appropriate space.

3. Before sending the SF 2811, the civilian payroll office places the report number in the lower right-hand corner of the carrier's and civilian payroll office's copies of each attached SF 2809/2810.

4. The SF 2811 is distributed as follows:

a. The original and first copies are sent by first class mail to the carrier, supported by the carrier's copies of the SFs 2809/2810.

b. The second copy, supported by the civilian payroll office copy of the SF 2809/2810, is kept in the civilian payroll office files pending the return of the first copy by the carrier.

RECORD OF LEAVE DATA

1. Name (Last, First, Middle)				2. Social Security Number				3. (For agency use)					
4. Date and Nature of Separation				5. A. Subject to 5 U.S.C. 6304 (B) (45 day leave ceiling)				Yes <input type="checkbox"/> No <input type="checkbox"/>					
				B. Last Date Subject to 5 U.S.C. 6304 (B)				C. Annual Leave Balance as of That Date (Hours)					
6. Total Service for Leave (as of Date of Separation)		More than 15 Years											
		Less Than 15 Years (show)		Years				Months Days

1150-113

STANDARD FORM 1150 (REV. 12-77)
Civil Service Commission

Table 9-1 (Instructions for Completing the SF 1150)

ITEM ENTRY

- 1 Enter name and middle initial of the employee exactly as used on the pay records.
- 2 Enter employee's SSN.
- 3 Either leave this blank or enter the data required by the respective payroll system being used, such as the payroll control number.
- 4 Enter date and nature of separation as shown on the SF 50 effecting separation or transfer.
- 5 Enter employee's status for leave purposes. Show in the proper block whether the employee is subject to overseas maximum annual leave accumulation. Show ending date of pay period when this stopped, and annual leave balance.
- 6 Check the appropriate block to show employee's total creditable service for leave purposes as of the date of separation or transfer. Show years, months, and days, if less than 15 years.
- 7 Enter ending date of prior leave year and balances of annual, sick and restored leave brought forward to current leave year.
- 8 Enter date through which leave was credited and amount of annual and sick leave earned and credited since the beginning of the current year.
- 9 Enter sum of the prior balances and current accruals.
- 10 Enter reduction in annual and sick leave credits caused by absences in a nonpay status. If none, enter "0".
- 11 Enter number of hours of annual and sick leave taken during the current year through date of separation or transfer as shown in item 4.
- 12 Enter figures derived by subtracting the total reduction in credits and leave taken from the total figures in item 9. Add "*" in sick leave balance column and explain in item 24 when sick leave balance is reported to the OPM on SF 2806 for use as a credit in computing annuity.
- 13 Enter total hours representing lump-sum payment. This includes annual leave, excess annual leave (any amount over employee's ceiling--normally 240 hours), and restored annual leave.

Table 9-1 (Instructions for Completing the SF 1150)

- 14 Enter salary rate at which lump sum payment was computed. If more than one salary rate was involved, state the number of hours computed at each rate. Also see item 13.
- 15 Enter inclusive dates and the number of hours included in the lump-sum annual leave period.
- 16 Enter number of hours of absence in a nonpay status during the leave year in which separated.
- 17 Enter beginning date of waiting period for next step increase, and total number of hours of LWOP, furlough, suspension, and AWOL since the waiting period began.
- 18 Enter date of arrival abroad for home leave purposes and date of completion of basic service period.
- 19 Enter date the current 12-month home leave accrual period began and number of hours in a nonpay status during the current period.
- 20 Enter date through which home leave was credited and current balance of days of leave earned.
- 21 Enter rate of accrual for each 12 months of service abroad.
- 22 Enter dates on which home leave was used during prior 24 months.
- 23 Enter inclusive dates of regular or special military leave taken during the current calendar year.
- 24 Enter amount of employee deductions for FEHB and FEGLI. Show date through which last deduction was made. Include FEHB carrier code and enter last day in a pay status.
Miscellaneous data:
 - a. If nonforeign differential, nonforeign allowance, or foreign differential were paid as a part of the lump-sum payment for leave, identify the rate(s) and kind of payment by number of hours and calendar dates.
 - b. Show total number of days worked by an intermittent employee as of date of separation.
 - c. For 700-hour employee, enter "700-Hour Employee," hours worked, and separation date.

Table 9-1 (Instructions for Completing the SF 1150 (continued))

- d. If employee retired and sick leave was reported to the OPM for use as a credit in computing annuity, enter "Sick leave used in computation of annuity and is not available for recredit."
- e. Enter unused military leave.
- ★ f. Enter the beginning and ending dates of an employee's 12-month period under FML. Also, enter the total number of hours of LWOP and paid time off under FML for the 12-month period.
- g. If an employee transfers restored annual leave, indicate the balance of restored leave and the year it will be forfeited. For example:

Restored leave Forfeit at end of leave year

24 1998
16 1999

- h. If an employee receives a lump sum payment that includes restored leave, project the lump-sum leave period in the following sequence: (1) Restored annual leave projected to expire at the end of the current leave year; (2) Excess annual leave; (3) Restored annual leave projected to expire in other than the current leave year; (4) Regular annual leave. Example: Employee separates May 16, 1992, with an annual (regular) leave balance of 368 hours, has a ceiling of 304 hours, and has a restored annual leave balance of 40 hours; 24 hours must be used by January 10, 1991, and 16 hours by January 9, 1992. The information is recorded in block 24 as follows:

LUMP-SUM LEAVE DATA

TYPE OF ANNUAL LEAVE	TOTAL HOURS PAID	FROM YR MO DA	TO YR MO DA	FORFEIT AT END OF LEAVE YEAR
Restored	24	91 05 18	91 05 20	1991
Excess	64	91 05 21	91 06 01	1991
Restored	16	91 06 02	91 06 03	1992
Regular	304	91 06 04	91 07 27	

Table 9-1 (Instructions for Completing the SF 1150 (Continued))

- i. Show the amount of the employee's year-to-date wages for Social Security and/or Medicare tax and the as-of date.
 - j. Show the amount of the employee's year-to-date TSP deductions and the as of date.
 - k. Show any other pertinent information on the employee (see subparagraph 090202.C.1.).
- 25 Enter the signature of the certifying official.
- 26 Enter the title of the certifying official, address and telephone number to which inquiries regarding the form should be directed.
- 27 Enter the date the SF 1150 was prepared.

Table 9-1 (Instructions for Completing the SF 1150 (Continued))

FOREWORD

This Volume of the "Department of Defense Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

Volume 9 of the "DoD Financial Management Regulation" establishes "Travel Policy and Procedures."

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

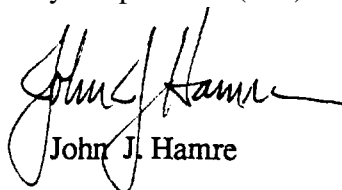

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Forward recommended changes to this Volume of the Regulation through the channels stated in paragraph 0105 of Chapter 1, to the address below. Submit requests for deviations from or exceptions to specific standards, with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume, and other previously unpublished volumes, of this Regulation through its normal publication channels. Early in 1997, all 15 volumes of the Financial Management Regulation will be available on the Internet at <http://www.dtic.mil/comptroller>. Printed or CD-Rom copies of the Regulation may be ordered through the Internet Homepage or directly from the Defense Automated Printing Service, at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD Components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller) (USD(C)). The Regulation consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Formulation and Presentation
3. Budget Execution - Availability and Use of Budgetary Resources
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursable Operations, Policy and Procedures
12. Special Accounts, Funds and Programs, Policy and Procedures
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Appropriations
15. Security Assistance Policy and Procedures

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 volumes. The six digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A.1.a.(1)(a)
SUBPARAGRAPHS

FORMS INDEX

DEFINITIONS

1. Actual Expense Allowance (AEA). An amount for actual and necessary expenses when the per diem allowance for a particular area is inadequate.
2. Actual Travel Time. Travel time from physical departure to arrival.
3. Agency Program Coordinator (APC). The agency person who acts as the liaison between the travel card contractor and agency cardholders. APCs are responsible to the respective DoD Component Program Manager (CPM) for program execution and management at hierarchy levels determined by the DoD CPM.
4. Allowable Travel Time. The number of days allowed for official travel.
5. Approved. This term is defined in the JFTR, appendix A. Its use, with respect to official travel, applies equally to military and civilian personnel.
6. Authorized. This term is defined in the JFTR, appendix A. Its use, with respect to official travel, applies equally to military and civilian personnel.
7. Authorized Travel Time. The maximum allowable travel time determined before travel begins and based on the mode of travel authorized in the orders.
8. Authorizing Official (AO). An official, or the designated representative to whom final authority to issue travel orders is delegated in writing by a DoD Component, by organizational title, and/or name. This is the same as Orders Authorizing Official.
9. Cardholder. Personnel designated to use the government travel card in their performance of official travel.
10. Centrally Billed Accounts (CBA). Travel card account numbers issued to an agency for which the government guarantees payment.
11. Commercial Travel Office (CTO). An office owned, staffed, and operated by a private contractor. It may be located on or off a government installation.
12. Component Program Managers (CPM). The designated headquarters program manager for each agency using the GSA Travel and Transportation Management Contract. CPMs are responsible for establishing the hierarchies for their agency and distributing program management information from the Defense Finance and Accounting Service.
13. Dependent. This term is defined in the JFTR/JTR, appendix A.
14. Directed. An order to do something a specific way.

15. Disbursing Office. An activity, or that organizational unit of an activity, whose principal function consists of the disbursement and collection of official funds for the government.
16. Government Bill of Lading (GBL). A government document used to procure freight and cargo transportation and related services of commercial carriers for the movement of material at government expense.
17. Government Dining Facility. A government owned facility with the primary mission of providing meals to military enlisted members. The JTR refers to this as a “government mess.”
18. Government Travel Card. A plastic card issued to personnel under the guidelines of the government travel card program.
19. Hierarchy. Individual travel card accounts linked to the organization responsible for issuing the card by billing cycle and DoD Component management information.
20. Individual Mobilization Augmentee (IMA). A category of Reserve Component Selected Reserve membership. While on active duty in a TDY status, travel and per diem are paid to such personnel in accordance with the JFTR, chapter 7.
21. U.S. Installation. This term is defined in the JFTR, appendix A, and applies equally to the travel of military and civilian personnel.
22. Invitational Travel Order (ITO). Authorization for travel of a person, not a government employee, in connection with certain assignments directly related to activities and in the interest of the Department. The JTR, chapter 6 and the JFTR, chapter 7, part T apply.
23. Meals & Incidental Expenses (M&IE). The M&IE rate is a fixed allowance, by locality, for the meals and incidental portion of the per diem rate.
24. Military Traffic Management Command (MTMC) Negotiated Agreements. A negotiated agreement between the Military Traffic Management Command and rental car companies.
25. Object Classification:
 - A. Air Force: Element of Expense/Investment Code. A five-digit right justified, alpha-numeric code consisting of two parts, a three-digit account code followed by a two-digit code to provide a further breakdown.
 - B. Army: A four-digit code that identifies the type of resource being employed or consumed.

C. Navy and all Other Components: Object class is defined as a four position code that classifies transactions according to the nature of the goods procured or services performed rather than their purpose.

NOTE: This information comes from the DoD DFAS Accounting Classification Data Element Crosswalk and Definitions.

26. Open Travel Authorization. A written document issued or approved by an AO for the purpose of performing official government travel for a continuous period of time. Also commonly known as “blanket” or “repeated” travel authorizations.

27. Permanent Change of Station (PCS). Permanent movement of a military member or civilian employee from one duty station to another within or outside the continental United States.

28. Permissive/Administrative Travel Time. An authorized administrative absence not chargeable to leave and for which per diem and transportation allowances are not payable.

29. Premium Class. Any class of transportation service above coach, such as business or first class.

30. Temporary Duty (TDY). For the purposes of this Volume, TDY includes temporary additional duty (TAD) for those DoD Components that use TAD.

31. Transportation Officer (TO). A person appointed or designated by the commander of a military activity to perform traffic management functions. This person may be designated as “installation transportation officer,” “traffic manager,” “traffic management officer,” or “passenger transportation officer.”

32. Travel Status. Individual travel performed away from a permanent duty station on official business under competent travel orders. Delays for the purpose of qualifying for reduced travel fares, and other necessary delays en route incident to the mode of travel and periods of necessary TDY are included.

33. Traveler. Refers to military members, DoD employees, and invitational travelers, who travel in an official capacity.

34. Unit Cards. Centrally billed accounts (CBAs) for which the government guarantees payment. CBAs may be issued in one of two ways; either by account number or in the form of a plastic card.

ABBREVIATIONS AND ACRONYMS

AEA	Actual Expense Allowance
AO	Authorizing Official
APC	Agency Program Coordinator
ATM	Automated Teller Machine (for use with government travel card)
CBA	Centrally Billed Accounts
Comp Gen	Comptroller General of the United States
CONUS	Continental/Contiguous United States (the 48 states plus the District of Columbia)
CPM	Component Program Manager
CTD	Civilian Travel Determination
CTO	Commercial Travel Office
DFAS	Defense Finance and Accounting Service
DFAS-HQ/F	Director for Finance, Defense Finance and Accounting Service - Headquarters
DITY	Do-It-Yourself Move (Household Goods)
DLA	Dislocation Allowance
DoD	Department of Defense
DoDFMR	Department of Defense Financial Management Regulation
DOHA	Defense Office of Hearings and Appeals
EFT	Electronic Funds Transfer
FICA	Federal Insurance Contribution Act
FITW	Federal Income Tax Withholding

LES	Leave and Earnings Statement
M&IE	Meals and Incidental Expense
MCO	Marine Corps Order
MTMC	Military Traffic Management Command
OPM	Office of Personnel Management
OUSDC	Office of the Under Secretary of Defense (Comptroller)
OUSDC(P&R)	Office of the Under Secretary of Defense (Personnel and Readiness)
PCS	Permanent Change of Station

PD	Per Diem Determination
PDS	Permanent Duty Station
PDTATAC	Per Diem, Travel and Transportation Allowance Committee
PIN	Personal Identification Number
POC	Privately Owned Conveyance
POD	Port of Debarkation
POE	Port of Embarkation
RITA	Relocation Income Tax Allowance
SSN	Social Security Number
TAD	Temporary Additional Duty
TDY	Temporary Duty
TO	Transportation Office(r)
TQSE	Temporary Quarters Subsistence Expense
TR	Transportation Request
USAF	United States Air Force
U.S.C.	United States Code
USN	United States Navy
WTA	Withholding Tax Allowance

CHAPTER 1**GENERAL INFORMATION****0101 AUTHORITY**

This Volume of the “Department of Defense Financial Management Regulation” (DoDFMR) is issued under the authority of Department of Defense (DoD) Instruction 7000.14, “DoD Financial Management Policy and Procedures,” November 15, 1992, (reference (a)); Joint Federal Travel Regulations (JFTR), paragraph U1010, (reference (b)); and Joint Travel Regulations (JTR), Volume 2, paragraph C1002, reference (c)). This Volume provides supplemental instructions on the payment of allowances authorized by the JFTR/JTR. Both the JFTR and JTR are published by the DoD chartered Per Diem, Travel and Transportation Allowance Committee (PDTATAC). The JFTR directly implements the travel and transportation entitlements authorized by law for members of the Uniformed Services and, thus, has the force and effect of law; therefore, it cannot be waived. The JTR prescribes travel and transportation allowances authorized for DoD civilian employees. The JTR is the Department’s implementing guidance for the Federal Travel Regulation (FTR), (reference (d)), issued by the General Services Administration (GSA).

0102 APPLICATION

The policies and procedures addressed in this Volume apply to all DoD personnel. This includes military members, DoD civilian employees, members of the Reserve Components, dependents on official orders, and travelers on DoD Invitational Travel Orders (ITOs). Information in DoD Component travel regulations that directly impact on amounts paid for DoD travel hereby are rescinded. However, individual DoD Component travel regulations remain in use for orders preparation, office administration, and accounting until a standard travel pay system is implemented at the specific installation. At that time, required information from existing travel manuals will be incorporated either in this Volume, other volumes of the DoDFMR, or systems manuals. Exception to the policies/procedures in this Volume must be authorized by the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)). Requests for exceptions should be sent through the appropriate Defense Finance and Accounting Service (DFAS) Center and through the Director for Finance, Defense Finance and Accounting Service - Headquarters (DFAS-HQ/F) to the OUSD(C).

0103 EFFECTIVE DATE OF CHANGES

Changes to the entitlements in the JFTR/JTR are initiated by the PDTATAC through the issuance of Joint Determinations (JDs), Civilian Travel Determinations (CTDs), and Per Diem Determinations (PDs). These changes are effective on the date included in the determination or the union negotiated date, as applicable, and must be implemented accordingly. For military members, the JFTR, paragraph U1020 applies. For civilian employees, the JTR, paragraph C1002 applies. DFAS-HQ/F releases travel advisories to implement these determinations, if necessary,

as well as other procedural and policy changes. These advisories remain in effect until the information is published in a change to this Volume.

0104 REFERENCES

Within this Volume, paragraph references prefixed with the letter U refer to the JFTR for military personnel and those prefixed with the letter C refer to the JTR for DoD civilian employees (references (b) and (c)).

0105 ROUTING AND FORMAT FOR RECOMMENDING CHANGES

Recommendations for changes to this Volume will include sufficient explanation as to the need and rationale for the proposed change. When the proposal is the result of an actual situation, the details surrounding the situation will be provided. The request for changes will be submitted through the appropriate DFAS Center for the DoD Component being served. Addresses are provided below:

Army: DFAS-IN-AQA
 8899 E. 56th Street
 Indianapolis, IN 46249-2130

Navy: DFAS-CO/LT
 P.O. Box 369015
 Columbus, OH 43236-9015

Air Force: DFAS-DE/CAC
 6760 E. Irvington Place
 Denver, CO 80279-8000

Marine Corps: DFAS-KC/FSP
 1500 E. Bannister
 Kansas City, MO 64197-0001

Also forward a copy to: DFAS-CL/FO
 1240 E. 9th St.
 Cleveland, OH 44199

Defense Agencies: Office of the Secretary of Defense
 Travel Division
 Washington Headquarters Services
 1155 Defense Pentagon
 Washington, DC 20301-1155

DFAS Centers will review and submit their recommended changes/waivers to DFAS-HQ/F, 1931 Jefferson Davis Highway, Room 501, Arlington, VA 22240-5241. Recommendations sent directly to DFAS-HQ/F without passing through these channels will be returned, without action, to sender.

CHAPTER 2

TRAVEL AUTHORIZATION PROCEDURES0201 TRAVEL POLICY

020101. General. This chapter identifies the DoD financial management policies and procedures that implement the provisions in the JFTR/JTR for travelers performing official government business. This guidance and the JFTR, Chapter 2, Part A, explains the policy involving payment of travel and transportation allowances. It does not include every condition in which travel and transportation allowances are authorized or limited by the JFTR/JTR. Information contained in this Volume does not modify the JFTR/JTR.

020102. Funding of Travel Orders. All orders, wherever possible, shall be funded by the organizational level of the traveler. If funding is provided by another office, your organization should obtain a fund cite from the third party to pay for the travel prior to issuing travel orders.

020103. Object Classification

A. Travel Order. It is the general policy of the Department of Defense that accounting for TDY travel shall be accomplished through the use of a single object classification code. All temporary duty orders shall be issued using the single object classification code of 21, Travel and Transportation of Persons.

B. Registration Fees. All registration fees incurred while travelers are on TDY travel shall be charged to object classification code 21, Travel and Transportation of Persons.

0202 TRAVEL ORDERS/AUTHORIZATION

020201. General. Travel orders are prepared in accordance with individual DoD Component travel regulations or management guidance and administrative instructions. TDY orders are valid, without amendments, if the traveler departs 7 days before or after the specified date of departure. Travel orders are valid, without amendments, if the period of TDY is extended for not more than 100 percent of the original time or 7 days, whichever is less. For example, if a TDY period of 5 days is authorized, and the traveler remains on TDY for 10 days, no amendment is necessary. But, if the traveler remains on TDY for 11 days, an amendment extending TDY and confirming the verbal authorization is required.

020202. Travel Order

A. General. A travel order is a written or electronic document issued or approved by the Heads of DoD Components or their designated representatives. The travel order establishes, in writing, the conditions for official travel and transportation at government expense.

Travel orders must identify the traveler as a government travel cardholder or non-cardholder. TDY travel orders must include the travel computation unit (location/address) to which travel vouchers must be forwarded (telefaxed/mailed). This statement will authorize alternative payment methods (e.g., transportation tickets being charged to a centrally billed account). The JFTR, paragraph U2100 refers. (NOTE: TDY orders are required to have an object class code of 21.)

B. Issued in Advance. A travel order is issued before the travel is performed, unless an urgent or unusual situation prevents prior issuance. Travel orders may not be revised or modified retroactively after the effective date, so as to increase or decrease the rights and benefits which have been fixed under the applicable statutes or regulations. (NOTE: This does not prohibit confirmation of verbal orders (paragraph 020203.B)).

C. Basis for Reimbursement. The travel order is the basis for the traveler's reimbursement. Reimbursement for travel is not authorized when the travel is performed in anticipation of verbal orders. The legal right to allowances is established when travel expenses are incurred under orders. Travelers are entitled to travel and transportation allowances only while in a travel status.

020203. Variations in Itinerary

A. Variations Authorized. This authorization permits omission of travel to a place (or places) stated in a travel order; changes in order of travel to places shown; and travel to places not shown. It is not used in place of adequate advance planning nor is it interpreted as granting an open travel authorization. Variations must be authorized in the order and are permitted only when considered mission essential (JFTR, paragraph U2135). This authorization does not preclude the requirement for an amendment if the total period of the TDY exceeds the time limitations in paragraph 020201.

B. Verbal Variations. When the authorizing official (AO) gives the traveler a verbal order to change the order of places to be visited, the time at each location, or adds or omits locations, a confirmation of the verbal order is required. The verbal authorization does not preclude the requirement for an amendment if the total period of the TDY exceeds the time limitations in paragraph 020201. This approval authority may not be delegated.

020204. Retroactive Amendments to Orders

A. Amendment Required. Travel orders may not be amended to increase or decrease entitlement to travel allowances after travel is performed. However, the original order may be amended after travel is performed when an error is obvious or travel requirements change en route. A written amendment confirming a verbal order is not included in this category, provided the verbal order was issued on or before the effective date of the directed change.

B. Amendment Not Required. Some provisions of the JFTR/JTR provide for after the fact approval (e.g., rental cars and communications expenses). In this case, the approval

is not a retroactive amendment. Such expenses are claimed on the voucher and approved by the AO. An AO signature on a DD form 1351-2 constitutes approval of the claim.

020205. Errors on Travel Orders

A. Personal Data. When travel orders contain erroneous data (e.g., misspelled names, incorrect social security numbers (SSN), or incorrect grades), claims may be paid without an amendment to the orders. The traveler can make and initial any necessary changes.

B. Appropriation Data. When the travel is funded by an accountable station that also is making disbursement to the traveler (i.e., disbursing station), the incorrect accounting classification data can be corrected without an amendment. If another accountable station is funding the travel, changes to the incorrect accounting classification data must be supported by one of the following:

1. Separate funding documents;
2. A letter from the accountable disbursing officer/comptroller; or
3. A documented telephone call to the accountable disbursing officer/comptroller.

0203 TRAVEL ADVANCES

020301. Policy. It is departmental policy that travel advances are not authorized unless an exception is granted to the standard practice of the traveler using his or her individual government travel charge card at automated teller machines (ATMs), or receiving an advance via an electronic fund transfer (EFT). Individuals who have a government travel card shall obtain their cash needs via the travel card ATM. Personnel who do not have the government travel card shall obtain cash advances through EFT. Supervisors may authorize emergency cash advances in limited situations where no other process is available to accomplish the mission.

020302. Issuing Advances

A. Government Travel Cardholder. Travel orders must identify whether the traveler is a government travel cardholder or non-cardholder. Cardholder status determines whether a traveler may receive an advance. Individuals authorized as cardholders shall obtain cash only through ATMs. Supervisors may authorize emergency cash advances, typically through EFT, in limited situations where no ATMs or other process is available to accomplish the mission.

B. Non-cardholder. Personnel denied individual cards, or whose individual cards have been canceled because of financial irresponsibility or other specific reasons shall obtain cash advances only through EFT when authorized by the supervisor. Supervisors may authorize emergency cash advances in limited situations where no other process is available to accomplish the mission.

C. Travel of Cadets/Midshipmen. Cadets/midshipmen travel in accordance with the policies of the respective Service Academy. If a cadet/midshipman wants a travel advance or settlement at a disbursing office, the respective Academy must be contacted for authorization.

020303. Monitoring Advances

A. General. When travel advances are authorized for TDY or permanent change of station (PCS) travel, they must be monitored to ensure a corresponding travel claim is filed within 10 days of the traveler's return to or arrival at the permanent duty station (PDS), or immediately when the orders are canceled. Travelers whose TDY extends beyond 30 days must file travel claims 5 days after the end of every 30-day period.

B. Failure To Submit Travel Claim. If a traveler has not submitted a claim within 15 days after the estimated date of return/arrival (provisions for separatees/retirees are in section 0204, below), the following action will be taken:

1. Marine Corps Members. Fifteen days after the member's estimated date of arrival/return, recoup the total amount of the advance through pay account checkage (see DFAS-KC 7220.31-R (reference e)). System acceptance of this transaction activates the delayed checkage program. The member is notified of the impending checkage on the next leave and

earnings statement (LES). The amount is then deducted from the member's pay the following month.

2. Other Travelers. Each DoD Component is responsible for ensuring that it has a process for monitoring travelers' advances. Prepare a letter advising the travelers of their responsibility to submit travel claims and/or repay their advances. If, on the 46th day after the traveler's estimated date of return/arrival, no response to the letter has been received, collect from the traveler's pay account. See DoDFMR, Volume 5, paragraph 300103, reference (f), regarding administrative offset procedures.

0204. ADVANCES FOR SEPARATEES OR RETIREES

020401. General. A member who is separating or retiring can be paid an advance incidental to separation/retirement no more than 10 days prior to the member and/or dependent(s) actual travel dates. Upon completion of the travel, a member who has received an advance must submit the travel claim to the appropriate disbursing office.

020402. Late Travel Claim. If the claim is not received within the required time frame, the disbursing officer responsible for settling the advance will:

A. Prepare a letter to the traveler advising: (a) of his or her responsibility to submit the travel claim to the appropriate disbursing office (b) that a response is required within 30 days, and (c) that, if the travel claim is not received within the required time, the total amount of the advance will become a debt. For a retiree, the debt will be referred for offset against his or her retired pay account. For a separated member, the debt will be referred for debt collection action to include possible offset against future Federal income tax returns.

B. If no response is received within the 30 day time frame, the responsible disbursing office holding the debt will forward the debt and necessary documentation to:

DFAS-DE/FYDE
6760 E. Irvington Place
Denver, CO 80279-8000

CHAPTER 3**DEPARTMENT OF DEFENSE GOVERNMENT TRAVEL CARD****0301 POLICY AND PURPOSE**

030101. General. It is departmental policy that the government-sponsored, contractor-issued travel card, hereafter referred to as the “travel card,” shall be used by DoD personnel to pay for all costs incident to official business travel, including lodging, transportation, rental cars, meals, and other allowable reimbursable expenses. The purpose of the travel card program is to provide for and standardize the use by DoD travelers of a safe, effective, commercially available method for paying expenses incident to official travel—including cash requirements. The travel card is used in order to improve DoD cash management, reduce DoD and traveler administrative burdens, and provide better service to DoD travelers. Unauthorized use may result in disciplinary or adverse personnel action. Commercial travel offices (CTOs) will accept the travel card for the purchase of transportation for official travel. In addition to individual travel cards, there are related travel card products consisting of travelers checks, unit travel cards and centrally billed accounts (CBA). These alternative applications will be the exception and shall be tailored to serve specific DoD Component needs.

030102. Program Oversight and Review. The OUSD(C)/Deputy Chief Financial Officer is responsible for DoD policy and program oversight over the travel card program. The Director, DFAS, is responsible for the operational control of the program.

0302 PROGRAM STRUCTURE AND RESPONSIBILITIES

030201. General Services Administration. The GSA awards and administers the master contract to provide travel cards for official travel. The contract’s current official name is “GSA Smart Pay Program.” A GSA contract administrator is vested with all responsibility for soliciting, modifying, and/or negotiating any part of the contract for its users.

030202. Office of the Under Secretary of Defense (Comptroller). The OUSD(C) is responsible for policy guidance covering the DoD travel card program.

030203. Director, Defense Finance and Accounting Service. The DFAS has established the DoD Travel Card Program Management Office (TCPMO). It works closely with OUSD(C), the GSA, the DoD Components, and the contractor to initiate program implementations, improvements, or exceptions.

030204. Assistant Secretaries for Financial Management and Comptroller and Agency Comptrollers. The Military Department Assistant Secretaries for Financial Management and Comptroller and Defense Agency Comptrollers, or equivalents, each are responsible for designating a Component Program Manager (CPM) for that DoD Component and notifying DFAS of the selection. Additionally, they shall ensure program management responsibilities are accomplished within their Component.

030205. Component Program Manager (CPM). CPMs are responsible for establishing and maintaining a government travel card program in compliance with this regulation. Each CPM also is responsible for establishing a travel cardholder hierarchy for his or her Component.

030206. Agency Program Coordinator (APC). APCs are responsible to their respective CPM for program execution and management at hierarchy levels determined by the CPM.

030207. Travel Cardholders. Travel cardholders are personnel to whom the DoD travel card has been issued for use in performing official travel. They will adhere to the procedures set forth in this Regulation.

030208. Unit Travel Cardholders. Unit travel cardholders are personnel designated as the responsible person for an account that can contain multiple supplemental accounts and provide the privileges, using a travel card, to groups or to individuals who do not have individual cards. (See sub-paragraph 030306.B)

0303 GOVERNMENT TRAVEL CARD INFORMATION

030301. General Information. The GSA contracts to make available government sponsored, individual travel cards. The master contract also permits travelers to use these travel cards to receive cash for payment of out-of pocket travel related expenses from a network of ATMs through use of a personal identification number (PIN) assigned at card issuance. The master contract provides for “on-line” access, a “dial-up” computer capability to display account and transaction data. DoD Components are required to inform the contractor in writing of the level (e.g., Service Headquarters, major command headquarters, and wing/base level) at which on-line access will be used within their organization. Currently, the contract provides a refund (rebate) on charge volume. Transaction fees for use of a cash advance at the ATM, and for the use of standard travelers checks are charged back to the travel card by the contractor. The travel card normally is imprinted with “US Government, For Official Travel Use Only” and, at Component request, may contain the Component name. A “generic travel card” may be issued upon written request by the APC to the contractor when security is an issue. The contractor provides program management reports to management levels determined by the TCPMO and the CPMs.

030302. The Program. The government travel card program consists of three parts: the traditional individually-billed charge card (which includes ATM access), centrally billed accounts (unit and organization cards), and travelers checks (issued by the traditional “purchase” method). The TCPMO will incorporate value-added optional features in the future. A PIN is assigned with each travel card to enable ATM cash withdrawals. Transaction fees are charged for both ATM cash withdrawals and travelers checks. These fees are reimbursable expenses provided the traveler requests reimbursement on the travel voucher (JFTR, paragraph U4521).

030303. Travel Orders. All travel orders must identify whether the traveler is a government travel cardholder. This statement will authorize alternative payment methods (e.g., transportation tickets being charged to a centrally billed account). It also will identify that government travel cardholders shall receive needed cash through ATMs. (See paragraph 020302 on Advances.)

030304. Eligibility

A. Permanently Assigned Personnel. DoD Components shall offer the travel card to all permanently assigned military and civilian personnel who are likely to travel. Commanders/supervisors may refuse to issue traditional, individually billed travel cards to personnel who have a history of financial irresponsibility. Travel card denials must be reviewed annually by the authorizing official. Optional charge card technologies, such as the flexible activation and stored value cards, are available and should be used to the extent possible when the traditional, individually billed travel card is judged to be inappropriate for use.

B. Recruiting Personnel. Service personnel assigned to recruiting positions are authorized use of the travel card for official reimbursable expenses in their local area.

C. Cadets/Midshipmen of Service Academies. Cadets/midshipmen travel in accordance with the policies of their respective Service Academies. When a cadet/midshipman is required to travel, the respective Academy must authorize travel card issuance and its use in lieu of cash advances in accordance with this Regulation. (See sub-paragraph 020302.C for Academy addresses.)

D. Reserve, Guard and Part-Time Civilian Employees. All Reserve Component personnel (to include Individual Mobilization Augmentees (IMAs)), and seasonal or part-time civilian employees are authorized to use the travel card for official travel. The optional charge card technologies, such as those described in paragraph A., above, should be used to the extent possible when the traditional, individually billed travel card is judged to be inappropriate for use.

030305. Individually Billed Accounts. The travel cardholder is responsible for payment in full immediately upon receipt of the monthly billing statement. The contractor may suspend travel cardholder charge privileges if payment is delinquent over 60 days, and may cancel the travel card when payment is delinquent over 120 days. The contractor may initiate garnishment proceedings through the judicial system against a travel cardholder's salary for accounts over 120 days delinquent, and also may notify credit bureaus of the delinquency. Canceled travel cards may be reissued by the contractor on a case-by-case basis when requested in writing by Component Heads or activity commanders through their designated APCs.

030306. Centrally Billed Accounts (CBAs)

A. General. CBAs can be established using either "cardless" account numbers or plastic cards. A CBA is issued to a DoD activity and charges are billed to that activity for

payment using official funds. All CBAs contain a unique government prefix that identifies the account as a centrally billed account for official federal government travel. The government prefix helps the designated CTO identify the account as eligible for government travel rates. CBAs currently can support up to 99 supplemental accounts that can be aligned to organizational structures. For example, supplemental accounts can designate specific divisions, departments, cost centers, or CTOs.

B. Unit Travel Cards. The use of this travel card program feature enables commanders/supervisors to provide transportation, lodging and meals for groups, teams, and travelers who do not have individual travel cards or who have been denied individual travel cards due to financial irresponsibility and when no other process is available to accomplish the mission. The unit travel card may include ATM and/or travelers check options. The CPM will designate the level at which unit travel cards may be issued and notify the card contractor of that designation in writing. Components are requested to restrict the issuance of unit travel cards wherever possible and maximize the use of the individual travel card. Reconciliation of the unit travel card billing statement is the responsibility of the person in whose name the account is issued.

030307. Reports. The card contractor will provide monthly summary reports.

A. For each CPM:

1. Industry Spending Summary - Agency Report, and
2. Agency Overall Program Report.

B. For Each APC:

1. Cardholder Account Listing, KG 2005. This report shows names, addresses, and telephone numbers of cardholders assigned to the APC basic account number. The APC is required to review and forward any corrections to the card contractor on a monthly basis.

2. Cardholder Activity Report, KG 2000. This report can be requested any time, but is provided monthly by the card contractor. The report identifies travel cardholder activity and ATM usage during the recent billing cycle. It should be reconciled with the travel order log monthly to determine possible misuse of the travel card.

3. Delinquency Performance Report, KG 3005. This report indicates the 60, 90, and/or 120-day delinquent travel cardholders. The report will be reconciled as outlined in paragraph 030407. Due to the sensitive nature of the report, it should be stored in a locked filing area.

4. Suspended Account Report, KG 3005.

5. Pending Cancellation Report, KG 3006.

6. Renewal Report, KG 3007.

030308. Misuse. APCs will review travel card usage reports and reconcile them with the official travel orders/travel log published for the corresponding month. The APC will notify the travel cardholder's supervisor if it appears that a travel cardholder has misused the travel card. The supervisor will take disciplinary action, as appropriate. A copy of the APC's notification, the contractor usage report reflecting misuse, and any applicable correspondence or notes will be maintained locally for future reference.

030309. Training. The TCPMO and the other DoD Components will ensure travel card program training materials are provided throughout the Department. Training materials will include specific manuals, videos obtained through the GSA contract, and available instructions for requesting contractor products tailored for unique Component requirements. DoD Components are responsible for ensuring the travel card training packages for APCs and travel cardholders are provided annually.

0304 MANAGEMENT CONTROLS

030401. General. This section identifies the standard travel card program management controls that are in place. DoD Components may request more restrictive program management controls for their organizations.

030402. Travel Card Applications. Applications will contain the following: a supervisor signature authorizing the travel card, a signed DoD statement of travel cardholder understanding, SSN, current address, and work/home phone numbers. The card contractor will issue travel cards only when the application is properly completed, has a basic control account number, and is signed by a recognized APC.

030403. ATM Cash Withdrawals

A. Limits. ATM limits are published through the TCPMO to each CPM. ATM cash withdrawals currently are limited to \$600 per month, provided the travel cardholder's account is current. This limit may be raised to \$1,000 per week/\$4,000 per month by the traveler with a telephone call to the travel card company using the toll-free number provided to all travel cardholders. Organizations with unusual travel requirements may work through their APC and the TCPMO to tailor higher limits to meet the traveler's special needs. In order to minimize costs associated with ATM cash withdrawals and maximize the benefits associated with charging travel expenses, ATM usage should be limited by travelers to cover only those travel expenses for which charging is not possible. Travelers should charge to the travel card as many of the expenses associated with official travel as possible.

B. Cash Advances. Cash advances, when approved, will be obtained no earlier than five working days before the scheduled departure date and not later than the completion of travel.

030404. Transaction Fees. Transaction fees that are charged for authorized ATM cash withdrawals and travelers checks are reimbursable expenses provided the traveler requests reimbursement on the travel voucher (JFTR, paragraph U4521).

030405. Travelers Check Program. This program is designed for frequent and long-term travelers, when the travel charge card is not appropriate for use. Travelers checks, authorized by the immediate supervisor and monitored through the APC, are issued to the individual traveler in pre-determined amounts on a continuing basis. The use of this portion of the travel card contract does not preclude the use of the ATM privilege.

030406. Travel Card Retail Purchases. There may be extenuating circumstances of official travel in which the use of the travel card is appropriately used for retail purchases. Each time a traveler uses the government travel card at a retail outlet, the merchant must “swipe” the travel card for approval of the sale. Retail purchases (i.e., those purchases other than airfares, lodging, meals and car rentals) generally are limited to \$500 per month.

030407. Delinquencies. The Departmental of Defense does not tolerate delinquency. Reports reflecting 60, 90, and 120-day delinquent travel cardholders will be reviewed by the APC within five working days of receipt. The APC will notify the immediate supervisors of 60-day delinquent travel cardholders, the division chiefs/commanders of 90-day delinquent cardholders, and the Component Head, activity commander, or designee, of 120-day delinquent travel cardholders. They will be notified in writing within five working days of delinquent report receipt. APC delinquent notifications will request that action be taken within five working days of notifications. APCs shall assist the card company by notifying them of all suspension/cancellation actions and by providing office address and telephone changes in a timely manner.

030408. Account Suspension/Cancellation. Individual travel card accounts are payable upon receipt of the contractor billing statement. Accounts are considered delinquent when the contractor has not received the payment in full before another bill is issued. Individuals who are delinquent for the full payment of the account will be added to the delinquent report provided on a monthly basis to the APC. Delinquent reports are provided in 60, 90, and 120 day increments. Individual travel cardholders who are delinquent for 60 days are suspended from ATM use. The APC and immediate supervisors are notified, and the travel cardholder is requested to make payment. A 90-day delinquency results in suspension of travel card and ATM privileges, APC notification, and supervisory-level notification. One hundred and twenty day delinquency results in a canceled account. Contractor actions that may result include: notifying credit bureaus of the debt, initiating garnishment proceedings, and possibly transferring a delinquent account to a collection agency.

0305 APC REQUIREMENTS

030501. APC Program Management Information

A. General. Complete and accurate files are critical to the success of the travel card program. The travel card correspondence files consist of background information, card contractor management information reports, memoranda, Component headquarters requirements, or other information received from the card contractor. Correspondence files will be maintained for 12 consecutive months after initial receipt and then destroyed. A copy of the travel card contractor's application package, any other correspondence relating to the package, and any correspondence relating to the individual travel cardholder shall be maintained by the APC. Due to the sensitivity of the data contained in these files, such data shall be maintained in a secure area.

B. Program Hierarchy. The hierarchy is the linkage of individual travel card accounts to the organization responsible for issuing the travel card by billing cycle and DoD Component management information. The APC is responsible for tracking incoming/outgoing travel cardholders to ensure validity of the agency hierarchy.

030502. Processing Applications

A. APCs will make application packages available to prospective travel cardholders. At a minimum, the travel card application package should contain the contractor provided Government Travel Card Application, the Government Travel Card General Information and the DoD Statement of Understanding for Cardholders (see appendix A). Applicants will complete the application, obtain supervisory approval, and submit these documents to the APC. The APC reviews the documents, signs the application and forwards it to the travel card company within two working days of receipt. The travel card contractor generally will mail the travel card to the traveler's address provided on the application.

B. Emergency applications are defined as applications for employees authorized to have a travel card and who are scheduled to travel within five working days. Emergency applications will be telefaxed immediately to the travel card contractor by the APC. APCs will verify that the travel card contractor received the emergency application. Emergency applications will be processed by the travel card contractor and travel cards delivered to the APC, or the individual as determined by the APC, within two days of travel card company receipt.

030503. Account Transfers - Within and Outside of the Organization. In order to maintain an accurate travel card hierarchy, it is essential that the assignments of DoD personnel are regularly revalidated. APCs are responsible for monitoring their employee/enrollee listings as part of their program management. APCs will use the following information to manage the movement of travel cardholders within the Department.

A. Transfers Within the Same Component. Inprocessing data sheets used throughout the Department must include the APCs name and location. Travel cardholders are responsible for ensuring that the losing and gaining APC and the travel card contractor are notified of impending transfers or PCS moves. Travel cardholder accounts will be suspended automatically 61 days after the travel cardholder leaves the current work site and will be canceled 91 days after leaving the original work site unless the travel cardholder reports his or her arrival to

the gaining APC. The gaining APC will notify the travel card contractor that the travel cardholder has reported, ensure that a new application is processed, and transfer the travel cardholder to their basic account number, or cancel the travel card, as appropriate.

1. The losing APC will:

a. Keep the travel cardholder account on his or her basic control account for 90 days.

b. Review proper use of the travel card with the travel cardholder, inform the travel cardholder of his or her responsibility to notify the gaining APC within 60 days of arrival at the new duty location, and remind the travel cardholder that the travel card will be suspended on the 61st day without gaining APC notification and canceled on the 91st day without gaining APC notification.

c. Obtain the reporting date, new assignment address, and the new mailing address from the travel cardholder.

d. Contact the travel card contractor to identify the travel cardholder's impending move, the new information as stated above, and the travel cardholder's account suspension date not to exceed two consecutive months (61 billing days) from the date of departure. Also identify the travel card cancellation date if transfer is not accomplished by the gaining APC. Confirm the initial telephone transaction with the travel card contractor's hierarchy maintenance form.

2. The travel card contractor will:

a. Update the travel cardholder listing for the losing APC.

b. If possible, contact the new APC and provide suspension and cancellation dates.

c. Suspend travel cardholder accounts if the gaining APC has not requested transfer of the travel cardholder account by the 61st day and/or, cancel the accounts if transfer is not completed by the 91st day.

B. Transfers Outside of Component. The travel card contractor cannot transfer travel card accounts outside of respective DoD Components due to differing billing cycles. If the travel cardholder travels in the performance of his or her new duties, another travel card will be issued. Travel cardholders are responsible for ensuring the losing and gaining APC and the travel card contractor are notified of impending PCS moves. Travel cardholder accounts will be suspended automatically 61 days after leaving the current work site and canceled 91 days after leaving the original work site, unless the travel cardholder reports to the gaining APC. The gaining APC will notify the travel card contractor that the travel cardholder has reported, ensure a

new application is processed, cancel the prior travel cardholder account and order a new travel card if appropriate.

1. The losing APC will:
 - a. Keep the travel cardholder account on his or her basic control account for 90 days.
 - b. Review proper use of the travel card with the travel cardholder, inform the travel cardholder of his or her responsibility to notify the gaining APC within 60 days of arrival at the new duty location, remind travel cardholder that the travel card will be suspended on the 61st day without gaining APC notification, and canceled on the 91st day without gaining APC notification.
 - c. Obtain the reporting date, new assignment address, and the new mailing address from the travel cardholder.
 - d. Contact the travel card contractor to identify the travel cardholder's impending move, the new information as stated above, and the travel cardholder's account suspension date not to exceed two consecutive months (61 billing days) from date of departure. Also identify the travel card cancellation date. Confirm the initial telephone transaction with the travel card contractor's hierarchy maintenance form.
2. The travel card company will:
 - a. Update the travel cardholder listing for the losing APC.
 - b. If possible, contact the new APC and provide the suspension and cancellation dates.
 - c. Suspend travel cardholder accounts if the gaining APC has not requested transfer of the travel cardholder account by the 61st day and, or, cancel the accounts if transfer is not completed by the 91st day.

030504. Termination. Travel cardholder accounts are terminated upon dismissal, retirement, or separation from federal service or upon personal request. Those travel cardholders who are entitled to a government paid move when terminating their accounts will be given a cash advance through EFT. The APC immediately must give the travel card contractor the new billing information (in the event the travel cardholder's account was active in the previous month before termination) and close and cancel the travel cardholder's account on a specific date.

030505. Delinquencies. Delinquency reflects adversely on the entire travel card program and will be addressed immediately by cognizant APCs through the travel cardholder's supervisory chain.

A. Monitoring Delinquencies. When a travel cardholder becomes delinquent, the APC will prepare a memorandum for delivery to the appropriate management level within five days of receipt of the delinquency report from the travel card contractor. Supervisors are required to present the delinquent memorandum to the travel cardholder within five working days of receipt. APCs may contact the travel card contractor to verify payment problems. Suspension or cancellation can be initiated by the APC, office director, activity commander or immediate supervisor after any delinquent period. The travel card contractor reserves the right to cancel the travel card when the delinquency reaches 120-days.

B. Processing Delinquencies. Upon receipt of the monthly delinquency report the APC will do the following:

1. Sixty Day Delinquency. At a minimum, ATM access is denied automatically by the travel card contractor. The APC will verify that the travel cardholder was on official travel and the voucher has been filed. The APC will notify the travel card contractor of any legitimate travel cardholder delinquency. This is done in writing within five work days of receipt of the delinquency report. APCs also may verify delinquencies by calling the travel card contractor representative and noting the date of the last payment, if applicable. When the delinquency has been verified as unresolved, the APC will prepare the 60-day delinquent memorandum (appendix A) and forward it to the immediate supervisor. The incidence of two delinquencies is justification for the APC to cancel the travel card.

2. Ninety Days Delinquency. The APC will reconcile the 90-day delinquent report with the 60-day report. Using the verification procedures outlined above, the APC will prepare the 90-day delinquent memorandum (appendix A) and forward it to the appropriate management level. One 90-day delinquency is adequate reason for cancellation unless the APC or appropriate supervisor justifies, in writing, why the travel cardholder's privileges should not be terminated.

3. One-Hundred Twenty Days Delinquency. Travel cardholders delinquent at the 120-day period will be canceled by the travel card contractor. The APC will prepare the 120-day delinquent memorandum (appendix A) for the appropriate activity commander, office director or equivalent. Travel cardholders canceled by the travel card contractor at the 120-day activity window require commander/director authorization and signature for reinstatement. The contractor reserves the right to deny reinstatement.

4. Travel Card Cancellation and Reinstatement Procedures. Reinstatement is at the discretion of the activity commander/director, or designated representative, and with the concurrence of the travel card contractor, once cancellation has occurred. Under no circumstance will the travel card contractor reinstate travel card privileges without the knowledge of the APC. Travel cards may be reinstated when the:

- a. Account is paid in full,
- b. Commander/director has approved the reinstatement, and

c. Travel card contractor concurs.

C. Notification Process. Upon notification that a travel cardholder is delinquent or abusing the travel card, the supervisor will present the appropriate memorandum to the travel cardholder within five working days. This will be followed by a memorandum to the APC that indicates the supervisory action taken. The supervisor must follow-up with the travel cardholder and the APC to ensure the delinquency is resolved. Delinquencies are considered resolved by:

1. Payment in full;
2. A reasonable explanation documented by the travel cardholder and submitted to the travel card contractor and the APC; and/or
3. An agreed upon repayment plan scheduled with the travel card contractor. (NOTE: The current travel card contractor is under no contractual obligation to agree to a repayment schedule.)

Appendix A identifies the Government Travel Card Billing Milestones with a description of each event.

D. Garnishment Procedures. Title 5, United States Code, section 5520a (reference (g)), allows for collection of just debts through the judicial system. When the contractor is awarded settlement, the claim is forwarded to the DFAS-Cleveland Center to process a collection from the individual travel cardholder's pay account.

030506. Unit Travel Accounts. When authorized, the APC will notify the travel card contractor in writing and request a unit travel account. The request must contain the name of the individual who will be responsible for the account and specify whether the account will be plastic or "cardless." The APC is responsible for reconciling the monthly billing statement and transmitting the certified invoice for payment. Unit travel accounts that are delinquent 60 days or more will be suspended by the travel card contractor unless the bill is properly disputed. Unit travel account undisputed bills that go delinquent for 60 days twice in a twelve month period, will result in account cancellation by the travel card contractor. The CPM will be so notified and no other unit travel account will be authorized for that activity.

030507. APC Management of All Reserve Components and Part-Time Civilian Employees.

A. Commanders/supervisors will authorize travel cards for Reserve Component personnel and part-time civilian employees. Travel cards may be maintained by the APC or the individual. When travel cards are in the individual's keeping, the APC will authorize travel card usage by calling the travel card contractor to request that the account be activated and stating the amount to be allowed in charges/cash and the expected dates of travel.

B. DoD employees who also are active Reserve or Guard members are required by law to provide their full-time federal employer with a copy of their order to perform military duty. Therefore, where applicable, the employee will be issued only one travel card. That card will be issued by the full-time employing agency, and also may be used for Reserve Component duty travel. Duplicate individual travel cards are not authorized within the Department.

CHAPTER 4

TRANSPORTATION ALLOWANCES0401 GENERAL

The transportation office(r) (TO) is responsible for issuing guidance on the use and procurement of transportation. Contact the TO for information regarding available transportation services and costs.

0402 MODE OF TRANSPORTATION

The AO directs or authorizes the mode of transportation for official travel and can direct the use of the TO. If the orders do not direct a specific mode of transportation or the use of the TO, the traveler may select the mode to use (exception noted in section 0403). In these instances, the travel order must include the transportation request (TR) cost by leg of travel.

0403 TRANSOCEANIC TRAVEL

Government-arranged transportation is directed for transoceanic travel. However, when personally procured transoceanic transportation specifically is authorized in the orders, the claim will be paid accordingly. The JFTR, paragraph U3115-C refers.

0404 TRAVEL BY PRIVATELY OWNED CONVEYANCE (POC)

040401. Use of POC. AOs cannot direct, as distinguished from authorize, the use of POCs in connection with official government business. See the JFTR, paragraph U3300. (NOTE: This includes travel as a passenger in a POC.)

040402. POC More Advantageous to the Government. A traveler authorized to use his or her POC as more advantageous (JFTR, paragraph U3305) is paid per diem for actual travel time not to exceed the allowable travel time. When actual travel time exceeds allowable, the higher lodging costs are used first.

040403. POC Not More Advantageous to the Government. When a traveler is authorized to use his or her POC as not more advantageous (JFTR, paragraph U3310), computation for actual travel time is limited to the allowable time in the JFTR, paragraph U5160 and JTR, paragraph C4300. The per diem is computed as indicated in the JFTR, paragraph U3310, and JTR, paragraph C4300.

040404. Allowable Travel Time Policy. The standard DoD procedures for administering travel time for all DoD travelers is based on the traveler's required period of duty at the TDY point. For periods in excess of the allowed travel time, the approving official determines if leave should be charged in accordance with DoD Component leave procedures.

A. Day of Arrival at the TDY Point. When the traveler is required to perform duty at the TDY point for at least half of the duty day on the day of arrival, that day is considered to be a day of duty. Travel time is granted prior to that first duty day. When the traveler performs duty at the TDY point for periods of less than half of the duty day on the day of arrival, that day is considered to be a travel day.

EXAMPLE: The traveler is authorized to drive by POC as more advantageous to the government. Two days of travel are authorized. The traveler performs duty for more than half a day upon arrival at the TDY point.

D/A	DATE	LOCATION	MODE	REASON FOR STOP
Dep	1 Oct	PDS	PA	
Arr	3 Oct	TDY point A		TD
Dep	8 Oct	TDY point A	PA	
Arr	10 Oct	PDS		MC

October 3 is considered a day of duty, October 1 and 2 would be travel days. Using the same example, if the traveler performed duty for less than half a day on October 3 at the TDY point, then October 2 and 3 would be the travel days. The AO must determine if October 1 should be charged as leave in accordance with Service procedures.

B. Day of Departure from the TDY Point. When a traveler is required to perform duty for at least half of the duty day at the TDY point on the day of departure, that day is considered to be a day of duty. Travel time is granted after that last day. When a traveler performs duty for periods of less than half of the duty day at the TDY point on the day of departure from the TDY point, that day is considered to be a travel day.

EXAMPLE: The traveler is authorized to drive by POC as more advantageous to the government. Two days of travel are authorized. The traveler performs duty for more than half a day upon departure from the TDY point.

D/A	DATE	LOCATION	MODE	REASON FOR STOP
Dep	1 Oct	PDS	PA	
Arr	3 Oct	TDY point A		TD
Dep	8 Oct	TDY point A	PA	
Arr	10 Oct	PDS		MC

October 8 is considered to be a day of duty; October 9 and 10 would be travel days. Using the same example, if a traveler performed duty for less than half a day on October 8 at the TDY point, then October 8 and 9 would be travel days. The AO must determine if October 10 should be charged as leave in accordance with DoD Component procedures.

C. Continuous Periods of TDY. When a traveler performs two or more consecutive periods of TDY (without returning to the PDS), and there is a delay between the

finish of one TDY and the start of the next TDY, per diem is payable for the period the traveler remains at one of the TDY locations. If the traveler does not remain at a TDY point, no per diem is payable, and the AO may charge the traveler leave based on Component procedures.

EXAMPLE: The traveler completes the first TDY on October 5, the next TDY starts October 8. The traveler is paid per diem during the delay at the first TDY point.

D/A	DATE	LOCATION	MODE	REASON FOR STOP
Dep	1 Oct	PDS	PA	
Arr	1 Oct	TDY point A		TD
Dep	8 Oct	TDY point A	PA	
Arr	8 Oct	TDY point B		TD

0405 BUSINESS/FIRST CLASS (PREMIUM) ACCOMMODATIONS

Travelers will not be reimbursed for premium accommodations, unless properly authorized in the orders (JFTR, paragraph U3125). It is departmental policy that travelers using commercial air carriers inside or outside CONUS for official travel use less-than-premium accommodations. Any questions should be referred to the TO.

0406 UNUSED/LOST TRANSPORTATION REQUESTS OR TICKETS

If a traveler does not use the TR/ticket issued by the government, he or she must return it to the TO. In exchange, the TO will give the traveler an original and one copy of a DD Form 730 (Receipt for Unused Transportation Requests and/or Tickets Including Unused Meal Tickets) or other receipt in accordance with DoD Component regulations and will provide a copy to the disbursing officer. The traveler must attach a copy of the DD Form 730 (or other receipt) with disposition instruction to the travel claim. If a claim is received with the unused tickets, return immediately to the traveler. If a traveler loses a TR or ticket, he or she should be referred to the TO for assistance. If the travel orders direct use of a TR, do not reimburse the traveler for personally procured transportation unless the AO issues a statement to allow reimbursement. The JFTR, paragraph U3140 refers.

0407 SPECIAL CONVEYANCES

When the traveler is authorized and uses a commercial rental vehicle (JFTR, paragraph U3415), a receipt from the rental agency that itemizes all charges must be attached to the claim for costs of \$75.00 or more. Also, when a mileage charge is included, a statement showing the official distance driven will be attached to the claim. A traveler who is on official travel for 4 days, but uses the rental vehicle for 7 days (3 days personal use), may be reimbursed for the cost of the rental vehicle, not to exceed the amount it would cost to rent the vehicle on a daily basis for the number of days of official travel.

0408 REIMBURSEMENT FOR THE COST OF DAMAGES TO COMMERCIAL RENTAL VEHICLES

040801. Cost of Damage to Rental Vehicle. When extra collision insurance is not purchased or included in the basic rental contract (e.g., MTMC negotiated agreements), the traveler may be reimbursed for personal funds paid to the rental agency for the full amount of damage sustained, or the deductible amount (as contained in the rental agreement), to a vehicle properly rented and damaged in the performance of official business. The JFTR, paragraph U3415-G, and JTR paragraph C2102-F, define official purposes. The traveler will submit a claim for reimbursement, through the AO, to the Claims Office of the supporting staff Judge Advocate General (JAG) for adjudication. Supporting documentation will include, but is not limited to: police accident report(s), police traffic citations, statements from witnesses, statement and itemized bills from the traveler and rental agency to ensure that the claim is valid, not yet settled, and in an amount compensable to the actual damage. Inclusion of an accident report will assist legal authorities in establishing fault on the part of the party not employed by the government, which may enable the government to recoup its loss when the negligence of that party can be established without costly investigation. Reimbursement is prohibited for damage sustained to a rental vehicle while being used on other than official business or by willful and wanton negligence on the part of the traveler.

040802. Claims Received From Rental Agencies. Rental agencies may submit a damage claim directly to the government. To be considered, these claims must be supported by appropriate documentation. Claims for reimbursement or payments made directly to the rental agency may be made in the full amount of damage sustained or the deductible amount (as contained in the rental agreement). Documentation will include, as a minimum, statements and itemized bills from the traveler and rental agency to ensure the claim is valid and in an amount commensurate with the actual damages. In addition, it should include an accident report to establish fault on the part of the party not employed by the government, which may enable the government to recoup its loss when the negligence of that party can be established without costly investigation (47 Comp. Gen. 145 (1967)). Reimbursement or payment to the rental agency is prohibited if the rental vehicle was being used on other than official business or by willful and wanton negligence on the part of the traveler.

0409 LOCAL TRAVEL IN AND AROUND PERMANENT OR TEMPORARY DUTY STATIONS

040901. General. The disbursing officer should make sure local directives clearly define the local area in which transportation expenses may be authorized or approved for conducting official business (JFTR paragraph U3500 and JTR, paragraph C2400). When two or more installations are in close proximity, the local area should be determined by the senior commander or senior service commander. When travelers perform TDY in the local area and require lodging, travel orders are necessary to support the claim.

040902. Permanent Duty Station. Travelers must provide a trip-by-trip accounting of all travel performed on official business. When like trips between the same points are made on

a repeated basis, one entry on the claim will suffice, provided that it reflects the distance or costs between these points and the dates on which the trips occurred.

040903. Temporary Duty Station. Travelers performing local travel in a POC at the TDY site must provide a trip-by-trip accounting of all travel performed. When like trips between the same points are made on a repeated basis, one entry on the claim will suffice, provided that it reflects the distance or cost between these points and the dates on which the trips occurred. This travel should be included on the claim or as an attachment thereto.

NOTE: Designated approving officials may not approve their own vouchers for payment of local travel.

CHAPTER 5**TEMPORARY DUTY TRAVEL****0501 AUTHORIZING OFFICIAL (AO)**

The AO is the authorizing official for all travel entitlements except when a higher authority is required, such as for authorizing first class travel. The AO signature constitutes valid, after-the-fact approval of allowable reimbursable expenses and itinerary or status changes.

DoD Components that require AO signatures will ensure that AOs are held responsible for validating all travel claim vouchers, approving or disapproving vouchers as necessary, and forwarding approved vouchers to the responsible travel computation unit.

0502 BEGINNING AND ENDING OF TRAVEL STATUS

Travel status begins when travelers depart their homes/offices and ends when travelers return to their homes/offices. The only exception is for aircrew members who travel as a crew. In that case, the travel status begins with take-off from the PDS and ends with landing at the PDS. The JFTR, paragraph U2200 applies.

0503 FURNISHED MEALS

050301. Complimentary Meals Furnished by a Hotel. When a traveler is furnished a complimentary meal by a commercial lodging establishment, that meal is not considered a deductible meal. There is no deduction from the M&IE rate regardless of whether the meal was consumed by the traveler. For rules concerning lodgings and meals furnished by government contract, see the JFTR, paragraph U4125-A2 and JTR, paragraph C4552-J.

050302. Meals Furnished at Conferences. When some but not all meals are included in conference fees, the traveler is entitled to proportional per diem on non-travel days.

0504 GOVERNMENT QUARTERS AND DINING FACILITY AVAILABILITY

050401. Non-availability Statements. Travelers are not required to obtain written non-availability statements before reimbursement of commercial lodging costs and the locality M&IE can be made. The availability of government quarters, contract quarters and dining facilities must be confirmed when a reservation request is made. The Commercial Travel Office (CTO) or traveler will obtain the confirmation by using the following procedures:

A. The CTO or traveler will contact the destination billeting office/Army Central Reservation Center for quarters availability. If quarters are not available, the billeting office/Army Central Reservation Center is required to give the CTO or traveler a confirmation/non-availability number or the name and phone number of the person contacted. When government or contract quarters are not confirmed as available, they will be considered not

available and a confirmation/non-availability number will be issued. The CTO or traveler will enter the confirmation/non-availability number on the trip record/voucher. If the CTO or traveler is not able to obtain a confirmation/non-availability number from the billeting office/Army Central Reservation Center, the traveler will note on the trip record/voucher the date/time the attempt was made. The AO then will approve the commercial lodging and per diem rates.

B.. The traveler will obtain information on the availability of government dining facilities through the CTO or the destination billeting office/Army Central Reservation Center. If not available, the M&IE rate for commercial meals is authorized. If the CTO or traveler is not able to obtain information on messing availability through the CTO arrangements process or directly from the destination billeting office/Army Central Reservation Center, then the per diem of commercial meals is authorized and the CTO/traveler will note on the trip record or voucher the date/time an attempt was made.

050402. Government Dining Facility

A. Government Dining Use Required. When use of a government dining facility is directed, but during the trip no such facility is available, the member may be reimbursed the full M&IE rate if all three meals are not available or the proportional rate if one or two meals are not available (provided the AO accepts the member's certification of non-availability). The government mess rate is paid for civilian travelers who consume all three meals in a government mess or the proportional rate on any day one but not all three meals are consumed in a government mess.

B. Government Dining Use Impractical. The use of a government dining facility is considered impractical on any day in which the member actually is traveling between or among locations (JFTR, paragraph U4400-B), except for meals incident to special status as outlined in section 0505.

050403. TDY Not At An Installation. When the TDY location is not at an installation, the traveler is not required to use nearby government facilities. However, if the traveler chooses to use government quarters at a nearby installation, a government dining facility is not considered available. The JFTR, paragraph U4400-B refers.

050404. TDY At An Installation. Travelers are not required to use available government quarters and dining facilities. However, when adequate government quarters are not used and the traveler procures commercial lodgings, reimbursement is limited to the cost of the available government quarters, except when the AO approves reimbursement for the cost of the commercial quarters. When the TDY is for training, the AO is the authority on whether the traveler should have used government quarters.

0505 SPECIAL STATUS AND PER DIEM RATES

Reduced/zero per diem rates for a special status, such as field duty, sea duty, hospitalization, rehabilitation, and essential unit dining take effect at 0001 the day after the traveler enters

the status and ends at 2400 hours the day preceding the day the traveler leaves that status. (See the JFTR, paragraph U4105.) Seventy-five percent (75%) of the appropriate M&IE rate is paid to travelers on the day of departure from and return to the PDS when entering or exiting a special status providing all meals. For all other days of travel when the traveler enters or exits a special status providing all meals, those meals provided after entering and before exiting the status are considered available and the proportional meal rate applies on those days. If no travel is involved and the traveler goes from one zero per diem status directly into another zero per diem status, no per diem is paid for that day. Otherwise, normal per diem computations, at the special status rates, apply on that day. If a traveler is required to procure a meal or quarters other than at the special status rates, reimbursement of the cost may be made not to exceed the per diem allowance for the meal or lodging allowance. This does not include payment of the basic food cost for officers or employees in field duty, sea duty, or under essential unit messing. Travel orders should identify the reduced per diem rates, availability or non-availability of government quarters, authorization for proportional per diem as applicable, identification of special status and reference to the letter/message in which they were established. If this information is not included in the travel order, the AO must include it on or with the voucher when approving the voucher.

0506 CONSECUTIVE TDY

Per diem is payable for the interval between two periods of TDY if the interval exists through no fault of the traveler and the traveler either remains at the first location or travels to the next TDY location within the allowable travel time.

0507 LEAVE, PERMISSIVE TDY, OR ADMINISTRATIVE ABSENCE IN CONJUNCTION WITH FUNDED TDY

050701. Permissive/Administrative Travel Time. A traveler who takes leave, permissive TDY, or an administrative absence before or after a funded TDY, is entitled to travel allowances from the PDS to the funded TDY location and return to PDS. If the traveler takes leave, permissive TDY, or an administrative absence between two TDY locations, the traveler is entitled to allowances for direct travel between the two locations.

050702. Travel Time When Using Privately Owned Conveyance. Permissive or administrative travel time is authorized when a traveler is authorized to travel by POC for personal convenience to a funded TDY of 16 days or more and reimbursement is based on a constructive schedule. The allowable travel time is computed based on the provisions of paragraph U5160, JFTR for military personnel and paragraph C4300, JFTR for civilian employees. Permissive or administrative travel time is not authorized when the orders direct a mode of transportation and that mode is available but not used. Per diem is not authorized for the additional period.

050703. Leave and Overtime in Conjunction with Official Travel. The unit commander (or designated representative) or employee's supervisor is the authority for making and documenting determinations regarding leave and duty status, to include overtime. The granting,

accounting for, and associated reporting procedures are organizational responsibilities made in accordance with DoD Component instructions.

0508 RETURN TO THE PERMANENT DUTY STATION DURING TDY

050801. Authorized Return. When a travel order authorizes return to the PDS, the traveler is authorized travel, transportation allowances, and per diem for travel from the TDY site to the PDS and return to the TDY site. When the AO has authorized or approved the lodging costs maintained at the TDY site as mission essential, the incurred expenses are paid as a reimbursable expense. In making the decision to authorize/approve, the AO must determine that the reasons for retaining the lodging were reasonable and necessary and not strictly for the convenience of the traveler. This determination should be made after considering the traveler's efforts to obtain lodging on a weekly or monthly basis or other long-term rental agreement. When the lodging retained is charged on a daily basis, the AO should consider such factors as the length of the TDY, the amount of personal belongings, the capability of the establishment to store those belongings, and the ability of the traveler to secure a room upon return. The AO will state the reason for authorizing or approving reimbursement of the retained lodging. For this entitlement, the permanent quarters from which the traveler normally commutes to the PDS are considered the same as the PDS. If the traveler goes to another location, no allowances are authorized for the travel. Per diem is computed as if the traveler remained at the TDY location.

050802. Voluntary Return. When a traveler voluntarily returns to the PDS during a TDY period, the traveler's entitlement is limited to the lesser of the actual travel cost for returning to the PDS and what it would have cost had they remained at the TDY site. The factors included in determining actual travel costs are: per diem for the travel days (see paragraph 050801 for determination of when per diem begins and ends); round trip transportation for the mode used; and cost for quarters retained at the TDY site. The JFTR, paragraph U4130 refers.

CHAPTER 6

PERMANENT DUTY TRAVEL0601 TRANSPORTATION AND STORAGE OF HOUSEHOLD GOODS (HHG)

Normally, the government will arrange for the shipment of HHG by government bill of lading (GBL), authorize an employee to use the commuted rate, or allow the member a Do-It-Yourself (DITY) move. When DoD personnel arrange for the shipment and GBL is the authorized method, the TO provides information concerning the traveler's allowable expenditures and computes the amount the shipment would have cost the government. When the commuted rate is the authorized method of shipment, payment is based upon the amount computed from the GSA rate schedule. If the TO instructs the traveler to make his or her own arrangements, or if a TO is not available, payment is made for actual costs incurred to procure authorized services. In all other instances, payment is limited to the actual cost incurred, not to exceed the amount it would have cost the government.

060101. Commuted Rate Method. When a DoD employee is authorized to ship HHG at the commuted rate, the payment is computed using the GSA rate schedule in effect on the date the carrier picked up the HHG, or the date that the employee actually moved the HHG without regard to government cost. The claim is supported by certified weight tickets or a constructive weight determination made and approved in accordance with paragraph C8000, JTR.

060102. DITY Moves. The DITY program is a voluntary program that enables Service members, or a deceased member's next of kin, to move their HHG personally and be paid an amount equal to 80 percent of what it would have cost the government. The TO must authorize or approve a DITY move. In addition, the member must have orders authorizing PCS, TDY (with HHG entitlement), or assignment to or from government quarters. The TO gives the member a DD Form 2278 (Application for Do-It-Yourself Move and Counseling Checklist). This form shows the constructive GBL or contract cost for moving the HHG.

A. Impact On Other PCS Entitlements. Service members and/or dependents traveling to the destination in the rental vehicle or POC used for a DITY move are authorized both DITY and PCS allowances. PCS entitlements are not part of the DITY program and are separately processed.

B. Claims. Claims for DITY moves must be supported by the Service member's statement of expenses actually incurred. In addition, the claim must include either a copy of certified weight tickets (gross and empty) or approved constructive weight by the TO.

(NOTE: No incentive can be computed without valid weight tickets or approved constructive weight by the TO.)

C. Payment Procedures. DITY claims are paid in accordance with each Service's procedures. Service addresses for DITY claims are found in subparagraph 060102.D, below. Compute the DITY claim as follows:

1. Obtain the GBL cost or local contract cost as provided by the TO.
2. Multiply this cost by 80 percent to obtain the maximum DITY entitlement.
3. Deduct the expenses actually incurred by the Service member from the maximum DITY entitlement. The result is the member's incentive payment.

NOTE: If the actual expenses are more than 90 percent of the maximum gross DITY entitlement, it may be advantageous for the Service member to be reimbursed under the actual expense method. The member would be reimbursed up to 100 percent of what it would have cost the government to move the HHG. In that instance, no income taxes are withheld from the payment, since the member does not receive an incentive payment.

4. Multiply the incentive payment by the applicable tax withholding percent. This amount is withheld for Federal Income Tax (FITW).
5. Deduct the FITW amount from the incentive amount to determine the amount payable to the member.
6. Deduct any advance operating allowance paid to the member.
7. Prepare TD Form W-2 (Wage and Tax Statement). Insert the incentive portion of the DITY move payment in the earned income block and insert the FITW withheld in the Federal Income Tax Withheld block.

D. Service Addresses for DITY Payments

1. Army. Forward a copy of the claim to DFAS-Indianapolis Center, ATTN: DFAS-IN-FTFA, Column 241M, 8899 E. 56th Street, Indianapolis, IN 46249-0651. Indicate the weight shipped with any other record of shipment or storage under the same travel orders. Indicate whether any excess charges are to be collected from the member.
2. Navy. Forward a copy of the claim to the Commanding Officer, Navy Material Transportation Office, 1837 Morris Street, Suite 600, Code 023, Norfolk, VA 23511-3492.
3. Air Force. Forward claims to the Air Force Excess Cost Adjudication Function (ECAAF), Joint Personal Property Shipping Office, San Antonio, TX 78286.

4. Marine Corps. Forward claims to the Commanding General, 470 Marine Corps Logistics Base, Albany, GA 31704-5000.

060103. Reimbursement for Personally Procured Shipment or Storage of HHG

A. Claims. Claims are authorized for personally procured shipment or storage of HHG and baggage. The claims must include the traveler's certification, as follows: "I certify that this shipment (including drayage, storage, packing, and crating) consisted of household goods and personal effects. These items belonged to me and were used by me (or my dependents) before the effective date of my orders. They were not intended directly or indirectly for any other person or persons or for sale. The following shipments were previously made at government expense under the same travel orders that support this claim. (If no previous shipments, show "NONE".) I certify that I did not request shipment under the DITY or any other program. I further certify that the declared professional books, paper, and equipment belong to me and are necessary in the performance of my official duties."

B. Supporting Documents

1. Statement from the TO on the constructive cost of shipment by GBL, accessorial services, or storage that the charges claimed are reasonable and that the member was instructed to personally arrange the shipment (if applicable).

2. Three copies of all applicable orders.

3. Receipted bills signed by an authorized agent of the company.

4. Copy of time extension certificate, power of attorney, or written authorization.

5. The claimant's statement showing the necessity for any storage over 90 days. (Non-availability of government storage is not acceptable.)

6. On shipments by van carriers, a certified weight ticket must be furnished. Instead of a weight ticket, where charges are based on cubic measure, the owner may obtain a certificate from the carrier stating: "No scale within 10 miles. Shipment used _____ cubic feet of properly loaded van."

7. Packing charges must be itemized to show size, type, and number of containers used with charge for each.

8. Receipts for packing, crating, drayage, unpacking, and uncrating must be itemized and supported with a statement by the TO for the area on availability of government facilities.

9. Costs if TO had performed or procured the services must be shown. (This is not required for accessorial services itemized on a GBL for line-haul van shipment.)

C. Claim Submission. The claim is submitted for payment in accordance with each Service's/agency's procedures.

D. Payment. If the claim is proper and is supported by the appropriate documentation, the disbursing office pays the claim.

0602 TRANSPORTATION OF PRIVATELY OWNED VEHICLES

If overseas travel with a POV was concurrent, a traveler must include travel to the vehicle port of embarkation and the vehicle port of debarkation with the PCS travel claim. If not concurrent, a separate claim must be submitted. A TDY order is not required when a separate trip is performed to pick up or deliver the vehicle (the PCS orders provide entitlement). Normally, a DD Form 788 (Private Vehicle Shipping Document for Automobile) will support the claim. However, when a traveler performs PCS travel and has a commercial shipping firm process the vehicle for shipment at government expense, the DD Form 788 usually is not in the traveler's possession at the time that the claim is processed. In those instances, a statement from the traveler, accompanied by a copy of the billing from the commercial firm, is acceptable.

0603 TRANSPORTATION OF MOBILE HOMES

060301. Employee Allowances

A. General. A DoD employee who ships a TDY weight allowance to a TDY location en route does not lose the right to elect mobile home allowances. The TO determines the authorized and unauthorized costs incident to a mobile home shipment.

B. Claims. The JTR, chapter 10 specifies the forms to be used in paying claims. Additionally, when movement of a mobile home is made by personally procured commercial transportation, a statement of authorization is issued by the TO. An original or legible copy of the paid or unpaid bill from the commercial transporter is required and the bill must be completely itemized to preclude any payment of unauthorized costs.

060302. Member Allowances

A. General. A Service member directed to perform a PCS is entitled to transportation and mobile home allowances. A member also can be entitled to movement of a mobile home under unusual or emergency circumstances, even though not related to PCS allowances. When a member is directed to perform TDY en route, the authorized shipment of a TDY weight allowance does not preclude the entitlement to transportation of a mobile home. The transportation entitlements, as well as the conditions of eligibility, are contained in the JFTR, chapter 5.

B. Claims. The preparation of claims and submission of supporting documentation is as required by Service procedures.

0604 DISLOCATION ALLOWANCE (DLA)

DLA is paid based on (a) the Service member's grade and dependency status on the effective date of orders, and (b) whether the dependents relocate incident to the PCS. If a change of grade occurs between the date orders are issued and the effective date of orders, a copy of the promotion/demotion orders may be submitted with the claim versus an amended order. Do not advance or pay DLA to members without dependents in pay grades E-6 (E-5 for USAF/USN) and below without a statement from the gaining organization that the member is not required to use government quarters. Members without dependents in the pay grade of E-7 (E-6 for USAF/USN) and above can be advanced or paid DLA based on their statement that government quarters will not be/are not assigned. The movement of a mobile home does not preclude the payment of a DLA.

0605 CIVILIAN MISCELLANEOUS EXPENSE ALLOWANCE

The payment of the flat miscellaneous expense allowance does not require receipts or itemized statements. However, when a DoD civilian employee claims actual expenses, the civilian personnel office assists in the determination of the allowable expenses. The statement found in the JTR, paragraph C9005, is required either on or accompanying the voucher.

0606 CIVILIAN TEMPORARY QUARTERS SUBSISTENCE EXPENSE (TQSE)

The travel orders must authorize the initial TQSE period. Additional periods of TQSE require amended orders. The disbursing office does not determine the number of TQSE days authorized. Expenses must be itemized on a per meal and per item basis. Receipts are required for all expenses as specified in the JTR. Additionally, the DoD employee can claim grocery costs for at-home meals when in a TQSE status. The total cost of consumable groceries will be divided by the number of at-home meals consumed. The proration of groceries is authorized as long as the cost of the groceries consumed is reasonable. The approving official makes the final determination on any question(s) concerning reasonableness of expenses during a TQSE period. Advances and payments for TQSE are based on the provisions of the JTR, chapter 13.

0607 CIVILIAN HOUSE HUNTING TRIPS

If authorized in their travel orders, DoD employees may make house hunting trips, not to exceed 10 consecutive days. The employee and spouse can travel together or separately; however, the cost cannot exceed one round trip for travel together. The number of days house hunting that the employee uses does not limit the number of days for the spouse, (e.g., the employee can take 4 consecutive days and the spouse could still use up to a total of 10 days). Advances and payment for house hunting trips are based on the prescribed per diem rate.

0608 CIVILIAN REAL ESTATE TRANSACTIONS

DoD employees can be reimbursed for expenses required for the sale and purchase of a residence or with the settlement of an unexpired lease in connection with a PCS. The employee must file a DD Form 1705 (Application for Reimbursement of Expenses Incurred by DoD Civilian Employees Upon Sale or Purchase (or Both) of Residence Upon Change of Duty Station). Separate DD Forms 1705 are required for expenses at the old duty station and at the new duty station. Copies of the supporting documentation showing costs incurred must be attached. The approval authority must approve the appropriate DD Form 1705 in accordance with Component regulations for real estate transactions at the old and new station. The claim will be submitted according to the JTR, chapter 14.

0609 RELOCATION INCOME TAX ALLOWANCE (RITA)

060901. Entitlement. The RITA entitlement is a two-year, two-process calculation.

A. Year One Withholding Tax Allowance (WTA). The WTA is an estimated partial payment of the final RITA payment designed to cover FITW from the PCS moving expense reimbursement. It is intended to provide an immediate offset to the tax withheld on the payment and also is subject to withholding. As a result, payment of the WTA allows the employee to receive the same reimbursement had the withholding not been required. Federal Insurance Contribution Act (FICA) deductions may not be reimbursed to the employee. To receive the WTA, an employee must agree in writing to repay any excess WTA amount paid in year one. The agreement as specified in C16007-5, JTR may be written on the settlement voucher or may be a separate statement. The statement should read similar to the following: "I agree to repay any excess amount of WTA paid to me in one year and submit the required certified tax information and claim for my RITA within 120 days, unless an extension is granted, after the close of year one. I understand failure to comply with this requirement will preclude payment of the WTA. I also understand that the entire WTA will be considered an excess payment if the RITA claim is not submitted in a timely manner to settle the RITA." Compute the WTA as follows:

1. Determine amount of covered reimbursable expense.
2. Multiply step 1 by .3889 to arrive at the WTA amount.
3. Add the step 2 amount to step 1 to determine the total income subject to tax.
4. Multiply step 3 amount by .28 to determine FITW amount and multiply step 3 amount by the applicable FICA amount.
5. Subtract step 4 amounts from step 3 amount. This is the net payment or net income to the employee.

NOTE: Enter the step 3 and step 4 amounts (FITW and FICA) in appropriate blocks on TD Form W-2.

B. Year Two RITA. The RITA payment is made in the calendar year following the calendar year in which the WTA is paid. RITA is based on employee's gross compensation, tax filing status, and marginal tax rates. It reconciles the WTA payments with the employee's personal tax liability. The employee must file a claim for RITA; it is not automatic. If an employee does not file for the RITA in year two, the employee is liable for the additional federal income tax incurred as a result of the additional income. The RITA does not cover any moving expense for which the IRS allows a deduction. In some instances, when an employee files the final RITA claim in the second year, he or she will be in a lesser tax bracket because of lower earned income. If the calculation of the RITA results in a negative amount, do not adjust prior year or current year income. The employee is obligated to repay this amount as a debt due the government. A negative W-2 is not issued.

NOTE: Year two is the calendar year in which the RITA payment is made. The dollar value of the payment will appear on the employee's W-2 as additional income.

060902. Tax Withholding. Both the WTA and RITA are subject to FITW and FICA. State and local (if applicable) tax withholding rates also must be considered in the RITA computation but are not to be withheld from the payment to the employee.

060903. Funding. RITA is a PCS travel settlement adjustment; therefore, normal prior year funding procedures apply. That is, the reimbursable expenses of an employee transferred in the interest of the government must be charged against the appropriation current when valid travel orders are issued. The organization responsible for the original funding of the move has the responsibility to secure adequate funds for the adjustment vouchers.

CHAPTER 7**EVACUATION ALLOWANCES****0701 GENERAL**

Personnel evacuations require special handling by disbursing office personnel at the evacuation point, safehaven, and designated places. The processing of evacuees requires patience, tact and expeditious service.

0702 MEMBERS' DEPENDENTS

070201. Overseas. Information on evacuations from overseas areas for a Service member's dependents is released by message from the Office of the Under Secretary of Defense (Personnel and Readiness) (OUSD(P&R)) or other responsible official designated by paragraph U6003-A, JFTR. The message announcing the evacuation outlines the safehaven locations. The JFTR evacuation applies both to command and noncommand-sponsored dependents of members stationed overseas. It further applies to command sponsored dependents who are en route to establish a residence with the member and to student dependents who are authorized to travel to the member's PDS. (NOTE: Entitlement to evacuation allowances is based on command sponsorship of the dependents. Command sponsorship is a personnel decision and should be reflected in the evacuation order.) The JFTR, chapter 6, part A, details all travel and transportation allowances for overseas evacuations.

070202. CONUS. Information for evacuations within CONUS is released by the OUSD(P&R) or other responsible official designated by paragraph U6051-A, JFTR. The message announcing the evacuation will designate the safehaven location. The evacuation applies to dependents residing in the vicinity of the member's PDS or at an authorized designated location. It also applies to dependents en route to establish a residence with the member, and to dependents residing in the vicinity of the member's old or new PDS. The JFTR, chapter 6, part B, details all travel and transportation allowances for CONUS evacuations.

0703 EMPLOYEES AND THEIR DEPENDENTS

The Office of Personnel Management (OPM), in conjunction with the OUSD(P&R), issues policy for DoD civilian employees. The JTR, chapter 12 and appendix J, governs evacuation in foreign countries. Title 5, United States Code, and the Federal Personnel Management Supplement (references (h) and (i)) govern evacuation from all other locations. These directives set forth the authority and procedures for paying employees and their dependents who are evacuated.

0704 EVACUATION ADVANCES AND PAYMENTS

070401. Orders. Evacuation advances and payments must be supported by copies of the departure orders. If such orders are not available, refer evacuees to the local personnel organization. Evacuees requiring advances should use the available ATM or EFT once they have

departure orders. If no ATM is available or EFT cannot be used, an alternative payment method may be used by the disbursing office.

070402. Evacuated From Foreign Locations. Dependents of Service members should present a DD Form 1337 (Authorization/Designation for Emergency Pay and Allowances) in order to receive such allowances. Payments to dependents of DoD employees should be made only upon presentation of a DD Form 2461 (Authorization for Emergency Evacuation Advance and Allotment Payments for DoD Civilian Employees).

070403. Disbursing Officer Guidance. The disbursing officer supporting the evacuation point or safehaven area should assist any evacuated traveler with all financial matters. The assistance provided can include the following:

- A. A briefing sheet that includes the disbursing office's phone number(s), mailing address, and hours of operation;
- B. A description of evacuation entitlements;
- C. A listing of documentation required for advances and payments. Advise the dependents to submit a photocopy of the front and back of the identification (ID) card with each claim submission; and
- D. When, where and how to submit their claims for advances and payments. Advise evacuees that all claims after the initial one will be handled through the mail.

NOTE: If problems are encountered, the disbursing officer should contact his or her respective DoD Component.)

070404. Claims. The disbursing officer should assist evacuees with claim preparation. Each evacuee must be asked about advances or previous payments. (NOTE: Initial evacuation advance payments are usually mass evacuation payments. Disbursing office personnel are encouraged to use "multiple travel payment list" vouchers to expedite payments. This alternative payment method does not lessen the need for proper documentation.)

0705 IDENTIFICATION OF EVACUEES

070501. Identification Available. United States Uniformed Services ID and Privilege Cards (DD Form 1173), passports, or other forms of picture ID are sufficient identification to pay evacuees.

070502. Identification Not Available. If the evacuee has no picture ID whatsoever, two witnesses may vouch for the evacuee. Each witness will sign a statement as to the identification of the evacuee. The witnesses will provide ID indicated in paragraph 070501, above, as well as their permanent address. The lack of adequate identification will delay service to any evacuee; however, every effort will be made to accommodate the evacuee.

CHAPTER 8

PROCESSING TRAVEL CLAIMS0801 GENERAL

This chapter provides general guidance for the preparation, submission and processing of travel claims, and the forms used for travel.

080101. Disbursing Officer Responsibilities

A. Travel Payments. The disbursing officer is responsible for all travel payment operations and is accountable for disbursing money for travel payments as provided in Volume 5, Chapter 10 of this Regulation.

B. Accuracy and Propriety of Payments. The disbursing officer is not responsible for the preparation of a traveler's voucher. If requested, however, disbursing office personnel may provide assistance and guidance. The disbursing officer or, if designated, the Certifying Officer, is responsible for the accuracy and propriety of payments, ensuring the travel statements and vouchers are accurate and properly supported. The disbursing officer has direct control over the data review and document comparison before and after payment on submitted vouchers. The disbursing officer is not required to pay incomplete, improperly prepared, or doubtful claims.

C. Random Audits. The disbursing office will use random audits using statistical sampling techniques in accordance with the Under Secretary of Defense (Comptroller) Random Audit Policy of October 31, 1996, for prepayment examination of travel vouchers to support certification and payment. Random sample quality assurance reviews will be conducted at disbursing offices to provide assurance that travel vouchers are accurate and properly supported. Performance measures and procedures to track the progress of disbursing offices will be used to track the random audit process.

080102. Payment Method. EFT is the means by which a travel claim is settled within the Department. Until the waiver authority expires, January 1, 1999, checks may be used to make a travel payment as an exception when the traveler has written certification on file that he she does not have an account with a financial institution or authorized payment agent. Supervisors may authorize check payment in limited situations where the traveler does not have access to an account at a financial institution that can receive EFT transmissions. Split-disbursement, which permits direct payment to the travel card contractor for charges incurred on the travel card and to the cardholder for any residual amount, shall be offered (see paragraph 080305 of this volume).

080103. Adjustments of \$10 or Less. The traveler shall be paid all amounts due on the original settlement voucher. However, the disbursing officer is not required to make collections of \$10 or less on a final settlement or on an overpayment that is subsequently detected.

Conversely, supplemental payments for \$10 or less shall be processed only when specifically requested by the traveler.

080104. Over Advances. When the disbursing officer determines, upon settlement of the claim, that a traveler has received an excessive travel advance, the traveler is sent a letter of indebtedness and given the opportunity to immediately repay the excess advance. If the traveler does not repay the advance within the specified period, collection action shall be initiated as required by section 0203 of this volume.

080105. Overpayments. When the disbursing officer detects an overpayment in excess of \$10, a letter of indebtedness shall be forwarded to the traveler requesting remittance. The traveler is required to pay the indebtedness within 30 days after the date of notification. If payment is not received within the 30 days, collection action shall be initiated as outlined in Volume 5 of this Regulation.

080106. Customer Service Information. The disbursing officer should offer courteous customer service to all travelers and develop procedures to aid that effort. Final travel vouchers or the Advice of Payment must include a point of contact and telephone number at the travel computation unit for the traveler to contact with questions/concerns. Recommend the following be considered:

- A. Locally devised pamphlets;
- B. Information sheets providing travel tips;
- C. Travel information articles in installation or unit newspapers;
- D. Articles in daily or weekly bulletins or notices;
- E. Briefings at commander's calls, organizational meetings, or similar functions.
- F. DoD Component internet addresses with financial customer service links.

080107. Income Taxation of Reimbursable TDY Allowances. The definition of TDY payments liable for taxation is found in the IRS Code, as referenced in JTR, Chapter 4, Part J. When, during the period contemplated by the orders at one location, the orders are extended to a period exceeding a year, the period subject to taxation will be measured from the date of the order directing the additional or extended duty. Additionally, the taxation is based on the intent of the original orders. If the original orders are for a period of a year or longer and the actual assignment is completed in less than a year, the entire period is subject to taxation. Form W-2 is issued for all entitlements received when TDY assignments are taxable.

0802 FORMS

The following forms may be used by travelers to claim travel and transportation allowances:

- DD Form 1610 (Request and Authorization for TDY Travel of DoD Personnel), used by DoD TDY travelers to support travel claim payments;
- DD Form 1614 (Request and Authorization for DoD Civilian Permanent Duty Travel), used by DoD travelers to support PCS travel payments;
- DD Form 1351 (Travel Voucher), a multiple use form;
- DD Form 1351-2 (Travel Voucher or Subvoucher), used by travelers to claim travel allowances for official travel performed and is for dependents' travel and other PCS allowances;
- DD Form 1351-2c (Travel Voucher or Subvoucher Continuation Sheet), used by the traveler when the DD Form 1351-2 does not provide sufficient space;
- DD Form 1351-3 (Statement of Actual Expenses), used by the traveler to claim actual subsistence expenses when the TDY is performed on an actual expense basis;
- DD Form 1351-6 (Multiple Travel Payment List), used by the disbursing office to make multiple payments for travel and TDY performed under like conditions and circumstances; and
- SF 1164 (Claim for Reimbursement for Expenditures on Official Business), used by the traveler to claim reimbursement for expenses incurred for recruiting duty and within and around a PDS or TDY station.

0803 VOUCHER PREPARATION

080301. Completion. The traveler is responsible for the preparation of the travel voucher. Even when someone else prepares the voucher, the traveler is responsible for the truth and accuracy of the information. When he or she signs the form, the traveler attests that the statements are true and complete and is aware of the liability for filing a false claim. All claims and attached statements must be completed using ink, typewriter, or computer-generated forms.

080302. Itinerary. Claims must contain a complete itinerary for the entire period of travel. This includes return to the PDS during temporary duty and periods of leave used. On claims for TDY travel, the first entry should always be the traveler's residence or office, as applicable, except for aircrews (JFTR, Table U2C-1) or extended TDY (TDY in excess of 30 days). The first entry on PCS travel claims should be the last PDS. Travel from the residence or

office to a carrier terminal does not need to be listed in the itinerary; the mileage or taxi is claimed as a reimbursable expense. This also applies to travel from a carrier terminal to the place of lodging or TDY site. Departure from and arrival at a POE/POD must be listed.

080303. Reimbursable Expenses. The traveler will enter all allowable reimbursable expenses.

080304. Recruiting Expenses. Recruiters will claim reimbursement using the SF 1164 (Claim for Reimbursement for Expenditures on Official Business).

080305. Split Disbursement. A payment option available to travelers paid through travel offices which use the Integrated Automated Travel System (IATS) Version 5.0. This payment option allows DoD travelers to elect a split-disbursement, i.e., have authorized expenses charged to individual travel cards paid to the card contractor via EFT at voucher settlement. Travelers must state on the voucher in block 1 (voucher date) the amount of money to be forwarded to the card contractor. This payment option is only available to travelers with EFT.

080306. Other Instructions

A. Attach all lodging receipts and any other receipt of \$75.00 or more to the voucher.

B. Travelers are no longer required to provide departure and arrival times on vouchers. The duration of TDY travel will be recorded in block 17 of the revised DD Form 1351-2. Travelers will receive 75 per cent of the per diem rate on the first and on the last day of travel.

0804 SUBMISSION OF TRAVEL CLAIMS

080401. General. All claims must be submitted within five days of return to or arrival at the PDS. In the case of extended TDY, the traveler must submit a claim for each 30 day period. That claim must be submitted within 5 days after each 30-day period.

080402. TDY Claims. TDY travelers must complete and submit a travel voucher with travel orders, lodging receipts, and any other supporting documents. The following subparagraphs identify the steps required by the travelers, AO, and the travel computation units, in order to process a TDY claim.

A. The traveler will:

1. Prepare the travel claim voucher identifying the duration of TDY travel in block 17. Attach all supporting documentation to include the original or legible copies of the travel order and receipts.

2. Attach to the voucher:

- a. All lodging receipts,
- b. Any receipt of \$75.00 or more, and
- c. A DD Form 2762 (October 97) (Direct Deposit Sign Up Form), to correct/change a bank account number; plus, for those using EFT transactions, indicate the dollar amount to go to the travel card account and to the individual bank account. NOTE: Travelers must provide their financial institution routing transit number (RTN), account number, and account type (C for checking; S for savings) in the accounting block of the DD Form 1351-2 when their EFT information is not on file with the travel computation office settling the travel claim.

3. Sign, date and include home or unit address on the travel claim voucher. NOTE: Ensure that the signature and all information is legible.

4. Forward the original or telefax the travel claim voucher, appropriate receipts, and supporting documents to the AO or, when authorized by the AO, directly to the travel computation unit identified on the travel order.

B. The AO must sign the travel voucher when the entitlement or the itinerary has changed. By signing the travel claim in block 22a or block 27, the AO approves the claim thereby negating the need for any amendments to the travel orders. All travel vouchers must be signed by the AO when required by the agency.

C. The office responsible for computing the travel claims will:

1. Establish adequate internal controls to process travel claims.
2. Notify the traveler if a travel claim voucher is received that is incorrectly prepared or missing documentation and request a corrected travel claim as soon as possible.
3. Notify the submitting office or person if travel claims are received at the wrong office for computation.
4. Compute and determine the travel entitlement and forward the computed travel claim voucher and supporting documents to the disbursing office for payment or interface with the disbursing system for payment.

080403. PCS Claims. PCS claims are submitted directly to the disbursing or liaison office.

080404. Separatees or Retirees

A. A separated or retired member, who has not received an advance, must forward his or her claim to the disbursing office responsible for his or her pay accounts prior to separation or retirement. The disbursing office will pay all claims submitted with a 1 year period of separation or retirement. The disbursing office servicing Marine Corps separatees or retirees will pay all claims submitted within a 60 day period of the month of separation or retirement. Claims received after the above-stated time periods for filing will be forwarded to the following designated Service address:

Army:	DFAS-IN ATTN: Director, Network Operations, Dept 3700 8899 E. 56th Street Indianapolis, IN 46249-3700
Navy:	DFAS-CO/LP Travel Policy P.O. Box 369015 Columbus, OH 43236-9015
Air Force:	DFAS-DE/CAC 6760 E. Irvington Place Denver, CO 80279-8000
Marine Corps:	DFAS-KC/FCSA 1500 E. Bannister Kansas City, MO 64197-0001

(NOTE: If the separation point has been disestablished, discontinued, or its travel function reassigned, the claim should be sent for payment to the DFAS Center that supports the Service member's Component.)

B. Travel allowances payable to a separating or retiring officer are used to offset indebtedness to the government when paid as an advance or settlement. Travel allowances payable in advance to separating or retiring enlisted members for personal travel home may not be used to offset any debts to the government. Travel allowances payable to enlisted members after they have returned home may be withheld and applied against their debts. Also, advances and settlements of dependent travel allowances and household goods can be applied to indebtedness to the government.

080405. Deceased and Next of Kin

A. Unsettled Claims for Deceased Travelers. The individual designated by the Service to settle a deceased member's affairs is responsible for the preparation of travel claims for the travel of deceased members. The disbursing officer will compute and forward all claims to the servicing DFAS Center (section 0105) for payment or collection. For deceased employees, any outstanding travel claims may be signed by the surviving spouse or legal representative, the

executor, or administrator. These claims are computed locally and forwarded to civilian payroll office for inclusion in the death claim payment.

B. Claims for Dependents of Deceased Members. Travel performed under the provisions of JFTR paragraph U5241, must be supported by two copies of DD Form 1300 (Department of Defense Report of Casualty).

1. If the claim is for travel to a member's home of record, as shown on DD Form 1300, no further documentation is required.

2. If the claim is for travel to the official residence of a relative, a statement must be furnished to that effect showing the name and relationship of the person to whose residence travel was performed.

Forward these claims to the following applicable address:

Army: DFAS-IN
Director, Military Pay
ATTN: DFAS-IN/FJECB
8899 E. 56th Street
Indianapolis, IN 46249-0885

Navy: DFAS-CL/FMC
Federal Office Bldg.
1240 E. 9th Street
Cleveland, OH 44199

Air Force: DFAS-DE/FYC
6760 E. Irvington Place
Denver, CO 80279-8000

Marine Corps: DFAS-KC/FCSA
1500 E. Bannister Rd.
Kansas City, MO 64197-0001

080406. Travel Under Classified Orders. If classification of a TDY order is necessary, the special order must be classified, marked, and handled according to the applicable DoD Component security regulation. These classified orders should be distributed only to persons who have the proper clearance and who require a copy of the order. If an unclassified extract from a classified order furnishes enough information, it may be used to support the payment voucher. This will permit filing an unclassified travel voucher. For classified locations, the traveler must indicate in the itinerary of the travel claim the location by showing site 1, site 2, and so forth. If the disbursing officer can apply the per diem rate, the claim should be paid. However, if the disbursing officer does not have knowledge of the location or the traveler insists on showing the location, process the travel claim and documentation per Component instructions.

0805 QUESTIONABLE CLAIMS

080501. Request for Advance Decision. A DoD disbursing officer or certifying officer may request an advance decision on any questionable voucher presented for payment. The request is prepared and submitted as required in Volume 5, Chapter 25 of this Regulation. Submit the original and two copies to DFAS-HQ/FMM, 1931 Jefferson Davis Highway, Arlington, VA 22240-5291, through the DFAS Center that supports the DoD Component that funds the travel order. Appropriate DFAS Centers are listed in section 0105 of this volume.

A. Amounts More Than \$100. The supporting DFAS Center reviews each request and contacts the disbursing officer to resolve any questions. Questionable claims for amounts for more than \$100, which require advance decisions by the OSD Office of the General Counsel, are referred to the appropriate DFAS Center, through DFAS-HQ/F, for submission to the PDTATAC.

B. Amounts Less Than \$100. The supporting DFAS Center reviews the case and prepares a decision package for approval or disapproval of the claim by the Center director. If a decision is rendered that the payment is proper, the original voucher is returned to the disbursing officer for payment. The supporting DFAS Center will include a statement in the transmittal letter to the effect that, should the disbursing officer disagree, the file may be returned for further adjudication.

080502. Doubtful Travel Claims. If a traveler does not accept the decision of the disbursing officer concerning an entitlement determination, the disbursing officer must explain in writing his or her decision and advise the traveler of his or her right to have a claim reconsidered. If the traveler does not accept the explanation of the disbursing officer, the disbursing officer will assist with the resubmission of the claim. To have a claim reconsidered, send a copy of the claim, a letter of explanation from the traveler, an endorsement from the approving official, and a letter of position from the disbursing officer through the major command, to the appropriate DFAS Center (section 0105). The DFAS Center will respond to the disbursing officer or traveler. If the traveler does not accept the decision, the claim may be forwarded through the appropriate DFAS Center (listed in section 0105) to DFAS-HQ/FMM, 1931 Jefferson Davis Highway, Arlington, VA 22240-5291.

080503. Waivers. Travelers and/or Components will submit waiver requests resulting from erroneous payments of travel and transportation allowances to DFAS-DE/FYC.

080504. Unions and Third Party Review. When the claimant is covered by a collective bargaining agreement, neither the Department, OPM, GSA, nor DOHA have jurisdiction over the claim unless the matter of that claim is explicitly excluded from grievance under the agreement procedure.

0806 AO RESPONSIBILITY

080601. Determination of Travel. The AO is responsible for determining that travel was performed as authorized.

080602. AO Signature. The AO is responsible for signing DD Forms 1351 or 1351-2 when there is a change from the written travel order to the entitlements, itinerary, or reimbursable expenses (e.g., rental car). By signing the travel claim in block 22a or block 27, the AO approves the claim to include after the fact approval of allowable reimbursable expenses and itinerary changes, thereby negating the need for any amendments to the travel orders. AOs must sign all travel claims when required by the agency.

080603. Time Frame. The AO must ensure that the claim is forwarded to the appropriate liaison office or travel computation office within two working days following the traveler's submission of the claim to the AO.

CHAPTER 9**PROCEDURES FOR COAST GUARD MEMBERS****0901 COAST GUARD MEMBERS TRAVELING USING DOD APPROPRIATIONS**

Coast Guard members who travel on orders citing DoD appropriations will file travel claims the same as active duty DoD members using the instructions for the disbursing office of the unit whose funds are involved. Disbursing offices will settle these vouchers like those of any other member. If any excess travel time is involved, forward a copy of the settlement voucher to Commanding Officer, Coast Guard Human Resources Service & Information Center, 444 SE Quincy St., Topeka, KS 66683-3591.

0902 COAST GUARD MEMBERS TRAVELING ON NON-DOD APPROPRIATION

When a Coast Guard member requests a travel advance or settlement payment on orders citing other than a DoD appropriation, the disbursing officer will not provide any payment without receiving authorization from the Commanding Officer (OGRR), Coast Guard Finance Center, in Chesapeake, VA 23326. Contact may be made by calling 757-523-6837.

CHAPTER 10**DEPARTMENT OF DEFENSE TRAVEL REENGINEERING PILOTS****1001 GENERAL**

The Department has designated specific DoD Component organizations to operate under special authority as travel reengineering pilot test sites. Approved test sites have written designations from the OUSD(C). Special entitlement rules have been issued by the PDTATAC for the pilot sites. The JFTR, appendix O, identifies the travel entitlements for military service members supported by a designated pilot site. The JTR, Volume 2, appendix O, provides the travel entitlements for civilian personnel supported by a designated pilot site.

1002 POLICY

Questions of a policy nature regarding travel reengineering pilot test sites should be directed to the OUSD(C), Directorate for Financial Commerce, Crystal Square #4, Suite 201, 1745 Jefferson Davis Highway, Arlington, VA 22202-3402. Additional information can be obtained by telephone at 703-602-0300.

1003 IMPLEMENTATION

Questions concerning acquisition and implementation of the reengineered travel process to be exported to organizations not identified as pilot sites should be addressed to the Project Management Office---Defense Travel System, Crystal Square 4, Suite 100, 1745 Jefferson Davis Highway, Arlington, VA 22202-3402. Additional information can be obtained by telephone at 703-607-1498/2618 or from the Program Manager Home Page: <http://www.dtic.mil/travelink/> or Military Traffic Management Command Home Page: <http://mtmc.army.mil/>.

APPENDIX A**GOVERNMENT TRAVEL CARD PROGRAM HANDOUT**

A. To assist DoD travelers, an official government travel card, with ATM privileges, is available for personnel traveling on official government business. The government travel card eliminates or reduces the number of travel advances paid by disbursing offices without imposing a financial burden on DoD travelers. This policy applies to all official government travel or PCS moves performed by any DoD personnel.

B. Cardholder Rules

1. Each cardholder must sign the DoD Government Travel Card Program Statement of Understanding before issuance of the card. The agreement states (in part) that the government travel card can be used solely for official travel and that the traveler agrees to submit timely travel claims so that reimbursement is made in time to pay the monthly billing statement. That payment is due upon receipt of the card bill. If the cardholder has not received payment due to process delays by the disbursing office, he or she should immediately contact the APC to advise that individual of the delay in receipt of the travel settlement.

2. Cash withdrawals are limited to the amount of cash needed to cover incidental and miscellaneous expenses that cannot be charged to the card, and as authorized by official travel orders. ATM cash withdrawals may not exceed \$600.00 in a billing cycle. Individual card holders may request, through a 1-800 number provided by the card contractor, an increase in the cash withdrawal limit up to \$1,000. The card contractor will honor the cardholder's telephone call provided the account is not delinquent. The service charge for withdrawing from ATMs is reimbursable through the travel claim process so as long as the cardholder claims the fee on the voucher and the cash is not withdrawn more than 5 days prior to the start of travel or after the last day of travel. Receipts for these withdrawals are not required when filing the claim.

3. In the event that a cardholder loses, forgets, or misplaces his or her assigned PIN, the cardholder must call the travel card contractor to report that loss and receive a new number.

4. Should a card be lost or stolen, the cardholder must call the card contractor immediately. The APC also must be notified of the missing card as soon as possible.

5. All travel-related expenses (e.g., hotels, meals, transportation, and car rental fuel) should be charged to the card. The miscellaneous official travel expenses for which the ATM program is designed are for parking fees or tolls, or public transportation and emergency incidentals.

6. To obtain ATM locations within the CONUS and OCONUS, the cardholder may call the "1-800" telephone number provided by the travel card contractor.

7. Personnel serving on long-term TDY must file a supplemental voucher every 30 days. Travel reimbursement delays should be reported immediately to the APC.

8. Any cardholder who repeatedly is delinquent through nonpayment of a legitimate bill from the card contractor will be canceled from the Card Program and issued a memorandum affirming the cancellation and denial of the card and ATM privileges. Misuse of the card also may be grounds for disciplinary action.

9. A cardholder, at his or her own discretion, may request the APC to suspend card privileges during periods of non-travel. Reinstatement may be effected when travel is required.

10. Each activity has a Travel Card APC assigned to answer questions or provide explanations as required.

Note: Each DoD Component shall complete the above rules and see that a copy is provided to all holders of government travel cards.

Department of Defense - (Component)

STATEMENT OF UNDERSTANDING
GOVERNMENT TRAVEL CARD PROGRAM

I certify that I have read the attached Department of Defense (DoD) government travel card policy and procedures. I understand that the Government Travel Card Program is designed to improve the management and control of government travel and thereby promote the efficiency of the federal service. I also understand that I am authorized to use the card only for those necessary and reasonable expenses incurred by me for official travel as authorized and validated by travel orders. I will abide by these and other instructions issued by the Department and my DoD Component's Agency Program Coordinator (APC) for use of the government travel card issued to me for the explicit purpose of conducting official government travel.

The above limitation on card usage also applies to automated teller machine (ATM) withdrawals. The amount of cash withdrawals may not exceed the amount stated on the travel orders and may not exceed \$600.00 per billing cycle. If my account is not delinquent and my travel orders authorize a larger advance, I can request an increase in the cash withdrawal limit up to \$1,000 by calling the 1-800 telephone number provided by the card contractor. However, I will endeavor to charge expenses to the account wherever feasible, versus cash withdrawals.

I understand that the issuance of this card to me is an extension of the employer-employee relationship and that I am being directed specifically to:

- Abide by all rules and regulations with respect to the card. _____
 - Use the card only for official travel validated by travel orders. _____
 - Pay all my charges upon receipt of the monthly Travel Card billing _____
 - Contact the APC immediately if due to disbursing office process delays _____
if I have not received payment by the time the Contractor bill is due.
 - Notify the APC of any problems with respect to my usage of the card. _____
 - Notify the card contractor and the APC if my card is lost or stolen _____
- (Cardholders applicants must initial all the above provisions.)

I also understand that failure on my part to abide by these rules or otherwise misuse the card may result in disciplinary action being taken against me, in accordance with the Multi-Unit Master Agreement for bargaining unit employees. I also acknowledge the right of the card contractor and/or APC to revoke or suspend my card privileges if I fail to abide by the terms of this agreement or the agreement I have signed with the travel card contractor.

(Applicant's Signature)

(Applicant's Printed Name)

Series/Grade/Title

Supervisory Authorization

NOTE: The government travel card application cannot be processed without this completed form on file.

GSA CONTRACTOR
TRAVEL CARD BILLING MILESTONES

MILESTONE**ACTION**

DAY 0 Original billing sent to cardholder/Billing Date.

DAY 30 Second billing advises cardholder of delinquency*

DAY 60 Third billing reminds cardholder of delinquency.

A name listing (60 day report) of delinquent cardholders is sent to program coordinators to determine whether there is sufficient justification for the account to remain active for an additional 30 days. The APC sends the 60-day delinquent notice to the supervisors notifying them of the seriousness of the account and the results of non-payment. All ATM withdrawals are suspended.

DAY 65 If no action is taken, the account will be suspended**

DAY 90 Government travel card is suspended. Another by name listing (90 day plus report) of delinquent cardholders is sent to APC to determine if sufficient justification exists to allow the account to remain active for an additional 30 days. The APC sends the 90-day delinquent notice to the supervisors through the department director, for appropriate action.

DAY 120 Contractor cancels account***

After review by the APC, names are forwarded to the supervisors through the commander or director to advise them of action taken.

* Delinquency is based on the billing date, not the date the actual charge or ATM withdrawal was made.

** Accounts that are suspended cannot be used to charge expenses or to obtain an ATM cash advance. Card can be reinstated when account is paid in full.

*** Canceled accounts cannot be reinstated without a formal request from the cardholder's Commander/Director and may or may not be approved by the contractor.

SAMPLE 60-DAY DELINQUENCY MEMORANDUM

MEMORANDUM FOR (NAME OF IMMEDIATE SUPERVISOR)

SUBJECT: Delinquent Government Travel Card Payment Notification - 60 Days

I have been informed by the GSA government travel card contractor that (cardholder's name) is over 60 days delinquent in payment of his/her account. The total amount due is \$_____.

(Provide the specific information regarding the delinquent charges.)

The government travel card contract requires that all outstanding charges be paid upon receipt of the monthly billing statement. Travel card privileges for this cardholder will be suspended per our contractual agreement as of (date), unless immediate action is taken to resolve this debt. The cardholder should be notified of this action and counseled concerning the use of the government travel card. Cardholders on long term temporary duty are subject to the same policy and are required to submit partial vouchers for payment every 30 days and maintain their travel card account.

Noncompliance, or failure to adhere to the guidelines for the government travel card, can result in disciplinary action in accordance with applicable statutory and regulatory provisions and with the Multi-Unit Master Agreement for bargaining unit employees.

The delinquent balance may be resolved by one of the following actions: (1) payment in full, (2) a reasonable explanation documented and submitted to the undersigned and the contractor, or (3) an agreed upon repayment schedule with the card contractor. Billing questions may be directed to the card contractor on 1-800-492-4922. Program management questions may be directed to the undersigned on extension _____.

Please have the cardholder sign to acknowledge receipt of this delinquent notification and return it to me with your written response outlining the actions taken within _____ days.

(Signature)
Agency Program Coordinator

SAMPLE 90-DAY DELINQUENCY MEMORANDUM

MEMORANDUM FOR IMMEDIATE SUPERVISOR _____
THROUGH: DEPUTATE/DIRECTORATE DIRECTOR _____

SUBJECT: Delinquent Government Travel Card Payment Notification - 90 Days

The 90-day delinquent notification list from the government travel card contractor has been received and (cardholder's name) is now 90 days delinquent in the payment of his or her account. Total amount due is \$_____. The attached 60 day notification memorandum informed you that payment on the cardholder's government travel card account was delinquent.

(Provide specific information regarding the delinquent charges.)

The government travel card contract requires all outstanding charges be paid upon receipt of the monthly billing statement. If no action is taken toward this debt, the undersigned or the card contractor can cancel the account. Meanwhile charge card privileges have been suspended as of (date). These privileges may be restored upon complete liquidation of the debt. The cardholder must be notified and counseled. Cardholders on long-term travel are also subject to the same policy and are required to submit partial vouchers for payment every 30 days and maintain their charge card account.

Noncompliance, or failure to adhere to the guidelines for the government travel card, can result in disciplinary action in accordance with applicable statutory and regulatory provisions and with the Multi-Unit Master Agreement for bargaining unit employees.

The delinquent balance may be resolved by: (1) payment in full, (2) a reasonable explanation documented and submitted to the undersigned and the card contractor, or (3) an agreed upon repayment schedule with the card contractor. Billing questions may be directed to the card contractor on 1-800-492-4922. Program management questions may be directed to the undersigned on extension _____.

Please have the cardholder sign to acknowledge receipt of this delinquent notification and return it with your written response outlining the actions taken within _____ days.

SAMPLE 120-DAY DELINQUENCY MEMORANDUM

MEMORANDUM FOR DIRECTOR, DEPUTY/DIRECTORATE LEVEL
THROUGH: COMMANDER/DIRECTOR

SUBJECT: Cancellation of Government Travel Card - 120 Days Delinquent Payment
Notification

The 60 and 90 day delinquent notification memoranda, dated _____ and _____ respectively, notified the immediate supervisor and the installation commander/director (or equivalent manager) of the past due account for cardholder (name). It has now been brought to my attention that this cardholder has a delinquent government travel card balance of \$_____ which is over 120 days past due. He or she has made no payment toward this debt. Therefore, the account is being canceled immediately and collection action taken by the card contractor.

(Provide specific information regarding the delinquent account and any other information known about the individual's response to the previous notices of delinquency.)

Reinstatement of the cardholder's account will only be authorized with Commander/Director approval after the entire debt is paid. The card contractor reserves the right to deny reinstatement. Cardholders who do not properly liquidate their government travel card debts or use the card for personal purposes may also be subject to disciplinary action in accordance with applicable statutory and regulatory provisions and the Multi-Unit Master Agreement for bargaining unit employees.

Please contact the undersigned on extension _____ should further questions arise. Please have the cardholder sign to acknowledge receipt of this notification and return it with your written response outlining the actions taken within _____ days.

FOREWORD

This Volume of the Department of Defense Financial Management Regulation (DoDFMR) is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures." It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated, nonappropriated, working capital, revolving and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

This Volume of the Regulation contains provisions covering financial authorizations for contract Payments and collections. This Volume incorporated some of the payment policy and procedures from the Defense Logistics Agency Manual, 7000.1, Accounting and Finance Manual; Army Regulation 37-1; Air Force Regulation 177-102; Navy Comptroller Manual NAVSO P-1000, Volume 4; Marine Corps 4200.15F, Marine Corps Purchasing Procedures Manual, and Marine Corps Orders 7000.16, 7000.17, and 7000.18; and DoD Accounting Manual 7220.9-M.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman, Joint Chiefs of Staff and Joint Staff; the Unified Combatant Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

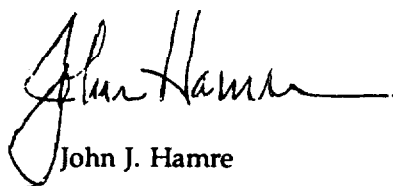

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements contained in this regulation are exempt from licensing in accordance with the DoD 8910.1-M, "Procedures for Management of Information Requirements," paragraph E.4.f., November 1986.

Forward recommended changes to this Volume of the Regulation through channels to the address below. Submit requests for deviations from or exceptions to specific standards, with justification to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume of the Regulation through its normal publications channels. Other Federal Agencies and the public may obtain copies of this Volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, VA 22161, telephone (703) 487-4650.

John J. Hamre

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller) (USD(C)). The Regulation consists of the following 15 volumes:

- | | |
|--|--|
| <ol style="list-style-type: none"> 1. General Financial Management Information, Systems, and Codes 2. Budget Formulation and Presentation 3. Budget Execution - Availability and use of Budgetary Resources 4. Accounting Policy and Procedures 5. Disbursing Policy and Procedures 6. Reporting Policy and Procedures | <ol style="list-style-type: none"> 7. Military Pay Policy and Procedures 8. Civilian Pay Policy and Procedures 9. Travel Policy and Procedures 10. Contract Payment Policy and Procedures 11. Reimbursable Operations, Policy and Procedures 12. Special Accounts, Funds and Programs 13. Nonappropriated Funds Policy and Procedures 14. Administrative Control of Funds and Antideficiency Act Violations 15. Security Assistance Policy and Procedures |
|--|--|

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense

Instruction 7000.14 "DoD Financial Management Policy and Procedures."

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 Volumes. The 6 digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A. 1. a. (1) (a)
SUBPARAGRAPHS

PUBLICATIONS SUPERSEDED

This volume incorporates some of the payment policy and procedures from the following:

Defense Logistics Agency Manual 7000.1, Accounting and Finance Manual.

DoD 7220.9-M, DoD Accounting Manual.

Army Regulation 37-1, Army Accounting and Fund Control.

Air Force Regulation 177-102, Accounting and Finance.

Navy Comptroller Manual, Disbursing, NAVSO P-1000, Volume 4.

Marine Corps 4200.15F, Marine Corps Purchasing Procedures Manual.

Marine Corps Order 7000.16, Processing Vendor Invoices and Bills for Payment.

Marine Corps Order 7000.17, Preparation of Invoices and Other Selected Documents for Payment by the Marine Corps Finance Center.

Marine Corps Order 7000.18, Requirements for Issuance of Internal Revenue Service (IRS) Information Returns (IRS Form 1099-MISC).

However, the aforementioned manuals and regulations have not been superseded, as only selected parts of the manuals and regulations were incorporated into this volume. The long-range goal is to incorporate all DoD Components payment regulations and manuals into the "DoD Financial Management Regulation." Until the transition is complete, the applicable DoD Components' regulations and manuals will continue to be used in conjunction with this Regulation. In case of conflict between this Regulation and the DoD Components' regulation and manuals, this Regulation will

prevail.

This volume does not provide desk procedures for any contractor payment system at any of the disbursing offices. Desk procedures will be developed by each DFAS Center which will enable them to support their current payment system(s) until such time that all DoD disbursing offices are operating under the same payment system.

CHAPTER 1
GENERAL PROVISIONS COVERING FINANCIAL AUTHORIZATIONS FOR
CONTRACT PAYMENTS AND COLLECTIONS

0101 INTRODUCTION

010101. Department of Defense Financial Management Regulation

A. This is Volume 10, Contract Payment Policy and Procedures, of the Department of Defense (DoD) Financial Management Regulation (DoD 7000.14-R). This volume provides contractor and vendor payment policy and procedures for DoD disbursing offices.

B. This volume incorporates some of the payment policy and procedures from the Defense Logistics Agency Manual 7000.1; Army Regulation 37-1; Air Force Regulation 177-102; Navy Comptroller Manual NAVSO P-1000, Volume 4; Marine Corps 4200.15F, Marine Corps Purchasing Procedures Manual; and DoD Accounting Manual 7220.9-M. There are different payment systems in use at each of the five Defense Finance and Accounting Service (DFAS) Centers. Each DFAS Center will continue to publish detail guidance, in line with the particularities of their payment system(s), to implement the policy and procedures contained in this volume and required by law. This may include some of the other policies and procedures from manuals and regulations cited in the first sentence of this paragraph. The long-range goal is to incorporate all of the DoD Components and DoD contractor payment manuals and regulations into this Regulation (DoD 7000.14-R). Until the transition is complete, the applicable DoD Components' manual and regulations may be used to supplement this Regulation. In case of conflict between those applicable regulations and manuals, this Regulation will prevail.

C. This volume does not provide desk procedures for any contractor payment system at any of the disbursing offices. Desk procedures will be developed by each DFAS Center which will enable each of them to support their current payment system(s) until such time as all DoD disbursing offices are operating under the same payment system.

010102. General

A. This volume governs the determination of the propriety for expenditure of funds for materials and services, as well as information for contractor debt collection. Each contracting document should designate the disbursing office which will make the payment on the contract. Unless otherwise stated in writing, only the disbursing office designated by the contracting document may make payment. This volume provides the necessary guidance to the disbursing office to ensure that payments are made properly.

B. See Volume 1 for a list of the definitions used in this Regulation.

★ 010103. Matching of Request for Payments to Obligations and Liabilities Before Disbursement

★ A. Obligations are established as prescribed in Volume 3, Chapter 8 of this Regulation. Liabilities, including accounts payable, are established as prescribed in Volume 4, Chapters 8 and 9 of this Regulation. The specific obligations directly related to each payment request must be identified before the requested payment is made. Also, the undisbursed balance of each applicable obligation must be sufficient to cover that obligation's share of the requested payment before the payment is made. In addition, the undisbursed balance shall be sufficient to also cover all entitlements for payments that have been previously scheduled against the obligation. In the case of open contracts funded by canceled appropriations, memorandum obligation records will be maintained and used in the same manner as for non-canceled appropriations

★ B. General Payment Distribution Requirements

★ 1. To enable the paying office to match payments to the applicable obligations, requests for payment must identify amounts by contract line items (CLINs) or subline items (SLINs), as specified in subparagraphs 010103 C., D., and E. below. For delivery payments, distributions of the requested amount to CLINs or SLINs should be based on actual deliveries or performance. For financing payments, the distribution to CLINs or SLINs can be made on best estimates based on available information.

★ 2. If at any time the Administrative Contracting Officer becomes aware of information that indicates a distribution of financing payments is in error, the paying office shall be immediately advised of the necessary change in distribution. If prior payments are involved, the matching of such payments to obligations shall be adjusted and the payments correctly applied. However, such adjustments to the payment records should not impact actual payments to the contractor.

★ 3. No CLIN or SLIN shall be funded by both R&D and non-R&D obligations.

★ 4. Upon completion of a delivery payment, the applicable amounts of financing payments previously identified with each obligation shall be adjusted to reflect the matching delivery payment.

★ C. Research and Development (R&D) Contracts

★ 1. For purposes of this subparagraph, an R&D contract is defined as one that is:

- ★ a. A contract for R&D purposes as defined in DFARS 235.001, and
- ★ b. Funded with R&D appropriations.
- ★ 2. Separate CLINs or SLINs within a non-R&D contract that meet the above definition of an R&D contract will be considered R&D (rather than non-R&D) contract line items and the policies in this section apply to such line items.
- ★ 3. R&D contracts, R&D CLINs, or R&D SLINs may have multiple R&D fund citations.
- ★ 4. If provided, distribution of payments to contract lines and related obligations shall be in accordance with Administrative Contracting Officer direction. In the case of delivery payments, the contractor should provide an identification of the specific CLINs and/or SLINs on the invoice.
- ★ 5. For delivery payments, the payment shall be applied solely to the obligations identified with the specific CLINs and/or SLINs for which delivery has occurred. Entitlement to the payment will be verified by matching the contractor's invoice for specific CLINs/SLINs with a record of the delivery and/or acceptance. Before the requested payment is made, the balance of undisbursed amounts (unliquidated obligations), must be sufficient to cover this requested payment as well as all previously scheduled entitlements. Payments will be made in a manner consistent with the provisions of the Prompt Payment Act.
- ★ 6. For financing payments, in the absence of Administrative Contracting Officer direction, R&D contractor work shall be assumed to be performed for the benefit of the oldest undisbursed (unliquidated) obligations. Therefore, in the absence of direction identifying the distribution of payments to specific CLINs and/or SLINs, a financing payment request for an R&D contract, or R&D CLINs and/or SLINs within a non-R&D contract, shall be distributed by the paying office to the oldest undisbursed obligations available.
 - ★ a. To distribute the payment to the oldest undisbursed obligations on contracts funded by more than one obligation, such obligations shall be grouped by the fiscal year (FY) of the financing appropriation(s).
 - ★ b. If, when an R&D payment is distributed to a specific FY, undisbursed balances are available on any obligation for that FY, the payment amount applicable to that FY shall be distributed on an equal percentage basis to all the unpaid obligations for that FY. For example, if the available undisbursed balances for all the obligations within a FY total \$1,000 and the financing payment totals \$200, the payment shall be distributed to 20 per cent of each of the unliquidated obligations.

★ D. Non-R&D Contracts

★ 1. Contracting officers will structure all non-R&D contracts and modifications to non-R&D contracts to ensure that a separate CLIN or SLIN is established for each unique obligation. In no instance shall a SLIN be funded by more than one obligation nor shall a CLIN, that does not have supporting SLIN(s), be funded by more than one obligation.

★ 2. For each payment request under a non-R&D contract, the Administrative Contracting Officer or, in the case of delivery payments, the contractor shall provide the paying office with an identification of the payment by SLIN or CLIN (when a CLIN does not have supporting SLINs). The identification will be based on actual performance for all delivery payments. This identification shall be provided either with each request for payment, except in the case of contract financing payments. Contract financing payment requests may be provided as an extended schedule for application to multiple requests on one contract. The distribution of contract financing payments may be based upon:

★ a. The contract delivery schedule;

★ b. A profile of anticipated contractor expenditures developed by the program or item manager, or developed within the contract administration office, based on historical spending patterns, or other knowledge of contractor performance of similar efforts;

★ c. Contract Funds Status Reports provided under a contract requirement for contractor cost reporting, if available;

★ d. Other specific information that is pertinent to developing a reasonable forecast of the contractor's work progress;

★ c. A best estimate of the contractor's anticipated work progress based upon a general knowledge of the contractor or industry practices.

★ 3. Based upon the distribution by CLIN or SLIN, a request for financing payment shall be matched and posted to the applicable obligation records. For example, if the payment amount is distributed 30 percent to one CLIN; 20 percent to a second CLIN; and 50 percent to a third CLIN, then, 30 percent of the payment should be charged to the obligation funding the first CLIN, 20 percent of the payment should be charged to the obligation funding the second CLIN, and 50 percent of the payment should be charged to the obligation funding the third CLIN.

★ 4. For delivery payments, the payment shall be applied solely to the obligations identified with the specific CLINs and/or SLINs for which delivery has occurred. Entitlement to the payment will be verified by matching the contractor's invoice for specific CLINs/SLINs with a record of the delivery and/or acceptance. Before the requested payment is

made, the balance of undisbursed amounts (unliquidated obligations), must be sufficient to cover this requested payment as well as all previously scheduled entitlements. Payments will be made in a manner consistent with the provisions of the Prompt Payment Act.

★ 5. If an obligation does not have a sufficient undisbursed balance to cover the withhold amount plus the identified amount of a payment request and the amounts of entitlements previously scheduled against the obligation, the Administrative Contracting Officer and the source finance and accounting office shall be contacted to assist in resolving the imbalance before the payment is made.

★ E. Mixed Contracts

★ 1. For contracts that include both R&D and non-R&D lines, the Administrative Contracting Officer shall provide the paying office with identification of the R&D and non-R&D CLINs or SLINs.

★ 2. The R&D CLINs or SLINs on such contracts shall be treated under subparagraph 010103 C. above, and the non-R&D CLINs or SLINs shall be treated under subparagraph 010103 D. above.

★ 3. On payment requests for mixed contracts, the Administrative Contracting Officer shall identify the amount distributed to each non-R&D CLIN or SLIN and the total amount distributed to all R&D CLINs and SLINs.

0102 CONTRACTS

010201. General

A. The contracting office that executes a contract or modifies it distributes the copies in accordance with the Federal Acquisition Regulation (FAR) 4.2 and the DoD Federal Acquisition Regulation Supplement (DFARS) 204.202. Except for contracts specified in paragraph 010201-B and 010201-C, a signed copy is sent to the disbursing office. A signed copy is a complete and accurate copy of the obligating document and includes the date of execution and names and titles of those who sign them. The disbursing office's copy supports the payment and is attached to the retained copy of the payment document. For electronic transmission of information, see Chapter 17 of this volume.

B. For small purchases, as defined in FAR 13.000, the original copy of the purchase order (DD Form 1155, Order for Supplies or Services), will be signed by the contracting officer, and will be sent to the disbursing office. Upon receipt of the material or services, the receiving office forwards one copy of the order to the disbursing office as proof of receipt. After processing as a proof of receipt, disbursing office personnel will attach this copy to the retained copy of the payment document.

C. Authenticated or signed copies of Buy U.S. Here (BUSH) contracts are not required to be sent to the disbursing office. The overseas base contracting officers provide their local disbursing offices with a copy of the BUSH authorized price lists.

010202. Contracting Relationship

Close working relations between the disbursing office and contracting personnel (Procurement Contracting Officer (PCO), Administrative Contracting Officer (ACO), or Termination Contracting Officer (TCO)), are necessary for the timely and accurate handling of financial transactions in contracting and paying for material and services. Functions are so interrelated that disbursing office personnel must be familiar with contracting regulations. These include, but are not limited to the FAR, DFARS, and the Prompt Payment Act (PPA) of 1982, Public Law 97-177, and the PPA Amendments of 1988, Public Law 100-496. The references to contracting policies in this manual are only for guidance to disbursing offices. The contracting manual governs contracting actions.

010203. Number of Payments

A contract or purchase order may be paid on one voucher if all materials or services are received. There is no limit to the number of partial payments that may be made unless the contractual document states otherwise. Except for final payment, partial payments will only be made if payment amount is \$10 or more.

010204. Contractor Invoices

A contractor's invoice represents a bill or written request for payment. To be considered proper, an invoice must contain specified information. Paragraph 070201 lists the criteria for a proper invoice.

010205. Classified Contracts

When a basic contract is classified with a very restrictive and limited need to know, the disbursing office may receive a copy containing the minimum data required for payment. These contracts are sufficient support on which to base payments. Disbursing offices must ensure that classified information is appropriately safeguarded. Payment documents must be processed as if it were a "normal" payment, and before a payment is made, all prescribed documentation necessary for payment must be in the disbursing office.

0103 QUALITY AND INTERNAL CONTROL

010301. Quality Control

The disbursing office will establish a Quality Control function to review their payment process to help ensure that payments are made correctly and in a timely manner. There

are numerous quality control issues that will be included in the area of responsibility. As a minimum, the following tasks will be performed:

- A. Determine compliance with prescribing regulations and directives.
- B. Determine timeliness of responses to internal and external requests.
- C. Suggest changes to operating procedures, within regulations and directives, to increase the efficiency of the office.
- D. Determine that operating procedures contain ample internal controls and that they are applied in actual operations.
- E. Assist in conducting training sessions.
- F. Determine the need to follow-up on external audit and internal review reports.

010302. Internal Control

The disbursing office must ensure that written internal controls are in place to preclude improper preparation, certification, and payment of monies, as well as the proper handling of debt collection from contractors or other business entities. Internal control standards are issued by the Comptroller General for use in establishing and maintaining systems of internal control. Those standards are applicable to all operations and administrative functions. However, they are not intended to limit or interfere with duly granted authority for the development of legislation, rulemaking, or other discretionary policy making.

010303. Contract Reconciliation

Upon request, the disbursing office will work with the PCO, ACO, TCO, or the funding station to provide information on dormant contracts. In many of these situations, the actions being requested require the contract administrator to become involved and provide the information rather than the disbursing office.

010304. Electronic Signature

A. Electronic signature is the recommended method of approving vouchers processed through an automated system. If final certification of vouchers is accomplished electronically, the electronic signal or symbol adopted as the certifying officer's electronic signature must be:

1. Unique to the certifying officer.
2. Capable of verification.
3. Under the sole control of the certifying officer.

B. Electronic certification of the final voucher also requires that control procedures be in place to ensure the authenticity of transmitted data, including the electronic signature. Such controls must provide reasonable assurance that deliberate or inadvertent manipulation, modification, or loss of data during transmission is detected.

CHAPTER 2

DISCOUNT OFFERS AND CALCULATIONS0201 DISCOUNT OFFERS AND CALCULATIONS020101 Offer of Discount

Contractors offer discounts to obtain payment of amounts due under a contract for property or services in exchange for payment within a specified time. Take the discount, if cost-effective (to determine, see paragraph 020103-F), when the contractor offers it or when one of the following situations exists:

A. The contractual document contains discount terms whether the invoice offers discount terms or not.

B. The bid, contract, or other agreement is silent on the discount, but the invoice contains discount terms (typed, written, rubber stamped, or printed).

C. If discount terms on an invoice differ from those in the contracting document, use those that are most cost-effective for the government, except for progress payments liquidations as noted in paragraph 020105-B.

D. The contractor provides written advice to extend the discount period or increase the discount percentage beyond that offered previously.

E. The contractor orally offers a discount on a specific invoice or invoices. In these cases a conversation record stating the name and position of the person offering the discount, the discount terms and the date of the offer should be attached to the invoice. The disbursing office may, at local option, require written confirmation of the verbal offer from the contractor.

020102 Computation of Discount Period

A. General Rule. On contracts execut-

ed or options exercised on or after April 1, 1989, the discount time starts from date of the invoice. If no date has been placed on the invoice by the contractor, the discount period will begin on the date a proper invoice is actually received by the designated billing office if the agency annotates the invoice with date of receipt at the time of receipt. On contracts executed on or before March 31, 1989, the discount time period starts from the later of the two following dates, unless the contract states otherwise:

1. Date of completion of performance of services or delivery of supplies to the carrier if acceptance is at point of origin, or date of delivery at destination or port of embarkation if delivery and acceptance are at either of these points.

2. Date proper invoice is received in the disbursing office designated by the contractual document. See paragraph 070201 for the criteria of a proper invoice.

B. Some contractors offer a discount if the invoice is paid by date followed "proximo" (in the next month). If a discount is offered for payment by "tenth proximo", the discount is earned if payment is made by the 10th of the month following the month that the material was delivered, or the month that the dealer's bill was received, whichever occurs later. Thus, if both material and dealer's bill are received in August, the discount is earned if payment is made by September 10. However, if a dealer's bill is received in August and the material is received in September, the discount is earned if payment is made by October 10.

C. Contract or Purchase Order Modifications. When modifications to contracts or purchase orders retroactively change or add discount terms or increase dollar amounts of line items which have been previously paid, do the following:

1. When new or revised discount terms apply, take the discount on any subsequent payment provided the payment was made within the new or revised discount period.

2. When retroactive price increases apply, take the discount on the supplemental billing if paid during the discount period.

D. Selection of Best Discount Terms. When multiple prompt payment discount rates are offered, take the most economical discount offered by the contractor. The most economical discount is the discount term which provides the highest annual effective interest rate. When reporting lost discounts on the Prompt Payment Act (PPA) Report as required in paragraph 070601, report the discount lost that would have been the most economical to the government.

020103 Payment Within the Discount Period

A. Invoices offering cost-effective discount terms or invoices offering net terms when the contractual document contains cost-effective discount terms should be paid within the discount period. Cost-effective discount terms are defined as those yielding an effective annual interest rate equal to or greater than the current value of funds rate established by the Department of the Treasury. Discounts that do not meet the cost-effective criterion should be refused and be scheduled for net payment.

B. The rate established by the Treasury Department for the current value of funds will be provided to the individual disbursing offices by their servicing DFAS Center. New rates apply to all invoices received after the effective date of interest rate change. (See Figure 2-1, at the end of Chapter 2, for prior years cost-effective discount rate.)

C. To determine cost-effective discounts, the computation should be based on the number of days in advance of the actual invoice due date that the payment needs to be made to take advantage of the discount. The effective annual percentage rate should be computed on the length of acceleration of the payment and compared to the current value of funds. For example, an invoice dated March 1 by the con-

tractor and received on March 4, with a 10-day discount term, has 7 days left in the discount period. Counting of the 10 days starts March 2 and ends March 11. The 7 days (March 5 to March 11, inclusive) from day after receipt of invoice until discount due date will be used as the discount period for computation to see if the discount is cost-effective.

D. Manually processed vouchers offering discounts of less than \$25 will not be considered to be cost-effective, but will be reported as offered on the PPA report.

E. When a discount is offered by a contractor from an amount due under a contract for goods or services in exchange for payment within a specified time, the disbursing office may pay the discounted amount only if payment is made within the specified time. Discounts will be taken whenever economically justified, but only after acceptance has occurred. Agency payment systems will incorporate procedures that take advantage of cash discounts as a matter of routine and eliminate any need for special handling.

F. Trade discounts will be taken when the discount terms applied in the conversion formula result in an effective annual interest rate equal to or greater than the Current Value of Funds Rate. Discount terms (percentages) are converted to an effective annual interest rate as follows:

$$\frac{\text{Discount \%}}{100 - \text{Discount \%}} \times \frac{360}{\text{Number of Days in the Payment Period} - (\text{MINUS}) \text{Number of Days Left in Discount Period}} = \text{Effective Annual Interest Rate}$$

1. As an example, consider discount terms of 1 percent (.01) in 10 days, net 30 days, and the invoice was received on the fourth day. There are seven days remaining in the discount period. Application of the above formula to this discount offer would have an effective annual interest rate of 15.8 percent:

$$\frac{.01}{1.00-.01} \times \frac{360}{30-7} = 15.8\%$$

If the Treasury Department percentage rate is greater than 15.8 percent, the discount is not cost-effective and should be refused. Payment should be scheduled based on the net-pay due date. When payment is made during the "net" period allowed, pay the gross amount. However, if for other reasons, payment will be made within the discount period, take the discount.

2. To avoid detailed computation, use the following values of 1 percent in x number of days, net 30 days:

<u>Days Remaining in Offered Discount Period</u>	<u>Effective Annual Interest Value of 1 Percent</u>
1	12.5
2	13.0
3	13.5
4	14.0
5	14.5
6	15.2
7	15.8
8	16.5
9	17.3
10	18.2
11	19.1
12	20.2
13	21.4
14	22.7
15	24.2
16	26.0
17	28.0
18	30.3
19	33.1
20	36.4

a. If the offered discount rate is other than 1 percent, first obtain the value at 1 percent, then multiply or divide to determine the value of the offered discount. For example, 1/2 percent in 5 days, net 30 days: The value of 1 percent in 5 days is 14.5 percent then divided by 2 = 7.25 percent. The discount should not be taken assuming the current Treasury Department rate is greater than 7.25 percent. The discount should be classified not cost-effective/refused and payment should be scheduled during the

"Net" period allowed.

b. If the period for net payment is other than net 30 days, compute the discount as shown in paragraph 020103-F(1).

G. Generally, contracts provide that the date of payment for discount purposes is the date the check is mailed. Mail the check on the same day it is dated and keep a record of the mailing date. For electronic payments, the date of payment for discount purposes is the date that the government has placed in the electronic funds transfer payment transaction instruction given to the transfer network. This is the date on which the funds are to be transferred to the contractor's financial institution.

H. If the discount time ends on Saturday, Sunday, or a legal holiday, the next business day is considered within the discount period.

I. Contracts or invoices offering discounts on specific items, and not the total invoice or contract, should be split in order to establish the payment timeframes. The invoice should be split so as to earn cost-effective discounts on the items subject to the discount offer and to make net payment of items which are not subject to discount. When automated payment systems cannot accommodate the splitting of an invoice or contract, discounts will be determined to be cost-effective per the following method. Compute the dollar value of the discount to be earned; compare this dollar value to the total amount of the invoice; convert this comparison to a percentage; determine if the percentage is cost-effective per the calculation and information provided in paragraph 020103(F). If the percentage is cost-effective, take the discount and pay the entire invoice within the discount terms. If the percentage is not cost-effective, schedule the invoice for net payment.

020104 Computation of Discount

A. Unless otherwise declared in the contracting document or covered below, compute discounts on the approved gross amount of the invoice:

1. When taxes or freight charges are listed separately.

2. After deduction of taxes which are not a proper charge under international or status of forces agreement.

3. When withholding of funds is made mandatory under the contracting document, the government is entitled to any discount on the amount withheld when these amounts are released for payment if previous payments were paid within the discount terms of the contracting document or as later modified. The discount period starts when notification of release is received in the disbursing office.

4. Where trade-ins are involved, compute the discount on the actual cash balance due (60 Comp Gen 255 (1981)).

020105 Discounts on Progress Payments

A. Progress Payments Recoupments. When a discount is offered, determine if the discount terms in the contract have been met. If the terms have been met, take the discount against the amount of the gross invoice. If the terms have not been met, take the discount against the amount of the recoupment. [Comptroller General Decision B159741 (Nov 22, 1966); Jay Dee Militarywear, Inc., 94-2 BCA 26,829 (1994). The Comptroller General and the Armed Services Board of Contract Appeals both confirm the propriety of deducting a discount on payment of a partial delivery on which recovery of a progress payment as completed but on which payment was too late for discount on the balance due on the partial delivery. Where a payment has already been made (as in the case of progress payments), the government is entitled to a discount on any part of delivery payments applied in liquidation of progress payments if there were a discount clause in the contract. It is the balance due on which the time, as provided in the discount clause, is running.

B. Progress Payments Liquidations. If a contractor does not have a discount clause in the contract, no discount should be taken on the progress payment liquidation portion of the invoice when the discount is offered for the first

time on the invoice.

020106 Discounts on Invoices Involving Liquidated Damages

A. Where a contract contains a liquidated damages clause based on price and also contains an offer of discount for prompt payment, the liquidated damages should be deducted without regard to the discount. Compute the discount on the gross contract price without regard to the amount of liquidated damages (18 Comp Gen 784 (1939)).

B. Where a contract contains a liquidated damages clause based on a price that is modified and also contains an offer of discount for prompt payment, compute both the liquidated damages and the discount based upon the modified price (18 Comp Gen 784 (1939)).

0202 DISCOUNT REPORTING

020201 Responsibility for Discount Not Taken

A. Disbursing offices will maintain management information on discounts not taken. As a minimum, the information includes the number and dollar value of discounts offered, cost-effective discounts lost, cost-effective discounts unavailable (because the invoice was not received in time to take the discount). Each discount not taken should be coded with the appropriate reason for not taking the discount. This information should be maintained for at least the previous 12-month period.

B. The reason codes for discounts not taken are:

- P - Disbursing office error
- R - Late receipt of receiving report or notice of acceptance
- I - Late receipt of invoice
- N - Not cost-effective/refused
- O - Other

Further explanation should be available for those discounts coded "Other."

020202 Erroneously Taken Discount

When a discount is taken in error, or is taken after expiration of the discount period and is not repaid before the payment due date (as defined by paragraph 070205-B), pay the contractor when the error is discovered plus accrued interest (if \$1 or more) on any amount remaining unpaid. The interest payment is calculated on the amount of the discount taken and not repaid by the payment due date for the period beginning the day after the discount due date through the payment date. The payment will be supported by either the contractor's claim or the administrative certificate or both on the voucher.

020203 Miscellaneous Earnings and Discounts

In rare instances, a voluntary discount may be offered by a contractor after a contract is completed (including final payment). These discounts are distinguished from prompt payment and volume discounts in that voluntary discounts are discretionary with the contractor and do not reduce the amount obligated against the paying appropriation. Do not treat discounts received after payment as refunds. Such Discounts should be deposited in the Miscellaneous Receipts Account.

Current Value of Funds Rate

<u>Year</u>	<u>Current Value of Funds Rate</u>
1984	9%
1985	9%
1986	8%
1987	7%
1988	6%
1989	7%
1990	9%
1991	8%
1992	6%
1993	4%
1994	3%
1995	5%

Figure 2-1

CHAPTER 3

CLAIMS0301 ASSIGNMENT OF CLAIMS030101 Authority for Assignments

The authorities contained in 41 U.S.C. 15 and 31 U.S.C. 3727 authorize assignments to banks, trust companies, or any financing institution (including federal lending agencies) of monies due, or to become due, under government contracts totaling \$1,000 or more.

030102 Federal Acquisition Regulation (FAR) Requirements

FAR, Part 42, prescribes policies and procedures for:

A. Recognition of a change in a contractor's name as prescribed in FAR 42.1205.

B. Recognition of a successor in interest to government contracts when contractor assets are transferred as prescribed in FAR 42.1204.

030102 Change of Name Agreement

A. A change of name agreement means a legal instrument executed by the contractor and the government that recognizes the legal change of name of the contractor without disturbing the original contractual rights and obligations of the parties. If only a change of the contractor's name is involved and the government's and contractor's rights and obligations remain unaffected, the parties shall execute an agreement to reflect the name change. The contractor shall forward to the responsible contracting officer three signed copies of the Change of Name Agreement, and one copy each of the following:

1. The document effecting the name change, authenticated by a proper official of the state having jurisdiction.

2. The opinion of the contractor's legal counsel stating that the change of name was properly effected under applicable law and showing the effective date.

3. A list of all affected contracts and purchase orders remaining unsettled between the contractor and the government, showing for each the:

- a. Contract number and type.
- b. Name and address of the contracting office.
- c. Total dollar value as amended.
- d. Remaining unpaid balance.

B. When a contractor has provided the requirements in FAR 42.1205 to the Administrative Contracting Officer (ACO) and it has been reviewed by the ACO's legal office for sufficiency, the ACO will issue a modification to the contract which changes the name of the contractor.

C. Any questions regarding the change of name agreement should be referred to the ACO.

030103 Successor in Interest to Government Contract Agreement

It is the responsibility of the contracting officers to accomplish and resolve the actions contained in paragraph 030103. This paragraph was included as general guidance for personnel in the disbursing offices.

A. This agreement must consist of a legal instrument executed by the contractor (transferor), the successor in interest (transferee),

and the government by which, among other things, the transferor guarantees performance of the contract, the transferee assumes all obligations under the contract, and the government recognizes the transfer of the contract and related assets.

B. Title 41, U.S.C. section 15 prohibits transfer of government contracts. However, the government may, in its interest, recognize a third party as the successor in interest to a government contract when the third party's interest in the contract arises out of the transfer of all the contractor's assets or the entire portion of the assets involved in performing the contract. Examples include, but are not limited to:

1. Sale of these assets with a provision for assuming liabilities.
2. Transfer of these assets incident to a merger or corporate consolidation.
3. Incorporation of a proprietorship or partnership, or formation of a partnership.

C. When a contractor asks the government to recognize a successor in interest, the responsible contracting officer shall obtain from the contractor three signed copies of the proposed novation agreement and one copy each, as applicable, of the following:

1. An authenticated copy of the instrument effecting the transfer of assets; e.g., bill of sale, certificate of merger, contract, deed, agreement, or court decree.
2. A list of all affected contracts and purchase orders remaining unsettled between the transferor and the government, showing for each the:
 - a. Contract number and type.
 - b. Name and address of the contracting office.
 - c. Total dollar value as amended.

d. Remaining unpaid balance.

3. A certified copy of each resolution of the corporate parties' boards of directors authorizing the transfer of assets.

4. A certified copy of the minutes of each corporate party's stockholders meeting necessary to approve the transfer of assets.

5. An authenticated copy of the transferee's certificate and articles of incorporation, if a corporation were formed for the purpose of receiving the assets involved in performing the government contract.

6. The opinion of legal counsel for the transferor and transferee stating that the transfer was properly effected under applicable law and the effective date of transfer.

7. Evidence of the transferee's capability to perform the contracts.

8. Balance sheets of the transferor and transferee as of the dates immediately before and after the transfer of assets, certified for accuracy by independent accountants.

9. Evidence that any security clearance requirements have been met.

10. The consent of sureties on all contracts listed under paragraph 030105-C(2).

D. When recognizing a successor in interest to a government contract is consistent with the government's interest, the responsible contracting officer shall execute a novation agreement with the transferor and the transferee. It shall ordinarily provide in part that:

1. The transferee assumes all the transferor's obligations under the contract.
2. The transferor waives all rights under the contract against the government.
3. The transferor guarantees performance of the contract by the transferee (a satisfactory performance bond may be accepted

instead of the guarantee).

4. Nothing in the agreement shall relieve the transferor or transferee from compliance with any Federal law.

E. When recognizing a successor in interest to a government contract, the responsible contracting officer shall follow the prescribed format as stated in FAR 42.1204.

030104 Government's Nonconcurrence in Transfer of Contract

When it is in the government's interest not to concur in the transfer of a contract from one company to another company, the original contractor remains under contractual obligation to the government. The contract may be terminated for reasons of default, if the original contractor does not perform. For additional guidance, see FAR 42.1204(b).

030105 Transfers not Considered Assignments

A. Rental payments to lessor's agents. Rental payments may be made to the agent of a lessor, if supported by evidence the agent is acting for the lessor. The rent also may be assigned even though the title to the property is not transferred (11 Comp Gen 278 (1932)) and 5 Comp Gen 749 (1926)).

B. Bankruptcy or receiverships by operation of law. Payment properly due may be made to the receiver (3 Comp Gen 623 (1924)) or trustee if approved by general counsel.

C. Assumption of contract surety.

1. When the contractor defaults and the surety assumes the contract, certain payments may be made to the surety (15 Comp Gen 409 (1935) and 12 Comp Gen 507 (1933)). If there are any aspects regarding conflicting claims, tax indebtedness, etc., the matter is handled as a claim to the General Accounting Office.

2. Settle with the contractor and surety as:

a. A surety, which completes work under a contract on which they have assumed, is subrogated to the rights of the contractor against the government for the unpaid balance due from the United States on that contract. It is also subrogated to the rights of the government against the contractor for the excess cost of completing the work of furnishing the materials and supplies. Therefore, the surety is entitled to be paid by the government the cost of completing the work, but no profit.

b. The contractor is entitled to be paid for work they performed if any funds are available on the contract for such payment after reimbursing the surety.

c. The total payments by the government must not exceed the contract price (3 Comp Gen 995 (1926), 8 Comp Gen 36 (1928), 8 Comp Gen 58 (1928), 8 Comp Gen 266 (1928), 8 Comp Gen 318 (1929), and 8 Comp Gen 435 (1929)). It is common practice to require releases from the contractor and the surety (3 Comp Gen 995 (1926) and 8 Comp Gen 266 (1928)).

d. Payment into court of the balance should not be made (14 Comp Gen (1935)). The amount remaining is paid to the assignee of a receiver where the court orders the receiver to accept the assignee's offer to complete the work in consideration of receiving all the payment and retaining percentages due (3 Comp Gen 623 (1924)).

030106 Documents Required To Be Filed in Connection With Assignments

A. The disbursing office designated in the contract shall pay assignees only after receipt of these assignment documents:

1. Three copies of the notice of assignment acknowledged by the contracting officer.

2. Original and one copy of the signed notice and a true copy of the instrument of assignment from the assignee.

3. Two copies of the notice acknowledged from the surety or sureties, if any.

These copies are received from the surety or sureties via the assignee.

B. The disbursing office:

1. Signs and returns a copy of the notice to the assignee.

2. Files the true copy of the instrument of assignment, the original notice, and a copy of the notice acknowledged by the contracting officer, with the disbursing office copy of the contract. Files a copy of the notice acknowledged by the surety or sureties, if any.

3. Signs, dates and returns the receipt, if applicable, to the assignee.

030107 Documents Required To Be Filed If Assignment is Cancelled

A. If the assignee releases the contractor from the assignment of claims under the existing contract, the disbursing office makes remaining payments to the contractor only after receipt of these release documents:

1. A true copy of the instrument of release of assignment; and

2. The original and two copies of the release notice.

B. The disbursing office:

1. Signs and returns a copy of the release notice to the contractor.

2. Files the true copy of the instrument of release of assignment and the original release notice with the disbursing office copy of the contract. Acknowledgment by the contracting officer and surety is not required. For additional guidance see FAR 32.805(e).

3. Signs, dates, and returns the receipt, if applicable, to the assignee.

030108 Letter Contract Assignments

When assignments of claims under letter contracts are made, notices (with copies of

assignments) are given to contracting officers and disbursing offices. If a letter contract is assigned, that assignment is not voided by a subsequent definitization of the contract. Contracting officers and disbursing offices accept, receipt for, and honor the second assignment of the proceeds of a definitive contract superseding a letter contract. The two instruments of assignments are thereafter treated as if they were only one instrument, and payments continue to the assignee.

030109 Open-End, Call-Type, or Indefinite Delivery-Type Contracts

A. Assignment of claims under open-end or call-type contracts or indefinite delivery type contracts are authorized provided orders placed prior to assignment obligate the government to pay \$1,000 or more or provided the basic contract imposes a minimum obligation of \$1,000 or more.

B. When the disbursing office questions whether an assignment of claims applies to an individual call or order under indefinite, delivery-type contracts, payments under the call or order are withheld pending determination of the status and validity of the assignment by the contracting officer.

030110 Unilateral Purchase Orders

A. A notice of assignment on a purchase order of \$1,000 or more will not be acknowledged unless it has been established that such order is a legally binding contract.

B. Payment of the purchase order is withheld pending determination of the status of the assignment by the contracting officer.

C. If the contracting officer rejects the assignment, the disbursing office returns the acknowledged notice and copy of the assignment to the assignee and advises that the assignment cannot be recognized for the reasons stated by the contracting officer.

D. If the contracting officer has determined that the assignment is valid, the disbursing office acknowledges the notice of assignment

and takes the required action as detailed in paragraph 030106-B.

030111 Basic Ordering Agreements

A notice of assignment will not be acknowledged on a basic ordering agreement. The paying office returns the notice and copy of the assignment to the assignee and advises that assignments may be acknowledged on individual orders in excess of \$1,000. It should be noted that the Basic Ordering Agreement "G" contracts require a notice of assignment for each delivery order/supplemental procurement identification number. If there is any doubt on any of these type of contracts, they should be referred to your legal office for determination.

030112 Financing Companies

A business concern which, incidental to its principal business of acting as selling agent, advances money to pay for raw materials, labor, etc., is not a "Financing Institution" to which money due, or to become due, under a government contract may be assigned (54 Comp Gen 80 (1984)). A company regularly engaged in the financing business is not disqualified from accepting assignments as a "financing institution" solely because it consists of an individual or partnership (20 Comp Gen 415 (1941) as distinguished by 54 Comp Gen 80 (1984)). When a contractor factors or sells an accounts receivable at a discount, they are non-allowable assignments. In such cases and others of similar nature, legal counsel should be consulted in order to protect the government's interest.

030113 Special Considerations

A. Two assignments of the same contract may not exist since the second assignment without release from the first assignment would be null and void. After the first assignment is released and the original parties are notified, a second assignment may be made (22 Comp Gen 520 (1942)).

B. The performance of work under the contract may not be assigned (41 U.S.C. 15).

C. If the dollar amount of the contract

is increased, it is not necessary to execute an additional assignment (23 Comp Gen 943 (1944)).

D. Date of assignment shall not be before date of contract.

0302 DOUBTFUL CLAIMS

030201 General Information

A. The disbursing office settles commercial accounts for which they have payment responsibilities. The local office of counsel or staff judge advocate furnishes legal guidance on claims involving questions of law. Local counsel should coordinate their efforts with DFAS Headquarters General Counsel.

B. Claims by the government may not be compromised by an agent of the government except as authorized by law. Demand for the full amount is required. The action for indebted contractors in Chapter 18 of this volume is required if payment in full is not received on time.

C. Doubtful claims exclude claims applicable to the PPA. The Comptroller General has held that PPA interest must be paid from the funds available for the administration of the program for which interest was incurred.

030202 Responsibility of Contracting Officer, Disbursing Office, and DFAS Columbus

A. The Contract Disputes Act of 1978 provides a fair, balanced, and comprehensive statutory system of legal and administrative remedies in resolving government contract claims. The Act's provisions help to induce resolution of more contract disputes by negotiation prior to litigation; to equalize the bargaining power of the parties when a dispute exists; to provide alternate forums suitable to handle the different types of disputes; and to ensure fair and equitable treatment to contractors and Federal agencies.

B. A doubtful claim exists when the disbursing office is unable to decide positively that the claim is or is not payable. The disbursing office refers such claims to the contracting officer with an explanation of the doubtful

aspects. The contracting officer may be the PCO, ACO, or TCO depending on the nature of the claim. Primary responsibility may shift between one or more types of contracting officers during the process of developing a claim. With assistance from the disbursing office, the contracting officer establishes additional facts and develops the claim to its final stage, including recommendations.

1. All claims by the government against a contractor relating to a contract shall be the subject of a decision by the contracting officer. The contracting officer shall issue the decision in writing and shall mail or otherwise furnish a copy of the decision to the contractor. The decision shall state the reasons for the decision reached and shall inform the contractor of the right to appeal. The contracting officer's decision on the claim is final and conclusive unless an appeal or suit is instituted by the contractor.

2. All related paperwork of the claim then is sent to the legal office for the cognizant disbursing office. If the disbursing office is at a DFAS Center, it will be processed there. If the disbursing office is an Operating Location (OPLOC), the OPLOC will forward it to their colocated disbursing office. If the OPLOC does not have a colocated legal office, it will forward it to their servicing DFAS Center. For all other disbursing offices that do not have a colocated legal office, they also will forward the claim to the servicing DFAS Center. Claims that are filed directly with the General Accounting Office (GAO) by contractors are returned to one of the DFAS Centers for development and recommendation. The receiving DFAS Center will send a copy of the GAO decision to the cognizant disbursing office.

NOTE: Every claim against the United States that is forwarded to the Claims Division, GAO, as well as all correspondence relating to the claim, must contain the employer's identification number.

C. Decisions of the Armed Services Board of Contract Appeals (ASBCA). The disbursing office makes the vast majority of payments directed by decisions of the ASBCA.

Occasionally, there may be a reason(s) to doubt the decision of the ASBCA because it may appear to be fraudulent, capricious, arbitrary, so grossly erroneous as necessary to imply bad faith, not supported by substantial evidence, or in error on a question of law. In any such case, the disbursing office refers the matter, along with a statement of the grounds for such referral, and supporting documents to the contracting officer who in turn refers it to the servicing office of counsel or staff judge advocate. If the office of counsel or staff judge advocate believes that the ASBCA committed a reversible error in the decision and that the best interests of the government warrant further review, the Agency Trial Attorney or General Counsel and the Office of the Secretary of Defense General Counsel determines if the matter should be referred to the Department of Justice (DoJ) for the initiation of judicial proceedings. If the DoJ agrees with the decision of the ASBCA, payment will be made.

030203 Claims Requirements

The disbursing office prepares the administrative report and attaches the claim before routing it through the channels described in paragraph 030202-B. Open the report with the statement, "This is a report of a doubtful claim." The second and succeeding paragraphs should contain complete statements of the facts and the doubtful questions involved. The disbursing office reviews the claim file to ensure it is complete before forwarding it for review and evaluation.

030204 Documents Required

Information in this paragraph is furnished for guidance and is not mandatory. The documents and information listed should contain sufficient facts so that the GAO will not return the claim for more documents. Claims for amounts due deceased or mentally incompetent contractors include the applicable documents listed and processed under paragraph 030205. Claims not specifically covered are developed and supported as circumstances require.

A. General. The following data are common to all claims. Additional documents are

furnished in specific cases as indicated:

1. Original signed claim.
2. Copy of contract, purchase order, (or both if applicable), lease, or other contracting document.
3. Copies of all related correspondence between the claimant and the DFAS.
4. A signed statement by the disbursing office that:
 - a. Payment has not been made and will not be made except by certification in the name of the Comptroller General, or
 - b. Partial settlement in amount has been made and no further payment will be made except by certification in the name of the Comptroller General, or
 - c. Funds have been reserved (citing the appropriation from which the payment will be made, if approved by GAO) or that funds have not been reserved, as applicable.
5. Cite all vouchers covering payments or collections, as applicable, made under the contracting document.
6. A signed report by the contracting officer as to what the records of that office show concerning the claim and the administrative recommendation. The report should include the intent of the contracting document.
7. Certified true copies or photostat copies of the invoices or other billing documents.
8. Copies of the receiving reports, other receiving documents, or if not available, a signed statement that the supplies and services were received.
9. SF 1034, Public Voucher for Purchases and Services Other Than Personal, (or other applicable voucher), in an original and six copies. The original is certified.

10. Copy of claimant's bid, if applicable.

11. Any other data considered appropriate.

B. Mistake in Bid. With a copy of the claimant's bid, include an abstract of all other bids.

C. Discount. Include the document containing the claimant's discount offer. If claimant contends that discount was taken after discount period, include a certified true copy or photostat copy of the invoice. The invoice should show the date received in the office designated by the contracting document.

D. Payments Under Leases. If the lease agreement is the responsibility of the U.S. Army Corps of Engineers, a report and recommendation are obtained from that activity.

E. Landing and Parking Fees and Other Accessorial Charges:

1. A signed report from the responsible officer of the major command having jurisdiction over the aircraft.

2. A signed statement containing the number and flight of the aircraft, and confirmation that the flight was authorized.

F. Coal Contracts:

1. Copy of coal analysis, where applicable.

2. Copy of weight certificate or other proof of weight.

3. An administrative recommendation from Director, DFAS, Columbus Center, if considered appropriate.

030205 Amounts Due Deceased or Mentally Incompetent Creditors

A. Deceased Public Creditors. Claims for amounts alleged to be due the estates of deceased individual public creditors that cannot be

settled locally, by reason of doubt, are submitted to the GAO for settlement. An element of doubt exists when there is a question as to the amount and the validity of the claim or a question as to whom payment may be made under the laws of the domicile of the decedent.

1. The claimant presents the claim against the United States for amounts due in the case of a deceased creditor. The claim is supported by the applicable documents listed in paragraph 030204. The contracting officer's statement will show there is (or there is not) an outstanding debt to the government. Obtain a statement of legal review and recommendation from the local office of counsel or staff judge advocate.

2. Claims involving current unnegotiated U. S. Government checks in the possession of the claimant which are drawn to the order of a deceased public creditor should be returned to the disbursing office which issued the checks. Checks that are undeliverable because of the death of the creditor will be stamped "Not Negotiable" on the face of the check. Attach a copy of SF 1098, Schedule of Cancelled or Undelivered Checks, to the claim.

B. Incompetent Public Creditors:

1. GAO Action. Claims for amounts due incompetent public creditors of the United States are submitted to the GAO for settlement. No form is prescribed for this class of claim; however, such claim must be in writing over the signature and address of the guardian, committee, or other person claiming on behalf of the incompetent and must set forth the connection of the incompetent with the Department of Defense. Those authorized to claim for an incompetent are:

a. Guardian or committee of the estate of an incompetent. A short certificate of the court showing the appointment and qualification of the claimant as guardian or committee is attached to the claim.

b. Persons other than a guardian or committee who supports the claim with a statement to show:

(1) That no guardian or committee has been or will be appointed;

(2) The claimant's relationship to the incompetent, if any;

(3) The name and address of the person having care and custody of the incompetent; and

(4) That any amount paid to the claimant will be applied to the use and benefit of the incompetent.

2. Administrative Action. After the first payment has been certified by the GAO to a guardian or committee, recurring payments may be made in the same form and capacity by the disbursing office as long as the appointment as guardian or committee remains in effect and the matter is otherwise free from doubt. Later claims for recurring payments need not be accompanied by a court certificate; however, they must be supported by a statement that the appointment is still in full force and effect.

CHAPTER 4

MISCELLANEOUS ADVANCE PAYMENTS0401 ADVANCE PAYMENTS040101 General

A. Prohibition Against Advances. Title 31, U.S.C., section 3324 prohibits payments in advance for delivery of supplies or rendering of services with certain exceptions. Money cannot be advanced unless authorized specifically by an appropriation act or specific statutory authority.

B. Authority for Advances.

1. Under 10 U.S.C. 2307, advance payments may be made to small business concerns which meet the requirements of law and receive the proper authorizations.

2. Advance payments on formally advertised contracts are made under the authority of 50 U.S.C. 1431 and Executive Order 10789.

040102 Advance Payment Policy

For instructions applicable to advance payment policy and requirements refer to FAR 32.4 and DFARS 232.4. For grants refer to the Office of Management and Budget (OMB) Circulars A-102 and A-110 and Chapter 19 of this volume.

040103 Interagency (Interdepartmental) Supplies and Services

A. General Policy. As authorized by Title 31 U.S.C. 1535 and 1536, various Federal agencies may enter into transactions with each other when it is found to be in the best interest of the government. This applies when one agency is better equipped to acquire or furnish goods or services than another and the items involved cannot be furnished as conveniently or more economically by private enterprise.

1. Orders placed under this section are obligated upon acceptance in writing by the performing agency provided acceptance occurs while the funds are available for obligation.

2. Each activity making an advance under this section accomplishes and monitors all aspects of the advance.

B. Leased Office Space. One agency may furnish another agency a portion of its leased office space and payment may be made in advance, or on any other basis agreed upon, for the proportionate cost of the space, utilities, and services furnished.

040104 Subscriptions to Periodicals

Subscriptions or other charges for newspapers, magazines, periodicals, microfilm libraries, official cable television service, and other publications for official use may be paid in advance when advantageous for economy or otherwise (57 Comp Gen 583 (1978) and 35 Comp Gen 404 (1956)). The total cost of the subscription is a valid charge to the appropriation for the fiscal year (FY) current at the time the subscription is ordered. Subscriptions may extend beyond current FY, begin in a subsequent FY or extend for more than one FY (23 Comp Gen 326 (1943) and 24 Comp Gen 163 (1944)).

040105 Rental of Post Office Boxes and Purchase of Foreign Postage

A. Advance payment of post office box rental is authorized on an annual basis (25 Comp Gen 834 (1946)). A box rented before the beginning of the fiscal quarter must be rented for no less than a full quarter. The United States Postal Service will not refund a portion of the rental if the box is surrendered before the end of the rental period. This policy applies to advance payments of box rent made on a quarterly or an-

nual basis (34 Comp Gen 191 (1954)). The United States Postal Service bills on its Notice No. 32. Upon receipt of this notice, line through the space provided for the Postmaster's signature and attach it to SF 1034, Public Voucher for Purchases and Services Other than Personal, or SF 1080, Voucher for Transfer Between Appropriations or Funds, used for payment. Make the check payable to "Postmaster."

B. Foreign postage stamps may be purchased from imprest funds or by SF 1034. When an SF 1034 is used, the originating office prepares and certifies the voucher and forwards it to the disbursing office. The disbursing office prepares a check and sends it to the originating office. The originating office purchases the stamps and provides the disbursing office with a receiving report. No receipt is necessary as the check endorsement acknowledges payment. When the SF 1034 is used, the prepayment is approved as an exception to normal accounting requirements.

040106 Payments to State and Local Governments

Advance payments may generally be made to state or local governments per 39 Comp Gen 285 (1959), 25 Comp Gen 834 (1946), 58 Comp Gen 29 (1978), and 57 Comp Gen 39 (1978)).

040107 Tuition

For instructions on payment procedures and policies, refer to paragraph 120212.

040108 Foreign Country Requirements

A. Statutory Authority. Title 10, U.S.C., section 2396 authorizes advances of public monies as:

1. Per the laws of foreign countries or their ministerial regulations.

2. For rent in foreign countries for such periods as local custom dictates.

B. Motor Vehicle Operator Permit Fees Overseas. Some foreign countries require per-

sonnel to obtain motor vehicle driver permits to perform their official duties. The fees for the permits may be paid in advance. The tour of duty in the foreign country should justify the expenditure (Comp Gen B-115463, Sep 18, 1953).

C. Counsel Fees and Other Expenses in Foreign Courts:

1. Payment of counsel fees and other expenses in foreign courts may be paid before the service is performed.

2. Requests for payment of counsel, bail, or other expenses ordinarily will be made by the defendant, or accused, to the officer (or designee) exercising general court martial jurisdiction. The officer (or designee) determines if the request meets the proper criteria and takes final approval or disapproval action.

3. When appropriate, contracts or letters of commission and understanding will be used to obligate the government for payment of counsel fees, court costs, bail, charges for obtaining copies of records, printing and filing fees, interpreter fees, witness fees, and other necessary and reasonable expenses. The payment of fines or civil damages is not authorized. Payments of bail may be made when authorized in a letter or message by the responsible officer and citing 10 U.S.C. 1037 as the authority. For payments of bail, establish a refund receivable pending return of the bail payment. Clear the refund receivable upon collection, or appropriate evidence that the bail payment will not be refunded. Before posting of bail, members must sign an agreement to refund to the government the amount of the bail, either in cash or payroll deduction, if they willfully cause forfeiture of the bail.

4. The responsible officer certifies the acceptance of the services acquired. Prepare an SF 1034 for payment of authorized charges. Payment will be made in local currency.

040109 Cash on Delivery (COD) Charges

When COD charges are paid from the imprest fund, payment is authorized before contents are examined.

040110 Purchase of Copyrights or License to Use Patent for Its Life

An advance payment may be made for a license to use a patent or for the purchase of copyright. The subject matter of the purchase must be within the authorization of the current FY appropriation (22 Comp Gen 904 (1943)). In addition, see paragraph 120208.

040111 Utility Connection Charges

Payment of a public utility connection or reconnection charge is not an advance payment. The government receives full consideration upon payment for making available services not otherwise available. Connection or reconnection charges are later reimbursable by a specified monthly refund on the invoice for utility services.

040112 Petition Fees

When a petition is made for immigrant status for a person whose services are required, the fee must accompany the petition. In this case the fee is payable in advance.

040113 Professional Societies

Memberships in professional societies or associations acquired in the name of the DoD Component may be paid in advance. The purpose of the membership must be to acquire services required for that component, not an individual. The head of the Component or designee makes the determination. The use of appropriated funds is prohibited for the individual benefit of any officer or employee of DoD (see 5 U.S.C. 5946; 31 Comp Gen 398 (1952); 32 Comp Gen 15 (1952); 24 Comp Gen 814 (1945); and 33 Comp Gen 126 (1953)).

040114 Attendance at Meetings

A. Payment of registration fees prior to attendance at meetings of technical, scientific, professional, or similar organizations may be made. See paragraph 110104 for personal reimbursements.

B. If the payment is nonrefundable

and the individual fails to attend for reasons beyond the individual's control, do not collect from the individual. However, collect if failure to attend is caused by an action not excused by the individual's supervisor.

040115 Quarterly Advances to General Services Administration (GSA) for Special Purpose Leased Space

The GSA bills for building rent in advance each quarter using GSA Form 789, Statement, Voucher, and Schedule of Withdrawals and Credits, or other similar billing form. The charge is at a fixed rate per square foot of space assigned based on costs of building operation and maintenance. Separate cost factors for utilities, rent, elevator service, etc., need not be itemized on the bill.

0402 LIBRARY DEPOSIT ACCOUNTING**040201 Library Deposit Accounting With Other Government Agencies**

Libraries that obtain government publications and subscriptions from other Federal agencies (e.g., National Technical Information Service, United States Government Printing Office, or Library of Congress) may establish deposit accounts with these agencies. Use the following procedures to establish a deposit account:

A. The librarian forwards a properly prepared SF 1034 through the budget office for review. The SF 1034 should state "for deposits only to new deposit account" or "to replenish previously established deposit account" and show the account number.

B. The disbursing office forwards a copy of the SF 1034 with the check to the named Federal agency (payee). The agency will credit payment to the deposit account.

CHAPTER 5

PAYMENTS UNDER REAL PROPERTY LEASES0501 LEASES050101 General

A. Applicability. Leases are subject to the statutory and regulatory provisions applicable to government contracts, as well as the specific statutory provisions pertinent to leases.

B. Coverage. A lease is a contract by which the use of land or buildings is conveyed for a specified time at a specified rate of compensation. Leases describe the premises, the specific period involved, purpose for which used, the amount of rent, method of payment, special services included (such as heat, light, water, and janitorial services) and any restoration provisions. If the lessor fails to provide the services in this case called for in the lease, the lessee (the government in this case) may pay the cost and deduct the amount from the lease rental payments.

1. Capital Lease. A lease that is essentially equivalent to an installment purchase of property is a capital lease. This type of lease transfers substantially all the benefits and risks of ownership from the lessor to the lessee.

2. Operational Lease. Leases that do not meet the criteria for a capital lease are considered to be operational leases.

050102 Rent

A. Fractional Parts of a Month. Payment for part of a month for leased premises is made on the actual number of days involved. In computing the time between two dates, the general rule is to exclude the first and include the last date, except when the lease is for a specified term and begins on the date of occupancy (10 Comp Gen 540 (1931)).

B. Monthly Installment Payments of

Annual Rent. A lease generally begins on the first of a month. For leases that begin on a date other than the first, the monthly rent installments become due and payable on the date of each month numerically corresponding to the date the term began, less one day. The amount of each installment should be one-twelfth of the annual rate, regardless of the number of days in any calendar month (24 Comp Gen 838 (1945)).

C. Recurring Rental Charges. Payment for these charges shall be made without requiring individual invoices from the vendor. At the end of each rental period, the using activity will confirm the use or availability of the property during the rental period. Identify lease and period covered on the payment voucher and process per provisions of the lease.

D. Reporting Rental Payments Made to Civilian Landlords. At the end of each calendar year, report yearly rental payments of \$600 or more to the Internal Revenue Service (see paragraphs 060505 and 060601). Report total payment on TD Form 1099-MISC, Statement for Recipients of Miscellaneous Income. Do not report payments to real estate agents.

050103 Party Entitled to Rental Payment

A. When a Federal Agency occupies land under a lease, the rental payment cannot be avoided because of any defect in the title of the lessor at the time the lease was made (9 Comp Gen 593 (1921)).

B. When a Federal Agency occupies land owned by several tenants in common under an agreement with one of them and without objection by the others, such tenant in common is entitled to receive the rent (9 Comp Gen 593 (1921)).

C. When property leased to the United States is sold on one day and the deed of con-

veyance is executed on another day, the grantee is entitled to receive the rental from the property only from and after the date of execution of the deed (15 Comp Gen 195 (1935)).

payment for the day after the notice of termination is mailed plus 29 days more. Leases with other termination provisions must be analyzed on an individual basis.

D. Liability for rent due does not become payable day-by-day. It becomes due in total on the dates set forth in the lease. The payment may not be currently prorated for several owners who may have owned the premises for a portion of the rental period. When leased property is sold, a copy of the deed of sale should be furnished for association with the lease contract (4 Comp Gen 193 (1924)). If proper notification is provided to the lessee, payment is made to the titleholder on the day payment is due.

050104 Payment for Leased Land

Payment for leased land may not be made in advance (23 Comp Gen 653 (1944) and 25 Comp Gen 834 (1946)). Leases in foreign countries are paid as local customs dictate.

0502 LEASES: TAXES AND IMPROVEMENTS

050201 Payment for Cost of Improvement of Rented Premises

The laying of conduits and wires in leased premises occupied by Federal Agencies is an improvement of the premises. Unless the lease provides for the making of such improvements by the United States, payment of the cost is not authorized (6 Comp Gen 943 (1923)).

050202 Payment of Taxes on Property

Although taxes are not payable by the Federal Government as the owner of real property, such taxes are properly payable as part of the rent when specifically included in the terms of the lease (24 Comp Gen 705 (1945)).

050203 Payment of Rent in Connection with Termination of Lease

Payment is based on the terms of the lease. Leases containing standard U.S. Army Corps of Engineers termination clause require

CHAPTER 6

FEDERAL, STATE, LOCAL, AND FOREIGN TAXES0601 TAXES060101 General

A. Tax Information Sources. The Federal Government's right to tax exemptions depends on the applicability of federal, state, and local tax laws; tax agreements with foreign countries; items being acquired; the nature of the tax; and the type of transaction. See Federal Acquisition Regulation (FAR) part 29, for general tax applications on United States purchases, right to exemptions, and the methods of claiming exemptions. Specific information not obtainable locally may be obtained from taxing authorities or through the cognizant DFAS Center.

B. Exemptions From Certain Federal Taxes.

1. Pursuant to 26 U.S.C. 4293, the Federal Government is exempt from federal taxes on communications services and facilities furnished to and paid for by the government. This does not include facilities furnished to a government contractor. Exemption can be made with or without the use of an exemption certificate. The installation contracting office is responsible for preparing tax exemption certificates.

2. Pursuant to 26 U.S.C. 4483(b), the Federal Government is exempt from the federal highway vehicle users tax imposed in 26 U.S.C. 4481. The exemption applies whether the vehicle is owned or leased by the Federal Government.

C. Sales of Commodities or Facilities. Tax collections are required on commodities or facilities sold that are not for the exclusive use of the United States. When tax free items or services purchased by the United States are sold to others, collect costs plus required taxes. The selling activity identifies customers and items or services subject to tax and includes any applic-

able taxes in billing documentation or statements. Taxes remitted are sent to the taxing authority.

0602 FEDERAL060201 Federal Excise Tax (FET)

A. Except for exemptions provided by the Internal Revenue Code shown in FAR, part 29, the government must pay taxes on fuel purchases. If a contract does not specify that the contract price excludes FET, assume the contract price includes the tax and pay only the contract price (14 Comp Gen 44 (1934) and 17 Comp Gen 1039 (1938)). If the contract specifically excludes the tax, FET should be added to the contract price by the contractor and billed on the invoice as a separately identified item.

B. Either tax exemptions or tax refunds are available for DoD purchases of jet fuel, aviation gasoline, marine diesel fuel, and off-highway use of gasoline and road diesel fuels. Whether an exemption is available or a refund application is required depends on where in the distribution chain the purchase was made and the IRS status of the seller of the fuel.

C. The Defense Fuel Supply Center, 8725 John J. Kingman Road, Fort Belvoir, VA 22060-6221, is responsible for any needed application for tax refunds in its bulk fuels or into-plane programs. The Military Services or activities are responsible for any needed application for tax refunds for any other fuel purchases. File for refunds on Department of Treasury (TD) Form 843, Claim for Refund and Request for Abatement.

D. Federal Excise Tax on Motor Gasoline. The Tax Reform Act of 1986 eliminated tax free sales to exempt entities and organizations. The tax exempt entities are defined as state (including National Guard) and local govern-

ments, the American Red Cross, and nonprofit educational organizations. Tax exempt entities must pay the tax and file for a refund. DoD entities are not tax exempt. Disbursing offices must pay the FET on gasoline fuel, but cannot file for a refund.

E. Quarterly Federal Excise Tax Return.

1. Reports are prepared and submitted quarterly unless notified differently by the District Director, Internal Revenue Service. A return is made on TD Form 720, Quarterly Federal Excise Tax Return, for the first calendar quarter when a tax liability is incurred and each later calendar quarter until a final return is filed. Final returns are filed when the requirement ceases and are marked "FINAL."

2. TD Form 720 contains a list of the commodities and services subject to the tax and the tax rate. This form also serves as the return for all excise taxes for which quarterly reporting is required.

3. Credit collections for FET are made to applicable deposit fund accounts. Deposit excise taxes collected per the most current instructions received from the Internal Revenue Service (IRS). These instructions require deposit of taxes semimonthly. Make such deposits, when required, with a commercial bank authorized to receive Federal tax deposits or with the servicing Federal Reserve Bank or Branch. To make a deposit, prepare SF 1049, Public Voucher for Refund and TD Form 8109, Federal Tax Deposit, received from the IRS. Report taxes deposited quarterly on TD Form 720. Contact your local District Director of Internal Revenue for deposit and tax forms.

4. Show the schedule of collection numbers, dates, and amounts for the collections made on the SF 1049.

5. Report the amounts of FET collected and deposited for the sale of commodities or services other than for the exclusive use of the U. S. Government.

6. Preparation of TD 720.

a. The disbursing office prepares TD Form 720. Instructions for preparing this form are in a separate pamphlet, Instructions for TD Form 720. Obtain forms and pamphlets from your local IRS office.

b. The TD Form 720 is due on or before April 30, July 31, October 31, and January 31. Penalties and interest may be assessed for failure to deposit excise taxes per IRS instructions (26 CFR 49.6302(C)-1). Such penalties may be waived by the IRS if the activity can establish reasonable cause for failure to comply.

c. Submit the original TD Form 720 and a copy of the related SF 1049 covering the amount of taxes collected to the appropriate IRS Center.

d. Attach copies of SF 1049 prepared when semimonthly deposits were submitted per paragraph 060201-E3.

0603 STATE AND LOCAL TAXES

060301 State and Local Taxes

A. When the tax is levied on the seller, the Federal Government must pay the tax as part of the purchase price, unless the taxing authority provides otherwise (37 Comp Gen 772 (1959); 32 Comp Gen 423 (1953); and 24 Comp Gen 150 (1945)). Where the government has, by contract, agreed to reimburse the contractor for taxes paid to a state or municipality, such payments are proper (Comp Gen B-134654, Feb 11, 1958 and FAR part 31). Where there is a valid and binding contract covering the furnishing of supplies or services at fixed unit prices, and the contract contains no provision for the adjustment of such prices in the event of the imposition on the contractor of state taxes applicable thereto, there is no authority for the payment of any taxes over and above the unit price stipulated in the contract (Comp Gen B-128346, Aug 8, 1956). Unless specifically stated otherwise in the contract, it is presumed that state and local taxes are included in the contract price (21 Comp Gen 719 (1942)). State statutes indicate whether the tax is levied on the seller or the purchaser. Some states accept SF 1094, U.S. Tax Exemption Certificate; others require payment of the tax at time of

purchase and provide a means for seeking refunds of the tax. The contracting officer will contact the local state taxing authority to verify if they accept tax exemption certificates. A blanket-type tax exemption certificate may be used to obtain the U.S. Government's exemption from state or local taxes in the case of continuing or numerous purchases from contractors. Generally, DoD Components shall assert the government's immunity or exemption from taxes whenever it is available.

B. Credit Cards for Service Station Purchases. If a service station will not accept the government's tax exemption at time of purchase, the tax will appear on the invoice. The disbursing office may pay the state or the local tax due on a credit card invoice when the state or local tax is a small amount of \$10 or less if it is more cost-effective than preparing a tax exemption certificate. (See GAO Policy and Procedures Manual for Guidance of Federal Agencies, Title 7, Appendix 4, Section E (1990)). When a tax exceeds \$10 for either a state or local taxing authority, the office issuing the credit cards must prepare a tax exemption certificate, SF 1094 - Exemption Certificate.

C. Bulk Purchases of Fuel. The rules for credit card purchases also apply for state and local taxes on bulk purchases of diesel fuels and gasoline (See paragraph 060301-B).

D. Disposition of State or Local Taxes. Deposit the amounts collected on individual sales during a month to the applicable suspense account. Make payments to the state or political subdivision the same as federal taxes, using SF 1049. Remit on or before the fifteenth day after the month collection was made. When the remittance represents taxes on sale of gasoline or other motor fuels, transmit per example:

Department of the Air Force
Headquarters 999 Bomb Wing
Boon AFB SC 12345-0001

SUBJECT: Motor Vehicle Fuel Tax

TO: South Carolina State Tax Commission,
Capitol Building
Charleston, SC 12346-0001

This remittance of \$150 provides for taxes levied by the State of South Carolina under authority of 4 U.S.C. 104, collected upon sales of gasoline and other motor vehicle fuels made by or through the (exchange-commissary), located on Boon Air Force Base, not sold for the exclusive use of the United States during the preceding month, ending at midnight, March 31, 1990, the amount of which is 500 gallons.

JAMES OVERSTAKE, Colonel, USAF
Commander

0604 CUSTOMS

060401 United States Customs Duties on Foreign Purchases

A. Duty Free Purchases. Emergency purchases of war materials abroad can be made by the Military Services (19 U. S. C. 1202, Schedule 8, Part 3). This material will be admitted free of duty. Supplies (as opposed to equipment) for government-operated vessels or aircraft may be withdrawn from any customs-bonded warehouse, from continuous customs custody elsewhere than in a bonded warehouse, or from a foreign-trade zone free of duty and internal revenue tax as provided in 19 U.S.C. 1309(a). See DFARS 225.604.

B. Payment of Custom Duties. On importations that are not duty free, charge the customs duties to the same appropriation as the purchase. This will be done even though the importation and the purchase may be in different fiscal years (26 Comp Gen 610 (1947)). Prepare vouchers to show the check will be paid to and addressed to the Collector or Deputy Collector at the port of entry.

060402 Customs Exemptions for American Imports and Purchases in Canada for Joint Defense Program

A. General. U. S. Government imports and purchases from other countries are exempt from Canadian import duties and taxes when used for Joint Defense projects in Canada.

B. Refund or Remission of Taxes. Goods purchased in Canada by or for the U. S.

by the Canadian Commercial Corporation are governed by concessions when U. S. funds expended are intended for joint Canadian-United States projects in Canada or when the goods will become and remain U. S. property. The concessions permit refund or remission of:

1. Sales tax paid on goods other than those for resale to members of the United States Armed Forces or civilian personnel for private use.

2. Excise taxes, including the stamp tax on checks. Items for resale to members of the United States Armed Forces or civilian personnel for private use are not exempt from stamp taxes or purchase taxes.

3. Excise taxes paid or ordinarily payable on:

- a. Cable, telegraph, and long distance telephone messages when charges are not made to individuals but are made direct to the U.S. Government.

- b. Transportation requests, warrants or tickets, and seats, berths, or other sleeping accommodations when charges are not made to individuals but are made direct to the U.S. Government.

4. Customs duty paid on import goods when used, directly consumed, processed, or attached to items or goods manufactured in Canada and sold to the U. S. Government for use with joint Canadian-United States projects.

C. Notation on Payment Vouchers. Vouchers for Canadian purchases or services will show: "United States Government Funds-exempt from Canadian excise tax, refer to Order-in-Council PC 3108." Paying and Collecting will type the notation on checks. This statement will assist the Canadian Department of National Revenue in giving the exemption.

0605 MISCELLANEOUS

060501 Payments in Lieu of Taxes

A. Charges by state or local govern-

ments for services levied on Federal Government entities or their contractors, which are not imposed on residents or non-federal, tax-exempt entities, where the cost of the service is borne by the general tax revenues, are in the nature of a tax to which the United States is immune. The placement of the Federal Government in a separate category from other tax-exempt entities for imposing a charge for services is unreasonable and discriminatory classification on the part of a state or local government and the payment of the charge is unauthorized (50 Comp Gen 343 (1970)).

B. A reasonable charge by a political subdivision based on the "quantum" of direct service furnished, and which is applied equally to all property tax-exempt entities, need not be considered a tax against the United States, even though the services are furnished to the tax payers without a direct charge, provided the political subdivision is not required by law to furnish the service involved without a direct charge to all located within its boundaries (50 Comp Gen 343 (1970)).

C. Payments are permitted in lieu of taxes to municipalities that have lost tax revenue by transfer of plants to governmental agencies, only when authorized by the Congress. Payments in lieu of taxes are not authorized if the property transferred was never on municipality tax rolls and municipal services had never been furnished (36 Comp Gen 592 (1957)).

060502 Foreign Taxes

U. S. Government purchases in a foreign country generally are not exempt from taxes and custom duties when imposed by the foreign country. The Status of Forces or government tax agreements may provide exceptions. See the FAR, part 29.402.

060503 Taxes on Arms and Ammunition

Appropriated funds will not be used for tax payments on the sale or transfer of firearms, pistols, revolvers, shells, or cartridges. For additional information of these taxes see 10 U.S.C. 2385 and the FAR, part 29.2.

060504 Environmental Assessments

If an environmental assessment is levied by a local government and it represents a fee, payment is authorized. If, however, the assessment appears to be a tax and its legality is questionable (31 U.S.C. 3529), payment is not authorized. Payment under protest should not be made. Legal advice should be obtained from your office of counsel regarding payment of assessments by state and local governments.

060505 TD Form 1099-MISC, Statement for Recipients of Miscellaneous Income

A. General. At the end of each calendar year, disbursing offices are required to report to the IRS certain payments. These are payments made to noncorporate contractors for services and to corporations providing medical and health care services, totalling \$600 or more per contractor or royalties of \$10 or more in any calendar year (26 U.S.C. 6041 and FAR 52.204.3). Disbursing offices must provide these recipients with a TD Form 1099-MISC. This form must be provided to payees by January 31 following the year of payment.

B. Payments Subject to Information Reporting:

1. Payments to noncorporate contractors for salaries, wages, commissions, fees, rent (unless paid to a real estate agent), royalties, awards, prizes, interest penalties and additional interest penalties under the Prompt Payment Act, and other forms of compensation.

2. Payments to a corporation engaged in providing medical or health care services unless the payment is made to a hospital or extended care facility that is exempt from taxation under 26 U.S.C. 501(a).

C. Payments Not Subject to Information Return Reporting:

1. Payments of bills for merchandise.

2. Payments subject to TD W-2, Wage and Tax Statement withholding proce-

dures.

3. Payments of rent made to a real estate agent.

4. Payments to persons in the military or civil services of the United States as an allowance or reimbursement for traveling or associated expenses.

5. Payments made to employees for service performed in Puerto Rico.

6. Payments made as an award to an informer or similar payments.

7. Payments made to a nonmedical or nonhealth care corporation when "INC." or "Incorporated" is an obvious part of the business title (26 CFR, section 1.6041-3(c)).

8. Payments made to a government agency, political subdivision, or instrumentality thereof.

D. Backup Withholding.

1. Requirements for Taxpayer Identification Number (TIN). The IRS requires (26 U.S.C. Section 6109 and IRS notice 398) a recipient of income to give the payer of that income the TIN for use in filing information returns. The TIN is the individual's social security number or employer identification number. A Privacy Act statement must be provided to an individual when requesting the reporting of a Social Security number. If the TIN is not readily available from contractual or other documents, the contracting officer will contact the payee to obtain the TIN (FAR 4.203). Individuals or entities that refuse to provide a TIN should be advised of the requirement for backup withholding at a 31 percent rate and potential fine of \$50 for failure to furnish the TIN (see instructions for TD Form 1096, Annual Summary and Transmittal of U.S. Information Returns, and IRS Notice 398).

2. DoD activities must perform backup withholding when one condition from each paragraph 060505-D.2.a and b is present.

a. Taxpayer Identification Number.

(1) The payee fails to provide a TIN to the DoD activity. The TIN may be a social security number or an employer identification number.

(2) The IRS informs the disbursing office that the payee provided an incorrect TIN.

(3) The payee provides a TIN consisting of other than nine numerals.

b. Other:

(1) Reportable payments to the payee total \$600 or more during the calendar year.

(2) An information return was required concerning the payee for the preceding calendar year.

(3) Backup withholding was required from the payee for the preceding year.

3. Assessment of Tax. After reasonable efforts to obtain the TIN have been unsuccessful, withholding of Federal Income Tax at the rate of 31 percent should be accomplished and the balance of the payment forwarded to the payee. Tax should be assessed on the entire payment that causes the \$600 limit to be exceeded and any subsequent payments to that person or corporation until a TIN is provided.

4. The tax withheld should be deposited to the appropriate deposit account. Recording of backup withholding should be accomplished on schedule A (TD Form 941, Employer's Quarterly Federal Tax Return) and reported on TD Form 941.

0606 REPORTING

060601 TD Form 1096, Annual Summary and Transmittal of United States Information Returns

A. Payment of \$600 or more to any

individual or to any medical or health care corporation or royalties of \$10 or more in any calendar year must be reported to the IRS. Reporting of the payment or royalty is required in order to provide the IRS with a cross-reference data base of recipients' miscellaneous income.

B. Forms Required:

1. A TD Form 1096 must be used to transmit and summarize payment information. It serves as a cover sheet for one or more individual reports. See IRS publication instructions for TD Form 1096 for detailed guidance. TD Forms 1096 may be obtained through your local publication distribution office.

2. A separate TD Form 1099-MISC must be completed for each individual or corporation concerned. TD Forms 1099-MISC with a TIN must be bundled separately from TD Forms 1099-MISC without a TIN. Both bundles may be covered by one TD Form 1096 with the number of forms without a TIN shown in the "without taxpayer identification number" box. TD Forms 1099-MISC may be obtained through your local publication distribution office.

C. Distribution of Report. TD Forms 1096 and 1099-MISC should be filed by February 28 following the year of payment with the appropriate IRS center listed in the instructions for TD Form 1096.

CHAPTER 7

PROMPT PAYMENT ACT0701 GENERAL070101 Introduction

A. The Prompt Payment Act (PPA) of May 21, 1982 (Public Law 97-177), amended on October 17, 1988 (Public Law 100-496), 31 U.S.C 3900, requires Federal agencies to make payments in a timely manner. If a payment to a contractor is late, an interest payment also is due to the contractor and should be made without a contractor having to request the interest payment. The PPA applies to the acquisition of property or services, including contracts for the rental of real or personal property, from a business concern. A business concern means any person or organization engaged in a profession, trade, or business, and nonprofit entities (including state and local governments but excluding Federal entities) operating as contractors. Payment terms should be specified in the contractual document. Disbursing offices should disburse funds in accordance with the payment terms in the contract. However, if the payment terms contained in the contract conflict with the corresponding payment provisions of the PPA, request a clarification from the responsible contracting officer. If no payment terms exist within the contract, make payment in accordance with the relative payment terms prescribed in this Regulation. All DFAS disbursing offices shall make payments covering contracts and purchase orders entered into by contracting officers under regulations governing the functions of purchasing and contracting officers as published in the Federal Acquisition Regulation (FAR) and the Defense Federal Acquisition Regulation Supplement (DFARS). Prior to disbursing funds on a contract, the disbursing office must be furnished with supporting documents, or in some instances, vouchers supported by such documents, which serve as evidence that a legal disbursement of public funds may be made. These supporting documents ordinarily consist of:

1. Contracts or purchase orders.

2. Invoices from contractors.

3. Receiving reports accomplished and furnished by offices receiving the property or services.

B. The PPA requires that payments be made in a timely manner - not early, not late, and requires the cash management of invoices. Payments should be scheduled as close as possible to, but not later than, the discount or payment due date. The PPA also applies to foreign contractors and OCONUS contracts, regardless of location where contracts were awarded or where delivery takes place.

1. Contracts issued on or before March 31, 1989. If the contract terms require payments to be made in 30 days, a payment may be made on the 28th, 29th, or 30th day and meet the requirement and intent of the PPA. In compliance with the PPA Amendments of 1988 and sound cash management, contracts issued on or after April 1, 1989, may be paid no earlier than the 23rd day without being an early payment and no later than the 30th day without being a late payment on which interest should be paid.

C. Waiver of Cash Management. In certain situations it may be necessary to make a payment(s) earlier than the due date. Early payments should be the exception rather than the norm. Only a DFAS Center Director or head of a disbursing office or either one's designee has the authority to waive the cash management of invoices. If a waiver is approved, the early payment(s) has to be reported on the quarterly PPA Report, ACCT RPT (Q) 1619 (see paragraph 070601).

070102 Exceptions

A. The PPA does not apply to con-

tracts with foreign governments (bilateral agreements and memoranda of understanding).

B. The PPA does not apply to contracts executed prior to October 1, 1982 (unless modified or renewed after that effective date).

C. Any interest which may be payable under claims settled under the Contract Disputes Act (CDA) of 1978, except claims related to the PPA, will be awarded and paid under this CDA. Any interest found due under a claim related to the PPA will be paid under the PPA.

D. Contracts based on foreign laws or customs issued under Status of Forces Agreements (10 U.S.C. 2396) will normally be exempt from the provisions of the PPA.

E. Contracts where payment terms and late payment penalties have been established by other governmental authority (e.g., tariffs) are not applicable to the PPA requirements.

F. Contract financing payments, other than the final payment, are not subject to the payment provisions of the PPA as noted in paragraph 070205-B.10.

G. U.S. Property and Fiscal Offices (USPFOs) in each state share costs with their state on building or maintaining property. If the state contracting officer, acting in his or her capacity as a state employee, issues contracts for this work using the state fund cites, payments the USPFO makes to the state or to the contractor are exempt from the PPA. However, if the USPFO contracting officer, acting in his or her capacity as a Federal employee, issues the contracts using Federal funds cites, either to the state or to a private business concern, the payments are subject to the PPA.

H. Advance payments are not subject to the PPA. For more detail, see Chapter 4 of this volume.

I. When the payment due date falls after the appropriation cancellation date, payments are exempt from early payment rules and may be paid prior to the cancellation of the appropriation.

070103 Date Stamping Documents

All offices identified to receive supporting documents will date stamp such documents on the actual day of receipt. The office which first receives the document should ensure that all designated offices comply with this requirement. If an invoice is not date stamped upon receipt in the proper billing office, the invoice date becomes the date used to determine the due date, rather than the date received. Problems in this area must be brought to the attention of the responsible official for resolution.

0702 INVOICES

070201 Proper Invoice, FAR 52.232-25(a)(4) and DFARS 252.211

To be considered a proper invoice, FAR 52 and DFARS 252 mandate that it must contain specific information. If there is a discrepancy between the FAR (FAR and DFARS) and this Regulation, the FAR takes precedence. A proper invoice must contain the following:

A. Name and address of the contractor.

B. Invoice date.

C. Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).

D. Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

E. Shipping and payment terms, (e.g., shipment number and date of shipment, prompt payment discount terms). Bill of lading number and weight of shipment will be shown for shipments on government bills of lading.

F. Name and address of contractor official to whom payment is to be sent (must be the same as that in the contract or on a proper notice of assignment).

G. Name (where practicable), title,

phone number, and mailing address of person to be notified in event of a defective invoice.

H. Any other information or documentation required by the contract, such as evidence of shipment.

I. It is not necessary for an invoice to be totally free of defects in order to be proper and to create a valid demand upon the government. Although individual circumstances vary, in general, the activity approving or making the payment must be able to determine that:

1. The goods or services being billed were in fact properly ordered under a specific contractual document, and received from the business concern designated in the order.

2. Payment is being requested by the same business concern.

J. Errors in contractual documents must be corrected by a formal modification. In the past, there have been problems between the disbursing offices and contracting offices concerning the timely issuance and receipt of corrective administrative modifications when payment had been made. Disbursing office personnel will notify the contracting office personnel of items in the contract that need to be corrected. Contracting personnel will make the changes through a formal modification. Disbursing office personnel will not make any changes to contracts. If there is doubt as to whether payment to the invoicing business concern would be proper, the invoice should be considered materially defective and must be returned to the contractor within 7 calendar days (3 calendar days for suppliers of meat and meat food products and fish and frozen fish and 5 calendar days for suppliers of perishable agricultural commodities, dairy products, edible fats or oils) after the date of receipt of the defective invoice. The notice to the contractor must be in writing and is considered effective as of the date mailed. Maintain a record of the mailing date since timely notification prevents the payment clock from starting. If the notification is not made within the number of days stated in this paragraph, the payment clock will continue to run until the contractor is formally notified. In these instances, the pay-

ment due date will be reduced by the number of days between the return of the defective invoice and the expiration of the applicable time period. In cases where the returned invoice offers a cost effective discount, request the contractor change the date on the existing corrected invoice, if resubmitted, or issue a new corrected invoice with the current date on it.

070202 Acceptance

A. Actual Acceptance. Actual acceptance is defined as a formal certification that the goods or services have been received and that they conform to the terms of the contract. This function occurs after the completion of any necessary testing and inspection allowed by the contract. This date generally conforms to the date shown in Block 21 of DD Form 250, Material Inspection and Receiving Report, the date shown in Block 26 of DD Form 1155, Order for Supplies or Services, or the date stamped on the invoice by the receiving activity.

B. Constructive Acceptance. Unless otherwise specified in the contract, constructive acceptance is considered to take place not later than 7 calendar days after delivery of goods or performance of services, unless there is a disagreement over quantity, quality, or contractor compliance with a contract requirement. A longer acceptance period must be specified in the solicitation and included in the contract to afford the activity more than 7 calendar days to inspect, test, and accept the property or evaluate the services. In the event that actual acceptance occurs within the constructive acceptance period, the determination of a due date shall be based on the actual date of acceptance.

070203 Follow-up for Required Documents

If payments cannot be made due to the non-receipt of receiving reports, copies of contracts, contract modifications, or other required documentation, the disbursing office will follow-up with the contracting or receiving office to ensure that these documents are forwarded in a timely manner. These follow-up requests should be made in time to prevent the possible loss of cost-effective discounts (if possible) and to avoid the unnecessary payment of late payment inter-

est penalties.

070204 Action on Late Documents

If requested supporting documents are not received within a reasonable time, or if follow-up action is habitually required to receive such documentation, report the matter in writing through channels to the commander of the activity responsible for the delays. Include a brief statement of the facts, a list of the missing documents, the amount of cash discounts involved, if any, or possible interest penalties for late payment and the actions previously taken to obtain the supporting documents in a timely manner.

070205 Computation of Payment Due Date

A. General. Payment of a properly approved invoice will be made as close as possible to, but not later than, the due date specified in the contract. In general, contracts with no specific payment due dates will be paid as close as possible to, but not later than, 30 calendar days following the later of the following three events:

1. Execution of a valid, signed, contractual document.

2. Receipt of the invoice by the activity designated in the contract or order as the activity to which the invoice is to be sent. (If no invoice is required, e.g., certain periodic lease agreements, payment should be made in accordance with the specific terms of the contract.) If the receipt date of the invoice is not annotated on the document, the date of the contractor's invoice will be used.

3. Acceptance of goods or services by the activity designated to perform this function. For bill paying purposes, this date will be the earlier of actual acceptance or constructive acceptance (see paragraph 070202).

B. Specific Due Dates.

1. Cost-Effective Discounts. Pay within the discount period if cost-effective discounts are offered in the contract or on the contractor's invoice. If the discount terms of the

contract are not in agreement with the discount terms offered on the invoice, the discount most advantageous to the government will be taken (See paragraph 020102-D.) Make payment as close as possible to the discount due date. Do not take the discount unless the invoice is paid within the discount period. An interest penalty will be assessed if a discount is taken erroneously and the deducted amount is not returned to the contractor within the original payment terms of the contract.

2. Fast Payment. When orders are issued under Fast Payment procedures (see paragraph 100301), payment is made based on the contractor's submission of an invoice which constitutes a representation that delivery has been made and that there has been compliance with all provisions of the orders. Payment will be made no later than 15 days after receipt of a proper fast pay invoice at the office designated in the contract to receive such invoice. Interest penalties will accrue if payment is not made within the 15-day time frame.

3. Contracts with Suppliers of Meat, Meat Food Products, Fresh and Frozen Fish Products, Poultry, and Egg Products. Payment will be made as close as possible to, but not later than, 7 calendar days from the date of delivery of the product. The basic definition of meat and meat food products is contained in the Packers and Stockyards Act of 1921 (7 U.S.C. 181). It includes any perishable edible product (fresh, chilled, or frozen) derived from the slaughter of cattle, sheep, swine, horses, mules, and goats. It encompasses processed refrigerated meats such as luncheon slices, frankfurters, bacon and ham. It excludes nonperishable meats, all perishable or nonperishable mixed products (meat and other food ingredients combined), seafood, game, and dairy products other than eggs. The basic definition of "Fish" was established by the Fish and Seafood Promotion Act of 1986. "Fish" means finfish, mollusks, crustaceans, and all other forms of aquatic animal life used for human consumption. "Fish" does not include marine mammals and seabirds. The definition of "poultry meat" and "poultry meat food products" includes perishable edible (fresh, chilled, or frozen) poultry meat including processed poultry such as poultry luncheon

slices and frankfurters. It excludes nonperishable poultry, all perishable or nonperishable mixed products (poultry and other food ingredients combined), seafood, and game. In regard to eggs and egg products, the following definition should be used: "Eggs" means the fresh whole shell eggs of the domesticated chicken, turkey, duck, goose or guinea. "Egg products" means only frozen whole eggs, egg whites, and/or egg yolks.

4. **Contracts with Suppliers of Perishable Agricultural Commodities.** Payment will be made as close as possible to, but not later than, 10 calendar days from the date of delivery of the product. The basic definition of perishable agricultural commodities is contained in the Perishable Agricultural Commodities Act of 1930 (7 U.S.C. 499a(4)). It includes all fresh fruits and fresh vegetables of every kind and character, whether or not frozen or packed in ice. It excludes all fruits and vegetables which have been manufactured into articles of food of a different kind or character.

5. **Contracts with Suppliers of Dairy Products.** Payment will be made as close as possible to, but not later than, 10 calendar days from the date on which a proper invoice has been received at the activity designated in the contract. Dairy products (refrigerated or non-refrigerated) as defined in the Dairy Production Stabilization Act of 1983 (7 U.S.C. 4502(e)), include, at a minimum, liquid milk, cheese, certain processed cheese products, butter, yogurt, sour cream, ice cream, edible fats or oils, and food products prepared from edible fats or oils (including, at a minimum, mayonnaise, salad dressings, and other similar products). Items such as peanut butter where oil is a by-product of the process, and dry salad dressing mixes are excluded.

6. **Mixed Invoices.** The disbursing office may split the payment of a mixed invoice (subject to differing payment time frames) and make payment by the due date applicable to each category. This policy also would apply to the assessment of the late payment interest penalty, when applicable.

7. **Contracts for Utilities.** Utility

(gas, water, electricity, telephone, etc.) contracts that include provisions for due dates and late payment charges established by tariff or state regulatory commissions will be paid according to those terms. When there is no formal contract or the contract is silent about payment terms, the applicable tariff prevails. The above contracts are not subject to the provisions of the PPA. All other contracted utility services are subject to the PPA.

8. **Civilian Medical Services.** Claims for medical and dental care will be paid promptly within 30 days from the receipt of a properly adjudicated claim.

9. **Contracts with Nonappropriated Fund Instrumentalities (NAFIs).** Payments made to NAFIs should be treated the same as payments to other Federal Agencies (see paragraph 100101) and are not subject to PPA interest penalties.

10. **Contract Financing.** Contract financing payments are authorized to be made prior to acceptance of supplies or services. Contract financing payments include advance payments, progress payments based on cost, progress payments (other than under construction contracts or architect-engineer contracts) based on a percentage or stage of completion, and interim payments on cost-type contracts. Contract financing payments should be made per the specific payment terms in the contract. Departmental policy is to make contract financing payments as expeditiously as possible. The standard due date is 7 days for progress payments and 14 days for interim payments on cost-type contracts. Where justified, the contracting officer may specify a due date greater than, but not less than, the standard. No interest penalty will be paid to a contractor as a result of a delayed contract financing payment. Final invoices on cost-type contracts are subject to the interest penalty provisions of the PPA. As stated in the FAR, subpart 32.905(a)(1)(i), final invoices, where the payment amount is subject to contract settlement actions, shall be deemed accepted on the effective date of the contract settlement.

NOTE: Contract financing payments do not include invoice payments or payments for partial

deliveries.

a. Construction Contracts.

Payments on construction type contracts are due 14 days after the receipt of a proper payment request at the office designated in the contract to receive such request. In certain cases where this time frame does not afford the government a reasonable time to adequately inspect and accept the work or services performed, the contracting officer may specify a longer payment period in the contract. Late payments on construction type progress payments are subject to late payment interest penalties.

b. Architecture and Engineering Contracts.

Progress payments under these types of contracts should be made 30 days after the receipt of a proper request at the office designated in the contract to receive such request. Late payments on architecture and engineering type progress payments are subject to late payment interest penalties.

070206 Effect of Contract Modification on Payment Due Date

When a contract modification requires or authorizes a payment to be made, the modification must be issued by an authorized contracting officer. Modifications to contracts can be divided into two types. Those that affect contractor performance (scope of the contract) and those that are administrative in nature (e.g., a change in the disbursing office or the appropriation data). On a contract that requires a modification affecting the contract scope, the payment clock will start with the effective date of the modification. On a contract requiring an administrative change, the payment clock will not start on the effective date of the modification, but rather on the date established by the criteria contained in paragraph 070205-A.

070207 Date of Payment

Payment is considered to be made on the date printed on the check itself, or on the Electronic Fund Transfer settlement date. Checks will be mailed or transmitted on the same day for which the check is dated. Payments due (including discount periods) on

Saturday or Sunday may be paid on Monday or the next working day without interest. Payments due on legal holidays may be paid on the next working day without interest.

0703 INTEREST

070301 Interest Penalty Requirements

Whenever an interest penalty is due, the disbursing office will pay the interest due automatically without requiring that the business concern request such interest. The amount of interest paid and the calculation of that amount will be furnished to the business concern along with the respective payment. Interest payments of less than \$1.00 should not be made. The disbursing office should decline any requests for such payments, whether or not the total interest applicable to multiple bills exceeds \$1.00. For contracts issued on or before March 31, 1989, the rate of interest will be the rate at the time of payment. For contracts issued on April 1, 1989, or later, the rate of interest will be the rate in effect on the day after the due date (not necessarily the payment date). The specific interest rate will be applied to the total penalty period (maximum 1 year interest) regardless of whether the interest period carries over into different interest rate periods.

070302 Additional Interest Penalty

As authorized by the Office of Management and Budget (OMB) Circular A-125, revised on December 12, 1989, contractors are entitled to an additional interest penalty payment if all of the following conditions are met:

A. The contractor is owed an interest payment.

B. The interest was not paid with the invoice payment to the contractor on the date on which the interest became due.

C. The contractor was not paid the interest within 10 days after the date on which the invoice was paid.

D. The contractor makes a written request, not later than 40 days after the date on

which the payment was made, for the additional penalty.

E. The contractor must specifically assert that late payment interest is due under a specific invoice and request payment of any overdue late payment interest penalty and such additional penalty as may be required. To be valid, the contractor's request must be post-marked by the 40th day after payment was made. If there is no postmark, the request will be valid if it is received and annotated with the date of receipt by the 40th day. (If not properly annotated, the date of the contractor's request letter will be used as the date of receipt). If the contractor does not meet the 40 day requirement, the disbursing office must inform the contractor that the requirements for the additional payment were not met and therefore, the request for the additional payment is denied. The contractor may, however, still be entitled to the original interest penalty. The additional interest penalty will be computed at the same rate as that in effect on the original interest payment due date, but the penalty is not subject to the 1-year time restriction and will continue to accrue until the date the interest penalty payment is made. The additional interest penalty shall be equal to one hundred percent (100%) of the original late payment interest penalty. However, the additional penalty will be no less than \$25 and no more than \$5,000.

070303 Waiver of Interest Penalty

Interest may be waived by a contractor (62 Comp Gen 673 (1983)), by returning the amount of interest paid by separate check or by returning the government check and requesting payment only in the amount invoiced. A contractor may not waive the right to interest in advance of earning the interest (that is, a blanket authority letter stating that any interest penalty payment is not wanted is unacceptable). Interest retained or waived is collected as a refund to the appropriation originally cited for the payment of interest.

070304 Disputes and Questionable Payments

Interest penalties are not required when payment is delayed because of a dis-

agreement between an activity and a business concern over the amount of the payment or other issues concerning compliance with a contract. Interest also will not be paid when the disbursing office determines that the nature of the payment is of such doubtful validity that an advance decision from the Comptroller General or advice from higher authority is required. In all such instances, the official questioning the payment must advise the business concern, in writing, of the reason for the delay. In the event that payment is determined to be proper, all time elapsed between the starting time identified in paragraph 070201-J and the written notification will be applicable in determining whether interest is due. PPA interest is not paid on contracts that fall under the Contract Disputes Act.

070305 Partial Payments

All provisions of the PPA apply to the partial delivery of supplies or partial performance of services, unless partial deliveries are specifically prohibited by the contract. A late payment interest penalty will occur if payment is not made within the above terms. Interest payments are not applicable under cost reimbursement contracts unless the payment is for delivered property or performance of services.

070306 Interest Rate

The rate of interest will be established by the Secretary of the Treasury under Section 12 of the Contract Disputes Act of 1978 (41 U.S.C. 611). This rate is published semiannually in the Federal Register and will be provided to individual disbursing offices by their servicing DFAS Center. It is effective with each 6-month period beginning January 1 and July 1 of each year.

070307 Computation and Accrual of Interest Penalties

A. Interest penalties remaining unpaid for a 30-day period must be added to the principal amount owed to the business concern, and additional interest penalties will be computed on the total debt including accrued interest. The disbursing office will continue to accrue and add interest to the principal amount each 30-day period until the debt and interest are paid, until

the contractor files a claim under the Contract Disputes Act, or until 1 year has elapsed.

B. For interest penalties unpaid for a 30-day period added to the principal amount owed to a business concern (see paragraph 070307-A), the disbursing office shall apply the rate in effect on the first day interest began to accrue. If an invoice payment due on January 30, 1990, is not made by that date, the interest rate to be applied for the entire period of interest accrual is the rate in effect on January 31, 1990.

C. Interest will be computed from the day following the payment due date through the date of payment. No further interest shall accrue after 1 year beyond the original due date. Interest calculations are to be based on a 360-day year. To calculate the interest penalty utilizing the daily rate of interest, the disbursing office shall multiply the daily rate of interest times the principal (P) amount payable times the number of days paid late to the contractor prior to adding on interest.

Example:

Principal (P)	\$500.00
Interest Rate	8.50
Days paid late	46
Daily rate of interest (dri)	.0002361

Formula for first 30-day period:

$$P \times \# \text{ days paid late} \times \text{dri} = \text{interest payable} \\ \$500.00 \times 30 \times .0002361 = \$3.54$$

Formula for the next 16-day period:

$$\$500.00 + \$3.54 = \$503.54 \\ \$503.54 \times 16 \times .0002361 = \$1.90$$

The total interest penalty for 46 days is \$5.44 (\$3.54 + \$1.90 = \$5.44). The calculation should continue for the number of days that the payment is made past its due date but not to exceed 360 days. The interest for each 30-day period should be added back to the principal until 360 days of interest has been calculated. Interest will be charged to the year in which it accrued. For example, if interest began to accrue on September 13, 1994, and the interest penalty was not

paid until October 12, 1994, 18 days of interest would be charged to FY 94 funds and 12 days of interest would be charged to FY 95 funds. The first 18 days would be paid from FY 94 funds, while interest on the remaining 12 days would be paid from FY 95 funds.

070308 Grace Period Payments

The original PPA established 3, 5, and 15 day grace periods (depending on the type of product, i.e., meat product, perishable agriculture commodities, and the other items) after the due date during which invoices could be paid without interest. The Prompt Payment Act Amendments (PPAA) (P.L. 100-496) eliminated this grace period for contracts executed, awarded, renewed, or modified or upon which contract options have been exercised, on or after April 1, 1989. The PPAA also applies to all Blanket Purchase Agreements against which calls have been made since April 1, 1989. The grace period will remain in effect for contracts executed between October 1, 1982 and March 31, 1989.

0704 INTEREST PAYMENTS FUNDING

070401 General

The Comptroller General has opined that PPA interest must be paid from the funds available for the administration of the program for which interest was incurred. All interest payments will be charged to the fiscal year(s) in which they accrue. In all cases, the disbursing office will identify and assign the reason for the late payment as provided in paragraph 070501. Interest payments pertaining to procurements financed by Foreign Military Sales also will be charged but will be reimbursed from the Foreign Military Sales contract administration services account unless the administration services surcharge has been waived by international agreement. When surcharges are waived on Foreign Military Sales cases, interest payments will be charged to the funds available for the administration of the Military Service or the DoD Component which manages the case. For additional information, see Volume 15, paragraph 0704011, of this Regulation. Disbursing offices are required to maintain detailed records in support of their determinations, and are to make

these records available upon request of any activity determined to have caused a late payment. All refunds from contractors will be credited to the same line of accounting classification (including fiscal year) that was charged at the time interest was paid. If the appropriation is cancelled or closed, refunds will be applied to Miscellaneous Receipts of the Treasury.

0705 REASONS FOR INTEREST PAYMENTS

070501 Reporting Reasons for Payments

In compliance with the Office of Management and Budget Circular A-125 (Revised) on December 12, 1989, reasons for late payments shall be identified and corrective action taken so that the DoD goal of zero interest penalties may be achieved. The six reasons are:

A. Delay in the disbursing office's receipt of:

1. Receiving report.
2. Proper invoice.
3. Purchase order or contract.

B. Delay or error by the disbursing office in:

1. Taking discount.
2. Notifying contractor of defective invoice.
3. Computer or other system processing.

As specified in the PPAA, all interest payments must be reported in one of these six categories. Paragraph 070601 addresses reporting requirements of interest payments.

0706 PROMPT PAYMENT REPORTING

070601 Reports

A. The Office of Management and Budget requires that the Department submit an annual PPA Accounting Report (A) 1607 that

includes the number, dollar value, frequency, and cause of all late payments, and other data pertaining to its contractor payments. The Department, however, requires this same information from its reporting Components on a quarterly basis. This information will be reported in a prescribed format (PPA Report, ACCT RPT (Q) 1619). Appendix B of this volume provides an illustration of this report. The DoD Component submitting the quarterly report may, at its discretion, require a monthly submission from its bill paying activities. This monthly report will be prepared and submitted in the format also found in Appendix B. As some of these data may already be provided through a centralized automated reporting system, not all PPA information requested on this monthly report may be necessary.

B. Annual Prompt Pay Act Report 1607. All DoD Components shall submit their annual report directly to DFAS-HQ/FCC to arrive by November 15 of each year.

C. Quarterly Prompt Payment Act Report 1619. All DoD Components shall submit each quarterly report directly to DFAS-HQ/FCC to arrive by the end of the month following the close of each fiscal quarter.

070602 Quality Control Program

Each disbursing office shall establish a quality control (QC) program to assess performance of payment, reporting and relevant management information systems and provide a reliable way to estimate payment performance. The QC program is separate from internal control. Agency QC programs must fulfill the following requirements:

A. Quality Control must be a systematic performance measurement system in place throughout the agency which provides managers information about problems and assists in targeting corrective action. QC data must be accurate to within established tolerances and should be used to fulfill the annual reporting requirements in paragraph 070601, Accounting Report (A) 1607. In the annual reporting of (A) 1607, Section X, Updated Description of Agency Quality Control Systems, requires each

major reporting entity to describe its QC efforts, particularly information gathering methods and frequency, and how this information supports Prompt Payment improvements.

B. Data should be gathered as frequently as needed by managers to identify and correct errors. Rapidly changing situations may require frequent data collection.

C. Data must be collected through a process at least as thorough as the original payment decision (entitlement) process. QC reviewers must use original documents and repeat the original calculations.

D. Because the number of payment actions is too numerous to permit a total review, data should be gathered on the basis of a statistically valid sample sufficient to assure the reliability of QC reviews conducted without unduly burdening agency resources. If needed, an initial sampling will be conducted to establish a valid cross section of payments subject to the PPA and to represent different products and services with unique due dates. Sampling must reflect due dates that are established by different payment methods, i.e., by check or by electronic funds transfer. Other analytical tools, such as frequency distribution, will be used to support the QC program.

E. Data must be collected by individuals who are independent from the original payment decision. Thus, supervisory reviews, while an excellent way to improve processing, are not QC reviews.

F. Analysis of QC data will result in reports to management and remedial action(s) targeted to correct objectively determined error causes.

0707 DELIVERY TICKET AS AN INVOICE

070701 Policy and Guidance for Using Delivery Documents as Invoices

A. There are circumstances when a delivery ticket or other receiving document and the contract taken together contain sufficient information to determine a contractor's entitle-

ment to payment, without the contractor having to submit a separate invoice, either electronically or by hard copy.

B. Elimination of separate invoices will not be a universal practice within the Department. Activities must formally request the use of this payment procedure from DFAS-HQ/FCC. While this payment option is available to contractors, its use is not mandatory for doing business with the Department.

C. Some contracts do not require the submission of an invoice. For example, periodic lease payments which are specifically referenced in FAR 32.905, Invoice Payments, do not require an invoice. Before a DoD Component can issue contracts eliminating the contractor's requirement to submit a separate invoice, that Component must formally request and receive approval from the DFAS Headquarters of that activity's accounting system, related processes, and internal controls.

D. Invoice elimination is for fixed price contracts issued by an approved activity where the contractor has consented that delivery documentation or equivalent meets the requirements of a proper invoice, paragraph 070201. Failure by the supplier to comply with those requirements will result in rejection of the supplier's invoice and may delay payment.

E. Invoices are required for contracts using Fast Pay provisions and second destination deliveries.

F. For the purpose of computing interest, the invoice shall be deemed to be received at the same time as the goods.

070702 Criteria for Approval of Using Delivery Documents as Invoices

A. Activities that desire the option of not submitting a separate invoice must follow specific criteria. This practice is suitable for depots and other DoD Components with the following characteristics:

1. Receiving merchandise is a primary function of the activity and all receipts

are controlled at a central point.

2. Activities that have strong manual procedures or automated capture of receipt data, such as the use of bar coding.

3. Activities that have electronic connectivity to servicing DFAS activities.

4. Direct delivery to the ordering DoD activity.

B. Activities and transactions types that are not suited to the elimination of separate invoices follow:

1. Activities that manually transmit receipt data to their servicing DFAS activity.

2. Activities where receiving goods is not a primary function or occurs on a sporadic basis.

3. Activities primarily receiving services, including training.

4. Activities that use cost reimbursable contracts, progress payments, advance payments or Government Owned Contractor Operated facilities.

5. Construction and architect or engineering services.

6. Second destination delivery.

7. Fast Pay contracts.

8. Activities where delivery is not ordinarily accompanied by appropriate documentation.

C. The elimination of separate invoicing will be approved on a selective basis for each activity proposing to institute this business practice. Each activity desiring to have this option must formally request approval from the DFAS Headquarters. The DFAS Headquarters will review the following for an activity before granting approval:

1. Internal control over receipt of

goods, starting with the receiving point.

2. Documentation of data flow.

3. Evaluation of the requesting activity's ability to capture sufficient data to establish a valid entitlement to payment. If systems modifications are needed, those requirements and implementation time must be approved before DFAS approval is granted.

4. Communication links between the receiving activity and the servicing DFAS activity.

5. Records retention procedures for receipt documents.

6. Personnel training with emphasis on timely transactions processing.

CHAPTER 8

PREPARATION AND DISTRIBUTION OF PAYMENT VOUCHERS0801 GENERAL080101 DD Form 1155, SF 1034 and 1035, SF 44, and DD Form 250

A. Forms often used are DD Form 1155, Order for Supplies or Services; SF 1034, Public Voucher for Purchases and Services Other Than Personal and SF 1035, Continuation Sheet; SF 44, Purchase Order-Invoice-Voucher; DD Form 250, Material Inspection and Receiving Report; and Commercial Invoices.

B. The DD Form 1155 is a combined purchase order, receiving report, and payment voucher. Instructions for the preparation of the DD Form 1155 as a payment voucher are in paragraphs 080103, 080104, and 080105. Original signature of the contracting officer is not required on copies of DD Forms 1155 used as a payment voucher for Blanket Delivery Order (BDO) and Blanket Purchase Agreement (BPA) payments. All copies of a payment voucher must contain the same information as the original voucher. This information includes the certifying officer's name (signature is required on the original only), grade (if military), date of certification, preparer's name (signature is required on the original only) for manual payments or system for mechanized vouchers, any monetary changes, and all other such information. When partial payments are made using DD Forms 1155, sufficient copies will be reproduced before making the first payment. This will ensure copies are available for the next partial payment. The original DD Form 1155 will be sent with the first partial payment. Reference the previous partial payment on each partial payment made thereafter.

C. SF 1034 and SF 1035 may be used as an invoice for payment purposes. The SF 1034 normally is used for Cost Reimbursement contracts. See paragraph 080106 for instructions on the preparation of SF 1034 and SF 1035 when

used as a payment document.

D. The SF 44 should not be used as a payment document when a mechanized payment system processes the payment, but rather as an attachment to SF 1034. Refer to FAR 13.505-3 for restrictions on the use of the SF 44 as a purchase order.

E. When the DD Form 250 is use as an invoice, four copies must be forwarded to the disbursing office. The first copy must be marked "Original Invoice" in letters approximately one inch high, and the other three copies must be marked "Invoice Copy". To be considered a proper invoice, FAR 52 and DFARS 252 mandate that it must contain specific information. See paragraph 070201 of this volume for the specified criteria of a proper invoice.

F. Commercial Invoice. There is no specified format for a commercial invoice. However, a commercial invoice shall meet the criteria of a proper invoice as detailed by FAR 52 and DFARS 252. For an invoice to be considered proper, see paragraph 070201 of this volume.

080102 Responsibility for Preparation

Contracts and purchase orders specify where the contractor is to send invoices and the disbursing office designated to make payment. Normally, the disbursing office prepares and certifies the voucher for payment based on supporting documents. The person preparing the payment voucher will not certify the voucher as being correct and proper for payment. Vouchers are not certified for payment before receipt of all supporting documents. Vouchers for supplies, nonpersonal services, or claims against the United States may be prepared outside the disbursing office. These certified vouchers are sent to the disbursing office. The supporting documents need not be sent to the disbursing office but may be retained by the

certifying official. The disbursing office should review the supporting documents on a periodic basis by doing a random sampling to ensure that documents are available. The disbursing office reviews and processes the voucher for payment based on supporting documents, if otherwise proper. These vouchers may be used for, but are not limited to, the following purchases and services:

- A. Telephone and telegraph services.
- B. Purchases under cost reimbursement or time and materials contract.
- C. Construction contracts (including those with progress or partial payment permitted by the contract terms).
- D. Credit card purchases under Federal Supply Schedule contracts.
- E. Contracts under which invoices are essential to contract administration, including contracts for:
 - 1. Instruction of military personnel.
 - 2. Laundry and dry cleaning.
 - 3. Packing and crating.
 - 4. Architectural engineering services.
 - 5. Airlift maintenance and services.
 - 6. Base engineer maintenance.
 - 7. Classified research and development.
- F. Payment of claims as authorized by legal counsel.
- G. Payment of claims of Civil Air Patrol members and wings. The Air Force-Civil Air Patrol Liaison Officer will sign the SF 1034. The disbursing office, or designated agent, will sign the document if a liaison officer is not

available.

H. Civilian medical care services to supplement military medical services.

I. Emergency civilian medical services for military members.

J. Apprehension rewards or reimbursements.

K. Cash awards to military members.

L. Tuition refunds.

M. Mortuary Affairs Officer's approved voucher.

N. Reserve Officers Training Corps.

080103 DD Form 1155

Copies of DD Forms 1155 may be used as payment vouchers when there is enough blank space to include the entries required in paragraph 080104-B.1.d. If there is not enough blank space to make the entries in Item 17, the entries may be made in any available space in Items 17 through 23 on the DD Form 1155.

080104 Preparation of DD Form 1155-Blanket Delivery Orders (BDO) and Blanket Purchase Agreements (BPA)

The following procedures are to be used when DD Forms 1155 are employed as payment vouchers for calls against BDOs and BPAs:

A. Prepare enough copies of the first page only of the BDO or BPA contract (DD Form 1155, page 1) to meet the distribution requirements in paragraphs 080601 through 080604. In most situations, only two copies are required. One copy is forwarded with the original invoice to the disbursing office. The second copy is filed with the receiving report and a copy of the invoice in the disbursing office files.

B. Complete the form and make a duplicate copy using the following entries.

1. In Item 17, enter:
 - a. Exchange rate if payment is in a foreign currency. If the payment is to be processed by another paying station, SF 1034 must be used. See paragraph 080106-B.8.b.
 - b. The amount paid follows the accounting classification data, if more than one accounting classification is cited on the voucher.
 - c. Call numbers being paid (may show series of call numbers included, for example, G147-189).
 - d. The statement: "Per attached invoice(s)."
 - e. Reference to previous partial payment if required. Show voucher number and date paid.
 - f. Other entries, when required.
2. In Item 25, enter the total amount of the order or receipt being paid. If different than currently entered, line through and enter immediately above Item 25.
3. If Block 26 has been completed by the receiving activity, use that date as date of receipt. If Block 26 has not been completed by the receiving activity, add 7 days to the delivery date and this becomes the constructive date of receipt. For example, if a receiving report were signed on April 30, 1989, but the delivery ticket was signed on April 15, 1989, add 7 days to the delivery date and use that as constructive date of receipt for net payment computation purposes. See paragraph 070202-B concerning 7-day constructive acceptance.
4. For payments involving multiple receipt dates, enter the latest receipt date in block 26 of the consolidated payment voucher, DD Form 1155.
5. In Item 28, enter the disbursing office voucher number.
6. In Item 29, enter on one line, the amount of discount taken and annotate "Disc" to the right of the line. On the other line, enter the net of any other differences (that is, Federal Supply Schedule (FSS), Voluntary Price Reduction (VPR), Freight, etc.) between the amount in Item 25 and the amount paid, and annotate "ADJ" (adjustment) to the right of the line. As an optional procedure, the four lines available may be used to individually reflect differences (DISC), freight (FRT), voluntary price reduction (VPR), etc. All copies of the invoice should be annotated with an explanation of differences between the amount of the invoice and the net amount paid unless readily apparent. Invoices do not need to be annotated if documentation explaining the differences is attached to all copies of the invoice.
7. In Item 30, for manual payments enter the signature of the person who prepared the voucher.
8. The entries for Item 31 are determined by the payment status for each call being paid. Normally, only the complete block is used. However, the other blocks and any combination of the three blocks may be used when appropriate. Enter "X" in the complete block if making a complete payment for all calls. Enter "X" in the partial block and enter the number of the partial payment to the right of the block if making a partial payment for a call. Make both entries if the payment is complete for some calls and partial for others, and indicate in Block 17, the call numbers which are being partially paid. Enter "X" in the final block if making a payment for a call for which a partial payment was previously made, and indicate in Block 17, the call number being paid in final.
9. In Item 32, enter the completed brief block stamp, including the date paid.
10. In Item 33, enter the net amount to be paid. (The amount in Item 33 must equal the amount in Item 25, plus or minus the amount(s) in Item 29.)
11. In Item 34, enter either the check number or cash payment as applicable.

12. In Item 36, enter the date and signature of the authorized certifying officer over his or her typed or stamped name and grade (if military). The certifying officer's title may be entered but is not required. The signature is required on the original only.

13. The disbursing and collecting office will require the payee to receipt for the payment by signing in Block 38 and entering the date of payment in Block 39 if making a cash payment.

080105 Preparation of DD Form 1155-Other

When using DD Form 1155 as a payment voucher for purchases other than calls against BDOs and BPAs, prepare the DD Form 1155 as indicated in paragraph 080104-B, except:

A. Include the DD Form 1155 continuation pages if they describe services or material being paid for as part of the voucher. If the DD Form 1155 describes the payment, it is not necessary to include the "Per Attached Invoice" statement in Block 17.

B. Entry in Block 17, referring to items or services being paid, is not required if identified in the content of the DD Form 1155. If not identified, include a brief description such as "Services for the period 1-31 Jan 1989."

C. If payment is for services, the date of receipt entered in Block 26, is determined by using the same criteria as used for determining date of receipt for discount purposes regardless of whether or not a discount is actually involved, see paragraph 020102. If a receiving report was signed April 10, 1989, for services during the period 1-31 March 1989, then March 31, 1989, would be entered in Block 26.

D. Use the original copy of the DD Form 1155 signed by the contracting officer as the original voucher copy for a complete or first partial payment.

080106 Preparation of SF 1034

A. Complete appropriate blocks as follows:

1. Applicable Department and place prepared.

2. Date prepared. (no entry is required in this block).

3. Voucher numbering. Vouchers are numbered in accordance with procedures established by each disbursing office.

4. On payments for supplies or non-personal services, show the number and date of the contract, requisition, or purchase order.

5. Payee's name and address (include SSN for United States military members and civilian employees if payment affects the pay account or is a taxable payment). Enter the name and address of contractor who supplies the services or articles; also if payment is a reimbursement for civilian uniforms or replacement allowance, include the name of the person and the position held. Under various conditions, the payee (contractor) cited in this section of the voucher is not to be paid any of the amount due. This happens in:

a. Assignment of Claims (see paragraphs 030101 and 030109).

b. Contractors Indebted to the United States, Hold-Up List (see paragraph 180407).

c. Tax Levies of the Internal Revenue Service (see paragraphs 060101, 060201, and 060301).

d. Other comparable situations. When this occurs, do the following:

(1) Following the payee's (contractor) name and address in the Payee block, add in bold letters "Attached List of Check Payments." This same notation should be made in the check number space of the Paid By block.

(2) Prepare list of check payments in same number of copies as the voucher and attach a copy to each voucher form. The list of check payments will include the

following:

(a) Voucher number and Accounting Disbursing Station Number (ADSN) or Disbursing Station Symbol Number (DSSN) of the disbursing office.

(b) The name and address of each payee to whom a check is payable (the payee information will be stated in the precise manner in which the check is to be drawn).

(c) Opposite the payee, show the amount of the check and leave space for the check number (to be entered by the disbursing office). If the check is drawn on other than U.S. Treasury, list bank on which drawn.

(d) Show total dollar amount for checks drawn. This will permit comparison with amount due on face of voucher.

6. Date the invoice was received and discount terms (if no discount, enter "NET"); and payee's account number, if available.

B. Body:

1. First Column. Number of purchase order or delivery order and date prepared, if different from the data required by paragraph 080106-A.

2. Second Column. Date(s) supplies delivered or services performed.

3. Third Column. Description of supplies or services unless the attached invoice gives the description; if so, enter the following statement: "Per attached invoice." Special notations will also be made in this column. Reference any previous partial payments in this column. Reference the voucher number and date paid.

4. Fourth, Fifth, and Sixth Columns. Do not use if the invoice is attached as in paragraph 080106-B(3). If the invoice is not attached, complete as follows:

a. Column four, show the quantity of each item.

b. Column five, show the unit price of each item.

c. Column six, show the unit of measurement for each item.

5. Seventh Column. Show extended value of each item. If the amount is stated in foreign currency, insert name of currency. When attached invoices are referred to, show the extended total for each individual invoice. When the SF 1035 is used, show the extended total for each sheet in this column. Use the Differences block for cash discounts identified as "Disc" and the net of any other adjustments to the amount in the total block identified as "ADJ" (adjustment). For vouchers involving multiple invoices, the disbursing office may attach a list of invoice discrepancies to the original and retained copies instead of recording each discrepancy on the face of the SF 1034. "Amount verified correct for" will be the adjusted total. The signature shows who computed and verified the payment.

6. Accounting Classification Block: Show each accounting classification and amounts charged to it. Use a separate line for each accounting classification charged. If only one accounting classification is cited on the voucher and foreign currency or voucher deductions are not involved, it is not necessary to show the amount following the accounting classification.

7. Station Number of the disbursing office. Enter the ADSN or DSSN of the disbursing office on all copies of a disbursement voucher.

8. Expression of Money Amounts:

a. Dollars and Cents. Except as prescribed in paragraph 080106-B(8)(b), Foreign Currency, show money amounts as dollars and cents. If less than one-half cent occurs in the footing of a voucher, disregard it. If the fraction is one-half cent or more, count it as one cent.

b. Foreign Currency. Enter the amount of foreign currency, dollar equivalent, and exchange rate in the blocks marked "Approved For" and "Exchange Rate" on SF 1034. Show the amount in U. S. dollars in the Accounting Classification block. The amount of the check may be shown in the foreign currency if a limited depositary is maintained for that currency.

9. Payment Notations. Check blocks under Payment as follows:

a. Provisional (When paying a voucher requiring review by Defense Contract Audit Agency and possible adjustment. See paragraphs 090301 and 090302).

b. Complete (When paying the entire amount of the contract or purchase order).

c. Partial (When paying for a partial delivery, the number of the partial payment must be shown, so it can be determined whether it was the 1st, 2nd, etc., and also if the partial payment number were correct).

d. Final (When making the final payment of two or more partial payments).

e. Progress (When making progress payments under terms of the contract).

f. Advance. (When making an advance payment to a contractor, vouchers covering additional advances must refer in the Articles or Services block to vouchers covering prior advances under the same contract. References must show voucher number, name and symbol of the disbursing officer, and date paid. Advance payments are referred to as "first advance," "second advance," etc.)

g. Supplemental. (When supplemental payments are made, use the block for final payments and cross out the word "Final" and replace it with "Supplemental." Reference the original voucher on the supplemental voucher in the articles or services block. Reference must show voucher number and date paid.)

0802 COPIES PREPARED

080201 Preparation of DD Form 1155

The DD Form 1155 may be used as a payment voucher when prepared in accordance with paragraphs 080101, 080103, 080104, and 080105.

080202 Preparation of SF 1034

Prepare the SF 1034, as detailed in paragraph 080106, and provide sufficient copies to meet the distribution requirements of paragraphs 080601, 080602, and 080603.

080203 Preparation of SF 1035

Prepare the SF 1035, Public Voucher for Purchases and Services Other Than Personal (Continuation Sheet), as needed along with the SF 1034, to meet the distribution requirements in paragraphs 080601, 080602, and 080603.

0803 PAYEE'S CERTIFICATE

080301 Mental Disability

If claimants have a mental disability that disqualifies their signature, the law requires appointment of a committee or guardian.

080302 Guardianship

File certified copies of court papers appointing a guardian with the first voucher. Refer to the first voucher number on each following voucher. If the payee is in an institution, the certificate by the official in charge, stating that the payee was alive at the time payment was due, must be filed with each voucher. Guardians must sign the payee's name, then their own name as guardian. Later recurring payments must be supported by a statement by the guardian that the appointment is still in full force and effect. Additional court certificates are not required for these payments.

080303 Facsimile Signatures

A facsimile signature is an impression of a signature by a rubber stamp, metal plate, or

other mechanical device, and may be used for facsimile transmissions. In compliance with FAR, part 2.101, facsimile means electronic equipment that communicates and reproduces both printed and handwritten material.

080304 Lead Pencil Signatures

Lead pencil signatures are not authorized, except in rare cases where it is impossible to obtain them in pen and ink (19 Comp Gen 422 (1939)).

0804 ADMINISTRATIVE CERTIFICATE

080401 Administrative Certificate

This certificate means that legal requirements for payment have been met.

NOTE: A certification is not required on billings for material delivered under constructive delivery or for communication service authorizations except for toll calls and personally acquired travel related expenses such as accessorial service.

080402 Signature Requirements

Administrative certificates are signed by certifying officer over his or her typed or stamped name and grade (if military). Vouchers certified by authorized certifying officers from outside the disbursing office, such as medical and education services vouchers, are not required to be recertified in the disbursing office. The disbursing office and designated representatives qualify as certifying officers and may certify vouchers for payment based on supporting documents.

080403 Evidence of Receipt

Signature in the "Approved for" block of the SF 1034 normally does not constitute evidence of receipt and the statement in paragraph 090605 must be provided. However, a separate receiving document is not required when the payment voucher (SF 1034) is prepared outside the disbursing office and is signed in the "Approved for" block by an individual who has full knowledge of the receipt or acceptance of

the authorized goods or services. Signing the "Approved for" block attests that the voucher is properly documented, including the completed blocks showing date of delivery, quantity, and description of articles or services.

0805 PAYMENT INFORMATION

080501 Payee Name and Address

The name and address of the contractor official to whom payment is to be sent must be the same as that in the contract or in a proper notice of assignment. See FAR, subparts 32.905 and 52.232-25. Changes in the name of the contractor should not be honored without modification of the contracting documents except for assignments as detailed in Chapter 3 of this volume.

080502 Distribution of Payment Vouchers

Distribute payment vouchers (for example, SF 1034 and DD Form 1155) and supporting documents as shown in paragraphs 080601 through 080604. Send one copy of payment voucher for medical services to the hospital resource management office (two copies may be provided if available).

080503 Forms Used in Automated Operations

The forms prescribed for automated processing of commercial account payments must be approved by the DFAS Headquarters.

080504 Facsimile Transmissions of Payment Vouchers

The SF 1443, Contractor's Request for Progress Payment, and the SF 1034 generally may be transmitted by facsimile to support payments instead of the original when the conditions listed in paragraphs 080505-B through 080505-D are met.

080505 Conditions

A. The certifying official's signature, as it appears on the original copy, is clear and legible on the transmitted copy of the form used to support the payment.

B. The disbursing officer has knowledge of the authenticity and authority of the certifying officer's signature.

C. The original document is properly annotated to show that payment has been made in order to prevent duplicate payments.

D. The disbursing office will annotate the transmitted copy to show that payment has been made. This will support the disbursing officer's transactions and the location of the original form and supporting documentation for payment requests instead of original copies.

080506 Filing of Documents

Officials authorizing transmission of documents file the original SF 1443 and SF 1034 and make sure that contractors do not have access to the vouchers.

080507 Legibility

The transmitted copy must retain its likeness for the same period of time as required for the original document. Copies created by thermal methods are not acceptable but the transmitted copy may be photocopied for retention purposes.

080508 Safeguarding Precertified Vouchers

If payment vouchers are certified ahead of their scheduled due dates in order to increase the efficiency of operation, these precertified vouchers must be safeguarded. At a minimum, a locked file cabinet will be used, and the keys or combination will be controlled.

0806 DISTRIBUTION OF PAYMENT DOCUMENTATION

080601 Voucher

A. The original voucher is for the disbursing office.

B. A copy of the voucher is sent to the accounting office.

NOTE: The contractor is not required to receive

a copy of the voucher. However, the contractor is to be informed of what a payment represents. This can be accomplished by an advice of payment listing the invoices(s) paid, identification of deductions, refunds, discounts taken, and so forth or by a copy of the voucher produced by an automated system that lists the same information.

080602 Invoice

A. The original invoice is for the disbursing office and they should attach it to their voucher.

B. A copy of the invoice is sent to the accounting office.

NOTE: If invoices are received electronically, the data must be retained for audit purposes. This retention can be either by hard copy or automated means. For those accounting offices not capable of receiving automated files for transactions for others, the data must be converted to hard copy.

080603 Receiving Report

A. The original receiving report is for the disbursing office.

B. A copy of the receiving report is retained by the receiving activity.

C. A copy of the receiving report is sent to the accounting office.

Note: If an original receiving report is received, it will be retained by the cognizant DFAS Center and copies also will be retained by the disbursing office and copies sent to the accounting office. If automated acceptances are used (for example, MILSCAP), the acceptance data are required to be given to the disbursing office and the accounting office in the form of a printed document (separate document or as part of the printed voucher).

080604 Certificates

The original certificate is for the disbursing office.

NOTE: The certificate or other supporting documentation may be executed on the invoice or voucher. In addition, some supporting documentation may not be an original, such as copies of bill of lading.

CHAPTER 9

SUPPORTING DOCUMENTS TO PAYMENT VOUCHERS0901 CONTRACTS AND PURCHASE ORDERS090101 Contracts and Purchase Orders as Supporting Documents

A. Purchase transactions by a contracting officer are shown by a written contractual document.

B. The disbursing office is to receive one copy of the contract in accordance with FAR 4.201. This copy should be retained in the disbursing office files to support payments.

0902 CONTRACT MODIFICATIONS090201 Correction of Administrative Errors

Errors in contractual documents must be corrected by a formal modification. In the past, there have been problems between disbursing offices and contracting offices concerning the timely issuance and receipt of corrective administrative modifications when payment already has been made. Disbursing office personnel will notify the contracting office personnel of items in the contract that need to be corrected. Contracting personnel will make the changes through a formal modification. Disbursing office personnel will not make any changes to contracts.

090202 Changes to Contracts

A. See FAR Sup 13.503, 43.301, and the DFARS for forms used to modify contracts.

B. The disbursing office is to receive one copy of each modification to the contract in accordance with FAR 4.201.

090203 Shipment Shortages/Overages

A. If the disbursing office also is the

accountable station for the funds cited on the contract and the procurement office is colocated, formal changes to contracts are not required where shipments are short of the ordered quantity and the contract does not contain a quantity variation clause. When a shipment is short of the quantity ordered, the disbursing office shall pay, in compliance with the Prompt Payment Act, the amount of the invoice that supports quantity received.

B. If the receiving report or the invoice indicates that the shipment is final, but there are undelivered items remaining, the disbursing office shall contact the contracting officer and advise of the final shipment and request disposition of the remaining items. The contract should be left open until there is a reconciliation of contract price and items delivered or advised by the contracting officer to close the contract.

C. If the receiving report indicates that shipment has been made of quantities in excess of the contractual amounts, determine if the contract contains FAR clause 52.212-10. If so, process as follows:

1. Excess quantities up to \$250 may be accepted and retained by the government without payment to the contractor.

2. Quantities in excess of \$250 will, at the option of the government, either be returned at the contractor's expense or retained and paid for at the contract unit price. The contracting officer should be contacted and a modification must be issued to reflect the adjusted quantity when excess quantities are retained.

090204 Price Escalation Clause

Purchases are sometimes made under contracts with price-escalation clauses. The contracting officer will issue modifications establishing the new prices. If the disbursing

office receives invoices reflecting revised prices but a copy of the modification has not been received, the disbursing office shall contact the contracting officer for a copy.

090205 Delivery Orders

A. Delivery orders normally are used to request delivery of supplies under indefinite delivery-type contracts and basic ordering agreements.

B. Some contracts provide for the furnishing of services as required from time to time. These services are confirmed by means of a delivery order or other document which shows the services involved.

090206 Changes to Delivery Orders

A. Forms. See FAR, subparts 13.503 and 43.301, and the DFARS for forms used to modify delivery orders when the changes are outside the scope of paragraph 090201.

B. Copies. The delivery order and related modifications (or reproduced copies) are retained in the contract files.

0903 CONTRACTOR INVOICES

090301 Contractor's Invoice as Supporting Documentation

A. General. A contractor's invoice represents a bill or written request for payment. There is no prescribed format for the invoice but the invoice must contain certain information as required by FAR 52.232-25(a)(4) and stated in paragraph 070201. The forms used in commercial transactions are acceptable. An original contractor invoice specifically is required as a condition of the contract. If an invoice is lost and the contractor submits another one for payment, the second invoice should be marked in **bold** letters that this is a **DUPLICATE INVOICE**. This bold marking should help ensure that a payment will not be made twice on the same invoice. The DD Form 250, Material Inspection and Receiving Report, and invoices prepared by automatic (computer, etc.) methods also are acceptable. The contractor must furnish

the appropriate number of invoice copies required by the contract (normally four). The invoice copies must be legible and remain legible under normal use until the scheduled time for destruction. When agreements provide for payment of fixed amounts at regular intervals, payment may be made without a contractor's invoice. When these payments are made, the disbursing office shall annotate the contract or agreement number on the payment voucher. Establish controls to prevent duplicate payments and payments being made on expired contracts or agreements.

B. Invoices Requiring Administrative Contracting Officer (ACO) approval. The Defense Contract Audit Agency normally is the authorized representative of the ACO for approving all but the final voucher. The following invoices and vouchers require ACO approval before payment.

1. Completion vouchers under cost-plus fixed-fee or other cost-reimbursement contracts.

2. Vouchers and invoices for termination costs under supplemental agreements unless the termination modification specifies the costs to be paid.

3. Vouchers and invoices under time and material contracts.

4. Invoices for progress payments under fixed-price type contracts.

5. Vouchers and invoices for which the contract requires approval by the ACO before payment.

6. Invoices for the release of "withhold" amounts previously instituted by the ACO.

7. Any amount requested in which a disbursing officer requires an ACO signature.

C. Lost or Destroyed Invoices. When the original invoice is lost or destroyed, payment may be made on an unsigned memorandum copy if the contracting document shows which

disbursing office is to make payment. Attach a full explanation of the loss or damage to the memorandum copy. Also, attach this statement: "Precautions have been taken to prevent duplicate payment should the original invoice be found."

D. Release from Contract Obligation

In consideration of the fact that the company records of _____ show no balance due for items furnished the United States Government, in the amount of \$_____ under contract number _____ dated _____ I hereby relieve and forever discharge all responsibility of the United States Government to pay for said supplies or service. I further acknowledge and affirm that _____ has received adequate information from the United States Government relative to shipment of material or receipt of services in question to enable submission of proper documentation.

In witness whereof I have hereunto set my hand and seal in behalf of said company this ____ day of _____ 19 ____.

BY

TITLE

E. Nonreceipt of Invoices

1. General. The disbursing office should request invoices and supporting documents from contractors where there is no question of the government's liability and there is no dispute of facts. This is not held as inviting a claim as it is in the interest of prompt payment of an open account (30 Comp Gen 266 (1951)).

2. Procedures

a. Payables of \$.99 or less. If the invoice is not received within 90 days after receipt of goods or services, deobligate funds and write-off payable (58 Comp Gen 372 (1979)).

b. Payables of \$1 through \$99.99.

(1) If an invoice is not received within 30 days after date of receiving report, request invoice from the contractor. This is the only followup required and should be accomplished at any time between 30 and 60-day marks, depending on local circumstances. For meat, fish, fresh fruits and vegetables, and dairy products and edible fats or oils, unless other arrangements have been made for weekly, biweekly, or monthly invoicing, follow up in accordance with paragraph 070203.

(2) Include with the request for invoice a Release from Contract Obligation (see paragraph 090301-D). Request that the contractor return either an invoice or the completed and signed Release of Contract Obligation. If automated contractor followup is available, it may be used instead of manual followup procedures. Automated payables systems will maintain the evidence of followup in the system eliminating the requirement for it to be physically located in the contract file.

(3) If an invoice meets the requirements contained in paragraph 070201, pay it. If the contractor signs and returns the form, immediately deobligate the payable and retain the contract and the case file in a closed file until the statute of limitations expires. Place cancelled contracts in the cancelled file. If the invoice is not received after 180 days from the date of receipt of the goods or services and at least 90 days have elapsed since the date of the initial follow-up, deobligate the funds and write-off the account payable. The account payable also must be retained in the closed file until the expiration of the statute of limitations (6 years).

(4) Although a contractor is not required to sign a Release from Contract Obligation, the decision to do so creates legal rights on behalf of the government, and the signed form should be viewed as a legal release from the contract. In the event that both the government and the contractor agree that the form was in error, this agreement would set aside the release. The form should be signed by an authorized representative of the company (not by a clerical employee). If no evidence to the contrary is available, assume that the signee was

so authorized.

c. Payables of \$100 or more.

(1) Follow procedures in paragraphs 090301-E.2.b, except subparagraph 090301-E.2.b.3. Do not deobligate funds of \$100 or more. While a second demand letter is not sent for \$100, the government must maintain a record of the obligation. Do not write it off.

(2) If the contractor signs and returns the form, deobligate the payable immediately. If the form or invoice is not returned within 180 days from receipt of goods or services, transfer the payable to the inactive suspense file. Maintain the obligation until expiration of the statute of limitations which restricts time for filing claims against the United States to 6 years from date the right to payment accrued (date that goods or services were received). The funds should be deobligated upon expiration of the statute of limitations or cancelled when the appropriation funding is cancelled. Memorandum records of obligations cancelled, but remaining within the statute of limitations, must be maintained.

F. Facsimile Submitted Invoices. Faxed invoices are received at the discretion of the disbursing office. Invoices sent to the office designated in the contract by teletype, TWX, EDI, or FAX are acceptable provided they meet the copy and content of this section and the legibility requirements of paragraph 080507 and FAR Part 32. Do not accept transmission if invoices must contain a certificate and original signature of the payee or must be supported by original documentation such as claims for pre-paid freight charges.

090302 Processing Invoices

A. Certificates. Some invoices must contain a certificate signed by the payee. Certificates are:

1. Completed when a certificate is required on invoices for transportation and accessorial services acquired by Government bill of lading (GBL) or commercial bill of lading for conversion to GBL (see paragraph 130103-A).

2. Completed when required by contract terms, invoices for gasoline and fuel oil state: "I certify that tank wagon (or garage, service station, etc.) price at the date and point of delivery is as stated herein."

3. Completed when a foreign contractor refuses to sign the above certificates. The disbursing office or agent signs one of these statements to support the voucher: "I certify that the contractor's certificate could not be placed on the invoice; contractor refused to place this certificate on the invoice; signature of contractor could not be obtained except as shown on this voucher or attached; or payment to the contractor named on this voucher was made on the date shown in the space for contractor's receipt."

4. Not completed on invoices for other types of services and material. (This does not apply to specific certifications of facts required by certain contracts.)

B. Invoice Discrepancies

1. Adjustment of Computation or Extension Errors. Increase the payment for computation or extension errors totaling ten percent or \$100, whichever is less, per invoice without contacting the contractor. If the error exceeds this amount, obtain a corrected invoice before certifying the voucher for payment. Corrections involving decreases of overclaims are made in any amount (57 Comp Gen 298 (1978)).

2. Lower Unit Prices. If invoices are submitted for less than the contract unit price, pay without further action. The contractor must furnish another invoice for any additional amount due.

3. Underbilling on Quantity. When a contractor bills for less than the quantity received, pay without further action. The contractor must furnish another invoice for any additional amount due. If partial payments are not authorized, notify the contractor of an improper invoice by returning the partial invoice and request a complete billing.

4. Other Discrepancies. When a contractor bills for items not received, items

rejected, or other unauthorized charges:

a. Make the necessary adjustment in any amount on the face of the invoice, voucher or advice of payment.

(1) Pay the reduced amount.

(2) Provide the contractor an explanation of the adjustment. Automated payables systems should produce this statement.

b. If the contractor insists that items were delivered, but the receiving report is missing, return the invoice and ask for proof of delivery so that the receiving activity can process a receipt.

5. Corrected Invoices. Payment may be made on corrected invoices issued to correct erroneous ones. Mark the erroneous invoice "Void" and attach it to the new invoice. Mark the new invoice "Corrected" to avoid a duplicate payment. The receipt of the corrected invoice is used to determine the payment due date.

C. Consolidation of Invoices

1. Consolidate invoices from the same contractor, as possible under requirements to pay by, but not sooner than, the due date.

2. Identify each invoice and contracting instrument on each single voucher payment. Enter the amount of each in the amount column. State "Per detailed invoices attached" or similar words to describe the attachments.

3. Do not consolidate invoices pertaining to contracts with those for open market purchases.

D. Cash Discounts and Discount Periods Allocable to Invoices. See paragraph 020103.

090303 Disposition of Invoices

A. Original. Attach to the original voucher.

B. Duplicate. Attach to the duplicate voucher in disbursing office's retained file.

C. Triplicate. Send with the check to the contractor or contractor's authorized representative. This need not be done if the invoice numbers are cited on the check, the copy of the voucher or the advice of payment returned to the contractor.

0904 FOREIGN LANGUAGE DOCUMENTS

090401 Documents Prepared in a Foreign Language

A. Invoices and supporting documents prepared in a foreign language must be translated before payment to make sure their contents satisfy requirements of the contracting document.

B. The documents should be translated in enough detail (item identification, units, prices, extensions, etc.) to enable someone unfamiliar with the language to determine that receipts (material or services) satisfy the contract terms.

1. Documents containing technical terms that cannot be translated by disbursing office personnel should be forwarded to the using or ordering activity for translation.

2. If terms are so technical that a translation cannot be made, a descriptive translation is adequate provided the using or requiring activity certifies that the items received are what was ordered.

090402 Multiple Invoices

If several invoices contain basically the same format and wording, a single translation is adequate provided like invoices support the same payment voucher and:

A. The required certification shows that all data not translated on other identified

documents are the same as that translated.

B. All noncommon data on all invoices are identified and translated in enough detail to allow an audit by persons not familiar with the language.

C. A separate translation is attached for each group of different invoices.

090403 Translation Certificate

The translation can be entered over or under the corresponding foreign wording or in its entirety on any available space on the document. If space is not available, the English translation may be copied on a separate sheet. The translator completes and signs the following certificate on each translated document found satisfactory for payment: "I certify that I am familiar with the ____ language, and that I have made a true and correct translation of the ____." (Signature and Date). Certification may be inscribed on a separate sheet and attached if space is not available on the foreign language document. Certifying officers must ensure payment requirements are satisfied based upon the translation.

0905 PAYMENTS

090501 Payments to Assignee

Direct payment to the assignee of a contract under the Assignment of Claims Act of 1940, as amended (41 U.S.C. 15), is authorized. However, such payments are not made before the disbursing office receives the notices of assignment (duly acknowledged by the ACO and surety or sureties, if any) and a true copy of the instrument of assignment. See paragraphs 030101 through 030113 and FAR 32.802.

090502 Recurring Payments

Payment for continuing services such as rents, janitorial services, or utilities, which are performed under agency-contractor agreements providing payments at fixed periodic intervals may be made without an invoice being submitted from the contractor. The amount paid normally will be at the base amount specified in

the contractual document. A receiving report or certification that the services were performed for the time period in question is required to support payment (see paragraph 070202-A). The basic voucher prepared to support payments of this nature must show as a minimum, contract number, period covered by the payment, name of the contractor, amount of payment, and account to be charged. The basic voucher must be certified for payment the same as vouchers for all other payments. Annotate payment voucher with enough detail so it can be identified and reconciled with the basic payment voucher. Administrative controls must be established to ensure that recurrent payments are on unexpired contracts or agreements, for correct amounts, for services actually performed, and are not duplications.

090503 Retention Amounts on Construction Contracts

Payment clauses in construction contracts provide for retention of a percentage of the amount due the contractor for completed work until the contract is complete or the contracting officer views the retained amounts to be more than adequate to cover any potential contractor liability for unsatisfactory performance. The contracting officer identifies the retained amount on the certificate of amounts due the contractor, which is forwarded to the disbursing office with the contractor's invoice. The contracting officer may request payment to the contractor for amounts previously retained on the certificate or on a separate document. Payment to the contractor will be made on SF 1034, Public Voucher for Purchases and Services Other Than Personal, with the certificate or separate document used as support of the payment. The SF 1034 should be annotated in the articles or services block to show:

Previous Contractor Invoice totals	\$XXXX.XX
Less: Previous Partial Payment(s)	\$XXXX.XX
Amount retained	\$ XXX.XX

0906 REPORTS

090601 Receiving Reports

A. Generally, receiving reports docu-

ment the receipt, inspection, and acceptance of materials and services by authorized personnel. As used in this regulation, the terms, "Delivery, Acceptance or Delivery/Acceptance," are dependent upon the terms of the contract.

B. Constructive acceptance period. See paragraph 070202-B and FAR 32.905(c)(42). Constructive acceptance should be used in determining when to start the Prompt Payment Act clock for payment computations. Payment cannot be made until the acceptance documentation is received.

090602 Recurring Service/Maintenance Type Contracts

Receiving reports on recurring service/maintenance type contracts do not have to be received physically in the disbursing office provided that satisfactory controls are established to ensure that:

A. The receiving report is prepared and retained for the required statutory period, either in the disbursing office or the receiving activity's files.

B. Duplicate payments are prevented.

C. Payments are made only for satisfactory services actually received and accepted.

D. Functional managers and their successors are aware of their responsibilities under the above procedures. This waiver of the requirement for receiving reports applies only to those service/maintenance contracts which require payment of a flat fee for a specified period of time (e.g., \$1,200 per month for twelve months).

090603 Certificate of Performance

There may be occasions where a certificate of performance is used instead of a receiving report. In these instances, the responsible official signs the statement: "I certify that the services have been received and were accepted on (month, day, year)." This statement may be on an invoice, delivery ticket, voucher or a separate paper. A certificate of performance in

support of board and room for dependent children in a private home overseas should read as follows: "I certify that the dependent (name) has received the board and room accommodations for the year-quarter ending." If the certification date is not the same for delivery and acceptance, two dates and signatures are required.

090604 Documentation

A. The original receiving report must be signed by the government representative who inspects and accepts the material or services.

B. Signature cards or lists of authorized government representatives are not required to be maintained by disbursing offices but the delivery receipt must contain a signature of the authorized government representative. The receiving activity is responsible for maintaining a list of personnel authorized to sign receiving reports.

C. Facsimile signatures on receiving reports can be accepted where the master is signed and the reproduced copy is designated as the original. Also, when appropriate, facsimile signatures using rubber stamps or other mechanical devices may be accepted. The authorized signer retains full responsibility for transactions when facsimile signature is used; therefore, inspectors should strictly control the device. Disbursing offices must take care to avoid duplicate payments where facsimile signatures are used.

D. Certificate of conformance (COC) procedures (FAR 52.246-15 and 46.504) are used only as a substitute for source inspection. Do not use COCs as a substitute for acceptance or as a payment supporting document. Payment can only be made after a properly executed receipt or acceptance document, such as DD Form 250, is provided.

E. Receiving reports are not required before payment for purchases under the fast payment procedure specified by FAR 52.213.1. Payments on contracts with fast pay clauses executed, modified, renewed, or contracts on which options have been exercised on or after April 1, 1989, must be made within 15 days after receipt

of invoice (see FAR 52.232-25(c) and paragraphs 070205-B.2 and 100301 of this volume. Contracts that include fast pay should be properly marked as "FAST PAY". Invoice requirements are as follows:

1. Invoice must be prominently marked "FAST PAY".

2. If the contract requires a shipper delivery order, the contractor has the option either of preparing such a report or including the following information on the invoice:

a. A statement in prominent letters "NO RECEIVING REPORT PREPARED".

b. Shipment number.

c. Mode of shipment.

d. At line item level:

(1) national stock number and/or manufacturer's part number,

(2) Unit of measure,

(3) Ship-to point,

(4) Mark-for point if in contract, and

(5) FEDSTRIP/MIL-STRIP document number if in contract.

F. When the government accepts title at origin (FAR 47.302) and the contract does not require source acceptance, the contractor may be paid before obtaining a receiving report, provided the invoice is supported either by a copy of a signed commercial bill of lading or other document containing the carrier's signature indicating the goods were received by the carrier. If the contractor fails to provide this documentation, return the invoice to the contractor as improper. See paragraph 070201 of this volume.

G. If delivery terms are other than F.O.B. origin or F.O.B. destination, acceptance is by the government at the actual F.O.B. point specified in the contract.

1. DD Form 1155, Order for Supplies or Services, Block 8, distinguishes only between "destination" and "other" for F.O.B. delivery terms. If the "other" block is marked, the contract should be examined to determine if the shipment is, in fact, F.O.B. origin. If the contract is F.O.B. origin, acceptance by the government is at the contractor's plant.

2. If the contract specified F.O.B. at a third point which is neither origin or destination, then payment to the contractor is made when the contractor provides evidence of delivery at that actual F.O.B. point. If the contractor fails to provide this documentation, return the invoice to the contractor as improper. See paragraph 070201 of this volume.

H. Unverified Invoices for Non-Tactical Radio Charges. Forward unverified invoices for non-tactical radio charges to the communications officer. After verification, the communications officer returns the invoices to the disbursing office for payment.

I. Public Utility Invoices. Rate schedules are not required when the invoice includes or is supplemented with the:

1. Total quantity of service furnished.

2. Rate charged per unit of service.

3. Total amount of the charges.

Invoices normally are submitted to a responsible officer who certifies and forwards them to the disbursing office. If applicable, the specified monthly refund of connection charges is deducted from service billings.

J. Certificate for Contract Printing. In addition to the data specified on the standard voucher, the following supplemental certificate will be typed or printed on, or will accompany, all vouchers involving payments for contract field printing. See 2035.40 of the Treasury "Financial Manual."

"I hereby certify as responsible officer that

the contract field printing covered by this voucher was procured according to the applicable Government Printing Regulations of the Joint Committee on Printing."

090605 Disbursing Office Copy

A. The disbursing office receives the original copy of the receiving report or a true, properly certified copy of the original. A true copy exists if original signatures of the person who inspects and accepts the material or services are on the copy designated as the receiving report. See paragraph 090601-A. Documents using a supply inspector's stamp as a facsimile signature are also acceptable. If the stamp is not used, then the inspector's original signature is required.

B. CONUS locations should request receiving reports or other supporting documents not received within 10 days from receipt of related invoices, or sooner, based on local experience. The estimated delivery date is computed by adding to the date of shipment the normal delivery time to the destination by the designated mode of transportation. The second and succeeding followup should be made weekly or at other locally established intervals based on local experience. Followup can be delayed if the invoice indicates delivery will be made at a later date. Followup immediately upon receipt of an invoice for meat, fish, and fresh fruits and vegetables. Automated payables systems should maintain the evidence of followup in the system eliminating the requirement for it to be physically located in the contract file.

C. Overseas locations should:

1. For material or service orders placed with local vendors, followup with the receiving activity 10 days after receipt of invoice.

2. For material orders placed with nonlocal vendors and being shipped by other than ocean freight, followup 30 days after receipt of invoice.

3. For material orders placed with nonlocal vendors and being shipped by ocean freight, followup 60 days after receipt of invoice.

4. In cases where anticipated shipment time is less than indicated above, follow up earlier as appropriate to comply with prompt payment requirement. See paragraphs 070202-A and B of this volume.

090606 Elimination of Hardcopy Receiving Reports

A. Receiving reports are not required by the disbursing office when automated systems provide automated notification of receipt and acceptance. The activity preparing the receiving report retains the source document in accordance with DoD 4000.25-5-M, Military Standard Contract Administration Procedures. The disbursing office may request copies of receiving reports if contractor disputes arise. For information on electronic signature, see paragraph 010304.

B. If a contractor claims an erroneous discount was taken or claims interest under the PPA, the original receiving report will be used to support payment or denial of the claims.

0907 VOUCHERS AND SUPPORTING PAPERS

090701 Contracting by Agent Officers for Organizations Away From Home Station

A. Vouchers and Supporting Papers normally include the following:

1. SF 44, Purchase Order-Invoice Voucher. This form is authorized subject to the limitations in FAR 13.505-3. The SF 44 is a pocket-size purchase order form designed primarily for on-the-spot, over-the-counter purchases of supplies and nonpersonal services, while away from the purchasing office or at isolated activities. It is a multipurpose form that can be used as a purchase order, receiving report, invoice, and public voucher. General procedural instructions governing the use of SF 44 are printed on the form. See paragraph 080101 of this volume for additional information.

2. DD Form 1155, Order for Supplies or Services. See paragraph 080101 of this volume. This form should be used to pay small purchases instead of SF 1034. DD Forms

1155 and 1155C-1, Order for Supplies or Services (Commissary Continuation Sheet), are used as purchase order, delivery order, blanket purchase agreement, imprest fund receipt, receiving and inspection report, and voucher. See FAR 13.5.

3. SF 1034, Public Voucher for Purchases and Services Other Than Personal. If forms cited in paragraphs 090701-A.1 and 2 of this volume are not available or appropriate, use SF 1034. Prepare the SF 1034 as detailed in paragraph 080106 and distribute in compliance with paragraphs 080601, 080602, and 080603.

4. Invoices of Bills Required. The purchasing officer furnishes the agent necessary invoices. If cash payment was not made at time of purchase, invoices are furnished in triplicate. Attach the original and duplicate of the invoice to the original and retained copy of the voucher, respectively. The triplicate copy is sent to the accountable office.

5. Certificates Required. See paragraphs 080301, 080302, 080303, and 090603.

B. Payments:

1. Make payment based on the contractor's original invoice or other form used as an invoice.

2. When payment is made by an agent, enter the following certificate on the original and retained copy of the invoice, or other forms used: "I certify that payment for the supplies and/or services listed here has been made by me as agent in cash this __ day of __ 19__ from funds entrusted to me by____, disbursing office at ____." (Signature, Name, Grade, and Title (note)) NOTE: The title will be "Agent" regardless of any other position the officer may hold.

3. When the contractor has signed for cash payment, the above certificate may be abbreviated as follows: "Paid by ____ as paying agent for, ____disbursing office."

4. When payment is not made by an agent, forward the contractor's invoice (or other form used instead) to the disbursing office

at the home base for payment.

5. The above provisions do not apply to payments made from imprest funds.

CHAPTER 10
PAYMENT VOUCHERS - SPECIAL APPLICATIONS

1001 INTRAGOVERNMENTAL PAYMENTS

100101. Rules for Completion of Reimbursement and Transfer Vouchers

A. General. Request for payment for items supplied to DoD is initiated by the supplying agency.

1. If the funds to be charged and credited are accounted for and reported on by the same disbursing office, then the “billing” and “billed” offices are the same. In such cases, if the transfer is within the same appropriation, use a journal voucher; if different appropriations are involved, use a SF 1080, Voucher for Transfers Between Appropriations and/or Funds.

2. GSA Form 789, Statement, Voucher, and Schedule of Withdrawals and Credits, is an authorized payment voucher for purchases from General Services Administration (GSA).

B. Authorized Vouchers for Transfers Between Appropriations and Funds. Use SF 1080 and SF 1081, Voucher and Schedule of Withdrawals and Credits, under the following general rules:

1. Surplus articles for which payment is to be made is listed on the voucher or supporting documents at their appraised values.

2. Work and shop orders indicate the unit prices of articles or services furnished, or the actual value of personal services, materials, and other direct charges, and overhead. When vouchers cover expenses incident to the use of equipment, the following certificate is placed upon the statement of account: “I hereby certify that the amount billed herein represents cost as determined under 31 U.S.C. 1535 and 1536.” In cases where the account is billed based on unit costs per hour, day, mile, etc., rather than by itemization of supplies and services, such unit costs will include all expenses of operation and maintenance except depreciation.

3. Reimbursement for personal services performed by an employee of another Federal agency may be made provided that an agreement for reimbursement was made before the rendering of such services. Copies of such agreements are attached to the transfer voucher in support of the payment.

4. Articles issued from stock on hand or due in is listed on the vouchers or supporting documents. The unit prices of such items should be at standard, average cost, or computed on such basis as to ensure proper reimbursement to the agency.

C. Audit of Billing. The disbursing office examines the transfer voucher to verify the amounts, sees that required information is shown, and validates that required certificates are signed. Audit includes verification of accessorial charges rates when levied by non-DoD government activities for issues, sales, and transfers of material, supplies, and equipment. There also will be included verification that charges do not include recurring reimbursement issues (sales) and nonreimbursable transfers of material to another DoD Component, except for sales and transfers pursuant to the military assistance grant-aid program and foreign military sales (FMS) programs. After audit and verification for propriety, the disbursing office cites the major accounting classification and certifies the voucher for payment.

D. SF 1080 Series. Use SF 1080 original and two copies for payment. The disbursing office completes the certification of Office Billed block of the form. Receipt and acceptance of material or services is evidenced by a statement signed by the receiver in the Articles or Services block of the form or by two copies of receiving reports, receipted invoices, or shipping documents if property is involved. Keep a copy of SF 1080 as the retained voucher. Return a copy of SF 1080 to the billing office as advice of payment and collection. Be sure to include the disbursing and collection voucher numbers. Complete and send one copy of the receiving report to the base accountable for the property. File the other copy of the receiving report with the retained copy of SF 1080.

E. SF 1081 is used as a billing voucher by some Federal agencies. Process them the same as SF 1080.

F. Payment. Issue a check for SF 1080 payments except for the following which are on a “no-check” basis:

1. When both collection and payment show the same symbol number.
2. The SF 1080 was annotated “No-Check Issue.”

(NOTE: No-check issue vouchers are assigned a disbursement voucher and collection voucher number.)

G. Entries on Posting Media. Certify the SF 1080 after review and verification.

100102. Payment Based on Constructive Delivery, Actual Delivery, or Dropped From Inventory.

A. General. As provided by 31 U.S.C. 1535, payment shall be made promptly by check on the written request of the agency or unit filling the order. Payment may be made in advance or on providing the goods or services ordered. The payment shall be for any part of the estimated or actual cost as determined by the agency or unit filling the order. A bill submitted, or a request for payment, is not subject to audit or certification in advance of payment. Proper adjustments of amounts paid in advance shall be made as agreed to by the heads of the agencies or units on the basis of the actual cost of goods or services provided. Constructive delivery is the delivery of material to a commercial carrier, freight forwarder, United States or international post office, or customer at point of production, storage, or test (DoD 4000.25-7M, Military Standard Billing System (MILSBILLS)). Delivery is shown by completed hardcopy shipping documents, MILSTRIP material shipping documents, or list of deliveries in post offices. Reimbursable issues of material to DoD and other Federal agencies are billed based on constructive delivery or drop from inventory. Under constructive delivery, bills are issued when the carrier accepts the goods for transport. However, payment under constructive delivery differs from the actual delivery or drop from inventory concept. Constructive delivery bills are accepted and paid without waiting for delivery of the goods.

B. Noninterfund Billings From Agencies Within DoD.

1. General. Reimbursable sales of material are billed at the time the items are dropped from inventory following requisition edit by a supply activity, except that billings for sales of bulk petroleum, oil, lubricants, perishable subsistence, FMS, and military assistance grant-aid shipments are based on constructive delivery. Constructive delivery also includes billings for goods accepted by an authorized inspector of another military agency at a contractor's plant with direct shipment to the consignee. Such billings must be supported with DD Form 250, Material Inspection and Receiving Report, or other authorized document received from the inspector showing shipment.

2. Processing. SF 1080 is used as the billing document for noninterfund bills. The SF 1080 must be prepared promptly by the selling activity upon drop from inventory or constructive delivery. Billings must be supported by proper documentation. Screen all billings to determine whether constructive delivery principles apply to all amounts. Send the bills to the receiving office or to the requisitioning office, when specified in the requisition.

3. Payment Procedures. Payment for reimbursable sales is on a check issue basis. Upon receipt of the SF 1080 or other approved form, if proper for payment, the office billed prepares a check and forwards it to the billing office with a copy of the SF 1080. The original SF 1080 is used to support the statement of accountability of the disbursing office. Complete the certificate of office billed before paying the bill only if:

a. For constructive delivery:

(1) Comparison with the requisition shows the items billed were ordered at prices billed

(2) The billing is supported by a summary listing or copies of priced shipping documents which show delivery to a carrier. If the billing is supported by a summary listing of documents, the listing must show:

- (a) Consignor (shipping office).
- (b) Consignee (receiving office).
- (c) Ordering agency, complete requisition number, and Military Interdepartmental Purchase Request or Cross Service Order number.
- (d) Consignor's shipping document number.
- (e) Date of shipment.
- (f) Total dollar value of each shipping document (indicate P for partial, or C for completed shipment).
- (g) Code for military or commercial carrier.

(3) The billing or the supporting summary listing contains the following statement which need not be signed: "Material billed herein was released to a carrier as indicated on shipping document/summary listings for delivery to the ordering agency's consignee."

b. For dropped from inventory:

(1) Comparison with the requisition shows the items billed were ordered at prices billed.

(2) The billing is supported by a summary listing or copies of priced shipping documents.

4. Responsibility of Supplying Activity. The supplying activity notifies the requisitioning activity of item substitutions and price or quantity changes as follows:

a. Forward a copy of the requisition (annotated to show changes) or other authorized supply action immediately after edit for availability.

b. Send a priced "advance copy" of the invoice as soon as possible.

c. Mail one priced “action copy” of the invoice and send one copy with the shipment at the time it is released to the carrier.

5. Responsibility of Requisitioning Activity. The requisitioning activity administratively controls funds for commitments and obligations incurred.

a. Based on information received from the supplying activity regarding changes or substitutions, the requisitioning activity informs the supplying office of any ordered items to be canceled or adjusted in the quickest and cheapest way available. It may reject items if word is not received from the supplying office soon enough to cancel or adjust the order and the supplies received are unacceptable for any reason. Normally, variations in shipment should be accepted; however, when price or quantity changes would cause an overobligation of funds, such variations should be rejected.

b. The receiving activity records only the amounts and quantities of those items approved for payment. When making reimbursement, annotate each document supporting the billing to delete unacceptable items or reduce quantities or items rejected by the supplying activity. Adjust the billing and make reimbursement in the changed amount. Subsequent disposition of the rejected items is through mutual agreement between the requisitioning and supplying activities.

6. Billing Adjustments for Short, Damaged, or Defective Shipments Within DoD. The billed activity initiates action to obtain billing adjustments. Do not request billing adjustment for these causes within DoD when the loss or damage is less than \$250 per line item. Such losses are absorbed by the ordering activity. However, when the DoD shipper is responsible for the discrepancy, SF 364, Report of Discrepancy (ROD), is prepared by the receiving activity and processed. The transportation management office (TMO) or transportation office (TO), as applicable, initiates the SF 361, Transportation Discrepancy Report (TDR), when the shortage or damage is attributed to the commercial carriers. Adjustments for shipment losses of \$100 or less may be automatically granted to a foreign country if shipments involve foreign military sales.

7. Other Billing Adjustments or Allowances. The ordering activity initiates requests to the billing activity to grant adjustments or allowances not arising from shortages, damages, or defects in shipments; for example, overages, unacceptable substitutes, or erroneous material received. Approved requests are applied as an adjustment or allowance to the customer’s account included in the billing document. Do not request billing adjustments when the amount involved is \$250 or less per line item.

8. Billing and Credit for Material Diversions Under MILSTRIP/MILSTAMP. Activities canceling requisitions for which a Material Diversion Confirmation is issued are credited the amount billed, including accessorial charges. The alternate consignee for material diverted is billed for the standard price and accessorial charges. Activities canceling requisitions for material that the Defense Logistic Agency (DLA) placed an order for

direct shipment of nonstocked items are billed by SF 1080 for contract termination costs arising from cancellation of the requisition. The DLA promptly will notify the “bill to” activity cited in the canceled requisition of impending termination costs.

9. Missile Propellants. Use an SF 1080 when billing for missile propellants on a drop-from-inventory basis. Pay these bills upon receipt using the same SF 1080 to ensure the bill number cited remains the same.

★ 100103. Payments to Defense Working Capital Funds.

★ Payment for services rendered by Defense Working Capital Fund activities is based on the prescribed rates, tariffs, and billing procedures designated. As provided by 31 U.S.C. 1535, payment shall be made promptly by check on the written request of the agency or unit filling the order. Payment may be made in advance or on providing the goods or services ordered. The payment shall be for any part of the estimated or actual cost as determined by the agency or unit filling the order. A bill submitted, or a request for payment is not subject to audit or certification in advance of payment. Proper adjustments of amounts paid in advance shall be made as agreed to by the heads of the agencies or units on the basis of the actual cost of goods or services provided.

100104. Material and Services from General Services Administration (GSA)

A. Requisitions. The supply officer prepares MILSTRIP requisitions for sales from stock or automated direct delivery sales.

1. The ordering activity records the obligation for the material and monitors supply support services. Support the recording of the obligation with a copy of the price extended requisition or listing of items ordered.

2. The GSA advises the ordering activity of changes in prices, quantities, or substitutions immediately after requisition edit by sending advice of changes to the requisitioner. Based on this advice, the ordering activity informs the GSA of any changes desired.

3. GSA stores forward priced copies of DD Form 1348-1, DoD Single Line Item Release/Receipt Document, for stocked items with the shipment to the consignee. For stocked items ordered to be shipped directly from the supplier, the GSA forwards a copy of the supplier's order form. For nonstores items, the GSA forwards a copy of the purchase order or a contractor's packing ticket, as appropriate. These documents show the number of packages, types of package, description of contents, package number, the gross weight, and cube. Copies of the documents are sent to the disbursing office, the consignee office, and the ordering office.

4. The ordering activity is responsible for administrative control of funds. Based on changes in prices, quantities, or substitutions of items the ordering activity:

a. Adjusts the previously recorded obligation; or, if funds of the ordering activity will be overobligated, advises the GSA depot by the most expeditious and economical means available of requisitioned items to be canceled or adjusted.

b. Normally accepts substituted items and changes in prices and quantities as detailed in paragraph 100104-A(2). This does not apply when material that was not ordered or accepted would cause overobligation of funds. Disposition of material not accepted is arranged by mutual agreement between the ordering activity and the GSA depot. Billing adjustments are made as stated in paragraph 100104-C.

B. Noninterfund Billings (GSA).

1. The GSA provides selected supplies, equipment, services, space, communications, motor vehicle rental, and other miscellaneous items on a reimbursable basis. These supplies and services are financed from revolving, management, or working capital funds. Reimbursement from the components are obtained through periodic billings and collections which permits the GSA to operate these programs with a minimum amount of appropriated capital.

2. Bills are received from the GSA biweekly, monthly, or quarterly after the fact, or in advance on their billing forms. GSA Form 789, Statement, Voucher, and Schedule of Withdrawals and Credits, is used for billing. Certification of such bills by the GSA is not required. Except for those bills which are rendered in advance (such as rental payments), bills are sent to the components only after there is evidence of actual delivery of material or services or after receipt of evidence of shipment (constructive delivery). Documents or billing cards generally are furnished by the GSA, and they contain necessary data to permit identifying the requisition, purchase order, travel order, or other obligating documents. The GSA may, at its discretion, process requisitions of \$1 or less without billing. If such items are not billed 60 days after receipt of the material, the obligation should be canceled.

C. Adjustments. The GSA adjusts billings when appropriate for transportation-type discrepancies attributable to the common carrier, and when the discrepancy in shipment is either caused by the shipper (GSA), or results from a lost or damaged parcel post shipment. The GSA adjusts billings that are erroneous, if the error is over the amount specified per line item in DoD 4000.25-7-M, Chapter 4, paragraph A.2.

1. For lost, damaged, or defective shipments, when the discrepancy is apparently attributable to the common carrier, the receiving activity prepares an SF 361. The GSA processes these claims within CONUS, since they are designated on the government bill of lading (GBL) to make payment of transportation charges to the common carrier.

2. When the discrepancy in shipment is either caused by the shipper (GSA) or results from a lost or damaged parcel post shipment, the receiving activity prepares an SF 364. The receiving activity sends the SF 364 to the GSA Discrepancy Reports Center.

3. Errors in GSA noninterfund billings over the amount per line item specified in DoD 4000.25-7-M, Chapter 4, other than the discrepancies in paragraphs 100104-C(1) and (2), are corrected by the GSA based on a letter from the billed office. For these errors, the billed office sends a letter to the GSA Discrepancy Reports Center, includes a full explanation of the error, and attaches a copy of the billing document which includes the error. The billed office will process interfund billing (MILSBILLS) errors.

4. Some discrepancies and billing errors are too small to process. The gain or loss from errors and discrepancies too small to process, per paragraphs 100104-A(1),(2), and (3), are absorbed by the ordering activity.

5. The GSA processes the SF 364 (ROD) and SF 361 (TDR), replies to the receiving activity, and, when applicable, sends an adjusted bill to the billed office. They also process letters advising them of erroneous billing over the amount specified per line item in DoD 4000.257-M, Chapter 4, reply to the billed office, and, when applicable, send an adjusted bill to the billed office.

a. The receiving activity is responsible to follow-up with the GSA Discrepancy Reports Center when the GSA fails to reply to a TDR or ROD. When the reply to a TDR or ROD indicates a billing adjustment will not be made, the receiving activity absorbs the resulting gain or loss. When the reply indicates a billing adjustment will be made, the receiving activity provides a copy of the reply to the billed office.

b. If the billing adjustment is not received within 60 days of the date of the reply to the TDR or ROD, the billed office follows up with the GSA Discrepancy Reports Center, for non-interfund bills, by letter, with a copy of the reply to the TDR or ROD attached. If no reply is received to the follow-up letter within 60 additional days, a second follow-up letter is sent from the billed office to the GSA Discrepancy Reports Center.

c. The billed office sends follow-up letters to the GSA Discrepancy Reports Center, about billing errors over the amount specified per line item in DoD 4000.25-7-M, Chapter 4, each 60 days until the billing adjustment is received or until advised that a billing adjustment will not be made.

D. Transportation. The GSA pays transportation costs on stock items to all CONUS activities and to United States ports of embarkation for overseas shipments. These costs are included in the GSA standard stock item prices. Transportation charges for non-stock items are paid by the consignee or, if paid by the GSA, they are billed to the consignee.

E. Payment (Noninterfund).

1. Make payment for material by check within 15 days after receipt of the GSA invoice. GSA Form 789 is the payment voucher authorized for purchases from the

GSA. Pay the bills as rendered without preaudit or receipt verification, subject only to availability of funds and adjustments for obvious significant errors in dollar amount. If items are deleted from the billing, fully explain on the GSA billing forms. Establish a follow-up system to make sure that material paid for is received.

2. GSA billings for material shipped overseas contain a special surcharge for packing, packaging, and preservation of material. These costs are not included in the standard unit prices of the items but are billed separately. GSA billings for these charges cite the appropriation fund code shown in the MILSTRIP requisition. Send a copy of the GSA billing form with a check to the GSA Regional Director of Financial Management.

3. Surcharge rates are computed by applying an authorized percentage of the value of the material ordered and delivered, with both Level A and Level B pack, through the GSA regions to DoD customers overseas. These rates are subject to change each fiscal year based on annual review of actual costs by the GSA.

4. Accounting Services is responsible for GSA Motor Pool transactions incurred by the local TO. Travel section processes payments to the GSA or contractors for vehicle rentals authorized by travel orders. Use the data on the billing documented detail billing cards to identify the requisition, purchase order, travel order, or other obligating document. Compare the billing information to the obligation document, if an error is found, follow instructions in paragraph 100104-C. Make payment by check within 30 days of the billing date. The GSA forwards detail billing cards in support of the summary billing document and a GSA Form 789. The GSA supports each transaction listed with detail billing cards for use with either mechanized systems or for manual processing.

5. The GSA bills for Federal Telecommunication Services (FTS), as authorized by 31 U.S.C. 1535 and Title 41, Federal Property Management Regulation (FPMR), Chapter 101. These bills are submitted quarterly and paid in advance, without preaudit or receipt verification, subject only to the availability of funds. Pay these bills within 15 days after receipt of the GSA invoice.

F. Billing and Credit for Material Diversions Under MILSTRIP/MILSTAMP. Credit activities canceling requisitions for which a material diversion confirmation is issued with the amount billed, including accessorial charges. The alternate consignee for material diverted is billed for the standard price and accessorial charges. Activities canceling requisitions for material for which the GSA placed an order for direct shipment of nonstocked items are billed by SF 1080 for contract termination costs arising from cancellation of the requisition. The GSA will promptly provide the bill to the activity cited in the canceled requisition of impending termination costs.

100105. Payment Procedures for Transactions with the Government Printing Office (GPO), Library of Congress, and Government Corporations.

A. General. When services or supplies are furnished, an invoice may be submitted to the requisitioning component. In such cases, the SF 1080 is prepared and processed for payment by the office billed. Attach the invoice to the SF 1080. Instead of transcribing the details of the transactions, list each invoice under the caption “per attached invoice” according to date, number, and other identifying data as appropriate. Extend the net amount of each invoice in the amount column. In the case of miscellaneous publications, subscriptions, films, etc., acquired from the GPO or the Library of Congress, an invoice may be accepted by the disbursing office to support payment instead of receiving report certification, subject to later adjustment if required. As a result of a Deputy Secretary of Defense decision to consolidate printing and duplicating services in the Department, the Defense Printing Service is the single DoD focal point for GPO ordering and payment. If the bill is submitted on SF 1034, Public Voucher for Purchases and Services Other Than Personal, certify and process it for payment the same as for payment of a commercial account.

B. Payments to GPO. The GPO reimburses the contractor for commercial printing services acquired through that agency. This eliminates the requirement for the disbursing office to have a receiving report or other evidence of receipt, conformance, or performance before payment of the GPO billing.

1. The GPO sends two invoice copies to the ordering activity for certification and the remaining three to the servicing component. The ordering activity keeps one copy for their files and sends one to the disbursing office. Send the original with the payment voucher, one copy to the GPO with payment, and keep one copy in the component payment files.

2. Upon receipt of a certified invoice from the ordering activity, match it to the one in finance and accounting and make payment within 15 days. This certified invoice serves as a receiving report. Do not suspense payments to the GPO because they are not subject to the Prompt Payment Act.

3. If the certified invoice is not received within 10 days, follow up with the ordering activity listed on the invoice. If the ordering activity states that order is received and delay is in line-item price certification, make payment as soon as possible based on the invoice received in the disbursing office. Keep one copy for payment files and return one copy with the check to the GPO to ensure proper credit. Later, when the certified invoice is received from the ordering activity, attach it to the copy in the payment files as supporting documentation.

4. After payment is made, a copy of the SF 1034 or 1080 with the invoice attached may be sent to the ordering activity on a case-by-case basis.

5. In the case of discrepancies, the GPO furnishes both the disbursing office and the ordering activity with a credit invoice to be used as an offset against the next

invoice received for that ordering activity. Attach a copy of the credit invoice to the payment voucher where the offset occurs and include in the payment files.

100106. Use of Imprest Fund.

A. Reimbursement of Imprest Fund Optional Form (OF) 1129, Reimbursement Voucher, and OF 1129A (Memo).

1. See FAR 13.4 for guidance and DoD FMR Volume 5, Chapter 2.

2. Payment of Fees for Cashing Treasury Checks. Imprest fund cashiers may pay fees to cash Treasury checks at locations where Government depositories or United States disbursing offices are not available. Monthly, or for each transaction, the agent:

a. Prepares and certifies a DD Form 1155, Order for Supplies or Services, or SF 1165, Receipt for Cash, showing the amount of fees paid.

b. Has the form signed by a cashier of the bank or other institution which charged the fee.

c. Submits the form as a supporting document to OF 1129, Reimbursement Voucher.

B. Audit and Completion of OF 1129.

1. The disbursing office or agent reviews the OF 1129 and supporting cashier's subvouchers for compliance:

a. The name of the individual designated as an imprest fund cashier or agent is correct.

b. No transaction is in excess of \$500, except during periods of specified contingency operations when the limitations on imprest fund transactions may be increased to \$2,500. Repetitive purchases for the same items or splitting purchases among contractors to avoid this dollar ceiling is prohibited.

c. The supplies or services acquired are authorized for purchase within the limitations of the imprest fund:

(1) The supplies or services are available for cash payment to be made upon pickup or delivery.

(2) No detailed specifications or technical inspections are required. Subvouchers include contractors' paid invoices; sales slips; cash register tickets; DD

Form 1155; SF 1165, DD Form 1351, or DD Form 1348-1. The imprest fund cashier attaches the subvouchers to the OF 1129 for submission to the disbursing office. The disbursing office retains original subvouchers with memo copy of OF 1129.

(3) If any part of the subvoucher is questionable, the disbursing office or agent returns the contractor's sales document to the imprest fund cashier. Appropriate action is taken on the unredeemed sales document.

2. Reimbursement should be made as frequently as necessary, but no less often than monthly. At the close of the FY, a reimbursement voucher covering all remaining subvouchers through September 30 shall be submitted before the closing of the allotment accounts for the month. The accountable agent or disbursing agent reimburses the imprest fund cashier no later than the business day after receipt of the OF 1129, 1129A, and the contractor's sales documents.

3. Amount of Reimbursement. Imprest fund cashiers should request replenishment checks in such denominations that will enable them to keep the balance of cash on hand at a minimum. However, requests for multiple checks under \$25 will not be honored.

100107. Transfers and Payments from Budget Clearing Accounts.

A. Use SF 1081, Voucher and Schedule of Withdrawals and Credits, to transfer funds from budget clearing accounts.

B. Use SF 1049, Public Voucher for Refunds, as refund vouchers for processing refunds due remitters.

C. Excise taxes represent an example of a special deposit fund account with local accountability. Place documents supporting collection of excise taxes in suspense when the collection is made. Remove these documents from the suspense file when the disbursement is made.

1002 PARTIAL PAYMENTS AND COST REIMBURSEMENT CONTRACTS

100201. General

Unless prohibited by the contract, payment shall be made on partial deliveries accepted by the government, unless the payment amount is less than \$10.

A. Maintain a partial payment record when more than one payment is required to liquidate the obligation. When the previous partial payment voucher numbers are shown on the partial payment record, it is not necessary to keep a copy of the vouchers in the obligation file. Maintain a separate partial payment record for each purchase order, contract, or other obligation document requiring partial payments.

B. When partial payments are made on DD Form 1155 containing discount provisions, take the discount, if proper, based upon the items accepted shown on the receiving report. See paragraph 020101 for discount provisions.

C. When partial payments are made on purchase orders or delivery orders, process the original signed DD Form 1155. Additional copies must be made at this time for succeeding payments. Do not make partial payments if the DD Form 1155 prohibits them.

D. Payments covering blanket purchase agreements, call-type contracts, and blanket delivery orders are not considered partial payments, except when more than one payment is required on an individual call.

100202. Cost-Reimbursement Type Contracts.

A. The Defense Contract Audit Agency (DCAA) normally reviews and approves partial payment vouchers under cost-reimbursement type contracts. Documentation is not required for payment processing; however, the payment voucher should be annotated so that it can be properly identified as a provisional payment. Checking the provisional payment block on the SF 1034 is sufficient. The administrative contracting officer approves and certifies final voucher before payment.

B. The functions performed by DCAA personnel include:

1. Verification that amounts claimed for reimbursement of overhead are computed per the provisional, billing, predetermined, or final overhead rates currently in effect.

2. Verification that interim fees claimed are computed per the formula or terms in the contract.

3. Determination that the voucher has been properly prepared and that payment for the items listed on the voucher agrees with the terms of the contract.

C. The disbursing office will ensure that invoices requiring approval are properly approved. If only one copy of the invoice/voucher is signed, then a reproduced copy is to be filed in the payment folder or the retained copy can be annotated "original" and signed and dated.

D. Before payment:

1. Verify that sufficient funds have been obligated and are available to cover the amount of the voucher.

2. Determine that the cumulative costs claimed do not exceed the estimated total cost set forth in the basic contract and modifications.

3. Verify that funds have been or are being withheld in amounts sufficient to cover the reserves for drawings, patents, etc., specified in the contract.

4. Compare the cumulative fee claimed with the contractual limitations on interim fee payments.

5. Verify extensions and footings.

E. Special payment techniques may be required when the contract includes requirements under the FMS program for more than one country or for one or more countries and the United States. FMS expenditure authority is required for payments or adjustments in the FMS program.

100203. Progress and Advance Payments.

Progress and advance payments relieve the contractor from responsibility for the total financing of contracts which extend over a long period of time or are for large amounts of money.

A. Progress payments shall be made to the contractor when requested as work progresses, but not more frequently than monthly in amounts approved by the contracting officer (FAR 52.232-16). Progress payments made under fixed price construction contracts shall be made monthly as work proceeds, or at more frequent intervals as determined by the contracting officer, on estimates of work accomplished which meets the standards of quality established under the contract, as approved by the contracting officer (FAR 52.232-5). Progress payments, when authorized, may be paid against estimated amounts recorded, based on contract change notification, provisioning order obligation document, or other similar contractual documents. The contractor is required by FAR 32.0 to prepare and submit a separate SF 1443, Contractor's Request for Progress Payment. An example of different payment rates would be when the payment involves United States rates versus foreign military sales (FMS). In this example, the liquidation rate may be 80 percent for the United States rates versus 90 percent for FMS, and two SF 1443s would have to be prepared. In addition, if more than one FMS country involved, the contractor is required to attach a supporting schedule for the SF 1443 identifying the countries and apportionment of payment. Unless directed otherwise in the contract or by the contracting officer, the contractor must provide SF 1443, with supporting information, to the disbursing office designated in the contract instead of an invoice when requesting a progress payment.

B. Advances are payments made to contractors in anticipation of performance on the contract. This often occurs earlier than the associated costs have been accumulated and summarized in the contractor's accounting system. A clause providing for these payments must

be included in contracts before payment can be made. For more details, see FAR 32.4 and DFARS 232.4.

C. Progress payments do not include amounts paid contractors for:

1. Partial delivery of items.
2. Partial payments on terminations.
3. Cost-reimbursable type contracts.

4. Construction contracts containing the payment clauses in FAR 52.2. Account for these disbursements as partial payments per paragraph 100201.

★ 100204. Progress Payment Procedures.

★ A. When allocating progress payments across ACRNs, follow the procedures in paragraph 010103 of this Volume.

★ 1. In addition to the requirements of paragraph 010103, if the progress payment is for FMS requirements, the portion of the amount approved for payment should be charged to each customer country. For the FMS customer to receive a correct billing statement, the long line fund citation must include the country code, implementing agency, country code designator, and the case line number. If each country code contains only one ACRN, payment will be made to the ACRN reporting the country code, implementing agency, and case line item.

★ 2. If there is more than one ACRN for each country code, the amount to be charged to each country code will be prorated to the ACRNs identified to that country code. Proration will be based on the ratio of the ACRN obligation to the total obligation for a particular country code.

B. Care must be taken to ensure that the individual ACRNs are not over paid. The outstanding work in progress (WIP) balance for each ACRN cannot exceed the ULO for that ACRN multiplied by the liquidation rate.

C. There may be occasions when work is shifted from one contract to another for the same contractor. However, the shifting of work between contracts should be in compliance with the DoD progress payment policy of taking offsets whenever possible. If shifts occur, it should be noted that a disbursement adjustment between contracts is a bookkeeping entry and not a payment transactions. Accordingly, when work is shifted between contracts of the same contractor, a progress payment should be the net amount of the transactions involved on the contracts. Any transfers of work from one contract to another contract will be ordered by a modification to each affected contract.

100205. Progress Payment Recoupments.

A. The recouped amount is determined by multiplying the gross amount of the invoice by the liquidation rate. If this amount is greater than the outstanding WIP balance, the outstanding WIP balance becomes the amount to be recouped.

B. The recoupment should be computed by applying the recoupment first against the outstanding WIP balance of the ACRN to which the delivery is applicable. If sufficient schedule information is available, any remaining recoupment will be against the outstanding WIP balance of the ACRN representing the delivery furthest into the future within the same service as the deliverable ACRN. If sufficient liquidation is not available within the deliverable service ACRN, then liquidation from the ACRNs of other Services should occur against the delivery furthest into the future. If sufficient schedule information is not available, the remaining liquidation will be prorated against those ACRNs with an outstanding WIP balance within the Service of the deliverable first, then off other Service ACRNs if necessary. The basis for the proration will be individual WIP balance to the total contract WIP balance.

C. Recoupments will not be accomplished involving both US and FMS funds unless both are involved with the payment of the deliverable item. If there is a deliverable against an US ACRN, progress payments will be recouped as detailed in paragraph 100205-B. If there is an FMS deliverable, progress payments will be recouped against only that country involved with the FMS deliverable as detailed in paragraph 100205-B.

D. For invoices which offer discounts on contracts with unrecouped progress payment balances, see paragraph 020105 for details.

100206. Advance Payment Procedures.

A. A subsidiary record should be maintained for each contract on which an advanced payment has been made.

B. Advance Payment Pool Agreements. Advance payments are sometimes used for financing the performance of more than one contract. This is accomplished under a single advance-payment agreement called an advance-payment pool agreement. Advance-payment pool agreements are often used for the financing of cost-type contracts with nonprofit educational or research institutions for experimental, or research and developmental work, when several contracts or a series of contracts require financing by advance payments. More than one agency or department may have their funds cited on contracts which are part of the pool agreement. When more than one contract is involved in the pool agreement, one or more of the contracts is designated as the contract for which the advance payments are applied. This is normally a large dollar-value contract. The following guidance must be used for an advance-payment pool agreement:

1. Prepare a separate form for each contract in the pool agreement. Post payments, repayments, etc., applicable to each contract.

2. Prepare one form as the control record for each pool agreement. In the heading, enter the total amount authorized to be paid under the agreement. At the end of each month, summarize the posting of a separate form and post to the control record. Make sure advance payments do not exceed the amount authorized. Cross-reference the control and individual contract forms to avoid duplication when recording to the general ledger.

3. When the advance payment is recouped or repaid, charge the appropriate contracts in the pool agreement and reduce the amount recorded against the designated contract as advance payments.

4. When a contract is terminated, the disbursing office will collect any balances due for advance payments and accrued interest.

C. New Advance Payment Pool Agreements. The following procedures must be used for DoD Components operating under newly negotiated advance payment pool agreements. Those DoD Components operating under current agreements will follow the procedures in paragraphs 100206-A and B. The DoD components will be notified when a new agreement has been negotiated and the following new procedures apply:

1. The contractor request for an advance payment is approved for payment by the designated DoD Component. The approved request is forwarded to the disbursing office.

2. The contractor forwards reimbursement vouchers to the office specified in the contract responsible for reviewing and certifying cost reimbursement payments.

a. Upon receipt of a properly certified reimbursement voucher in the disbursing office, it is reviewed for accuracy. If proper, payment is made.

b. The payment must be made citing the appropriations identified on the contracts listed on the reimbursement voucher.

c. Maintain a partial payment record of all contracts.

d. Make sure that payments do not exceed the total amount authorized on the contract.

e. Payments should be made within 5 to 10 workdays after receipt of a properly approved reimbursement voucher but not earlier than the date specified in the pool agreement. These payments are considered a form of contract financing.

3. A ledger must be maintained to make sure that payments plus the amount advanced do not exceed the unliquidated obligations of all contracts awarded under the pool agreement. This condition may result from:

- a. Failure to receive obligating documents.
- b. Nearing completion of the pool contracts.

4. Do not make the payment if it will cause the unliquidated obligations to fall below the advanced amount. If the above condition occurs, notify the designated DoD Component, and request further instructions. The Component will advise whether obligating documents are in transit or the payment must be processed to liquidate the amount advanced. Take the following actions based on this guidance:

a. If advised that obligating documents are in transit, hold the payment voucher pending receipt of the obligating documents. After receipt of the obligating documents, make the payment to the contractor.

b. If advised that obligating documents are not in transit, process the payment to liquidate the amount advanced.

(1) Process the voucher as a dual payee amount (that is, payable to the contractor or the disbursing office).

(2) Do not mail the check to the contractor.

(3) The disbursing office deposits the check and reduces the amount recorded.

(4) Notify the contractor of the reduction.

(5) In the event of contractor default or loss of funds, immediately notify designated component to obtain processing instructions.

100207. Recoupment Vouchers for Progress and Advance Payments.

A. Progress and advance payments are recouped either by voucher deductions (from amounts otherwise due the contractor) or by cash refunds. Recoupments should be accomplished so they will match the payment requirements delineated in paragraphs 100203, 100204, 100205, 100206, and 100207.

B. Deduction From Voucher. Prepare the disbursement voucher (SF 1034) for completed work for the gross amount due, as though no deduction was involved, charging the applicable account. Then deduct from the gross amount the funds being recouped, citing the

progress or advance payment account number. Immediately record the recoupment on SF 1096. Take care to indicate the contract number on both the SF 1034 and the SF 1096.

C. Cash Repayment. Cash repayments may be required by the provisions of the contract. The contracting officer or other authorized representative:

1. Prepares a DD Form 1131, Cash Collection Voucher, that identifies the repayment, accounting classification, contract number, CLIN or SLIN.

2. Forwards it to the disbursing office. If a CLIN or SLIN is not applicable, such as a lump sum deduction, the voucher should so reflect the fact and cite the applicable modification number.

1003 FAST PAYMENT

100301. General Instructions

When a purchase is made under Fast Payment procedures (FAR 13.3), payment is made based on the supplier's submission of an invoice which constitutes a representation that delivery has been made and the provision of the orders have been complied with. Payment will be made no later than 15 days after receipt of a proper fast pay invoice. Interest penalties will accrue if payment is not made within the 15-day time frame. Disbursing offices are cautioned that all invoices must be prominently marked "FAST PAY." The government will not pay the cost of parcel post insurance. Minimum standards for bill paying under Fast Pay follow:

A. A closed loop process that matches payments to material receipts and resolves nonreceipt or other discrepancies.

B. An information flow that links consignee receipt and discrepancy information to both the purchasing and bill disbursing offices to document contractor performance and provides timely feedback to contracting/bill disbursing offices.

C. A management control/audit program for post-payment examination of payments made under fast pay (statistical sampling is recommended).

D. A process that matches expenditures and obligations for Fast Pay transactions. The matching process should occur as the bill is processed for payment and be under general ledger control.

1004 ROYALTY AND COOPERATIVE RESEARCH DEVELOPMENT AGREEMENT (CRDA) INCOME

100401. Royalty and CRDA Income.

As authorized by 15 U.S.C. 3710, agencies may receive, retain, and use income from licensing patents and CRDAs. Section 3714 provides spending authority for Section 3710 without requiring that an amount be provided in Appropriation Acts. However, because these are appropriated funds, normal appropriated fund regulations, limitations, and requirements apply. The funds can be use or obligated during the FY in which they are received or the succeeding FY.

Any funds that have not been used or obligated by the end of the succeeding FY must be deposited into the Treasury Miscellaneous Receipt Account.

CHAPTER 11

PAYMENT AS REIMBURSEMENT FOR PERSONAL EXPENDITURES1101 PERSONAL EXPENSES110101 General

A. Military and civilian personnel should avoid using their own funds to pay for the government's obligations. However, they can be reimbursed if the underlying expense was authorized, if the transaction would have met the criteria for ratification or quantum meruit had the contractor not been paid, and if failure to act would have resulted in disruption of the program or activity involved. This procedure must not be used simply to avoid normal practices or circumvent laws or regulations.

B. Military or civilian personnel who claim reimbursement for expenditure of personal funds must show there was an urgent and unforeseen public necessity. The claimant prepares an SF 1144, Claim for Reimbursement for Expenditure on Official Business, and puts the following statement on the voucher "I certify this claim is true and correct. There was an unforeseen and urgent reason to spend my funds, and I have not received credit or payments." The claimant signs and dates the certificate. The claim must be approved by proper authority. Documents supporting the certified vouchers must show goods or services were received and essential (33 Comp Gen 20 (1953)). Items allowable in travel status are in Joint Federal Travel Regulation (JFTR) Volume 1 for military personnel and in the Joint Travel Regulation (JTR) Volume 2 for civilian personnel.

C. Military personnel who barter away personal valuables during escape and evasion also may be reimbursed. The voucher must be approved by proper authority. The value of each article bartered must be listed and must show its age and condition at time of barter. Attach this list to the certified voucher presented for payment.

110102 Civil Air Patrol Expenses

Reimbursements are authorized to members of the Civil Air Patrol for fuel and lubricants (aviation and automotive) and necessary communications bills used in DoD authorized missions.

110103 Passports and Visas

Reimbursement is authorized for DoD employees and their dependents when they are officially required to obtain passports or visas. See JFTR, Volume 1, and JTR, Volume 2.

110104 Fees or Dues for Attendance at Meetings of Technical, Scientific, Professional, or Similar Organizations

Only those expenses necessary to accomplish the purpose of the attendance may be authorized or approved for reimbursement. See JFTR, Volumes 1, and JTR, Volume 2.

110105 Reimbursement for Local Movement of Household Goods

When local moves of household goods of military personnel authorized in accordance with the JFTR are made at personal expense, claims for reimbursement will be submitted to the disbursing office on a Standard Form 1164, Claim for Reimbursement for Expenditures on Official Business. A copy of the order directing the move and a copy of the authorization by the transportation or shipping officer to move household goods at personal expense will be furnished with the claim and attached to the retained copy of the paid voucher. Receipts for expenses claimed will be as prescribed in the JFTR.

110106 Mortuary Expense for Deceased Personnel

A. General. Specific service regula-

tions authorize and prescribe the services and expenses for the care and disposition of deceased personnel. Payment for services, supplies, and transportation, or for expenses incurred by the next of kin, is authorized.

B. Primary Expenses. Primary expenses for active duty military can be provided under contract with a local mortuary. These contracts are normally covered by the Prompt Payment Act and paid as such.

C. Secondary expenses. Payments for secondary expenses may be assigned to a mortuary or made, as reimbursements of expenses incurred, directly to the individual. These payments, whether assigned or not, should be expedited and not delayed. Payment of secondary expenses should be treated as payment of a claim.

110107 Reimbursement for Civilian Medical and Dental Treatment Paid from Personal Funds

A. Members. The cost of authorized civilian medical and dental treatment ordinarily is paid directly to doctors and hospitals by each Military Service. However, claims for reimbursement from individuals who have defrayed the expense of authorized care will be paid on an SF 1144. The SF 1164 will bear the claimant's signature on the face of the form as well as the certification of the approving authority and will be supported by paid itemized invoices.

B. Dependents of Members. Instructions concerning the administration of civilian non-Federal medical and dental care for dependents and retired personnel are published in the current series of DoD 6010.8-R. The Office of Civilian Health and Medical Program of the Uniformed Services has the responsibility for contracting and paying for medically necessary care from the civilian sources that is received by eligible dependents and retired personnel. When Medical Treatment Facilities (MTF) are managing the care of dependents and retired personnel, and must refer such personnel to civilian facilities for care that is beyond that MTF's capability, payment for that supplemental care is authorized.

C. Civilian Personnel. Physical examinations to determine an employee's fitness-for-duty, when directed by the commanding officer or supervisor in accordance with 5 CFR 339, may be procured through the imprest fund or other appropriated purchase method. Payment for the examination will be processed in the same manner as other contractor invoices. If this procedure is not utilized and the employee makes his or her own arrangements including direct payment for the physical examination, he or she may submit a claim for reimbursement. The claim will be paid on an SF 1164 supported by the paid statement from the physician or other evidence of payment. The claim will be submitted to the appropriate official for approval, insertion of the chargeable accounting data, and execution of the certificate approving the amount payable. The appropriation chargeable will be the operating funds of the DoD activity requiring the physical examination.

110108 Reimbursement for Notary Public Expenditures

An employee who is required to serve as a notary public in connection with the performance of official duties is entitled to repayment of the expenses incurred in obtaining a notarial commission as authorized by 5 U.S.C. 5945. The expenses that may be reimbursed are the cost of seals, embossing devices, recording and filing fees, and surety bonds required for notaries by state laws. Reimbursement may not be made for professional association dues and other expenses not essential to performance of notarial services. The SF 1164 will bear a statement that the notary commission is required in the performance of official duties. There is no statutory authority for payment of these expenses to enlisted members of the Armed Forces (Comp Gen B-196533 of Apr 22, 1980).

110109 Reimbursement Expenses Under Government Employees Training Act (5 U.S.C. 4109)

Authorized necessary expenses such as tuition and matriculation fees, library and laboratory services, and other service or facilities directly related to training are reimbursable (39 Comp Gen 119 (1959)). The claim should include:

A. Receipts for each payment above \$25.

B. SF 1164, including details of the transaction such as services rendered, dates, etc.

C. Certification of the claimant and the approving official on the SF 1164.

110110 Payment for Medical Personnel Participating in Professional Specialty Board Examinations

A. Personnel of the medical, dental, nurse, biomedical science, and medical service corps are authorized reimbursement for fees for application, examination, certification, and other related expenses.

B. Contractual Payment. Payment of fees for examinations may be arranged by the contracting officer when this method is acceptable to the agency administering the examination. Payment should be made upon completion of the examination. If the individual fails to take the examination as scheduled, and has not been officially excused, then recoupment from the individual may be required.

C. See the JFTR and the JTR for individuals who travel under funded orders and pay these fees.

1102 EXPENDITURES OTHER THAN PERSONAL

110201 Official Recruiting Duty

A member of either of the Military Services assigned to perform recruiting as a primary duty is entitled to reimbursement for actual and necessary expenses paid from personal funds in the performance of recruiting duties. See JFTR for reimbursable items, limitations, and payment procedures.

110202 Reimbursement for Use of Special Conveyances

See the JFTR and the JTR.

110203 Reimbursement of Miscellaneous Expenses to Defense Investigative Services (DIS)

Reimburse DIS agents for investigative costs, such as parking fees, police and court record checks, transcripts, photographs, or miscellaneous investigative fees. DIS district commanders and field office commanders are appointed as imprest fund cashiers by the commander of the base to which attached or assigned. The DIS Headquarters provides the servicing disbursing office with authority to cite its accounting classification on imprest fund reimbursements with no dollar limitation. Such authority is attached to each appointment order.

110204 Board and Room for Dependent Children

Sponsors of dependent children who require board and room away from their domicile in a private home overseas (not within commuting distance) to provide the children an adequate education are authorized reimbursement for the costs incurred. See DoD Directive 1342.13. Use an SF 1034 to reimburse the sponsor for the cost of board and room. The SF 1034 is supported by a certificate of performance, which is a receipt covering the actual payment of board and room. A signed statement is required from the school superintendent or principal that the board and room charge was reasonable for the area and there was no less expensive alternative means of providing adequate education at a school within the same comparable distance.

110205 Continuing Medical Education Program

Individuals enrolled in approved correspondence courses may be reimbursed for course costs prior to course completion. Ensure that satisfactory proof of expenses is presented by the claimant before making payment.

110206 Claim for Reimbursement for Expenditures on Official Business

A. Military Personnel and Civilian Employees. A claim for Reimbursement for Expenditures on Official Business (SF 1164) may be used as a claim/ public voucher for reimburse-

ment.

B. Non-Government Personnel. Claims will be made on an SF 1164 signed by the claimant and approved by an authorized certifying officer. The claim will be supported by a certified copy of the document requesting the person to perform the duty.

C. Invitation to Travel. Persons invited to perform travel in accordance with JFTR, Volume 1, and JTR, Volume 2, are authorized transportation, allowances, and other proper expense reimbursement when performing travel in connection with official activities of the Department as contained in 5 U.S.C. 5703. Reimbursement will be made on an SF 1164 unless there is an entitlement to per diem allowances, in which case, a travel voucher or subvoucher will be used.

110207 Official Entertainment

As noted in 43 Comp Gen 305 (1963), it is a general rule of longstanding that funds appropriated for government departments or agencies may not be used for entertainment, except when specifically authorized by statute.

110208 Transportation of Household Goods or Government Property

Reimbursement may be made for official packing, crating, hauling and transportation of household goods or government property between two points abroad.

110209 Household Goods Services

A. Claims of Military Personnel

1. Navy Personnel. The deputy disbursing officer of the Naval Supply Center, Norfolk, located at the Navy Material Transportation Office, Building Z-133, Naval Station, Norfolk, VA 23511, is designated to pay all claims of Navy personnel for reimbursement of costs of shipment of household goods under permanent change-of-station orders or shipment authorized under temporary additional duty orders.

2. Marine Corps Personnel. Claims of Marine Corps personnel for reimbursement of costs of shipment of household goods will be forwarded for payment to the Commanding General, Marine Corps Logistic Base (470), Albany, GA 31704.

3. Air Force and Army Personnel. Claims for reimbursement by Air Force or Army personnel will be paid by their servicing disbursing office.

B. Claims of Civilian Personnel. Claims for reimbursement for expenses incident to the movement and storage of household goods including trailer allowances and transportation of mobile homes, will be prepared in accordance with the JTR. Claims will be paid by the disbursing office that pays civilian travel claims for the activity to which the civilian is transferred. Claims of Navy civilian personnel involving circumstances that create reasonable doubt as to entitlement will be forwarded to the Navy Material Transportation Office (Code 024), Naval Station, Building Z-135-5, Norfolk, VA 23511. Reimbursement claims of employees and new appointees transferred to, from, and between points outside continental U.S. will be paid by the deputy disbursing officer of the Navy Supply Center, Norfolk, located at the Navy Material Transportation Office, Building Z-133, Naval Station, Norfolk, VA 23511; or by disbursing officer attached to the Commanding General, Marine Corps Logistic Base (470), Albany, GA. 31704, as appropriate. Claims for civilian personnel of other DoD Components will be paid by their servicing disbursing office.

110210 Awards Ceremony Fees

Fees paid by award nominees and award recipients and their supervisors and managers for attendance at ceremonies that fall within the scope of the incentives awards act may be reimbursed (for civilian personnel see (Comp Gen B-236040 Oct 9, 1990, and for military personnel see 10 U.S.C. 1124). The fees may cover items such as a meal or refreshments, plaques, and awards. Advance payments are not authorized. Reimbursements may be requested on travel vouchers, if applicable, or on an SF 1164.

110211 Defense Attache' Payments

These authorizations permit military attache' officers to be reimbursed up to the amounts authorized for expenses of maintaining a suitable official residence and of cultivating close contacts with local foreign personnel. Payments are made on DD Form 281, Voucher for Emergency or Extraordinary Expense Expenditures, subject to approval by the Head of the cognizant DoD Component. (See Defense Intelligence Agency Manual 100-I, Volume II, Defense Attache' Manual for Administration.)

110212 Payment for Contract Quarters for Foreign Military Sales (FMS) Travelers

For personnel traveling on official orders in connection with FMS, payment for the use of contract quarters will be on a reimbursable basis. (See appropriate DoD Component regulation.)

CHAPTER 12

MISCELLANEOUS PAYMENTS1201 FEES AND AWARDS120101 Attorney Fees Awarded by Court

The Department of Justice (DOJ), in most cases, is the Federal agency designated to represent DoD in litigation. Additionally, the DOJ is funded to make payments of properly awarded attorney fees. (Fees awarded in discrimination cases are exceptions. See paragraph 120228 for more detail.) Attorney fees must be awarded by a court of competent authority and normally are paid by DOJ from its permanent appropriation. If such fees are not payable from this appropriation, the DOJ will provide guidance on a case-by-case basis.

120102 Awards Made to Bid Protesters Under the Competition Act of 1984 (31 U.S.C. 3551-3556)

If the Comptroller General determines that a solicitation for a contract or a proposed award or the award of a contract does not comply with a statute or regulation, the Comptroller General may decide that the protesting party is entitled to the following:

A. The payment of costs associated with the filing and pursuing the protest, including reasonable attorney fees.

B. The payment of costs of bid and proposal preparation amounts must be made from the funds of the activity funding the contract within 30 days after receipt by the contracting office. A copy of the Comptroller General decision, along with a statement of costs incurred and approved by the contracting officer, will be used to support the payment.

C. A successful bid protester must certify, to the best of one's knowledge and belief, that the statement of costs submitted or payment:

1. Contains only costs that are legitimately payable pursuant to the guidance set forth by the General Accounting Office in connection with payments of attorney fees and bid preparation costs.

2. Are complete and accurate.

120103 Attorney Fees Awarded Under the Equal Access to Justice Act (5 U.S.C. 504 and 28 U.S.C. 2412)

A. The Equal Access to Justice Act (EAJA) authorizes payment of attorney fees and other expenses incurred by the prevailing party (other than the U.S.) in civil actions and in administrative proceedings. The party prevailing against the Department in an adversary adjudication or in a court action may obtain an award of attorney fees and other expenses incurred in connection with the proceeding.

1. In adversary adjudications, application for the amount sought must be submitted to the DoD activity involved within 30 days of final disposition in the adversary adjudication (5 U.S.C. 504).

2. In court actions, the application for an award of attorney fees and other expenses must be submitted to the court within 30 days of final judgement in the action (28 U.S.C. 2412).

3. In both cases, the application must be supported by an itemized statement from the attorney, agent, or expert witness stating the actual time spent and the rate at which fees and other expenses were computed.

B. Attorney fees and other expenses awarded claimants under EAJA are paid from funds available to the DoD activity at the time that the award is made. Attorney fees payable under EAJA are limited to \$75 per hour unless the adjudicating officer (deciding official) or the

court in civil actions determines that a higher rate may be allowed under the law. Other expenses include those for expert witnesses and for any study, analysis, engineering report, test or project necessary for the preparation of the party's case. Make payment in the amount approved by the adjudicating officer, or by the court in civil actions, based on documentation from the adjudicating officer or the court.

C. Attorney fees payable in connection with an action filed by a contractor under the Contract Disputes Act of 1978 will not be included in any payment made by the Department of the Treasury to the contractor. Attorney fees awarded in these cases will be paid out of funds current at the time the award is made and available to the activity accountable for the contract obligation.

120104 Claims Under the Federal Tort Claims Act and Other Noncontractual Claims

A. Persons who have been designated to approve or disapprove claims cognizable under these statutes and the regulations governing preparation, submission, adjudication, and payment of the claims can be obtained from local office of counsel or judge advocate office. Send claims approved by the Secretary of a Military Department, or by designated approving authorities in the office of counsel or judge advocate general, to the appropriate DFAS Center or local disbursing office for preparation and payment of the public voucher. Claims approved by other designees are forwarded to the local disbursing office that serves the approving authority for preparation and payment of the public voucher.

B. The Secretary of Defense or designee is authorized to pay claims against the United States for money damages of:

1. \$2,500 or less under the Federal Tort Claims Act as amended by 28 U.S.C. 2671-2680.

2. \$100,000 or less under property loss; personal injury or death; incident to non-combat activities of Department of Army, Navy, or Air Force. (See 10 U.S.C. 2733.)

3. \$1,000 or less under property loss; personal injury or death; incident to use of property of the United States and not cognizable under other law. (See 10 U.S.C. 2737.)

120105 Claims Under The Foreign Claims Act, U.S.C. 2734

The Foreign Claims Act authorizes the Secretaries of the Military Departments, or their designee, to appoint claims commissions to approve or disapprove claims cognizable under the Act. Similar commissions also may approve or disapprove claims cognizable under the North Atlantic Treaty Organization status of forces and similar agreements and 10 U.S.C. 2733 and 2734. Contact the local office of counsel or judge advocate office for the regulations governing preparation, submission, adjudication, and payment of these claims. Claims approved will be forwarded to the nearest DFAS disbursing office serving the country concerned.

120106 Payment to Contractor When Contracting Officer Approves Claim Under the Contract Disputes Act of 1978 (41 U.S.C. 601-613 and FAR 33.0 and 52.233-1)

A. If funds are not available, the contracting officer may refer the claim to the Armed Services Board of Contract Appeals (ASBCA) and request that the ASBCA approve settlement of the claim from the judgment fund. Reimbursement to the judgment fund is made upon receipt of a bill from the Treasury Department from current and available funds or by obtaining additional funds as stated in paragraph 120108. The procedures for payment of amounts under the Contract Disputes Act by the ASBCA or the Court of Federal Claims are in paragraph 120107. Claims in paragraph 120107 exclude claims applicable to the Prompt Payment Act (PPA). The Comptroller General has held that PPA interest must be paid from the funds available for the administration of the program for which interest was incurred. (See paragraph 070401.)

B. If funds are available and the contractor does not appeal, settlement is made by the contract disbursing office from funds cited on the contract. Interest on the amounts found to be due the contractor is payable from

these same funds from the date the contracting officer receives the claim until payment is made.

1. After final agreement with the contractor, the contracting officer should initiate an SF 30, Amendment of Solicitation/Modification of Contract, to obligate the funds.

2. Upon receipt of the contractor's invoice and the SF 30, payment can be made including interest from the date the claim was received by the contracting officer to the date of payment.

120107 Payment to Contractors Based on Decisions of Board of Contract Appeals or Court of Federal Claims

A. Court action may follow contract termination by the United States. When it does, payment may be due the contractor if final judgment is against the United States. Should this happen, send a transcript of the court judgment direct to the General Accounting Office (GAO), Washington, DC 20548 (except for claims settled under the Contract Disputes Act of 1978 as noted in paragraph 120107-B.) GAO settlement is required by 28 U.S.C. 2414 on final judgment by the United States District Courts and by 28 U.S.C. 2517 on final judgments by the Court of Federal Claims. The GAO pays from the Treasury Department general funds. Do not use Operations and Maintenance or other appropriated funds for this purpose.

B. Payment of claims under the Contract Disputes Act of 1978 (41 U.S.C. 601-613 and FAR 33.2 and 52.233-1) is covered by 41 U.S.C. 612. Judgments against the United States by the Court of Federal Claims and monetary awards to a contractor by the ASBCA are authorized to be paid and charged to the permanent judgment fund established by 31 U.S.C. 1304. Amounts paid may include interest from the date the claim was received by the contracting officer to the date of payment. Attorney fees claimed by the contractor may not be included in amounts paid from the judgment fund in these cases. Attorney fees are processed under the Equal Access to Justice Act as noted in paragraph 120103. The Contract Disputes Act requires that the activity whose funds were used for the

contract must then reimburse the judgment fund out of available funds or by obtaining an additional appropriation.

120108 Payments to Reimburse Treasury for Payments in Settlement of Contractor Claims

Upon certification by the GAO, the amounts of contractor claims settled pursuant to the Contract Disputes Act of 1978 may be paid to the contractor by the Treasury Department from the permanent judgment fund. Amounts paid to contractors are reimbursable to the U.S. Treasury from the appropriation available for the purpose of the contract or by obtaining additional funds for such purpose. The Treasury Department will bill the contract disbursing office. If funds are not available in the proper account to cover invoices received from the Treasury Department, request additional funds through appropriate channels. Amounts reimbursed to the Treasury Department must be charged to current funds. Expired or M account funds cannot be used. See 63 Comp Gen 308 1984.

120109 Interest Awarded Contractor by the Armed Services Board of Contract Appeals (ASBCA)

A. Applicable interest rates are established by the Secretary of the Treasury under Public Law 92-41 in January and July of each year. Rates are announced in the Federal Register.

B. Interest is computed from the date that the contracting officer received the claim or the date that payment is due, if that date is later, until the date of payment. See FAR 33.208.

C. Contract claims and interest payments are chargeable to appropriations current at the time the basic contract was executed if they are based on "antecedent liability". A contract claim is based on antecedent liability if the modification or adjustment is within the general scope of the original contract and is made pursuant to a provision, such as a "changes" clause, in the original contract. Contract claims not based on antecedent liability are chargeable to appropriations current when the claim is allowed.

120110 Return of Absentees

Under 10 U.S.C. 956, certain rewards are authorized and paid as follows:

A. Reimbursement for Actual Expenses. When a reward has not been offered or when conditions for payment of a reward otherwise cannot be met, reimbursement, not to exceed \$75, may be made to any person or agency for actual expenses incurred in the apprehension, detention, or delivery to military control of an absentee or deserter. If two or more persons or agencies join in performing these services, payment may be made jointly or separately, but the total payment or payments may not exceed \$75. Reimbursement may not be made for the same apprehension and detention or delivery for which a reward has been paid. Actual expenses for which reimbursement may be made will include:

1. Taxicab, bus fare, or mileage at the per mile rate established by the Joint Travel Regulation for a privately-owned conveyance when travel is performed either by a citizen or officer and prisoner, or a round trip from either place of apprehension or civil police headquarters to place of return to military control.

2. Meals furnished the member for which the cost was assumed by the apprehending person or agency representative.

3. Telephone or telegraph communication costs.

4. Damage to property of the apprehending person or agency if caused directly by the member during his or her apprehension, detention, or delivery.

5. Such other reasonable and necessary expenses incurred in actual apprehension, detention, or delivery as may be considered justifiable and reimbursable by the commanding officer.

B. Reimbursement for Subsistence Furnished. Civil authorities may be reimbursed for the cost of subsistence furnished to military personnel placed in their custody for safe-

keeping at the request of military authorities. Such reimbursement will be in addition to rewards and reimbursement for actual expenses. Payment of subsistence will be made in accordance with the procedures for payment of other actual expenses except that an itemized statement of charges approved by the officer who directed the confinement is required.

C. Condition for Payment. Before a reward is payable, there must be a notification issued for the return to military control of the absentee, deserter, or escaped military prisoner. Receipt of DD Form 553, Deserter/Absentee Wanted by the Armed Forces, oral or written communication from military or federal law enforcement officials, or entering individual's name in the National Crime Information Center, constitutes notification.

D. Amounts Payable

1. A reward of \$50 is paid for the apprehension and detention until military authorities assume physical control of the member.

2. A reward of \$75 is paid for the apprehension and delivery of the member to military control.

E. Voucher Preparation. An SF 1034 is prepared and certified by the personnel officer or other certifying officer designated by the commanding officer of the activity to which the apprehended member was released. The following data must be shown on the voucher:

1. The member's name, Social Security Number, organization from which the member is absent, and the date and place military authorities resumed control.

2. A statement that the payee apprehended and detained, or apprehended and delivered the member.

F. Voucher Support. For payment of reward, attach a copy of a DD Form 553 or a certificate from the organization of absentee or written notification from military or federal law enforcement officials stating that the absentee's return to military control was desired. For

reimbursement of actual expenses, attach an itemized statement of allowable expenses.

G. Payment. Upon receipt of the SF 1034 claiming payment, the disbursing office reviews the voucher for propriety and, if proper, pays the person or agency concerned. On the SF 1034, cite the military appropriation of the parent military service of the person apprehended. Use the appropriation table that follows:

SERVICE	APPROPRIATION
Army	21(*)2010 01-174 P1510 99999
Navy	17(*)1453.2260 60600 71165
Air Force	57(*)3500 32(*)P591.02 503725
Marines	17(*)1105.2702 12690 71165

(*) Insert the digit which identifies the fiscal year.

H. Reimbursement will not be made for:

1. Lodging at nonmilitary confinement facilities.

2. Transportation performed by the use of official Federal, state, county, or municipal vehicles.

3. Personal services of the apprehending, detaining, or delivering person or agency.

Payment of actual expenses will be made in accordance with the payment procedures in this paragraph except when an itemized statement of costs approved by the commanding officer is required and notice of DD Form 553 or other form is not required.

1202 PURCHASES OF SPECIAL ITEMS

120201 Expense of Border Clearance Inspectors

If border clearance inspectors are required to work overtime or on Sundays and holidays at a DoD installation, the DoD installa-

tion pays the overtime expenses incurred, including travel and subsistence when appropriate. Travel and subsistence are not paid for border clearance officials regularly assigned to DoD installations. When additional inspectors are required to supplement the regularly assigned inspection staff, the DoD installation pays for their overtime, travel, and subsistence. If a DoD aircraft lands at a site other than a DoD installation, the home station of the aircraft shall pay the charges. When a DoD aircraft lands at a DoD installation, the installation providing the clearance service bears the expense of the border clearance inspection. These charges should receive financial approval and reservation of funds as soon as possible after the expenses are incurred. The DoD official designated to make the necessary arrangements shall maintain appropriate records, submit requests for overtime, and certify billing documents for payment. Billing forms of the Federal agency providing the service are acceptable. Make payment on the basis of a certificate that services were received and accepted. Invoices from one agency may be consolidated and paid by a single check. Send one copy of the payment voucher to the agency with the check.

120202 Blood Purchases

Blood supplies may be purchased with appropriated funds for persons entitled to medical treatment at government expense (24 U.S.C. 30).

120203 Special Drinking Water

Special drinking water may be purchased with appropriated funds only when it is necessary from the government's standpoint, such as when:

A. The public water is unsafe for human consumption.

B. There is an emergency failure of the water source on the installation.

C. There is a temporary facility with no drinking water available within a reasonable distance.

D. There is no water fit for drinking purposes available without cost or at a lower cost to the government (3 Comp Gen 828 (1924); 5 Comp Gen 90 (1925); 17 Comp Gen 698 (1938); 18 Comp Gen 238 (1938); 24 Comp Gen 56 (1944); and 25 Comp Gen 920 (1946)).

120204 Automobiles

The use of appropriated funds to purchase or hire passenger motor vehicles must be specifically authorized by appropriation act or other law (31 U.S.C. 1343, 1344, and 1349). Tire chains, fire extinguishers, safety flares, removable seat covers, transportation of the vehicle, and taxes are not included in the purchase cost limitation (19 Comp Gen 988 (1940); 28 Comp Gen 721 (1949); and 36 Comp Gen 725 (1957)). Rental cost of automobiles may not exceed statutory purchase limitations (13 Comp Gen 458 (1934)).

120205 Telephone Service

A. Statutory Provisions

1. Appropriated funds normally should not be used to pay for telephone service to private residences or apartments. Exceptions must specifically be provided by law. Long distance calls from private residences on official business may be paid from appropriated funds if supported by properly certified vouchers (31 U.S.C. 1348 and 68 Comp Gen 307 (1989)).

2. Official telephone bills for a period beginning in one fiscal year and ending in another are paid from the appropriation current at the end of the period (31 U.S.C. 1308). This rule also applies to leased wire and teletypewriter services (34 Comp Gen 414 (1955)).

3. Funds collected from sale of telephone services are credited as an appropriation reimbursement to the appropriation that bore the cost of such services (10 U.S.C. 2481).

4. Service clubs, motion picture service, base exchange activities, and officers' and non-commissioned officers' messes within the U.S. are subject to federal communications taxes (26 U.S.C. 4251). Federal credit unions and

the American Red Cross are exempt from the tax (26 U.S.C. 4253). The federal excise tax rate effective on bills received after January 1, 1990 is zero percent. The rate effective January 1, 1983 through December 31, 1989 is 3 percent. The rate in effect for calendar year 1982 is 1 percent and for calendar year 1981 is 2 percent. (Public Law 97-248 and IRS Code 4251, as amended).

B. Increased Rates. A contract may provide for payment of telephone charges at legally established rates. Under such contracts, rate increases approved by rate-setting authorities may be paid. Increased rates subject to approval of rate-setting authorities may be paid subject to adjustment if the increase is not approved (15 Comp Gen 896 (1936); 27 Comp Gen 580 (1948); 29 Comp Gen 71 (1949); and 30 Comp Gen 435 (1951)).

C. Payment Procedures. The office designated to receive the telephone bills, from the telephone company, prepares and certifies the SF 1034 for payment by signing as the "Authorized Certifying Officer" in the space provided. The SF 1034 then is forwarded together with the telephone company bill. Detailed listings, schedules, etc., supporting the telephone company's bill are retained by the responsible office and are not attached to the payment voucher.

D. Long Distance Calls. A certificate is required on each telephone bill or on the supporting statements of toll service with respect to the official long distance calls billed thereon as follows: "Pursuant to Section 4 of the Act of May 10, 1939 (53 Stat. 738; 31 U.S.C. 1348), I certify that the use of the telephone for official long distance calls listed herein was necessary in the interest of the government." The certificate is not required for charges covering telephone calls within a metropolitan exchange or which are billed as message units, nor for intragovernment reimbursement for telephone calls over government-owned or government-leased facilities. The certificate will be signed by proper authority and the capacity in which the person signs will be indicated clearly, such as "John Brown, Communication Officer."

E. Teletypewriter Service. Teletype-

writer service is provided by telephone companies. The charges, based on time used, are billed in the same manner as long distance calls.

F. Unofficial Telephone Calls and Service.

1. The officer responsible for telephone service to each activity is responsible for billing and collecting for unofficial service.

2. An administrative fee may be charged to the individual placing an unauthorized and unofficial call. See the Federal Information Resources Management Regulation for more details.

G. Charges for Unofficial Telephone Service. The purchaser shall pay all charges for unofficial use of telephone service provided from a DoD switchboard. Charges for extensions, special or miscellaneous equipment and installation costs thereof, and toll call and telephone charges when incurred shall be added to the basic monthly rate. Taxes shall be assessed as applicable. However, purchasers may not be assessed an additional charge for unlisted telephone number service. Listing of telephone numbers in the DoD installation directory is considered a locator service rather than a telephone service. Personnel have the option of having their personal phone numbers listed or unlisted in the directory and may not be charged an additional fee in either case. Installers shall bill purchasers all flat-rate charges on the first regular monthly bill following incurrence of the service. When a purchaser has received service for only a fraction of the billing period, the monthly charge shall be prorated. Tables of fractional charges and credits may be used to determine the amount of the prorated charge.

H. Collections. Collections for unofficial telephone service, including flat rate monthly service charges, toll charges, private telegrams made by telephone, applicable taxes, and charges for extensions, installations, special or miscellaneous equipment, and for occasional unofficial use of official telephones will be deposited with the disbursing office of the activity at which it was collected. Collections received shall be credited to appropriations and allotments avail-

able for supplying such service. Reimbursement for DoD provided unofficial telephone services in the U.S. shall be credited to the concurrently available appropriations in proportion to the annual amount of operating expenses incurred and charged to appropriations that financed the services. At overseas locations, except for industrial fund activities, collections shall be distributed proportionately, based on the overseas flat rate cost elements, to appropriations and miscellaneous receipts in the following ratio:

70 percent to operations and maintenance,
25 percent to military personnel, and
5 percent to miscellaneous receipts.

Defense Business Operations Fund activities in overseas locations that provide unofficial telephone service shall retain reimbursements to the extent that expenses were incurred to provide those services. Any excess of reimbursements over associated expenses shall be credited to miscellaneous receipts of the Department of the Treasury. When credit is to an appropriation or fund other than the Defense Business Operations Fund, the disbursing office will forward a copy of the collection voucher to the fiscal officer of the appropriate activity. When security deposits to guarantee payment of obligations, as distinguished from advance payment for services, are made in accordance with local orders, such deposits will be taken up for credit to Security Deposits, Suspense.

I. Federal Taxes. Federal taxes applicable to the unofficial telephone service will be paid by the applicable disbursing office using a DD Form 1131, Cash Collection Voucher. The form will show a charge to the same accounting data as indicated for the telephone bill and will bear a full explanation for the expenditure, including identification of the activity where the taxes were collected. All public vouchers for the month will be paid with one check. Monthly payment and quarterly returns will be made in accordance with instructions furnished by the District Director of Internal Revenue for the district in which the disbursing office is located. A copy of the public voucher will not be furnished to the payee.

J. Refunds. Refunds of amounts

deposited with a disbursing office for unofficial telephone service will be on a DD Form 1131 chargeable to the appropriation originally credited.

K. Satellite Communications (Radio-telephone Service). As required by Commercial Traffic Regulations (DNC 26), the costs of ship to shore communication service will be collected from personnel using the service by the communication officer of the ship. The communications officer will immediately turn over the amounts collected to the disbursing office who will take up the collection as a credit to Suspense. When the telephone company bills the ship for the service, payment will be made to the telephone company by the disbursing office using an SF 1034 to substantiate the payment.

L. Reimbursement for Telephone Wiring Maintenance. Charges for telephone wiring maintenance necessary in base housing, paid by the tenant, may be reimbursed under 31 U.S.C. 1348. Charges for internal wiring repair in family housing will be reimbursed from maintenance funds and charges for unaccompanied personnel housing from current base funds.

M. Telephone and Cable Television Reconnection Charges.

1. 56 Comp Gen 767 (1977) authorizes expenditure of appropriated funds for reconnection expenses where a move is the result of government action over which the member has no control and the move is directed at government expense. Exclude expenses incurred during permanent change of station.

a. Expenditure is authorized for the following as directed by the base commander:

(1) Mandatory assignment to government-owned housing facilities.

(2) Involuntary relocation (Comp Gen B-227727 Mar 7, 1989) to government or non-government facilities because of base renovation or condemnation proceedings.

(3) The termination of

assigned quarters because of death of qualifying dependents.

b. The reimbursement is not authorized for moves involving:

(1) Voluntary termination of assigned quarters.

(2) The termination of assigned quarters due to demotion to ineligible grade or adverse conduct by member.

(3) The termination of assigned quarters due to family separation (no hardship involved).

(4) Member's voluntary movement from off-base to on-base quarters.

2. Accomplish the expenditure of appropriated funds by either the member's claim for reimbursement or a direct payment to the contractor.

a. Reimbursement to Member. A Service member may pay for reconnection charges when billed and file a claim for reimbursement. The member submits the invoice, letter, or special order directing the move, and a letter request to the billeting officer for bachelor quarters or to the base civil engineer for military family housing for approval and certification.

b. Direct Payment Method. A Service member may submit the same documentation through the billeting officer or base civil engineer to the disbursing office for a direct payment to the contractor. These payments are not subject to the Prompt Payment Act. The payment voucher should contain the statement, "payment is being made for the following individual(s) for reconnection services on the following dates."

(1) Support the reimbursement or direct payment to the contractor with:

(a) Special order or letter directing move.

(b) The letter from the member requesting reimbursement for reconnection charges already paid or direct payment to the contractor for charges not yet paid. Member must certify that amount invoiced includes only those charges incurred in restoring telephone or cable services previously provided at old location and does not include charges for any new services or equipment.

(c) Copy of telephone or cable company invoice certified by the chief of services or base civil engineer showing only applicable reconnection charges. All other charges should be lined off and paid separately by the member.

120206 Emergency Notification Service (9-1-1)

A. Emergency notification is a service allowing a telephone subscriber to dial one number (usually 9-1-1) for any emergency. A central control desk takes the call and notifies the appropriate local government agencies. This service often is provided by a state or local government and usually is funded by charges collected from telephone subscribers. In many cases, this charge actually is a tax levied by the providing agency, and the telephone company merely acts as the billing and collection agent.

B. The Comptroller General has determined that, if the charge is imposed by a telephone company for its own service and duly permitted by the tariff to which all utility customers are subject, the charge is proper and payable by the government. If, however, a state or local government actually is imposing the charge and merely using the telephone company as its agent, the charge amounts to a tax from which the Department is exempt (64 Comp Gen 655 (1985)).

C. Federal agencies do not have the authority to waive immunity from such taxes. If a base paid the 9-1-1 charge in situations where the charge is considered a tax, payment would be improper. Notify the telephone company that the Department cannot pay the fee.

D. If it is unclear whether such charges are taxes or service charges, the responsible

official should contact the base communications officer or higher authority.

E. Telephone service to on-base residents is a matter of private contract between the resident and the local telephone company. If residents are charged for 9-1-1 service, they may not claim exemption on the basis of immunity. If a resident of base housing lives in an area where all fire, police, and other emergency services are provided by the base, the charge may be for services the resident does not receive, and a challenge on that basis may be possible. Regardless of the basis a resident of base housing uses to challenge a 9-1-1 charge, it remains a private matter between the subscriber and the telephone company.

120207 Medical Services Provided by Civilian Non-Federal Sources

A. Members. The military medical treatment facility (MTF) can refer members to civilian health care providers for diagnostic services and/or treatment. Claims from civilian non-Federal sources for such care will be paid on an SF 1034. The form will be prepared and certified for payment within 30 days from the later of receipt of an invoice in the specified office or the date of acceptance of the care provided by the approving authority and supported by itemized invoices. The same standards apply to approved claims for services rendered in connection with care of the dead.

B. Dependents and Retired Personnel. Dependents and retired personnel are authorized certain medical care and diagnostic services as established by statutory authority (10 U.S.C. 1071-1085). When an MTF is managing the care of dependent and retired personnel and must refer those personnel to civilian facilities for care that is beyond the MTF's capability, payment for that supplemental care is authorized. Payment will be made on an SF 1034. The funds charged will be the operating funds of the MTF that made the referral.

120208 Patents, Copyrights, Designs, Etc.

Appropriated funds available for acquiring material may be used to acquire the

following if it benefits the Department.

A. Copyrights, patents, and applications for patents.

B. Licenses under copyrights, patents, and applications for patents.

C. Design, processes, and manufacturing data.

D. Releases, before suit is brought, for past infringement of patents (10 U.S.C. 2386 and FAR 28.105.2).

120209 Copies of Official Records or Documents

Fees required by local laws may be paid to proper officials for certified or photostatic copies of public records or documents required by a court, board, etc. Current funds available may be used to purchase death certificates for deceased retired personnel only if there are no beneficiaries or none can be located (19 Comp Gen 93 (1939)).

120210 Payments to General Services Administration Where DoD Liability Exists for Damages to GSA Motor Pool Vehicles

A. Except for normal wear and tear, the Department is pecuniarily liable for loss of or damages to GSA motor pool vehicles caused by negligence, misconduct, abuse, or inattention of military or DoD civilian personnel.

B. This liability is not confined only to cases of negligence or willful misconduct assessed against individuals. Use an SF 1080, Voucher for Transfers Between Appropriations and/or Funds, for payment to GSA. Funds currently available should be cited on the voucher. The damaged vehicle involved must be fully identified on the SF 1080, which also must include the vehicle registry number, date of damage, and register number of report of survey when applicable.

NOTE: Do not delay payment to the GSA pending report of survey action.

C. Send one copy of the voucher, without supporting papers, with the check to the GSA. Support the original voucher and other copies of vouchers (if applicable) with a certified true copy of the Report of Survey, for DoD property where applicable, and a cost-of-repairs statement prepared by the GSA.

120211 Rewards for Recovery of Lost DoD Property

Under 10 U.S.C. 2252 certain rewards are authorized and paid as follows:

A. Payment of rewards may be made to persons or organizations for the return of lost property or information leading to its recovery.

B. Commanders may offer rewards for recovery of lost property.

C. Conditions for Payment of Reward

1. The persons or organizations must know that a reward is being offered or that it is general practice to offer rewards for the return of particular DoD property or information leading to its recovery.

2. The claimant is not a member of the U.S. Armed Forces or an officer, employee, or agency of the U.S. Government.

3. Payment is not inconsistent with local laws, prevailing customs or practices, treaties, or international agreements.

D. Rewards should be paid from the current funds available of the activity concerned. Support the voucher with a copy of the offer of reward, a statement by the commanding officer or designated representative that the conditions for payment of reward have been met, and a release from further claim signed by the claimant.

120212 Tuition

A. Military Personnel. Tuition aid for military personnel will be paid in accordance with the approved contract.

B. Civilian Employee Training. The DD Form 1556, Request, Authorization, Agreement, Certification of Training and Reimbursement is the authorized form to request, authorize, fund, certify, reimburse, and evaluate DoD civilian training. The training may be provided either from government or non-government sources. It must be a regularly scheduled, off-the-shelf course, training conference, or instructional service that is available to the general public and priced the same for everyone in the same category, i.e., price per student, course, program, service, or training space.

1. The total price of training authorized by the use of single DD Form 1556 may not exceed \$25,000.

2. The training officer (or the employee development officer) may authorize the actions summarized in this paragraph. These actions do not involve the contracting functions (see Civilian Personnel Instructions (CPI) 410, Appendix H, for further uses/use limitations on the form).

3. Prohibitions against the payment of tuition or other expenses for training are outlined in Federal Personnel Manual (FPM) 410.4, 410.5, 410.6, 410.7 and 410.8 and CPI 410.4, 5, 6, 7, 8, and 10.

4. Requirements on support of travel and transportation requirements involving attendance at training are contained in the JTR, Volume 2.

5. Educational service agreements may be entered into with established colleges, universities, or other educational institutions. Agreements may include all normal tuition and fees in established schedules applicable to all students attending the institution (excluding off-duty educational programs for individual employees). Each request requires a contract that should be initiated via use of the DD Form 1556.

6. Employees nominated to attend training in a government or non-government facility will be issued on a DD Form 1556 that is signed by an official with approving authority.

7. When the training has been procured by means of contract or educational services agreement, payment will be made in accordance with the provisions therein. If there is no contract or agreement, payment will be made based on billings (invoices) received and approved by the sponsoring activity supported by copy 6 or 7 Agency (Finance/Disbursing, Tuition) or Agency (Finance/Disbursing, Books, etc.) of the DD Form 1556, as appropriate.

C. Advance Payment. Advance payment of tuition and other expenses is authorized either when the training facility renders or refuses to render a billing, or advance payment is indicated in Section G on the DD Form 1556. The public voucher will identify the training facility by name and address and indicate the amount and serial number of the check drawn to the facility for the advance of tuition, as well as the amount and serial number of the check drawn to the trainee for purchase of books, library, and laboratory services. The original and 2 reproduced copies (front and back) of the Agency Finance/Disbursing copy of the DD Form 1556, copy 6 or 7, must be submitted to the disbursing office to support payment of the advance. The original Agency Finance/Disbursing copy of the DD Form 1556, copy 6 or 7, will be endorsed by the disbursing officer to reflect the advance payment and will be transmitted with the check to the trainee.

D. Liquidation of Advance. Within 5 workdays after completion of the training, the trainee will prepare an SF 1164 itemizing the training expenses, attaching receipts when obtainable, and submit the original agency finance copy of DD Form 1556 which was endorsed with the advance payment information. The disbursing office will liquidate the advance payment in the same manner as prescribed for travel advances.

120213 Support of Armed Forces Personnel in Confinement

Purchase of health and comfort items for personnel confined on base is authorized not to exceed \$40 monthly per prisoner. Corrections officers should purchase these items for issue through the use of an SF 1034. Do not make

cash payment to individual prisoners. Purchases of necessary uniform clothing items are authorized and processed in accordance with the regulation of the service of the prisoner, whether one is in a pay or non-pay status. Administrative costs for the prisoner's deposit fund, such as the purchase of checks and bank service charges, will be paid in accordance with the regulation of the Military Service of the prisoner.

120214 Confinement of Female Prisoners in Civil Detention

When DoD confinement facilities are not available, or do not provide for the separation of male and female prisoners, regulations provide procedures for transferring female prisoners to civil detention facilities. The Security Office transfers female prisoners and provides the disbursing office with supporting documents for payment of the confinement expenses. The disbursing office submits payment to the civil confinement facility and coordinates on all matters of pay and allowances due the prisoner while in confinement. The funds to be charged for the confinement are determined by the expenses itemized on the invoice.

120215 Pollution Control Permits or Fees

In the absence of express Presidential exemption, DoD facilities must abide by state or local laws for abatement and control of pollution. This includes obtaining permits and paying the associated fees. Use an SF 1034 to pay claims based on the certification or approval of the base civil engineer.

120216 Municipal Services

Under 10 U.S.C. 2465, absent specific legislative authorization, DoD disbursing offices may not make payments for any service required to be provided by the local government if such service is financed from revenues raised by state or local taxation from which the Federal Government is exempt. Common examples are police and fire protection. The Department may pay on the same basis as private users for services based on the quantity of direct services received, i.e., water and sewage. The general rule is that the Department will not pay for municipal services

unless private citizens and businesses also pay a charge for the same services. While payments made under contracts prior to the enactment of Public Law 101-510, November 5, 1990, are held to be valid, there is no legislation holding payments made after that date to be valid.

120217 Arbitrator Fees

The use of arbitrator services under negotiated grievance procedures of management and labor union agreements is authorized. These services normally are acquired by issuance of a DD Form 1155 which specifies payment terms and conditions. The civilian personnel office submits approved documents to the responsible activity for funds certification and reservation of funds before obtaining contract action. Upon completion of services, the civilian personnel office certifies that services have been received. This certificate serves as documentation representing the receiving report required for payment. Pay the arbitrator on the date specified in the contract. If the contract does not contain a due date, pay as close as possible to (but no earlier than 7 days before) 30 days after the later of receipt of invoice or acceptance of service.

120218 Payment for Advertising

A. General. In accordance with 44 U.S.C. 3702, prior to advertising in newspapers, trade journals, and similar publications, written authority to advertise must be received from the cognizant DoD Component Head or from a person who has received written delegation of authority from the Head of a DoD Component. Such delegation of authority cannot be redelegated.

B. Payment

1. Providing Substantiating Documentation. Procurement documents for official advertising will provide that each invoice accompanied by an affidavit of publication or a copy of the publication or advertisement (known as a "tear sheet") will be submitted to the purchasing office. The officer placing the advertisement will attach to the invoice a copy of the procurement document and evidence of authority to advertise and forward the invoice to the disbursing office.

Except in cases of blanket authority to advertise, the public voucher for advertising will be accompanied with a copy of the original authority to advertise signed by the Head of the DoD Component or an officer delegated to authorize advertising. If advertising was authorized by a delegated officer, a copy of the delegation will be attached to the first public voucher paid under such delegation and will be referenced on subsequent vouchers. When the authority to advertise is given to several activities in the form of a notice or instruction issued by the Head of a DoD Component on that official's delegated authority, a reference to the authorizing notice or instruction on the advertisement order is acceptable in lieu of a copy of the authority.

2. Retainment of Supporting Documents. Every account for official advertising rendered will be accompanied by a tear sheet in which the advertisement appeared as a proof of publication. However, if tear sheets are not available, an affidavit or publication may be furnished in lieu thereof. The affidavit will be signed by an official of the publishing firm or advertising agency with which the order was placed and, in the case of advertising in newspapers or periodicals, will identify the issues in which the advertisement appears. Tear sheets or affidavits submitted as proof of publications will not be forwarded to the GAO as part of the disbursing office's account but will be attached to the memorandum public voucher and retained.

3. Radio Advertising. The Comptroller General has determined that the requirement of written authority for advertising from the Head of a DoD Component or from a person who has received written delegation of authority does not apply to radio advertising. The other restrictive provisions relating to advertising in 44 U.S.C. 3702 are confined also to advertising in newspapers. There are no general restrictions upon the use of appropriated funds for radio advertising if in promotion of objectives for which appropriated. The prescribed forms and substantiating documents set for advertising in newspapers do not apply to radio advertising. An SF 1034 will be used in making payment for radio advertising.

120219 Demurrage on Cylinders

Vouchers covering demurrage charges on gas cylinders or drums retained beyond the contract free period may be prepared on a quantity basis. This means based on a number of cylinders, without regard to any particular cylinder, where contracts so provide. In such cases, explain the method of calculating demurrage, cite the voucher covering the preceding demurrage payment and other identifying data such as the cylinder number, date cylinder was delivered, date rental starts, date cylinder was returned, and the actual number of days and rate per day on which the charges were computed. Charge the funds of the activity which caused the delay. Identify also the voucher upon which payment was made for the filled containers (19 Comp Gen 53 (1939)).

120220 Civilian Uniform Allowances

Payment of civilian employee uniform allowances will be made in cash or by check on public vouchers prepared and certified by proper authority. Payment will be made by the disbursing office serving the activity for the payment of civilian payrolls. When more than one employee is paid in cash on the same voucher, the signature of each payee acknowledging payment will be obtained on the original voucher. The payment will be charged to the same appropriation and subsidiary accounting data normally charged for the salary of the personnel concerned.

120221 Payment to Military Personnel for Lost or Damaged Clothing

Military personnel entitled to reimbursement for lost or damaged clothing submit an original and two copies of approved form Personal Clothing Claim. The disbursing office will prepare an SF 1034 for payment to the member.

120222 Payment for Representation and Contingencies Fund Use

A. General. The instructions in this paragraph apply to disbursements made against funds separately appropriated in the contingen-

cies program. These include representation, special expenses, and contingencies. For each fiscal year, the Congress appropriates funds in the contingencies program under the statutory authority in 10 U.S.C. 140 for use by the Head of each DoD Component. Funding documents provide authority to obligate and expend contingency funds as approved or as adjusted later during the fiscal year.

B. Representation Funds. Unless otherwise specifically authorized by the cognizant Head of a DoD Component, representation funds are expended by commanders only for official entertainment or other official purposes authorized. All expenditures of contingency funds for official representation specifically must be approved before the event by the applicable commander or designee. Such approvals must be of formal record and, at a minimum, indicate the purpose, number of guests, and estimated cost. Payments are made on an SF 1034 and certified or approved by the commander or designee. As an alternative, the commander or designee may submit a properly certified statement with supporting documentation to the disbursing office for preparation and certification of the payment voucher.

C. Emergency and Extraordinary Expenses. The language in the Appropriation Act for contingencies usually reads: "For emergencies and extraordinary expenses, to be expended on the approval of the Secretary of the cognizant Military Service, and payments may be made on their certificate of necessity for confidential military purposes." Use the following procedures for the type of payment indicated:

1. Miscellaneous Current Expense. Payments against miscellaneous current expense funds generally are made on an SF 1034.

2. Intelligence Contingency Funds (ICF). Payments generally are for confidential military purposes and normally are made on a DD Form 281, Voucher for Emergency or Extraordinary Expense Expenditures. Exceptions are processed on other appropriate voucher forms. The original of all vouchers such as DD Form 281, SF 1034, and SF 1080, except for collection and correction vouchers, are returned

to the originator. The original voucher and supporting documents are retained by designated ICF managers.

3. Investigation Expenses. Classified investigation expenses for confidential military purposes are vouchered on a DD Form 281. Expenses for other than confidential military purposes are vouchered on an SF 1034. The vouchers are prepared in original and four copies using the applicable form. All other supporting documents are retained by the originating office.

120223 Cash Awards to Military Members

A. Military personnel may receive cash awards for suggestions, inventions, and scientific achievements as authorized by Military Service regulations.

B. Upon approval of an award, the Executive Secretary of the Suggestion Awards Committee prepares, certifies, and submits an SF 1034 (plus a copy of the Suggestion Award Certificate) to the disbursing office.

C. Upon receipt of the certified SF 1034:

1. The voucher is reviewed for propriety.

2. The payment is made against current funds available from the activity to which the member was assigned at the time the suggestion, invention, or achievement was submitted.

3. Federal income tax withholding is required on all cash awards. The only exception to the requirement for withholding Federal income tax on cash awards is when payment is made to an enlisted member serving in a combat zone.

120224 Payment of Tuition Refunds

A. Sponsors of tuition-paying students attending DoD-operated schools overseas may receive a prorated refund of tuition if they terminate enrollment before the last 20 academic

days of the semester (see DoD Directive 1342.13).

B. The school administrator prepares, certifies, and submits an SF 1034 to the disbursing office for payment. The SF 1034 must include the name of the student, date enrollment was terminated, and the amount authorized for refund.

C. Pay the voucher after reviewing it for propriety and ensuring that related funds are available in deposit fund accounts.

120225 Hospital Accreditation

If required, payment for any part or all of the initial or reaccreditation surveys may be made in advance.

120226 Handling Charges

Contractors may include a handling charge, service charge, or minimum billing charge on orders below a certain value. If these charges are included in the contract, they may be paid (48 Comp Gen 168 (1968)).

120227 Reciprocal Mutual Aid Agreements for Fire Protection

A. Claims for reciprocal mutual aid agreements for fire protection are required by 44 Code of Federal Regulations (CFR) 151 to be submitted to the Administrator, U.S. Fire Administration, Federal Emergency Management Agency (FEMA), Washington DC 20472, by non-DoD fire-fighting organizations. If approved, such claims are paid by the Department of the Treasury, subject to reimbursement by the DoD installation under whose jurisdiction the fire occurred.

B. If the claims affect current funding for fire protection, the FEMA will contact the installation as a part of its claim processing and adjudication procedures. Provide information requested, in coordination with the civil engineer, fire protection unit, and staff judge advocate. Provide complete name and address of the disbursing office, including the Accounting Station Disbursement Number, and an appropriation fund cite for fire protection funding so that

the Treasury Department can bill for reimbursement for approved claims paid.

C. Commit available fire protection funds for the estimated amount of claims, either when notified or when contacted by the FEMA under its claim processing procedures. When the Treasury Department pays such claims on behalf of DoD activities, record an obligation and accrued expenditure for the amount reimbursed to the Treasury Department.

120228 Discrimination Complaints

A. General. Costs incurred in processing discrimination complaints may include travel expenses, attorney fees, investigation expenses, costs of Administrative Judges, and court reporters. Reference, Discrimination Complaints and 5 CFR 1201.37, for administrative and procedural guidance. There is a potential expense of up to \$300,000 compensatory damages liability for claims of intentional discrimination under the Civil Rights Act of 1991.

B. Attorney Fees. In cases involving complaints of discrimination, attorney fees may be awarded pursuant to either a no-fault settlement agreement, an informal adjustment, a decision of the service director of Equal Employment Office (EEO), the Equal Employment Opportunity Commission (EEOC), the Merit Systems Protection Board, an arbitrator, a Federal court, or other appropriate authority. After review and approval of the award letter by the legal counsel, prepare an SF 1034, supported by the award letter and approval, made jointly payable to the complainant and complainant's representative. Requests to make actual payments are initiated by the EEO manager of the legal office. Cite local operating funds current when the employee or employee's representative is notified of the amount payable on the claim for attorney fees and cost. In addition, new rules under 29 CFR 1614 for reinvestigations that became effective on October 1, 1992, may apply.

C. Investigation Expenses. Most complaints are investigated by an investigator assigned to the appellate review agency. The EEO manager arranges for the investigator's visit and submits a claim citing operating funds current at

the time services are requested. If local funds are used for miscellaneous purchases, the chief EEO counselor will initiate a purchase request using current operating funds. An SF 1034 or a DD 1155, approved by the chief EEO manager, will be used to make payment.

D. EEO Administrative Law Judge. An EEO Administrative Law Judge is an official assigned by the EEOC to hold hearings on formal complaints of discrimination and otherwise process individual and class complaints for the EEOC. Expenses associated with these complaints are funded by the activity where the alleged discrimination took place using operating funds current at the time the services are requested. The EEOC will bill this activity for any authorized and required expenses. The chief EEO manager reviews and approves the EEOC billing before payment by the disbursing office.

E. Court Reporter. The chief office of counsel arranges for the services of a court reporter by submitting a request to the DoD Component contracting office. Costs for court reporter services are funded by the activity where the alleged discrimination took place using funds current at the time services are requested. The chief EEO manager reviews and approves the SF 1034 or DD 1155 for payment.

F. Interest payments (when permitted by statute) are to be charged to funds current when the award is made. The rate used is established by the Internal Revenue Service (IRS).

NOTE: This IRS rate is not the same as that used for interest under the Prompt Payment Act.

1203 CREDIT CARDS

120301 Applicability

This section prescribes required financial policy and procedures to process government credit card payments. Government credit cards are issued under a General Services Administration (GSA) firm fixed price requirement contract. The government credit card is officially named the International Merchant Purchase Authorization Card (I.M.P.A.C.).

120302 Policy

A. Documentation. Appropriate documentation will be maintained at all levels to support the integrity of the credit card program and facilitate the reconciliation and payment of credit card transactions. Cardholders will establish clear audit trails for credit card transactions by maintaining documentation to support each purchase (e.g., requisitions, including cross references to any related Blanket Purchase Agreements, telephone and mail order logs, receipt records, charge tickets, and credit slips). The cardholder's monthly Statement of Account (SOA) itemizes each transaction posted against the account through the end of the billing cycle. Each Cardholder shall reconcile and annotate each SOA, as prescribed by local procedures, against supporting documentation. Next, the Cardholder shall sign the SOA and forward it to the Approving Official. The cardholder's annotated and signed SOA constitutes receipt and acceptance of the goods or services for which the account was charged. The Approving Official reviews the itemized charges for each of his or her cardholders and signs each SOA which certifies that purchases were for official requirements. The Approving Official's Business Account Summary (Report R090) summarizes the billing cycle activity for each of their cardholders. The Approving Official reconciles the cardholders' SOAs to the Business Account Summary and makes appropriate annotations and signs the Summary. The annotated and signed Approving Official's Business Account Summary constitutes proof of receipt and legitimacy of goods and services. This Summary serves as a receiving report to support payments.

B. Disputed Credit Card Transactions. If a questionable transaction (e.g., erroneous charge, duplicate transaction, etc.) appears on a cardholder's SOA, the cardholder completes and processes a Cardholder Statement of Questioned Item (CSQI) form according to local procedures. The CSQI form is attached to a copy of the SOA and forwarded to the Approving Official. The Approving Official verifies that the cardholder's disputes are valid and prepares a Notice of Invoice Adjustment (NIA) form which lists each CSQI transaction for which payment should be withheld. The Approving Official attaches the

NIA to the Business Account Summary and forwards it to the disbursing office.

120303 Payment

The I.M.P.A.C. Financial Summary (Report R063) is the official invoice for credit card purchases. For purposes of determining the payment due date and date on which interest will begin to accrue, the invoice shall be paid in compliance with the guidance contained in paragraphs 070201, 070301, 070302, and 070307. Payment is due 30 days after receipt of the invoice in the designated billing office.

120304 Responsibilities of the Disbursing office

A. The disbursing office will receive an annotated and signed copy of each Approving Official's Business Account Summary. The summarized charges are included on the official invoice along with the applicable NIAs. Cardholders' SOAs, signed by both the cardholder and the Approving Official and supporting documentation, will be maintained by the cardholders or by their Approving Officials. If annotations on the cardholder's SOAs are required to process the I.M.P.A.C. invoice, local procedures may require a photocopy of the cardholder's SOAs to be attached to the Approving Official's Business Account Summary and forwarded to the disbursing office.

B. The disbursing office will ensure that only transactions which have been certified for payments by the Approving Officials are processed for payment. Valid disputed transactions, for which NIA forms have been received, will be deducted from the official invoice. The NIA form must accompany payment to the credit card contractor in order that the total official invoice amount is accounted for. In mathematical terms, the payment amount is the net of the current charges minus any current credits and disputed items plus any prior disputed items approved for payment.

CHAPTER 13

TRANSPORTATION PAYMENTS FOR FREIGHT AND PERSONAL PROPERTY1301 RESPONSIBILITIES130101 Title 41, Code of Federal Regulations, Public Contracts and Property Management

A. This chapter outlines the responsibilities, entitlements, and special procedures for payment of transportation documents, including government bills of lading (GBL), transportation requests (TR), and transportation warrants. General policies for the use of military-owned transportation facilities and the acquisition of transportation services from commercial companies for movement of freight, personal property, and passengers are in the Title 41, Code of Federal Regulations (CFR), DoD 4500.34-R, Personal Property Traffic Management Regulation, and DoD 4515.13-R, DoD Air Transportation Eligibility Regulation. In paragraphs 130101-B, C, and D, three managers are cited for transportation. This is one for each of the Military Departments. However, the major transportation functions of all three Departments are under the umbrella of the United States Transportation Command.

B. The Secretary of Defense has designated the Secretary of the Army as the Single Manager Operating Agency for military traffic, land transportation, and common-user ocean terminals. The Secretary of the Army has established the Military Traffic Management Command (MTMC) as the Executive Director of the Single Manager Operating Agency for all transportation for DoD Components, except ocean and airlift services. The Air Mobility Command shall monitor and manage the procurement by charter or short term contract (90 days or less) of airlift services within the Continental United States (CONUS), and MTMC shall maintain data concerning the use of such service.

C. The Secretary of the Air Force is designated as the Single Manager Operating

Agency for Airlift Service. The Air Mobility Command (AMC) is designated as the Executive Director of the Single Manager Operating Agency for Airlift Service. The AMC must procure all long-term (in excess of 90 days) contract airlift service within CONUS and shall procure by contract or otherwise, all commercial contract airlift service between CONUS and overseas areas, within and between overseas areas, and shall maintain data concerning such service.

D. The Secretary of the Navy is designated as the Single Manager Operating Agency for Sealift service. The Military Sealift Command (MSC) is designated as the Executive Director of the Single Manager Operating Agency for Sealift Service. The MSC shall monitor and manage all sealift service and shall maintain data concerning such service.

E. Installation Transportation Officers procure transportation and related accessorial or special services. They are appointed and act in accordance with DoD 4500.34-R. They arrange to transport or store military goods, privately owned household goods, baggage, mobile homes, and other items entitled to be transported or stored at government expense. They also arrange to move military and civilian personnel under orders authorizing transportation at government expense.

130102 Rates Governing Transportation

Pay the full applicable commercial rates, fares, or charges for transportation by any common carrier of any persons or property for the United States, or in its behalf. However, pay a lesser rate if permitted under the contract or agreement between the government and the carriers, or unilateral offers from carriers.

130103 Transportation Payments

A. Pay proper bills or claims from carriers and forwarders within 30 days after they reach the designated billing office (CFR 101-41.401.e), as the prompt payment interest clock starts when the bill reaches the billing office. These payments are under the Prompt Payment Act (PPA) and interest is due if they are late. Transportation bills must be certified by the carrier that the shipment has been delivered in good order and condition. See Chapter 7 of this volume for PPA information.

B. The following carrier bills should not be paid in advance of completion of such services (CFR 101-41.402-1).

1. An assignee bank or financial institution under the authority of 41 U.S.C. 15.

2. Payees who are in bankruptcy proceedings or are subject to the control of a receiver, trustee, or other similar representative.

3. Payees who consistently fail to refund overcharges without valid reasons when notified by the GSA or any other Federal agency.

4. Payees who, without good cause, are slow to settle loss or damage or other claims.

5. Payees who owe substantial sums of money to the U.S. Government for which no adequate settlement arrangements have been made.

6. Payees in such bad financial condition that the government's best interests require special payment rules for their accounts.

7. Payees who do business with the U.S. Government infrequently and who have not previously been administratively approved for payment.

8. Any other person or business organization administratively determined ineligible for valid reasons.

9. If the General Services

Administration (GSA) does not object and the facts show that the U.S. Government's best interests are not jeopardized, make payments 30 days after the transportation officer receives the bill. The transportation officer must evaluate and approve each carrier or forwarder's performance to make this decision.

130104 Correct Rates and Overpayment

A. Statutory Provisions. No finance or certifying officer will be held liable for over payments made for transportation furnished on GBLs or TRs when the overpayment results from improper transportation rates, classifications, or from failure to deduct the proper amount (31 U.S.C. 3322 and 31 U.S.C. 3528).

B. Prepayment Audit. Public Law 99-627 dated November 7, 1986, amended 31 U.S.C. 3726 to permit prepayment audit of selected centrally paid transportation bills. The GSA was delegated the authority to perform these audits and further delegate that authority to other Federal Agencies, if the Administrator of the GSA determines that such a delegation would be cost-effective or otherwise in the best interest of the public.

1. The GSA has delegated that authority to the following DoD activities:

a. Defense Finance and Accounting Service-Indianapolis Center.

b. Navy Material Transportation Office, Norfolk, Virginia.

c. Transportation Voucher Certification Branch; Marine Corps Logistics Base; Albany, Georgia.

d. Headquarters, Military Traffic Management Command at Falls Church, Virginia and its Area Commands at Bayonne, New Jersey and Oakland, California.

2. Authority delegated in accordance with 41 CFR 101-41.103 is subject to complete oversight by the GSA. This oversight and test of accuracy will be made through the post-payment audit process and through on-site

inspections. In order to assist in this process, prepayment audit activities or contractors are required to stamp each bill so audited with a certification substantially as follows:

"I certify that this bill was audited and certified for payment in the amount of \$_____."

3. The stamp will indicate both the name of the audit activity and the name of the contractor involved, if contracted, and initialed and dated by the auditor. Paid bills that were subject to prepayment audit must be forwarded under separate cover to the GSA, ATTN: FWA (Code PA), Washington, DC 20405.

4. Carrier claims disputing the prepayment audit will be adjudicated by the auditing activity or contractor within 30 days of receipt of the claim. If all or a portion of a claim is not approved, the activity shall issue a written final decision setting forth its position and the rationale therefore. Carriers who are dissatisfied with the activity's or contractor's final decision may appeal the decision to the GSA.

C. Post-Payment Audit. Carrier's (GBL) bill and supporting documents that represent payments made by agency disbursing officers for freight and passenger transportation services shall be forwarded to the GSA, ATTN: BWAA-C, Washington, DC 20405, for audit (CFR 101-41.502.a). The GSA checks the carrier's rates for correctness during this audit and takes appropriate action if improper rates were used.

D. Collection of Overpayment. When instructed to do so by the GSA, the disbursing office will deduct the amount due the United States from an unpaid carrier's bill. Inform the GSA if you do not have, and are not likely to have, a subsequent voucher to collect an overpayment. The GSA then handles it as a U.S. claim against the payee.

E. Payments Subject to Review. Pay carriers their invoiced amount for personal property transportation on GBLs, including contract services for local drayage, storage, packing, etc. This includes the excess of the authorized weight allowance, whether any reimbursement has been

or is to be collected for the excess. However, the authority to pay carriers their billed amount does not keep the GSA from deciding that the finance or certifying officer is pecuniarily responsible for failing to collect the overpayment.

F. Certification and Excess Cost. When a service member ships personal property on a GBL as part of a permanent change of station (PCS), the carrier is entitled to payment prior to GSA audit or settlement. The certifying officer will not be held financially liable for these payments, even though the service member is liable for a portion due to excess weight.

G. Overpayment Resulting from Contractor Overcharges. Should an overpayment be made to a transportation company as the result of overcharges they made to a cost-plus-fixed-fee contractor who, in turn, has been reimbursed by the government, the GSA will send notices of such overpayment to the Director, Defense Finance and Accounting Service-Indianapolis Center (DFAS-IN), ATTN: DFAS-IN-TGB, Indianapolis, IN 46249-0621. The DFAS-IN makes deductions from subsequent carrier bills and informs both the GSA and the carrier. The correctness of the original deductions is then settled between the carrier and the GSA. Refer all questions from carriers concerning the correctness of the original deductions to the GSA, ATTN: BWAA/C, 18th and F Streets, NW, Washington, DC 20405.

130105 Payments Made by DFAS-IN Directorate for Transportation Payments

For transportation payments involving ocean movement, see paragraph 130110 of this volume. The DFAS-IN makes payments on transportation, not involving ocean movement, as follows.

A. GBLs and TRs. Except as provided in paragraphs 130105 through 130108, the DFAS-IN Directorate for Transportation Payments pays all transportation accounts for Departments of the Army, Air Force, Navy, Marine Corps, Defense Logistics Agency (DLA), and the Office of the Secretary of Defense for service within CONUS. This includes combination land and water movements using through

rates and through GBLs via coastal and intercoastal routes. The term "GBLs," as used here, means SF 1103, U.S. Government Transit Bill of Lading, original, unless otherwise specified, and DD 1131, Cash Collection Voucher. GBLs must be sent to the Director, DFAS-IN, ATTN: DFAS-IN-TGB, Indianapolis, IN 46249-0611, for payment. See paragraph 130108 concerning payments made by designated disbursing offices outside CONUS.

B. Transportation to or from the United States and Within Designated Overseas Areas. The DFAS-IN Directorate for Transportation Payments pays the following transportation services.

1. From, to, and within Alaska and Canada.

2. From and to Mexico border points by surface transportation.

3. From and to points in Mexico by air, including combination land and ocean movements under through rates and through GBLs.

4. Air transportation service from or to a foreign country, when billed in U.S. currency and procured with the documents indicated here.

5. Transportation services within or between foreign countries when the services are procured on an SF 1169, U.S. Government Transportation Request, or a GBL from a U.S. flag carrier and charges are payable in U.S. currency. See paragraph 130108 concerning payments to be made by designated disbursing offices outside CONUS.

6. Miscellaneous charges such as demurrage, storing, icing, salting, re-weighing, switching, drayage, hauling, and so forth, in shipments under GBLs issued in paragraph 130105-A. These bills cover services incident to the line-haul carrier station-to-station movement. They include necessary service to make delivery at consignee's place of business that, if performed by the line-haul carrier at consignee's request, results in an additional charge directly

related to the bill of lading charge.

C. Household Goods (HHG) Shipments. Basic rules for determining military and civilian personnel entitlement to move personal property (household goods and unaccompanied baggage) at U.S. Government expense, including privately owned vehicles and mobile homes are in the JTR and the JFTR. When personal property is shipped by commercial carrier, use GBLs, where acceptable, to buy the required services. When civilian employees are being reimbursed for shipments using the commuted rate method, do not use a GBL.

D. Invoices Stated in Canadian Dollars. CONUS finance offices that receive transportation invoices stated in Canadian dollars and payable from appropriated funds must send them with related contracts to the Director, DFAS-IN, Dept 3400, 8899 East 56th Street, Indianapolis, IN 46249-3400, for payment.

E. Government Travel System bills for the Military Entrance Processing Command.

130106 Local Payments

A. Miscellaneous charges on shipments on commercial bills of lading. The local disbursing office pays, without purchase order, bills for miscellaneous charges (such as storage, reweighing, local drayage, hauling, etc.) on:

1. Shipments under prepaid commercial bills of lading.

2. Shipments when no line-haul GBL is involved.

3. Delivery charges when services are performed by other than the GBL line-haul carrier or carrier's agent. See paragraphs 130107 and 130108.

B. U.S. Army, Europe (USAREUR) payments. In USAREUR, the 266th Finance Command (FC) is designated as the local Commercial Accounts Payable office to pay this type service. The 266th FC collects all excess weight charges to move HHG in the USAREUR area of responsibility. This includes all HHG

movements from, to, and within the USAREUR area via transportation services procured with approved commercial line-haul rate and service tenders and local drayage service contracts. The 266th FC payments will not include any portion of services rendered through GBL carrier movements between CONUS and foreign countries.

C. Local expenses incident to travel. The disbursing office, at or near the headquarters of the transportation officer in whose area the travel originated, will make payments for toll bridge, ferry, or highway charges.

D. Local Payment of Airlines or Government Travel System. The disbursing office at the installation on which the travel agency that handled the transaction is located, or the accounts payable office at the installation which uses teleticketing equipment to get airline passenger tickets, will make local payments for airline, rail, and bus passenger service.

130107 Payments by Designated Disbursing offices Outside CONUS

The designated disbursing office in the country where the movement originates will pay Departments of the Army, Navy and Air Force, DLA, and Office of the Secretary of Defense local bills of lading and TRs for services within or between countries outside the United States (including Hawaii). For instructions regarding payments to be made in foreign currencies, see paragraph 130109. See paragraphs 130110 and 130111 respectively for instructions about payments by the Military Sealift Command and civil function disbursing offices of the U.S. Army Corps of Engineers.

130108 Offices Designated to Make Payments

The offices designated for making overseas payments for non-ocean cargo movement are:

A. Europe. The disbursing office designated in the local bills of lading or TRs pays for all transportation services for their parent command except the following:

1. The 26 AFS/RAFFP, Unit 1017,

Box 585, APO AE 09094-5585, pays all bills for internal commercial transportation services furnished in Spain.

2. The 26 AFS/RAFFP, Unit 1017, Box 585, APO AE 09094-5585, pays all bills for internal commercial transportation services furnished in the United Kingdom and Norway.

3. The Defense Accounting Office (DAO), Incirlik AB, Building 480, Unit 7055, Box 155, APO 09824-5260, pays all bills for internal commercial transportation services furnished in Turkey.

4. The DAO, 7206 ABG/FMF, APO New York AE 09840, pays all billings for internal commercial transportation services furnished in Greece and Crete.

5. The DAO, Mid East/Africa Project Office, U.S. Army Corps of Engineers, P.O. Box 2250, Winchester, VA 22601-1450, pays all transportation accounts for Saudi Arabia, Egypt, Jordan, Oman, and Kuwait.

B. Hawaii. The DAO designated by the DoD Component to serve the local area pays transportation accounts for Hawaii.

C. The 175th Finance Command, ATTN: Commercial Accounts Branch, APO San Francisco AP 96205, pays all billings for internal commercial transportation services furnished within the Republic of Korea.

D. Japan:

1. The 69th Finance Battalion, Headquarters, U.S. Army, Japan, APO San Francisco 96343, pays all billings for commercial transportation services, other than local bills of lading, for mainland Japan and Okinawa. Specific services are HHG transportation charges, container rental costs, and bus service performed in Japan and paid in Japan to Japanese contractors.

2. The DAO, 475th ABW, ADSN 668800, APO San Francisco 96328, pays all billings for local bills of lading for foreign-to-foreign travel or shipments in Japan. Specific services

are for rail express shipments, line-haul local bills of lading, packing and crating charges, Japanese National Railway meal tickets, commercial taxi charges, and accessorial service charges.

130109 Foreign Currency Payments

If foreign currency is specified, the commander of the area where the currency is indigenous designates the disbursing office to make settlement. When the travel or transportation movement covered by a local bill of lading or TR originates, terminates, or transits countries in which U.S.-owned foreign currencies are excess or near excess to the foreseeable U.S. Government needs, the excess foreign currency is used as much as possible for payments. In the absence of a DoD disbursing office, payments in foreign currencies are made by routing the billing documents to the appropriate U.S. embassy. If payment is specified in Canadian dollars, the DFAS-Indianapolis Center will settle the account. (See paragraph 130105-D.)

130110 Military Sealift Command (MSC) Payments

A. The MSC disbursing officer serving the area in which the shipment originates pays GBLs, shipping agreements, and contracts for all DoD-sponsored ocean cargo movements, regardless of the DoD Component, except for Army and Air Force Exchange Service cargo.

B. The payment of canal tolls by the disbursing officer of an individual ship is authorized. In most instances, local area commander's instructions or fleet directives, as in the case of the Suez Canal, take precedence and preclude the disbursing officer from making such payments. When a ship is required to make payment, it will be made immediately upon leaving the canal or as soon afterward as the responsible canal commission presents its bills for payment. No payment will be made by the disbursing officer of a ship for passage through the Panama Canal.

130111 U.S. Army Corps of Engineers (USACE) Payments

The USACE finance officer, specially designated by FSN to settle the accounts of the specific project, pays transportation accounts payable from U.S. civil funds (Departmental Code 96).

1302 GOVERNMENT BILLS OF LADING, TRANSPORTATION REQUESTS AND TRANSPORTATION WARRANTS

130201 Government Bills of Lading Payments

A. Original Document. Pay transportation charges 30 days after the original completed GBL reaches the designated billing office. A carrier certification at the bottom of the document must be completed. Do not make payments on other copies except as provided in paragraph 130201-B.

B. Loss of Original Document. When the original GBL has been lost, make payment on the original SF 1105, U.S. Government Freight Waybill, certified on the reverse by the issuing transportation officer. The reverse must have a properly executed delivery certificate identical to that on the face of the original bill of lading. If the original freight waybill also is lost, make payment on a certified true copy of the issuing office's memorandum copy of the SF 1103. The form must be properly certified on the reverse by both the shipper and the carrier.

130202 Notations Required on Government Bills of Lading

A. General. Pay GBLs only when they have prescribed notations and supporting papers.

B. Notification of Improper Preparation. If GBLs do not have the prescribed notation, have incomplete or incorrect notations, or do not have the correct supporting papers, notify the appropriate transportation officer. If no response is received from the transportation officer, inform one of the MTMC regional offices: MTMC Eastern Area, ATTN: MTEOP, Military Ocean Terminal, Bayonne, NJ 07002-5302 or MTMC Western Area, ATTN: MTWOP, Oakland Army Base, Oakland, CA 94626-5000.

130203 Government Bill of Lading Carrier Billing

Carriers must use an original SF 1113, Public Voucher for Transportation Charges, to bill for transportation charges furnished in response to an SF 1103 or SF 1169. The Department of the Army does not stock the SF 1113. Carriers must buy the form from the GSA Regional Center located in their geographical area. Computer generated forms are acceptable, if they have been approved by the GSA.

130204 Appropriations or Funds Chargeable to Transportation Supplies

A. When title to property has passed to the U.S. Government, transportation charges for material shipped from one U.S. Government installation to another are not considered part of the contract expense in buying the material. These charges, known as Second Destination Transportation charges, are an independent obligation arising under the transportation service contract. These expenses are charged to the appropriation current at the time the transportation was performed. If supplies are damaged in shipment, the installation which shipped the merchandise pays for the repairs.

B. Base Exchange Supplies. Charge payments for transporting supplies for Army and Air Force Exchange Service exchanges to the U.S. Army and U.S. Air Force Exchange Fund.

C. Procurement and delivery in different fiscal years. When supplies are bought for use at a distant station but are to be delivered to the U.S. Government free-on-board (FOB) at the place of manufacture, and their transportation is not ordered nor accomplished until the next fiscal year, the transportation contract is separate from the purchase contract. Accordingly, charge the transportation cost to the funds that are current when the service is performed.

130205 Savings in Government Bill of Lading Freight Charges

Shipment to the designated destination from a point nearer than the FOB point does not entitle the contractor to the savings in freight

charges over what the U.S. Government would have paid if shipment had been from the FOB point. This is true even though the supplies cost the contractor more at the shipping point than they would have cost at the FOB point.

130206 Premium Government Bills of Lading Transportation

When the contractor requests premium transportation at a greater cost than the lowest available to the U.S. Government, and the contractor has agreed in writing to reimburse the U.S. Government for the excess costs, the origin transportation officer will inform the disbursing office by letter. The letter must cite, in addition to the cause for the excess costs, the number of GBLs involved and the name and address of the contractor requesting the premium transportation. The original request from the contractor for premium transportation must be attached to the letter. The office that pays the carrier for the transportation charges computes the excess cost and takes collection action.

130207 General Services Administration (GSA) Claims

When a contract requires the contractor to deliver at an FOB point and allows the U.S. Government to direct delivery to other points, with an increase or decrease in the amount and cost of the freight, do not make the adjustment if the contractor refuses to accept payment on the usual basis. If the contractor contends that transportation expenses have been paid, which the U.S. Government was obligated to pay, or that the deduction made from freight paid by the U.S. Government is excessive, send the case to the GSA, ATTN: BWAA-C, Washington, DC 20405, for direct settlement as a claim.

130208 Payment Procedures for Government Transportation Requests

A. Notations required on transportation requests (TRs)

1. Make payment only when the TR has the proper notations and the correct supporting papers are attached.

2. When TRs do not have the prescribed notations, have incomplete or incorrect notations, or lack the required documents, notify the MTMC, ATTN: OP-Q, Washington, DC 20315.

B. Improperly Furnished Transportation. If it appears that the issuing officer improperly furnished transportation, the disbursing office pays the carrier or contractor for the service actually rendered. After payment, the disbursing office personnel will ask the issuing officer for the authority upon which such transportation were furnished.

C. Personal Documents Lost or Destroyed. If passengers lose or destroy their SF 1169, they should buy necessary transportation with personal funds or be issued a cost-charge SF 1169 in order to complete the mission. Passengers may then file a claim for reimbursement.

D. Requests to MTMC. Installation disbursing offices send all requests about passenger rate quotations to the MTMC, ATTN: MTOP-TMP, Falls Church, VA 22041-5050. Forward all requests for claims information to the MTMC, ATTN: MTOP-Q, Falls Church, VA 22041-5050.

130209 Refunds on Overpayment of Transportation Costs

A. Checks received for refunds on tickets acquired under a TR issued to a Commercial Travel Office or other authorized travel agents are processed locally as a collection.

B. Checks received as refunds on other TRs or GBLs are coordinated with the travel office and forwarded by cover letter without deposit action by the disbursing office with all the pertinent information or documents to the DFAS-IN Directorate for Transportation Payments. If the payee of the check is the local transportation management office or the local disbursing office, the designated office must deposit the check. A cross disbursement would be processed to pass the credit to the DFAS-IN. In addition, if the transportation cost were purchased under the Government Transportation System, the refund must be sent to the credit

card contractor.

130210 Transportation Warrants

A. The Department has authorized the issuance of Military Emergency Travel Warrant (METW) during any mobilization of the Individual Ready Reserve, certain retired military members, standby reserve and, when practicable, Individual Mobilization Augmentees for active duty in the Armed Forces under Title 10, United States Code. The METW may be issued in automated form as part of a mobilization order processed by a public communications carrier or as a pre-printed form DD Form 2399 through direct mail with an accompanying order from the respective Military Service. The carrier will be instructed to forward its billings and a copy of the warrant, signed by the traveler, to the DFAS-IN Directorate for Transportation Payments.

B. The GSA has authorized overseas activities to use transportation warrants within their host country. The forms for these warrants are developed by the overseas activity and payments are made by their designated disbursing office.

CHAPTER 14

TRANSPORTATION PAYMENTS OTHER THAN FREIGHT AND PERSONAL PROPERTY1401 GENERAL TRANSPORTATION PROCEDURES AND PAYMENTS140101 General

This chapter outlines payment procedures for transportation services which do not involve freight carriers.

140102 Postal Charges

A. If a contractor is directed by a contracting officer to ship free on board (FOB) origin via parcel post, postal charges are reimbursable. The contractor should list this expense as a separate item on the invoice. Charges are included in accounting records as a part of the cost of material. See paragraph 140104 for reimbursement of postal costs prepaid by the contractor.

B. When postal insurance is paid in good faith, reimbursement is authorized by 17 Comp Gen 325 (1937). This applies only to articles purchased FOB from the contractor's shipping point when such contractor has not been advised that package should not be insured.

140103 En Route Expenses (Drive-Away Carrier)

DoD vehicles may be moved by drive-away carrier service. Authorized en route expenses may be incurred for which the carrier is not liable. Shipping transportation officers (TO) have the authority to certify the expenditure of funds up to but not to exceed \$150. Carriers are authorized to incur necessary en route repairs not to exceed \$50, when specified on bill of lading. When estimated repair costs exceed \$50, carrier obtains instructions from the issuing TO. The carrier invoices these costs to the TO at the intended destination. The invoice must include complete reference to the bill of lading, the carrier bill number under which the

vehicles were moved, and the authorization to repair. Receipted repair bills and a letter explaining the reason for vehicle repair are required to support payment of the invoice.

140104 Allowable Prepaid Transportation

A. Contractor prepaid transportation is any type of transportation amount authorized in the contract by the contracting officer which is to be prepaid at free on board (FOB) origin by the contractor for reimbursement on the contractor's invoice. Included are the contractor's prepayment of commercial bills of lading, postal, shipments, and shipments by small package or other carriers.

1. Contracting officers rely on the traffic management officer for transportation management assistance and advice. Contracting officers should be aware of all contract costs affecting a contract or order. These include costs that will be charged under a contract for contractor prepaid transportation. Authorization of prepaid freight by the contracting officer presumes a known or estimated cost, a known or estimated cost savings, or a known advantage of using contractor prepaid transportation in place of a GBL or FOB destination shipping.

2. Reimbursement to a contractor for prepaid freight covers the cost of transporting the material being shipped from the designated FOB origin point to the designated destination(s). The contractor is authorized by the contracting officer to pay transportation on behalf of the government. The contractor pays for shipping on a commercial bill of lading, other commercial form, or through the postal system. The contractor bills the DoD Component for the cost of the transportation. This billing is shown as a line item on the contractor's invoice and is supported by a receipt as specified in paragraph 140105.

3. Contractor prepaid transportation is not authorized within overseas areas. A contractor, however, may be reimbursed for prepaid transportation within the U.S. to a stateside port of embarkation for further shipping by government means to the overseas area.

4. GSA audits cost-reimbursement contractor prepaid freight charges. Title 41, Code of Federal Regulations (CFR), 101-41.807-4, requests Federal agencies to require contractor to send copies of cost-reimbursement contract paid freight bills to the GSA for audit. Contracting officers require contractors to submit copies of paid freight bills to the GSA as required by the Defense Federal Acquisition Regulation Supplement. The GSA collects excess freight costs from the carrier after audit.

5. GSA does not audit fixed-priced contractor prepaid freight charges. There is no GSA requirement for Federal agencies to require contractors to send copies of fixed-priced prepaid freight bills to the GSA for audit.

6. Contractor prepaid freight costs are obligated as a cost of the contract.

7. Contractor prepaid transportation cannot exceed 150 pounds of weight by commercial air or 1,000 pounds by other commercial carriers. (See FAR 42.1403-2(a)). If these weights are exceeded, the contract must contain language which will allow reimbursement to the contractor.

8. Premium contractor prepaid transportation must be authorized by the contracting officer.

B. Reimbursement policy for cost-reimbursement contracts. Reimburse the cost presented in accordance with the terms of the contract provided the receipt requirements of paragraph 140105 are met.

C. Reimbursement policy for fixed-priced contracts. Reimburse the cost presented in accordance with the following:

1. A prepaid transportation cost, regardless of the amount, that covers the amount

presented for reimbursement must be stated in the contract.

2. Receipt requirements of paragraph 140105 have been met.

140105 Receipt Requirements

A. Reimbursement to contractors for freight charges of \$25 or less may be made without a receipt.

B. A contracts clause should be included requiring a freight receipt when freight charges are over \$25. This requirement is applicable regardless of the mode of transportation used. However, if the contract language disagrees with the \$25 figure, pay in accordance with the receipt requirements stated in the contract. If the contract does not require a receipt and the transportation charges is greater than \$25, any charge over \$25 requires a receipt from the contractor before reimbursement is made.

1. Receipts are required to substantiate a contractor's claim for reimbursement.

2. Contractors should support prepaid transportation charges with evidence of payment to the carrier. Evidence of payment is a receipted freight bill or commercial bill of lading (CBL) stamped or marked "To Be Prepaid" showing the charges receipted for by the carrier. If this is not present, the CBL must bear a notation of the contractor's check number and the date paid.

C. Contractors directed to prepay freight may maintain charge accounts with companies specializing in delivery of small parcels. These companies usually offer daily pickup service and limit the size of parcels accepted. They base charges on weight and zone-rate charges published by the carrier.

1. If a receipted freight bill is not available, the contractor can provide other support for the claim for reimbursement of freight charges. The contractor should furnish a copy of the transportation company's pickup record or a copy of the contractor's internal business docu-

ment showing the contractor turned over the material to a particular shipper.

2. The contractor then must support either of these documents with a copy of the transportation company's invoice. Additionally, the contractor must provide a statement that the charges have been paid.

D. Claims for Other Than Actual Prepaid Transportation Cost. This covers prepaid transportation cost (constructive transportation cost) which is not the actual amount expended by the contractor but represents a constructive cost not more than the cost that would have been incurred under contract shipping instructions. In these instances, invoices must be supported as follows.

1. Example A. More units than a DoD activity ordered are shipped by the contractor under one CBL to a central point for contractor distribution to the DoD activity and other consignees. Support this with a photostatic or comparable copy of the freight bill covering the entire shipment. This supports the prorata portion of the total charges prepaid on any single unit shipped.

2. Example B. Premium transportation is used for contractor convenience and reimbursement claim is limited to the crated rate for regular surface transportation. The contractor must:

a. Support this with a photostatic or comparable copy of the paid freight bill by the method actually used for shipment.

b. Provide a full explanation as to how the charges to the Department were computed, including the name of the carrier that would have been used had the shipment moved by regular surface transportation, the crating weight of the shipment and the rate per 100 pounds (or other comparable unit of measurement) in a way that permits computation of the charges that would have been incurred had the shipment moved by regular surface transportation.

3. Contractors Using Their Own

Transportation Equipment. If a contractor makes delivery of shipment using transportation equipment wholly owned and operated by the contractor, a receipted paid freight bill is not required provided the charges:

a. Are based on prevailing commercial freight rates and do not exceed the costs of comparable GBL or CBL shipments as determined by paragraph 140104.

b. Are separately identified on the contractor's invoice.

140106 Freight Charges Liability

A. Maximum government liability for freight charges under a material contract is fixed by the FOB point. Liability cannot be greater than cost actually incurred. Transportation costs are included in contracts for material delivered FOB destination and should not be paid.

B. Excessive Freight Charges. Freight costs incurred by a contractor that exceed costs from the FOB point specified in the contract are not reimbursable (3 Comp Gen 56 (1923) and 18 Comp Gen 953 (1939)).

C. Increased Freight Charge Liability

1. Change of shipping point for convenience of the contractor from the FOB point named on the contract does not increase the government liability for freight costs. The government is not obligated for increased freight costs even though the destination point was undetermined at the time of issuance of the change order (28 Comp Gen 653 (1949)).

2. Where the original contract was FOB origin, and the TO changes the destination point, the government is held liable for all excess freight cost.

3. If the contractor changes the shipping point, thereby increasing the freight costs, the contractor is liable for these increased freight costs (9 Comp Gen 368 (1930)).

4. Excess freight charges are determined by the contracting officer or the local

TO and any prescribed adjustments are made by the disbursing office making contract payments.

5. Excess transportation charges are to be paid by the contractor.

6. The GSA, in its applicable commercial account, acts to reclaim excess transportation costs from contractors.

7. When a contractor prepays a shipment in error, payment of shipment charges may be made to the contractor after receipt of contract modification. The payment may not exceed the cost which would have been incurred by the government. Normally, the prepaid freight receipt is attached to the voucher. See paragraph 140105 for exceptions.

8. Any premium transportation (overnight delivery, first class mail, air freight, etc.) to be paid by the government must be authorized by the contracting officer.

9. Premium transportation for the medical fund authorized on Defense Personnel Support Center decentralized blanket purchase agreements is paid from operating funds. Authorized contractor prepaid premium transportation is reimbursed on FOB origin contracts (FAR 47.304-1g (4)) under the procedures in paragraph 140104.

140107 Payment Procedures for DD Form 652 (Meal Ticket)

A. Paying DD Forms 652. The contractor submits the original meal ticket(s), DD Form 652, attached to an invoice. Payment will be made using an SF 1034. Payment cannot exceed the number of meals nor the price set forth on each meal ticket. Each meal ticket is shown on the SF 1034. Before payment, check the meal ticket for a properly completed contractor's certification and ensure that it agrees with the certification made by the Service member who received the meal or the Service member in charge of the party. Anyone who alters a meal ticket after it has been issued must initial and date the alteration. Charge the appropriation and allotment cited on the meal ticket with the payment amount. Do not require copies of

travel orders. If more than one meal ticket is billed, it is not necessary for the contractor to complete the certificate on each meal ticket if the numbers of all the DD Forms 652 are listed. In such cases, the contractor should type and sign a certification statement and attach it to the invoice. These payments are due 30 days after they reach the disbursing office. Interest is due on late payments. Report these transactions on the PPA report as subject to PPA.

B. Lost or Destroyed DD Forms 652. When a contractor loses or inadvertently destroys a meal ticket and the facts establishing that the service was furnished are clear, the issuing officer prepares and issues a certified true copy of the original from the retained duplicate copy. The contractor uses this certified true copy to bill the DFAS-IN Directorate of Transportation Payments.

1402 GENERAL ACCOUNTING OFFICE

140201 Adjustments by the General Accounting Office (GAO)

A contract may specify that the contractor will deliver at a designated FOB point, but with a provision that the government may direct delivery to be made at other points. When deliveries are made at points other than the designated FOB point, an adjustment in the contract price will be made that corresponds to the resulting increase or decrease in the amount of freight charges. However, the disbursing office should not make an adjustment on the amount of the freight charges if deliveries are made to places other than the FOB point. The disbursing office should not make an adjustment to freight charges when a contractor contends that it paid transportation expenses which the government was obligated to pay. The disbursing office cannot deduct for potential excessive freight charges paid by the government. Such adjustments must be submitted to the respective DFAS Center legal counsel for referral to the GAO for direct settlement as claims (8 Comp Gen 500 (1929) as distinguished by Comp Gen Decision B-17178, June 9, 1941).

CHAPTER 15

NONTEMPORARY STORAGE AND LOCAL DRAYAGE OF HOUSEHOLD GOODS1501 NONTEMPORARY STORAGE OF HOUSEHOLD GOODS150101 General

Nontemporary storage (NOTEMPS) of household goods at Government expense is authorized by the JFTR, Volume 1, paragraph U5380, and the JTR, Volume 2, paragraph C8001.

150102 Traffic Management Officer (TMO) Responsibility

Under the NOTEMPS of household goods system, the TMO will:

- A. Document services performed.
- B. Determine entitlement pertaining to beginning and ending periods of storage and excess weights.
- C. Certify that services have been performed.
- D. Verify with the chief, family housing management office or billeting office, regarding storage of household goods incident to assignment of government quarters and provides the disbursing office with special orders, invoices, etc., to support these entitlements for payment.

150103 Voucher Preparation

After receiving the verified and certified invoices with supporting documents from the ordering officer, the disbursing office prepares, approves, and certifies the SF 1034 for payment.

150104 Payments

- A. Invoices for Basic Agreement Services for Handling Cost for Storage of House-

hold Goods (HHGs).

- 1. The following documents are received from the TMO to support payment.

- a. Original and two copies of the invoice containing a certificate of performance signed by both the contractor and ordering officer.

- b. Original and one copy of a DD Form 1164, Service Order for Personal Property.

- c. Original and one copy of a DD Form 1299, Application for Shipment and/or Storage of Personal Property.

- d. Two copies of any special orders or other authority.

- 2. The DD Forms 1164 and 1299 and a copy of the orders generally are attached to the original voucher and another complete set of these three items are attached to the retained voucher. The Transportation Office keeps copies of these forms that support further quarterly billings and support handling cost for removal of HHGs from storage.

B. Quarterly Storage Invoices

- 1. The TMO provides the original plus two copies of the certified consolidated invoice to support the payment voucher.

- 2. Attach the original invoice to the original voucher. Attach a copy of the invoice to the retained voucher copy.

- 3. Spot check selected groups of individual charges on the invoice back to the storage of HHGs documentation to make sure the charges are valid.

C. Invoices for Basic Agreement Services for Handling Cost for Removal of HHGs from Storage

1. The following documents are received from the TMO:

a. Original and two copies of the invoice.

b. Original and one copy of the DD Form 1164.

c. Two copies of any special orders or other authority.

2. Original Voucher. Attach the original of the invoice, original of the DD Form 1164 in retained file, original of the DD Form 1164 received with storage of HHGs, original of the DD Form 1299 in retained file, copy of special orders in retained file, and copy of special orders received with removal from storage of HHGs invoice.

3. Retained Voucher. Attach a copy of the invoice for removal from storage of HHGs, a copy of the DD Form 1164 in the retained file, a copy of the DD Form 1164 retained with removal from storage of HHGs invoice, a copy of the DD Form 1299 in the retained file, a copy of orders in the retained file and a copy of orders received with removal from storage invoice.

4. Paid Voucher. Send a copy of the paid removal from storage voucher to the ordering officer.

1502 NONTEMPORARY STORAGE

150201 Nontemporary Storage with Occupancy of Government or Government Controlled Quarters

A. Orders for NOTEMPS of Personal Property. The housing office issues assignment and reassignment orders for movement of member's personal property placed in nontemporary storage incident to an assignment to or between government or government-controlled quarters. The housing office issues a Drayage/Storage

Authorization-Government Quarters form with the orders. See paragraph 150501 for local drayage connected to these types of moves.

B. NOTEMPS Invoices. Invoices for NOTEMPS storage are provided by the TMO and signed by the contractor and the TMO. The TMO also furnishes an accounting classification summary list with the invoices. This list provides accounting classification and amount data. It is to be used as an SF 1035, Public Voucher for Purchases and Services Other Than Personal (Continuation Sheet), backup to the SF 1034 payment voucher when paying storage contractors.

C. Excess Cost. When personal property in excess of the members or employees weight allowance is placed in a commercial nontemporary storage facility, the entire storage lot charge will be paid by the government if requested by the member or employee. When this excess-cost condition exists, action to recover the extra cost to the government will be initiated by the office designated to recover such costs from the member or employee.

1503 LOCAL DRAYAGE

150301 Local Drayage

A. TMOs obtain these transportation services to meet operational needs. Housing managers authorize local drayage and storage of household goods.

B. The disbursing office must certify fund availability on the basis of a purchase order request and record obligations based on receipt of a DD Form 1155, Order for Supplies or Services. Before paying the contractor's invoices, the disbursing office must obtain evidence of receipt of services. This may be accomplished by a TMO statement on the invoice that the services ordered were received.

C. Support the original payment voucher with a copy of the obligating document and the contractor's invoice. The memo copy of the payment voucher retained by the disbursing office is supported with a copy of those documents as well as the receiving report, if not

furnished on the contractor's invoice.

CHAPTER 16**PAYMENT FOR POSTAL SERVICES AND SMALL PACKAGE DELIVERY COSTS****1601 PAYMENTS****160101 Installation Mail Managers**

Each installation has an official mail manager who is responsible for planning and coordinating outgoing postal and delivery purchases. The mail manager or an alternate is responsible for:

A. Preparing an SF 1034 for all postal costs.

B. Supporting the SF 1034 with the proper documentation for issuance of a U.S. Treasury check, i.e., a completed postal order form or other written information in letter form or on the SF 1034 to substantiate the purchase.

C. Obtaining certification of the SF 1034 from the mail manager's certifying officer.

D. Serving as a paying agent to receive U.S. Treasury checks for delivery to the Postmaster and making small cash payments as a paying agent, when determined necessary.

E. Providing the disbursing office with postal receipts and certifying receipt of proper services.

F. Managing Advance Deposit Trust Account (ADTA) balances to charge postal services if these accounts are considered necessary.

160102 Methods of Payment

A. There are four methods the mail manager may use to purchase postal services. Any of these four methods are at the option of the mail manager as locally determined necessary; however, the disbursing office and the mail manager must agree on which method or methods to use.

B. Method 1--Payment for each postal transaction with a U.S. Treasury check. The disbursing office makes the check payable to the United States Postal Service (USPS) and mails it to the proper USPS office. The mail manager coordinates with the USPS to hold the check until pickup of the postal service desired.

C. Method 2--Payment with a U.S. Treasury check for each postal transaction. The disbursing office provides the mail manager (properly appointed as a paying agent) a U.S. Treasury check payable to the USPS. The mail manager delivers the check to the USPS to receive the postal service desired. The mail manager normally picks up the check; however, there may be occasions when it is beneficial to mail the check to paying agents at off-site locations, such as for Reserve Officer Training Units.

D. Method 3--Payment in cash by an imprest fund cashier. This method is for payment of address correction costs or business reply mail where there is no account set up for that purpose. The imprest fund cashier submits Optional form (OF) 1129, Reimbursement Voucher, with receipts to the disbursing office for reimbursement.

1. Instead of an imprest fund, the mail manager, if appointed a paying agent, may have a small amount of cash on hand to pay for postal or shipping service requiring the use of cash.

2. Cash payments by paying agents require the submission of a certified SF 1034 to the disbursing office with all receipts for reimbursement of funds.

E. Method 4--Establishment by the mail manager of one or more ADTAs to charge postal services. This method results in advance payments to one or more postal accounts with

the USPS. The disbursing office gives the mail manager (properly appointed as a paying agent), or mails to the USPS, a U. S. Treasury check payable to the USPS to establish or replenish an ADTA, as necessary. This method also requires the mail manager to reconcile the ADTA with the USPS on a monthly basis. The disbursing office also checks the balance in the accounting records with the mail manager's balance on a monthly basis.

1602 PAYMENT PROCEDURES

160102 General Payment Procedures

A. The mail manager or alternate prepares an SF 1034 to request a U.S. Treasury check to purchase postal services. The appointed certifying officer certifies the SF 1034 for payment. The disbursing office verifies the availability of funds. For payments other than for an ADTA, the SF 1034 with supporting documents serves to obligate and disburse funds simultaneously.

B. The mail manager should support each request for a U.S. Treasury check with a completed copy of a postal order form. The form must state the specific service being requested and the exact cost. The completed postal order form or a signed letter supports the SF 1034 for issuance of the U.S. Treasury check until a copy of the receiving report is available. If a postal order form is unavailable, the mail manager may support the request for a U.S. Treasury check with a signed letter specifying the required service being requested and the exact cost. The required service and the exact cost must be included on the SF 1034.

C. The U.S. Treasury check is made payable to the Postmaster, USPS. Release of U.S. Treasury checks, made payable to the USPS, to the mail manager or alternate requires their appointment as paying agents.

D. The mail manager must bring a receipt signed by a postal representative back to the disbursing office by the end of the next business day or by the end of the next business day after receipt if the receipt results from a mail order. The mail manager certifies on the postal

receipt, and it serves as a receiving report. Attach the receipt as supporting documentation to the disbursing office copy of the SF 1034.

E. The mail manager presents a properly supported and certified SF 1034 to set up or replenish each ADTA.

1603 CONUS ADVANCE DEPOSIT TRUST

160301 USPS Advance Deposit Trust

A. ADTA accounts can be established with the USPS so that the mail manager may charge postal services. Use of these accounts is a local decision. There are different types of ADTAs, depending on the type of postal service being purchased; however, ADTAs are not available at overseas military post offices. The mail manager is responsible for each ADTA account balance.

B. A payment into an ADTA is an advance payment to the post office. The mail manager must monitor and reconcile each ADTA established in order to ensure receipt of the services paid in advance.

C. Types of ADTAs available to the mail manager are:

1. Customer meter advance deposit;
2. Business reply mail advance deposit; or
3. Permit imprint advance deposit.

D. If the mail manager establishes one or more ADTAs, a record of all transactions in each account must be maintained.

E. The mail manager prepares an SF 1034 to set up or replenish each ADTA. The mail manager presents a properly certified SF 1034 to the disbursing office. The payment to the postal service to establish or replenish the ADTA is an advance to the post office. The mail manager must return PS Form 3544, Post Office Receipt for Money, to the disbursing office no

later than the end of the next business day. In the absence of an PS Form 3544, a receipt signed and dated by a representative of the USPS may be used. The mail manager certifies on the postal receipt that services were received and the postal receipt serves as the receiving report. Attach the postal receipt to the disbursing office copy of the SF 1034.

F. The mail manager will charge postal services against an ADTA as required. Each time there is a charge to an ADTA, the USPS will issue a PS Form 3544, or other postal form as applicable, signed by a postal representative. The mail manager certifies services received on the postal receipt. The mail manager takes ADTA receipts for actual postal services to the disbursing office at least monthly. The disbursing office reduces the advance based on the amount shown on the receipts. Receipts must be identified to each ADTA.

G. More than one ADTA may be established or replenished on the same SF 1034. However, the SF 1034 shall identify the amount being deposited into each particular ADTA. Once the mail manager makes deposits into an account, the mail manager has limited authority from USPS to transfer funds between ADTAs. This should occur only on an exception basis and with the coordination of the disbursing office. Optional Form 1017F, Journal Voucher, or equivalent, should be used for transfers between ADTAs.

H. The mail manager reconciles the account monthly with the USPS. The disbursing office also should confirm the balance in each ADTA monthly with the mail manager. The mail manager must support any unexplained difference. Any unresolved discrepancy should be brought to the attention of the disbursing office and the installation administration office for investigation.

I. Limit advance payments for any ADTA account to requirements of the current quarter. The disbursing office and the mail manager should review balances versus requirements on a monthly basis. Where required, the mail manager should adjust the balances, as necessary, by allowing the account

to decrease with subsequent use or by the mail manager depositing more funds.

J. There may be cases where the USPS will refund cash for unused services in an ADTA. The mail manager will request the USPS to send a check or money order to the disbursing office. If it is not possible for the USPS to send a check or money order, the mail manager must take the cash and DD Form 1131, Cash Collection Voucher, to the disbursing office immediately after receipt for deposit as a cash collection.

K. Monthly use of Optional Form 1017G, Journal Voucher, or equivalent form supported with certified receipts, will be used to transfer amounts from the advance to an expense. At year end, move advances in ADTAs to the new fiscal year by using an SF 1081.

1604 SMALL PACKAGE DELIVERY FIRMS

160401 Use of Commercial Forms and Procedures for Small Domestic Freight Shipments from Installations

A. The authority for shipping government cargo using commercial forms and procedures, instead of government bills of lading (GBLs), is in Title 41, Code of Federal Regulations, Section 101-41.304-2. The monetary limits of the cost of such shipments is \$100 per shipment. This limit may only be exceeded on an occasional basis by an insignificant amount for the following types of shipments.

1. Single parcel shipments via express, courier, small package, or similar carriers, without regard to shipping cost, if the parcel weighs 70 pounds or less and 108 inches in length and girth combined.

2. Multi-parcel shipments via express, courier, small package, or similar carriers for which the transportation charges do not exceed \$250 per shipment.

B. These shipments are under the terms and conditions set forth in the standard use of GBLs. Freight loss and damage claims against commercial carriers using these

procedures are processed according to each DoD Component's transportation regulation.

C. Use of carriers participating in agreements to use commercial forms and procedures for these small shipments are covered in joint service regulations: Army Regulation 55-355; Navy Supply Instruction 4600.70; Air Force Regulation 75-2, Volume 1; Marine Corps Order P4600.14-B; and the Defense Logistics Agency Regulation 4500.3.

D. The Traffic Management Officer (TMO) normally submits these charges to the disbursing office on an SF 1034. If the installation administration office should handle small package outgoing deliveries in addition to or instead of the TMO, the base administration office submits a certified SF 1034 to the disbursing office for these shipments.

E. When using commercial forms and procedures, the actual transportation charges will be paid to the carrier upon presentation of the bill.

1605 POSTAL METERS

160501 Overseas Commercial Meter Settings

When a meter needs resetting, the mail manager will request a U.S. Treasury check by submitting an SF 1034 supported by appropriate documentation. The disbursing office will make the U.S. Treasury check payable to the postmaster at the licensing Armed Forces post office (i.e., New York, San Francisco, etc.). The disbursing office releases the check to the mail manager, appointed as a paying agent, who takes the check to the custodian of postal effects (COPE) at the Armed Forces post office. The COPE is a representative of the APO postmaster and also sets the meter and mails the U.S. Treasury check to the postmaster.

160502 CONUS Commercial Meter Settings

Appropriate documentation will be attached to support the SF 1034 in order to issue a U.S. Treasury check. The postal receipt certified by the mail manager should be attached to the SF 1034.

160503 Refunds for Spoiled Meter Tapes

The mail manager may receive refunds from the USPS for spoiled meter tapes or other types of unused services previously paid. Follow the procedures in paragraph 160301-J to make the necessary cash collection.

160504 Remote Meters

The Department does not replenish postage meters by a remote method. There is no legal authority for the U.S. Government to advance funds to a private contractor to replenish postage meters.

1606 MISCELLANEOUS PAYMENTS

160101 Purchase of Envelopes

A. Stamped Envelopes. The mail manager orders these envelopes using PS Form 3203, Printed Stamped Envelopes Order. The mail manager attaches a copy of the completed PS Form 3203 to the SF 1034 as a basis to issue a U.S. Treasury check. A postal receipt certified by the mail manager also will be attached to the SF 1034.

B. DoD Official Business Envelopes. The mail manager orders these envelopes using PS Form 3203. The mail manager attaches a copy of the completed PS Form 3203 to the SF 1034 for appropriate documentation support. A postal receipt certified by the mail manager also will be attached to the SF 1034.

160602 Postage Stamps

Appropriate documentation for the purchase of postage stamps will be attached to the SF 1034 for issuance of a U.S. Treasury check. A postal receipt certified by the mail manager also will be attached to the SF 1034.

160603 Business Reply Mail (BRM)

A. The mail managers obtains a new commercial BRM permit by submitting PS Form 3614, BRM Application and Annual Renewal Notice, to the local post office. Use a copy of the completed PS Form 3614 to support the SF 1034.

A postal receipt certified by the mail manager also will be attached to the SF 1034.

B. Check Payments. Use a properly supported SF 1034 to support issuance of a U.S. Treasury check.

160604 Postage Due Costs

A. Under normal circumstance, postage due mail is not accepted by DoD mail rooms. Postage due mail is returned to the sender at the sender's expense.

B. An exceptional circumstance is postage due penalty mail originating in a hostile environment. Postage due penalty mail used by military units engaged in hostile operations will not be refused by the addressee.

160605 Address Correction Costs

The mail manager may request an imprest fund in accordance with FAR 13.4. This imprest fund is for address correction costs and business reply mail. Postage due costs may not be paid by the mail manager. The mail manager will establish and maintain balances that are commensurate with use. The imprest fund cashier must submit receipts showing the postal costs to support of the OF 1129 in order to receive reimbursement.

160606 Express Mail

Payment for express mail is made with stamps, metered postage, or through an express mail corporate account. This account is similar to an ADTA. Payments into an express mail account are advances to the USPS. Control deposits into this account as is done for an ADTA advance payment. (See paragraph 160301-B). The mail manager submits PS Form 5639, Express Mail Corporate Account Application, to establish the account. Use a copy of this form to support the SF 1034. A postal receipt certified by the mail manager also will be attached to the SF 1034. The USPS provides a statement each month to the mail manager. The mail manager reconciles this account at least monthly with the USPS. The disbursing office confirms the balance in the account with the mail

manager monthly.

160607 United States Postal Service

A U.S. Treasury check may be issued to the USPS. The mail manager uses appropriate documentation to support the SF 1034 in requesting issuance of a U.S. Treasury check when there is no postal order form available.

CHAPTER 17

ELECTRONIC DATA INTERCHANGE

1701 INTRODUCTION

170101 General

The increased computerization in our society is triggering major changes in the organization of work. Paper-driven processes are being reengineered to capture the benefits of doing business electronically. Businesses are implementing electronic commerce to meet the needs of an increasingly competitive world. These trends in the economy are being mirrored in the Federal Government by many individual agency action as well as the cross-cutting National Performance Review.

A. Electronic Commerce (EC). Through EC the exchange of acquisition information between the private sector and the Federal Government should increase competition between the contractors doing business with the Federal Government. It is expected that competition will increase due to the improved access to Federal contracting opportunities for the more than 350,000 contractors doing business with the Federal Government. EC should help particularly the small businesses and other contractors who find access to bidding opportunities difficult under the current system. Using EC to reform the acquisition process has benefits for both the government and contractors. Some of the benefits to the government follow:

1. Lower prices.
2. Increased buyer productivity.
3. Reduced acquisition time and costs.
4. Better inventory control.
5. More timely and accurate payments to contractors in the government's \$200 billion annual payments.

B. Electronic Data Interchange (EDI). This is the computer to computer exchange of business information in a standard format between one or more parties (e.g., contractor, receiving activity, disbursing office). The standard format used must be agreed to by the parties exchanging information and is normally in agreement with the guidelines of the American National Standards Institute (ANSI), Accredited Standards Committee (ASC) X12 standards for EDI. Effective commerce between the government and contractors must be completed accurately and reliably, using accepted standard business transactions. In the government procurement and financial arenas, there are many opportunities for improvement in the flow of information between these two functions. Because EC will permit the buyer to solicit, receive, and analyze quotations, issue orders and notices of award, and distribute the orders without creating a document on paper, the procurement process will be faster, more efficient, and more responsive. Electronic transmission of information will virtually eliminate the problem of lost transactions and will help reduce the time needed to move a transaction through the system. EC also will provide a constant electronic flow of information from the buying office through the disbursing office's final payment. In addition, EC will help provide more timely and accurate payments through the expanded use of Electronic Funds Transfer.

C. Electronic Funds Transfer (EFT). It is DoD policy to encourage the use of EFT in the payment function.

1. When EDI is used in conjunction with EFT, the overall process may be expedited significantly. EDI eliminates invoice mail time, reduces payment advice notification time, and EFT expeditiously deposits funds due to each contractor's bank account. Currently, the U.S. Treasury and the Department of Defense

disburse approximately 40 million payments annually to contractors by checks and EFT transactions. Electronic commerce provides the government an opportunity for unlimited growth in the EFT world. All parties interested in participating in the EFT program must coordinate with and receive approval from the appropriate DFAS Center. All agreements should be in writing when information is to be exchanged electronically.

2. Payments made by EFT must conform to the requirements of the Federal Acquisition Regulation and the Defense Federal Acquisition Regulation Supplement and applicable Treasury Department guidance.

a. EFT utilizes a Federal Reserve Bank (FRB) and its computer network to deposit funds into the checking or savings account of a person or a company. The FRB processes all EFT actions through the Automated Clearing House (ACH) network. The FRB also processes all ancillary transactions related to the original EFT transaction through the ACH network. All disbursing offices making payments to contractor invoices are eligible to participate in EFT operations. All participating disbursing offices shall execute a Memorandum of Understanding (MOU) with the FRB to detail the operating parameters and procedures for the conduct of contractor express operations. Payments may be transmitted to the FRB either by a magnetic tape or electronic file transmission. The actual method will be spelled out in the MOU.

b. For contractors paid by EFT, the payment date is the date of an EFT payment (settlement date). Payments made by the EFT mechanism shall be made so as to be received by the contractor's financial institution by the established payment due date. The processing time required to have an EFT transaction reach a financial institution should be part of the MOU with the FRB. On Saturdays, Sundays, and legal holidays, government offices are closed and business is not expected to be conducted. Thus, payments falling due on a Saturday, Sunday, or legal holiday may be made on the following business day without incurring a late payment interest penalty.

D. For additional information on Electronic Commerce, see Volume 5, Chapter 24, of this Regulation.

170102 System Controls

Prior to EDI implementation, disbursing offices will ensure that system controls are documented, tested, and certified. They also will provide reasonable assurance that the transmitted information is authorized, complete, correct, and secure. The disbursing office periodically will test the system for compliance with the original design documentation and any other later changes. Tests should confirm key processing procedures and controls are working and reliable. In the event that the internal controls related to the obligation, receipt of materials or services, and processing of invoices are inadequate or are not operating as intended, the disbursing office may require the source documents to support payment.

170103 Applicability

A. When an approved EDI system is implemented, the disbursing office is authorized to make use of the following electronically transmitted data when processing contractor payments.

1. Electronic Invoice. The electronically transmitted invoice will be treated the same as a hard copy invoice and must contain the same data elements as specified for a proper, hard copy invoice, see paragraph 070201. For audit purposes, the disbursing office will ensure that a copy of the electronically transmitted invoice is retained. Electronically transmitted invoices that need to be returned to the contractor may also be returned electronically. The transmitted invoice must be accompanied by an electronic message reporting the reason for return.

2. Electronic Signature. This is a means within an Automated Information System whereby a unique code is affixed to a document or file which allows only the activity's designated authority to certify a transmission and be authenticated by only the responsible person on the receiving end. The electronic

signature must include the certifying official's approval or disapproval, name, and title. It may be used in instances where an authorized signature must be present on a hardcopy document. For additional information, see paragraph 010304.

3. Electronic Receipt and Acceptance Certification. The electronic receipt and acceptance certification of the materials or services will be accomplished through the use of an electronic signature, paragraph 170103-(2).

4. Electronic Payment Certification. The certifying officer will verify the validity of expected payments to the disbursing office through the use of an electronic signature. Documentation required to support payments will be based on evidence of a valid contract, obligation document, receipt and acceptance, and invoice, whether issued by electronic certification techniques or hard copy. When EDI techniques are used, it generally is not necessary to physically transfer the hard copy documentation to the disbursing office for examination. However, in certain situations, the contractor may be asked to provide hard copy documentation.

B. Disbursing offices must further ensure that the transmitted data contains the necessary Prompt Payment Act information (e.g., invoice receipt date, material receipt and acceptance dates) required in the computation of the payment due date.

CHAPTER 18

CONTRACTOR DEBT COLLECTION1801 DEBTS180101 Disbursing Officer Debts

It is essential that the amount of indebtedness owed by contractors and other business entities to the Department be ascertained promptly and collection accomplished expeditiously. This part applies to those debts for which the disbursing officer has primary responsibility for collection pursuant to the Department of Defense Federal Acquisition Regulation Supplement (DFARS) 232.605(b). If a disbursing officer makes a determination that more funds have been disbursed than specified in the contract, an erroneous payment has been made, and it is the disbursing officer's responsibility to collect the extra payment. Erroneous payments include duplicate payments and dual negotiations of the original and recertified U.S. Treasury checks. However, if a contract modification (downward adjustment) is issued after the date of the disbursement and causes the contract to be in an overpayment status, this is not an erroneous payment. If a disbursing officer determines that a contract is in an overpayment status, that official should contact the Procuring Contracting Officer or the Administrative Contracting Officer, depending on whom issued the modification causing the overpayment to ensure that a demand for payment will be sent to the contractor. Precise details for the Initial Demand Letter and the Second Demand Letter are provided in paragraphs 180202 and 180203, respectively.

180102 Contracting Officer Debts

A. Examples of business entity debts that are beyond the scope of this chapter and their corresponding governing regulations are those debts defined by the Federal Acquisition Regulation (FAR) 32.6, as supplemented by DFARS 232.6. Examples of contracting officer debts are as follows:

1. Damages or excess costs related to defaults in performance.

2. Breach of contract obligations concerning progress payments, advance payments, or Government-furnished property or material.

3. Government expense of correcting defects.

4. Overpayments related to errors in quantity or billing or deficiencies in quality.

5. Retroactive price reductions resulting from contract terms for price redetermination or for determination of prices under incentive type contracts.

6. Overpayments disclosed by quarterly statements required under price redetermination or incentive contracts.

7. Defective Pricing.

8. Unliquidated Progress Payments.

B. DFARS 232.6 prescribes procedures relative to those debts for which the contracting officer has the primary responsibility for effecting collection action. These debts include liquidated damages and excess costs related to contractual defaults and government expense of correcting product defects. However, there may be times when a contracting officer issues an initial demand letter to a contractor for any amount of money outstanding on the contract. At this time the contractor is to return any money that the government has paid for which the contractor has not delivered material or provided services, or a modification for consideration was paid for which the contractor was not entitled. When a contracting officer makes such a determination and sends a demand letter to a

contractor, a copy also must be sent to the disbursing office and a copy to the funding and accounting station. When the accounting station receives a copy of the contracting officer's demand letter, the accounting station must establish the official accounts receivable in their accounting records. The disbursing office sets up a memorandum accounts receivable for the debt and pursues collection on it as would be done for any other contractor debt. When the disbursing office receives the debt for further action, this office will send out demand letters as necessary to pursue collection of the debt.

1802 DEMAND FOR PAYMENT

180201 General

A. Upon determination by the disbursing officer that a debt exists from a contractor or other business entity as described in paragraph 180101, the disbursing officer shall make an immediate written demand for payment provided that the amount of the debt is \$50 or greater. As noted in paragraph 180102, a contracting officer may issue a demand letter to a contractor. Collection on any debt that is less than \$50 will not be pursued by the disbursing office; however, the disbursing office can collect the debt through an offset. One demand letter will be sent if the amount is \$50 or greater but less than \$200. Two demand letters will be sent if the amount is \$200 or greater. After two demand letters have been sent and the debt is not resolved, the disbursing office will not pursue further collection action (other than an offset) if the debt is less than \$600. If any debt of \$600 or greater has not been resolved after two demand letters have been sent to the contractor, it must be transferred by the disbursing office to the DFAS-Columbus Center, ATTN: DFAS-CO-FD, Debt Management Office, for further action.

B. Debts less than \$100,000. When the DFAS-CO has exhausted all means to collect a debt of \$100,000 or less and the debt is determined to be uncollectible, the DFAS-CO will notify the Financial Management (FM) representative of the cognizant DoD Component by memorandum that the debt should be written off. In turn, the FM representative will notify the appropriate accounting station that the debt

must be written off of the official accounts receivable records. This will allow the accounting station to write-off the debt as they maintain the official accounting records. For guidance concerning write-offs, see Volume 5 of this Regulation.

C. Debts of \$100,000 or greater. When a debt(s) of \$100,000 or greater is sent to the DFAS-CO, and it has been determined to be uncollectible, the DFAS-CO must forward the debt to the Department of Justice (DOJ) for further action. If the DOJ determines that the debt is uncollectible, the DOJ must notify the DFAS-CO that the debt should be written off. The DFAS-CO then will notify the cognizant FM representative that appropriate write-off action should be initiated. Remaining procedures, as detailed in the last two sentences of paragraph 180201-B, should be followed.

D. If a contracting officer makes the initial determination that a debt exists, a copy of the second demand letter sent to the contractor from the disbursing office also will be forwarded to the contracting officer.

E. Title 28, U.S.C., section 2415, Time for Commencing Action, and 31 U.S.C. 3716, Administrative Offset, advise that because of the statute of limitations agencies are barred from pursuing collection actions after six years other than administrative offset. An offset can be made up to ten years. Accordingly, the collection of contractor debts should be pursued in accordance with the time limitations specified in 28 U.S.C. 2415 and 31 U.S.C. 3716.

180202 Initial Demand Letter

A. The decision of the Court of Appeals for the Federal Circuit in Cecile Industries, Inc. v. Cheney, 995 F.2d 1052 (Fed.Cir. 1993) held that the Debt Collection Act of 1982 does not govern the government's common law right to offset contract debts. With respect to the Cecile decision, a demand letter for payment of contract debts should not make reference to 31 U.S.C. 3176. The Initial Demand Letter to contractors indebted to the government will include the following:

1. A description of the debt including its amount.

2. A statement that payment should be made in full within thirty days from the date of the demand letter.

3. The address to which payment should be sent, and the check or wire transfer, when applicable, should be made payable to the U.S. Treasury.

4. Notification that any amounts not paid within thirty days will bear interest from the date of the demand letter, or from any earlier date provided in the contract, if applicable and the rate that will be used.

5. Notification that the principal and interest will be subject to collection by offset, if not paid within 30 days.

B. Any available documentation which substantiates the indebtedness should be included with the demand letter. If it is anticipated that the debtor may wish to view a cancelled check, a request for photocopies should be submitted concurrent with the issuance of the first demand letter. In the case of double negotiation of both original and successor checks, both copies must be available prior to issuance of the demand letter.

180203 Second Demand Letter

A. When the due date specified in the first demand letter passes without receipt of payment and the amount of the debt is \$200 or greater and the debt cannot be satisfied by offset, the disbursing office will send a second demand letter. This letter will make reference to the first demand letter and state that payment has not been received. This letter also will advise that the dollar amount of the interest and administrative costs that have been assessed and the total amount of the indebtedness.

B. Where the amount of the debt is \$600 or more, the second demand letter shall include a statement that the indebtedness will be forwarded to the DFAS-CO-FD for further collection action.

180204 Disputes

A. The disbursing officer will give full and impartial consideration to any arguments presented by the alleged debtor relating to the validity of the debt or its amount. The disbursing officer is free to seek assistance from technical experts or from legal counsel in order to render an equitable decision. If the disbursing officer is unable to render a conclusive determination regarding the amount or validity of the debt, the matter may be referred to the DOJ as a debt claim. Interest continues to accrue from the date of the first demand while the debt is in dispute.

B. A contracting officer may issue a demand for reimbursement from a contractor for overpayment on progress payments. A contracting officer also may issue a demand for payment relating to a Termination for Default on a contract for non-performance by a contractor because the contractor did not meet the specifications in the contract. In either situation, or similar situations, a final decision must be issued by the contracting officer before an appeal can be taken to the Armed Services Board of Contract Appeals or the Federal Claims Court by the contractor.

1803 INTEREST

180301 Interest Rate

In most cases, the rate of interest assessed shall be the Prompt Payment Act (PPA) interest rate. The PPA interest rate will be provided to individual disbursing offices by their servicing DFAS Center. The PPA interest rate shall not apply to debts where an applicable statute, regulation required by statute, loan agreement, or contract either prohibits such charges or explicitly fixes the charges that apply to debts involved.

180302 Calculating Simple Interest

Although interest is not assessed until the due date has passed, it is calculated from the date of the first demand letter to the date the debt is paid in full. Therefore, the minimum interest charge is for a 30-day period. When the

due date passes without payment, the interest is computed by multiplying the original debt by the applicable interest rate for each six-month period divided by the number of days in the year times the number of days in the interest period. Interest is calculated base on a 360 year. An example follows:

Interest Period	Dec 15, 1993--Dec 31, 1993
Principal	\$15,000
Annual Rate	0.05625
Daily Rate	0.0001541
Days	17
Amount	\$39.30

Interest Period	Jan 1, 1994--Jun 30, 1994
Principal	\$15,000
Annual Rate	0.05500
Daily Rate	0.0001507
Days	181
Amount	\$409.15

Interest Period	Jul 1, 1994--Oct 31, 1994
Principal	\$15,000
Annual Rate	0.07000
Daily Rate	0.0001918
Days	123
Amount	\$353.87

Total Interest	\$802.32
----------------	----------

If there is an offset, or if the principal decreases for any other reason, the daily amount of interest needs to be recalculated, effective with the date of the change. Interest collected is deposited to the Interest Account, 97R3210.0013.

1804 MISCELLANEOUS SUBJECTS

180401 Administrative Costs

Administrative costs relate only to delinquent debts. They are assessed in order to cover expenses incurred in the recovery of the delinquent debts. For example, the cost of sending an initial demand letter would not be used in calculating an administrative cost because that expense would be incurred whether or not the debt becomes delinquent. In contrast, the cost associated with the preparation of the second demand letter, the calculation of interest, and forwarding to the DFAS-CO are necessitated

only because the debt was not paid when due and subsequently becomes delinquent. Therefore, these actions are included in the calculation of administrative cost. The cost must be based on the actual cost or on an average based on actual cost. The cost may not be established arbitrarily. Additional administrative charges will be assessed if necessary to collect the debt as an offset or when transferring the indebtedness to the DFAS-CO. When a contractor or other business entity pays the government administrative costs, the costs are to be deposited in the Treasury Miscellaneous Receipt Account.

180402 Minor Amounts

A. Frequently, a debtor will make remittance of the principal amount a few days past the established due date. Another common practice is to pay the last amount billed, but fail to make allowance for the additional interest that accrues between the billing date and the remittance date. In such cases, disbursing offices will determine if additional billing is warranted. As stated in 4 CFR 102.13(g), an agency can waive interest under several circumstances including if the agency determines that collection of these charges would be against equity and good conscience or not in the best interest of the United States.

B. Minor amounts of less than \$50 will not be billed. For example, a contractor owed \$1,330 (of which \$1,080 was principal and \$250 was interest) when the demand letter was sent out. Subsequently, the contractor submitted a payment for \$1330, but payment was not received until after the due date. Interest of \$25 more had accrued by the time payment was received. The disbursing office would waive the additional \$25 interest without pursuing further collection action on it, credit \$250 to interest, and credit \$1,080 to principal. Cases of \$50 or more for additional interest will be reviewed on an individual basis. If the contractor has made a good faith effort to make full payment and collection of additional charges would be against equity and good conscience, the additional interest may be waived.

180403 Offsets

A. If, after 30 days from the date of initial demand, it becomes necessary for an indebtedness to be offset against other monies that are owed to a contractor, the transaction will be handled as a deduction on a public voucher. FAR 32.611 allows for an offset of contractor debts as long as an explanation is provided to the contractor. Offsets will be made against the same contract that gave rise to the debt provided that payments under that contract are scheduled. Offsets against amounts due under other contracts will be accomplished only when offsets against the same contract cannot be accomplished. The public voucher will be approved and the accounting classification will be charged for the total amount being settled with no regard for the deduction being applied. The face of the voucher should be prominently marked with the amount withheld and the accounting classification credited to ensure that only the adjusted net amount is paid. A notation with the appropriate information also will be made that adequately informs the payee of the reason for the deduction. The disbursing office must use considerable discretion in determining when an offset is appropriate. Some businesses prefer that their debts be liquidated in such a manner. If a contractor indicates its approval of the process, the disbursing office may effect an offset prior to the expiration of the due date in the demand letter. Other contractors may make a remittance by check shortly after the due date or shortly after receipt of the second demand letter. In either of these instances, an offset may result in collecting the debt twice and having to refund one of the collections. Another problem may arise when a remittance has not been forthcoming, but the disbursing office is unaware of whether the contractor will be submitting any invoices in the near future. Because an offset inherently is a more complex process than remittance processing, the disbursing office should encourage contractors to submit their payments by check or wire transfer. Interest charges will be computed through the date of an offset, and the expenses of effecting an offset will be included as an administrative cost as aforementioned in paragraph 180401. Offsets will not be made prior to the payment due date, unless the contractor has provided the disbursing office written

permission. Offsets normally will not be accomplished when there is an assignment of claims. Disbursing office personnel should seek guidance from its legal staff in determining whether an offset may be taken when there is an assignment of claims.

B. As authorized by 31 U.S.C. 3720A, the Internal Revenue Service (IRS) may collect certain past due and legally enforceable debts by offset against tax refunds. Referring activities will comply with the IRS-DoD agreement for implementing and administering tax refund offsets. The single DoD manager and contact point for the program is the DFAS-Denver Center (DFAS-DE). Any DoD activity that seeks to have a debt offset through the IRS tax refund program should obtain assistance from its local legal office before contacting the DFAS-DE on this matter.

180404 Credit Memorandum

A. The disbursing officer's written demand letter must indicate that a credit memorandum is not an acceptable means of liquidating indebtedness. Nevertheless, a credit memorandum can be received under the following circumstances:

1. The contractor or other business entity is the original discoverer of the error that led to the indebtedness, and they voluntarily submit a credit memorandum to the disbursing office without having received a demand letter.

2. The contractor or other business entity disregards the disbursing office's admonition against sending a credit memorandum.

3. A credit memorandum submitted to the disbursing office under these circumstances may be applied only if there is a payable invoice in-house to which it can be applied. The contractor should furnish the disbursing office, upon request, with an invoice number, date, and amount the credit memorandum is to be applied against.

B. At times a contractor may indicate

on an invoice or progress payment request that the amount of the credit memorandum is being deducted from the amount due from the government. In all other instances, the disbursing office must make a determination as to whether the debt can be recovered in a more efficient manner by corresponding with the debtor or by effecting an offset. In making such a determination, the disbursing office considers not only the relative costs incurred under each option, but also the method that is expected to result in liquidation at the earlier date. This second factor is dependent upon the expected volume and frequency of incoming invoices which are susceptible to offset. Regardless of the method selected, the disbursing office must acknowledge receipt of the credit memorandum and inform the business of its disposition. If direct remittance is required, the acknowledgement should contain a statement, such as: "This is to acknowledge receipt of your credit memorandum 14245, dated December 14. We cannot accept this document as liquidation of your indebtedness, and must ask that you remit a check to the following address." If an offset is accomplished, the disbursing office's letter should contain a statement such as: "This is to acknowledge receipt of your credit memorandum 67890, dated June 12. We have offset the amount of your debt against your invoice A654Z, dated June 5." Receipt of a credit memorandum by the due date stated in a demand letter does not preclude the charging of interest and administrative costs.

180405 Payment Schedules

A. When possible, the payment of debts, whether it is an installment or deferment repayment by contractors and other business entities, should be repaid in one sum.

B. When the debtor can establish sufficient justification, a series of installment payments may be approved which will ensure liquidation within a reasonable time frame. In compliance with 4 CFR 102.11, the installment payments, if possible, should be sufficient in size and frequency to liquidate the government's claim in not more than three years. Interest and administrative charges will be computed and assessed on each payment for the amount outstanding. If the contractor contends that a

repayment period greater than three years is needed, each request will be handled by the DFAS-CO-FD on a case-by-case basis. The DFAS-CO-FD can approve a contractor's request for an installment agreement; however, the DFAS-CO-FD cannot unilaterally deny a contractor's request for an installment agreement without the consent of the Office of the senior financial manager (FM) of the cognizant DoD Component. A copy of all installments entered into by the DFAS-CO-FD will be provided to the accounting station which submitted the debt to the DFAS-CO-FD for further action and to the Office of the senior financial manager of the cognizant DoD Component.

C. When the DFAS-CO-FD receives a deferment request for debt resolution, they will send the deferment request within three work days by certified mail to the senior FM of the cognizant DoD Component. Only that official can approve or deny a deferment request.

D. All remittances received, whether in lump-sum or installments, will be collected and deposited upon receipt. The accounting station must be informed of all collections as they maintain the official accounts receivable records. If the amount received is not adequate to liquidate the entire indebtedness, the payment will be applied first to administrative costs, second to interest, and third to the principal amount of the debt. The principal amount will be deposited to the accounting classification/appropriation from which the funds were disbursed. If the appropriation of the principal amount has been cancelled or closed, this amount will be deposited into the Collection of Receivables from Cancelled Accounts of the Treasury, 97R3200.0001.

180406 Transfer of Debts owed by Contractors

A. Any debt of a contractor or other business entity that remains unpaid 30 days after the initial demand for payment is considered delinquent. In order to allow for collection through subsequent efforts, including offset, and to permit the accumulation of adequate supporting data, the disbursing office may retain the debt up to a maximum of 90 days following the date of the initial demand letter. However, transfer should be accomplished prior to 90 days

provided the disbursing office has gathered the supporting data and is of the opinion that liquidation through either remittance or offset is unlikely to occur. Transfer will be made to the DFAS-CO-FD by certified mail for further action. The office responsible for maintaining the official accounting records should be notified so the loop may be closed because in many situations the disbursing office does not maintain the official accounts receivable records. The accounting station may maintain these records, so they would have to be notified. In compliance with paragraph 180401, an administrative cost may be assessed for the expenses of making the transfer. Debts less than \$600 will be terminated locally. See Volume 5, paragraph 310301, of this Regulation for guidance concerning write-offs. As stated in paragraph 180201, the minimum value of any case referred to the DFAS-CO-FD will be \$600. The minimum value may be comprised of several debts on various contracts for the same contractor. When a debt is transferred to the DFAS-CO, it shall include supporting documentation and must be legible and tabbed as follows:

1. Copies of vouchers paid under the contract which relate to the specific debt. For example, claims resulting from erroneous overpayments need to be supported only by those paid vouchers which will assist in fully understanding the case. The submission of all paid vouchers under the contract is encouraged, when such documentation is necessary for a full understanding of the claim. All paid vouchers submitted in support of claims transferred will clearly indicate the date the disbursement was made.

2. Amounts and dates of collections received.

3. For duplicate payments and dual negotiated successor checks, copies of the negotiated checks as obtained from the Department of the Treasury should be included.

4. All demand letters, all other correspondence, and memoranda of telephone or personal contact with the debtor and others which are pertinent to the debt should be included.

5. Any other documents necessary to support a recommendation for compromise, discontinuance, or termination should be included.

6. Taxpayer Identification Number (TIN).

7. The telephone number, address, and (if available) the name of a knowledgeable point of contact for the following:

- a. Debtor
- b. Disbursing office making the submission, and
- c. Accounting activity or funding station.

8. In the case of debts determined as the result of an audit or contract reconciliation, a copy of the audit or reconciliation report with sufficient supporting documentation to explain the conclusions.

9. The accounting classification/appropriation to which the principal portion of the debtor's payments should be deposited.

B. After the transfer, the DFAS-CO-FD will have full responsibility for collection action on the delinquent debt. Funds accountability, however, does not transfer to the DFAS-CO-FD. If a subsequent payment is received by an office other than the DFAS-CO-FD, the office receiving the payment will notify the DFAS-CO-FD by certified mail within three workdays of the receipt of payment and its disposition. When there are overcharges to appropriations or funds, the activity responsible for maintaining the official accounting records will continue to maintain control over the accounts receivable as the DFAS-CO-FD only maintains a memorandum accounts receivable record. The DFAS-CO-FD shall notify the FM representative of the cognizant DoD Component that the debt should be written off. In turn, that official will notify the appropriate accounting station which maintains the official accounts receivable records so that action may be taken by the accounting station to

write-off the corresponding accounts receivable. In the case of dual negotiated successor checks, the DFAS-CO-FD also will notify the accountable disbursing officer or settlement officer who previously had continued to reflect the deficit in one's accountability. The DFAS-CO-FD notification will provide authority for the accountable disbursing officer or the settlement officer to remove the deficit from his or her records.

180407 List of Contractor Indebted to the United States

With the exception of debts managed by the DFAS-IN Directorate for Transportation Payments, the DFAS-CO-FD is the only DFAS office authorized to submit debtors to DFAS-IN for placement on the List of Contractors Indebted to the United States for offsetting any money due from a contractor to the government. The List, normally referred to as the Hold-up List, is the only publication of this type available to all government agencies. The List is published at least quarterly by may be published every other month.

1805 DEFERMENTS

180501 Deferments

A contractor may appeal a debt to the Armed Services Board of Contract Appeals (ASBCA) or through the United States court system. The contractor may request a deferment until the appeal is decided. Although a contractor may use the term "deferment" when requesting postponement of payment (see paragraph 180405), paragraph 180501 applies only to those deferment requests associated with an appeal. A contractor's requests for a deferment of collection on a contract should be sent to the Contract Financing Office of the cognizant DoD Component (see FAR 32.613 and DFARS 232.108). The DFAS-CO-FD cannot approve or deny a request for a deferment. When a disbursing office or the DFAS-CO-FD receives a request for deferment of a debt from a contractor, the office receiving the request will send the request by certified mail within three workdays to the appropriate DoD Component's contract financing office.

1806 BANKRUPTCY

180601 General

A. Within the Department the contractor bankruptcy proof of claim filing functions have been consolidated at the DFAS-CO-DG. This consolidation does not include the assumption of the litigation function nor the inclusion of individual bankruptcy cases. The litigation function will remain with the cognizant DoD Component. Bankruptcy litigation is accomplished by the DOJ through the U.S. Attorney offices. Prescribed actions, as detailed in paragraphs 180601-B through 180601-I, must be taken when the procurement contracting office or contract administrative office receives notice of bankruptcy from the contractor or from another source.

B. Bankruptcy cases generally are time sensitive. When a notice of bankruptcy is received, immediate action is required. Government monetary claims and other rights may be adversely and irrevocably affected if not timely asserted.

C. When either the procurement contracting office or the contract administrative office receives information that bankruptcy proceedings have been initiated, it will immediately notify the Office of General Counsel, DFAS-CO-DG, Defense Finance and Accounting Service, Box 182317, Columbus, OH 43218-2317.

D. This notification will occur regardless of whether any contracts have been fully performed, closed, or terminated. At the same time, the DoD Components will notify any office designated within the cognizant Department or Agency to receive this information. Following are the cognizant offices and their addresses where bankruptcy notices should be sent.

1. Bankruptcy notices for the Defense Logistics Agency immediately will be sent to the Defense Logistics Agency, General Counsel's Office, ATTN: GC, 8725 John J. Kingman Road, Suite 2533, Fort Belvoir, VA 22060-6221.

2. Navy activities immediately

will notify the Office of Counsel, ASN (FM&C), Room 4C719, The Pentagon, Washington, DC 20350-1100.

3. Air Force activities immediately will notify AFLSA/JACN, 1501 Wilson Boulevard, Room 606, Arlington, VA 22209-2403.

4. Army activities immediately will notify the U.S. Army Litigation Center, 901 North Stuart Street, Suite 400, Arlington, VA 22203-1837.

E. At a minimum, the notification must include:

1. The name of the contractor.
2. The Court in which the bankruptcy petition has been filed.
3. The date of the filing of the bankruptcy petition, and
4. If known, the bankruptcy court docket number.

This notification must be made regardless of whether it appears that the notice has been received late. The notification must be made within three work days of the receipt of the notice of bankruptcy. Notification by telefax is encouraged.

F. Fifteen Day Report. The contracting office may receive a notice of bankruptcy from the debtor or the DFAS-CO-DG. When the contracting office receives notification of a bankruptcy, that office will prepare and send a message to the DFAS-CO-DG, the component's legal office noted in paragraph 180601-D, and any other office designated within the Department or Agency to receive the report. The report will be sent no later than 15 days after receipt of the notice of bankruptcy. If some of this information is not available, the report should be sent reflecting all available information. To the extent possible, the report will include the following.

1. The name of the contractor.

2. A list of the contracts involved.

3. The amount of any potential claim against the contractor. Often, this amount will be an estimate. The contracting officer will attempt to accurately calculate the amount of the debt with the understanding that the filing of the proof of claim is time sensitive. A short explanation of how the debt arose will be attached. To the extent possible, documentation reflecting the existence of the debt should be attached.

4. Any property and its location in the possession of the contractor in which DoD claims an interest. This includes property of the government made available to the contractor, such as government furnished equipment or government furnished property. A very common type of property in which the government claims an interest is the work-in-process that is associated with progress payments.

5. Any claims the debtor may have asserted or presented to the Department.

6. The bankruptcy court docket number of the proceeding, and the court in which the bankruptcy is pending.

7. Available information concerning a proof of claim bar date.

G. Upon receipt of a notice from a contracting officer, the DFAS-CO-DG will prepare a consolidated proof of claim on behalf of the Department. The proof of claim will be forwarded to the appropriate U.S. Attorney for filing. A copy will be sent to the Department of Justice's Central Intake Facility and to each DoD Component that has provided information for the consolidated proof of claim. Department or Agency copies will be sent to the cognizant offices designated in paragraph 180601-D. The proof of claim will identify the DFAS-CO-DG as the office designated to receive further notices and any funds received pursuant to the proceedings.

H. The filing of a bankruptcy petition has a major impact on business relationships with the contractor which has filed for bankruptcy protection. Many otherwise appropriate

actions cannot be taken against a bankrupt contractor, and actions which may be legally taken against a contractor may have adverse consequences for the Department. The activity's legal office should be informed before any action is taken with regard to a contractor who has filed for bankruptcy.

I. FAR 52.242-13, Bankruptcy. In the event the contractor enters into proceeding relating to bankruptcy, whether voluntary or involuntary, the contractor agrees to furnish by certified mail written notification of the bankruptcy to the contracting officer responsible for administering the contract. This notification shall be furnished within five days of the initiation of the proceedings relating to bankruptcy filing. This notification shall include the following:

1. The date on which the bankruptcy petition was filed.

2. The identity of the court in which the bankruptcy petition was filed.

3. A listing of government contract numbers for this contractor and contracting offices for all government contracts with this contractor against which final payment has not been made.

4. FAR 52.242-13 states that this obligation remains in effect until final payment under this contract(s) is made. In addition, when FAR 52.242-13 is used, a copy of the notification provided to the contracting officer will, at the same time and in the same manner, be mailed to the Defense Finance and Accounting Service, ATTN: DFAS-CO-DG, 4280 East Fifth Street, Columbus, OH 43219-1879.

CHAPTER 19

PAYMENT PROVISIONS FOR GRANTS AND OTHER INSTRUMENTS OF ASSISTANCE1901 PAYMENTS190101 General

A. This chapter provides the necessary guidance to disbursing offices to ensure that payments are made properly for expenditures of funds under DoD grants, cooperative agreements, and other instruments of assistance not covered in Chapters 1 through 18 of this volume. Guidance also is included for cash management and debt collections associated with grants and other instruments of assistance. The awards for grants and other instruments are issued in accordance with DoD Grant and Agreement Regulation (DoD 3210.6-R.)

B. The office that issues the grant or other type of instrument of assistance distributes a copy of the award to the disbursing office and the administering office if administration is delegated. Modifications made by the awarding or administering office also will be promptly distributed to the disbursing office and other impacted offices. The award designates the specific disbursing office which will make payment. The disbursing office's copy supports the payment and is attached to the retained copy in the payment file or document.

C. Close working relations between the disbursing office personnel, awarding office personnel, granting officer, and the administrative officer are necessary for timely and accurate handling of financial transactions in issuing and paying the assistance instruments. When making a payment, disbursing office personnel should refer to the payment provision of DoD 3210.6-R.

D. Electronic data interchange (EDI) and electronic funds transfer (EFT) are the preferred methods to process payment requests and related actions. The EDI guidance contained

in Chapter 17 of this volume also is applicable to payment actions in this chapter.

E. Disbursing office personnel should give careful attention to payments made for programs covered by the Cash Management Improvement Act (CMIA). The CMIA sets rules, including interest liabilities, and procedures for the transfer of funds between Federal agencies and the states for financing Federal Assistance Programs. The CMIA is implemented by 31 CFR 205.

190102 Quality and Internal Control

The guidance and requirements concerning quality and internal controls provided in paragraphs 010103, 010301, and 010302 of this volume are applicable to payment actions in this chapter.

190103 Methods of Payment

Several methods of payment are authorized for grants, cooperative agreements, and other assistance transactions. The method to be used is prescribed in the award documents. A short description of several methods of payments follows.

A. An advance payment means a payment made to a recipient upon their request either before outlays are made by the recipient or through the use of predetermined payment schedules.

B. A reimbursement means that a payment is made to the recipient upon its request after cash outlays are made by the recipient.

C. A working capital advance means advancing cash to a recipient to cover estimated disbursement needs for an initial period gener-

ally geared to the awardee's disbursing cycle. Thereafter, the recipient is reimbursed for actual cash outlays.

D. A payable milestones payment means a payment made to a recipient according to a schedule of predetermined measures of technical progress.

190104 Payment Request

A. For non-construction programs agreements with states, local governments, universities, and other non-profits, DoD 3210.6-R requires requests for advance payments or reimbursements to be made on SF 270, Request for Advance or Reimbursements. For construction programs, SF 271, Outlay Report and Request for Reimbursement, may be used. Other forms may be authorized if exceptions are approved in advance by the awarding agency.

B. For payments to commercial recipients, DoD Components may authorize recipients to use SF 270, SF 271, or prescribe other forms as necessary.

190105 Administrative Office Review of Payment Request

A. The administering office is responsible for reviewing each payment request to ensure that:

1. The request complies with the award.

2. Funds are available to pay the award.

B. The administering office also will certify that the request for payment is proper and forward a copy to the disbursing office.

190106 Paying the Request

The disbursing office will:

A. Match the payment request to the obligating document and ensure that the unliquidated balance on the award is sufficient to make the payment.

B. Make payment as soon as practicable in accordance with the following guidelines:

1. No more than 7 days after receipt of the recipient's request at the administering office whenever electronic commerce is used, i.e., EDI to request the payment and EFT to make the payment.

2. No more than 30 days after receipt of the recipient's request at the administering office when it is not possible to use electronic commerce.

3. No more than 7 days after each date specified, when payments are authorized in advance based on a predetermined payment schedule provided that the payment schedule was received in the disbursing office at least 30 days in advance.

190201 Responsibility for Collection of Debts for Grants and Other Assistance Instruments

Any funds paid to a recipient in excess of the amount to which the recipient is entitled constitutes a debt to the Federal Government. Primary responsibility for collecting the debt may rest with the disbursing office or the grants office.

A. Paragraph 180101 applies to contractor debts which the disbursing office has primary responsibility for collecting. The disbursing office is responsible for the determining the amount and collecting debts owed by contractors. This section extends those responsibilities to Federal assistance awards whenever overpayments or erroneous payments are made. Disbursing offices will follow the guidance contained in Chapter 18 of this volume for collecting debts arising from Federal assistance agreements.

B. Grant officers have the initial responsibility for collecting all other debts arising from assistance agreements, except those described in paragraph 190201-A. After a recipient has exhausted all appeals and the debt has not been resolved, the grants officer will prepare and send a demand letter to the recipient and to the Debt Management Division, DFAS-CO-FD. When a debt is transferred to the DFAS-CO-FD for

further action, supporting documentation must be provided as prescribed in paragraph 180406 of this volume.

C. Upon receipt of the demand letter and supporting documentation of the debt from the grants officer, the DFAS-CO-FD shall set up a memorandum accounts receivable for the debt and pursue collection of it.

D. In accordance with the provisions of OMB Circular A-129, the disbursing office may use an administrative offset to collect delinquent debts owed by a recipient. If an administrative offset is taken, the disbursing office shall follow the due process as provided in 31 U.S.C. 3716 and also 4 CFR 102.2 and 102.3, where the statute and regulations are applicable. Use of an administrative offset is not required in every instance in which there is an available source of funds. The disbursing office shall make the determination on a case-by-case basis in conjunction with the grants officer responsible for the award against which the offset will be applied. Following are examples when an offset shall not be taken.

1. Recovery of debt by an administrative offset shall not be taken when the grants officer determines that the offset will substantially interfere with or defeat the purpose of the program for which the offset is contemplated.

2. Grants and cooperative agreements that are paid in advance generally are not subject to offset. The disbursing office may request the grants officer to convert the method of payment to a reimbursement basis to enable use of an administrative offset, if that is deemed to be in the best interest of the government.

E. The disbursing office also may recover delinquent debts using other means that are available pursuant to OMB Circular A-129 as implemented in Volume 5, Chapters 29, 31, and 32 of this Regulation.

F. Disbursing offices shall apply interest and administrative costs to delinquent debts which is consistent with the OMB Circular A-129 and Volume 5, Chapters 29, 31, and 32 of this Regulation. These costs also will be applied

in conjunction with 4 CFR 102.13, except where applicable statutes or regulations prohibit or explicitly set such charges or where 4 CFR 102 provides other exemptions.

G. Any debt that is determined to be uncollectible shall be written off in accordance with the OMB Circular A-129 and applicable provisions of Volume 5, Chapters 29, 31, and 32, of this Regulation.

H. Progress Made

On a separate sheet describe specific achievements and problems during the FY in implementing the Prompt Payment Act and OMB Circular A-125. Include a description of any agency experience in determining the most appropriate timing for release of payment authorization so that invoices are paid as close as possible to the due date without exceeding it.

I. Description of Agency Payment Practices

On a separate sheet describe the extent to which Agency payment practices satisfy the requirements of the Prompt Payment Act and OMB Circular A-125. Applies only to 4th quarter submission of the ACCT RPT (Q) 1619, as this will contain cumulative data for the entire fiscal year, and the narrative must be provided at this time.

J. Updated Description of Agency Quality Control System

Describe the extent to which the Agency quality control system conforms to the requirements of subsection 3.e. of Circular A-125. Where appropriate, describe Agency plans to implement or upgrade a quality control system.

FOREWORD

This Volume of the "Department of Defense Financial Management Regulation" is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992. It governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. It directs financial management requirements, systems, and functions for all appropriated working capital, revolving, and trust fund activities. In addition, it directs statutory and regulatory financial reporting requirements.

Volume 11A of the "DoD Financial Management Regulation" establishes policy and procedures for Department of Defense Reimbursable Operations.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Unified combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that the provisions of this Volume are adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives and/or regulations without the prior written approval of the Office of the Under Secretary of Defense. (Comptroller).

The reporting requirements in this Regulation are exempt from licensing in accordance with paragraph E.4.f. of DoD 8910.1-M, "DoD Procedures for Management of Information Requirements," November 1986.

Recommended changes to and requests for deviations from or exceptions to the provisions of this Volume of the Regulation should be forwarded through appropriate chain of command channels along with specific justification, to

Office of the Under Secretary of Defense (Comptroller)
Director for Accounting Policy
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume, and other previously unpublished volumes, of this Regulation through its normal publication channels. Early in 1997, all 15 volumes of the Financial Management Regulation will be available on the Internet at: <http://www.dtic.mil/comptroller/fmr>. Printed or CD-Rom copies of the Regulation may be ordered through the Internet Homepage or directly from the Defense Automated Printing Service, at 1401 S. Fern Street, Arlington, VA 22202, or by telephone at (703) 607-5212.

INTRODUCTION TO THE DoD FINANCIAL MANAGEMENT REGULATION

GENERAL

The DoD Financial Management Regulation provides all DoD Components with the policy, regulation, and procedures within the area of responsibility of the Under Secretary of Defense (Comptroller) (USD(C)). The Regulation consists of the following 15 volumes:

1. General Financial Management Information, Systems, and Requirements
2. Budget Formulation and Presentation
3. Budget Execution - Availability and Use of Budgetary Resources
4. Accounting Policy and Procedures
5. Disbursing Policy and Procedures
6. Reporting Policy and Procedures
7. Military Pay Policy and Procedures
8. Civilian Pay Policy and Procedures
9. Travel Policy and Procedures
10. Contract Payment Policy and Procedures
11. Reimbursable Operations, Policy and Procedures
12. Special Accounts, Funds and Programs
13. Nonappropriated Funds Policy and Procedures
14. Administrative Control of Appropriations
15. Security Assistance Policy and Procedures

AUTHORIZATION

This Regulation is issued by the USD(C) under authority of Department of Defense Instruction 7000.14, "DoD Financial Management Policy and Procedures," dated November 15, 1992.

PARAGRAPH NUMBERING SYSTEM

The paragraph numbering system of this Regulation is consistent for all 15 volumes. The six digit paragraph number and its subparagraph designators are formulated as follows:

01
CHAPTER 1

01
SECTION 1

01
PARAGRAPH 1

A.1.a.(1)(a)
SUBPARAGRAPHS

PUBLICATIONS INCORPORATED

This Volume of the “DoD Financial Management Regulation” incorporates the policy and procedures contained in the following publications:

- DoD 7220.9-M “DoD Finance and Accounting Manual” (Chapters 26 and 29).
- DoDI 7220.1 “Regulations Governing the Use of Project Orders,” May 4, 1971.
- DoDI 7230.7 “User Charges,” January 29, 1985.
- DoDI 2010.1 “Support of International Military Activities,” September 2, 1981.
- DoDI 2010.11 “Unit Exchange of Training and Related Support Between the United States and Foreign Countries,” March 28, 1988.
- DoDD 3200.11 “Major Range and Test Facility Base,” September 29, 1980.
- DoDI 7310.5 “Accounting for Production and Sale of Forest Products,” January 25, 1988.

CHAPTER 1**GENERAL REIMBURSEMENT PROCEDURES
AND SUPPORTING DOCUMENTATION****0101 OVERVIEW**

010101. **Purpose.** This chapter supplements the standards for financial accounting for receivables (Chapter 3, Volume 4, “Accounting Policy and Procedures,” of this Regulation) and for budgetary accounting for reimbursements (Chapter 15, Volume 3 “Budget Execution - Availability and Use of Budgetary Resources” of this Regulation). It provides guidance on the amounts that shall be recouped when DoD Components perform work or sell property within the Department of Defense, to other U.S. Government agencies and to private parties. This chapter does not provide authority to sell to private parties. Specific legal authority must be identified to make such sales.

010102. General

A. The “Project Order Law” (Title 41, United States Code, section 23) and the “Economy Act” (Title 31, United States Code, section 1535) contain legal authority and requirements for one U.S. Government entity to perform work for another. Chapter 2, “Project Orders” and Chapter 3, “Economy Act Orders” of this Volume provides policy on the use of these orders within the Department. DoD working capital funds are established by Title 10, United States Code, section 2208 as one means of encouraging one DoD activity to perform work, render services, or provide supplies for another, based on the “Project Order Law” or on the “Economy Act.”

B. The price to be charged for goods and services furnished by the Department depends on whether that good or service is provided to, or for the benefit of, a DoD Component, a non-DoD Federal agency, a private party, or a foreign military sales customer. Therefore, the ordering DoD Component activity that requisitions or orders a good or service shall inform the performing DoD entity if the requisitioned goods or services are for the subsequent sale to, or benefit of, a customer outside of the Department.

C. This chapter provides guidance on the costing of reimbursements that should be obtained as a result of providing authorized services or materiel. It is applicable unless a specific DoD issuance authorizes alternative reimbursement policies. The most significant of these alternative reimbursement policies are as follows:

1. Volume 11B of this Regulation establishes the DoD policy for the recovery of cost for products and services provided by a DoD Working Capital Fund activity.

2. Volume 13 of this Regulation establishes the DoD accounting policy for Nonappropriated Fund instrumentalities.

3. Volume 15 of this Regulation establishes the DoD policy for the Foreign Military Sales of defense articles and defense services to friendly foreign governments and international organizations.

4. DoD Directive 1015.6, "Funding of Morale, Welfare, and Recreation Programs," establishes funding policy for morale, welfare, and recreation programs.

5. DoD Directive 3025.12, "Military Assistance for Civil Disturbances," provides the DoD policy for employment of military resources in the event of civil disturbances.

6. DoD Directive 3025.13, "Employment of Department of Defense Resources in Support of the United States Secret Service," provides the DoD policy for the use of DoD resources in support of the United States Secret Service.

7. DoD Instruction 4000.19, "Interservice and Intragovernmental Support," provides the DoD policy for interservice and intragovernmental support agreements.

8. DoD Directive 5525.5, "DoD Cooperation with Civilian Law Enforcement Officials," provides the DoD policy for reimbursable support provided to civilian law enforcement officials.

0102 POLICY AND PROCEDURES

010201. Disposition of Collections

A. Only when specifically authorized by law may collections be returned to the appropriation that procured the services or materiel being sold.

B. Collections for unfunded depreciation, unfunded civilian retirement, and interest shall be deposited into the General Fund of the U.S. Treasury as miscellaneous receipts unless otherwise provided for by this chapter or other DoD issuances. Disposition of collections for Foreign Military Sales shall be in accordance with Volume 15 of this Regulation.

010202. Billing Standard. DoD Components performing work or services on a customer order shall bill the requesting DoD Component, other federal agency, or the public for earned reimbursements (performance of work or services, payments to contractors, or delivery from inventory) within 30 calendar days after the month in which performance occurred. The payment due date shall not be more than 30 calendar days from the date of the invoice. Bills rendered shall not be subject to audit by the customer prior to payment.

010203. General Rules for Determining Amounts to be Reimbursed. The following rules shall be followed by DoD Components when determining amounts to be collected as reimbursements unless other specific reimbursable rules have been established in this volume or by

alternative reimbursement policies (see paragraph 010102.C., above). An order placed or agreement made under the Economy Act obligates an appropriation of the ordering entity. The amount obligated is deobligated to the extent that the entity filling the order has not incurred obligations, before the end of the period of availability of the appropriation (Title 31, United States Code, section 1535). The tables provided in addendum 1 and addendum 2 to this chapter provide a summarization of the rules for determining the amounts to be collected by appropriated fund and DoD Working Capital Fund activities.

A. Direct Civilian Labor

1. The cost of direct civilian labor incurred in the performance of a service for, or the furnishing of materials to, another entity shall be reimbursed unless the performing entity has been provided appropriated funds directly to it for that purpose. Otherwise, the performing entity would be penalized to the extent that its funds are used to finance the cost of performing another entity's work, while the ordering entity's appropriations are augmented to the extent that they now may be used for some other purpose.

2. Civilian labor performed for the benefit of other DoD Components, other Federal agencies, and the public shall be charged at actual hourly pay rates multiplied by the number of actual hours worked or assigned (detailed). Full-time assignments (details) shall be charged using annual rates. Otherwise, an hourly rate of 1/2087, as applicable, of the annual rate shall be used and a leave and holiday factor of 18 percent of pay cost added.

3. Direct civilian labor includes consultants and direct hire foreign nationals employed by DoD activities.

4. Civilian personnel fringe benefit rates will be determined in accordance with Chapter 6, Appendix C, "Civilian Personnel Fringe Benefit" of this volume.

5. Foreign national reimbursement rates are determined based on local pay agreements. Periodic reviews must be made to determine if the U.S. Government must make a contribution for severance pay or retirement pay.

B. Direct Military Labor

1. As a rule, the applicable military personnel appropriations shall fund the cost of direct (and indirect) military labor incurred in the performance of a service for, or the furnishing of materials to, another DoD entity. Therefore, since a direct appropriation is provided for that purpose, the cost of military labor shall not be charged to another DoD entity except for the cost of military personnel assigned to DoD Working Capital Fund activities. DoD Working Capital Fund activities shall be reimbursed by their customers for the cost of military labor as prescribed in Volume 11B of this Regulation.

2. Military labor shall be charged to non-DoD organizations on the basis of the actual hours worked or assigned (detailed). Assignments (details) shall be charged

using the annual military composite standard pay rates determined by the Military Departments. The military composite standard pay rates will be computed in accordance with Chapter 6, Appendix I, “Military Composite Standard Pay” of this volume.

3. Military fringe benefits (that is, other personnel support cost) shall be charged to non-DoD organizations on the basis of a percentage of military pay costs and billed as part of direct costs. The applicable percentage will be in accordance with Chapter 6, Appendix I, “Military Composite Standard Pay” of this volume.

C. Temporary Duty Costs (TDY). Travel costs of DoD civilian employees and military personnel incurred in performance of a reimbursable work order shall be charged as a direct cost when such travel can be identified specifically to the order. Costs of supplies and other directly relatable expenses also are chargeable.

D. DoD Personal Property and Inventory

1. DoD Working Capital Fund Materiel. Inventory issues and operating materials and supplies consumed from DoD Working Capital Fund stocks are reimbursable unless specific legal authority precludes reimbursement. Transfers to DoD Components, other Federal agencies, private parties and contractors performing work for a DoD Component or other Federal agency, shall be priced at standard prices (see Volume 11B of this Regulation).

2. Reutilization and Marketing Materiel (Surplus)

a. The disposition of materiel by a Defense Reutilization and Marketing Office shall be in accordance with DoD 4160.21-M, “Defense Reutilization and Marketing Manual.” The accounting treatment is set forth in Volume 11B and Chapter 7, “Other Assets” in Volume 4, “Accounting Policy and Procedures,” of this Regulation.

b. The general rules for the disposition of proceeds from the sale of scrap or excess personal property shall be in accordance with Chapter 5, “Disposition of Proceeds from Sales of DoD Excess and Surplus Personal Property” of this volume.

3. Non-DoD Working Capital Fund Materiel. The pricing of personal property for non-DoD Working Capital Fund materiel is dependent upon whether the item(s) being transferred or sold (a) will be transferred to another DoD Component and (b) would normally be replaced. This decision shall be based on a review of the approved acquisition objective. If the sale will reduce assets required to meet the approved acquisition objective, then replacement is required.

a. Issues Within or to Another DoD Component. Issues within or to another DoD Component shall be on a nonreimbursable basis, but will require an accounting entry to reflect the transfer from the losing to the gaining activity. The accounting entry shall reflect original acquisition cost and any accumulated depreciation.

b. Issues to Another Federal Agency or Private Parties. Issues to other federal agencies or private parties shall be as follows:

(1) Materiel to be Replaced.

(a) Materiel, including equipment, for which replacement (i.e., similar, but not exact) or replacement in kind (i.e., exact) is required, shall be transferred or sold at the estimated replacement cost, including the contract or production costs of the article less an adjustment for age and condition of the item being sold. This price is determined as follows:

1 Determine the normal useful peacetime life of the item or equipment to be sold.

2 Determine the percentage of useful life remaining on the item.

3 Apply the percentage developed in paragraph D.3.(1)(a)(2), above, to the estimated (or actual) cost of the replacement item. The resultant amount is the base cost to be used in the sale price calculation. Under no condition shall the sale price be lower than the scrap value plus the cost of the last major overhaul or outfitting accomplished within 24 months before the sale.

(b) If it is imperative that the item be replaced through accelerated procurements and normal pricing policies will not adequately recoup replacement costs, an exception to DoD pricing policies shall be requested from the Under Secretary of Defense (Comptroller), Office of the Deputy Comptroller (Program/Budget). Normally, the exception would be to either add a replacement factor or delay final pricing until the contract for replacement items is financially complete.

(2) Materiel Not to be Replaced. Material, including equipment, shall be transferred or sold to other federal agencies and private parties at their original acquisition cost minus an adjustment for age and condition of the item being sold. Reimbursements from Foreign Military Sales transactions from the sale of assets will be in accordance with Chapter 7, Volume 15 of this Regulation.

E. Contracts

1. Contract costs incurred for contracts awarded as part of a reimbursable agreement shall be billed to the benefiting organization.

2. Government-furnished materiel shall be billed in addition to contract costs in accordance with paragraph 010203.D., above.

3. If the contract is provided to meet the requirements of a non-Federal Government organization, the contractor shall be required to pay rent (at fair market value) to the Department for the use of plant or production equipment utilized in manufacturing the item being sold.

4. The collection of interest on a late payment is applicable to a contract to a non-Federal government organization that is required to pay a recoupment charge in accordance with Volume 15 of this Regulation. The contract recoupment clause 252.270-7000, required by Defense Federal Acquisition Regulation Supplement, provides for the established charge to be paid to the appropriate DoD focal point within 30 days following delivery to, or acceptance of the item by, a purchaser, whichever comes first. This is the due date. The contract interest clause 52.232-17, mandated by the "Federal Acquisition Regulation," provides that all amounts that become payable under the contract shall bear simple interest from the due date until paid, unless paid within 30 days of becoming due.

5. Contract administration charges shall be charged to other federal agencies and private parties, in accordance with statutory or policy requirements. Contract administration costs are not to be charged within a DoD Component or to another DoD Component when funding for such costs are included in the mission funding of the performing DoD entity.

6. DoD personnel services in support of contracts shall be costed in accordance with paragraphs 010203.A. and 010203.B., above.

F. Accessorial Expenses

1. Accessorial costs represent certain expenses incident to issues, sales, and transfers of materiel. Accessorial costs include costs incurred for packing, crating, and handling (PCH); transportation; and port loading and unloading. PCH expenses are costs incurred for sales or shipments of property. Accessorial expenses may be incurred by the DoD for direct delivery of items from contractor facilities or by DoD Components for items furnished from DoD stocks. Accessorial expenses incurred by contractors for direct delivery items are normally included in the contract price of the property. If accessorial costs of direct delivery items are billed separately by the contractor, they shall be reimbursed in accordance with this section. Accessorial expenses incurred by one DoD Component are not reimbursable from another DoD Component when funding for such costs are included in the mission funding of the performing DoD entity.

2. Unless otherwise provided by law or regulation, accessorial expenses shall be billed to the following:

a. Non-DoD Federal departments, agencies, or instrumentalities.

b. Non-Federal entities, including DoD contractors.

c. Nonappropriated funds when property is transported for DoD morale, welfare, and recreation activities unless reimbursement has been waived by DoD Directive 1015.6, "Funding of Morale, Welfare, and Recreation Programs."

3. Accessorial charges shall be reimbursed by non-DoD activities at the actual cost incurred. Accessorial charges for Foreign Military Sales are prescribed in Chapter 7, Volume 15 of this Regulation.

G. Asset Use Charge. A charge for the use of DoD assets (facilities and equipment, or both) is required to recoup depreciation and interest on investment. Amounts collected shall be returned to the U.S. Treasury as miscellaneous receipts, unless otherwise provided for by statute or other DoD guidance. (Asset use charges are not assessed for Foreign Military Sales, see Volume 15 of this Regulation). A four percent charge, developed by the Office of the Secretary of Defense through cost-finding techniques, may be used or the following calculations shall be performed:

1. Depreciation. Depreciation expense represents the amortization of the cost of depreciable property, plants, and equipment as an operating expense over the period in which assets are expected to provide benefits. Depreciation shall be charged using the straight-line method of depreciation. The calculation of depreciation is illustrated in Table 1-1, below.

2. Interest on Investment in Assets. Both DoD Working Capital Fund and non-DoD Working Capital Fund activities shall include in reimbursement billings to private parties an amount to recognize the interest on investment in fixed assets when such assets are acquired or manufactured for the purpose of, or prepared for use in, providing materiel to private parties. The calculation of interest on investment is illustrated in Table 1-2, below.

H. Repair and Maintenance. When repair and/or maintenance of items occurs, costs from a cost accounting system or, in its absence, equivalent costs developed through cost-finding techniques shall be billed.

1. Labor Cost. The cost shall be computed in accordance with paragraphs 010203.A. and 010203.B., above.

2. Materiel and Supplies. The cost shall be computed in accordance with paragraph 010203.D., above.

3. Transportation and Related Costs. The cost shall be computed in accordance with paragraph 010203.F., above.

EXAMPLE OF STRAIGHT-LINE METHOD OF DEPRECIATION

Acquisition cost of the asset	\$1,000,000
Less: Residual value (scrap)	<u>\$ 100,000</u>
Depreciable basis	<u>\$ 900,000</u>

Estimated useful life in years 20

The annual depreciation expense of \$45,000 is computed by dividing the \$900,000 depreciable basis by the 20-year useful life.

Hourly charge is computed by dividing the annual depreciation expense of \$45,000 by 2,080 (standard yearly hours) to arrive at \$21.63 per hour.

Multiply the hours used to complete the customer order by the hourly charge. For example, 500 hours x \$21.63 = \$10,815 depreciation expense to be charged.

Table 1-1**EXAMPLE OF INTEREST ON INVESTMENT CALCULATION**

Acquisition cost of the asset	\$1,000,000
Less: Accumulated depreciation (5 years at \$45,000 per year)	<u>\$ 225,000</u>
Net Book Value	<u>\$ 775,000</u>

Annual interest (10 percent per annum) \$ 77,500

Hourly charge is computed by dividing the annual interest of \$77,500 by 2,080 (standard yearly hours) to arrive at \$37.26 per hour.

Multiply the hours used to complete the customer order by the hourly charge. For example, 500 hours x \$37.26 = \$18,630 interest on investment to be charged.

Table 1-2

4. Overhead Costs. These costs shall be computed in accordance with paragraph 010203.J., below.

I. Leased or Loaned DoD Equipment. When determining the charge for leased or loaned equipment, the following elements shall be billed:

1. Depreciation is not applicable to federal agencies unless the billing activity is a working capital fund. Depreciation shall be based on cost-finding techniques for sales to private parties unless actual rates are known. Calculations shall be in accordance with subparagraph 010203.G.1., above.

2. Interest on investment in assets shall be computed in accordance with subparagraph 010203.G.2., above.

3. Value of equipment not returned to the owning DoD Component shall be a sale to the borrowing organization. This sale shall be priced in accordance with paragraph 010203.D., above.

4. Accessorial expenses shall be recognized in accordance with paragraph 010203.F., above.

5. Repair costs to restore equipment or property to its condition at the time leased or loaned shall be collected from the using organization. The amounts may be based on either actual job order cost accumulations or estimates of the cost to be incurred based upon past repair and maintenance experience for similar equipment. The amounts collected shall be returned to the appropriation that financed the repair and maintenance. Direct labor costs shall be computed in accordance with paragraphs 010203.A. and 010203.B., above. Materiel and supply costs shall be computed in accordance with paragraph 010203.D., above. Overhead shall be computed in accordance with paragraph 010203.J., below.

J. Overhead

1. Overhead is sometimes referred to as indirect or general and administrative costs, which consist of costs that cannot readily, or directly, be identified in the performance of a customer order. Examples of such costs are supervision, office supplies, utility costs, etc. If an organization has a significant amount of reimbursable effort, such costs are accumulated in a cost pool and allocated to customers. In the absence of a cost accounting system, applicable costs may be estimated.

2. Overhead charges normally are not applied to reimbursable customer orders received from appropriated fund activities within the Department. However, appropriated fund activities are to charge for overhead when sales are consummated with other federal agencies and private parties. DoD working capital fund activities shall be reimbursed by their customers for overhead charges as prescribed in Volume 11B of this Regulation.

010204. DOCUMENTATION STANDARDS

A. General. Orders must be supported by documented evidence of a formal offer and acceptance between the grantor and grantee of the order. (See DoDI 4000.19, “Interservice and Intragovernmental Support” for additional guidance.) In the absence of such documentation, there can be no assurance that there is a meeting of the minds on the material or services to be provided nor that payment is required. The principal documents used by the Department are:

1. The memorandum of understanding (MOU).
2. The memorandum of agreement (MOA).
3. The universal order format.

B. Preparation Standards. The following standards apply to the preparation of these documents:

1. MOU or MOA. These documents normally are used when a certain unquantifiable type of support is required over a period of time, usually a 1-year duration. The MOU or MOA establishes the estimated total yearly requirement. Calls then are placed against the MOU or MOA as required support is quantified.

a. The minimum essential information that shall be included in an MOU or MOA is listed below. A model of an MOA is illustrated as addendum 3 to this chapter.

(1) The authority for entering into the MOU or MOA, such as the “Economy Act” (31 U.S.C. 1535) or the “Project Order Law” (41 U.S.C. 23). See Chapter 8, “Standards for Recording Commitments and Obligations,” in Volume 3 of this Regulation.

(2) A description of the material or services required.

(3) The established dollar limits and any authority to exceed applicable limits without specific approval from the ordering activity.

(4) The financing source or fund citation.

(5) The delivery requirements.

(6) The payment provisions.

(7) The duration of the agreement.

(8) The form in which specific orders against the MOU or MOA will be placed, for example, telephone calls, memoranda, or supplementary formal orders.

b. The MOU or MOA should be coordinated with appropriate program, comptroller, and legal offices. This is a fundamental control technique to demonstrate and document the legality and propriety of the arrangement.

c. When a DoD activity is the ordering organization, any MOU or MOA shall contain language that clearly sets forth the fact that the document is subject to the availability of funds unless the agreement itself is to be an obligating document. If the agreement is to be an obligating document, there must be a certification of fund availability and the obligation must be recorded promptly.

2. Universal Order Format. The universal order format is a way to document the financial terms of the offer and acceptance when specific services or quantities are known. Similar formats or computer-produced equivalents that contain all of the required information may also be used. This is an all-purpose format that may be issued on a reimbursable or direct citation basis, or both. It is a specific and definite request for material, supplies, equipment, or services. This format does not replace DD Form 1144, "Support Agreement" or DD Form 448, "Military Interdepartmental Purchase Request." The universal order format may serve as an "Economy Act Order," a "Project Order," or an order based upon other statutory authority. Performance of the work and/or services requested must be accomplished in accordance with the statutes and regulations governing the type of order. A sample of the universal order format and instructions for preparation are illustrated in addendum 4 to this chapter.

a. The universal format contains essential data such as the following:

(1) The funds citation using the current applicable accounting classification.

(2) A document number, assigned by the requesting activity, that uniquely identifies the document and provides an audit trail between the order, posting to the accounting system and posting to other automated information systems.

(3) The dollar value of the order and any flexibility allowed in executing the order.

(4) Detailed description of work or services to be performed or items to be delivered.

(5) The expected completion date for the order or request.

(6) Documentation of the names of the officials responsible for both the offer and acceptance to meet the requirements established for the administrative control of appropriations.

(7) Funds expiration date that indicates when the funds must be obligated by the performing activity. Funds not actually obligated by the expiration date shall be returned to the requesting activity. An amendment shall be prepared by the performing activity to return excess funds.

b. Any restrictive statements relating to the reimbursable or direct citation portion shall be included when deemed appropriate.

c. Amendments to the order may be prepared if funds are not sufficient to let a contract or perform the requested services. Amendments can only be accepted by the requesting activity.

d. The requesting activity shall record the total value of the order as a commitment in its financial records. If the order is accepted on a reimbursable basis, obligations shall be recorded upon receipt of written acceptance from the performing activity. If the order is on a direct fund citation basis, obligations shall be recorded upon receipt of the contract and attachments from the contracting activity. (Additional guidance can be found in Volume 3, Chapter 8, “Standards for Recording Commitments and Obligations” of this Regulation.)

ADDENDUM 3
MEMORANDUM OF AGREEMENT (MOA)
BETWEEN THE
U.S. (INSERT AGENCY NAME) AND THE U.S. DEPARTMENT OF DEFENSE
TO REIMBURSE THE DEPARTMENT OF DEFENSE
FOR _____

I. Purpose. This agreement establishes the financial arrangements between the (identify the other Federal agency) and the Department of Defense to reimburse the Department of Defense for the (identify the program).

II. Description of Services to be Provided. The Department of Defense is to maintain the capability to respond on an as required basis to the (identify the other Federal Agency) requirements for (describe the required support) and to meet the needs of the (identify the Federal Agency activity being supported) that has limited (identify the support) capabilities.

III. Basis for Reimbursement

A. This agreement is entered into under the provisions of (identify the authority, such as the "Economy Act") and provides for reimbursable orders of approximately \$_____. This MOA is subject to annual modification as necessary, to provide for reimbursement of costs as described below in providing the requested support. The amounts in respective reimbursable orders may not be exceeded by more than (display the ceiling by either a percentage or dollar value) without written approval by the (other Federal Agency).

B. Support furnished under the terms of this agreement shall be for the costs incurred by the Department of Defense in providing the services.

IV. Procedural Arrangements

A. Estimating. The Department of Defense continuously will review its actual costs incurred in providing the requested support to ascertain if they are in line with the annual cost estimates. The Department of Defense will promptly advise the (other Federal agency) of any required revisions to the value of this agreement.

B. Ordering. The (other Federal agency) will provide a completed order for specific material or services to the Department of Defense for acceptance and the identification of the (other Federal agency) accounting data for resulting billings (unless a check is provided in advance). The delivery requirements of the (other Federal agency) will be stated in the order.

ADDENDUM 3

C. Billing. The DoD Component will bill the (other federal agency) on a monthly basis by submitting Standard Form (SF) 1080 (Voucher for Transfers Between Appropriations) and including a breakdown of actual cost elements being reimbursed. The voucher shall be sent or delivered to the (other Federal agency billing address) within 30 days after the month in which the transaction occurred.

D. Payment of Bills. The (other Federal agency) paying office will forward check payment(s), along with a copy of billed invoice(s) to appropriate addressees listed on billing invoices within 30 days of the date of invoice, unless the SF 1080 is identified as no check required. Bills rendered shall not be subject to audit in advance of payment.

V. Effective Date. This agreement is effective _____ and will terminate on _____.

(Other Federal Agency)

(DoD Component)

ADDENDUM 4**PREPARATION INSTRUCTIONS FOR THE UNIVERSAL ORDER FORMAT**

Instructions for the preparation of the “universal order format” are as follows: The requesting activity shall complete blocks 1. through 12. and 17. The performing activity shall complete blocks 13. through 16., 18 and 19.

<u>Block No.</u>	<u>Title and/or Description</u>
1	<u>Type of Order</u> - Indicate the type of order being processed. The order may be on a reimbursable or direct fund cite basis, or both. The order may serve as an “Economy Act Order” (31 U.S.C. 1535), a “Project Order” (41 U.S.C 23), or an order based upon other statutory authority. Performance of the work or services, or both, must be accomplished in accordance with the applicable statutes.
2	<u>Document Number</u> - Document numbers are generally assigned by the requesting activity. These numbers are for accountability and control purposes. It uniquely identifies the document and is the number under which the funds cited in blocks 10, 15, and 16, are to be recorded (that is, committed, obligated, expended, etc.).
3	<u>Date Prepared</u> - The date on which the form was prepared by the originator.
4	<u>Order Completion Date</u> - The date by which the work or services being requested must be completed by the performing activity, or physical delivery of material. An extension or change of the completion date, if required, shall be requested in writing and is subject to the approval of the requesting activity cited in block 6. An amendment to the original order shall be prepared by the requesting activity if extension or change is approved.
5	<u>Amendment Number</u> - The number assigned by the originating activity to uniquely identify each amendment to the original (basic) document.
6	<u>From</u> - The name and address of the activity requesting the work or services.
7	<u>Point-of-Contact</u> - The name of an individual at the requesting activity who can be contacted if any questions should arise regarding the order. A telephone number and office symbol also should be identified. This individual generally is not the same as the authorizing official in block 17.

- 8 To - The name and address of the activity being requested to perform the work or services.
- 9 Mail Billings To - The name and address of the organization or activity to whom the billings are to be mailed when the universal order format is issued external to DoD Components. Billings normally shall be submitted by the performing activity on a monthly basis unless specifically stated in block 12.
- 10 Accounting Data
- a. Enter the funds expiration date. This date indicates when the funds must be obligated by the performing activity. Funds not actually obligated by the expiration date shall be returned to the requesting activity.
- b. The accounting classification data code structure shall be the one currently in effect. (If the accounting classification code structure is other than DoD, such as that of a civil agency, this block may be altered to accommodate the required form.)
- c. The fund balances should be sufficient to cover the total estimated amount for the subject order. Block 10.f. represents the total amount of funds authorized for the particular document or amendment. Block 10.g. represents the cumulative total amount of funds authorized, including previous amendments, as of the date of that particular document and/or amendment. In the case of a “basic” document, the amounts appearing in blocks 10.f. and 10.g. will be identical.
- 11 Interservice Support Program - Indicate the applicable box pertaining to items requested.
- 11a Remarks - Use for additional information as required.
- 12 Description of Work to be Performed and Other Instructions - Enter a specific, definite and complete description of work encompassed by the order, each item of supplies, material, equipment, or services required. If additional space is required, a continuation sheet may be used. Add the estimated amounts in block 12.g. and enter the amount in block 12.h. The amount in block 12.h. should be the same as blocks 10.f. and/or 10.g.
- 13 Provided through Reimbursement: (Estimated Amount) - Indicate the items and corresponding amounts shown in block 12., which will be completed through reimbursement. This block should be completed by the performing activity.

- 14 Procured by Direct Citation: (Estimated Amount) - Indicate the items and corresponding amounts shown in block 12, which will be completed through direct citation. This block should be completed by the performing activity.
- 15 Funds Provided through Reimbursement - Add the amounts in block 13.c. and enter in this block. The sum of blocks 15 and 16 shall equal the amount shown in block 12.h. Block 12.h. shall equal block 10.f. Amounts authorized in this block are not subject to the Antideficiency Act (Title 31, United States Code, section 1517) unless specifically indicated on the face of the document.
- 16 Procured by Direct Citation - Add the amounts in block 14.c. and enter in this block. The sum of blocks 15 and 16 shall equal the amount shown in block 12.h. Block 12.h. shall equal to block 10.f. The amount in this block constitutes a limitation under Title 31, United States Code, section 1517 when the purchasing office or contracting activity is a separate entity from the requesting activity.
- 17 Authorizing Official - Enter the name, title, and signature of the individual in the requesting activity authorized to issue the document. The date the authorizing official actually signed the document also must be included. This date is the basis for determining the accounting month under which the commitment or consignment is to be recorded.
- 18 Accepting Official - Written acceptance of this order is required and is accomplished by completing this block. Enter the name, title, and signature of the individual in the performing activity authorized to accept the document.
- 19 Point-of-Contact - The name of an individual at the performing activity who can be contacted if any questions should arise regarding the order. A telephone number and office symbol should also be provided. This individual generally is not the same as the accepting official in block 18.

CHAPTER 2**PROJECT ORDERS****0201 INTRODUCTION**

020101. This chapter reissues guidance formerly contained in DoD Instruction 7220.1, “Regulations Governing the Use of Project Orders.” This chapter prescribes regulations governing the use of project orders in the Department of Defense pursuant to authority contained in Title 41, United States Code, section 23.

020102. The referenced authority provides that:

“All orders or contracts for work or material or for the manufacture of material pertaining to approved projects heretofore or hereafter placed with Government-owned establishments shall be considered as obligations in the same manner as provided for similar orders or contracts placed with commercial manufacturers or private contractors, and the appropriations shall remain available for the payment of the obligations so created as in the case of contracts or orders with commercial manufacturers or private contractors.”

020103. The term “approved projects,” as used in the referenced authority, has no special meaning. It refers simply to projects that have been approved by officials having legal authority to do so.

0202 APPLICABILITY AND SCOPE. The provisions of this chapter apply to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Inspector General of the Department of Defense, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as “DoD Components”).

0203 DEFINITIONS

020301. **Project Order.** A “project order” is a specific, definite and certain order issued under the authority contained in 41 U.S.C. 23 which, when placed with and accepted by a separately managed DoD establishment, serves to obligate appropriations in the same manner as orders or contracts placed with commercial enterprises. A project order is a valid and recordable obligation of the issuing entity when the order is issued and accepted, providing the obligation otherwise meets the criteria for recordation of an obligation contained in 31 U.S.C. 1501.

A project order which lacks, at the time of issuance or acceptance, a description of the product to be provided is not sufficient to create a recordable obligation. (However, often there may be repeat orders for which the performing installation will have detailed and definite specifications available. Thus, if the performing activity has on file those elements which make a project order specific, definite, and certain, and those elements are in sufficient detail to enable the performing installation to proceed in carrying out the work ordered, it is not necessary to also

include those elements within the project order itself. In such cases, reference may be made on the project order that specification documentation is retained on file by the performing activity.)

020302. Project Order Form. Although the use of a specific project order form is not prescribed, a form substantially in the format of that shown in addendum 4, “Universal Order Format,” to chapter 1, “General Reimbursement Procedures and Supporting documentation,” of this volume should be used whenever practicable. However, any form may be deemed to be a “project order” and shall be subject to the provisions of this chapter, regardless of the form in which it is issued when it is:

- A. Issued by, and accepted for performance in, a DoD-owned and operated establishment,
- B. The subject of any of the purposes set forth in paragraph 020504.B of this chapter, and
- C. Placed with a DoD-owned and operated establishment.

All forms that are to be treated as project orders clearly shall be identified as such by inclusion of a statement such as “This order is placed in accordance with the provisions of 41 U.S.C. 23, as implemented by Department of Defense regulation.”

020303. DoD Owned Establishment. A “DoD owned establishment” for the purpose of this chapter is any DoD owned and operated activity (i.e., not contractor owned or operated). Such activities include working capital fund activities; other revolving fund activities; and appropriated fund activities provided the appropriated funded activity engages in reimbursable operations that are not reasonably severable into fiscal year segments and those reimbursable operations can be forecasted with reasonable accuracy. Examples of such activities include equipment overhaul or maintenance shops, manufacturing or processing plants or shops, research-and-development laboratories, computer software design activities, testing facilities, and proving grounds owned and operated by the Department.

020304. Contractual Relationship, Commercial Contracts, Defaulting Contractors, and Commercial Contracting. Terms such as “contractual relationship,” “commercial contracts,” “defaulting contractors,” and “commercial contracting” are used to indicate the close relationship between project orders and commercial contracts in the particular circumstances involved. The use of these and similar terms should neither be construed as requiring project orders to be subject to the provisions of the “Federal Acquisition Regulations System,” nor as imposing upon the parties to a project order agreement, responsibilities (legal or otherwise) not provided for in this chapter.

020305. Allotment. The term “allotment” includes approved operating budgets for operation of the U.S. Armed Forces.

0204 ADVANCE PLANNING

020401. Ordering DoD Components shall give performing DoD Owned establishments advance planning data covering the work estimated to be placed with the performing DoD Owned establishment. This advance planning data shall be used by a performing DoD Owned establishment in the development of its operating budget. An operating budget is subject to revision as subsequent specific work requirements, including significant revisions thereof, are determined.

020402. At the appropriate time during project order negotiations, performing DoD Owned establishments shall give ordering DoD Components cost estimates for each item to be produced, or work to be performed, under the project order.

0205 CONDITIONS GOVERNING ISSUANCE AND ACCEPTANCE OF PROJECT ORDERS

020501. A contractual relationship must exist (be created by the project order) between the parties involved.

020502. Consistent with the concept that one entity cannot enter into a formal contract with itself, a project order shall not be used by one organizational unit to order work from another organizational unit under the same activity commander.

020503. Expiration dates of project orders may not extend beyond the point in time in which the ordering appropriation will be canceled (generally, five years after the appropriation expires for new obligation).

020504. Project orders may be issued only to DoD owned establishments (see subsection 020303) that have been given the authority to operate a reimbursable program in an amount equal to or exceeding the project order amount(s). Transactions between the Department and other government agencies are governed by the Economy Act (31 U.S.C. 1535).

To determine whether the project order statute, rather than the Economy Act, provides the statutory authority for an intra-DoD order, determine whether the order is being placed with a DoD owned establishment as that term is defined in paragraph 020303, whether the order is “entire” under paragraph 020509, or whether it satisfies the requirements of the Economy Act set forth in chapter 3 of this volume.

020505. All payments by an ordering DoD Component to a performing DoD owned establishment shall be based upon either an approved payment schedule in the order or upon billings from the performing DoD owned establishment to the ordering Component.

020506. Specific, Definite and Certain. Project orders are analogous to contracts placed with commercial concerns and, similar to such contracts, shall be specific, definite and certain both as to the work encompassed by the order and the terms of the order itself. A project

order must be accepted by the performing DoD Owned establishment as a basis of obligation by the issuer.

020507. Certification of Availability for Purpose. Project orders are subject to the same fiscal limitations that are contained within the appropriation from which they are funded. However, the performing entity may not be aware of all such appropriation limitations. Therefore, an official of the issuing entity should provide a certification, on or attached to the project order, that the funds cited on the project order are properly chargeable for the purposes cited in the project order.

020508. Bona Fide Need. Project orders must serve a bona fide need, of the issuing activity, that exists in the fiscal year in which the project orders is issued; otherwise, a valid obligation is not accomplished. It is not intended that the rule of bona fide need of the fiscal year rule be construed to preclude procurement lead time. Thus, where materials, for example, cannot be obtained in the same fiscal year in which they are needed and contracted for, a provision for delivery in the subsequent fiscal year does not violate the bona fide need rule so long as the time intervening between contracting and delivery is not excessive and the procurement is not for standard commercial items readily available from other sources. Bona fide need generally is a determination of the requesting activity and not that of the performing activity. A performing activity should, however, refuse to accept a project order if it is obvious that the project order does not serve a need existing in the fiscal year in which issued.

020509. “Entire” versus “Severable.” To be eligible for project order financing, the need must be present in the fiscal year in which the project order is issued, require a series of actions over a period of time which may cross a fiscal year, and call for work or services that are not reasonably severable between fiscal years. For instance, an order for an “entire” end item or service would call for a single or unified outcome or product, and would be one in which few, if any, benefits would accrue if the work were terminated without completion at the end of the fiscal year in which it was placed. The distinction between “entire” and “severable” may not be evident readily and, therefore, requires some judgment. The objective desired by the requesting customer should be used in the determination. For example, if the customer provides an item (e.g., an aircraft) for overhaul or renovation and desires the entire item to be returned in a serviceable state, then a repair of a single component (e.g., avionics, landing gear, electronics) of the item when the item consists of many components needing repair, would not be a “severable” action. Conversely, if a customer desires an automated system that consists of multiple modules and some (or all) modules can be used independent of the entire system, then each module that can be used independent of the entire system is severable.

A. The following are examples that ordinarily are severable and therefore not eligible for project order financing.

- (1) Custodial or housekeeping services.
- (2) Security or fire protection services.

(3) Refuse collection.

(4) Routine maintenance in general, including grounds or surfaced area maintenance; heating and air conditioning systems operation and maintenance; and other real and personal property maintenance.

(5) Services such as education, training, subsistence, storage, printing, laundry, welfare, transportation (including port handling), travel, utilities or communications when any of these purposes is the primary purpose of the request.

(6) Efforts where the stated or primary purpose of the order is to acquire a level of effort (e.g., 100 hours, 20 weeks or one year) rather than a specific, definite, and certain end-product.

B. The following are examples in which an entire need generally exists and, therefore, are eligible for project order financing.

(1) Manufacture, production, or assembly of items including experimental prototypes or items manufactured and assembled for test. "Items" includes ships, aircraft, guided missiles, other weapons, vehicles of all kinds, ammunition, clothing, machinery and equipment for use in such operations, and other military and operating supplies and equipment (including components and spare parts).

(2) Renovation, rebuild, rehabilitation, reconditioning or overhaul of items, including such operations as are necessary to restore an item to a condition of serviceability equivalent to its original state.

(3) Alteration or modification in design or assembly of an item to meet revised specifications or to correct defects.

(4) Construction or conversion of items (including buildings and other structures), utility and communication systems and other public works.

(5) Development of software programs and automated systems when the purpose of the order is to acquire a specific, definite, and certain non-severable end-product that is reasonably achievable with the resources (financial, human, and plant) available to the provider rather than a level of effort over an extended period.

(6) Production of engineering and construction related products and services.

020510. Commencement of Work. The work to be performed under project orders shall be expected to begin within a reasonable time after its acceptance by the performing DoD owned establishment.

A. Although work on a project order is not required to commence in the year of project order acceptance, as a minimum requirement, evidence must exist at the time of project order acceptance showing the intention that work (or procurement if required prior to the beginning of work) will begin without delay (usually within 90 days) and will be completed within the normal production period for the specific work ordered.

B. If work (or procurement if required prior to the beginning of work) financed from an appropriation that expired for obligation on September 30 on a project order does not begin, or is not expected to begin, before January 1 of the following calendar year, the project order shall be returned by the performing activity for cancellation unless it is documented that the delay is unavoidable and could not have been foreseen at the time of project order acceptance and that documentation is retained for audit review.

020511. Contingent Event Prohibition. Project orders shall not be issued if commencement of work is contingent upon the occurrence of a future event or authorizing action by the ordering DoD Component.

020512. Lawful Purpose. Project orders shall not be used to contravene provisions of the law or to accomplish, by means of this device, what regulations do not permit under commercial contracts.

020513. Authorized Purpose. Project orders shall not be issued for the primary (or secondary) purpose of continuing the availability of appropriations.

020514. Project Order Modification and Amendment. Project orders, similar to commercial contracts, may contain special provisions and may subsequently be modified or amended. Unlike procurement contracts with commercial concerns, where competition requirements limit contract modifications, project orders may be changed or increased as long as proper funding is available, and the new work otherwise meets the general conditions governing issuance and acceptance of project orders identified above. If the appropriation used to fund the initial order remains available for new obligation, use it to fund modifications and amendments that are a bona fide need of that appropriation, even if the modification changes the scope of the order. If the appropriation used to fund the initial order has expired, use it to fund only those amendments and modifications that are within the general scope of the initial project order. In cases where the original appropriation has expired and no longer is available for new obligations, and the modification or amendment changes the general scope of the original order, the amendment or modification should be funded from the current appropriation. However, the appropriation cited on the project order will remain available for price increases and changes that are within the scope of the original project order. Subject to the provisions of subsection 020708, amendments to project orders, which have the effect of partial or complete termination of such orders, shall provide for the inclusion of the costs of termination.

020515. Ability to Perform. Project orders shall be issued only to those DoD owned establishments that are capable of substantially performing the work ordered. “Substantially,” as used in this paragraph, means that the project order recipient should incur

costs of not less than 51 percent of the total costs attributable to rendering the work or services ordered. Total costs to render the work or services ordered include the costs of goods or services obtained from/provided by contractors.

020516. Subsidiary Ordering. The provisions of this chapter are not intended in any way to authorize one DoD owned establishment to act as a general contracting or purchasing agent for another entity.

A. Subsidiary ordering (within the government) and contracting (with commercial firms) pursuant to a project order is authorized, provided such subsidiary ordering and contracting is incident to, and is for use in, carrying out the purpose of the project order.

B. Project orders must contemplate the use of personnel and facilities (but may include use of other resources) on the part of the project order recipient, beyond those incident to contract procurement. In this connection, it is not improper for a project order recipient to subcontract for component parts when such parts will be assembled later by the recipient into the end product ordered. However, the assembly operation must require the use of personnel whose technical skills are essential to completion of the job. In addition, the work expended in the assembly operation should be of such an extent that it avoids a perception of the project order being used for contract procurement.

C. If a project order cannot be placed with another DoD owned establishment because that establishment would fill the order by contracting with a commercial concern for performance of substantially the entire order, it is possible that the order could be placed pursuant to the Economy Act [31 U.S.C. 1525(a)(3)], which permits the agency or agency unit filling the order to provide or procure by contract the goods and services necessary to perform the order.

020517. Project Order Default. Where recipients of project orders default or fail to perform work or services specified in the orders, and replacement contractors are required as the result of such default;

A. Defaulted work or services may be procured from another source to the extent of any unobligated balance in the appropriation thus obligated. Similarly, a project order also may be issued to a DoD establishment under an appropriation obligated by contracts with outside contractors when such contract is terminated for default or failure on part of the contractor to perform work or services specified in the contract. All such replacement project orders resulting from defaults may be issued and obligated subsequent to the period of availability of the appropriations for obligation if the replacement project order is made without undue delay after the termination of the original contract or project order.

B. Replacement project orders fulfill bona fide needs of the appropriation that had funded the contract or project order that was terminated for default. The replacement project order shall be awarded on the same basis and be similar substantially to the original project order in its scope and size. The replacement project order must not extend beyond the point in time in

which the ordering appropriation will be canceled (generally, five years after the appropriation expires for new obligation).

020518. Project Order Financing. Project orders shall be fully financed by the ordering DoD Component from obligational authority current at the time the project order is issued and accepted. However, project orders issued for projects or programs financed by a research, development, test and evaluation appropriation may be prepared on an incrementally programmed basis. Research, development, test and evaluation appropriation projects or programs financed on an incrementally programmed basis are ones that are funded for the remainder of the funding appropriation's period of current availability or the current fiscal year vice a fully funded to completion basis.

020519. Direct-Cite Prohibition. Project orders shall be issued to a DoD-owned establishment for performance only on a reimbursable basis. They may not be made a subdivision of funds, similar to an allotment; nor may appropriations of the ordering DoD Component be cited by the performing DoD owned establishment when incurring and recording obligations incurred in performance of the order.

020520. Reimbursement of Costs Incurred in Performance of a Project Order. Reimbursement of costs incurred by a performing activity in fulfillment of a project order may be accomplished in the manner ordinarily used by that performing activity. The usual and accepted manner of accomplishing reimbursement is by citing the funds of the requesting activity as the funds charged on the SF 1081, "Voucher and Schedule of Withdrawals and Credits."

0206 CONDITIONS GOVERNING PERFORMANCE OF PROJECT ORDERS

020601. After acceptance, project orders shall be performed as expeditiously as possible according to the terms as accepted. (See subsection 020510 for additional information.)

020602. Performing DoD owned establishments shall be responsible for promptly advising ordering DoD Components concerning changes in delivery schedules.

020603. In the case of cost-reimbursement project orders, performing DoD Owned establishments shall give ordering DoD Components a summary of costs incurred to date and estimates of costs to complete the order only when specifically requested by the ordering DoD Component. The ordering DoD Component shall not request the submission of this cost information any more frequently than monthly. No special report forms are authorized for this purpose.

020604. Expiration dates of project orders may be extended with the approval of the ordering DoD Component. Expiration dates of project orders may not extend beyond the point in time in which the ordering appropriation will be canceled (generally, five years after the appropriation expires for new obligation).

0207 REIMBURSEMENTS TO PERFORMING DOD OWNED ESTABLISHMENTS

020701. Performing DoD Owned establishments shall be reimbursed for work covered by project orders upon the basis of costs incurred or on the basis of fixed prices.

020702. Fixed Price Project Orders. A fixed-price project order shall establish a firm price for purposes of reimbursement for the work or services ordered. This shall not preclude amendments to cover changes in scope of any item in the order. A fixed-price basis maybe used if all of the following conditions are present:

A. Work specifications are stable, specific and definite, and they are made part of the order (or incorporated by reference) for each item at the time the project order is accepted for performance on a fixed-price basis or amended for any changes in the scope of the work. This requirement is especially critical for project order accepting activities that are financed by a direct appropriation. An activity financed by a direct appropriation should not accept a fixed-price project order unless it can predict with a high degree of certainty the actual cost to complete the project order. Otherwise, the prohibition against inappropriately augmenting an appropriation and/or using an appropriation for a purpose not authorized could be violated.

B. When there is more than one item of work or service in a project order, including amendments for changes in scope, each item is made the subject of a separate price as shown by the order or in a list incorporated therein by reference. When the work to be performed is the subject of a work list (e.g., equipment overhaul), each entry on the work list shall be considered to be an item.

C. No substantial contingencies are included in the price, nor considered to be involved in performance, so that cost variations in performance can reasonably be expected to be minor.

D. There is a satisfactory system of cost estimating used as a basis for establishing fixed prices. When cost standards are used in cost estimating for the purpose of pricing, they shall be adjusted for this purpose to include expected cost variances.

E. The same elements of cost are used in cost estimating and establishing fixed prices as would be required for use if reimbursements were based upon actual cost incurrence.

020703. Cost-Reimbursement Project Orders. The amount stated in a cost-reimbursement project order shall be a sound estimate of the costs to be incurred in performance of the work or services ordered. Such estimates shall be determined upon the basis of the specific work to be performed. The estimate of costs shall be the ceiling amount for purposes of reimbursement for the work or services ordered.

A. The performing DoD Owned establishment and the ordering DoD Component shall effect timely renegotiations for revisions of the ceiling amount of cost-

reimbursement project orders. Such renegotiations should take place whenever cost performance indicates the need for adjustment of the ceiling amount upward or downward, but before cost of performance has exceeded 75 percent, when compared with the current ceiling amount. However, renegotiations need not be conducted when the probable cost of renegotiation is greater than the adjustment amount. In such cases the difference, upward or downward, should be absorbed by the performing establishment.

B. Cost-reimbursement project orders may be converted to a fixed-price basis, provided all of the conditions governing the use of fixed-price project orders are present (see subsection 020702). In addition, the conversion must be effected prior to incurring either 50 percent of the total cost of the work, or 50 percent of the period of performance, whichever comes first.

020704. Unfunded Costs. For purposes of this subsection, unfunded costs are costs that are not funded in the account or appropriation funding the performing activity. (Examples of unfunded costs are not universal. Some performing revolving fund accounts [primarily the working capital fund accounts] may fund costs that are unfunded by appropriated funds. Unfunded costs of an appropriated funded performing activity normally include labor of military personnel and depreciation of capital assets.) When an ordering DoD Component places an order on behalf of persons or agencies outside the U.S. Government (including reimbursable transactions pursuant to the Foreign Military Sales Act), the ordering DoD Component shall indicate this fact on the project order. In those instances, the amount of unfunded costs shall be included and identified in the items listed below.

- A. Project orders issued to performing activities;
- B. Billings made by the performing activity to the ordering activity;
- C. Reimbursements by the ordering activity to the performing activity; and
- D. Reimbursements obtained by the ordering activity from the non-federal customer.

020705. Reimbursable costs, in the case of performing DoD owned establishments operating under a working capital fund, shall be determined in accordance with Volume 11B of this Regulation.

020706. When the performing DoD owned establishment is not operating under a working capital fund, reimbursable agreements negotiated prior to placement of project orders costs shall be determined in accordance with policy established in chapter 1, "General Reimbursement Procedures And Supporting Documentation," of this volume.

020707. Reimbursable costs include the cost of machinery or equipment acquired specifically for the performance of a single project order, provided (a) such costs specifically are approved in advance by the ordering DoD Component, (b) the machinery or equipment could

legally be acquired directly by the ordering fund or appropriation, and (c) the approval is incorporated into the term of the project order agreement or amendments thereto. When this is the case, the approved costs shall be segregated from other costs and shown as a separate item in the reimbursable billing. Such machinery and equipment are the property of the ordering DoD Component and shall be disposed of in accordance with instructions from the ordering DoD Component.

020708. Costs incurred in the termination of project orders shall be reimbursable to the performing DoD Owned establishment when those orders are terminated by the ordering DoD Component, to the extent that such costs do not exceed the amount of the fixed price, or the current ceiling amount in the case of cost-reimbursement project orders. When ordering DoD Components and performing DoD Owned establishments cannot agree on the costs of termination, the case will be referred for settlement to the Under Secretary of Defense (Comptroller).

020709. To the extent feasible, performing DoD owned establishments shall bill ordering DoD Components for work performed upon the basis of jobs completed or services rendered in accordance with the terms of the project order. However, whenever a long period of time is required in the performance of a project order, periodic progress payments approximating costs incurred may be provided for in the order. Progress payments may be made to the performing DoD Owned establishment to cover the accrued cost (and other direct obligations incurred) of performance to the end of the fiscal year under an uncompleted project order. Reimbursement to a working capital fund activity for work performed prior to completion of the project order shall normally be accomplished on either a progress payment or a percentage-of-completion basis.

0208 ACCOUNTING FOR COST OF PERFORMANCE

020801. Project orders are reimbursable orders and shall be administered and accounted for as such. Project orders, therefore, shall neither be administered nor accounted for by performing DoD owned establishments as separate subdivisions of appropriations or funds similar to an allotment. The appropriation-type accounting for project orders shall be performed by the ordering DoD Component in a manner similar to that performed for contracts.

020802. The operations of performing DoD owned establishments financed under a working capital fund shall be accounted for in accordance with Volume 11B of this Regulation.

020803. Project orders received and accepted are the source of obligational authority, in the amount of the project order, for the performance of the work requested.

020804. A cost account or other device shall be used to accumulate the costs of performance for all project orders. Those cost accounts shall serve as a basis for determining the amount reimbursable for cost-reimbursement project orders and as a basis of determining a fixed price for similar future fixed-price project orders.

020805. Billings covering reimbursements shall identify costs by each item listed in the project order.

0209 EXEMPTIONS

Requests for exemptions, along with appropriate justification, shall be submitted to the Director for Accounting Policy, Office of the Deputy Chief Financial Officer, Under Secretary of Defense (Comptroller).

CHAPTER 3

ECONOMY ACT ORDERS

(TO BE PUBLISHED LATER)

(This page intentionally left blank.)

CHAPTER 4

USER CHARGES

0401 OVERVIEW

040101. Purpose. This chapter implements the DoD program under Title 31, United States Code, section 9701 and Office of Management and Budget (OMB) Circular No. A-25, "User Charges," to establish appropriate charges for authorized services provided by DoD organizations.

040102. Applicability. None of the provisions in this chapter should be construed as providing authority for the sale or lease of property, or the rendering of special services. Actions to convey such special benefits must be authorized by separate authority. This user charge policy is applicable except when other statutes or directives specifically direct other practices or procedures.

0402 POLICY AND PROCEDURES

040201. General. It is DoD policy not to compete with available commercial facilities (see DoD Directive 4100.33, "Commercial Activities Program Procedure") in providing special services or in the sale or lease of property to private parties and agencies outside the Federal Government. However, when a service or sale is made that conveys special benefits to recipients, above and beyond those accruing to the public at large, a reasonable charge shall be made to each identifiable recipient, except as otherwise authorized by the Secretary of Defense. A special benefit will be considered to accrue, and a charge shall be imposed, when the service rendered:

A. Enables the recipient to obtain more immediate or substantial gain or values (which may or may not be measurable in monetary terms) than those which accrue to the general public; or

B. Is performed at the request of the recipient and is above and beyond the services regularly received by, or available without charge to, the general public.

040202. Costing

A. A charge shall be imposed to recover the full cost to the Federal Government of rendering a service or the fair market value of such service, whichever is higher. Fair market value shall be determined in accordance with commercial rates in the local geographical area. In the absence of a known market value, charges shall be made based on recovery of full costs to the Federal Government.

B. When federally owned resources or property are leased or sold, a fair market value shall be obtained. Fair market value shall be determined by the application of sound business management principles and, so far as practicable and feasible, in accordance with comparable commercial practices. Charges based on fair market value need not be limited to the recovery of costs; they may produce net revenues to the government.

040203. Exclusions and Exceptions

A. The provisions of this chapter do not apply when other statutes or directives require different practices or procedures, such as for:

1. Morale, welfare, and recreation services to military personnel and civilian employees of the Department of Defense and other services provided in accordance with enclosure 1.

2. Sale or disposal of surplus property under approved programs (see Chapter 5 of this volume).

3. Services furnished the general public relating to, or in furtherance of, the U.S. Armed Forces recruiting program.

4. Services furnished to representatives of the public information media in the interest of public understanding of the U.S. Armed Forces.

5. U.S. Armed Forces participation in public events. Charges for such participation are governed by the provisions of DoD Instruction 5410.19, "Armed Forces Community Relations."

6. Records made available to the public, under the Freedom of Information Act, pursuant to DoD Directive 5400.7, "DoD Freedom of Information Act Program." Charges for such record searches and copies of records are governed by Chapter VI of DoD Directive 5400.7. However, documents copied for the public not subject to DoD Directive 5400.7 (even though documents are copied in a FOIA reading room) or subparagraph B.3. are governed by this chapter.

7. Services furnished to non-Federal audio-visual media. Charges for such services are governed by the provisions of DoD Instruction 5410.15, "DoD Public Affairs Assistance to Non-Government, Non-Entertainment-Oriented Print and Electronic Media."

8. Government-developed computer programs released to non-Federal customers. Charges for software packages are governed by DoD Instruction 7930.2, "ADP Software Exchange and Release."

9. Pricing of performance by Department of Defense Working Capital Fund activities which shall be in accordance with Volume 11B of this Regulation.

10. Foreign Military Sales of defense articles and services which shall be in accordance with Volume 15 of this Regulation.

B. Charges may be waived or reduced when:

1. The recipient of the benefits is engaged in nonprofit activity designed for the public safety, health, or welfare.

2. Payment of the full fee by a state, local government, or nonprofit group would not be in the interest of the program.

3. Furnishing of the service without charge is an appropriate courtesy to a foreign country or international organization, or comparable fees are set on a reciprocal basis with a foreign country.

4. The incremental cost of collecting the fees would be an unduly large part of the receipts from the activity.

0403 RESPONSIBILITIES

040301. Under Secretary of Defense (Comptroller) shall consider and make necessary additions or revisions to these provisions.

040302. Heads of DoD Components, or designees, shall:

A. Identify each service or activity covered by this chapter.

B. Determine the extent of the special benefit provided.

C. Determine applicable cost and fair market value.

D. Establish appropriate charges and collect from recipients of special services.

E. Grant cost waivers or reductions consistent with guidance in this chapter.

F. Recommend to the USD (Comptroller) necessary additions and revisions to this chapter.

0404 CHARGES AND FEES

040401. General

A. All charges and fees shall be based on total cost to the U.S. Government or fair market value, whichever is higher. Total cost shall be based on actual cost or replacement cost (when property is to be replaced) and accumulated expense data. Estimates from the best available records may be used if actual cost or expense data is not available.

B. Cost accounting systems shall not be established solely for the purpose of determining charges, but the results of existing cost accounting systems shall be used. Total cost shall include all direct and indirect costs in accordance with Volume 11B of this regulation.

C. Charges and fees established in advance of performance shall be based on the estimated cost of performance (including applicable depreciation), prorated over the period of performance. Projected amounts shall be reviewed annually or whenever significant changes in cost or value occur.

D. Management controls (see DoD Directive 5010.38, “Management Control (MC) Program”) must be established to ensure that charges and fees are developed and adjusted, using current, accurate, and complete data, to provide reimbursement conforming to statutory requirements. These controls also must ensure compliance with cash management and debt collection policies in accordance with Volume 5 of this Regulation.

040402. Services

A. Basic Requirements. The maximum charge for a special service shall be governed by its total cost or fair market value, whichever is higher, and not by the value of the service to the recipient. The cost computation shall include the direct and indirect costs to the government of carrying out the activity. Typically, costs for service may include:

1. Civilian salaries or wages, including the full cost of benefits, such as leave, retirement, and medical and life insurance.

2. Military personnel services, including retirement, other personnel support, leave, and permanent change of station factors.

3. Materials, supplies, travel expenses, communications, utilities, equipment and property rental, and maintenance of property and equipment.

4. Depreciation expense and interest on investment (currently at a 10 percent annual rate) (see OMB Circular A-94, “Discount Rates to be Used in Evaluating Time-Distributed Costs and Benefits”) for DoD-owned fixed assets.

5. Other operational, administrative, and accessorial costs incurred by the activity while establishing standards and regulations and research in support of the service performed.

B. Fees and Rates. Fees and rates shall be based on actual costs. The charges for services provided by data processing activities shall be determined by using the costs accumulated pursuant to requirements in OMB Circular A-121, “Cost Accounting, Cost Recovery and Interagency Sharing of Data Processing Facilities,” and Federal Government

Accounting Pamphlet No. 4, “Guidelines for Accounting for Automatic Data Processing Costs.” Fees and rates for recurring services shall be established in advance, when feasible. Recurring services include, but are not limited to, copying, certifying, and researching records, except when those services are excluded or exempted from charges under subparagraph 040203.B.3., above, or in accordance with “Benefits for Which No Charge Shall be Made” included as Appendix 1 to this chapter.

C. DoD-wide Fees and Rates. The “Schedule of Fees and Rates for Copying, Certifying, and Searching Records Rendered to the Public” included as Appendix 2 to this chapter mandates fees and rates for certain services for use throughout the Department of Defense. Recommendations for additions and revisions to the schedule will be made to the USD (Comptroller).

040403. Lease or Sale of Property. Charges for lease or sale of property shall be based on the following:

A. Leases of Military Equipment or Real Estate

1. In cases involving the lease or rental of military equipment, when there is no commercial counterpart, fair market value will be based on the computation of an annual rent which will be the sum of the annual depreciation plus interest on investment. The amount of interest on investment is determined by applying the interest rate to the net book value; that is, acquisition cost plus additions less depreciation. The current interest rate in OMB Circular A-94 shall be used. Support, if furnished, and applicable general administration expenses will be added to the reimbursable cost. In determining the value, consideration may be given to the responsibility of the lessee to assume the risk of loss or damage to the property and to hold the government harmless against claims or liabilities by the lessee or third parties.

2. In those cases involving real estate outgrants, the leasing activity shall recover the higher of the fair market value of the asset being leased or the administrative costs of issuing and processing an outgrant.

B. Sale of Property. When there is legal authority to sell property to the public, the selling price of the property and related accessorial and administrative costs shall be computed in accordance with chapter 1 of this volume.

0405 COLLECTIONS

040501. For Federal customers, collections of charges and fees shall be made in advance of rendering the service, except when preservation of life or property is involved, performance is authorized by law without advance payment, or advance payment is impractical because multiple requests for services are received on a continuing basis from a reliable requester (i.e., one who consistently pays promptly for services received). When an advance collection exception is approved, an accounts receivable will be established to control collections. For non-

Federal customers, collections of charges and fees will be made in advance in all cases. The policies in this volume, Volume 5 of this Regulation, and DoD Directive 5010.38 shall be used in accounting, controlling, and managing cash and debt collections.

A. Collections of fees and charges normally will be deposited to “Miscellaneous Receipts of the Treasury” unless otherwise authorized by law or regulation.

B. Collections for utilities and services in connection with the lease of property shall be deposited to the appropriation or fund responsible for financing the operations of the equipment or facility.

0406 LEGISLATIVE PROPOSALS

In cases where collections of fees and charges for services or property are limited or restricted by provisions of existing law, the DoD Component(s) concerned may submit appropriate remedial legislative proposals under applicable legislative procedures. Procedures may be obtained from the Legislative Reference Directorate, Office of the General Counsel, Room 3D282, The Pentagon, Washington, DC 20301-9600.

APPENDIX 1
BENEFITS FOR WHICH NO CHARGE SHALL BE MADE¹

1. Services² requested by members of the U.S. Armed Forces in their capacity as Service members.
2. Services requested by members of the U.S. Armed Forces who are in a casualty status, or requested by their next of kin or legal representative, or requested by any source, when it relates to a casualty.
3. The address of record of a member or former member of the U.S. Armed Forces when the address is readily available through a directory (locator) service, and when the address is requested by a member of the U.S. Armed Forces or by a relative or a legal representative of a member of the U.S. Armed Forces or when the address of record is requested by any source for the purpose of paying monies or forwarding property to a member or former member of the U.S. Armed Forces.
4. Services requested by or on behalf of a member or former member of the U.S. Armed Forces or, if deceased, his or her next of kin or legal representative that pertain to the following:
 - a. Information required to obtain financial benefits regardless of the terms of separation from the Service.
 - b. Document showing membership and military record in the U.S. Armed Forces if discharge or release was under honorable conditions, except as provided in subparagraphs 4.a. and 4.d.
 - c. Information relating to a decoration or award or required for memorialization purposes.
 - d. Review or change in type of discharge or correction of records.
 - e. Personal documents, such as birth certificates, when such documents are required to be furnished by the member.
5. Services that are furnished free in accordance with statutes or executive orders.
6. Information from or copies of medical and dental records or x-ray films of patients or former patients of military medical or dental facilities, when such information is required and requests for such data are (a) submitted by an accredited medical facility, physician, or dentist; or (b) requested by the patient, his or her next of kin, or legal representative.

7. Services involving confirmation of employment, disciplinary or other records, and salaries of active or separated civilian or military personnel, when requested by prospective employers or recognized sources of inquiry for credit or financial purposes.
8. Services requested by and furnished to a Member of Congress for official use.
9. Services requested by state, territorial, county, or municipal government, or an agency thereof, that is performing a function related to or furthering a DoD objective.
10. Services requested by a court, when such services will serve as a substitute for personal court appearance of a military or civilian employee of the Department of Defense.
11. Services requested by a nonprofit organization that is performing a function related to furthering an objective of the Federal Government or that is in the interest of public health and welfare, including education.
12. Services requested by an individual or corporation that is performing a function related to or furthering an objective of the Federal Government, when the cost of such services would be chargeable to a Federal Government contract or grant held by the individual or corporation.
13. Services requested by donors with respect to their gifts.
14. Requests for occasional and incidental services (including requests from residents of foreign countries), that are not requested often, when it is determined administratively that a fee would be inappropriate for the occasional and incidental services rendered.
15. Requests from Federal employees for the completion of claims for reimbursement under Public Law 86-382, Federal Employees Health Benefit Act of 1959.
16. Administrative services provided by reference or reading rooms to inspect public records, excluding copies of records or documents furnished.
17. Requests for military locator service by financial institutions that are located on DoD installations.
18. Requests for military locator service by financial institutions that are engaged in the direct deposit program and that are not located on DoD installations. Requests for an address of record shall include the following:
 - a. A statement that the financial institution is listed as a direct deposit recipient in the current Treasury Department "Financial Organizations Directory."
 - b. A statement that the individual, whose address is being requested, has his or her pay forwarded as a direct deposit by a DoD disbursing officer.

c . The individual's account number at the financial institution.

19. Services rendered in response to requests for classification review of DoD classified records, submitted under Executive Order 12065, "National Security Information," and implemented by DoD 5200.1-R, "Information Security Program Regulation." Such services consist of the work performed in conducting the classification review or in granting and completing an appeal from a denial of declassification following such review.

20. Services of a humanitarian nature performed in such emergency situations as life-saving transportation for non-U.S. Armed Forces patients, search and rescue operations, and airlift of personnel and supplies to a disaster site. This does not mean that inter-and intra-governmental agreements to recover all or part of costs should not be negotiated. Rather, it means the recipient or beneficiary will not be assessed a "user charge."

¹Unless otherwise prohibited by law or other DoD issuance.

²Services may include requests involving property or other resources of Department of Defense.

APPENDIX 2
SCHEDULE OF FEES AND RATES FOR COPYING, CERTIFYING AND SEARCHING
RECORDS RENDERED TO THE PUBLIC

This schedule applies to authorized services related to copying, certifying, and searching records rendered to the public by DoD Components, except when those services are excluded or excepted from charges under subparagraph 040203, or the “Benefits for Which No Charge Shall be Made” included as Appendix 1 to this chapter. Except as provided in special cases prescribed below, a minimum fee of \$3.50 will be levied for processing any chargeable case. Normally only one copy of any record or document will be provided.

Requests involving Fee

1. Training and Education (copies of documents required for other than official Purposes)

- | | | |
|----|----------------------|--------|
| a. | Transcripts | |
| | First copy | \$3.50 |
| | Each additional copy | .45 |

(includes requests for transcripts of graduation from military academies and schools)

- | | | |
|----|----------------------|--------|
| b. | Certificates | |
| | First copy | \$3.50 |
| | Each additional copy | .45 |

(includes all requests for certificates, verification of attendance, and course completion from service schools and other facilities.)

2. Medical and Dental Records of Patients and Former Patients (when requested for purposes other than further medical treatment. Covers request for information from or copies of medical records, including clinical records (inpatient records of military and non-military patients), health records (military out-patient records), outpatient records (non-military outpatient records), dental records, and loan of x-rays.

- | | | |
|----|---------------------------------------|---------|
| a. | Searching and processing (per hour) | \$13.25 |
| | Minimum charge | 8.30 |
| b. | Each typewritten page | 3.50 |
| c. | Office copy reproductions (per image) | .10 |
| d. | Copy or loan of each x-ray | 8.50 |

3. Military Membership and Record (Excluding Medical and Dental Records)

a.	Address of record, each	\$3.50
b.	Copies of releasable military personnel records (e.g., effectiveness reports for officers and enlisted personnel) reproduced for the personal use of active, retired, and former members, next of kin of missing-in-action or deceased members of the Armed Forces.	
	Minimum charge (up to six reproduced images)	\$3.50
	Each additional image	\$.10
	Statement of verification of service or report of report of separation for individuals with other than honorable discharges	5.20

4. Photography

a. Still pictorial or documentary photographic prints. Unlisted standard sizes of prints may be furnished, if available, at prevailing contractor activity rates.

Price Per Print:

Quantity	<u>1-9</u>	<u>10-20</u>	<u>21-50</u>	<u>50+</u>
8" x 10" single weight (RC type) paper	\$4.50	\$3.25	\$2.50	\$1.75
11" x 14" single weight (RC type) paper	9.00	7.00	5.00	4.00
16" x 20" " " " "	19.00	15.00	12.00	9.50
20"x24" " " " "	30.00	25.00	20.00	15.00
8" x 10" " " " color "	11.00	7.50	3.50	3.00
11" x 14" " " " "	17.00	9.00	6.50	5.50
16" x 20" " " " "	35.00	25.00	14.00	11.50
35~ color transparency slide made from color negative	5.00	3.50	3.00	3.00
35mm duplicate from 35~ slide	1.00	.60	.50	.45
Print mounted on 16" x 20" cardboard	8.00	+ unit price of print		
Print mounted on 20" x 24" cardboard	12.00	+ unit price of print		
8" x 10" color transparencies	20.00	(first); 16.00 each add'l		
4" x 5" " "	4.50			
4" x 5" B&W negative	2.00			
70mm color negative	7.50			

NOTE: Prices may vary by 20% of these average charges based on local in-house labor, equipment, and supply (raw stock) costs.

b. Motion Picture

<u>Color</u>	<u>Price Per Foot</u>
<u>Contact</u>	
16mm work print (positive work print from an original negative)	\$.20
16mm reversal work print	.20
16mm color master ("A" roll)	.60
16mm duplicate negative (from master positive)	.60
16mm reversal duplicate negative	.85
16mm internegative(from reversal original)	.70
16mm short rolls (under 100 ft)	.10 + basic price
16mm tab-to-tab printing	.20 + basic price

Black and White

16mm work print (negative/positive)	\$.10
16mm master positive (fine grain)	.25
16mm duplicate negative	.25
16mm short rolls (under 200 ft)	.10 + basic price
16mm tab-to-tab printing	.10 + basic price

c. Miscellaneous

Magnetic tape - dub from 16mm film	\$ 65.00+ raw stock
Searching (per hour or fraction thereof)	18.00
Minimum charge per film order (including search)	35.00
16mm film to videotape (broadcast quality tape format per hour)	275.00 + raw stock
Minimum charge for film to videotape transfer	140.00 + raw stock

Aerial photographic print processing prices will be determined by the local DoD-operated lab due to limited availability.

35mm film processing for motion pictures is not done in-house by the DoD. Charges for this type of processing will be at prevailing contract rates on a case-by-case basis.

5. Construction and Engineering Information. Copies of aerial photograph maps, specifications, permits, charts, blueprints, and other technical engineering documents.

a. Searching, per hour or fraction thereof (including overhead costs)	\$13.25
---	---------

- | | | |
|----|--|------|
| b. | First print | 2.50 |
| c. | Each additional print of same document | .85 |
6. Copies of Medical Articles and Illustrations. Standards contained in this chapter will be utilized in computing costs.
7. Claims, Litigation. Copies of documents required for other than official purposes. (Includes court-martial records furnishing information from Report of Claims Investigations; e.g., automobile collision investigations and safety reports.) Requests pertaining to private litigation and to cases in which the United States is a party and where court rules provide for reproduction of records without cost to the government (if not covered in 2. or 3., above).
- | | | |
|----|--|---------|
| a. | Searching and processing (per hour) | \$13.25 |
| | Minimum charge | 8.30 |
| | Note: Charges for professional search or research will be made in accordance with 10. b., below. | |
| b. | Office copy reproduction (minimum for six pages or less) | 3.50 |
| c. | Each additional image | .10 |
| d. | Certification and validation with seal, each | 5.20 |
8. Publications and Forms. A search and/or processing fee, as described in 10.a., below, will be made for requests requiring extensive time (one hour or more).
- | | | |
|----|---|--------|
| a. | Shelf Stock. (Requesters may be furnished more than one copy of publication or form if it does not deplete stock levels below projected planned usage.) | |
| | (1) Minimum fee per request (six pages or less) plus: | \$3.50 |
| | (a) Form, per copy | .10 |
| | (b) Publications, per printed page | .02 |
| | (c) Microfiche, per fiche | .10 |
| | (2) (Examples: Cost of 20 forms, 5.50; cost | |

of a publication with 100 pages, 5.50;
cost of microfiche publication consisting
of 10 fiches, 4.50)

- b. Office Copy Reproduction (when shelf stock is not available)
 - (1) Minimum fee per request (six pages or less) \$3.50
 - (2) Each additional page .10
 - (3) Minimum charge first fiche 8.70
 - (4) Each additional fiche .20

9. Engineering Data (Microfilm)

- a. Aperture Cards
 - (1) Silver duplicate negative, per card .75
When keypunched and verified,
per card .85
 - (2) Diazo duplicate negative, per card .65
When keypunched and verified,
per card .75
- b. 35mm roll film, per frame .50
- c. 16mm roll film, per frame .45
- d. Paper prints (engineering drawings), each 1.50
- e. Paper reprints of microfilm indices, each .10

10. General. Charges for any additional services not specifically provided above, consistent with the provisions of this chapter, will be made by the respective DoD Components at the following rates:

- a. Clerical search and processing, per hour \$13.25
Minimum charge 8.30
- b. Professional search or researching (To be
established at actual hourly rate prior
to search. A minimum charge will be

established at an hourly rates.)

c.	Minimum charge for office copy reproduction (up to six images)	3.50
d.	Each additional image	.10
e.	Each typewritten page	3.50
f.	Certification and validation with seal, each	5.20
g.	Hand-drawn plots and sketches, each hour or fraction thereof	12.00

(This page intentionally left blank.)

CHAPTER 5

**DISPOSITION OF PROCEEDS FROM
DOD SALES OF SURPLUS PERSONAL PROPERTY**

(TO BE PUBLISHED LATER)

(This page intentionally left blank.)

CHAPTER 6**CHIEF FINANCIAL OFFICER'S ANNUAL REIMBURSABLE RATES****0601 GENERAL**

The Department of Defense provides goods and services to meet military mission requirements. The Economy Act allows the Department to provide certain goods not only to DoD Components, but also to other government agencies and the private sector, under specified conditions. Reimbursable rates, published by the Under Secretary of Defense (Comptroller), DoD Chief Financial Officer, provide a basis for the Department and its Components to be reimbursed for such goods and services provided.

0602 PURPOSE

The purpose of this chapter is to provide guidance relative to the preparation of specific exhibits, and due dates for the submission of such exhibits, used to develop and support those reimbursable rates published by the DoD Chief Financial Officer.

0603 APPLICABILITY

This guidance applies to all DoD Components and goods or services encompassed by or subject to reimbursable rates approved by the DoD Chief Financial Officer.

0604 RESPONSIBILITY

060401. Chief Financial Officer. The Office of the Under Secretary of Defense (Comptroller)/Chief Financial Officer is responsible for reviewing, coordinating, and publishing reimbursable rates for the Department. Where feasible, applicable reimbursable rates will be published prior to the beginning of each new fiscal year, allowing sufficient lead time for the distribution of rates and the updating of billing systems.

060402. DoD Components. DoD Components are required to:

A. Maintain systems that use generally accepted cost accounting procedures to formulate proposed rates. Each such DoD Component is responsible for maintaining, in conjunction with the Defense Finance and Accounting Service, an appropriate cost accounting system enabling the accumulation of data needed to formulate reimbursable rates to be charged to consumers of such goods or services. Generally accepted cost accounting procedures will be the basis for such proposed rates.

B. Submit to the DoD Chief Financial Officer, reimbursable rate exhibits that propose reimbursable rates for the upcoming fiscal year. Such exhibits shall be prepared and submitted in accordance with the time frames specified in section 0605 and use the formats specified in the appendices to this chapter.

C. Bill using rates approved by the DoD Chief Financial Officer. Goods or services provided in an academic year or a fiscal year, as applicable, will be billed at the approved academic or fiscal year rate, respectively, effective with the beginning of the academic year, or October 1 of the fiscal year, as appropriate, irrespective of whether the rates have been established in the billing system.

D. Ensure that rates different from those approved by the DoD Chief Financial Officer are not issued or changed without the prior written approval of that official or the Deputy Chief Financial Officer.

0605 EXHIBITS

060501. The following reimbursable rate exhibits are to be submitted in support of the President's Budget submission each year. Detailed instructions are included with each exhibit and specific due dates are identified below:

<u>TYPE OF REIMBURSABLE RATE</u>	<u>APPENDIX</u>	<u>DUE DATE</u>	<u>SUBMITTING COMPONENT</u>
Academy Foreign Cadet	A	March 1	All Military Depts and OASD (Health Affairs)
Civilian/Military Equivalency, DoD Working Capital Funds	B	March 1	OUSD(C)
Civilian Personnel Fringe Benefit	C	March 1	OUSD(C)
Contract Administration Services	D	March 1	DLA, DCAA, All Military Depts
Fixed Wing Aircraft	E	March 1	All Military Depts
Food Service (Inc. Cadet Ration)	F	March 1	All Military Depts
Helicopter	G	March 1	All Military Depts
Medical and Dental Services	H	March 1	OASD(Health Affairs)
Military Composite Pay	I	March 1	All Military Depts
NASA	J	March 1	DLA, DCAA, All Military Depts
Telephone Class B Service	K	March 1	DISA

★ 060502. Exhibits should be submitted in both electronic format and hard copy to the DoD Deputy Chief Financial Officer, Attention: Director for Financial Commerce, Room 3E831, The Pentagon, Washington, DC 20301-1100. Spreadsheet and text files provided in electronic format should be compatible with Microsoft Excel 4.0 or better and Microsoft Word 1.x or later, respectively.

APPENDIX A
SERVICE ACADEMIES FOREIGN CADET REIMBURSABLE RATE

Military Department _____

Fiscal Year _____

GENERAL INFORMATION

★ The information and process shown below will be used to determine the academic year reimbursable rate for foreign cadets/midshipmen attending the Service Academies. The DoD-wide rate will be computed by the Financial Commerce Directorate, OUSD(C), ODCFO, and published prior to the commencement of the academies' academic year.

RATE CALCULATION:

Future Year Defense Program

FY 19CY (1) FY 19BY (1)

Program Elements (2):

0804721	Service Academies	\$ _____	\$ _____
0805853	Environmental Conservation	\$ _____	\$ _____
0805854	Pollution Prevention	\$ _____	\$ _____
0805856	Environmental Compliance	\$ _____	\$ _____
0805876	Minor Construction	\$ _____	\$ _____
0805878	Maintenance & Repair	\$ _____	\$ _____
0805879	Real Property Services	\$ _____	\$ _____
0805890	Visual Information Activities	\$ _____	\$ _____
0805895	Base Communications	\$ _____	\$ _____
0805896	Base Operations	\$ _____	\$ _____
Medical Support Costs (3)		\$ _____	\$ _____
Total Costs (4)		\$ _____	\$ _____
Cadet/Midshipmen Workyears (5)		_____	_____
Cost per Cadet/Midshipmen (6)		\$ _____	\$ _____
Academic Year Reimbursable Rate (7)		\$ _____	

INSTRUCTIONS:

- (1) Insert the applicable current year (CY) and budget year (BY) for the fiscal year being calculated. For example, when computing the FY 1995 Budget Year rate, the current year would be FY 1994 and the budget year would be FY 1995.

- (2) Include only Military Personnel and Operations and Maintenance Appropriation costs for the applicable Service Academy's Program Elements from the President's Budget Future Years Defense Program. Also provide a summary of the workyears for the officer and enlisted personnel associated with each Program Element.
- ★(3) Medical support costs are representative of Academy clinic/hospital costs attributable to the medical support provided to the Academies' military faculty, military staff and cadets/midshipmen. The Office of the Assistant Secretary of Defense (Health Affairs) shall provide a cost per capita for the CY and BY, by Academy to the Director for Financial Commerce, OUSD(C), ODCFO, Room 3E831, The Pentagon, 30 days after the submission of the President's Budget to the Congress. The costs shall include O&M and MILPERS Appropriation costs and be based on the President's Budget. The Medical Support Costs may be calculated by the DoD Component or left to be calculated by the Accounting Policy Directorate, OUSD(C). This amount will be calculated by multiplying the per capita cost provided by the OASD(HA) by the sum of (a) the cadet/midshipman workyears and (b) the workyears for officer and enlisted military from each of the Program Elements above.
- (4) This is the sum of Program Element costs and medical support costs.
- (5) Insert the Cadet/Midshipman workyears shown in the Military Personnel justification books submitted to the Congress in support of the President's Budget.
- (6) Divide the Total Costs (4) by Cadet/Midshipman Workyears (5).
- (7) This is the sum of 1/3 of the cost per cadet/midshipman for the CY and 2/3 of the cost per cadet/midshipman for the BY.

APPENDIX B
DEPARTMENT OF DEFENSE WORKING CAPITAL FUNDS
CIVILIAN/MILITARY EQUIVALENCY RATE

Fiscal Year _____

The cost of military personnel assigned to activities financed by Department of Defense Working Capital Funds is included in the total cost of operations of the Working Capital Fund activities at civilian equivalent rates. Military personnel assigned to the Department of Defense Working Capital Funds activities are to be costed at civilian equivalent rates using the rates in the table below, applied to the actual number and grade of military personnel assigned.

MILITARY GRADE	CIVILIAN GRADE EQUIVALENT	CIVILIAN EQUIVALENT RATE BY(s) 19____
0-9	ES-05/06	
0-8	ES-03/04	
0-7	ES-01/02	
0-6	GS-15	
0-5	GS-14	
0-4	GS-13	
0-3	GS-12	
0-2	GS-11	
0-1	GS-9	
WO-5	GS-12	
WO-4	GS-12	
WO-3	GS-11	
WO-2	GS-9	
WO-1	GS-9	
E-9	GS-8	
E-8	GS-7	
E-7	GS-6	
E-6	GS-5	
E-5	GS-5	
E-4	GS-4	
E-3	GS-3	
E-2	GS-2	
E-1	GS-1	

Stabilized customer rates and reimbursement to the Military Personnel accounts are not based on the above rates. Rather, such amounts are based on the absolute total dollar amount specified in the President's budget (rather than based on the number, or military composite rate, of individuals actually assigned). Guidance on paying (reimbursing), recording and reporting Working Capital Fund military personnel costs is contained in Chapter 62, Section B of Volume 11B, "Reimbursable Operations, Policy and Procedures--Defense Business Operations Fund," of this Regulation.

INSTRUCTIONS

The Department of Defense Working Capital Funds civilian/military equivalency rate will be calculated as follows:

1. Use the pay amount for Step 5 of each appropriate General Schedule (GS) civilian grade, or the applicable Senior Executive Service (SES) pay level, as applicable, from the current civilian pay schedules. (For the SES civilian grade equivalents, determine the average rate using the midpoint of the range of the two SES grades),

2. Add as required, the applicable portion (pro-rata) of the proposed pay raise, if any, for civilians (GS/SES) that was effective for the budget fiscal year, and

★ 3. Add the estimated civilian personnel fringe benefits rate for the GS and SES amounts. (The civilian personnel fringe benefit rate will be obtained from the Directorate for Financial Commerce, OUSD(C), ODCFO, Room 3E831, 1100 The Pentagon, Washington, DC 20301-1100.)

APPENDIX C

CIVILIAN FRINGE BENEFIT RATE COMPUTATIONDOD COMPONENT (1)

	<u>Prior</u> <u>Year (2,3)</u>	<u>Current</u> <u>Year (2,3)</u>	<u>Budget</u> <u>Year (2,3)</u>
A.	<u>Object Class 12.1 Civilian</u> <u>Personnel Benefits (4)</u>		
B.	<u>Object Class 11 Civilian</u> <u>Personnel Compensation (5)</u> 11.1 Full-time Permanent 11.3 Other Than Full-Time Permanent 11.5 Other Personnel Compensation 11.8 Special Personal Services Payments		
C.	Total Personnel Compensation (Total of 11.1, 11.3, 11.5, 11.8) (6)		
D.	Civilian Fringe Benefit (Interagency) Rate (7)		
E.	Office of Personnel Management (OPM) Unfunded Retirement Factor (8)		
F.	Public, and Private Activities (9)		

(See footnoted instructions on following page)

APPENDIX C**INSTRUCTIONS**

- (1) Insert the name of the applicable DoD Component submitting the exhibit. A separate exhibit is required from each Military Service (including the U.S. Marine Corps) and from all Defense Agencies.
- (2) Insert the applicable fiscal year.
- (3) Insert the applicable amounts for each fiscal year. A brief description should be provided to explain changes of 10 percent or more between (a) previously budgeted and actual amounts for the prior fiscal year, (b) previously budgeted and currently budgeted amounts for the current year, and (c) the currently budgeted amounts for the budget year.
- (4) Insert the applicable amounts shown in the current President's Budget for Object Class 12.1, Civilian Personnel Benefits.
- (5) Insert on the applicable lines, the applicable amounts shown in the current President's Budget for Object Class 11.1, 11.3, 11.5 and 11.8.
- (6) Enter the total of personnel compensation from Object Class 11.1, 11.3, 11.5 and 11.8, shown above.
- (7) Divide the amount reported in line A. by the amount reported in line C. The resultant percentage is the percentage rate to be applied to civilian labor costs for billings to other Federal Agencies. This is DoD's funded rate.
- (8) The civilian fringe benefit rate--to be used in this calculation--will be obtained annually from the Directorate for Financial Commerce, OUSD(C), ODCFO, Room 3E831, the Pentagon, Washington, DC 20301-1100.
- (9) Add lines D. and lines E. to determine the percentage to be applied on billings to the public and private activities.

APPENDIX D
CONTRACT ADMINISTRATION SERVICES

Contract administration services (CAS) hourly reimbursable billing rates should be applied to direct labor hours incurred in support of CAS efforts. These CAS rates are to be used in billing other Federal Agencies, the public, and Foreign Military Sales (FMS) customers. FMS customers are to be billed in accordance with subsections 070406 and 080601 of Volume 15, “Security Assistance Policy and Procedures,” of this Regulation. Waivers and exclusions are to be granted in accordance with subsection 070104 of Volume 15.

<u>Performing DoD Component</u>	<u>Other Federal Agencies Rate</u> (1)	<u>FMS Rate</u> (2)	<u>Public Rate</u> (3)
Army			
Navy			
Air Force			
Defense Logistics Agency			
Defense Contract Audit Agency			

Notes:

- (1) Use the Budget Year “Gross Cost Per Direct Hour” amount from page 2.
- (2) Sum Budget Year lines C, E, and G from page 2 and multiply the resultant amount by .167 (obtained from OMB Circular No. A-76 Revised Supplemental Handbook, “Performance of Commercial Activities”). That product then is divided by the applicable total direct work-hours (line V from page 2) to derive an hourly unfunded civilian retirement cost. The resultant hourly unfunded civilian retirement cost is added to the “Other Federal Agencies Rate” (column 1) to yield the FMS rate.
- (3) Use the FMS Rate plus 4% for asset use charge. This is achieved by multiplying the FMS rate by 1.04.

APPENDIX D

REIMBURSEMENT COST FOR CONTRACT ADMINISTRATION SERVICES

Gross Cost Per Direct Hour [(O)÷(V)]	\$ _____	\$ _____	\$ _____

**APPENDIX D
REIMBURSEMENT COST FOR CONTRACT ADMINISTRATION SERVICES**

Notes:

- (4) The amounts reflected should be the “actual” cost and work-hour data for the most recently completed Fiscal Year. This should be the FY 19PY of the President’s Budget.
- (5) The amounts reflected should be that shown in the “Total” column of the attached schedule, “Personnel Cost For Contract Administration Services” (page 4) for the applicable year, i.e., PY, CY, BY.
- (6) Separately, show basis of computation.
- (7) Includes all travel costs, i.e., local, temporary additional duty, and permanent change of station, of the civilian and military personnel included under items (A), (D) and (F).
- (8) Includes other expenses such as supplies, equipment, training and communications.

APPENDIX D

G. Regional, District and Headquarters Salaries per FTE [(F)÷(B)]			\$ _____
H. Personnel Benefits ⁽¹²⁾	\$ _____	\$ _____	\$ _____
I. Personnel Benefits Costs per FTE [(H)÷(B)]			\$ _____
J. Total Cost of Personnel Service [(C) + (E) + (G) + (I)]	\$ _____	\$ _____	\$ _____

Notes:

(9) Include the salary expenses of direct civilian and military personnel, e.g., contract administrators.

a. Civilian. The cost of civilian personnel assigned full time to contract administration requirements should reflect the annual salary for the applicable pay grades. Otherwise, an hourly rate of 1/2087 of the annual rate shall be used and a leave and holiday factor of 18 percent of pay cost added.

APPENDIX D
PERSONNEL COST FOR CONTRACT ADMINISTRATION SERVICES

b. Military. The cost of military personnel assigned full time to contract Administration requirements should be based on the annual Military Composite Pay rates. Otherwise, an hourly rate of 1/2080 of the annual Military Composite Pay rate shall be used and a leave and holiday factor of 14 percent of pay cost added.

- (10) Include the indirect salary expenses for civilian and military personnel that perform supervisory and administrative (clerical) functions. Such costs are computed as indicated in (9)a. and (9)b. above.
- (11) Include the salary expenses for civilian and military personnel at the district, regional and headquarters level. Such costs are computed as indicated in (9)a. and (9)b. above.
- (12) Include the fringe benefit expenses for all civilian and military personnel included in items (A), (D) and (F).
 - a. Civilian. Fringe benefits are computed by multiplying civilian personnel costs by the civilian fringe benefit rate. The fringe benefit rate must be that reported for the applicable fiscal year on the OP-8 exhibit, "Civilian Personnel Costs."
 - b. Military. Fringe benefits are computed by multiplying separately the officer and enlisted salaries by 6 percent for officers and 18 percent for enlisted personnel.

APPENDIX D
VARIANCES IN THE REIMBURSEMENT COST FOR CONTRACT ADMINISTRATION SERVICES

DoD COMPONENT _____

<u>Gross Work-Year Cost</u>	Ratio of PY to CY ⁽¹³⁾	Ratio of CY to BY ⁽¹⁴⁾
Average Salary of Direct Labor Personnel	_____ %	_____ %

Public Rate (13)	_____	_____	_____

NARRATIVE JUSTIFICATION (14)

APPENDIX E
INSTRUCTIONS

- (1) Insert Army, Navy or Air Force, as applicable.
- (2) Separately list and provide data for each type/model/series of aircraft (fixed wing) in the DoD Component's inventory which is subject to reimbursement.
- (3) Insert the applicable fiscal (budget) year.
- (4) Fuel costs will be equal to the corresponding amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force) for the applicable type/model/series. (If for any reason, the OP-20 Exhibit series does not include an applicable type/model/series of aircraft, fuel costs will be computed using the same methodology as that used for aircraft included in the OP-20 Exhibit series, i.e., by dividing the total cost of fuel for the fiscal year for each type of aircraft by the total number of flying hours for that same aircraft.)
- (5) Depot-level reparable (DLR) costs will be equal to the corresponding amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force) for the applicable type/model/series. (If for any reason, the OP-20 Exhibit series does not include an applicable type/model/series of aircraft, DLR costs will be computed using the same methodology as that used for aircraft included in the OP-20 Exhibit series, i.e., by dividing the total DLR costs for the applicable fiscal year by the total number of flying hours for that same aircraft.)
- (6) Include an hourly rate for depot maintenance cost for airframes, engines, and components for the applicable type/model/series. This cost will be an average cost for that type/model/series, and be computed by dividing the total amount of depot maintenance budgeted for the applicable type/model/series by the number of flying hours budgeted for that type/model/series.
- (7) Other costs will equal corresponding "other" amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force--for Air Force, this is equal to the General Support/Systems Support [GS+SS] column in Exhibit OP-20E). (If for any reason, the OP-20 Exhibit series does not include an applicable type/model/series of aircraft, other costs will be computed using the same methodology as that used for aircraft included in the OP-20 Exhibit series, i.e., by adding all operating costs ((other than those costs included in columns 4 - 6 and 8 - 9)) and dividing the total of such other costs for the applicable fiscal year by the total number of flying hours.)
- (8) Crew salary amounts will be computed based on the number and grade of military personnel operating the aircraft. Crew salary costs will be computed by:

- (a) Multiplying the standard number of crew members in each applicable military grade times the annual Military Standard Composite Rate for that grade (see Appendix 6-I of this chapter).
- (b) Dividing the result of (a) by 2080 (hours) to convert the annual rate to an hourly rate, by grade.
- (c) Multiplying the results of (b) by a factor of 120 percent for officers and 132 percent for enlisted personnel. (This calculation increases the hourly rate for fringe benefits for officers and enlisted personnel, respectively. These factors are composed of 14 percent for leave and holiday for both officers and enlisted, plus 6 percent for officers, and 18 percent for enlisted personnel, for other fringe benefits.)
- (d) Adding the amounts arrived at in (c) for each grade, to arrive at a total hourly rate for the entire crew.

Note: The computation of crew salary amounts should be supported by a separate table attached to this exhibit.

- (9) The asset utilization amount will be computed by applying an asset utilization factor of 4 percent times the sum of columns (4)--Fuel, (5)--DLRs, (6)--Depot Maintenance, (7)--Other and (8)--Crew Salary for each specific aircraft.
- (10) The DoD rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6)--Depot Maintenance, and (7)--Other. This rate is to be used for interdepartmental (e.g., Navy to Air Force, etc.) billing purposes.
- (11) The Other Federal Agency Rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, and (8)--Crew Salary.
- ★(12) The FMS rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, (8)--Crew Salary, and an unfunded civilian retirement cost (The civilian fringe benefit rate--to be used in this calculation--will be obtained annually from the Directorate for Financial Commerce, OUSD(C), ODCFO, 3E831, the Pentagon, Washington, DC 20301-1100) for any civilian personnel costs included in (4), (5), (6), (7) or (8).
- ★(13) The Public Rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, (8)--Crew Salary, (9)--Asset Utilization and an unfunded civilian retirement cost (The civilian fringe benefit rate--to be used in this calculation--will be obtained annually from the Directorate for Financial Commerce, OUSD(C), ODCFO, 3E831, the Pentagon, Washington, DC 20301-1100) for any civilian personnel costs included in (4), (5), (6), (7) or (8).

- (14) A brief narrative will be provided to explain significant changes between fiscal years.

APPENDIX F**INSTRUCTIONS**

General. The four Military Services each are required to prepare and submit two copies of this budget exhibit annually. The submission, containing previous fiscal year actual data, must be received no later than March 1 of each year.

★One copy should be forwarded to the Directorate for Financial Commerce, OUSD(C), ODCFO, Room 3E831, 1100 The Pentagon, Washington, DC 20301-1100. A second copy should be forwarded to the Directorate for Operations and Personnel, Office of the Under Secretary of Defense (Comptroller), Room 3D868, 1100 The Pentagon, Washington, DC 20301-1100.

Please include a point-of-contact, with organization and telephone number with each submission.

Notes:

- (1) Insert applicable Military Service--Army, Navy, Marine Corps or Air Force.
- (2) Identify applicable Area -- Separate reports must be submitted by each Military Service, and for each Military Academy. Reports for the Military Services should include amounts for medical facilities, and exclude amounts reported separately for the Military Academies. Additionally, the Department of the Navy shall submit separate exhibits for ashore, afloat, and a combined total of the ashore and afloat exhibits.
- (3) Indicate the applicable fiscal years, and include applicable amounts for each fiscal year. For example, for the March 1998 submission, the FY 19PY will be FY 1997; the FY 19CY will be FY 1998; and the FY 19BY will be FY 1999. The FY 19CY column calculations should be computed using 1st quarter actual data and estimates for the remainder of the fiscal year.

Part 1: Food Service Operating Expense

- (4) Show military personnel end strength (A.1.), work years (A.2.), and related personnel costs (A.3.). Military personnel costs should be determined by applying the Military Composite Pay Rate (see Chapter 6, Appendix I, of this Volume) to the work years shown for military personnel performing food service and related administrative services for appropriated fund dining facilities.
- (5) Show civilian personnel end strength (B.1.), work years (B.2.), and related personnel costs (B.3.). Civilian personnel costs should be determined by applying the direct civilian labor rate (calculated in accordance with Chapter 1 of this Volume), multiplied by the Civilian Benefit Fringe Benefit Rate (see Chapter 6, Appendix C, of this Volume), to the work years shown for civilian personnel performing food service and related administrative services for appropriated fund dining facilities.
- (6) Include total DoD personnel compensation costs -- this is the sum of lines A.3. and B.3.
- (7) Include the total cost of all food service attendant contracts.

APPENDIX F

- (8) Include the cost of all supplies and materials (excluding food items) and equipment expenses (equipment with a value of less than the expense/investment funding threshold used to determine if items are funded from operating expense (Operations and Maintenance), or investment expense (procurement) appropriations).
- (9) Include total expenses incurred for full food service contracts. If available, identify personnel compensation amounts separately from all other costs.
- (10) Include total food service costs -- this is the sum of C., D., E., and F.

Part 2: Other Data

- (11) Include the total number of food service facilities operated by the Service.
- (12) Meals served (counted) will be converted to an equivalent meal-days fed by multiplying the meals served by prescribed percentages in Chapter 19, Volume 12, of this Regulation. These meal conversion factors represent the estimated portion of the BDFA for each service member for each type of meal. Source data for meals served is also required.
- (13) Show the actual/estimated total amount of food service charges collected for meals served. Food costs and operating expense collections should be identified separately.
- (14) A brief description should be provided to explain significant changes between fiscal year amounts.

NARRATIVE JUSTIFICATION (14)

APPENDIX G
INSTRUCTIONS

- (1) Insert Army, Navy or Air Force, as applicable.
- (2) Separately list and provide data for each type/model/series of helicopter in the Component's inventory which is subject to reimbursement.
- (3) Insert the applicable fiscal (budget) year.
- (4) Fuel costs will be equal to the corresponding amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force) for the applicable type/model/series. (If for any reason, the OP-20 Exhibit series does not include an applicable type/model/series of helicopter, fuel costs will be computed using the same methodology as that used for aircraft included in the OP-20 Exhibit series, i.e., by dividing the total cost of fuel for the fiscal year for each type of aircraft by the total number of flying hours for that same aircraft.)
- (5) Depot-level reparable (DLR) costs will be equal to the corresponding amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force) for the applicable type/model/series. (If for any reason, the OP-20 Exhibit series does not include an applicable type/model/series of helicopter, DLR costs will be computed using the same methodology as that used for aircraft included in the OP-20 Exhibit series, i.e., by dividing the total DLR costs for the applicable fiscal year by the total number of flying hours.)
- (6) Include an hourly rate for depot maintenance cost for airframes, engines, and components for the applicable type/model/series. This cost will be an average cost for that type/model/series, and be computed by dividing the total amount of depot maintenance budgeted for the applicable type/model/series by the number of flying hours budgeted for that type/model/series.
- (7) Other costs will equal corresponding "other" amounts shown in the related OP-20 Exhibit series (OP-20D for Army, OP-20 for Navy, and OP-20E for Air Force--for Air Force, this is equal to the General Support/Systems Support [GS+SS] column in Exhibit OP-20E). (If for any reason, the OP-20 Exhibit series does not include an applicable type/model/series of helicopter, other costs will be computed using the same methodology as that used for aircraft included in the OP-20 Exhibit series, i.e., by adding all operating costs ((other than those costs included in columns 4 - 6 and 8 - 9)) and dividing the total of such other costs for the applicable fiscal year by the total number of flying hours.)
- (8) Crew salary amounts will be computed based on the number and grade of military personnel operating the helicopter. Crew salary costs will be computed by:

- (a) Multiplying the standard number of crew members in each applicable military grade times the annual Military Standard Composite Rate for that grade (see exhibit 14I).
- (b) Dividing the result of (a) by 2080 (hours) to convert the annual rate to an hourly rate, by grade.
- (c) Multiplying the results of (b) by a factor of 120 percent for officers and 132 percent for enlisted personnel. (This calculation increases the hourly rate for fringe benefits for officers and enlisted personnel, respectively. These factors are composed of 14 percent for leave and holiday for both officers and enlisted, plus 6 percent for officers, and 18 percent for enlisted personnel, for other fringe benefits.)
- (d) Adding the amounts arrived at in (c) for each grade, to arrive at a total hourly rate for the entire crew.

Note: The computation of crew salary amounts will be supported by a separate table attached to this exhibit.

- (9) The asset utilization amount will be computed by applying an asset utilization factor of 4 percent times the sum of columns (4)--Fuel, (5)--DLRs, (6)--Depot Maintenance, (7)--Other and (8)--Crew Salary for each specific helicopter.
- (10) The DoD rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6)--Depot Maintenance, and (7)--Other. This rate is to be used for interdepartmental (e.g., Navy to Air Force, etc.) billing purposes.
- (11) The Other Federal Agency Rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, and (8)--Crew Salary.
- ★(12) The FMS rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, (8)--Crew Salary, and an unfunded civilian retirement cost (The civilian fringe benefit rate--to be used in this calculation--will be obtained annually from the Directorate for Financial Commerce, OUSD(C), ODCFO, Room 3E831, the Pentagon, Washington, DC 20301-1100) for any civilian personnel costs included in (4), (5), (6), (7) or (8).
- ★(13) The Public Rate will be calculated by adding the sum of columns (4)--Fuel, (5)--DLRs, (6) Depot Maintenance, (7)--Other, (8)--Crew Salary, (9)--Asset Utilization and an unfunded civilian retirement cost (The civilian fringe benefit rate--to be used in this calculation--will be obtained annually from the Directorate for Financial Commerce, OUSD(C), ODCFO, Room 3E831, the Pentagon, Washington, DC 20301-1100) for any civilian personnel costs included in (4), (5), (6), (7) or (8).

- (14) A brief narrative will be provided to explain significant changes between fiscal years.

APPENDIX HMEDICAL AND DENTAL SERVICES RATE COMPUTATIONSUBMITTED BY THE OFFICE OF THE ASSISTANT SECRETARY OF DEFENSE
(HEALTH AFFAIRS)

Note: Budget exhibit includes Sections I, II, and III for IMET, Interagency and Other. This exhibit is to be included only in the President's budget. The format of the budget exhibit for medical and dental rates may vary slightly from year to year due to the addition/deletion of rates, changes in nomenclature, updated notes and other unforeseen reasons.

G. Dental Rate

<u>MEPRS Code 4/</u>	<u>PER VISIT Clinical Service</u>	<u>Prior FY</u>	<u>Current FY</u>	<u>Budget FY</u>
N/A	Dental Services	\$_____	\$_____	\$_____

Dental service charges are based on a Composite Time Value. Provider should calculate the charges based on the time value of the procedure times the CTV rate.

H. Ambulance Rate

<u>MEPRS Code 4/</u>	<u>PER VISIT Clinical Service</u>	<u>Prior FY</u>	<u>Current FY</u>	<u>Budget FY</u>
N/A	Ambulance Service	\$_____	\$_____	\$_____

Ambulance charges are based on hours of service. Provider should calculate the charges based on the number of hours (or fraction thereof) that the ambulance is logged out on a patient run.

NOTES ON REIMBURSABLE RATES:

1/ Percentages are applied to both inpatient and outpatient services provided when billing third party payers (e.g., insurance companies). Pursuant to the provisions of 10 U.S.C. 1095, the inpatient Diagnosis Related Groups are __ percent hospital and __ percent professional fee. The outpatient per visit percentages are __ percent hospital, __ percent ancillary and __ percent professional.

2/ DoD civilian employees located in overseas areas shall be rendered a bill when services are performed. Payment is due 60 days from the date of the bill.

3/ The cost of DRG (Diagnosis Related Groups) is based on the inpatient full reimbursement rate per hospital discharge, weighted to reflect the intensity of the principal diagnosis involved. The adjusted standardized amounts (ASA) per Relative Weighted Product (RWP) for use in the Direct Care System is comparable to procedures utilized by Health Care Financing Administration (HFCA) and the Civilian Health and Medical Program for the Uniformed Services (CHAMPUS). These expenses include all direct care expenses associated with direct patient care. The average cost per relative weight product for large urban, other urban/rural, and overseas are published as an inpatient standardized amount and include the cost of inpatient professional services. The DRG rates apply to reimbursement from all sources (including third party payers).

4/ The Medical Expense and Performance Reporting System (MEPRS) code is a three digit code which defines the summary account and the subaccount within a functional category in the DoD medical system. An example of this hierarchical arrangement is as follows:

Outpatient Care (Functional Category)	<u>MEPRS CODE</u>
Medical Care (Summary Account)	BA
Internal Medicine (Subaccount)	BAA

MEPRS codes are used to ensure that consistent expense and operating performance data is reported in the DoD military medical system.

5/ High cost prescription services requested by external providers (Physicians, Dentists, etc.) are only relevant to the Third Party Collection Program. Third party payers (such as insurance companies) are billed for high cost prescriptions in those instances in which dependents who have medical insurance, seen by providers external to a Military Medical Treatment Facility (MTF), obtain the prescribed medication from an MTF. Eligible beneficiaries (family members or retirees with medical insurance) are not personally liable for this cost and, subsequently, are not billed by the MTF. A third party payer may be billed if the total prescription costs in a day exceed \$____ when bundled together. The standard cost of high cost medications includes the cost of the drugs plus a dispensing fee, per prescription. The prescription cost is calculated by multiplying the number of units (tablets, capsules, etc.) times the unit cost and adding a \$____ dispensing fee per prescription.

6/ Charges for high cost services requested by external providers (physicians, dentists, etc.) are only relevant to the Third Party Collection Program. Third party payers (such as insurance companies) shall be billed for high cost services in those instances in which dependents who have medical insurance, seen by providers external to a Military Medical Treatment Facility (MTF), obtain the prescribed service from an MTF. Eligible beneficiaries (family members or retirees with medical insurance) are not personally liable for this cost and shall not be billed by the MTF. A third party payer may be billed if the total ancillary services costs in a day exceed \$____ when bundled together.

7/ The attending physician is to complete the Physicians' Current Procedural Terminology code to indicate the appropriate procedure followed during cosmetic surgery. The appropriate rate is applied depending on the admission type of the patient, e.g., outpatient surgical, same day/ ambulatory surgery, or surgical care services.

8/ Family members of active duty personnel, retirees and their family members, and survivors are charged cosmetic surgery rates. The patient is charged the rate as specified in the reimbursable rates for an episode of care. The patient is responsible for both the cost of the implant(s) in addition to the prescribed cosmetic surgery rates.

NOTE: The implants and procedures used for the augmentation mammaplasty are in compliance with Federal Drug Administration guidelines.

9/ Each regional lipectomy will carry a separate charge. Regions include head and neck, abdomen, flanks, and hips.

10/ These procedures are inclusive in the minor skin lesions. However, CHAMPUS separates them as noted here. All charges are for the entire treatment regardless of the number of visits required.

(This page intentionally left blank.)

APPENDIX I**MILITARY COMPOSITE STANDARD PAY AND REIMBURSEMENT RATES****INSTRUCTIONS**

Each Military Service must complete an Appendix I using the attached standard format. The heading to each appendix I consists of three lines. The first line identifies the appendix by number, the second line states “MILITARY COMPOSITE STANDARD PAY AND REIMBURSABLE RATES,” and the third line identifies the Military Service that has developed the rates and the fiscal year that the rates will be used.

The Military Composite Standard Pay and Reimbursement Rates exhibit for the Budget Year should include the following cost elements that are listed for each column of the report. Amounts listed shall be equal to corresponding amounts contained in the applicable Military Service’s justification book in support of their military personnel appropriation budget request included in the latest President’s budget:

(Column 1) Basic Pay. Include the average basic pay amounts, by pay grade, as provided in the President's budget justification, Budget Subactivity (BSA) 1-A, Pay and Allowance of Officers, BSA 2-A, Pay and Allowances of Enlisted Personnel, and BSA 3-A, Pay and Allowances of Cadets and Midshipmen. The cadet and midshipmen rate is computed as a single rate for all cadets/midshipmen.

(Column 2) Retired Pay Accrual. Include average retired pay accrual amounts, by pay grade, as provided in the President's budget justification, BSA 1-B, Retired Pay Accrual for Officers and BSA 2-B, Retired Pay Accrual of Enlisted. The applicable retired pay accrual percentage is statutory and published annually.

(Column 3) Basic Allowance for Subsistence. Compute the basic allowance for subsistence rate separately, for officers and enlisted personnel, by pay grade, and for cadets and midshipmen, using amounts from the President's budget justification books. The officer rate is computed by dividing BSA 1-G, Basic Allowance for Subsistence for officers, by the officer average strength, by grade. The enlisted rate is computed by adding BSA 4-A, Basic Allowance for Subsistence for enlisted and BSA 4-B, Subsistence-in-Kind (SIK) for enlisted, and then dividing the total by the enlisted average strength, by grade. Compute a single rate for cadets and midshipmen.

(Column 4) Basic Allowance for Quarters (BAQ) and Variable Housing Allowance (VHA). Compute the BAQ/VHA rate separately, for officers and enlisted personnel, by pay grade, using amounts from the President's budget justification books. The officer rate is computed by adding amounts for BSA 1-E, BAQ for officers and BSA 1-F, VHA for officers, then dividing the sum by the average strength for officer personnel. The enlisted rate is computed by adding amounts in BSA 2-H, BAQ for enlisted and BSA 2-I, VHA for enlisted, then dividing the sum by the average strength for enlisted personnel.

(Column 5) Incentive and Special Pays. Compute the Incentive and Special Pay rate separately for officers and enlisted personnel, by pay grade, using amounts from the President's budget justification books. For each pay grade, add the incentive and special pay amounts and then divide the sum by the average end strength, separately for officers and enlisted personnel. The officer rate is computed by adding the amounts for BSA 1-C, Incentive Pay for Hazardous Duty for officers and BSA 1-D, Special Pay for officers, then dividing the sum by the average strength for officer personnel. The enlisted rate is computed by adding the amounts for BSA 2-C, Incentive Pay for Hazardous Duty for enlisted, BSA 2-D, Special Pay for enlisted, BSA 2-E, Special Duty Assignment Pay for enlisted, BSA 2-F, Reenlistment Bonus, and BSA 2-G, Enlistment Bonus, then dividing the sum by the average strength for enlisted personnel.

(Column 6) Permanent Change of Station (PCS) Expense. This element represents the average cost of amounts provided in the President's budget justification books for PCS travel, Budget Activity 5. Compute the average PCS by adding the following types of travel each for officers, enlisted personnel, and cadets, from the BSAs contained in the justification books: accession travel (BSA 5-A); training travel (BSA 5-B); operational travel between duty stations (within Conus and within overseas) (BSA5-C); rotational travel to and from overseas (BSA 5-D); separation travel (BSA 5-E); and travel of organized units (BSA 5-F). The sum of BA-5 is divided by the average strength separately, for officer and enlisted personnel. Compute a single rate for cadets and midshipmen.

(Column 7) Miscellaneous Expense. This rate is the average computed separately, for officers and enlisted personnel, by pay grade, and for cadets and midshipmen, of amounts provided in the President's budget justification books for Budget Activity 6, Other Military Personnel Costs, and other amounts for miscellaneous allowances and payments for officers, enlisted, and cadets/midshipmen as contained in BSAs listed in the following matrix:

<u>Miscellaneous Expense</u>	<u>Officer</u>	<u>Enlisted</u>
Uniform Allowances	BSA 1-I	
Clothing Allowances		BSA 2-K
Station Allowances, Overseas	BSA 1-H	BSA 2-J
Family Separation Allowances	BSA 1-J	BSA 2-L
Separation Payments	BSA 1-K	BSA 2-M
Social Security Tax-Employer Contribution	BSA 1-L	BSA 2-N
Other Military Personnel Costs	BA 6	BA 6

The amounts in each of the above categories shall be divided by the number of personnel eligible or entitled to the allowance or entitlement. The result for all subcategories are then added to obtain the average miscellaneous expense rate by grade, separately for officer and enlisted personnel. The result then is divided by the overall average strength by officer and enlisted as shown in the budget justification materials. A single rate shall be used for cadets and midshipmen.

(Column 8) Annual DoD Composite Standard Rate. Enter the sum of columns (1) through (6).

(Column 9) Acceleration Factor. Equals Column 7 multiplied by an Other Personnel Support Costs factor of 6 percent for Officers and 18 percent for Enlisted Personnel.

(Column 10) Amount Billable to Non-DoD Entities. Add columns 7 and 8. Note: To compute a daily rate, multiply column 9 by a factor of .00439 (1.14/260). For an hourly rate, multiply column 9 by a factor of .00055 (1.14/2080).

APPENDIX J
REIMBURSEMENT COST FOR CONTRACT ADMINISTRATION AND RELATED SUPPORT SERVICES
FURNISHED TO THE NASA

Notes:

- (1) The amounts reflected should be the “actual” cost and work-hour data for the most recently completed fiscal year. This should be the FY 19PY of the President’s budget.
- (2) The amounts reflected should be that shown in the “Total” column of the attached schedule, “Personnel Cost For Contract Administration and Related Support Services Furnished to the NASA” (pages 3 and 4) for the applicable year, i.e., PY, CY, BY.
- (3) Separately, show basis of computation.
- (4) Includes all travel costs, i.e., local, temporary additional duty, and permanent change of station, of the civilian and military personnel included under items (A), (D) and (F).
- (5) Includes other expenses such as supplies, equipment, training and communications.

Notes:

- (6) Include the salary expenses of direct civilian and military personnel, e.g., contract administrators, and auditors.
- a. Civilian. The cost of civilian personnel assigned full time to NASA requirements should reflect the annual salary for the applicable pay grades. Otherwise, an hourly rate of 1/2087 of the annual rate shall be used and a leave and holiday factor of 18 percent of pay cost added.
 - b. Military. The cost of military personnel assigned full time to NASA requirements should be based on the annual Military Composite Pay rates. Otherwise, an hourly rate of 1/2080 of the annual Military Composite Pay rate shall be used and a leave and holiday factor of 14 percent of pay cost added.

APPENDIX J
PERSONNEL COST FOR CONTRACT ADMINISTRATION AND RELATED SUPPORT SERVICES
FURNISHED TO THE NASA

Notes cont'd:

- (7) Include the indirect salary expenses for civilian and military personnel that perform supervisory and administrative (clerical) functions. Such costs are computed as indicated in (6)a. and (6)b. above.
- (8) Include the salary expenses for civilian and military personnel at the district, regional and headquarters level. Such costs are computed as indicated in (6)a. and (6)b. above.
- (9) Include the fringe benefit expenses for all civilian and military personnel included in items (A), (D) and (F).
 - a. Civilian. Fringe benefits are computed by multiplying civilian personnel costs by the civilian fringe benefit rate. The fringe benefit rate must be that reported for the applicable fiscal year on the OP-8 exhibit, "Civilian Personnel Costs."
 - b. Military. Fringe benefits are computed by multiplying separately the officer and enlisted salaries by 6 percent for officers and 18 percent for enlisted personnel.

APPENDIX K
TELEPHONE (CLASS B UNOFFICIAL SERVICE)

GENERAL INFORMATION:

The telephone service provided by a DoD Component, when used for personal or unofficial purposes, is known as Class B telephone service. This includes telephone services provided by government-owned or government-leased facilities, or procured under contract, or implied agreement, with a commercial communications company.

The use of Class B telephone service is required to be charged to the user. Class B telephone rates are subdivided and identified as Class B-1 and Class B-2. The classes are defined below.

Class B-1: Installed in government-owned or government-leased quarters assigned or used for family or personal use in private or rental housing occupied by DoD personnel.

Class B-2: Installed at a military location for the use of activities such as public schools; Boy Scouts; Girl Scouts; American Red Cross; Nonappropriated Fund instrumentalities such as noncommissioned officers' and officers' messes; nurseries; thrift shops; exchange services; credit unions; commercial contractors; concessionaires; and other profit or non-profit organizations operating on behalf of the Department of Defense whether within, or in the immediate vicinity of, a DoD installation.

CHAPTER 7**INTERNATIONAL NARCOTICS CONTROL PROGRAM****0701 OVERVIEW**

070101. Purpose. This chapter provides pricing guidance for International Narcotics Control Program (INCP) transactions and identifies procedures for disposition of proceeds from such transactions.

0702 SUPPORT OF THE INTERNATIONAL NARCOTICS CONTROL PROGRAM

070201. General. Section 632(c) of the “Foreign Assistance Act” (FAA) provides for special pricing requirements when services, including training, are provided by the Department of Defense to the Department of State in support of the INCP. Billing shall be within 30 calendar days after the month in which performance occurred. The payment due date shall not be more than 30 calendar days from the date of the invoice. Bills rendered shall not be subject to audit by the customer.

070202. Pricing. The following rules shall be followed by DoD Components when determining amounts to be collected as reimbursements for orders from the Department of State that cite INCP financing.

A. INCP Training. The tuition rate for DoD training provided to support INCP shall include the following cost elements:

1. Civilian Instructors and School Support Staff. It is anticipated that the additional cost charged to the INCP for civilian instructors shall be minimal for courses or groupings of courses when either the ratios of students to instructors or U.S. students to INCP students is high. Courses shall be reviewed to determine the additional cost incurred as a result of attendance by INCP students. Classroom or technical courses that are similar, or that utilize instructors who teach more than one course, may be grouped for computation purposes.

a. For groups of courses, an estimate shall be made of the number of U.S. students in each course and the number of civilian instructors and civilian staff required. A second projection shall be made of the total number of students to be enrolled in applicable courses, both U.S. and foreign, and the number of civilian instructors and civilian staff required. Both projections shall be based on the maximum number of students who can be taught by civilian instructors or civilian staff rather than on optimum class size. The difference in the number of civilian instructors and civilian staff between the two projections represents the additional civilian instructors and/or civilian staff required. Applicable additional civilian instructors and civilian staff then shall be priced in accordance with Chapter 1 of this volume. This value, divided by the total number of INCP students, represents the additional cost per INCP student for the course (or courses).

b. When there is a one-for-one or one-for-two relationship of civilian instructors to students, the instructor in all cases shall be considered additional. If the entire class is composed of INCP students, the instructor and staff always shall be considered additional.

2. Military Instructors and Military School Support Staff. There shall be no charges to the INCP program for military personnel conducting training courses.

3. Equipment Overhaul and Maintenance. The overhaul and maintenance of major items of equipment, when computed on an hourly use basis, shall be additional to a course based on estimated utilization hours.

4. Simulators. Simulator hours shall be charged as an additional cost. Simulator costs shall include pay of the operators, supplies and equipment maintenance. Simulator costs shall be allocated to the course in the same ratio as hours used bear to the total hours available.

5. Supplies, Materiel, Training Aids, Ammunition. Also, charge as additional cost the replacement cost of items that are not returned or reusable (including petroleum, oil and lubricants (POL)) expended in the conduct of training.

6. Lost or Damaged Equipment. If equipment was lost or damaged during training and it was found to be the result of a foreign student's negligence, the additional cost to be charged shall be the actual costs of the repairs or replacement cost of the equipment.

7. Base Support (That Is, Indirect Student Costs). A standard weekly rate shall be charged for INCP training conducted on DoD installations. The fixed weekly amount shall be the same as used for billing DoD appropriations that finance the International Military Education and Training (IMET) program. See paragraph 071206, Volume 15, of this Regulation for additional details.

8. Food Preparation. Meal operating/food preparation costs are additive to other food costs. The weekly meal operating and food preparation costs for INCP students shall be the same as that used in billing DoD appropriations that finance IMET training when courses are conducted on DoD installations and students use DoD appropriated dining facilities.

9. Instructor Training. The training of U.S. instructors or other personnel for special courses normally not conducted for U.S. personnel shall be considered additional costs. When the required training is conducted at a U.S. training facility, the INCP program (i.e., the Department of State) shall be charged the normal course cost. When the special course is conducted by a Management Service Team (MST) away from the normal training institution, the services of the MST will be treated as a dedicated service and full cost billed to the INCP program.

10. Facilities and Equipment. The costs of any facilities or equipment acquired primarily for the support of foreign students enrolled in the INCP program shall be considered additional costs.

11. Information Program. The full cost of the information program to the U.S. Government is an additional cost.

12. Shipment of Instructional Materials

a. The shipment of instructional materials to students shall be included in the INCP tuition rate. The shipping charge shall be the same as that used in billing DoD appropriations that finance IMET training. See paragraph 071105, Volume 15, of this Regulation for additional details.

b. Instructional material is to be packed and labeled at the training installation and shipped via the most expeditious means to the Security Assistance Organization (SAO) of the respective country for delivery to the trainee. A copy of the student's invitational travel order shall be placed inside the package.

c. The training installation shall ensure that no personal baggage or other unauthorized matter is shipped with instructional material.

13. Travel and Per Diem. Instructor and student travel and per diem associated with the provision of training shall be considered additional costs, to include transportation, living allowances, and medical expenses.

B. Other DoD Services

1. DoD Services Provided Incident to Normal Mission Accomplishment. When support of the INCP is accomplished incidental to performance of a DoD mission requirement, there are no additional costs incurred. However, if a mission was extended or the cost was otherwise increased, the cost over and above the scheduled mission cost shall be reimbursed.

2. Scheduled DoD Transportation. Air and ocean transportation services performed by the U.S. Transportation Command on scheduled movements shall be priced, where applicable, at current tariff rates for DoD Components.

3. Detailed Personnel. All costs incurred in connection with the detail of DoD personnel to the Department of State to support the INCP--both civilian and military--are considered additional expenses and, as such, shall be priced at the normal rate charged to other Federal agencies.

C. Supplies and Equipment. Section 482 of the FAA prohibits the procurement of weapons or ammunition from funds authorized for this program. Thus, any specific order for a weapon or ammunition that cites the appropriations provided to finance INCP either must be rejected or returned for a new fund citation. Supplies and equipment that can be provided shall be priced in accordance with Chapter 1 of this volume. Pricing policy for excess and non-excess material also is set forth in Chapter 1 of this volume.

070203. Disposition of Proceeds. Section 632(c) of the FAA provides that applicable collections from the Department of State shall be returned to the financing DoD appropriation account.

CHAPTER 8**MUTUAL LOGISTICS SUPPORT BETWEEN THE UNITED STATES AND
GOVERNMENTS OF ELIGIBLE COUNTRIES AND
NATO SUBSIDIARY BODIES****0801 OVERVIEW**

080101. Purpose. This chapter provides procedures for transacting reimbursable procedures under the authority of Title 10, United States Code, Chapter 138 provides pricing guidance for those transactions, and provides instructions for disposition of proceeds for such reimbursable transactions.

080102. Overview. Title 10, United States Code, Chapter 138 authorizes the use of support agreements for certain mutual logistics support among the United States and governments of other North Atlantic Treaty Organization (NATO) countries, NATO subsidiary bodies, other eligible foreign countries, the United Nations Organization, and any regional international organization of which the United States is a member. Section 2341 authorizes the procurement of logistics support, supplies, and services from a foreign country. Section 2342 authorizes the sale to or exchange of logistics support, supplies, and services with a foreign country or international organization. Section 2344, as amended by the National Defense Authorization Act for fiscal years 1990 and 1991, authorizes logistics exchanges to be of equal value. Before that amendment, section 2344 required exchanges to be of an identical or substantially identical nature. The specific guidance on the use of these authorities is contained in DoD Directive 2010.9, "Mutual Logistics Support Between the United States and Governments of Eligible Countries and NATO Subsidiary Bodies."

0802 POLICY AND PROCEDURES

080201. Liquidation of Credits and Liabilities. Compensation for the acquisition or transfer of supplies (materiel) and services shall be obtained through either of the following methods:

A. Reimbursement. Payment for supplies (materiel) and services in the currency of the supplying nation.

B. Exchange. Replacement of supplies (materiel) or services with supplies or services of equal value. Equal value is the actual or estimated price at the time of transaction approval. Equal value transactions shall be certified by the officials delegated such authority by the Secretaries of the Military Departments.

080202. Methods of Liquidation of Accrued Credits and Liabilities

A. Reimbursable Transactions. Agreements entered into by the U.S. Forces shall stipulate the liquidation of outstanding accounts receivable or accounts payable on a monthly basis. Bills shall be accompanied by necessary supporting documentation and paid 30 days from the date prepared.

B. Exchange Transactions. Exchange transactions shall be settled through the issue or receipt, as applicable, of replacement supplies or services within 12 months of the original transaction. If not settled within this period, the exchange transaction shall be converted to a reimbursable transaction, and the resulting accounts receivable or accounts payable shall be liquidated in accordance with paragraph 080202.A., above.

080203. Inventories of Supplies. Inventories of supplies for elements of the U.S. Forces may not be increased for the purpose of transferring supplies under the authority of Title 10, United States Code, Chapter 138 and DoD Directive 2010.9.

080204. Obligation and Earned Reimbursement Limitations. The obligations and earned reimbursement limitation set forth below shall be followed during normal peacetime periods. These ceilings do not apply during periods of active hostilities involving the U.S. Forces. These limitations likewise do not apply to exchange transactions unless converted into a reimbursable transaction due to nonreplacement.

A. Obligation Limitations

1. For NATO countries, NATO subsidiary bodies, or from the United Nations Organization or any regional international organization of which the United States is a member, during any fiscal year, the amount to be obligated by the Department of Defense for reimbursable transactions (purchases) may not exceed \$200 million. Of the \$200 million limitation, no more than \$50 million in obligations shall be incurred for the acquisition of supplies (materiel) other than petroleum, oil, and lubricants (POL).

2. For participating non-NATO countries, the total amount of reimbursable liabilities (purchases) that the United States may accrue (before computing offsetting balances) with each country may not exceed \$60 million in any fiscal year. No more than \$20 million in liabilities shall be accrued in any fiscal year for supplies (materiel) other than POL.

B. Earned Reimbursement Limitation

1. For NATO countries, NATO subsidiary bodies, or from the United Nations Organization or any regional international organization of which the United States is a member, earned reimbursement (sales) accruals from all reimbursable transactions may not exceed \$150 million during any fiscal year.

2. For participating non-NATO countries, the total reimbursable credits (sales) that the United States may accrue, under the authority of Title 10, United States

Code, Chapter 138, from each country (before computing offsetting balances) may not exceed \$75 million in any fiscal year.

080205. Requests for Authorization to Use Limitations. Each organization that intends to enter into reimbursable purchases or sales under the authority of Title 10, United States Code, Chapter 138 shall request authorization. Requests shall be accompanied by justification, including a prioritization of requirements. The requests shall be submitted to the cognizant Unified Combatant Command through the requesting organization's appropriate Component command. The authorizations do not increase the amount of obligational or apportioned anticipated reimbursable authority, but rather allow use of existing budget authority to enter into purchases or sales under the authority of Title 10, United States Code, Chapter 138. Requests shall identify the categories of support as identified in Table 21-1.

CATEGORIES OF SUPPORT		
<u>Category of Support</u>	<u>Requested Authorization</u>	
	<u>Obligations</u> <u>(Purchases)</u>	<u>Earned</u> <u>Reimbursements</u> <u>(Sales)</u>
POL	\$_____	\$_____
Other Materiel	_____	_____
Maintenance	_____	_____
Services	_____	_____
TOTAL	\$_____	\$_____

Table 8-1

080206. Waiver During Contingency or Non-Combat Operations. When the U.S. Forces are involved in a contingency operation or non-combat operation (including an operation in support of the provisions of humanitarian or foreign disaster assistance or in support of peacekeeping operations under Chapters VI or VII of the Charter of the United Nations), the restrictions in subsections 080204 and 080205 are waived for purposes and duration of that operation.

080207. Issuance of the Authorization. The cognizant Unified Combatant Command shall review and approve requests for authorization. If the total amount requested by all Component commands exceeds established limitations, the cognizant Unified Combatant Command shall review the justifications and make appropriate reductions to requested amounts as needed. Each cognizant Unified Combatant Command shall advise the Military Departments of authorizations distributed.

080208. Distribution of Authorization Received. Upon receipt of an authorization from a Unified Combatant Command, Component commands shall authorize their activities to enter into reimbursable transactions under Title 10, United States Code, Chapter 138. No activity or unit shall enter into such transactions unless they have been provided an authorization. Recipients of an authorization shall establish procedures to ensure that authorized dollar amounts are not exceeded.

080209. Other Requirements

A. Detailed reports are required for transactions conducted under Title 10, United States Code, Chapter 138. The information requirements are found in Chapter 8, “Special Reports,” Volume 6, of this Regulation.

B. Forms used to document the issue or receipt of supplies and services under authority of Title 10, United States Code, Chapter 138, are subject to a bilateral or multinational agreement. However, these forms must meet the minimum information requirements set forth in chapter 8, “Special Reports,” Volume 6, of this Regulation.

C. Any accounting station receiving an authorization to incur obligations pursuant to the authority of Title 10, United States Code, Chapter 138, shall establish a subsystem to the normal appropriation or fund accounting system to capture data on the use of this authority. Similarly, receipt of the earned reimbursement authority requires the establishment of a customer order subsystem to capture data on the use of such authority. Source documents pertaining to the authorized dollar amount and its use, such as obligations (DoD undelivered orders for materiel or services and accrued expenditures based on receipt of the materiel or services ordered), disbursements (liquidation of unpaid accrued expenditures), accounts payable (the unpaid portion of accrued expenditures), accounts receivable (earned reimbursements), and collections (receipt of payment to liquidate accounts receivable) shall be recorded promptly in the subsystem records.

D. Control over exchange transactions shall be established and maintained through use of an exchange transaction history file. Input to the history file shall be made by submission of each individual transaction form which includes the minimum information required by chapter 8, “Special Reports,” Volume 6, of this Regulation.

080210. Pricing Reimbursable Transactions. Title 10, United States Code, Chapter 138, authorizes two methods for pricing reimbursable transactions. The method to be used depends on whether a reciprocal pricing agreement exists. Pricing procedures under each of the alternatives are set forth below.

A. Reciprocal Pricing Principles. When a reciprocal pricing agreement has been signed by the United States and another participating country, pricing by the supplying country shall be in accordance with the following:

1. For new procurements, the price charged to a recipient country by the supplying country should be no less favorable than that charged the armed forces of the supplying country by its contractors. The price charged shall allow for differentials due to delivery schedules, points of delivery, and other similar considerations.

2. For supplies from inventories of the supplying country, or for logistics support and government services, the same prices shall be charged by the supplying government as it charges its own armed forces for identical supplies or services. When the Department of Defense is the supplier, the price charged shall be identical to rates charged by the DoD Components for cross-Service logistics support or services.

B. Nonreciprocal Pricing Principles. To the extent that a DoD Component cannot achieve mutual acceptance by another country of reciprocal pricing principles, or in the case of a NATO subsidiary body, the following procedures shall apply:

1. U.S. commanders delegated authority to negotiate agreements pursuant to section F, DoD Directive 2010.9, shall determine that the price for acquiring supplies or services is fair and reasonable. This determination shall be supported by a price analysis based on prior experience and supporting data and consider all applicable circumstances. If this determination cannot be made, no acquisitions shall take place.

2. Any transfer of supplies or services by U.S. Forces shall be subject to the pricing provisions of Volume 15 of this Regulation.

C. NATO Subsidiary Bodies. The pricing principles set forth in paragraph 080209.B., above, also shall apply to agreements with NATO subsidiary bodies for the purchase or sale of supplies and services.

080211. Disposition of Proceeds. Any payment for materiel or services provided by U.S. Forces and initially recorded as a sale transaction, shall be credited to the appropriation or fund currently available for the same purposes for which the expenditures were made, regardless of whether the payment is received in the fiscal year of sale or subsequent fiscal year. Payment for a transaction initially recorded as an exchange of materiel or services, but converted into a sale transaction due to nonreceipt of replacement material or services, shall be credited to the appropriation or fund currently available for the same purposes for which the expenditures were made, regardless of whether the payment is received in the fiscal year of sale or subsequent fiscal year.

(This page intentionally left blank.)

CHAPTER 9**SUPPORT OF INTERNATIONAL MILITARY ACTIVITIES****0901 OVERVIEW**

090101. Purpose. This chapter:

A. Reissues guidance formerly contained in DoD Instruction 2010.1, “Support of International Military Activities.” It establishes administrative arrangements, reimbursement and billing procedures, and identifies a method to compute the dollar value of credits due the United States for the support of international military activities.

B. Assigns responsibilities for the support of international organizations, and identifies reimbursable and nonreimbursable support.

C. Identifies the support that DoD Components can expect to receive from international military organizations and whether such support is on a reimbursable or nonreimbursable basis.

D. Establishes policies for financing the U.S. contributions to and the receipt of credits from the international military organizations in which the U.S. participates.

E. Establishes policies for paying U.S. personnel employed by international military organizations, and for verifying the credits received from the organizations for such personnel.

F. Does not apply to the provision of intelligence or cryptologic support provided under authorities other than those cited herein.

090102. Terms. The term, “Military Service,” as used herein, refers to the Army, Navy, Air Force, and Marine Corps.

0902 GENERAL

090201. The Department of Defense provides nonreimbursable support to international military organizations in two forms: (a) through a financial contribution to the budget of the international organization, or (b) by assignment of U.S. military elements to the international organization under the terms of international treaties or agreements (see DoD Directive 5530.3, “International Agreements”). U.S. military elements may be assigned either on a long-or short-term basis.

A. Typically, short-term assignments would be for the purpose of participating in a joint exercise or maneuvers conducted under the auspices of the international organization.

B. Long-term assignments typically involve filling an existing billet on the staff of an international organization.

C. Support under paragraphs 090201.A. and B., above, are not reimbursable to the Department of Defense. As an exception to this policy, support by members of a U.S. military element who provide services that were included in the budget of the international organization (e.g., a U.S. military member who occupies an international civilian billet) shall be reimbursable (see section 0904, below).

090202. All other support provided to the international military organization and to military elements of participating foreign countries is reimbursable to the performing DoD Component, and must be provided under one of the authorities described in subsections 090402, 090403, or 090404 of this chapter.

090203. The U.S. military element of an international military organization shall be supported by the international organization and the administrative agent on a nonreimbursable basis. The administrative agent must ensure support provided to the U.S. military elements of an international organization is equal in scope and quality to all organizations which it supports at a comparable location. Other military units in the area, including units of the administrative agent, also may receive support from the international organization, but on a reimbursable basis. When those military units receive support, a support agreement shall be drawn up between the Military Department concerned and the international organization.

0903 RESPONSIBILITIES

090301. Under Secretary of Defense (Comptroller) USD(C). The USD(C) shall designate the administrative agent responsible for arranging support to U.S. military elements at an international military organization. Geographic proximity to existing support infrastructure and mission compatibility are the primary criteria used to assign administrative agent duties. Current designations are provided in enclosure 1 of this chapter. The Military Services shall request updates to this enclosure as needed to reflect changes in available support infrastructure within a geographic area.

090302. Secretaries of the Army and the Air Force

A. The Secretary of the Army shall program and budget the annual U.S. contributions to the various North Atlantic Treaty Organization (NATO) bodies in the Army Operations and Maintenance (O&M) appropriation, with one exception, as identified in paragraph 090302.B, below.

B. The Secretary of the Army also shall program and budget for the annual U.S. contributions to other recognized multinational headquarters, such as the Reaction Forces and the NATO sub-Principal Subordinate Commands (PSC) in which the United States participates.

C. The Secretary of the Air Force shall budget for the NATO Airborne Early Warning Program Management Agency (NAPMA).

090303. Administrative Agent. The administrative agent shall:

A. Budget for the U.S. contributions to designated non-NATO international military organizations. When the Army is not the administrative agent for a NATO body, or other multinational headquarters, the designated agent shall provide the Army with program and budget information on the annual contribution for inclusion in the Army's O&M appropriation. Budgeting for the NAPMA constitutes an exception to this policy.

B. Coordinate with appropriate U.S. representatives at the international military organizations to ensure that effective procedures and controls are prescribed for budgeting, obligating, disbursing, and receiving credits incident to administering the U.S. contributions.

C. Program and allocate resources in a manner that will provide the international organization with the highest possible level of support under section 0902. and subsections 090402, 090403, or 090404 of this chapter consistent with financial constraints that may be imposed through the normal program and budget process.

D. Support U.S. military elements attached to the designated international military organization on a nonreimbursable basis, unless the support is an international budget cost or is a budget responsibility of another Military Department (see subsection 090304). The standards and directives of the administrative agent shall govern the level and type of support furnished. The level and type of support will be consistent with the highest possible level of support allowable under this chapter while not violating those same governing standards and directives. Support requirements based upon input provided by the U.S. military element shall be included in the administrative agent's annual budget. In carrying out this support responsibility, the administrative agent shall obtain support from the most efficient and economical source while ensuring that no parallel support facility is established when the support may be performed economically by local sources (see DoD Directive 4000.19, "Interservice, Interdepartmental, and Interagency Support").

E. Provide U.S. military elements, which are Table of Organization and Equipment (TO&E) or equivalent units, with replacement issues of consumable and nonconsumable material, obtaining peculiar items when necessary from supply systems of the parent Military Service on a reimbursable basis.

F. Provide U.S. military elements, which are Table of Distribution (TD) or equivalent units, both with initial and replacement issues of consumable and nonconsumable material.

G. Establish table of allowances, unit allowance lists, base allowance lists, and other authorization documents for U.S. military elements attached to the international military organization.

H. Budget for the cost of civilian employees of the U.S. Government assigned to positions in international military organizations. These employees shall retain their status as U.S. employees and be paid from U.S. funds at the appropriate U.S. scale of pay and allowances, subject to subparagraph 090303.I, below. However, since such employees are filling international positions, their pay and allowances at the appropriate international pay scale shall be budgeted by the international military organization to which they are assigned. A sum equal to the amount of such pay and allowances at the international scale shall be collected from the international organization and reflected in the reimbursable portion of the DoD budget. The DoD direct budget shall absorb any differences.

I. U.S. civilians who occupy positions in international military organizations on a direct hire basis (not as U.S. Government employees), as provided for by Executive Order 11633, "Security Clearance Program for U.S. Citizens Employed Directly by NATO, the SEATO, and the CENTO," will be governed by the provisions of that order and other applicable U.S. Government regulations that deal with such employment. They shall be remunerated by the international military organization concerned at the applicable international pay scale and shall have no entitlement to pay and allowances or benefits of U.S. Government employees.

090304. Secretary of a Military Department. The Secretary of a Military Department with military personnel assigned to a U.S. military element shall:

A. Budget and fund for personnel costs of military personnel of that Component included in the U.S. military element.

B. Budget and fund for personally assigned equipment provided to military personnel of that Component included in the U.S. military element.

C. Make initial issuance to TO&E or equivalent units of that Component assigned or attached to U.S. Military elements.

D. Budget and fund component-peculiar requirements, such as flying qualifications, medical examinations, personnel training and development, and social actions, for military personnel of that Component.

E. Support other requirements. Costs shall be chargeable to the administrative agent on an interservice (reimbursable) basis.

F. Provide appropriate support to foreign military elements or to international military organizations in accordance with subsections 090402, 090403 or 090404, herein, unless identified in this chapter as items of nonreimbursable support.

090305. Head of a U.S. Military Element. The Head of a U.S. Military Element shall support the international military organization on a nonreimbursable basis, except for the costs of a military member who is assigned to an international civilian position, or when such support requires augmentation of the Element's normal manpower, equipment, or other resources from other U.S. sources.

090306. Head of a DoD Component. The Head of a DoD Component shall support the international military organization and participating foreign countries on a reimbursable basis, in accordance with the Arms Export Control Act or NATO Mutual Support Act, unless otherwise specified in this chapter.

090307. Commander of a Unified Combatant Command. The Commander of a Unified Combatant Command shall coordinate the activities of the administrative agents concerned in implementing this chapter within the Command theater of operations.

090308. Head of an International Military Organization. The Head of an International Military Organization shall support U.S. Military Elements on a nonreimbursable basis for those support areas set forth in the scope of the budget for international military headquarters and agencies (enclosure 1).

0904 POLICY AND PROCEDURES

090401. Reimbursements Due the United States from International Military Organizations for U.S. Personnel (Military or Civilian) Occupying International Civilian Positions.

A. A sum equal to the pay and allowances established for the occupied positions at the international scale shall be credited to the United States as an offset to the U.S. contribution to the international organization.

1. The administrative agent shall determine the amount of credit due and initiate a quarterly SF 1080, "Voucher for Transfer Between Appropriations and/or Funds," to transfer funds from the U.S. contribution to the international budget to the applicable financing DoD appropriation.

2. As an exception to this offset credit procedure, international military organizations located in the continental United States (CONUS), to which contributions are made in U.S. dollars, shall make direct reimbursement of the international pay and allowance equivalent to the administrative agent for any U.S. personnel assigned to international civilian positions.

B. The administrative agent shall screen the personnel administration and payroll computations for U.S. employees, as performed by the international organization, to ensure the accuracy and sufficiency of data and credits granted.

090402. Reimbursements Due the United States from International Military Organizations for Reimbursable Support Provided Pursuant to the Arms Export Control Act (AECA). When DoD services are performed, articles delivered from inventory or new procurement initiated under the authority of Public Law 90-629, “Arms Export Control Act,” as amended (Title 22, United States Code, section 2751), the pricing and billing shall be in accordance with Volume 15 of this Regulation.

090403. Reimbursements Due the United States from International Military Organizations for Reimbursable Support Provided Pursuant to the NATO Mutual Support Act. When DoD services are performed or articles delivered from inventory under the authority of the NATO Mutual Support Act, pricing shall be in accordance with Chapter 8 of this volume and billing shall be in accordance with the international agreement negotiated in accordance with DoD Directive 2010.9, “Mutual Logistic Support Between the United States and Other NATO Forces.”

090404. Reimbursements Due the United States from International Military Organizations for Reimbursable Support Provided Under Authorities Other than the Arms Export Control Act or the NATO Mutual Support Act of 1979

A. Leases of real and personal property are authorized by Title 10, United States Code, section 2667 and shall be priced in accordance with Volume 2 of this Regulation. Property with a life expectancy of less than 3 years or a value of less than \$1,000 will not be leased, but must be provided on a sales basis under subsections 090402 or 090403, above. In the event that DoD services or materiel are provided under authorities other than Public Law 90-629 (AECA), Public Law 96-323 (ACSA), or this Regulation, the DoD Component providing that support shall obtain a legal opinion supporting the use of such other legal authority before providing the service or materiel. The legal opinion shall be retained for audit verification.

B. The designated official of the DoD Component furnishing the support shall:

1. Originate promptly and in detail an SF 1080 to bill the administrative agent or the designated coordinating agent.
2. Prepare the invoice for reimbursable support on the basis of constructive delivery.
3. Distribute the SF 1080s as follows:
 - a. Submit two copies of the SF 1080a, with supporting detail, to the international military organization receiving the services or materiel for verification of the charge.
 - b. Forward the original (disbursement SF 1080s) and the collection copy (SF 1080b), without supporting detail, to the administrative agent or the designated coordinating agent.

c. Retain the additional copies, with supporting detail as may be required by the billing office, pending receipt of executed vouchers.

C. The administrative agent or the designated coordinating agent shall (1) request the comptroller of the NATO command or the appropriate international organization concerned to provide a monthly listing of charges that have been accepted and (2) ensure that such charges are reflected as offset credits to the United States in the callup of contributions to the international budgets.

D. The coordinating agent shall match the monthly listing of accepted charges with outstanding SF 1080s, and process the SF 1080s for accepted charges as payments to the billing office. Upon receipt of the validated SF 1080s, the billing office shall process the collection.

E. The designated coordinating agent shall verify that the offset credits are applied to the U.S. contributions to the international organization through a reconciliation of individual SF 1080 billings to the monthly list of accepted charges.

F. When materiel or services are furnished to international military organizations that are located within the CONUS and to which contributions are made in U.S. dollars, the U.S. military activity providing the support shall be responsible for billing the international military organization directly, and obtaining reimbursement in U.S. dollars.

0905 SCOPE OF BUDGET FOR INTERNATIONAL MILITARY HEADQUARTERS AND AGENCIES

The international budget shall include the types of costs, except as limited by exclusions in the following paragraphs, in such order and form as may be determined by the appropriate financial reviewing authorities. The following subparagraphs are illustrative of the types of costs accepted by the NATO Military Budget Committee as an international charge. The comptroller of the international military organization concerned and the U.S. representative shall be consulted if there is doubt whether the cost of any article or service is properly an international charge.

090501. Civilian Personnel, Administrative Staff. Pay and authorized allowances of personnel employed by an international headquarters for the performance of international functions, including secretarial, clerical, or technical assistance. For U.S. military and civilian personnel, see paragraph 090401 of this chapter.

090502. Civilian Personnel, Operational Staff. Pay and authorized allowance of personnel locally hired for custodial, industrial, or operational purposes, including upkeep of the premises and fixed or movable equipment used by the headquarters or its support units or fixed installations, supervision or operation of headquarters' fixed and movable equipment other than office equipment, and operation of headquarters enlisted mess facilities.

090503. Rents and Maintenance. Rental of office space, barracks, warehouses, and other commercial-type buildings, including taxes; cost of utilities, liquid and solid fuels, sewage and garbage disposal service; supplies and material for janitorial and hygienic services (national support unit barracks excluded); and supplies, material, and contractual expenses for maintenance, repair, and minor alterations to buildings and facilities, including replacement of minor installations and fixed equipment when damaged or worn beyond repair.

090504. Operation of General Services. Stationary and general office supplies for the headquarters and all units assigned in direct support; rental of office equipment required to supplement available equipment in accordance with internationally approved standards; printing, binding, and reproduction; purchase of maps, charts, and terrain models for peace time use; newspapers, periodicals, and library supplies; photo supplies and photographic processing; and drugs and other expendable medical supplies for first aid stations.

090505. Communications. Procurement and installation of switchboards, radio transmitters and receivers, telephone exchanges, and mobile communications equipment including related signal vehicles; rental of commercial-type equipment for additional requirements; repair and maintenance of communications equipment, including supplies and spare parts; cost of commercial communications, including installation and reinstallation charges for leased or other use of local, national, and international telephone, telegraph, and teletype circuits; and postage and postal fees.

090506. Transportation. Rental or purchase of passenger and cargo vehicles; petroleum, oil, and lubricant products for such vehicles and other equipment used in direct support of international headquarters; supplies and spares required for organizational maintenance of vehicles and related equipment; commercial freight, local hauling, and express charges for internationally procured supply and equipment items, including shipping charges for contribution-in-kind from member nations to place of receipt.

090507. Travel of International Staff

A. Civilian Personnel. Transportation and per diem costs of temporary duty travel on official business.

B. U.S. Military Personnel. When traveling on official business under travel orders issued by an authorized international headquarters that directs payment to be charged to international funds, the costs of such travel are payable as follows:

1. From international funds. Cost of transportation furnished by Military Airlift Command and/or a common carrier, to include taxi fares and privately owned conveyances under previously approved conditions.

2. From U.S. appropriated funds. Per diem and other expenses authorized by U.S. travel regulations.

090508. Exercises and Maneuvers. When directly related to an allied command training exercise, the cost of commercial communication services and facilities provided solely to fill a requirement of the exercise on behalf of the participating nations; civilian labor hired in connection with the exercise by the interallied headquarters and not specifically for any one nation; temporary installations for interallied field headquarters not available from organic equipment of participating troops or the headquarters and not properly chargeable to the host nation; rental of additional commercial transportation required at interallied headquarters for the exercise; utilities costs for interallied headquarters if at a place other than an existing military post; and reproduction of photographs and film strips, required by the directing staff for subsequent international training or critique purposes, when source of production is other than a military unit.

090509. Representational and Hospitality Expenses of the Supreme Commanders for international purposes.

090510. Contingencies. Claims for losses by fire, theft, and other damages; and costs to employ legal representation in civil court actions.

090511. Construction. Design and new construction of buildings and facilities, including housing, structures, utilities, modification, and alteration of existing buildings and facilities, including fixed equipment, sewage, gas, water, and electrical supply systems, roads, and approaches.

090512. Furniture and Equipment. Office furniture and equipment procured within internationally approved standards for the direct support of international headquarters and agency activities; equipment for maintenance of kitchens, shops, heating electrical plants; and furniture used in barracks, messes, recreation rooms, and dining rooms and clubs.

CHAPTER 10**UNIT EXCHANGE OF TRAINING AND RELATED SUPPORT BETWEEN
THE UNITED STATES AND FOREIGN COUNTRIES****1001 OVERVIEW**

100101. **Purpose.** This chapter provides the financial policy that implements Title 22, United States Code, section 2770a, which authorizes the reciprocal unit exchange of training and related support between the United States and friendly foreign countries or international organizations.

100102. **General**

A. Title 22, United States Code, section 2770a authorizes the President to enter into agreements for reciprocal unit exchange of training and related support between the United States and friendly foreign countries or international organizations. Chapter 10, paragraph 100308, of DoD 5105.38-M, "Security Assistance Management Manual," provides general implementing program guidance for the conduct of exchanges. Unit exchanges shall be arranged only as part of an international agreement, as defined in DoD Directive 5530.3, "International Agreements." Before entering into negotiations for an international agreement or conducting a specific exchange thereunder, the initiating authority shall seek the approval of the cognizant Unified Commander in whose area of responsibility the foreign nation or international organization is located or in which the training is to be conducted. Generally, the Secretary of a Military Department, or designee, is the approving authority for implementing arrangements, entered into under authority of the agreement, which provide for the exchange of specific units. However, implementing arrangements of significant political-military importance or operationally sensitive exchanges require approval by the Under Secretary of Defense (Policy) (USD(P)).

B. The provisions of Title 22, United States Code, section 2770a apply only to established military units, not to ad hoc units or individual members of units. Therefore, to qualify as a unit exchange, the organization receiving the training must include substantially all individuals assigned to an established unit. A unit exchange of training and related support may include transportation, food services, health services, logistics, and the use of facilities and equipment provided to military and civilian defense personnel. Training performed pursuant to unit exchange agreements shall be on an exchange basis. If an exchange of training does not commence within 12 months, the training shall be converted to a reimbursable transaction.

1002 POLICY AND PROCEDURES

100201. **Pricing Reciprocal Exchanges or Related Support.** A DoD Component participating in a reciprocal unit exchange or related support arrangement shall use the following pricing guidelines:

A. U.S. officials delegated authority under DoD Directive 5530.3 to negotiate agreements under Title 22, United States Code, section 2770a shall perform a price analysis based on prior experience and/or current supporting data. The price determined for the unit exchange of training or related support shall be fair and reasonable, taking into consideration all applicable circumstances. If the determination under paragraph 100202.A, below, cannot be made, the training may not be performed and the related support may not be exchanged.

B. Reciprocal unit exchanges of any training or related support by the United States shall be subject to the pricing provisions of chapter 7, Volume 15, of this Regulation. The estimated actual cost of each reciprocal unit exchange shall be computed and recorded by the Military Department designated resource management function. The estimated actual cost recorded shall be used as the basis for reporting costs incurred and for reimbursement purposes in the event exchanges are not reciprocated. An obligation shall be established when a determination is made that the exchange will not take place or within 12 months from the date the training began, whichever occurs first.

100202. Liquidation of Credits and Liabilities. Compensation for the acquisition or transfer of a unit exchange of training and related support under the authority of this chapter shall be accomplished through either of the following methods:

A. Reciprocal Exchange. Training or related support that is to be exchanged requires a written determination by the approving U.S. organization that the reciprocal unit exchange of training or related support has a substantially comparable value. Comparable value received is the sum of those monetary (i.e., estimated actual cost that the U.S. would have had to pay for training received) and nonmonetary (i.e., benefits or cost avoidance) values that comprise the total exchange value. Methodologies depicting comparable value, both monetary and nonmonetary, shall be retained and available for audit.

B. Reimbursable. Payments for training and related support are to be in the currency of the supplying nation and shall be provided in the event reciprocity is not achieved within 12 months from the date the training began.

100203. Conversion to Reimbursable Training. The servicing accounting and finance office shall take the following actions when reciprocal training or related support is not provided or not received:

A. Actions to be Taken When the United States Does Not Provide Reciprocal Training or Related Support. When the United States does not provide reciprocal training and related support within 12 months after such training or support begins, the exchange transaction shall be converted to a reimbursable transaction and an obligation recorded. The obligation shall be recorded against the appropriation current at the time the determination is made that reciprocal training will not be provided. The resulting accounts payable is to be paid 30 days from the date established. The accompanying documentation shall fully explain the reasons for not providing reciprocal training or related support during the preceding 12 months.

B. Actions to be Taken When the United States Does Not Receive Reciprocal Training or Related Support. When the United States does not receive reciprocal training or related support within 12 months after such training or support begins for a foreign country, the exchange transaction shall be converted to an accounts receivable. The accounts receivable shall be established against miscellaneous receipt account 3210, "General Fund Proprietary Receipts, Defense Military, Not Otherwise Classified." Billings shall be made by the DoD Component through the consulate and/or embassy of the foreign country or as otherwise provided for in the agreement. Payment will normally be required within 30 days of the invoice date.

1003 REPORTING RESPONSIBILITIES

100301. Secretaries of the Military Departments. The Secretaries of the Military Departments, or designees, shall submit to the Director, Defense Finance and Accounting Service, not later than December 1 of each year, a report for each reciprocal exchange or reimbursement (Figures 10-1 and 10-2) that was in effect during the prior fiscal year.

100302. Director, Defense Finance and Accounting Service. The Director, Defense Finance and Accounting Service shall:

- A. Consolidate the input from the Military Departments.
- B. Prepare an annual report for signature by the Under Secretary of Defense (Comptroller).
- C. Coordinate this report with the Office of the Under Secretary of Defense (Comptroller), Office of the Under Secretary of Defense (Personnel and Readiness), Office of the Deputy Under Secretary of Defense (Logistics), and Office of the Assistant to the Secretary of Defense (Legislative Affairs).
- D. Transmit the report for receipt by the Congress not later than February 1 of each year.

CHAPTER 11**SPECIAL OR TECHNICAL SERVICES TO STATE AND LOCAL GOVERNMENTS****1101 OVERVIEW**

110101. Purpose. This chapter supplements the standards for financial accounting for receivables (Chapter 3, Volume 4, “Accounting Policy and Procedures,” of this Regulation) and for budgetary accounting for reimbursements (Chapter 15, Volume 3 “Budget Execution - Availability and Use of Budgetary Resources” of this Regulation). It provides guidance on the amounts that shall be recouped when the DoD Components perform special or technical services for state or local governments. This chapter does not provide legal authority to sell to state or local governments. Specific legal authority must be identified to make such sales.

110102. General. It is the policy of the Department to cooperate to the maximum extent possible with state and local governments to provide specialized or technical services. Such services generally shall supplement and not supplant any services provided under other authority.

A. Pricing. Specialized or technical services to state and local governments provided under authority of Title III of the Intergovernmental Cooperation Act of 1968 shall be priced as a sale to private parties at the full costs to the Department.

B. Disposition of Proceeds. Payments received by DoD Components for the costs of such service shall be deposited to the credit of the appropriation or account from which the costs of providing the services have been paid or are to be charged. Unfunded portions of the costs of such services shall be deposited to the U.S. Treasury as miscellaneous receipts.

1102 POLICY AND PROCEDURES**110201. Types of Services**

A. The following specialized or technical services and related facilities that may be provided under Title 31, United States Code, Chapter 65, “Intergovernmental Cooperation.”

1. Any existing statistical or other studies and compilations, results of technical tests and evaluations, technical information, surveys, reports, documents, and any such materials which may be developed or prepared in the future to meet the needs of the federal government or to carry out a DoD Component’s normal responsibilities.

2. Preparation of statistical or other studies and compilations, technical tests and evaluations, technical information, surveys, reports, documents, and assistance

in the conduct of such activities, and in the preparation of such materials, provided they are similar to those that the DoD Component is authorized by law to conduct or prepare.

3. Training of the type that the DoD Components are authorized by law to conduct for DoD personnel.

4. Technical aid in the preparation of proposals for developmental and other projects for which the DoD Components provide grants-in-aid or other assistance, provided such aid primarily develops recipients' capability to prepare their own proposals.

5. Technical information, data processing, communications and personnel management systems services, and technical advice on improving logistical and management services that the DoD Components normally provide the DoD for themselves or others under existing authorities.

B. Any of the above listed specialized or technical services provided by a DoD Component to states and their political subdivisions under other authorities also may be provided under the authority of OMB Circular A-97, "Rules and Regulations Permitting Federal Agencies to Provide Specialized or Technical Services under Title III of the Intergovernmental Cooperation Act of 1968."

C. If a DoD Component receives a request for specialized or technical services that is not covered above, but that is consistent with OMB Circular A-97 and which the Component has a special competence to provide, the Component shall forward the request to the Deputy Under Secretary of Defense (Logistics) (DUSD(L)) for submission to the OMB for review. If there is doubt whether the service requested is covered, the Component should forward the request to the DUSD(L) for review.

110202. Conditions Under Which Services May Be Provided. Specialized or technical services covered under OMB Circular A-97 may be provided at the discretion of the DoD Component head only under the following conditions:

A. Such services shall be provided only to states, their political subdivisions, and combinations or associations of such governments, their agencies, and instrumentalities.

B. Such services shall be provided only upon the written request of a state or its political subdivision. Requests normally shall be made by the chief executive of such entities and shall be addressed to the head of the DoD Component involved.

C. Such services may not be provided unless the servicing DoD Component maintains similar services for its own use under the policies and procedures set forth in OMB Circular A-76, "Performance of Commercial Activities," and subsequent changes thereto. In addition, in accordance with the policies set forth in OMB Circular A-97, the requesting entity shall certify that such services cannot be procured reasonably and quickly through ordinary business channels.

D. Such services may not be offered if they require any staff additions or involve expenditures for additional equipment or other facilities solely for the purpose of providing such services, except when the costs of such services are charged to the user.

E. Such services shall be provided only upon payment or arrangement for reimbursement to the DoD Component involved by the unit of government making the request. This includes salaries and all other identifiable direct and indirect costs of performing such services.

F. Technical information provided in accordance with this chapter may not be disseminated further to third party governmental entities or associations, unless expressly authorized by the originating DoD Component.

G. If a request for a service is denied, the DoD Component shall furnish a statement to the entity making the request indicating the reasons for the denial.

(This page intentionally left blank.)

CHAPTER 12**MAJOR RANGE AND TEST FACILITIES****1201 OVERVIEW**

120101. Purpose. This chapter provides reimbursable policy for specific Department of Defense test and evaluation (T&E) activities (Figure 12-1), hereafter referred to as a Major Range and Test Facility Base (MRTFB). (This chapter does not apply to the commercial space launch activities of the 30th and 45th Space Wings; reimbursable policy for these activities is contained in Chapter 13 of this volume. Nor does this chapter apply to the sale of samples, drawings, information, equipment, and certain services as authorized by 10 U.S.C. 2539b (see Chapter 14 of this volume).

120102. General. The MRTFB is a national asset which is sized, operated, and maintained primarily for DoD test and evaluation support missions, but also is available to non-DoD users having a valid requirement for its capabilities.

1202 POLICY AND PROCEDURES

120201. Funding. Funding of the MRTFB is designed to: (a) assure the most cost effective development and testing of materiel; and (b) provide for interservice compatibility, efficiency, and equity without influencing technical testing decisions or inhibiting legitimate and valid testing. The MRTFB activities, as listed in DoD Directive 3200.11 (examples of these activities are listed in Figure 12-1), shall be funded in a uniform manner. The categories of goods and services charged to the MRTFB customers consistently shall be applied among all the MRTFBs. All costs incurred by MRTFB activities shall be billed to either one of the following sources: (1) MRTFB customers (users) or (2) direct appropriations of the managing activity. All costs not funded by customers on a reimbursable basis shall be funded as part of the direct appropriations of the Component responsible for the MRTFB. Direct appropriations sometimes are referred to as institutional funds.

120202. Accounting. The job order cost accounting system described in Chapter 20, "Job Order Costing," volume 4, of this Regulation is a minimum requirement to support financial management and funding policies at MRTFBs. The cost accounting system shall be used to determine charges under agreements entered into pursuant to DoD Directive 4000.19, "Inter-service, Interdepartmental, and Inter-agency Support." Reimbursement for the use of an MRTFB consistently will be determined within the Department of Defense.

120203. Reimbursements for Range Use

A. Working Capital Fund Activities

Working Capital Fund activities shall charge customers at standard rates, in accordance with established pricing policies contained in Volume 11B of this Regulation.

B. Non-Working Capital Fund Activities

1. DoD Component Users

a. DoD Component users shall reimburse MRTFB activities for direct costs readily identifiable with a particular customer order. The reimbursement charge shall include a proportional share (through appropriate rates) of equipment maintenance costs related to the use, and any other costs that are a direct result of T&E activities. Chargeable direct costs include labor, material, facilities, minor construction, utilities, equipment, supplies, items damaged or consumed during testing, and any resource or item maintained for a particular user. Direct costs billed shall be in accordance with Chapter 1, "General Reimbursement Procedures and Supporting Documentation," of this volume, and shall be identified to a job or function served in support of a customer order. Indirect costs shall be paid by the activity's direct appropriations.

b. Chargeable costs incurred by activities not funded by DoD Working Capital Funds for other DoD Components do not include military personnel costs.

2. Non DoD Component Users. This includes Federal, State or Local Government agencies, allied foreign governments, defense contractors, and when authorized, private organizations and U.S. commercial enterprise customers.

a. MRTFB commanders shall charge all direct costs associated with a customer order.

(1) Chargeable direct costs include labor, material, facilities, minor construction specifically performed for the customer, utilities, equipment, supplies, and other resources damaged or consumed during testing or maintained for a particular user.

(2) Chargeable direct costs incurred by non-Working Capital Fund activities for other than DoD Components shall include all military personnel costs associated with a customer order. (Military personnel costs shall be priced at the composite standard military pay rate--see Chapter 14 of this volume.)

b. MRTFB commanders shall charge an appropriate amount of indirect costs. Any indirect costs incurred, but not billed to a customer, shall be billed to the activity's institutional funds. Institutional funding levels, however, shall not be increased to finance any additional indirect cost incurred due to sales to non-DoD activities.

★ 3. Limitation. Consistent with the authority provided in 10 U.S.C. 2681, the policies in subparagraph 120203.B.2., above, are effective through September 30, 2002, unless 10 U.S.C. 2681 subsequently is amended to extend the authority. In the absence of such an extension, customers covered by subparagraph 120203.B.2. shall be charged in accordance with Chapter 1, "General Reimbursement Procedures and Supporting Documentation," of this volume.

4. Foreign Military Sales. Foreign Military Sales customers shall reimburse MRTFB activities in accordance with chapter 7, "Security Assistance Policy and Procedures," Volume 15, of this Regulation. This chapter does not, and shall not, be construed to permit foreign customer countries or foreign commercial entities to purchase services from MRTFB activities through other than Foreign Military Sales procedures authorized under the Arms Export Control Act.

5. Government-Furnished Services. When the use of an MRTFB activity has been included in a contractual agreement as government-furnished services, the user shall be charged based on the category of the contracting government agency (see subparagraph 120203.B.1. or 120203.B.2.).

C. Aborts and Cancellations. Users shall be billed for all costs associated with abortions and cancellations in accordance with the pricing policy contained in subparagraphs 120203.A. and 120203.B.

MAJOR RANGE AND TEST FACILITY BASEArmy Activities

White Sands Missile Range (WSMR) including Electronic
Proving Ground (EPG) at Ft. Huachuca, AZ
High Energy Laser Systems Test Facility (HELSTF)
U.S. Army Kwajalein Atoll (USAKA)
Yuma Proving Ground (YPG)
Dugway Proving Ground (DPG)
Aberdeen Test Center (ATC)

Navy Activities

Naval Air Warfare Center - Weapons Division, Point Mugu
Naval Air Warfare Center - Weapons Division, China Lake
Naval Air Warfare Center - Aircraft Division, Patuxent River
Naval Air Warfare Center - Aircraft Division, Trenton, NJ
(Scheduled for closure)

CHAPTER 13**DOD SUPPORT TO UNITED STATES COMMERCIAL SPACE ACTIVITIES**

1301 **PURPOSE.** This chapter provides reimbursable policy and procedures for the sale of DoD support to U.S. commercial space activities.

1302 **BACKGROUND.** Title 49, United States Code, sections 70101-70119, “Commercial Space Launch Activities;” Title 15, United States Code, section 5807, “Use of Government Facilities;” and DoD Directive 3230.3, “DoD Support for Commercial Space Launch Activities,” encourage cooperation with the U.S. private sector in the development of commercial space launch operations and other related commercial space activities.

1303 **APPLICABILITY.** This chapter applies to DoD organizations that provide support to U.S. commercial space activities, including support provided by Major Range and Test Facility Base (MRTFB) activities.

1304 **PRICING**

130401. **General Pricing.** Title 15 of the United States Code, section 5807, authorizes DoD to allow commercial activities to use its space related facilities provided that DoD is reimbursed for its direct costs accrued in supporting the commercial space activities. The term commercial means having private capital at risk, and primary financial management responsibility for the activity residing with the private sector. Direct costs, for the purposes of this chapter, is defined as the actual costs that are associated with a commercial launch effort or other commercial space activity that would not be borne by the DoD in the absence of the commercial launch effort or other commercial activity. Such costs may include labor, material, utilities, equipment, supplies, transportation, mission-specific construction, and any other resources required, consumed, or damaged in providing government support or services.

130402. **Pricing of Space Launch Property and Services to U.S. Private Sector Launch Vehicle Operators and Other Commercial Space Activities**

A. **Space Launch Property** Space launch property consists of item built for, or used in, the launch preparation or launch of a launch vehicle.

1. **By Sale.** Space launch property that is excess or otherwise not needed for public use, may be sold or transferred by other transaction instead of sale to U.S. private sector launch vehicle operators and other commercial space activities (e.g., payload retrieval services, payload processing services). The transaction shall be valued at the fair market value as defined in Chapter 3 of this volume.

2. **By Lease/License.** Space launch property that is excess or otherwise not needed for public use may be leased/licensed to U.S. private sector launch vehicle

operators and other commercial space activities. The transaction shall be priced to recover direct costs, as defined in paragraph 130401. In addition to the costs identified in paragraph 130401, direct costs include specific wear and tear and property damage incurred by the Department as related to the launch property acquisition. Property damage costs represent the costs necessary to replace or restore the property, or site, to its condition before the lease/license.

B. Space Launch Services. Space launch services are those activities involved in the preparation of a launch vehicle and its payload for launch and the conduct of a launch. For space launch services, including utilities, otherwise not needed for public use, the acquisition price represents an amount equal to the direct costs, including the basic pay of Government civilian and contractor personnel incurred as a result of the acquisition.

130403. Articles and Services Provided from the Department of Defense Working Capital Funds. Standard prices/stabilized rates shall be charged for articles and services provided by activities and businesses operated with DoD Working Capital Funds.

130404. Upgrades or Modifications to DoD Owned Property. Upgrades or modifications to DoD owned property, facilities or equipment for commercial space activities shall be reimbursed in accordance with the provisions contained in Chapter 1 of this volume. Such upgrades or modifications must have documented approval from the parent DoD organization in accordance with DoD Directive 3230.3, "DoD Support for Commercial Space Launch Activities."

130405. Government-owned Production Facilities. Government-owned production facilities or related equipment used to support the production of a private sector commercial launch vehicle or a commercial launch process shall be provided on a direct cost basis, with terms and conditions established by a standard contract for DoD support to United States commercial space activities.

130406. Test and Evaluation. Commercial operators performing test and evaluation activities related to commercial space launch efforts using DoD facilities shall be charged on a direct cost basis.

130407. Fixed Price Estimates. Commercial space launch contractors may be offered fixed price quotes for the sale of launch services based on reasonable estimates of direct costs only when there is (a) a well defined contractor requirement and (b) a reliable cost history of similar previous sales.

1305 BILLING

130501. Invoices for support provided shall be completed and transmitted to the commercial space activity within 30 days after the rendering of such support.

130502. The payment due date shall be no more than 30 calendar days from the date of the invoice.

1306 DISPOSITION OF COLLECTIONS

130601. Proceeds from the sale of articles and services from activities operated with DoD Working Capital Funds shall be deposited to the Department of Defense Working Capital Funds.

130602. Proceeds from the sale of launch property by other than a DoD Working Capital Funds activity shall be:

A. Deposited to the Miscellaneous Receipts Account of the U.S. Treasury when the launch property is not to be replaced.

B. Deposited to the DoD appropriation account or fund, currently available for the procurement of the launch property, if the launch property is to be replaced.

130603. Proceeds from the license of launch property shall be deposited to the DoD appropriation account or fund currently available for financing the direct costs incurred. Proceeds from leases shall be deposited to the Miscellaneous Receipts Account of the U.S. Treasury.

130604. Proceeds from the sale of launch services shall be deposited to the DoD appropriation account or fund that financed the provisioning of those launch services. These proceeds must be credited to the fiscal year in which the DoD Component provided the services.

(This page intentionally left blank.)

★CHAPTER 14★

**SALE OF SAMPLES, DRAWINGS, INFORMATION, EQUIPMENT,
AND CERTAIN SERVICES BY A GOVERNMENT LABORATORY,
CENTER, RANGE, OR TESTING FACILITY**

1401 OVERVIEW140101. Purpose.

This chapter provides the reimbursable policy for sales of samples, drawings, information, equipment, and certain services to non-DoD persons or entities, as authorized by 10 U.S.C. 2539b. This chapter does not apply to facilities and ranges of the Major Range and Test Facility Base (MRTFB). Guidance pertaining to the use of the MRTFB is contained in chapter 12 of this Volume. This chapter also does not apply to any DoD Working Capital Fund activities. Guidance pertaining to DoD Working Capital Fund activities is contained in Volume 11B of this Regulation.

140102. General.

It is the policy of the Department of Defense to promote research and development within the commercial sector of the U.S. economy, and the transfer of technology from the military to the commercial sector. These policies strengthen national security by promoting the development of a national industrial and technological base from which to sustain military technological superiority, while enhancing production capabilities for the nation overall. Furthermore, these policies provide the guidance for the commercial use of defense laboratories and test facilities, equipment, materials, drawings, and manufacturing or other information.

1402 POLICY AND PROCEDURES140201. General.

A. Under section 2539b of Title 10, United States Code, the Secretary of Defense, the Secretaries of the Military Departments, Directors of Defense Agencies, or their designees, when determined by appropriate authority to be in the interest of national defense, are authorized to:

1. Sell, rent, lend, or give samples, drawings, and manufacturing or other information (subject to rights of third parties) to any person or entity;

2. Sell, rent or lend government equipment or material to any person or entity for use in independent research and development programs, subject to the condition that such equipment or material be used exclusively for such research and development, or for use in demonstrations to a friendly foreign government; and

3. Make available to any person or entity, at a prescribed fee, the services of any Department laboratory, center or other testing facility for the testing of materials, equipment, models, computer software, and other items.

B. Classified information shall not be sold, loaned or given pursuant to this authority unless such a release of information is in accordance with DoD 5200.1-R. Unclassified, but Sensitive, material shall be handled in accordance with DoD Directive 5230.25.

140202. Government Equipment or Materials.

A. In determining whether to sell, rent or loan government equipment or materials, consideration shall include, but not be limited to:

1. The current or probable future need of the government item;
2. The residual value of the item;
3. Expense incident to handling and storage of the item;
4. The probable cost of reproduction of the item in the event of future procurement; and
5. Whether the sale, rent or loan furthers the transfer of technology to the commercial sector.

140203. Government Facility Resources.

A. Ordinarily, the testing of materiel and other items not owned by the government shall not cause government personnel or other government resources to be diverted from scheduled tests of government materiel or otherwise interfere with government mission requirements.

B. The laboratory director or activity commander with immediate authority over the government testing facility shall determine the priority of use of such facility for testing of materiel and other items not owned by the government. In so determining, the director or commander shall consider the degree to which the proposed test furthers the policies set forth in subparagraph 140201.A., above. The director or commander may revise established test

schedules in order to accommodate tests of materiel and other items not owned by the government.

C. The results of tests performed in government test facilities under subparagraph 140201.A.3. may contain proprietary or other confidential information that may be exempt from mandatory disclosure under the Freedom of Information Act. In such cases, the government may not otherwise disclose such information without the consent of the persons for whom the tests are performed.

1403 FEES AND CHARGES

140301. General.

A. Fees and charges for sales, rents or loans authorized by subparagraphs 140201.A.1. and A.2. shall include all direct and indirect costs to recover the total cost to the government.

B. Internal management controls (see DoD Directive 5010.38) must be established to ensure that charges and fees are developed and adjusted, using current, accurate, and complete data, to provide reimbursement conforming to these requirements. Such controls also must ensure compliance with cash management and debt collection policies (see DoD Directive 7045.13).

C. Payment for items and fees incident to a sale, rent or loan under subparagraphs 140201.A.1. and A.2. or for a service provided under 140201.A.3. shall be made only by cashier's check, certified check, bank money order, or postal money order payable to the U.S. Treasury.

140302. Services of Government Facilities.

A. When government services are made available under subparagraph 140201.A.3., a fee or charge generally shall be imposed to recoup the total cost incurred by the government in providing the service. When approved by the laboratory/facility director/commander, prior to providing the service, all or a portion of the indirect costs may be eliminated from the fees or charges. Direct costs, at a minimum, must be charged. Sales of services at less than the total cost are permitted only when:

1. There is a compelling reason to provide the service at less than the total cost;
2. The service is in the interest of the national defense;

3. There will be no competition with the private sector; and

4. The service does not involve expansion of the capabilities and capacities of the laboratory/facility providing the service, even if the customer agrees to finance the expansion.

B. Special consideration as to recovery of less than full cost may be given when:

1. The recipient of the benefit is engaged in a nonprofit activity designed for public safety, health or welfare;

2. Payment of the full fee or charge by a state, local government or nonprofit activity would not be in the government's best interest; or

3. Laboratory/facility directors/commanders have determined that the incremental cost of collecting the fees would be an unduly large part of the receipts from the activity.

C. When less than full cost is charged, laboratory/facility directors/commanders shall maintain adequate documentation that justifies and supports each decision. Such documentation should address the above criteria and be available for review by higher authorities or any audits or inspections.

D. Under no circumstances may fees exceed the amount necessary to recoup the total costs incurred.

E. Specific guidance pertaining to the calculation of charges and fees is provided in Chapter 4 of this volume, "User Charges."

140303. Collection of Fees or Charges.

A. All fees or charges from private parties or agencies outside the U.S. Government must be collected in advance of the service being provided.

B. Specific guidance pertaining to the collection of fees is provided in Chapter 4 of this volume, "User Charges."

140304. Disposition of Fees or Charges Received.

A. Fees or charges received from sales or loans under subparagraph 140201.A.1. and A.2. shall be deposited into the miscellaneous receipts account of the U.S. Treasury.

B. Fees or charges received for services performed under subparagraph 140201.A.3. shall be credited to the appropriation, fund or account that finances the activity making such services available.

140305. Warranties and Liability.

All transfers of goods or services of whatever nature made pursuant to this Regulation shall be without any express or implied warranty. The government shall accept no liability for any damages whether direct or consequential. Furthermore, the recipient of the goods or services shall agree to indemnify and hold harmless the U.S. Government for any loss, claim, damage, or liability of any kind arising out of or in connection with goods or services so provided.

140306. Liability for Loss and Damage of U.S. Government Property on Loan to a Private Party.

The agreement with the individual, company, corporation, organization, etc., shall include a clause stating that the U.S. Government will be reimbursed for any losses or damages arising out of or in conjunction with the use of government property.

1404 DEFINITIONS

1. Drawing. A diagram, plan or list that shows in detail the fabrication or assembly of structural elements, or the installation of materials and equipment. A drawing details the characteristics, or outlines the parts or operation of a product or item.

2. Equipment or Materials. Property, including machinery, devices, apparatus, and components of such items.

3. Friendly Foreign Government. Those countries for which a Presidential Determination has been provided under Section 3(a)(1) of the Arms Export Control Act, and to which transfer has not been prohibited by the Department of State under the International Traffic in Arms Regulations (22 CFR 120).

4. Independent Research and Development (IR&D) Programs. A research and development effort that is not sponsored by, or required in performance of a government contract, or grant for: (1) basic research, (2) applied research, (3) development, and (4) systems and other concept formulation studies. IR&D programs do not include technical efforts expended in developing and preparing technical data specifically to support submitting a bid or proposal.

5. Manufacturing or Other Information. Any blueprints, drawings, plans, instructions, documentation, or other technical information that can be used or adopted for use to design, engineer, produce, manufacture, operate, repair, overhaul, or reproduce any equipment or material.

6. Person or Entity. An individual or firm, labor organization, partnership, association, corporation, a university or not-for-profit center, or a governmental unit of the United States or its territories.

7. Sample. A unit or units of a product drawn from a lot or batch that is representative of the product and is constructed in conformance with the requirements and complies with specifications of the product.

8. Laboratory. A facility or group of facilities owned, leased or otherwise used by a Federal Agency, a substantial purpose of which is the performance of research, development, engineering, test, and evaluation, or otherwise developing or maintaining technology.

CHAPTER 15

**TRAINING OF SPECIAL OPERATIONS FORCES
WITH FRIENDLY FOREIGN FORCES**1501 OVERVIEW

150101. **Purpose.** This chapter provides accounting and reporting procedures to implement provisions of Title 10, United States Code, section 2011 that are related to training of special operations forces with friendly foreign forces.

150102. **Authority for Payment of Training Expenses.** Title 10, United States Code, section 2011, enacted on December 5, 1991, by section 1052 of P.L. 102-190 (the National Defense Authorization Act for Fiscal Years 1992 and 1993) authorized the Commander, Special Operations Command and the commander of any other unified or specified combatant command to pay, or authorize payment for, any of the following expenses:

A. Expenses of overseas training of U.S. special operations forces, to include civil affairs forces and psychological operations forces, assigned to the combatant commander in conjunction with training, and training with, armed forces and other security forces of a friendly foreign country.

B. Expenses of deploying such special operations forces, to include civil affairs forces and psychological operations forces, for that training.

C. Incremental expenses incurred, in the case of training in conjunction with a friendly developing country, by that country as the direct result of such training. The term, "incremental expenses," with respect to a developing country, means the reasonable and proper costs of rations, fuel, training ordnance, transportation (except to and from the continental United States), and other goods and services consumed by such country, except that the term does not include pay, allowances, and other normal costs of such country's personnel.

150103. **Purpose of Training.** For the authority cited in subsection 150102 to apply, the primary purpose of the overseas training activities must be the training of special operations forces of the combatant commands. Training of foreign forces may not be the primary purpose.

1502 POLICY AND PROCEDURES

150201. **Accounting Procedures.** Departmental funds expended to facilitate the participation of friendly foreign forces training with U.S. special operations forces shall be incurred and reported under the following guidelines.

A. Funding for training of U.S. personnel may include amounts for training expenses authorized in Title 10, United States Code, section 2011. The funding source for these

proposed payments shall be funds made available to the applicable DoD Component for these purposes.

B. Prior to commencement of the training, agreement on implementing arrangements should be reached in terms of the types and scope of non-financial support and financial contributions to be provided by the United States to a foreign country and/or by a foreign country to the United States. In order to protect the interests of the United States, the essential terms of the arrangement normally shall be documented in writing and a copy of the document provided to the foreign country. In addition, the arrangement should request that each participating country identify both physical and financial contributions to the training effort and the amount of expenses paid related thereto. Formal international agreements, under the provisions of DoD Directive 5530.3, are not required with respect to these implementing arrangements.

C. In the event that the participating country is unable to identify its expenses in time to meet reporting requirements prescribed below, knowledgeable U.S. personnel will estimate that participant's contributions, and the value of expenses paid in U.S. dollar equivalents at the exchange rate in effect at the time of the training. Estimates of a participating country's contributions may be calculated using relative factors of comparable costs for similar U.S. training activities.

D. Arrangements with a friendly developing country may provide for financial or in-kind payment to the developing country by the United States for incremental expenses incurred by that country as a direct result of such training. "Incremental expenses" are defined in paragraph 150102.C above.

E. Arrangements with a friendly country also may provide for payment to that country by the United States for the costs of support provided to U.S. personnel by the host country. Expenses that may be paid under the terms of an arrangement with a friendly country for support provided to U.S. personnel by that country are limited to those types of expenses included in the definition of incremental expenses described in paragraph 150102.C, above.

F. For expenses that are to be paid to a friendly country, either incremental costs incurred by a developing country or support provided by a host country to U.S. personnel, the arrangement shall stipulate that the host country provides, in advance of payment, appropriate documentation to support the payment. This documentation shall include dates, quantities, units and costs so that the senior U.S. official can determine the reasonableness and propriety of such costs, in U.S. dollar equivalents at current exchange rates, for the various types of authorized expenses incurred.

G. The following procedures shall be followed to substantiate payments for reasonable incremental expenses incurred by a developing country.

1. The senior foreign official participating in the training shall certify that the documentation provided to support the claim for payment reflects reasonable and proper expenses incurred during the training.

2. The senior U.S. official participating in the training shall include a statement that, in his or her judgment, the documentation reflects reasonable and proper expenses.

3. If the senior U.S. official participating in the training questions the propriety or reasonableness of any expense claimed by the foreign country, resolution of those questions shall occur before the payment is made.

H. The following procedures shall be followed to substantiate payments for reasonable expenses to support U.S. personnel.

1. The U.S. official accepting the goods and/or services on behalf of the U.S. Government shall certify receipt and acceptance for the U.S. Government. The acceptance shall include documentation of the dates, quantities, units, and costs of the various types of support received.

2. The host country shall submit a claim for payment that includes documentation of the dates, quantities, units, and costs, in U.S. dollar equivalents at current exchange rates, of the various types of support provided.

I. The annual report (described in subsection 150202, below) requires a determination of both financial and non-financial contributions to the training effort and the amount of related expenses paid by the participants in such training. Financial and non-financial contributions include all costs that are incurred because of the training. The accounting records from which the contributions are reported shall include the separate identification of all the costs incurred, such as:

1. Rations, fuel, and training ordnance.
2. Personnel (including lodging, and/or per diem costs) for other than normal pay and allowances.
3. Costs associated with training areas, firing ranges, storage sites, and other similar items and facilities used during the training. These costs must be attributable directly to such training.
4. All transportation of personnel, equipment and supplies to and from the training area.

J. The operations and maintenance funds expensed under Title 10, United States Code, section 2011, are not to be used to supplement other accounts, to circumvent budget

ceilings established for other accounts, or to assume the mission of programs funded from other accounts.

K. Title 10, United States Code, section 2011, authorizes the Department to program and expend operation and maintenance funds to train U.S. special operations forces, to include civil affairs forces and psychological operations forces, with friendly foreign nations. It does not provide authority to conduct any type of training activity that the Department otherwise cannot legally conduct. Any training activity funded under this statutory authority must be conducted in accordance with DoD directives, regulations and instructions, and all other applicable interagency procedures.

150202. Annual Report by U.S. Unified Combatant Commands. Funds expended under the authority of Title 10, United States Code, section 2011, shall be reported by the appropriate combatant commands on a fiscal year basis to the Assistant Secretary of Defense (Special Operations/Low Intensity Conflict) to arrive not later than January 1 of each year. Each fiscal year report submitted by the combatant commands shall be organized by theater and presented for each country in alphabetical order with each deployment for training (DFT) listed in chronological order. The reporting of classified training activities, if any, shall be properly classified and the classification prominently identified. Each report shall specify the following:

A. All countries in which training was conducted.

B. The type of training conducted in each country for each DFT, including whether such training was related to counter-narcotics or counter-terrorism activities; the date and duration of that training; the number of U.S. military personnel involved; and the total expenses paid by the United States. Total expenses paid by the United States shall be the total of (1) amounts paid for deploying and training U.S. special operations forces, including the costs listed in paragraph 150201.I., above; (2) amounts paid to a foreign country for support provided to U.S. personnel, as described in paragraph 0150201.H, above; and (3) financial payments to a developing foreign country for incremental expenses, as described in paragraph 150201.G., above.

C. The extent of participation by foreign military forces, including the number and service affiliation of foreign military personnel involved and the physical and financial contribution of each host nation to the training effort.

D. The relationship of that training to other overseas training programs conducted by U.S. Armed Forces, such as military exercise programs sponsored by the Joint Chiefs of Staff, military exercise programs sponsored by a U.S. unified combatant command, and military training activities sponsored by a Military Department (including deployments for training, short duration exercises and other similar unit training events).

150203. Annual Report by the Secretary of Defense

A. The Assistant Secretary of Defense (Special Operations/Low Intensity Conflict) shall receive reports from the combatant command, as described above, and compile those reports into a single document.

B. The Assistant Secretary of Defense (Special Operations/Low Intensity Conflict) shall, not later than April 1 of each year, submit on behalf of the Secretary of Defense the required annual report to the Armed Services and Foreign Relations Committees of the Senate and the National Security and Foreign Affairs Committees of the House of Representatives.

C. The annual report shall cover training during the preceding fiscal year for which expenses were paid under Title 10, United States Code, section 2011, chapter 101, "Special Operations Forces: Training with Friendly Foreign Forces."

(This page intentionally left blank.)

CHAPTER 16**ACCOUNTING FOR PRODUCTION AND SALE OF FOREST PRODUCTS****1601 OVERVIEW**

160101. Purpose. The purpose of this chapter is to establish the policy and procedures for accounting for the production and sale of forest products. It also assigns responsibility for DoD reimbursement and for the entitlement of a state to a share in the net proceeds derived from forest products sold from military installations or facilities.

160102. Applicability and Scope. The policies and procedures established by this chapter:

A. Apply to the Office of the Secretary of Defense (OSD) and to the Military Departments (including their National Guard and Reserve components). The term “Military Services,” as used herein, refers to the Army, Navy, Air Force, and Marine Corps.

B. Cover forest products production and sales programs on military installations or facilities in the United States.

C. Do not apply to forestry activities within the civil programs of the U.S. Army Corps of Engineers or to the state-owned National Guard installations.

1602 POLICY AND PROCEDURES

160201. DoD appropriations incurring obligations for the production and sale of forest products shall be reimbursed from collections made as a result of the sale of such products. Remaining collections shall be disposed of as follows:

A. Forty percent of installation net proceeds shall be distributed to the state that includes the military installation or facility from which forest products were sold during a fiscal year. If the installation or facility is located in more than one state, each state shall share proportionally in the net proceeds (see subsection 160208, below). Entitlement to the states applies to forest products sold after September 30, 1984.

B. Once the disbursement to each state has been made, any remaining amount shall be transferred to the reserve account (see subsection 160203, below). To the extent that collections from the sale of forest products are inadequate, obligations for the production and sale of such products may be financed either from the appropriation accounts or transfers from the reserve account.

160202. The Treasury General Fund Receipt Clearing Accounts (F3875) shall receive all sales proceeds. Transfers of these proceeds shall be made, in accordance with the

approved budgets, to the applicable Operations and Maintenance (O&M) and Other Procurement appropriations that incur obligations, which are reimbursable, for the production and sale of forest products.

160203. A DoD reserve account shall be established.

A. Balances in the account may be used for the following:

1. Improvements of forest lands.
2. Unanticipated contingencies in the administration of forest lands and the production of forest products for which other sources of funds are not available in a timely manner.
3. Natural resource management that implements approved plans and agreements.

B. The balance in the reserve account shall not exceed \$4 million on December 31 of any calendar year. Unobligated balances exceeding \$4 million on that date shall be deposited in the U.S. Treasury General Fund Miscellaneous Receipts Account (see subsection 160207, below).

160204. The operating procedures to be followed for program obligations is as follows:

A. Program obligations shall be related directly to the economic production and sale of forest products in the following functions:

1. Forest Improvement. Obligations incurred for improving an existing timber stand or forest, whether it is planted, seeded, or natural, and including thinning, pruning and controlling undesirable vegetative growth.
2. Reforestation. Obligations incurred for natural or artificial regeneration including planting; purchasing of seeds or seedlings; preparing sites; and controlling insects, diseases, vegetation, and animals.
3. Forest Protection. Obligations incurred for the protection of a forest capable of economic production of forest products including damage by fire, insects, diseases, animals, floods, and erosion.
4. Forest Access Roads. Obligations incurred for construction, reconstruction, repair, and maintenance of forest access roads and trails and for repair of other roads as a result of forest production and harvest operations.

5. Sales. Obligations incurred for sales and preparation for sales of forest products including appraising, cruising, marking, scaling, advertising, escorting prospective bidders, as well as preparing, administering, and enforcing compliance with sales contracts.

6. Management. Obligations incurred for the management of the functions listed in subparagraphs 160204.A.1 through 160204.A.5, above, including supervising, planning, programming, conducting field surveys and inventories, training, and attending professional meetings.

7. Forestry Equipment. Obligations incurred in the purchase of vehicles, minor equipment, and heavy equipment used exclusively in forest management (purchased by O&M or procurement appropriations under reimbursable program authority).

B. To the extent that an installation receives applicable program support from a function or activity above the installation level, costs shall be prorated on the basis of level of effort among all applicable military installations or facilities involved in the program.

C. Program obligations do not include amounts incurred for operations that, while related to the land and forest, are for other purposes such as the military mission, recreation, general area improvement, wildlife management, and beautification. They do not include amounts for the protection of forests that are incapable of economic production of timber products. Program obligations at all organizational levels shall be categorized according to the functions listed in subparagraphs 160204.A.1 through 160204.A.7, above.

D. Reimbursable program obligations under Title 10, United States Code, section 2665(d) include all program costs except those in paragraph 160204.C, above. Acquisition of equipment shall be justified on an economic basis. When general equipment is used in forestry program operations, obligations incurred by DoD appropriations for such use shall be included as program costs.

160205. Accounting and Reimbursements

A. Proceeds collected from forestry sales shall be turned over to the servicing DoD disbursing officer. These proceeds shall be deposited without delay to the Treasury General Fund Receipt Clearing Account **F3875, "Budget Clearing Account (Suspense)." (The applicable agency code shall be shown instead of asterisks.) That portion of the proceeds which is to be used to finance reimbursable expenses shall be transferred to O&M or procurement appropriations in accordance with the annual budget. Table 16-1 illustrates the applicable Treasury account symbols.

TREASURY ACCOUNT SYMBOLSO&MProcurement

(1) Army - 21(FY)2020	21(FY)2035
(2) Navy - 17(FY)1804	17(FY)1810
(3) Air Force - 57(FY)3400	57(FY)3080
(4) Marine Corps - 17(FY)1106	17(FY)1109

Table 16-1

160206. At the end of the fiscal year, an estimate shall be made of the amount of each state's entitlement and transferred from **F3875 to deposit account **X6875, "Suspense." After the states' entitlements are computed (see subsections 160201.A and 160208), the estimate shall be adjusted with applicable refunds to **F3875 or additional transfers to **X6875. Payments to the states shall be made from **X6875. After the states have been paid and appropriation accounts reimbursed, any remaining balance in **F3875 shall be transferred to 21*5285, "Department of Defense, Forest Products Program, Army."

160207. On December 31 of each year, the Deputy Under Secretary of Defense (Environmental Security) (DUSD(ES)) shall review the balance in 21X5285 and direct the transfer of any amount in excess of \$4 million to Treasury account **3210, "General Fund Proprietary Receipts, Defense Military, Not Otherwise Classified."

160208. Entitlements to each state shall be computed in accordance with Title 10, United States Code, section 2665(e). These entitlements shall be determined on the basis of a separate calculation for each military installation or facility from which forest products were sold in that fiscal year.

A. Records shall be maintained for each military installation or facility concerned to show sales proceeds and reimbursable program obligations by fiscal year. If a military installation or facility is located in more than one state, payments shall be made to each state involved in a manner proportional to the area of the installation or facility situated in each state. If an installation or facility is located in more than one county within a state, a description of the areas (acres) of the installation or facility situated in each county may accompany that state's entitlement.

B. States' entitlements shall be disbursed within 90 days after the end of the fiscal year. Payments to the states shall be made by electronic funds transfer.

160209. As directed by the DUSD(ES), in coordination with the Office of the Under Secretary of Defense (Comptroller) (OUSD(C)), net proceeds may be distributed among

the Military Services to ensure the overall funding requirements of the DoD forestry program are met.

160210. The recording of sales revenue, program obligations, entitlement payments to states, and all other accounting for this program shall be in accordance with the requirements of this chapter.

160211. Appendix 2 contains DUSD(ES) coordinating and reporting requirements. The Forest Products Sales Program report has been assigned Report Control Symbol DD-A&T (Q&A)1649; see paragraph 160302.A, below, and Appendix 2.

1603 RESPONSIBILITIES

160301. The Deputy Under Secretary of Defense (Environmental Security) shall:

A. Issue and monitor policy on forest management of DoD lands in accordance with DoD Directive 4700.4, “Natural Resources Management Program.”

B. Advise the Military Services of potential downward adjustments to funding for the program during the year if timely receipt of anticipated proceeds becomes doubtful.

160302. The Secretaries of the Military Departments shall:

A. Prepare annual forestry program budgets for the coming fiscal year that include anticipated sales revenue, program obligations, States’ entitlements, unfinanced requirements, and transfers. See Appendix 2 for due date and other reporting information.

B. Ensure that all proposed obligations are related directly to the economical production and sale of forest products, consistent with DoD Directive 4700.4, “Natural Resources Management Program.”

C. Ensure that no unplanned program obligations are incurred simply to “use up” proceeds.

D. Adjust the program downward during the year by reducing planned obligations if actual proceeds do not materialize at anticipated levels and sufficient funding cannot be obtained from the reserve account.

E. Ensure that all program obligations are accumulated in DoD appropriation accounts and that reimbursements and distributions to States and the use of funds from the DoD Reserve Account conform with subsection 160203, above.

F. Follow the procedures in subsection 160205, above.

G. Coordinate approved budgets with the DUSD(ES) to assist in planning and trade-off analysis and to ensure effective and efficient functioning of the overall DoD program.

H. Review the cumulative total obligations incurred, estimated program obligations, cumulative revenue, and realistic estimates of future revenue to determine whether DoD forests remain capable of economic production.

I. Identify to the DoD Executive Agent (see paragraph 160303.A, below) the official who is authorized to transfer surplus funds and accept reserve funds.

160303. The Secretary of the Army shall:

A. Act as DoD Executive Agent to monitor and coordinate financial management of the DoD forest products program.

B. Coordinate the transfers of surplus and reserve funds.

C. Maintain the DoD Reserve Account (21*5285) and make transfers in accordance with the instructions from the DUSD(ES). (Replace asterisk with fiscal year designator.)

APPENDIX 1

DEFINITIONS

1. Forest Products. Those items produced from a forest such as sawtimber, veneer logs, poles, piles, posts, pulpwood, pine straw, stumpwood, bark, and other mulch, cones, seeds, mistletoe, firewood, and wood chips.
2. Net Proceeds. The amount received by the United States during a fiscal year (FY) as proceeds from the sale of forest products produced on a military installation or facility, minus the amount reimbursed to the Department of Defense, under 10 U.S.C. 2665, for program costs incurred by that installation or facility. Program costs shall include obligations for current operating expenses and for the purchase of capital equipment required to operate the program.
3. Reserve Funds. A reserve account authorized under 10 U.S.C. 2665 and administered by the Department of Defense. The amount is held in the U.S. Treasury Special Fund Account 21*5285, Department of Defense, Forest Products Program, Army.
4. Surplus Funds. The amount expected to be available during the year within the Department of Defense after providing for the reimbursements under this Instruction. These funds represent the amounts to be transferred to the DoD Reserve Funds Account.

APPENDIX 2 COORDINATION AND REPORTING REQUIREMENTS

Annual Coordination of DoD Forest Products Program

1. Purpose. To coordinate forestry obligations and revenues of the Military Services to ensure that overall DoD revenue is sufficient to reimburse all authorized obligations for the production and sale of forest products.

2. Authority. Title 10, United States Code, section 2665

3. Schedule

a. December 15. Each Military Service disburses funds to the various states. The disbursement must be accompanied by identification of the generating installation(s) and amount generated by each installation.

b. December 30. Each Military Service deposits funds from the F3875 clearing account to the DoD Reserve Account (21*5285).

c. January 2. Each Military Service transmits the “Actual Revenue and Obligations Report” to the Executive Agent (EA) and the Office of the Deputy Under Secretary of Defense (Environmental Security) (DUSD(ES)).

d. February 15. Each Military Service transmits to the EA and the DUSD(ES), a report of cumulative program revenue and obligations through December 31 of the current fiscal year and any planned changes (see format below).

e. May 15. Each Military Service transmits to the EA and the DUSD(ES), a report of cumulative program revenue and obligations through March 31 of the current fiscal year and any planned changes.

f. August 15. Each Military Service transmits to the EA and the DUSD(ES), a report of cumulative revenue and obligations through June 30 of the current fiscal year and any planned changes.

g. September 1. Each Military Service transmits to the EA and the DUSD(ES), its planned forest products revenue and expenses, by appropriation, for the coming fiscal year (see format below). This plan must reflect no deficit in the program; however, description of unfinanced needs may accompany the plan.

CHAPTER 17**OFFSETTING RECEIPTS****1701 OVERVIEW**

170101. Purpose. The purpose of this chapter is to prescribe standard procedures for accounting and reporting offsetting receipts throughout the Department of Defense.

170102. General

A. Offsetting receipts are collections within the Department of Defense that result from proprietary or business like transactions (such as rents, sales of services and products, patent fees, sale of property, etc.) and from intragovernmental transactions (such as deposits between Federal and trust funds or payments within the same fund group). These collections are credited to general fund, special fund, or trust fund receipt accounts. Standard receipt accounts are prescribed by the Department of the Treasury in its Federal Account Symbols and Titles (FAST) book. Offsetting receipts are deposited with the Department of the Treasury using receipt accounts symbols and reported on the monthly Statement of Transactions (DD Form 1329).

B. Offsetting receipts are deducted from budget authority and outlays at agency (Component) levels. Actual offsetting receipts are reported on the monthly Report on Budget Execution (SF 133) and reported in budget submissions by DoD Components.

C. Receipts collected by DoD Components shall be classified according to (1) the source of the receipt, (2) the authority for the collection and the nature of the transaction, and (3) whether the receipt offsets agency (Component) or government-wide totals. Receipts also are classified into fund groups in accordance with the Treasury FAST book (i.e., general funds (0000-3799); clearing accounts (3800-3899); special funds (5000-5999); and trust funds (8000-8999)).

D. Most offsetting receipts are offset (deducted) against the function that contains the outlays which give rise to the receipts, i.e., the function of the account collecting the money. In such cases, these offsetting receipts are deducted before reaching functional budget authority or outlay totals and are referred to as “distributed” to the functions. However, there are several categories of offsetting receipts that cannot be offset properly against any specific function. These collections are deducted prior to calculating government-wide totals and are referred to as “undistributed offsetting receipts.” The three categories of offsetting receipts that are undistributed by function are:

1. The collection of amounts paid by federal agencies to federal employee retirement funds and Medicare.

2. Collections from the public of rents and royalties on the Outer Continental Shelf.

3. Collections from the public arising from the sale of major federal assets.

1702 GENERAL STANDARDS

170201. Contents of this chapter shall be used in addition to the accounting principles, standards, and procedures established in chapters 2, 16, and 19 of Volume 4, "Accounting Policy and Procedures;" chapter 4 of Volume 6, "Reporting Policy and Procedures;" and chapter 1 of Volume 12, "Special Accounts Policy and Procedures," of this Regulation.

170202. Budgeting standards for offsetting receipts are prescribed by the Office of Management and Budget (OMB) Circular No. A-11. Preparation of budget justification requirements are also prescribed in Chapter 11 of Volume 2, "Budget Formulation and Presentation," of this Regulation.

1703 ACCOUNTING AND REPORTING STANDARDS FOR OFFSETTING RECEIPTS

170301. Offsetting Receipts. Offsetting receipts within the Department are collections from the public that result from business-like transactions such as sales of property, rental fees or sales of services. These miscellaneous proprietary receipts are recorded using receipt account symbols prescribed by the Treasury FAST book. Offsetting receipt account symbols normally used within the Department are:

A. Account 1435. General fund proprietary interest, not otherwise classified. This account shall be used only for Defense civil functions. Account 1435 shall not be used for Defense military functions. Deposits of interest on loans, investments, and other equities shall be deposited in account 3210 to ensure that the Department receives credit for the offsetting receipt.

B. Account 1840. Proprietary receipts for rent of equipment and other personal property. This account shall be used exclusively by the Military Departments. Defense Agencies shall deposit rent receipts into Account 3210.

C. Account 2462. Proprietary receipts for survivor annuity benefits. This account shall be used exclusively by the Military Departments. Defense Agencies shall deposit receipts into Account 3210.

D. Account 2641. Proprietary receipts for the sale of ordinance material within the Department. All DoD Components may use this account.

E. Account 2651. Proprietary receipts for the sale of scrap and salvage materials within the Department. All DoD Components may use this account, but the Military Services must cite 972651.

F. Account 3019. Proprietary receipts for recoveries for government property lost or damaged, not otherwise classified. This account shall be used exclusively by the Military Departments. Defense Agencies shall deposit such recoveries into Account 3210.

G. Account 3041. Proprietary receipts for recoveries under the Foreign Military Sales Program. This account shall be used by all DoD Components. Receipts in this account shall be sub-categorized and reported to the OUSD(C) on the Report of Budget Execution (SF 133), in accordance with the guidance contained in chapter 4 of Volume 6, "Reporting Policy and Procedures," of this Regulation. The sub-categories are:

1. Nonrecurring Research, Development, Test and Evaluation (RDT&E) and production costs.
2. Sale of principal and/or major items from stock that do not require replacement.
3. Sale of excess stock fund and procurement of secondary items from stock.
4. Charges for unfunded civilian retirement costs.

H. Account 3210. General fund proprietary receipts, not otherwise classified. The Military Departments shall use this account for proprietary receipts not otherwise classified (as cited above). Defense Agencies shall use this account for proprietary receipts not allowed to be reported as indicated in the above accounts. Receipts in this account shall be maintained and reported for budget purposes in sub-categories as follows:

1. Freedom of Information Act charges.
2. Sales of surplus real property (excluding Account 2621).
3. Sales of materials, equipment, and other personal property (excluding Account 2641).
4. Interest on loans.
5. Repayment of loans.
6. Royalties on patents, trademarks, and copyrights.
7. Rent of real property.

8. Rent of equipment and other personal property (excluding Account 1840).

9. Sale of power and utilities.

10. For Defense Agencies:

a. Sale of publications and reproductions, not otherwise classified (similar to Account 2259).

b. Fees and other charges for communications and transportation services, not otherwise classified (similar to Account 2429).

c. Proceeds from sale of equipment and other personal property, not otherwise classified.

d. Recoveries for government property, lost or damaged, not otherwise classified (similar to Account 3019).

170302. Budget Clearing Account (Suspense). Offsetting receipts that are not readily classified into established categories shall be temporarily accounted for in Budget Clearing Account (suspense), F3875. All efforts shall be made to identify and record these receipts properly into the applicable categories listed above.

170303. Depositing Offsetting Receipts. All offsetting receipts shall be recorded immediately upon receipt and deposited with the Department of the Treasury as soon as practicable. Any delays in borrowing or deposit preclude use of the funds by the Treasury Department to benefit the U.S. Government through the avoidance of interest expense.

170304. Reporting Offsetting Receipts. Offsetting receipt amounts reported by DoD Components shall agree with the collections credited to receipt accounts maintained by the Department of the Treasury. Those DoD Components that prepare consolidated reports shall obtain the required information from applicable organizations and assure that the amounts reported are in agreement with balances reflected by the Department of the Treasury.

A. DD 1329 Report. Actual offsetting receipts shall be reported on a monthly basis using the DoD Statement of Transactions (DD Form 1329). The DD Form 1329 reports shall be submitted to the Director for Program and Financial Control, Office of the Deputy Comptroller (Program/Budget) (ODC(P/B), OUSD(C).

B. SF 133 Report. Procedures on monthly budget execution reporting are prescribed in chapter 4 of Volume 6, "Reporting Policy and Procedures," of this Regulation. These reports shall be submitted on a monthly basis to the Director for Program and Financial Control, ODC(P/B). Specific requirements are prescribed in chapter 4 of Volume 6 of this

Regulation. Offsetting receipt amounts reported on these reports shall equal the amounts reported on the monthly Statement of Transactions (DD Form 1329) and deposited with the U.S. Treasury.

1. A separate SF 133 report for each group of offsetting receipt accounts shall be submitted as part of the basic appropriation report. Separate SF 133 reports are required for Federal funds and trust funds under each of the functional groups: “Military Functions,” “Civil Functions” and “Military Assistance.”

2. Separate SF 133 reports are required within any of the foregoing groups in the event that the receipts consist of more than one of the following categories:

- a. Proprietary receipts from the public (P).
- b. Interfund receipts (ID).
- c. Federal intrafund receipts (IF) including those receipts in Budget Clearing Account (suspense), **F3885.

170305. Proprietary and Budgetary General Ledgers. Offsetting receipts shall be recorded in the proprietary and budgetary general ledgers.

A. Chapter 9 of Volume 3, “Budget Execution,” and chapters 2, 16, and 19 of Volume 4, “Accounting Policy and Procedures,” of this Regulation prescribe the general ledger accounts to be used in recording offsetting receipts. Table 17-1, below, illustrates the entries used when recording offsetting receipts.

ACCOUNTING ENTRIES FOR RECORDING OFFSETTING RECEIPTS

1. Dr 1011 Funds Collected
 Cr 5910 Miscellaneous Reimbursements

 To record reimbursements collected as revenue.
2. Dr 5990 Contra Revenue-Collected for Others
 Cr 2411 Deposit Fund Liabilities

 To recognize the liability to miscellaneous receipts for reimbursements collected.
3. Dr 2411 Deposit Fund Liabilities
 Cr 1011 Funds Collected

 To record transfer of reimbursed amounts to miscellaneous receipts or other receipt accounts.

Table 17-1

B. Source documents for the general ledger entries include cash collection vouchers, sales slip, rental receipts, and journal vouchers.

1704 USE OF ACCOUNTING DATA FOR BUDGET SUBMISSIONS

170401. Budgeting requirements are established by OMB Circular No. A-11 and Volume 2, "Budget Formulation," of this Regulation.

170402. Offsetting receipts deposited in receipt accounts are deducted as offsets to outlays and against budget authority at subfunction and agency levels. For instance, subfunction 051, "Department of Defense, Military," is the level at which proprietary receipts from the public are deducted from the Department's budget authority and outlays in arriving at total DoD Federal Funds in the budget.

170403. The accuracy and timeliness of recording and reporting offsetting receipts are critical in the budget preparation process. Actual receipts for the prior year are reported in the budget submissions and are used as the basis for projecting estimates for the budget outyears.

FINANCIAL MANAGEMENT REGULATION

VOLUME IIB

REIMBURSABLE OPERATIONS, POLICY AND PROCEDURES-- DEFENSE BUSINESS OPERATIONS FUND

DECEMBER 1994

UNDER SECRETARY OF DEFENSE
(COMPTROLLER)

COMPTROLLER

UNDER SECRETARY OF DEFENSE
1100 DEFENSE PENTAGON
WASHINGTON DC 20301-1100

DEC 21 1994

FOREWORD

This Volume of the DoD Financial Management Regulation is issued under the authority of DoD Instruction 7000.14, "DoD Financial Management Policy and Procedures." The DoD Financial Management Regulation governs financial management by establishing and enforcing requirements, principles, standards, systems, procedures, and practices necessary to comply with financial management statutory and regulatory requirements applicable to the Department of Defense. In addition, it directs statutory and regulatory financial reporting requirements;

Volume 11, "Reimbursable Operations, Policy and Procedures," of the Regulation is divided into two parts: Part A, "General Reimbursable Policy and Procedures," and Part B, "Defense Business Operations Fund." Part A provides general reimbursable policies and procedures applicable to all appropriations and funds. Part B provides financial management requirements, systems, and functions for all Defense Business Operations Fund activities.

This Volume of the Regulation applies to the Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Unified Combatant Commands, the Inspector General of the DoD, the Defense Agencies, and the DoD Field Activities (hereafter referred to collectively as "DoD Components").

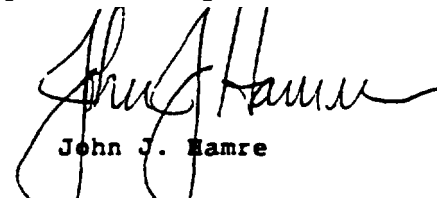

This Volume of the Regulation is effective immediately and is mandatory for use by all DoD Components. Heads of DoD Components shall ensure that it is adhered to in day-to-day operations and in the design, modification, and maintenance of their Component's financial management and reporting system or systems. The Heads of DoD Components shall not issue supplementary directives/regulations without the prior written approval of the Office of the Under Secretary of Defense (Comptroller).

The reporting requirements contained in this regulation are exempt from licensing in accordance with paragraph E.4.f., of DoD 7750.5-M, "Procedures for Management of Information Requirements."

Forward recommended changes to Volume 11B through channels to the address below. Submit requests for deviations from or exceptions to specific standards with justification, to:

Office of the Under Secretary of Defense (Comptroller)
1100 Defense Pentagon
Washington, DC 20301-1100

The Defense Finance and Accounting Service will provide copies of this Volume through its publications channels. Other Federal Agencies and the public may obtain copies of this Volume from the National Technical Information Service, 5285 Port Royal Road, Springfield, Virginia 22161; telephone (703) 487-4650.

John J. Hamre

PUBLICATIONS INCORPORATED

Volume 11B of the Regulation incorporates the following:

DoD Directive 7410.4, Industrial Fund Policy

DoD 7220.9-M, DoD Accounting Manual

Chapter 82, "Industrial Funds"

Chapter 95, "Industrial Fund Management Reports"

DoD Directive 7420.13, "Stock Fund Operations"

DoD 7420.13-R, DoD Stock Fund Operations

DoD Instruction 7420.12, Billing, Collection and Accounting for Sales of Materiel from Supply System Stock

CHAPTER 50

DEFENSE BUSINESS OPERATIONS FUND GENERAL POLICIES AND REQUIREMENTS

A. GENERAL

1. Overview

a. Treasury Fund Symbol. The Defense Business Operations Fund (DBOF) has been established under the authority of title 10, United States Code, Section 2208. The Treasury Account Symbol for the Defense Business Operations Fund is 97X4930.

b. General. The Defense Business Operations Fund consists of Business Areas that are managed by DoD Components for providing goods and services, on a reimbursable basis, to other activities within the Department of Defense and to non-DoD activities when authorized.

c. Charters. DoD Component business areas to be financed through the Defense Business Operations Fund shall be chartered under the DBOF to achieve the objectives contained in Addendum 1 to this chapter. A charter shall be prepared in accordance with chapter 51 of this Volume and submitted to the Under Secretary of Defense (Comptroller) for approval. Before charter preparation, DoD Components shall ensure that the proposed DBOF activity meets the criteria established for a Defense Business Operations Fund activity described in chapter 51, paragraph A of this Volume.

d. Funding. Business areas receive their initial working capital through an appropriation or a transfer of resources from existing appropriations of funds and use those capital resources to finance the initial cost of products or services. Financial resources to replenish the initial working capital and to permit continuing operations is generated by the acceptance of customer orders. The Supply Management business area and the Capital Investment Program receive contract authority. Contract authority permits obligations to be incurred in advance of appropriations or in anticipation of receipts from customers but in accordance with an apportionment, allotment, or other limiting authority. Other than the Supply Management business area and the Capital Investment Program, all other Defense Business Operations Fund obligations must be supported by budgetary resources that are immediately available for outlay even though the outlay may not occur until a future date.

e. Segregation of Budgetary Resources. Where an activity receives budgetary resources from more than one source (for example, reimbursable authority from customer orders accepted and direct authority from appropriations, or allocations of appropriations, received), the receiving activity must maintain records which will enable it to control and report separately the transactions relating to each type of source.

f. Annual Operating Budgets. Commencing with the establishment, in FY 1992, of the Defense Business Operations Fund, annual operating budgets that provide official management cost goals are issued to the Services and Agencies for each business area. The annual budget consists of two primary parts -- the operating budget and the capital budget. The operating budget represents the annual operating costs of an activity or Component, including depreciation and amortization expenses. The capital budget represents the amount of financial resources that are authorized for use in the acquisition of capital assets. Volume 2B, chapter 9, "Defense Business Operations Fund Business

Area Analysis,“ provides additional details of Annual Operating Budgets for the Defense Business Operations Fund.

g. Customer Orders. Customer orders (funded requests for goods or services) provide the budgetary resources necessary to finance operations. To be valid, customer orders must be obligations of a Federal Government activity and cash advances from non-Federal Government customers. Cash advances may also be requested from Federal Government activities when directed, or approved, by the Under Secretary of Defense (Comptroller). Customer orders create a quasi-contractual relationship between a Defense Business Operations Fund activity and its customer.

h. Stabilized Rates and Prices. Defense Business Operations Fund activities operate on a break-even basis over the long term. Customer rates shall be established on an end product basis whenever feasible. The term “end product“ means the item or service requested by the customer (output) rather than processes or other inputs in the achievement of the requested output (for example, the product requested rather than the direct labor hours expended in the achievement of that product). Rates are required to be established at levels estimated to recover the cost of products or services to be provided, as well as approved surcharges. The budget process is the mechanism used to ensure that adequate resources are budgeted in the customer’s appropriated fund accounts to pay the established rates. Once established, rates are stabilized (held constant) for the applicable fiscal year. This “stabilized rate“ policy serves to protect appropriated fund customers from unforeseen cost changes and thereby enables customers to more accurately plan and budget for DBOF support requirements. In turn, this policy also reduces disruptive fluctuations in planned DBOF work load levels and thereby permits more effective utilization of DBOF resources. Gains or losses in operations may occur as a result of variations in program execution. Realized gains and losses are generally reflected in offsetting adjustments to stabilized rates established in subsequent fiscal years. Occasionally however, realized losses may be funded by an appropriation, or by a transfer from available resources in another DoD account. The Defense Business Operations Fund includes a variety of business areas that are categorized into two groups for rate setting purposes.

(1) Supply Management Business Areas. The Supply Management business area uses commodity costs in conjunction with a cost recovery factor (previously termed “surcharge“) to establish customer rates.

(2) Non-Supply Management Business Areas. Non-Supply Management business areas use unit cost rates established based on identified output measures.

i. Restrictions on Use of Customer Appropriations. Statutory limitations and restrictions imposed on the appropriated funds of a Defense Business Operations Fund customer are not changed when the customer places an order with the Fund. A Defense Business Operations Fund customer cannot use its appropriated funds to do indirectly, i.e., through placement of an order with a Defense Business Operations Fund activity, what it is not permitted to do directly. Thus, the availability of an appropriation cannot be expanded or otherwise changed by transfer to the Defense Business Operations Fund. Appropriated funds cited on reimbursable orders are available only for the purposes permissible under the source appropriation and remain subject to the same restrictions. The ordering activity is primarily responsible for the determination of the applicability of the ordering appropriation. However, if instances arise when it is apparent that the ordering appropriation is not appropriate for the purpose provided, then the order should be returned with a request for an applicable appropriation cite.

2. Mobilization Capability. Each DBOF business area must plan for and maintain the capability to expand or alter operations, or to provide extraordinary supply or other functional area support necessary, to satisfy mobilization conditions when required. The nature and extent of the costs to be paid by a separate appropriation rather than charged to other business customers through the rates shall be in accordance with policy and procedures contained in the following chapters.

3. Conformance with Policy Issuances. The management and operation of each DBOF Business Area shall comply with financial management guidance and policies issued by the Office of the Under Secretary of Defense (Comptroller) and with requirements and procedures issued by the Defense Finance and Accounting Service. The policies, procedures, and reporting requirements contained within this Volume (Volume 11B) apply to all DBOF business areas unless otherwise specified. Policies, procedures, and reporting requirements contained herein that are unique to individual business areas are identified as such.

B. DEFENSE BUSINESS OPERATIONS FUND CORPORATE BOARD

1. Mission. The mission of the Defense Business Operations Fund Corporate Board is to work collaboratively to develop, review, and recommend Defense Business Operations Fund policies and procedures. As examples, the Board may:

a. Review business areas for inclusion or exclusion in the Defense Business Operations Fund.

b. Evaluate performance of individual business activities or business areas and the impact of that performance on cash, and on operating and capital investment goals.

c. Review and recommend actions to support DBOF management information systems.

2. Composition. The DBOF Corporate Board shall be composed of senior financial and/or functional managers, or their designated representatives. The Chief Financial Officer of the Department of Defense will serve as Chair. The Board members shall consist of one representative or their designated alternate from the following organizations: Joint Chiefs of Staff, Under Secretary of Defense (Acquisition and Technology), Under Secretary of Defense (Personnel and Readiness), Assistant Secretary of Defense (Command, Control, Communications and Intelligence), and Assistant Secretaries for Financial Management of the Army, Navy and the Air Force. A representative of the Defense Finance and Accounting Service will serve as a special advisor to the Board on matters concerning accounting procedures and supporting financial systems. The Chair may elect to designate permanent observers to the Board from participating Components. Board members may recommend permanent observers for consideration by the Chair. Board members may also invite financial and functional managers, in limited numbers, to provide expertise in addressing specific agenda items. Representatives from other Defense Agencies and federal agencies may be invited to provide representatives to observe Board deliberations and to offer their views as they consider beneficial.

C. AUTHORIZED CUSTOMERS

Customers of a Defense Business Operations Fund activity may be:

1. Any DoD command, organization, office, or other element.

2. Non-DoD Federal Government Agencies.
3. Private parties and concerns when authorized by law including foreign governments, State and local governments, and others not officially representing the Federal Government.
4. Those U.S. manufacturers, assemblers, or developers authorized by Section 2208(h) of title 10, United States Code and in accordance with Section 4543 of title 10, United States Code and DoD Directive 4175.1, "Sale of Government-Furnished Equipment or Materiel and Services to U.S. Companies."

D. RESPONSIBILITIES

1. The Under Secretary of Defense (Comptroller) and Chief Financial Officer of the Department of Defense shall:

- a. Establish DoD policy on DBOF operations.
- b. Provide oversight on all financial management activities relative to the operations of the DBOF.
- c. Authorize or approve specific activities to be included in the DBOF and the terms under which such activities shall be operated.
- d. Rescind the authorization of specific DBOF activities deemed to no longer meet DBOF criteria or that may be operated more efficiently under other financing.
- e. Issue all necessary budget preparation, accounting, and reporting policies.
- f. Review and approve operating budgets, monitor execution of the budget and analyze the results thereof, and provide guidance to improve the efficiency of Defense Business Operations Fund operations.

2. The Director, Defense Finance and Accounting Service (Director, DFAS) shall:

- a. Establish requirements, systems, procedures, and practices to comply with statutory and regulatory requirements.
- b. Establish procedures ensuring that DBOF policies are implemented.
- c. Issue supplementary instructions to guidance contained within this Regulation when necessary to provide for unique requirements within the DoD Components and to provide detailed operating instructions.
- d. Monitor compliance with this guidance and other policy issuances through analysis of reports, visits to activities, and review of audits.
- e. Evaluate the operation of DBOF activities to determine compliance with established requirements.
- f. Evaluate Defense Business Operations Fund accounting systems for compliance with established requirements.
- g. Prepare consolidated accounting reports for the DBOF.

3. The Secretaries of the Military Departments and the Directors of Defense Agencies, or their designees, who have activities financed under the Defense Business Operations Fund shall:

- a. Manage DBOF activities within approved funding limitations.
- b. Designate a management agency or command to be responsible for effective management of each DBOF activity.
- c. Comply with, and recommend changes to, this and other governing regulations.
- d. Provide periodic financial and management information as required by the Under Secretary of Defense (Comptroller) and Chief Financial Officer.
- e. Submit applications to authorize new DBOF activities or to rescind the authorization of existing DBOF activities to the Under Secretary of Defense (Comptroller).

4. The Management Agency or Command assigned responsibility for Defense Business Operations Fund activities shall:

- a. Budget and provide appropriated funds for the costs of maintaining unutilized plant and facilities being held for mobilization purposes at DBOF activities. Retention of facilities in excess of those necessary for current or planned workload shall be in accordance with DoD Directive 4275.5, "Acquisition and Management of Industrial Resources." The acquisition, retention, or disposal of unutilized plants and facilities at transportation activities must be approved by the Deputy Under Secretary of Defense (Logistics) (DUSD(L)).
- b. Assign responsibility and authority to designated officials for management and operation of DBOF activities.

5. The Management of Each DBOF Activity shall:

- a. Incur obligations and costs as necessary and allowable to perform the activity mission.
- b. Control performance costs in line with the annual operating budget as approved by the Under Secretary of Defense (Comptroller).
- c. Identify to higher management any impediments to achievement of performance and cost goals.
- d. Identify and justify to higher management those investments which will produce future improvements in effectiveness and efficiency.

6. The Customers of each DBOF Activity shall be responsible for budgeting and budgetary control for the cost of end-products and services ordered from a DBOF activity. The appropriation, apportionment, and funding process provides higher-level control and visibility to the Congress of the cost of material, work, and services ordered by customers of DBOF activities.

E. ACCOUNTING STANDARDS

1. Federal Government Accounting Principles and Standards. The Secretary of the Treasury, the Director of the Office of Management and Budget (OMB), and the Comptroller General of the United States (“the Principals”) established the Federal Accounting Standards Advisory Board (FASAB) in October 1990 by a memorandum of understanding. The role of FASAB is to deliberate upon and make recommendations to the Principals on accounting principles and standards for the Federal Government and its Executive Branch agencies. The Director of OMB will review each statement of accounting principles, standards, or concepts recommended by the FASAB and decide upon the appropriateness of the statement and its desirability for the Federal Government. If a recommended statement of accounting principles or standards is agreed to by the Director of OMB, the Secretary of the Treasury, and the Comptroller General, the Director of OMB will issue a Statement of Federal Financial Accounting Standards (SFFAS). SFFASs shall be considered generally accepted accounting principles (GAAP) for Federal agencies. Agencies shall apply the SFFASs in preparing financial statements in accordance with the requirements of the Chief Financial Officers Act of 1990. Auditors shall consider SFFASs as authoritative references when auditing financial statements. The SFFASs shall have no effect on the manner in which Federal agencies budget for, monitor and control the expenditure of budgetary resources. Those requirements are defined in OMB Circulars A-11 and A-34 and other OMB documents.

2. Hierarchy of Accounting Standards. The Federal Accounting Standards Advisory Board, with approval of the General Accounting Office, Office of Management and Budget, and the Treasury, has approved the following hierarchy of accounting standards for use in preparing federal agency financial statements:

a. Individual standards agreed to and published by the Joint Financial Management Improvement Program (JFMIP) principals. (The JFMIP principals are the Secretary of the Treasury, the Director of the Office of Management and Budget, and the Comptroller General of the United States.)

b. Form and content requirements included in OMB Bulletin 93-02, dated October 22, 1992 and subsequent issuances.

c. Accounting standards contained in agency (i.e., DoD) accounting policy, procedures manuals, and/or related guidance as of March 29, 1991, so long as they are prevalent practices.

d. Accounting principles published by authoritative standard setting bodies and other authoritative sources (1) in the absence of other guidance in the first three parts of this hierarchy, and (2) if the use of such accounting standards improves the meaningfulness of the financial statements.

3. Interpretation of Statements of Federal Financial Accounting Standards. DoD Components desiring an interpretation of a Federal Government GAAP shall request such interpretation from the Director for Accounting Policy, Office of the Under Secretary of Defense (Comptroller). The Director for Accounting Policy shall respond to that request or, if necessary, forward the interpretation request to the OMB Office of Federal Financial Management. In accordance with OMB Circular A-134, Financial Accounting Principles and Standards, “the OMB may respond to the request in one of two ways--by providing technical assistance or through issuance of an Interpretation of Federal Financial Accounting Standards. An “Interpretation of Federal Financial Accounting Standards“ is a document of narrow scope that provides clarifications of original meaning, additional definitions, or other guidance pertaining to an existing Statement of Federal Financial Accounting Standards (SFFAS). In the event OMB decides an Interpretation of Federal

Financial Accounting Standards is necessary, OMB Circular A-134 directs OMB to provide written copies of the request to the Comptroller General and the Secretary of the Treasury; examine, as appropriate, applicable literature and consult with knowledgeable persons; draft an Interpretation of Federal Financial Accounting Standards; obtain the consensus of Treasury and the General Accounting Office on the interpretation; and publish the Interpretation of Federal Financial Accounting Standards.

4. Defense Business Operations Fund Accounting System Requirements. The accounting system established for the Defense Business Operations Fund shall employ the accrual basis of accounting, be transaction-based, and use the double-entry method of accounting.

F. BUDGETARY CONTROL STANDARDS

1. Defense Business Operations Fund accounting systems shall have the capability to account for the status of budgetary resources on a continuous basis. Budgetary controls shall be designed to prevent incurring costs in excess of the amounts necessary to provide goods and services to ordering activities, the accumulation of excess inventories and operating materials and supplies, and the incurring of liabilities in excess of payment capability.

2. Budgetary resources are comprised of:

- a. appropriated or reappropriated amounts becoming available during the year,
- b. the net of any nonexpenditure transfers between Federal Government accounts,
- c. unfilled customer orders, and
- d. unobligated balances brought forward from the previous year.

Anticipated reimbursements and anticipated customers' orders are not considered a budgetary resource. Obligations incurred (undelivered orders and accrued expenditures-paid and unpaid) are claims against budgetary resources.

G. GENERAL LEDGER ACCOUNTS. The DoD Uniform Chart of Accounts are prescribed for use by DBOF activities to record budgetary and proprietary accounting transactions on a double-entry basis. Additional primary accounts may only be added with the written consent of the Office of the Under Secretary of Defense (Comptroller). Subaccounts to the prescribed primary general ledger accounts may be established by the Defense Finance and Accounting Service as needed to satisfy reporting and management information requirements. An illustration of the relationship of budgetary and proprietary transactions is at Addendum 2 to this chapter.

★H. AUDITING. Defense Business Operations Fund activities are subject to audit by the audit organizations of the Military Services, by the Inspector General, Department of Defense, and by the General Accounting Office. The frequency and performance of audit performed by DoD audit organizations shall be determined by the audit organization based on guidance set forth in chapter 5 of DoD 7600.7-M, "Internal Audit Manual." Copies of audit reports shall be submitted to the Deputy Chief Financial Officer, Office of the Under Secretary of Defense (Comptroller) and the Deputy Comptroller (Program/Budget), Office of the Under Secretary of Defense (Comptroller).

OBJECTIVES OF THE DEFENSE BUSINESS OPERATIONS FUND

A. The Defense Business Operations Fund is designed to:

1. Provide a more effective means for controlling the costs of goods and services required to be produced or furnished by Defense Business Operations Fund activities, and a more effective and flexible means for financing, budgeting, and accounting for the costs thereof.
2. Create and recognize contractual relationships between Defense Business Operations Fund activities and those activities that budget for and order the end-products or services.
3. Provide managers of Defense Business Operations Fund activities the financial authority and flexibility required to procure and use manpower, materials and other resources effectively.
4. Encourage more cross-servicing among the DoD Components and among their operating Agencies, with the aim of obtaining more economical use of facilities.
5. Facilitate budgeting for and reporting of the costs of end-products. This will underline the cost consequences of choosing between alternatives.

B. Specific objectives include the following:

1. Furnish managers of Defense Business Operations Fund activities with modern management tools comparable to those utilized by efficient private enterprises engaged in similar types of activities.
2. Improve cost estimating and cost control through comparison of estimates and actual costs.
3. Obtain alert, forward-looking financial planning at Defense Business Operations Fund activities by making them financially dependent on reimbursements received for goods and services furnished in fulfilling orders from customers.
4. Encourage producers of goods and services to coordinate labor forces and inventories with workload, budgeting, and cost control.
5. Instill in the officials of ordering Agencies a greater sense of responsibility and self-restraint in balancing the cost of specific goods and services to be ordered against the benefits and advantages of their procurement, especially in the light of alternative or competing demands.

OBJECTIVES OF THE DEFENSE BUSINESS OPERATIONS FUND, continued

6. Place ordering Agencies in the position of critically evaluating purchase prices (that is, costs of performing activities) as well as quality and delivery-speed of goods and services ordered.

7. Enable ordering Agencies to budget and account on an "end-product" basis (the same as when buying from commercial contractors), thereby simplifying budget presentations, budgetary control, and accounting procedures for both producers and ordering agencies.

8. Establish, whenever feasible, standard prices or stabilized rates and unit prices for goods and services furnished by Defense Business Operations Fund activities, thus enabling ordering Agencies to plan and budget more confidently.

9. Encourage ordering Agencies' management to improve program planning and scheduling in response to producers' efforts to plan and negotiate for orders as far in advance as feasible.

RELATIONSHIP OF BUDGETARY AND PROPRIETARY TRANSACTIONS

<u>Transaction</u>	<u>When order is placed</u>	<u>When materials are delivered</u>	<u>When materials are used</u>	<u>When bill is paid</u>
	(Obligation)	(Accrued expenditure)	(Cost or (expense)	(Outlay)
Order for materials is placed.	Obligation is recorded as an undelivered order and a decrease to the uncommitted/unobligated budgetary resources			
Materials are received or constructively received.		This is recorded in the proprietary accounts as an account payable, and as an increase in the asset accounts. It is recorded in the budgetary accounts as a decrease to undelivered orders and an increase to accrued expenditures unpaid.		

TRANSACTION STAGES (continued)

<u>Transaction</u>	<u>When order is placed</u>	<u>When materials are delivered</u>	<u>When materials are used</u>	<u>When bill is paid</u>
Materials are used or consumed.			Cost is recorded in the proprietary accounts as a decrease in assets and a charge to the applicable expense account or work in process account	
Payment is made for the materials.				Outlay is recorded in the proprietary accounts as a reduction of accounts payable and a reduction to cash. In the budgetary accounts it is recorded as a decrease to accrued expenditures unpaid and an increase to accrued expenditures paid.

CHAPTER 51

ESTABLISHMENT AND CLOSURE OF FUND ACTIVITIES AND TRANSFER OF FUND FUNCTIONS

A. ESTABLISHMENT

Prior to the financing of an activity under the Defense Business Operations Fund, a charter, prepared in accordance with Addendum 2, shall be signed by the Secretary (or Under Secretary) of the Military Department, the Director (or Deputy Director) of a Defense Agency, or the Commander-in-Chief of the United States Transportation Command, as applicable, and submitted to the Under Secretary of Defense (Comptroller) for approval. The Defense Business Operations Fund business areas, and, in some instances, as appropriate, individual activities may be chartered to operate as a Fund entity. Before charter preparation, DoD Components shall ensure that proposed Defense Business Operations Fund business areas (and installations within that business area) meet the following criteria:

1. Outputs (i.e., production of goods or provision of services that are common to requirements of more than one Military Department or Defense Agency or ordering activities within a Military Department or Defense Agency) can be identified.
2. An accounting system is available that is capable of collecting and identifying costs to outputs.
3. Activities that require and order products or services (i.e., customers) can be identified so that resources can be aligned in the account of the customer with the requirement.
4. Evaluation of buyer-seller advantages and disadvantages to include an assessment of the customer's ability to influence cost by changing demand.

B. DEFENSE BUSINESS OPERATIONS FUND CHARTER REQUIREMENTS

1. Charter Format. The Defense Business Operations Fund charter format is included in the Addendum to this chapter. The charter is composed of two parts --

a. An overall DBOF charter for signature by the Under Secretary of Defense (Comptroller) and the Deputy Secretary of Defense (Addendum 1); and

b. Supplemental provisions (Addendum 2) that are applicable to each DoD Component Business Area included within the DBOF. The supplemental provisions lay out the mission of that Component by Business Area and include exceptions, if any, from DBOF policy that are authorized for that business area. The supplemental provisions shall be signed by the Secretary (or Under Secretary) of a Military Department, the Director (or Deputy Director), of a Defense Agency or the Commander-in-Chief of the United States Transportation Command, as applicable, and submitted to the Under Secretary of Defense (Comptroller) for approval.

2. Charter Contents. Each supplemental provision (hereafter called "charter") shall include the following as a minimum:

a. Name and location of the activity or activities to be operated under the charter.

b. Brief description of the functions of the activity or activities and nature of its products or services.

c. Designation of the organization (Management Command) directly below the Departmental level that has authority over the management of DBOF businesses. Additionally, the supplemental provisions shall state whether the Management Command is funded from the Defense Business Operations Fund.

d. Statement of any specific exceptions to Fund policies.

e. The amount of working capital approved to establish each activity included within the charter including the amount, if any, of appropriated funds included within the approved working capital.

3. Charter Support. Documentation supporting the charter application of an activity requesting entry into the Defense Business Operations Fund shall include:

a. Complete explanation of how the proposed Fund activity meets the minimum criteria listed above and any additional requirements of the DoD,C for the specific activity or activities.

b. Complete justification of estimated working capital requirements including explanation of factors or basis upon which calculated.

c. Financial statements disclosing the projected financial activity for, at a minimum, the first fiscal year of operation as a Fund activity. The financial statements shall be prepared in the format prescribed for Fund financial statements and shall consist of the following:

(1) Statement of Financial Position, disclosing projected assets, liabilities, and net position at the end of the reporting period;

(2) Statement of Operations (and Changes in Net Position), disclosing the projected results of the activity's operations including the change in its net position during that period.

(3) Statement of cash Flows, disclosing estimated cash receipts and disbursements with an explanation of the expected changes in cash during the period. The Statement of Cash Flows shall contain information concerning the amount of working capital necessary for the activity or activities taking into consideration the following:

(a) The requirement for initial investment in operating materials and supplies.

(b) The initial liabilities assumed that require cash for their liquidation.

(c) The funding requirement needed to cover estimated costs to be incurred for operations or capital assets before the time that reimbursements may be obtained.

(4) Notes to financial statements, providing additional disclosures necessary to make the financial statements fully informative and not misleading.

d. Information concerning the expected volume of business, by type and character, and the source of reimbursements by customer agency and appropriation, or other source, during the current and ensuing fiscal years. This shall include:

(1) Designation of the agencies that are the customers for the various products and services of the activity, and the sources of reimbursement expected from them as well as the underutilized and unutilized capacity and other support costs.

(2) The effect on customer appropriation budgets in cases in which current-year, customer appropriation budgets or budget estimates provide for financing of some costs of the activity in a manner other than the Defense Business Operations Fund. A statement of the budgetary adjustments or interim funding procedures being proposed as a result of the charter application should also be provided.

e. Explanation of goods or services proposed to be furnished outside the Department of Defense.

f. Justification of any exception to the provisions of this Regulation.

4. Amendment or Cancellation of Charters. Existing charters shall be canceled or amended upon approval by the Under Secretary of Defense (Comptroller). Requests for cancellations or amendments must be supported by the following information:

a. Complete justification for the proposed action that may consist of copies of supporting evaluations or studies.

b. Information as to the disposition of assets and liquidation of liabilities.

5. Annual Charter Review. DoD Components shall review Fund operations each fiscal year to ensure that the supplemental provisions are current. Any needed changes shall be submitted to the Under Secretary of Defense (Comptroller).

C. COMMENCEMENT OF OPERATIONS

Upon charter approval and commencement of Fund operations, financial control over initial appropriations, assets, liabilities, and capital shall be established in accordance with the following guidance:

1. Initial Appropriation and/or Reappropriation. An appropriation is an authorization by an act of Congress that permits agencies to incur obligations and to make payments out of the U.S. Treasury for specified purposes. Appropriations made available to commence operation of a Defense Business Operations Fund entity remain available for obligation without fiscal year limitation for their specified purpose until expended or withdrawn. A reappropriation to a business operations fund account is statutory authority to restore the obligational availability of all or part of the unobligated balance of budget authority that has expired or would otherwise expire in an annual or multiple-year appropriation. Reappropriation transactions require nonexpenditure transfer of the funds involved from the expired or otherwise expiring account to the Defense Business Operations Fund account. Other appropriations may be made available to acquire war reserve assets, augment existing inventories, or other purposes. Appropriations received shall be recorded as invested capital in proprietary accounts and as direct program in budgetary accounts. The receipt of an appropriation or reappropriation is recorded at the Departmental level only. The allocation, if any, of the appropriation or reappropriation is recorded at the, intermediate and activity level as appropriate. Typical budgetary and proprietary accounting entries applicable to receipt and allocation of appropriations and reappropriations are illustrated in chapter 52 of this Volume.

2. Initial Assets and Liabilities

a. Working Capital. Working capital to commence operations may be provided by a nonexpenditure transfer of fund balances from another appropriation or fund account to the Defense Business Operations Fund account. Nonexpenditure transfers received to support ongoing operations shall be recorded as follows:

Dr 1013 Funds with Treasury
Cr 3211.4 Net Treasury Balance - DBOF

Dr 4170 Appropriation Transfers
Cr 4450 Authority Available for Apportionment

Documentation supporting this entry includes SF 1151,
"Nonexpenditure Transfer Authorization."

b. Personnel. Personnel assigned from an appropriated fund activity to a Defense Business Operations Fund activity generally are accompanied by a liability for the amount of accrued earnings and annual leave earned by those employees prior to their transfer. Ordinarily, payment in the form of cash or other agreed upon equivalent assets such as inventories or equipment should be made to the receiving Defense Business Operations Fund activity for the amount of the liabilities assumed. However, the entry to record initial liabilities, to the extent that payment in full is not received is:

Dr 1011.1 Funds Collected - Operating Program - DBOF
Cr 2211 Accrued Payroll - Civilian
Cr 2221 Accrued Annual Leave - Civilian

Entry to record liability associated with personnel transfers
when payment accompanies the liability transfer.

Dr 3211.3 Liabilities Assumed
Cr 2211 Accrued Payroll - Civilian
Cr 2221 Accrued Annual Leave - Civilian

Entry to record liability associated with personnel transfers
when payment does not accompany the liability transfer.

c. Transfers-In of Fixed Assets. Assets provided from other appropriations or funds to commence operations of a Fund activity shall be recorded as Assets Capitalized. The business operations fund shall record a liability for an item transferred from a non business operations fund account only when the item is undelivered at the time of the transfer and the obligation for the item on the books of the organization from which the item was transferred resulted from a reimbursable order from a customer. Otherwise, bills for assets on order at the time of the transfer to the business operations fund shall be paid by the appropriation or fund originally ordering the item. This is appropriate since the original appropriation or fund ordering the item was funded through the budget process to procure the item. Capitalized assets provided without reimbursement may constitute justification for a stock withdrawal authorization when approved by authorized officials. (See chapter 55, "Supply Management Operations," of this Volume regarding stock withdrawal credits.) The entry to record assets provided to commence Fund operations as well as those contributed during the life of the Fund are:

Dr 1510 Operating Materials and Supplies
Dr 1521 Inventory Held for-Sale
Dr 1522 Inventory Held in Reserve for Future Sale
Dr 1523 Inventory Held for Repair
Dr 1524 Inventory - Excess, Obsolete and Unserviceable
Dr 1580 Work in Process
Dr 1710 Land
Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Dr 1760 Equipment
Dr 1800 Other Fixed Assets
Cr 2130 Contract Holdbacks
Cr 3211.2 Assets Capitalized

Entry to record receipt of assets. Documentation supporting
this entry includes journal vouchers and receiving reports.

d. Initial Capital. The following capital accounts are subsidiary to the control account 3211, "Capital Investment - DBOF", and are applicable at the time of initial capitalization:

(1) Appropriations Available. At the time of initial capitalization, the subsidiary account 3211.1, "Appropriations Available",

shall equal the amount of the initial appropriation or reappropriation, if any, received from the Congress or transferred from other activities or the departmental reserve of the DoD Component industrial fund.

(2) Assets Capitalized. At the time of initial capitalization, the subsidiary account 3211.2, "Assets Capitalized," shall equal the value of all assets (excluding the initial appropriation) transferred to the activity without reimbursement or assumption of liability by the industrial fund.

(3) Liabilities Assumed. At the time of initial capitalization, the subsidiary account 3211.3, "Liabilities Assumed," shall equal the sum of the obligations transferred to the activity for which industrial fund resources are liable for future disbursement.

(4) Treasury Fund Balance. At the time of initial capitalization, the subsidiary account 3211.4, "Net Treasury Balance - DBOF," shall equal the sum of Treasury fund balances transferred from other appropriations or, funds.

D. BASE CLOSURE

1. General. The Defense Business Operations Fund does not have any funds available to it for payment of costs or absorption of losses that are not related to its output. Reimbursable rates developed for Defense Business Operations Fund activities generally recover only costs incurred in providing the requested good or service. Costs over and beyond those costs are generally not considered in reimbursement rate computations. As a result, the Defense Business Operations Fund (DBOF) does not have, through its normal operations, funds available for payment of costs resulting from closure actions that are directed by higher authority such as the Base Closure and Realignment Commission.

2. Base Closure Actions. Upon notification that a DBOF activity is to be closed, the following actions shall be taken by the closing activity:

a. Commitments. Review outstanding commitments and cancel those not absolutely necessary.

b. Contracts. Review all existing contracts and terminate those for which the contracted service or good is, or will be, no longer essential. It is especially important that contracts for capital assets be terminated when feasible. Termination costs which result from the cancellation shall be identified as base closure costs. If an outstanding contract is essential to the needs of another DoD activity, that need may be filled through a contract modification citing the appropriation or fund of the needing DoD activity.

c. Undelivered Orders/Outstanding Obligations. Review undelivered orders and other outstanding obligations for goods and services ordered. Cancel orders or contracts for goods or services that are no longer needed or that are not likely to be delivered, and deobligate the appropriate amounts.

d. Accounts Payable. Review accounts payable for goods received but not yet paid, return goods that are no longer needed, and recover the amounts payable.

e. Unfilled Customer Orders. Review unfilled customer orders to determine the orders for goods or services that can be completed. If customer orders for goods or services can be completed, the closing activity may continue work. If customer orders cannot be completed, the closing activity shall bill the customer for the work completed and return any remaining unobligated balances to the customer.

3. Financing BRAC Related Base Closure Costs. Costs may be financed by a BRAC account when those costs are as a direct result of a Base Closure and Realignment Commission determination that a base be closed. BRAC costs are those required to carry out actions that are in direct support of closing or realigning bases. BRAC costs must be in direct support of Base Closure and Realignment Commission determination. Prior year, current year, or budget year operating losses in the DBOF are not to be budgeted in the BRAC base closure accounts. Although overhead associated with the below listed costs shall be charged to the BRAC account, increases in overhead on existing and new customer work shall not be considered a direct result of a determination that a base be closed and, therefore, will not be charged to a BRAC account. Costs identifiable directly to base closure actions shall be accumulated separately for reimbursement from a BRAC account. Costs attributable to base closure actions include:

a. Environmental Restoration and Mitigation. This includes reducing, removing and recycling hazardous waste, and removing unsafe buildings and debris.

b. Planning. Conduct of such advance planning and design as may be required to transfer functions from an activity being closed to another military installation.

c. Outplacement Assistance. Assistance in relocation, training, or other necessary assistance to civilian employees employed by the Department at installations being closed.

d. Community Programs. Community Programs include economic adjustment assistance to a community in which the closed base is located, or community planning assistance to the community to which functions will be transferred as a result of closure of a military installation.

4. Financing Non-BRAC Related Base Closure Costs. Paragraph D.3. above specifies costs to be financed from a BRAC account. Other costs at an activity undergoing closure, or to be closed, shall not be financed by a BRAC account even though the closure was directed as a result of a determination of a Base Closure and Realignment Commission. Those other costs shall be financed either by the DBOF or by an operations and maintenance (O&M) appropriation as follows:

a. DBOF Financed. The following shall be financed by the DBOF to the extent permitted by amounts available from existing and new customer orders:

(1) Current year costs in support of customer orders.

(2) Prior year, current year, or budget year operating losses.

(3) Increases in overhead even though those increases could be attributed to decisions to close bases.

b. Appropriation (O&M) Financed. The following shall be financed through a transfer from the operations and maintenance appropriation of the DoD Component responsible for the activity incurring the loss.

(1) All costs at a closing activity in the year of closure that are not associated with a valid work order or are as a result of other than a determination of a Base Closure and Realignment Commission that the activity be closed.

(2) Direct and indirect (including General and Administrative) operating costs for which there are not sufficient resources in existing customer orders or other resources of the closing activity.

(3) Prior year losses (to the extent not financed from existing and new customer orders as stated in paragraph D.4.a(2) above) shall be financed as a pass through from the operations and maintenance appropriation of the DoD Component responsible for the activity incurring the loss.

5. Procedures for Requesting DoD Base Closure Account Funds. To request an allocation of DoD base closure account funds, an activity that has been selected for closure by a DoD Base Closure and Realignment Commission determination shall submit a "DoD Base Closure Account Financial Plan," (Format 460-BC) [attached], through its Command hierarchy, to the Directorate for Military Construction, Office of the Deputy DoD Comptroller (Program/ Budget) for approval. A separate narrative explanation for planned expenditures will also be included in sufficient detail to support the DoD Component financial plan. If a DBOF activity is the host activity at the installation to be closed, it is responsible for coordination with all affected tenant activities, including Defense Agencies, Defense Medical Facilities Office, Reserve Components, and nonappropriated fund activities. If a DBOF activity is a tenant activity at an installation to be closed, it will identify specific base closure program requirements to its host DoD installation.

6. Allocation of DoD Base Closure Account Funds. The Directorate for Military Construction, Office of the Deputy DoD Comptroller (Program/Budget) shall, upon approval by the Office of Management and Budget of the Apportionment and Reapportionment Schedule (DD Form 1105) for the base closure account, provide a Fund Authorization Document to the Director for Budget and Finance, Washington Headquarters Services (WHS) to fund the Financial Plan as approved. The Director for Budget and Finance, WHS, shall, in accordance with direction received from the Directorate for Military Construction, allocate DoD base closure funds to the Military Departments or Defense Agencies. Upon receipt of the allocation from the WHS, the Military Departments or Defense Agencies shall distribute, in accordance with its normal fund distribution procedures, the base closure funds to the installations responsible for base closure actions. Upon receipt of the fund distribution, the installation shall record the allotment from the DoD base closure account. The installation-level entry to record that allotment is:

Dr 4580 Allotments Received
Cr 4611 Uncommitted/Unobligated Allotments -
Direct Program - Current Period

and

Dr 1013 Funds With Treasury
Cr 3100 Appropriated Capital

Entries to record receipt of a direct program allotment.

7. Use of DoD Base Closure Account Funds. An installation shall implement base closure and realignment actions and administer its allocation of base closure funds in accordance with the approved financial plan. If a project is to be executed that does not appear on the approved financial plan, the prior approval of the Directorate of Military Construction, Office of the Deputy DoD Comptroller (Program/Budget), is required. Expenses that result in a fund outlay and that are incurred against an allotment from a DoD base closure shall be accounted for as, follows:

Dr 4611 Uncommitted/Unobligated Allotments - Direct Program
- Current Period
Cr 4931 Accrued Expenditures - Paid -Direct Program

and

Dr 3100 Appropriated Capital
Cr 5700 Appropriated Capital Used

Dr 6100 (Applicable Operating Expense Account)
Cr 1012 Funds Disbursed

Entries to record outlays of an allotment.

8. Base Closure Account Reporting Requirements. An installation receiving an allotment of DoD Base Closure account funds shall prepare a report on the status of its allotment. The status report shall be transmitted to the entity from which the allotment was received in accordance with the reporting due dates required by that entity.

9. Disposition of Real Property Assets

a. The loss (or gain) from the sale, lease, or other disposal of assets shall be recorded by the activity having financial custody of those assets. The sale, lease, or other disposal action will only be recorded in proprietary accounts of that installation. Any proceeds generated from the sale, lease, or other disposal of assets does not add to, or otherwise affect, the budgetary accounts of that activity. An illustrative accounting entry follows:

Dr 1011 Funds Collected (if any)
Dr 1739 Accumulated Depreciation on Buildings
Dr 1749 Accumulated Depreciation on Other Structures
and Facilities
Dr/Cr 7300 Extraordinary Items
(Debit for Loss/Credit for Gain)
Cr 1730 Buildings
Cr 1740 Other Structures and Facilities

To record extraordinary loss (or gain) resulting from the sale or other disposal of real property assets.

b. Proceeds resulting from the transfer or disposal of property or facilities (including buildings and structures) due to a base closure directed by a Base Closure and Realignment Commission shall be deposited as reimbursements into the DoD Base Closure Account, DoD Base Closure Account of 1990, DoD Overseas Military Facility Investment Account, or Reserve Account as appropriate. Proceeds resulting from transfer or disposal of property or facilities (including buildings and structures) due to a base closure directed by other than a Base Closure and Realignment Commission shall be deposited as reimbursements into the appropriate miscellaneous receipt Treasury account. Examples of transactions involving proceeds resulting from the transfer or disposal of property or facilities include funds derived from temporary leases of Government property and property upon which settlement has occurred and title has been passed to the new owners. "Good faith" deposits or earnest funds should be deposited to the Budget Clearing Account, (Suspense), F3875, until finalization of the sale (settlement) takes place. Upon finalization of the sale (settlement), deposits made to the Budget Clearing Account (Suspense) shall be transferred to the appropriate account as indicated above.

c. A copy of deposit documents, or other notification, shall be provided to the Defense Finance and Accounting Service for all deposits made to a base closure account. The deposit document or other notification shall identify the specific base closure account to which the deposit was made.

d. A Defense Business Operations Fund Activity shall not request reimbursement, nor recover through increases in customer rates, for losses resulting from the disposal or divestiture of capital asset items that have not been fully depreciated at the time they are taken out of service due to base closure action.

10. Withdrawal of Appropriations and Reappropriations

Dr 4611 Uncommitted/Unobligated Allotments
- Direct Program - Current Period
Cr 4580 Allotments Received

Dr 3211.1 Appropriations Available
Cr 1013 Funds With Treasury

Entry to record the withdrawal of appropriated and/or reappropriated capital from activity level.
(This is an activity level entry only.)

Dr 4571 Allotments Issued-Direct Program - Current Period
Cr 4550 Internal Fund Distributions Received

Entry to record the withdrawal of appropriated and/or
reappropriated capital from intermediate level.
(This is an intermediate level entry only.)

Dr 4541 Allocations Issued - Direct Program - Current Period
Cr 4119 Other Appropriations Realized
Cr 4150 Other New Budget Authority
(that is, reappropriation)

Entry to record the withdrawal of appropriated and/or
reappropriated capital from departmental level.
(This is a departmental level entry only.)

11. Accumulated Operating Results, Residual Assets and Liabilities

a. Accumulated Operating Results. A Defense Business Operations Fund activity that is undergoing closure should request reimbursement for its recoverable costs from, as specified in paragraph D.4.; (1) customer accounts for costs attributable to normal day-to-day operations, (2) the account financing the closure for costs attributable to closure activity, and (3) transfer from the operations and maintenance appropriation of the DoD Component responsible for the activity for costs in the year of closure, including prior year losses, that are not associated with a valid work order or are as a result of other than a determination of a Base Closure and Realignment Commission that the activity be closed. All costs (including extraordinary losses), and all reimbursements (including extraordinary gains), flow through Net Operating Results to Accumulated Operating Results. Upon completion of all operations and all closure activity, the Accumulated Operating Results of the closed activity will have either a positive or a negative balance. There are two Accumulated Operating Results accounts -- Account 3311.1, "Cumulative Results of Operations - DBOF," and Account 3311.2, "Cumulative Results of Operations - DBOF - Deferred." The positive or negative balance of Accumulated Operating Results shall be initially recorded to general ledger account 3311.1. If any portion of the balance in general ledger account 3311.1 is deferred for recovery from, or return to, customers in the subsequent fiscal year stabilized rate or standard price development, that deferred amount shall be transferred to general ledger account 3311.2. Entries to general ledger account 3311.2 shall NOT be made unless authorized by the next higher command. Entries to this account should ultimately be traceable to specific direction received from the Office of the Under Secretary of Defense (Comptroller) to defer recovery or return of accumulated operating results. The following illustrates common entries to general ledger account 3311.2:

Dr 3311.2 Cumulative Results of Operations - DBOF - Deferred
Cr 3311.1 Cumulative Results of Operations - DBOF

Entry to record a deferral of a negative accumulated operating results. (This entry must be supported by a specific authorization from the next higher command.)

Dr 3311.1 Cumulative Results of Operations - DBOF
Cr 3311.2 Cumulative Results of Operations - DBOF -
Deferred

Entry to record a deferral of a positive accumulated operating results. (This entry must be supported by a specific authorization from the next higher command.)

When an activity is closed, the positive (i.e., credit) or negative (i.e., debit) amounts in the Accumulated Operating Result Accounts (3311.1 and 3311.2) shall be distributed to either the DBOF business area level, or activity(ies) level as directed by the responsible DoD Component.

b. Residual Assets. Any financial assets (e.g., cash, receivables, and unobligated authority) that remain after the above actions shall remain in the Defense Business Operations Fund and are available to meet the overall requirements of the Fund or other obligational authority requirements as may be authorized.

c. Residual Liabilities. Any financial liabilities (e.g., payables and obligated authority) that remain after the above actions shall remain in the Defense Business Operations Fund.

E. ACTIONS AND RELATED ACCOUNTING PROCEDURES FOR TRANSFER OF FUNCTIONS. The following general actions and procedures shall be followed when transferring all or a portion of the functions from a DBOF activity to another DBOF activity, or to an appropriation funded activity. Specific actions and procedures will usually be necessary to accommodate unique circumstances of the transferring activities.

1. Identify Functions to be Transferred, and the Disposition of any not Transferred. In the case of a partial transfer of functions, specific negotiations should take place between the affected organizations to identify specific functions that are to be transferred and the disposition of functions not transferred. Follow-on negotiations should identify and remedy any initial oversight, and specific directions should be provided once these follow-on actions are complete. All actions taken shall be consistent with the negotiated agreements. Pending final negotiations, all excluded functions will remain with the current organization.

2. Identify and Validate Physical, Financial, and Personnel Resources to be Transferred by the Losing Activity and any Split in Funding Responsibilities Incident to the Transfer. The organizations involved shall identify resources to be transferred incident to the functional transfer. Follow-on actions will identify resources not recognized in the original negotiations, and specific directions shall be provided commensurate with finalized agreements. All actions taken will be consistent with negotiated agreements.

3. Identify Any Interim Funding Method and Intended Duration. If an interim funding method is to be used to fund the transfer, pending resolution of other issues, determine the method and intended duration of the interim funding (funding provided by a locally established order should not exceed 30 days).

4. Validate Outstanding Orders and Dispose of General Ledger Account Balances. Determine validity of outstanding undelivered orders and determine if commodities or services on order remain a valid requirement of either the losing activity or the gaining activity and take actions necessary to cancel unneeded orders. Action must be taken to ensure that valid requirements are funded by the activity having the requirement. The resolution of these questions will assist in the subsequent disposition of general ledger account balances at the losing activity related to the functional transfer.

a. Budgetary Accounts. There should not be an automatic transfer of budgetary account balances from the losing activity to the gaining activity. Where items included in an existing obligation or order are for continuing services or other requirements of the transferred entity, an agreement must be negotiated between the losing and gaining activities. This agreement must specify whether accountability will remain identified to the losing activity, or if documents will be modified to reflect the gaining fund cite and paying office. In instances where accountability remains identified to the losing activity, a reimbursable support agreement will be negotiated, and accounting support will continue to be provided by the losing activity and paid for by the gaining activity. The following actions are needed for the transfer of outstanding commitments, obligations, and unfilled customer orders.

(1) Outstanding Commitments. Outstanding commitments for functions to be transferred from the losing activity should be canceled, but only when managed in coordination with the gaining activity to ensure that the procurement cycle is not interrupted. Concurrent with cancellation at the losing activity, the new commitment shall be entered into the accounting system by the gaining activity, and purchases under the document will reflect the gaining activity as the accountable entity. In those cases where cancellations of an outstanding commitment would unduly interrupt the purchase cycle, a reimbursable order from the gaining activity, citing gaining activity funding, shall be provided to the losing activity.

(2) Undelivered Orders/Outstanding Obligations. Undelivered orders and other outstanding obligations account balances shall not be transferred from the losing activity to the gaining activity without validation. All undelivered orders and other outstanding obligations directly related to functions transferring from the losing activity shall be reviewed, and decisions made on the appropriate disposition for each transaction. Undelivered orders and other outstanding obligations for items or services no longer required shall be canceled, and any termination costs which result from the cancellation shall be the responsibility of the losing activity. If outstanding obligations support a continuing need, that need may be filled through either a modification to the undelivered order or continued funding by the original ordering activity with reimbursement from the new requiring activity.

(3) Unfilled Customer Orders. Unfilled customer order account balances shall not be transferred from the losing activity to the gaining activity without validation. Unfilled customer orders citing current funding which are directly related to functions transferring from the losing activity

shall be reviewed to determine what orders for goods or services remain outstanding, and the activity responsible for providing these goods or services to the customer. If goods or services are to be provided by the gaining activity, reimbursement to the gaining activity may be provided through either an amendment to the unfilled customer order or through funding provided by the losing activity. If an unfilled customer order is amended, the losing activity, along with the gaining activity, must ensure that the customer is advised of this decision. If goods or services are to be provided by the losing activity, the losing activity will continue to bill the customer, and return any remaining unobligated balances to the customer after the order is completed.

b. Proprietary Accounts

(1) Actions and Related Procedures Required For the Transfer of Property. The following actions are required incident to the transfer of property (capital assets) from one DoD entity to another:

(a) Losing and gaining activities shall reach a preliminary agreement as to the specific property to be transferred. Ownership of selected assets, such as equipment, hardware, software, furniture, etc, necessary to the performance of the functions being transferred shall transfer to the gaining activity. Assets required exclusively in support of the function being transferred also shall be transferred to the gaining activity. Ownership of shared assets shall be determined based upon the preponderance of use. Accounting entries to remove capital assets from the accountable records of the losing activity must agree with the transfer of physical assets and support physical and financial accountability for the property transferred to the gaining activity.

(b) Conduct a joint inventory between representatives of the losing and gaining activity and mutually verify the availability and accuracy of fixed assets and related information of property scheduled for transfer. Fixed assets not transferred because of condition or unavailability will be disposed of and removed from the accountable records of the losing activity prior to transfer. After validation of assets to be transferred, a final listing shall be compiled showing all pertinent information for the assets agreed upon for transfer. The following entry will be made on the records of the losing activity to recognize fixed asset losses:

Dr 7210 Losses on Disposition of Assets
Dr 1759 Accumulated Depreciation on Equipment
Cr 1750 Equipment

(c) Losing activities must provide copies of physical custody control records to gaining activities and prepare accountability transfer documents. The losing activity will provide the gaining activity copies of all Property Record Cards (or similar physical custody records) used to maintain physical control of each item included on the final listing of assets to be transferred. Transfer documents will be prepared concurrently to remove asset accountability from the records of the losing activity. A copy of each transfer document will be provided to the gaining activity to support the value of capital asset accountability to be established. The transfer document shall disclose, if known, the original acquisition cost and the accumulated

depreciation for items transferred. If those values are not known, the transfer value shall be, the fairmarket value amount mutually agreed to by the losing and gaining activities. However, if those values are not known, such a transaction shall not create a financial gain or loss for the gaining or losing activity. Each transfer document will identify the losing and gaining activity, by name and Department of Defense Activity Address Code (DODAAC). The following entry will be made on the records of the losing activity to transfer accountability to the gaining activity:

Dr 3231 Transfer-Out to Government Agencies Without
Reimbursement
Dr 1759 Accumulated Depreciation on Equipment
Cr 1750 Equipment

(d) Gaining activities must establish physical custody and control of assets transferred using copies of physical custody control records provided by the losing activities, and prepare accountability acceptance documents.

1. Establish Physical Custody/Accountability Records.

Each gaining activity will prepare new property records (DoD Property Record (DD Form 1342)) for each item of equipment. Computer generation of DoD Property Records is authorized if the data elements are included in the same order as on the printed DD Form 1342. Official property custody records will be maintained by the gaining activity.

2. Notification to Property Control Offices. Specific categories of equipment and plant property are monitored and controlled by offices, other than the installation having ownership and physical custody of the item. Notification will be made to the following control offices consistent with the property control and management requirements of each applicable item:

Notify Defense Industrial Plant Equipment Center (DIPEC), Memphis, TN, for DIPEC controlled equipment items.

Notify Naval Facilities Engineering Command and the Navy Facility Assets Data Base (NFADB) for Navy real property item accountability changes such as buildings, etc.

Notify Military Traffic Management Command for railroad equipment.

Notify Plant Property Accounting Office/Activity and Transportation Equipment Management Center (TEMC) for industrial plant equipment items.

3. Establish Financial Accountability Records. Each gaining activity will receive a copy of all transfer documents from the losing activity to support the value of all capital asset accountability to be established. Each transfer document will identify the losing and gaining activities, both by name and DODAAC. Adequate controls must be established to ensure that proper accountability is maintained for all capital assets transferred to gaining activities. Those controls should provide, at a minimum, assurance that assets transferred and their values are consistent with and/or reconcilable to the joint inventory conducted between representatives of

the losing and gaining activity, copies of transfer documents received from the losing activity, and DoD Property Records (DD Form 1342) prepared by the gaining activity. The following entry will be made on the records of the gaining activity to transfer accountability from the losing activity:

Dr 1750 Equipment
Cr 1759 Accumulated Depreciation on Equipment
Cr 3220 Transfer-In From Others Without
Reimbursement

Specific property items require custody accountability and control, but are not included in the financial records of the activity. Items in this category are those not meeting capitalization criteria, i.e., furniture, fixtures, and office equipment which cost more than \$300 but less than the capitalization threshold; all equipment that is "classified" or "sensitive" which does not meet the capitalization threshold; and all equipment or items that are pilferable in nature and cost over \$100 but less than the capitalization threshold.

(2) Actions and Related Procedures Required For the Transfer of Construction in Progress. Ownership of assets under development, e.g., physical assets, management initiatives or software under development, shall be transferred to the gaining activity where such efforts are directly related to the functions being transferred. The losing activity will credit the Construction In Progress account, and credit the equity account 3231, "Transfers-Out to Government Agencies Without Reimbursement," for the value of work completed to date. Concurrently, the gaining activity will record the same value as a debit to the Construction in Progress account and a credit to the equity account 3220, "Transfers-In from Others Without Reimbursement." Both of the transfer actions should occur in the same accounting period. The gaining activity will record the transaction based on notification by the losing activity or the designated liaison office. The capital budget authority of the gaining Defense Business Operations Fund activity will require appropriate adjustment for assets transferred during construction to ensure authority for the gaining activity to complete the asset.

(3) Actions and Related Procedures Required For the Transfer of Work in Process. Work in process for customers (unfilled customer orders) shall not be transferred from the losing activity to the gaining activity without validation. Unfilled customer orders citing current funding which are directly related to transferring functions shall be reviewed to determine what orders for goods or services remain outstanding, and the activity responsible for providing these goods or services to the customer. If the work in process is to be completed by the gaining activity, reimbursement to the gaining activity may be provided through either an amendment to the unfilled customer order or through funding provided by the losing activity. If an unfilled customer order is amended, the losing activity, along with the gaining activity, must ensure that the customer is advised of this decision. If the work in process is to be completed by the losing activity, the losing activity will continue to bill the customer, and return any remaining unobligated balances to the customer after the order is completed. Transactions outstanding prior to the transfer shall remain on the accounting records of the losing entity until completed, canceled, or reissued as a gaining activity responsibility.

(4) Actions and Related Procedures Required For the Transfer of Operating Materials and Supplies On Hand. The absolute value of operating materials and supplies for which accounting is to be transferred cannot reasonably be validated prior to transfer. Representatives from both the losing and gaining activity will jointly review the most current physical and financial reconciliation records available, and the schedule for future reconciliations. Concurrently, any apparent abnormal financial values, or financial transactions which appear abnormal, will be jointly reviewed and a consensus reached as to the reliability of records being transferred. Statistical sampling or other methods of verification should be used, as appropriate. It is imperative that records of accountability being transferred be as reasonably accurate as possible. Operating materials and supplies accounting transfers will be based upon the mutually validated on hand values of the accountable records of the losing activity. If accountability is to continue to be maintained using existing supply and financial records, the validation requirements detailed above remain the same. The losing activity will record the agreed upon inventory value as follows:

Dr 3231 Transfers Out to Government Agencies Without
Reimbursement
Dr 7300 Extraordinary Items (Loss)
Cr 1511 Operating Materials and Supplies Held for Use
Cr 1512 Operating Materials and Supplies Held in Reserve
for Future Use

The gaining activity will record the agreed upon inventory value as follows:

Dr 1511 Operating Materials and Supplies Held for Use
Dr 1512 Operating Materials and Supplies Held in Reserve
for Future Use
Cr 3220 Transfers In from Others Without
Reimbursement

(5) Actions and Related Procedures Required For the Transfer of Inventory In Transit. Inventory in transit is the value of items moving between a DoD supply activity and a contractor or other government supplier, or moving between storage locations within a DoD Component. Amounts posted to this account are based upon ownership acceptance, or payments made for materiel not yet physically received. Amounts recorded in this account are supported by individual documents evidencing the ownership acceptance or payment prior to receipt. As is the case with the inventory records, it is imperative that records supporting the transfer of accountability for inventory in transit be as accurate as possible. Where practical, each document should be reviewed for validity. Inventory in transit values transferred will be based upon the validated value of documents supporting inventory in transit values. In those instances where transactions are determined to be invalid, action should be initiated to adjust the accountable records of the losing activity. If accountability is to continue to be maintained using existing financial records, the validation requirements detailed above need not be performed. The losing activity will record the agreed upon inventory value as follows:

Dr 3231 Transfers Out to Government Agencies Without
Reimbursement
Dr 7300 Extraordinary Items (Loss)
Cr 1525.1 Inventory in Transit from Procurement

The gaining activity will record the agreed upon inventory value as follows:

Dr 1525.1 Inventory in Transit from Procurement
Cr 3220 Transfers In from Others Without
Reimbursement

(6) Actions and Related Procedures Required For the Transfer of Accounts Receivable. If accountability is to continue to be maintained by the gaining activity through use of existing financial records of the losing activity, the validation requirements detailed below need not be performed. However, if accounts receivable recorded in the records of the losing activity are to be jointly reviewed and validated by representatives of the losing and gaining activities, the accounts receivable values transferred will be based upon the mutually validated accounts receivable values. Action may be taken to terminate collection action and write off the debt when one or more of the following five criteria apply:

(a) The debt is without merit. In these cases, the debt was never owed in the first place and should not have been classified as a debt.

(b) The debt cannot be substantiated. In these cases, the activity does not have or cannot produce the evidence or witnesses necessary to validate a claim and has not been able to obtain the voluntary repayment of the debt.

(c) The costs of further collection action will probably exceed the amount which could be recovered.

(d) The activity is unable to locate the debtor and finds that either (a) there is no security to be liquidated to recover the amount owed, or (b) the statute of limitations has expired and the chances of recovering the debt do not justify retaining the debt as a receivable.

(e) The activity is unable to collect any substantial amount.

Further, debts due from the public that are \$100,000 or more must be referred to the Department of Justice for concurrence in terminating collection action. If the Department of Justice concurs with the decision to terminate collection action on those debts, the debt may be written off. Adjustment amounts will be included on the accountable records of the losing activity.

(7) Actions and Related Procedures Required For the Transfer of Liabilities

(a) Accounts Payable. If accountability is to continue to be maintained by the gaining activity through use of existing financial records of the losing activity, the validation requirements detailed below need not be performed. However, if accounts payable recorded in the records of the losing activity are to be jointly reviewed and validated by representatives of the

losing and gaining activities, the accounts payable values transferred will be based upon the mutually validated accounts payable values. Appropriate action will be taken to adjust all transactions recorded as accounts payable which are determined to be no longer valid. Any adjustment amounts will be included on the accountable records of the losing activity.

(b) Accrued Payroll and Annual Leave Liability. The liability for accrued payroll and annual leave for employees transferring from a revolving fund activity becomes a liability to the gaining activity as of the date of the transfer. This liability will be recorded on the respective records in the appropriate equity and liability accounts. The losing revolving fund activity will provide a listing to identify individuals transferring and confirm the value of the leave liability of those employees. Regardless of the causative event, a revolving fund activity, that loses employees through reorganization to an appropriation - financed activity shall transfer cash equal to the accrued payroll to the gaining appropriated fund activity and cash equal to the accrued annual leave value to the Treasury as miscellaneous receipts. A revolving fund activity that loses employees through reorganization to another revolving fund activity shall transfer cash equal to the accrued payroll and accrued annual leave value to that gaining revolving fund activity. If, however, cash or equivalent assets to finance accrued annual leave were not received by the losing revolving fund activity when employees previously were transferred in, the transfer of funds to miscellaneous receipts, or to the gaining Fund activity, shall be reduced by the amount of annual leave liability originally assumed by the Fund. (NOTE: The employees previously transferred in could have been transferred in years ago. The employees transferring out will likely be another group. It is not intended to match the specific employees, but only to avoid transferring funds for which previous payment had not been made.)

The losing revolving fund activity shall record the following:

Dr 2211 Accrued Payroll - Civilian
Dr 2215 Accrued Payroll - Funded Annual Leave - Civilian
Dr 2221 Accrued Annual Leave - Civilian - Unfunded
Cr 1012.1 Funds Disbursed - Operating - DBOF
Cr 3211.3 Liabilities Assumed (for annual leave)

Entry to transfer accrued payroll and annual leave of a Fund activity.

The gaining activity, to the extent that payment is not received, shall record the following:

Dr 3211.3 Liabilities Assumed
Cr 2211 Accrued Payroll - Civilian
Cr 2221 Accrued Annual Leave - Civilian - Unfunded

Entry to record liability associated with personnel transfers when payment does not accompany the liability transfer.

However, the gaining activity entry to record initial liabilities, to the extent that payment is received is:

Dr 1011.1 Funds Collected - Operating Program - DBOF
Cr 2211 Accrued Payroll - Civilian
Cr 2215 Accrued Payroll - Funded Annual Leave - Civilian

Entry to record liability associated with personnel transfers when payment accompanies the liability transfer.

(8) Actions and Related Procedures Required For the Transfer of Equity. An increase to equity is recognized when an activity operating within the Fund receives an asset which will not require the use of available resources to finance the item. Conversely, a decrease to equity is recognized each time an activity receives a liability (e.g., accounts payable and unfunded annual leave) from another activity for which payment in the form of cash or other assets is not provided. Entries vary depending on what is being transferred. Various situations have been covered in the preceding paragraphs detailing transactions that impact equity.

5. Determine New Fund Citation, and New or Revised Data Structure

a. New Fund Citations. A fund citation must be used on all accounting documents. To permit continued operation of transferred functions by the gaining activity, the gaining activity will ensure that the proper fund code is provided to those installations transferring to its command and that instructions for preparation of requisitions are provided sufficient to ensure billing to the proper accountable activity. The fund citations provided must include the applicable accounting classification code, and must also identify any applicable fund code(s), either system unique, or DoD wide, or both. All obligating documents such as contracts, small purchase actions, travel orders, training requests, and requisitions prepared for purchase of materiel from the military supply system or the General Services Administration shall cite the gaining activity accounting classification code.

b. Department of Defense Activity Address Codes (DODAACs) and/or Unit Identification Codes (UICs). A DODAAC is the DoD equivalent of a Social Security Number. A DODAAC is used to identify a DoD installation (or, in some instances, components thereof) for purposes of mail and communications, shipment of materiel, or billing for assets issued from the DoD military supply system. DODAAC assignments are controlled by each of the DoD Components; however, they are centrally maintained and distributed to the DoD Components by the Defense Automatic Addressing Systems Office to ensure total system visibility. The DODAAC (in Navy terms the Unit Identification Code [UIC]) is required on Military Standard System requisition documents to ensure compatibility with the logistics management systems. These requisition documents become obligating documents and are the basis for creation of other logistics and financial documents. The circumstance of each transfer action may require identification of the transferred or consolidated segment of the losing activity as a new entity. In such cases, new DODAACs will be established and distributed to applicable activity personnel to ensure the proper preparation and subsequent processing of transactions for accounting and reporting.

Concurrently, each transfer will be evaluated to ensure that all Service Code assignments, fund code assignments, routing identifier codes, and all other Military Standard supply and financial systems codings have been established consistent with the transfer status of the new entity.

6. Other Actions Required to Accomplish the Accounting Transfer

a. Validate Reimbursable Agreements and Ensure Funding by Applicable Requiring Entity. Reimbursable agreements may exist between the losing installation and other entities for the provision or receipt of services and other support. It is essential that such reimbursable agreements be identified and that the gaining activity and the providing or receiving entity negotiate Intra-Service Support Agreements (ISAs) or Service Support Agreements (SSAs) to define reimbursable services and support to be provided and received.

b. Payroll. The transfer of payroll processing will normally be accomplished either at the beginning of a pay period or at the beginning of a fiscal year. Whenever payroll transfers occur, an agreement will be negotiated between the activities as to the date to be used for transfer. The losing activity is responsible for the salary and benefits of all transferring employees through the agreed upon transfer date. The losing activity also will be responsible for payment in the form of cash or other assets for any unused compensatory time, and merit pay bonuses earned by transferring employees for the fiscal year.

c. Travel in Process. Travel advances and outstanding travel obligations for travel which has occurred, or is in process, shall remain with the losing activity pending settlement. Only travel for transferring activity personnel begun after the effective date of the transfer will be an obligation of the gaining activity. The losing and gaining activity shall jointly review outstanding travel documents and deobligate those no longer valid. Where temporary duty (TDY) begins before and ends after the effective transfer date, travel documents will contain fund citations (and appropriate estimates) to ensure payment of travel costs commensurate with the duty station of the individual during each of the travel periods. Separate travel documents for each period are recommended. Copies of all related travel documents will be provided to both the losing and gaining activities to ensure proper processing. The losing activity will prepare the travel order, and make appropriate disbursements. Amounts charged to the gaining activity will be processed as a Transaction for Others or other agreed-upon procedures by the losing activity. Losing activities will always obtain authority to cite gaining activity funding on travel orders.

d. Contractor Payments. A contract modification must be sent to contractors, under normal change procedures, for each contract for which the responsibility for contract payment is transferred. This is necessary to advise the contractor of a change in paying office.

e. Internal Control. The gaining activity will develop procedures to control and manage the required accounting and system changes. Account control totals and other internal control mechanisms shall be developed and used to insure that accounting integrity is maintained.

f. Reporting. The gaining activity will, in order to continue the reporting function in an efficient and effective manner, provide specific instructions to new organizational elements transferred to it including points of contact, office symbols and phone numbers.

DEPARTMENT OF DEFENSE
DEFENSE BUSINESS OPERATIONS FUND

CHARTER

1. AUTHORITY

The Defense Business Operations Fund (hereafter, "Fund"), a working capital fund, was established, effective October 1, 1991, under the authority of section 2208 of Title 10, United States Code. Operations of the Funds will be conducted in accordance with applicable Department of Defense policies and regulations. The Treasury Account Symbol authorized by the Department of the Treasury for use by the Fund is 97X4930.

2. BUSINESS OPERATION ACTIVITIES

Department of the Army, Department of the Navy, Department of the Air Force, and Defense Agency activities may be included within the Fund. Each Fund activity, or group of Fund activities, shall be under the management control of a designated agency. The Fund activities and the designated management control agencies are listed in supplemental provisions to this Charter.

3. MISSION

The Fund provides for improved financial management tools for the allocation of resources to support activities through an application of a businesslike buyer/seller approach using revolving fund principles. The Fund should encourage more efficient and effective delivery of support to the operational commander through economical buying and cost conscious decisions. This mission should be achieved through the DBOF Corporate Board process.

4. CUSTOMERS

The Fund provides to the customers authorized products, materials, and services to the Military Departments and the Defense Agencies on a reimbursable basis. The authorized products, materials, and services may be furnished to agencies of other government departments or instrumentalities and to authorized private concerns and other agencies as are authorized by law. The customer has the ability to influence the level, quality and delivery speed of the support required to ensure that the Department's readiness posture is maintained.

5. SUPPLEMENTAL PROVISIONS

Supplemental provisions, by business area, are part of this charter. Supplemental provisions may be added, removed, or revised following review by the Corporate Board. The supplemental provisions shall include, at a minimum, information relative to each business operations activity included within the Fund. The information may include a mission statement for the business operation area, identification of the business operation management command, listing of specific activities included within the business operation area, working capital provided to commence and continue operations under the Fund, and identification of any authorized exceptions to Defense policies and guidance.

6. WORKING CAPITAL

Working capital transferred to each business area on, or after, October 1, 1991, establishes the initial corpus of each business area. The amount of working capital transferred with each business operation area is included in the supplemental provisions to this Charter and permanently defines its initial working capital corpus.

Deputy Secretary of Defense

DEPARTMENT OF DEFENSE
DEFENSE BUSINESS OPERATIONS FUND
SUPPLEMENTAL PROVISIONS TO CHARTER
(TITLE OF BUSINESS AREA)

or

(NAME OF BUSINESS OPERATION ACTIVITY)

1. AUTHORITY

The (NAME OF BUSINESS OPERATIONS FUND BUSINESS AREA OR ACTIVITY), a working capital fund activity, is established, effective (DATE), under the authority of section 2208 of Title 10, United States Code. Operations of the activity will be conducted in accordance with applicable Department of Defense policies and regulations. The Treasury Account Symbol authorized by the Department of the Treasury for use by the (NAME OF FUND ACTIVITY) is 97X4930.xxxx.

2. MISSION

(Provide a brief statement of the mission of the activity.)

3. MANAGEMENT COMMAND

(Provide the name and location of the Management Command and a statement as to whether, and to what extent, the Management Command is funded by the Defense Business Operations Fund.)

4. (NAME OF BUSINESS AREA) ACTIVITY COMPOSITION

(This section applies when the supplemental provisions apply to a DoD Component Business Area consisting of multiple Fund activities. In those instances, provide a listing of each activity included within the DoD Component business area and each activity's location, as follows:)

Activity

Location

(Name of Activity)

(City and State)

5. AUTHORIZED EXCEPTIONS

(Specify any policy exceptions authorized for the business area or any activity included within the business area--if none, so state.)

6. WORKING CAPITAL AND EQUITY

Working capital and equity available to the (NAME OF BUSINESS AREA OR ACTIVITY) as of (DATE) is composed of the following elements:

Add:	Fund Balance With Treasury	\$xxxxxx
Add:	Accounts Receivable (net)	\$xxxxxx
Add:	Work in Process and Inventory for Sale	\$xxxxxx
Less:	Accounts Payable	\$xxxxxx
Equals:	Working Capital	\$xxxxxx
Add:	Fixed Assets	\$xxxxxx
Add:	Other Asets	\$xxxxxx
Add:	Operating Materials and Supplies	\$xxxxxx
Less:	Other Liabilities	\$xxxxxx
Equals:	Equity	\$xxxxxx

CHAPTER 52

BUDGETARY RESOURCES

A. APPROPRIATIONS RECEIVED

1. Purposes of Appropriations. An appropriation is an authorization by an act of Congress that permits agencies to incur obligations and to make payments out of the U.S. Treasury for specified purposes. The Defense Business Operations Fund (DBOF) may receive appropriations for two general purposes--to provide working capital, and to provide financing for specific projects or tasks.

2. Receipt and Allocation of Appropriations. The receipt of an appropriation or reappropriation is recorded at the Departmental level only. The allocation, if any, of the appropriation or reappropriation is recorded at the intermediate and activity level as appropriate. While similarities in accounting for appropriations received for the two general purposes outlined above exist, differences must be accommodated. Basically, the receipt and allocation of appropriations are accounted for in the same way; however, accounting for the use of appropriations may differ.

a. Departmental Level Entries

Dr 4119 Other Appropriations Realized
Cr 4620 Other Funds Available for Commitment/Obligation 1/

Dr 1013 Funds With Treasury
Cr 3211.1 Appropriations Available

Entry to record receipt of an appropriation. The source document for the budgetary account posting is the OMB appropriation apportionment--DD Form 1105, "Apportionment and Reapportionment Schedule." The source document for the proprietary account posting is the Treasury Warrant--TFS Form 6200, "Department of the Treasury Appropriation Warrant." (This is a departmental level entry only.)

Dr 4620 Other Funds Available for Commitment/Obligation 1/
Cr 4541 Allocations Issued - Direct Program - Current
Period

Dr 3211.1 Appropriations Available
Cr 1013 Funds With Treasury

Entry to record obligational authority allocated to intermediate or activity level. (This is a departmental level entry only.)

1/ Apportioned business areas (for example, supply management) shall use GLA 4440, "Revolving Funds Available for Apportionment," rather than GLA 4620, "Other Funds Available for Commitment/Obligation."

b. Intermediate (Command) Level Entries

Dr 4550 Internal Fund Distributions Received
Cr 4561 Unallotted Allocations - Direct Program
- Current Period

Dr 1013 Funds With Treasury
Cr 3211.1 Appropriations Available

Entry to record receipt of obligational authority allocated from departmental level. (This is an intermediate level entry only, for example, the U.S. Transportation Command.)

-Current Period
Cr 4571 Allotments Issued - Direct Program - Current Period

Dr 3211.1 Appropriations Available
Cr 1013 Funds With Treasury

Entry to record obligational authority allocated to activity level. (This is an intermediate level entry only.)

c. Installation (Performing) Level Entries

Dr 4580 Allotments Received
Cr 4611 Uncommitted/Unobligated Allotments
- Direct Program -Current Period

Dr 1013 Funds With Treasury
Cr. 3211.1 Appropriations Available

Entry to record receipt of obligational authority allotted from Departmental or intermediate level. (This is an activity level entry only.)

B. APPROPRIATIONS FOR TRANSPORTATION MOBILIZATION REQUIREMENTS

Because a capability must be maintained by the United States Transportation Command (USTRANSCOM) DBOF Transportation business area to expeditiously respond to requirements to transport personnel, material, or other elements required to satisfy a mobilization condition, direct appropriation funding may be provided to the Air Mobility Command (AMC) and to the Military Traffic Management Command (MTMC) as follows:

1. Air Mobility Command (AMC). Airlift flying hours and associated costs are based on the requirement to maintain the capability of the airlift system, including crew training (and concurrent mobilization) requirement. The airlift system training generated capacity is used by the Department of Defense to move air eligible cargo and passengers. In order to extend air eligibility and increase capacity utilization, rates are generally established to be competitive with commercial airlift carriers. However, due to the mobilization requirement,

the resulting revenue does not cover the full costs of airlift operations. This requirement will be recorded/budgeted as follows:

a. The costs for military personnel will be recorded (at the civilian equivalency rate) in accordance with the policy on Military Personnel Expense in Chapter 63, "Expenses," of this Volume. Military personnel within the Air Mobility Command will be direct funded by the Military Personnel appropriation. Although the cost shall be recorded as a DBOF cost, it shall be recorded so that it is not required to be recovered in customer rates. Accounting policy for military personnel expense is in Chapter 63, "Expenses," of this volume. Financial reporting of military personnel expense is reported on Part V, "Recoverable Operating Results," of the DBOF monthly (AR 1307) Statement of Operations as provided for in Chapter 70 of this volume.

b. The balance of the mobilization requirement costs will be funded through a direct appropriation to the Air Force and will be placed as an order with the DBOF. This will assure that revenue is reflected to offset the costs.

2. Military Traffic Management Command (MTMC). The MTMC shall plan for and maintain a Reserve Industrial Capacity (RIC) to transport personnel resources, material and other elements required to satisfy a mobilization requirement. The costs of RIC will be funded by the Army Operation and Maintenance appropriation. *

C. USE OF AN APPROPRIATION

1. For Working Capital. Appropriations may be provided for working capital purposes such as when the accumulated operating results and/or the cash position is either negative or approaching negative or for other purposes. In those instances, the cash outlays and obligations may have previously occurred and the appropriation may therefore provide financing after the fact. The receipt of the appropriation provides an immediate infusion of cash and is accounted for as illustrated above. However, the use of the appropriation must be accounted for and reflected on accounting records and financial reports. The accounting entries to accomplish those results are:

Dr 3211.1 Appropriations Available
Cr 5700 Appropriated Capital Used

NOTE: GLA 5700, "Appropriated Capital Used," is a revenue account and is closed to GLA 3321, "Net Results of Operations-DBOF."

and
Dr 4611 Uncommitted/Unobligated Allotments
- Direct Program - Current Period
Cr 4614 Uncommitted/Unobligated Allotments
- Reimbursable Program - Current Period

Entry to record, in proprietary accounts, the use of appropriated capital and, in budgetary accounts, the availability for reimbursable program obligations. As a rule, the total amount of the appropriation shall be recognized as used. However, if the amount of the appropriation is in

excess of negative net and accumulated operating results, the amount of the appropriation used shall only be the amount sufficient to bring the total of accumulated operating results and net operating results to a zero dollar (\$-0-) position. In that case, the remainder of the appropriation shall be used to offset subsequent year net operating losses to the extent they occur and the remaining amount of the appropriation is sufficient.

2. For Specific Projects/Tasks. An appropriation may be provided for specific projects or tasks. An example is an appropriation provided to finance costs of the U.S. Transportation Command for emergency or humanitarian transportation costs. Another example is an appropriation provided to finance Defense Commissary Agency operating costs. In these situations, the entity receiving the appropriation must act as BOTH the customer (financing) activity and the performing activity and record entries necessary to account for both. Entries are necessary to record (a) issuance of a reimbursable order from the financing account, (b) receipt of the order in the performing account, and (c) recognition of obligations and expenses in the performing account and, upon completion of the order, (d) recognition of reimbursements earned (revenue) in the performing account, and simultaneously with recognition of reimbursements earned, (e) expenditure of the financing account. The accounting entries to accomplish those results are:

3. Accounting Illustration. Addendum 1, "Accounting Illustration for Use of an Appropriation Received within the Defense Business Operations Fund," provides further guidance, through use of a simplified illustration, on the proprietary accounting entries applicable to the concepts in this section.

D. BUDGETARY RESOURCES

1. Apportionment of Authority. An apportionment is a distribution made by the Office of Management and Budget of amounts available for obligation in an appropriation or fund account. Apportionments generally divide amounts available for obligation by specific time periods (usually quarters), activities, projects, objects, or a combination thereof. The amounts so apportioned limit the amount of obligations that may be incurred. The apportionment process is intended to achieve the most effective and economical use of amounts made available for obligation and to prevent the obligation of amounts available within an appropriation or fund account in a manner that would require deficiency or supplemental appropriations. In this regard obligations may not be incurred in excess of the amount of budget authority apportioned. Obligations may be incurred only upon receipt of obligation authority. However, the apportionment process limits the amount of obligations that may be incurred even though obligation authority would otherwise be available. The reimbursable program of the Defense Business Operations Fund is apportioned. However, it may be apportioned in one of two ways. Those two ways are: (a) automatically apportioned meaning that the total amount of obligation authority available may be obligated upon its becoming available and (b) specifically apportioned meaning that the amount of obligations that may be

incurred is limited to the specified apportioned amount. The accounting entries for each apportionment method is shown below:

a. Automatically Apportioned Reimbursable Program

Dr 4212 Anticipated Reimbursements - Automatic Apportionment
Cr 4518 Unallocated Apportionment - Reserve for
Anticipated Resources - Automatically Apportioned

Entry to record amount of anticipated reimbursements expected to be earned by DBOF activities during the current fiscal year. (This is a departmental level entry only. The automatically apportioned reimbursable program requires no intermediate or activity level entries as the authority to incur obligations is automatic upon receipt of obligation authority.)

Dr 4518 Unallocated Apportionment - Reserve for
Anticipated Resources - Automatically Apportioned
Cr 4212 Anticipated Reimbursements - Automatic
Apportionment

Entry to record amount of anticipated reimbursements realized by DBOF activities during the current fiscal year. (This is a departmental level entry only.)

b. Specifically Apportioned Reimbursable Program

Dr 4211 Anticipated Reimbursements - Specific Apportionment
Cr 4440 Revolving Funds Available for Apportionment

Entry to record a request for apportionment of anticipated reimbursements forwarded to the OMB. The documentation supporting this entry is a DD 1105, "Apportionment and Reapportionment Schedule." (This is a departmental level entry only.)

Dr 4440 Revolving Funds Available for Apportionment
Cr 4514 Unallocated Apportionment - Reimbursable
Program - Current Period

Entry to record receipt of the approved apportionment request. The documentation supporting this entry is an approved DD 1105, "Apportionment and Reapportionment Schedule." (This is a departmental level entry only.)

Dr 4514 Unallocated Apportionment - Reimbursable
Program - Current Period
Cr 4543 Allocations Issued - Reimbursable Program -
Current Period

Entry to record allocations issued. The documentation supporting this entry is an approved allocation document. (This is a departmental level entry only.)

Dr 4550 Internal Fund Distributions Received
Cr 4563 Unallotted Allocations - Reimbursable
Program - Current Period

Entry to record allocations received. The documentation supporting this entry is an approved allocation document. (This is an intermediate level entry only.)

Dr 4563 Unallotted Allocations - Reimbursable Program -
Current Period
Cr 4573 Allotments Issued - Reimbursable Program -
Current Period

Entry to record allotments issued. The documentation supporting this entry is an approved allotment document. (This is an intermediate level entry only.)

Dr 4580 Allotments Received
Cr 4582 Allotted Reimbursable Program - Current Period

Entry to record allotments received. The documentation supporting this entry is an approved allotment document. (This is an activity level entry only.)

2. Customer Orders. Customer orders received are requisitions and other orders accepted for items to be furnished on a reimbursable basis. The amount of budgetary resources available for obligation from customer orders is the sum of:

(1) Orders received from federal government accounts that represent valid obligations of the ordering account, whether or not accompanied by an advance, plus

(2) Orders received from the public, including State and local governments, but only to the extent accompanied by an advance.

Throughout the year, unfilled customer order amounts should be adjusted to the extent that orders are filled, canceled, or new orders received. The accounting entries to record acceptance of customer orders are:

Dr 4581 Automatic Reimbursement Program
Dr 4231 Unfilled Customer Orders - Without Advance -
Automatic Apportionment
or
Dr 4233 Unfilled Customer Orders - With Advance -
Automatic Apportionment
Cr 4221 Customer Orders Accepted - Automatic Apportionment
Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period

Entry to record acceptance of a customer order when the reimbursable program is automatically apportioned.

Dr 4582 Allotted Reimbursable Program - Current Period
Dr 4232 Unfilled Customer Orders- Without Advance -
Specific Apportionment
or
Dr 4234 Unfilled Customer Orders - With Advance -
Specific Apportionment
Cr 4222 Customer Orders Accepted - Specific Apportionment
Cr 4614 Uncommitted/Unobligated Allotments - Reimbursable
Program - Current Period

Entry to record acceptance of a customer order when the reimbursable program is specifically apportioned.

3. Earned Reimbursements. Earned reimbursements are the amount of customer orders that have been filled, provided that in the case of orders from the public, including State and local governments, the amount is limited to the amount of the advance received. Earned reimbursements should not exceed the amount of individual customer orders. The amount of budgetary resources available for obligation from earned reimbursements can be calculated as the sum of:

a. Customer orders from federal government accounts that have been filled but not yet billed;

b. Accounts receivable representing federal government customer orders that have been filled but not collected.

c. Cash received as advances from the public for customer orders that have been filled; and

d. Cash received as reimbursement for federal government customer orders that have been filled.

4. Nonexpenditure Fund Transfers. Nonexpenditure transfers of funds may be received from another appropriation or fund or may be made to another appropriation or fund when appropriate and authorized. Typical budgetary and proprietary accounting entries applicable to transfer of budgetary resources to and from other appropriations and funds are illustrated below.

Transfers Out of Budgetary Resources

Dr 4514 Unallocated Apportionment - Reimbursable Program
(or, if automatically apportioned)
Dr 4212 Anticipated Reimbursements - Automatic Apportionment
Cr 4160 Anticipated Transfers of Current
Fiscal Year Authority

Entry to record an anticipated transfer from a business operations fund to another appropriation or fund.
(This is a departmental level entry only.)

Dr 4160 Anticipated Transfers of Current
Fiscal Year Authority
Cr 4170 Appropriation Transfers

Entry to record an authorized transfer from a business operations fund to another appropriation or fund. Documentation supporting this entry includes SF 1151, "Nonexpenditure Transfer Authorization."
(This is a departmental level entry only.)

Dr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
Cr 4581 Automatic Reimbursement Program

Dr 3211.4 Net Treasury Balance - DBOF
Cr 1013 Funds With Treasury

Entry to record a reduction of unobligated business operation fund resources due to an authorized transfer from a business operations fund to another appropriation or fund.
(This is an activity level entry only.)

Transfers In of Budgetary Resources

Dr 4160 Anticipated Transfers of Current
Fiscal Year Authority
Cr 4517 Unallocated Apportionment - Reserve for other
Anticipated Resources

Entry to record an anticipated transfer from another appropriation or fund to a business operations fund.
(This is a departmental level entry only.)

 Cr 4614 Uncommitted/Unobligated Allotments -
 Reimbursable Program - Current Period

Dr 1013 Funds With Treasury
 Cr 3211.4 Net Treasury Balance - DBOF

Entry to record receipt of obligational authority transfer to
the business operations fund from another appropriation or
fund. (This is an activity level entry only.)

E. WITHDRAWAL OF BUDGETARY RESOURCES

The following illustrate typical budgetary and proprietary accounting entries
applicable to the withdrawal of budgetary resources from the Defense Business
Operations Fund.

Dr 4611 Uncommitted/Unobligated Allotments
 - Direct Program - Current Period
 Cr 4580 Allotments Received

Dr 3211.1 Appropriations Available
 Cr 1013 Funds With Treasury

Entry to record the withdrawal of appropriated and/or
reappropriated Fund capital from activity level. (This is an
activity level entry only.)

Dr 4571 Allotments Issued - Direct Program - Current Period
 Cr 4550 Internal Fund Distributions Received

Entry to record the withdrawal of appropriated and/or
reappropriated Fund capital from intermediate level. (This is
an intermediate level entry only.)

Dr 4541 Allocations Issued - Direct Program - Current Period
 Cr 4119 Other Appropriations Realized

Entry to record the withdrawal of appropriated Fund capital
from departmental level. (This is a departmental level entry
only.)

F. ANTIDEFICIENCY ACT VIOLATIONS

1. Budgetary Resources. A distinction is made between those assets that
constitute a budgetary resource available for obligation and those that do not.
Paragraph C. of this chapter describes assets that are budgetary resources
available for obligation. Other assets, whether of a working capital nature
such as inventories of stock or of a fixed asset nature, are not considered a

budgetary resource. Anticipated reimbursements and anticipated customer orders for the remainder of the fiscal year are not considered a budgetary resource. Such non-budgetary assets, therefore, do not enter into the determination of unobligated balances. However, claims against budgetary resources, such as accounts payable and undelivered orders must enter into the determination of unobligated balances. Obligations for the procurement of inventories, as well as for the acquisition of other assets, must be included in the obligations reported.

2. Apportioned Budgetary Resources. Many of the business areas included within the Defense Business Operations Fund are not subject to apportionment. However, some business areas, such as the Supply Management business area and Defense Commissaries may receive an apportionment. The Supply Management business area may receive a DD Form 1105, "Apportionment and Reapportionment Schedule," for contract authority received for its general operations. Additionally, a DD Form 1105 apportionment may be received for direct appropriations received (for example, appropriations received to procure war reserve materials and operate Defense Commissaries). If an apportionment is received, obligations must be kept within the apportioned limits even though the amount apportioned may be less than the total budgetary resources that would otherwise be available. Failure to do so is a violation of the Antideficiency Act (31 U.S.C. 1517(a)).

3. Segregation of Budgetary Resources. Where an activity receives budgetary resources from more than one source (that is, reimbursable authority from customer orders accepted and direct authority from appropriations), the receiving activity must maintain records which will enable it to control and report separately the transactions relating to each source.

4. Meaning of Violations. The incurring of obligations in excess of available budgetary resources is a violation of the Antideficiency Act and is reportable as such whether or not, in the case of apportioned DBOF business areas, unapportioned budgetary resources or non-budgetary assets are greater than the amount of the deficiency. Additionally, for the Defense Business Operations Fund, disbursements (outlays) in excess of the fund balance (cash) available to the DoD Component's DBOF business area [see Chapter 54, paragraph B.5. of this Volume].

5. Responsibility for Violations. It is the responsibility of each DBOF activity to maintain obligations within the amount of budgetary resources available to that DBOF activity. In the event that available budgetary resources are not sufficient, the DBOF activity shall defer the incurring of obligations until budgetary resources are sufficient to fund them. As a rule, DBOF managers shall not assume that sufficient budgetary resources exist elsewhere within the DBOF to fund obligations rather, managers of a DBOF activity shall request authority to incur obligations from its management command or responsible DoD Component.

6. Types of Violations. Antideficiency Act violations are comprised of events of the following character:

a. Overobligation or overexpenditure of appropriation or fund balance. (Section 1341(a) of Title 31 of the U.S. Code)

b. Contract or obligation in advance of an appropriation. (Section 1341(a) of Title 31 of the U.S. Code)

c. Acceptance of voluntary services. (Section 1342 of Title 31 of the U.S. Code)

d. Overobligation or overexpenditure of an apportionment or reapportionment. (Section 1517(a) of Title 31 of the U.S. Code)

e. Overobligation or overexpenditure of an allotment or suballotment. (Section 1517(a) of Title 31 of the U.S. Code)

f. Overobligation or overexpenditure of a credit limitation. (Section 1517(a) of Title 31 of the U.S. Code)

g. Overobligation or overexpenditure of other administrative subdivisions of funds. (Section 1517(a) of Title 31 of the U.S. Code)

7. Reporting of Violations. Volume 14 of this Regulation specifies the procedures to be followed to report Antideficiency Act violations.

ACCOUNTING ILLUSTRATION
APPROPRIATED CAPITAL USED

A. GENERAL

1. The Defense Business Operations Fund is a revolving fund. As such, it primarily operates through obligational authority and funds provided by the receipt and completion of reimbursable orders. However, the Defense Business Operations Fund can, and does, receive direct appropriations.

2. Revenue and expenses associated with reimbursable orders must be matched and reported on the Statement of Operations (Income Statement). Likewise, an appropriation is a financing source against which expenses must be matched and reported on the Statement of Operations. To accomplish this requirement, general ledger account 5700 has been established. Account 5700, "Appropriated Capital Used," a credit balance account, is a financing source to be matched against current period expenses funded by appropriations. This account is used to record accrued expenses (versus outlays) of appropriated funds and is therefore equal to expenses funded by current and prior year appropriations such as depreciation of fixed assets and consumption of operating materials and supplies purchased in a prior year.

3. Budgetary accounting for appropriations is well-established. However, since proprietary accounting, using general ledger account 5700, is relatively new, the following simplified illustration provides an explanation, in accounting terms, of the accounting necessary to properly recognize revenue and associated costs applicable to an appropriation (vice customer reimbursements).

B. TREASURY APPROPRIATION WARRANT RECEIVED

Dr	1013 Funds with Treasury	\$100,000	
	Cr 3.211.1 Appropriations Available		\$100,000

To record appropriated funds availability upon receipt of TFS Form 6200, "Department of the Treasury Appropriation Warrant." (A warrant is an official document issued pursuant to law by the Secretary of the Treasury that establishes the amount of money authorized to be withdrawn from the central accounts maintained by the Treasury.)

C. APPROPRIATION OUTLAYS

Dr	1511 Operating Materials and Supplies	\$10,000	
	Cr 1012 Funds Disbursed		\$10,000

To record outlay of appropriated funds for supplies.

Dr	1750 Equipment	\$60,000	
	Cr 1012 Funds Disbursed		\$60,000

To record outlay of appropriated funds for an equipment item, (Assume item cost \$60,000 with a 5-year life. The monthly depreciation, assuming no residual value, would therefore be \$1,000.)

D. RECOGNITION OF ACCRUED EXPENSES

Dr 6111 Personnel Compensation - Civilian	\$5, 000	
Cr 2113 Accounts Payable - Public		\$5,000

To record accrued civilian salaries.

Dr 6121 Supplies and Materials	\$1,500	
Cr 1511 Operating Materials and Supplies		\$1,500

To record use of supplies

Dr 6125 Depreciation of Equipment	\$1,000	
Cr 1759 Accumulated Depreciation on Equipment		\$1,000

To record monthly equipment depreciation.

E. REDUCTION OF APPROPRIATED CAPITAL (ACCOUNT 3211.1). The amounts to be recorded in account 5700 shall be equal to the amount of operating and program expenses recorded in the 6100 series of accounts but shall not include any expenses applicable to other revenue accounts. In the above illustration, expenses recorded in the 6100 series of accounts total \$7,500.

The following entry illustrates the use of this account:

Dr 3211.1 Appropriations Available	\$7,500	
Cr 5700 Appropriated Capital Used		\$ 7 , 5 0 0

To record appropriated funds used to finance accrued expenses.
Note that the amount of expenses (\$7,500), not the outlays (\$70,000) are used to determine the amount to be recorded in account 3211.1 and account 5700.

F. CLOSING OF ACCOUNTS AT FISCAL YEAR END

Dr 3321 Net Results of Operations - DBOF	\$7,500	
Cr 6111 Personnel Compensation - Civilian		\$5,000
Cr 6121 Supplies and Materials		\$1,500
Cr 6125 Depreciation of Equipment		\$1,000

Dr 5700 Appropriated Capital Used	\$7,500	
Cr 3321 Net Results of Operations-DBOF		\$7,500

Dr 1012 Funds Disbursed	\$70,000	
Cr 1013 Funds with Treasury		\$70,000

NOTE: DBOF business areas using a job order cost accounting system will normally close its 6100 series of operating expense accounts into the applicable 1580 work in progress account. The work in process account is closed to account 6500, "Cost of Goods Sold," upon job completion. Account 6500 is, in turn, closed to account 3321, "Net Results of Operations DBOF."

G. TRIAL BALANCE

1013	Funds with Treasury	\$30,000	
1511	Operating Materials and Supplies	\$ 8,500	
1750	Equipment	\$60,000	
1759	Accumulated Depreciation on Equipment		\$ 1,000
2113	Accounts Payable - Public		\$ 5,000
3211.1	Appropriations Available		<u>\$92,500</u>
	TOTAL	<u>\$98,500</u>	<u>\$98,500</u>

H. NOTES:

1. Accounting for appropriated funds received must be kept separate from customer reimbursements received so that expenses recognized can be matched with the proper financing source on the Statement of Operations.
2. Within the appropriated fund accounting, the account 1013, "Funds With Treasury" less the amounts recorded in account 1012, "Funds Disbursed," should show the appropriated balance remaining available for outlay.
3. Account 5700, "Appropriated Capital Used," should equal the amount of expenses recorded for that appropriation in the 6100 series of accounts for program/operating expenses.
4. The balance in account 5700 should be reported on the Statement of Operations as a Financing Source on line 1, "Appropriated Capital Used."
5. The accrued expenses in the 6100 series of accounts would be reported on the Statement of Operations on the applicable Expenses line.
6. The total of expenses reported on the applicable Expenses lines of the Statement of Operations should equal exactly the Appropriated Capital Used reported on line 1 of the Statement of Operations.

CHAPTER 53

COST ACCOUNTING STANDARDS

A. REQUIREMENTS OF COST ACCOUNTING SYSTEMS

1. The Defense Business Operations Fund shall have a cost estimating and cost accounting system or, as needed, systems specifically designed for its operations. The cost accounting system may be a job-order cost system, a process cost system or a suitable combination. When warranted for management purposes, a cost accounting system may employ standard cost methods and may utilize engineered performance standards. The cost accounting system shall be integrated with the general accounting system and shall be consistent with the estimating system.

2. The cost accounting system shall be designed to meet the following objectives:

a. Provide measures of cost effectiveness within the activity. This may be accomplished by relating performance costs to standard costs or cost estimates by established cost centers and by end-product with development of appropriate analyses of cost variances.

b. Provide the basis for determination of cost of end-products or services by individual orders. The cost of all end-products and services shall include an equitable portion of all overhead, support, and administrative functions.

c. Provide cost data useful in cost estimating for purposes of establishing fixed prices or rate schedules or for establishing cost estimates for individual orders, and in budgeting and establishment of cost standards.

d. Provide a means of detecting losses in performance of customers' orders through timely identification of costs of performing specific orders or functions and through providing data that may serve as a basis for timely revisions, where applicable, of cost estimates and ceilings under such orders as are performed on a cost reimbursement basis.

e. Provide, to the extent not available elsewhere, performance related cost measurements as required by the DoD in its implementation of requirements resulting from the Government Performance and Reporting Act.

3. The cost estimating system shall provide the following:

a. Performance cost standards for cost control.

b. A sound foundation for establishing fixed prices or rates.

c. A reasonable basis for establishing cost estimates and ceilings for individual orders in light of the specific work order requirements.

4. Cost standards and estimates for performance of operations and functions shall be at a sufficiently conservative level to require significant efforts to meet them. The cost standards and estimates established to measure effectiveness of performance shall be regarded as targets that may be exceeded rather than "limitations" such as allotments under appropriated funds.

5. Cost estimates for end-products or services developed to establish fixed prices, rate schedules, and cost ceilings to the customer shall include allowances for cost variances and contingencies. While the use of allowances for expected cost variances and contingencies is appropriate in estimating costs of end-products and services for the purpose of pricing orders and central planning, they should not be included in standard costs to be used for performance cost control.

6. At any Fund activity in which a standard cost method is used, variances shall be analyzed by responsibility areas to provide indices of efficiency, and to assist management in improving cost control, operating efficiency, and cost estimating. Cost variances shall be separately identified for direct labor, direct material, and overhead. Predetermined cost variance limitations shall be established. Significant cost variances shall be applied to the work order. Minor variances shall be distributed to all other work.

7. Costs shall be recorded separately according to whether they were paid from the Defense Business Operations Fund or were paid by other appropriations or funds. The latter shall be recorded so that the approximate total cost of work or services performed may be determined.

B. COST ACCOUNTING STANDARDS

Public Law 100-679 (41 U.S.C. 422) requires certain contractors and subcontractors to comply with Cost Accounting Standards. Appendix B, "Cost Accounting Preambles and Regulations," to the Federal Acquisition Regulation contains a statement of the Cost Accounting Standards. Additionally, the Cost Accounting Standards are codified in 48 Code of Federal Regulation (CFR), Chapter 99. The Defense Business Operations Fund shall comply with the Cost Accounting Standards where not contradicted by other standards issued by the Under Secretary of Defense (Comptroller) or Statements of Federal Financial Accounting Standards issued by the Office of Management and Budget. Following is a brief explanation of the published Cost Accounting Standards and is not intended to be used as a reference source.

1. Cost Accounting Standard 401 -- Consistency in Estimating Accumulating and Reporting Costs

a. Practices used by a DoD Component activity in estimating costs for proposed reimbursable orders shall be consistent with cost accounting practices it uses in accumulating and reporting actual costs.

b. Conversely, practices used by a DoD Component activity in accumulating and reporting actual costs shall be consistent with practices it uses in estimating costs for proposed reimbursable orders.

c. The grouping of homogeneous costs and estimates prepared for proposed reimbursable order purposes shall not be deemed an inconsistent application of the standard when actual costs are accumulated and reported in greater detail on an actual cost basis during job performance.

2. Cost Accounting Standard 402 -- Consistency in Allocating costs Incurred for the Same Purpose. All costs incurred for the same purpose, in like circumstances, are either direct costs only, indirect costs only, or general and administrative (G&A) costs only with respect to final cost objectives. No final cost objective shall have allocated to it as an indirect or G&A cost any cost, if other costs incurred for the same purpose, in like circumstances, have been included as a direct cost of that or any other final cost objective. Further, no final cost objective shall have allocated to it as a direct cost any cost, if other costs incurred for the same purpose, in like circumstances, have been included in any indirect or G&A cost pool to be allocated to that or any other final cost objective.

3. Cost Accounting Standard 403 -- Allocation of Home Office (Headquarters) Expenses to Segments

a. Headquarters expenses shall be allocated on the basis of the beneficial or causal relationship between supporting and receiving activities. Such expenses, to the maximum extent possible, shall be allocated directly to segments (activities reporting directly to the headquarters office). Expenses not directly allocated, if significant in amount and in relation to total home office expenses, shall be grouped in logical and homogeneous expense pools and allocated as described in CAS 403.

b. Expense Pools. Examples of expense pools listed in CAS 403 include:

(1) Centralized Services. Centralized services consist of specific functions which, but for the existence of a home office, would be performed or acquired by some or all of the segments individually.

(2) Management of Specific Functions within Activities.

(3) Management of Certain Activities or Group of Activities.

c. Residual Expenses. All home office expenses which are not allocable directly or by an expense pool shall be deemed residual expenses. Residual expenses are expenses that are the result of managing the organization as a whole and are not identifiable with specific activities or segments. Residual expenses include functions such as exercising oversight, direction, and control of organizations through policy, program, resource, or Planning, Programming and Budgeting System guidance, or providing technical, administrative, or logistic support essential to an operation. Residual expenses shall be allocated to all segments by means of a base representative of the total activity of such segments. The allocation base should take into account one or both of the two broad areas of management concern, that is, the personnel of the organization and the capital invested in the organization. The residual expenses to be allocated to any segment may be

one of the following, or their arithmetical average, whichever, in absence of specific Under Secretary of Defense (Comptroller) guidance, best distributes residual expenses:

(1) The percentage of the segment's payroll dollars (Accounts 6111 and 6112) to the total payroll dollars of all segments.

(2) Direct labor dollars of the segment to the total direct labor dollars of all segments.

(3) Direct labor hours of the segment to the total direct labor hours of all segments.

(4) The percentage of the average net book value of the sum of the segment's tangible capital assets (1700 and 1800 account series) plus inventories (1500 account series) to the total average net book value of such assets of all segments.

4. Cost Accounting Standard 404 -- Capitalization of Tangible Assets

a. The acquisition cost of tangible capital assets shall be capitalized. Capitalization shall be based upon a written policy that is reasonable and consistently applied.

b. Costs incurred subsequent to the acquisition of a tangible capital asset which result in extending the life of that asset and which meet the criteria for capitalization shall be capitalized. However, costs incurred for repairs and maintenance to a tangible capital asset which either restore the asset to, or maintain it at, its normal or expected service life of production capacity shall be treated as costs of the current period.

5. Cost Accounting Standard 405 -- Accounting for Unallowable Costs.

An unallowable cost is any cost which, under the provisions of any pertinent law, regulation, or contract, cannot be included in prices, cost reimbursements, or settlements. These costs, even though not normally charged as a reimbursable expense, shall nevertheless, if material and when directed by the Under Secretary of Defense (Comptroller), be accounted for as a cost of operations.

6. Cost Accounting Standard 406 -- Cost Accounting Period.

DoD activities shall use the October 1 to September 30 fiscal year as the cost accounting period.

7. Cost Accounting Standard 407 -- Use of Standard Costs for Direct Material and Direct Labor

a. An organization operating a formal cost accounting system may use standard costs for estimating, accumulating, and reporting costs of direct material and direct labor only when all of the following criteria are met:

(1) Both standard and actual costs are entered into the books of account.

(2) Standard costs are Compared to actual costs at the end of each accounting period and a variance calculated.

(3) Standard costs and related variances are appropriately accounted for at the level of the production unit. (For the Department of Defense, the "production unit" is the job-order.)

(4) Practices with respect to the setting and revising of standards, use of standard costs, and disposition of variances are stated in writing and are consistently followed.

b. Disposition of variances shall be in accordance with one of the following subparagraphs:

(1) Variances are allocated to cost objectives (including ending in-process inventory) at least annually.

(2) Variances that are immaterial may be included in appropriate indirect cost pools for allocation to applicable cost objectives.

8. Cost Accounting Standard 408 -- Accounting for Costs of Compensated Personal Absence

a. The costs of compensated personal absence (illness, vacation, holidays, jury duty, military training or other absence for which compensation is paid directly to an employee) shall be assigned to the cost accounting period or periods in which the entitlement was earned.

b. The costs of compensated personal absence for an entire cost accounting period shall be allocated pro-rata on an annual basis among the final cost objectives of that period.

9. Cost Accounting Standard 409 -- Depreciation of Tangible Capital Assets

a. The depreciable cost of a tangible capital asset (or group of assets) shall be assigned to cost accounting periods in accordance with the following criteria:

(1) The depreciable cost of a tangible capital asset shall be its capitalized cost less its estimated residual value.

(2) The estimated service life of a tangible capital asset (or group of assets) shall be used to determine the cost accounting periods to which the depreciable cost will be assigned.

b. The annual depreciation cost of a tangible capital asset (or group of assets) shall be allocated to cost objectives for which it provides service in accordance with the following criteria:

(1) Depreciation costs may be charged as a direct cost only if depreciation costs of all like assets used for similar purposes are charged in the same manner.

(2) Depreciation costs charged to service or general and administration cost centers shall be included in the allocated costs of those centers.

(3) Depreciation costs of capital assets used within a production cost center but which are not charged directly to a cost objective shall be included as an indirect cost of that center.

10. Cost Accounting Standard 410 -- Allocation of Business Unit General and Administrative Expense to Final Cost Objectives. Organizational unit general and administrative (G&A) expenses shall be allocated to final cost objectives based on their beneficial or causal relationship to those objectives. If the organizational unit general and administrative (G&A) expenses benefit two or more segments of the activity, those G&A expenses shall be allocated to each of the segments using a common allocation base. The cost input base used to allocate the G&A expense pool may be (1) total cost input, (2) value-added cost input, or (3) a single-element cost input. The determination of which cost input base best represents the total activity of an activity must be judged on the basis of the circumstances of each activity. That determination shall be made by the comptroller of the activity or, in the case where a group of activities are similarly organized, may be made by the headquarters office of those particular activities.

11. Cost Accounting Standard 411 -- Accounting for Acquisition Cost of Material

a. The Statement of Federal Financial Accounting Standards (SFFAS) Number 3, "Accounting for Inventory and Related Property," is the standard for accounting for the value of operating materials and supplies.

b. The cost, when significant, of operating materials and supplies may be allocated directly to a cost objective to which they directly benefit.

c. The cost of operating materials and supplies which are used solely in performing indirect functions or which are not a significant element of direct production cost, may be allocated to an indirect cost pool.

12. Cost Accounting Standard 412 -- Composition and Measurement of Pension Cost. This standard does not apply to the Defense Business Operations Fund as it is not responsible for accounting for the pension cost of its employees.

13. Cost Accounting Standard 413 -- Adjustment and Allocation of Pension Cost. This standard does not apply to the Defense Business Operations Fund as it is not responsible for accounting for the pension cost of its employees.

14. Cost Accounting Standard 414 -- Cost of Money as an Element of the Cost of Facilities Capital. The cost of capital committed to facilities shall be charged by the Defense Business Operations Fund to non Federal Government customers when authorized by regulations pertaining to those sales. Chapter 26, "Reimbursements," of the DoD Accounting Manual

(DoD 7220.9-M) provides instructions on the computation and application of interest on investment in assets. (Chapter 26 of the DoD Accounting Manual will be incorporated into Part A, chapter 1, "Reimbursements," of this volume.)

15. Cost Accounting Standard 415 -- Accounting for the cost of Deferred Compensation

a. The obligation for the cost of deferred compensation is deemed to have occurred when all of the following conditions have been met.

(1) There is a requirement to make the future payments that cannot be unilaterally avoided.

(3) The amount of the future payment can be measured with reasonable accuracy.

b. If the cost of deferred compensation can be estimated with reasonable accuracy on a group basis, including consideration of probable forfeitures, such estimate may be used rather than separate-computations for each employee.

16. Cost Accounting Standard 416 -- Accounting for Insurance Costs. This standard does not apply to the Defense Business Operations Fund. The Federal Government is self-insured. Insurance type losses, when they occur, are not charged to customers of the Defense Business Operations Fund but are, instead, charged to appropriations made available for that purpose.

17. Cost Accounting Standard 417 -- Cost of Money as an Element of the Cost of Capital Assets Under Construction. The cost of money used to construct a capital asset shall not be capitalized as part of the cost of that asset unless loans were obtained by the Department of Defense specifically for the construction of those assets.

18. Cost Accounting Standard 418 -- Allocation of Direct and Indirect costs

a. An average cost or pre-established rate for labor may be used provided that:

(1) The functions performed are not materially disparate and employees involved are interchangeable with respect to the functions performed.

(2) The functions performed are materially disparate but the employees involved either all work in a single production unit yielding homogeneous outputs, or perform their respective functions as an integral team.

b. Use of pre-established rates for indirect costs.

(1) Pre-established rates, based on either forecasted actual or standard cost, may be used in allocating an indirect cost pool.

(2) Pre-established rates shall reflect the costs and activities anticipated for the cost accounting period. Such pre-established rate shall be reviewed at least annually, and revised as necessary to reflect the anticipated conditions.

19. Cost Accounting Standard 419. There is no cost accounting standard 419.

20. Cost Accounting Standard 420 -- Accounting for Independent Research and Development Costs and Bid and Proposal Costs.

a. Independent research and development costs incurred in a cost accounting period shall not be assigned to any other cost accounting period except as may be permitted pursuant to other provisions of existing laws, regulations and other controlling factors.

b. Bid and proposal costs incurred in a cost accounting period shall not be assigned to any other cost accounting period.

CHAPTER 54

CASE, RECEIVABLES, ADVANCES, AND CASE MANAGEMENT

A. GENERAL ASSET CATEGORIES

1. Entity Assets. Entity assets are those assets which the reporting entity has authority to use in its operations. The authority to use funds in an entity's operations means that entity management has the authority to decide how funds are used, or management is legally obligated to use funds to meet entity obligations.

a. Intragovernmental Entity Assets. Intragovernmental entity assets arise from transactions among federal entities and are claims of a federal entity against other federal entities which, when collected, can be used in the collecting entity's operations. Intragovernmental entity assets include an entity's fund balance with Treasury with which the entity is authorized to make expenditures and pay liabilities, accounts receivable from federal entities that an entity is authorized by law to include in its obligational authority or to offset its expenditures and liabilities upon collection, and advances and prepayments.

b. Governmental Entity Assets. Governmental entity assets are claims of the federal government or an entity (i.e., the Defense Business Operations Fund) of the federal government against nonfederal entities and which, upon collection, can be used in the collecting entity's operations. (The Term "nonfederal entities" encompasses domestic and foreign persons and organizations outside the U.S. Government.) Governmental assets include cash, accounts receivable from nonfederal entities, and advances and prepayments made to nonfederal entities.

2. Non-Entity Assets. Non-entity assets are those assets that are held by an entity but are not available to the entity.

a. Intragovernmental Non-Entity Assets. Intragovernmental non-entity assets are claims of a federal entity against other federal entities which, when collected, cannot be used by the collecting entity. Intragovernmental non-entity assets include an entity's fund balance with Treasury that is maintained in deposit, suspense, and clearing accounts and that are therefore not available to finance the entity's activities.

b. Governmental Non-Entity Assets. Governmental non-entity assets are claims of the federal government or an entity (i.e., the Defense Business Operations Fund) of the federal government against nonfederal entities that, upon collection cannot be used by the collecting entity.

B. FUND BALANCE WITH TREASURY AND CASH

1. GENERAL INFORMATION. Volume 4, "Accounting Policy and Procedures," chapter 2, "Cash," contains general information related to fund balance with treasury and cash.

2. Fund Balance With Treasury. A federal entity's fund balance with the Treasury is the aggregate amount of funds in the entity's accounts with Treasury for which the entity is authorized to make expenditures and pay liabilities. Within the Department of Defense, the fund balance with Treasury is the net total of general ledger accounts 1011, "Funds Collected," 1012, "Funds Disbursed," 1013, "Funds With Treasury," 1014, "Undistributed Collections," and 1015, "Undistributed Disbursements."

a. Fund Balance Increases. The fund balance with Treasury of the Defense Business Operations Fund is primarily increased through the receipt of reimbursements from DoD and other entities. However, it is also increased through the receipt of appropriations, reappropriations, continuing resolutions, appropriation restorations and allocations, and non-expenditure transfer of funds from other entities. The fund balance does not include contract authority or unused authority to borrow. Contract authority merely permits a federal entity to incur certain obligations but does not, in itself, add funds to the agency's accounts with Treasury. (By definition, contract authority is unfunded and must subsequently be funded by an appropriation to liquidate obligations incurred under the contract authority, or by the collection and use of receipts.) Authority to borrow is a statutory authority that permits a federal agency to incur obligations and make payments for specific purposes out of borrowed funds. Authority to borrow adds funds to an agency's accounts with Treasury only after the agency actually uses the authority to borrow a specific amount of funds. Thus, authority to borrow is included in an entity's fund balance with Treasury only to the extent that funds are actually borrowed under the authority.

b. Financial Statement Footnote Requirements for Fund Balance With Treasury. Disclosure should be made to distinguish two categories of funds within the entity's fund balance with Treasury: (1) the obligated balance not yet disbursed and (2) the unobligated balance. The obligated balance not yet disbursed is the amount of funds against which budgetary obligations have been incurred, but disbursements have not been made. The unobligated balance is the amount of funds available to an entity against which no claims have been recorded. Unobligated balances are generally available for specific purposes stipulated by law. Unobligated balances also may include balances in expired accounts that are available only for approved adjustments to prior obligations. Certain unobligated balances may be restricted to future use and are not apportioned for current use. Disclosure should be provided on such restrictions. The amount and cause of any discrepancy between the fund balance with Treasury in general ledger accounts and the fund balance in the Treasury accounts should be explained in footnotes to financial statements. Discrepancies may be due to time lag or due to error. Discrepancies due to error should be corrected when identified.

3. Account Symbol. A Treasury account symbol--97X4930--has been assigned to the Defense Business Operations Fund for the purpose of maintaining fund balances with the Department of the Treasury.

4. Recordation/Reconciliation of Cash Transactions. All cash transactions shall be recorded in the individual activity accounts and shall be reconciled to total monthly cash transactions reported by the departmental finance network.

5. Violations. The cash on hand at the U.S. Treasury account levels must always be sufficient to pay liabilities when due. The responsibility for DBOF cash management is prescribed in paragraph E. of this chapter. Each DoD Component activity group, and/or activity operating within the Defense Business Operations Fund must comply with the Under Secretary of Defense (Comptroller) cash management policy. A transaction that causes a negative balance in the funds with the Treasury account shall be investigated immediately and reported as an apparent violation of the Antideficiency Act as prescribed in DoD Directive 7200.1, "Administrative Control of Appropriations." In accordance with DoD Directive 7200.1, the report of apparent violation will continue to be updated to provide information on the progress of the investigation. Updating of an interim report of apparent violation shall be continued until the investigation discloses that a violation did not occur, or a final report of violation is submitted.

6. Outlays. Gross outlays should be equal to the cumulative amount of disbursements made for the fiscal year to date. Net outlays should be equal to gross outlays less the cumulative amount of collections received for the fiscal year to date.

7. Current Balance. The current balance of funds with Treasury is equal to the amount as of the beginning of the fiscal year plus the cumulative fiscal year to date amounts of collections, appropriations, and transfers in of fund balances with Treasury received minus the cumulative fiscal year to date amounts of withdrawals, transfers out, and disbursements.

8. Cash Accounts. Separate general ledger accounts have been established to account for cash collections and cash disbursements. A collection or disbursement shall be recorded only when documentary evidence supports an increase or decrease to the Treasury account.

a. Cash Collections

(1) Advances Received. A cash advance received shall be recorded as a collection and a liability (account series 2310, "Advances from Others"). The usual entry for the receipt of advances is as follows:

Dr 1011.1 Funds Collected - Operating Program
Cr 2310 Advances from Others

(2) Refunds. A refund received is a reduction of a previous disbursement and shall, therefore, be recorded as a decrease to disbursements (negative disbursement) with an offsetting credit to the appropriate previously recorded refunds receivable account (account 1315, "Refunds Receivable - Government, or account 1316, "Refunds Receivable - Public"). If a refund is received for which a refund receivable was not previously established the offsetting credit should be to the asset or expense account that was originally debited. The usual entry for the receipt of refunds is as follows:

Dr 1011.2 Funds Disbursed - Operating Program
Cr 1315 Refunds Receivable - Government
or, as applicable
Cr 1316 Refunds Receivable - Public

(3) Funds Collected - Operating Program. General ledger account 1011.1, "Funds Collected - Operating Program - DBOF," has been established to record funds collected that are applicable to the operating program. Collections may be due to advances from outside sources, performance of reimbursable work, collection of receivables, sale of assets, and other sources. All cash inflows shall be initially recorded to the general ledger account 1011.1. Periodically, but at least monthly prior to financial statement preparation, the amount applicable to the capital program [see subparagraph B.8.a.(4) that follows] shall be transferred from general ledger account 1011.1, "Funds Collected - Operating Program," to general ledger account 1011.2, "Funds Collected - Capital Program." The usual entry to record a cash collection is as follows:

Dr 1011.1 Funds Collected - Operating Program
Cr 1311 Accounts Receivable - Government - Current

(4) Funds Collected - Capital Program. General ledger account 1011.2, "Funds Collected - Capital Program - DBOF," has been established to record cash inflows applicable to the capital program. As stated in subparagraph B.8.a.(3) above, all cash inflows shall be initially recorded to account 1011.1, "Funds Collected - Operating Program." Periodically, but at least monthly prior to financial statement preparation, the applicable amount shall be transferred from general ledger account 1011.1, "Funds Collected - Operating Program," to general ledger account 1011.2, "Funds Collected - Capital Program." The preferred method to transfer collections to account 1011.2 is on a transaction basis. The transfer, however, may be made on a time basis (daily, weekly, etc.). The transfer must, however, be made at least monthly prior to financial statement preparation. The amount to be transferred to account 1011.2 shall be computed by first determining, at each DBOF activity, the percentage of the stabilized billing rate that is added to fund the capital asset program within that activity's business area. (Stabilized billing rates should, in addition to recovering operating costs, also include a factor to fund the capital asset program. That factor is composed of the expected depreciation expense and, if applicable, any additional capital surcharge. Since stabilized billing rates should not change during the fiscal year, the percentage allocation between the operating and capital program cash collection accounts should not change during the fiscal year.) The resulting ratio is then applied to the monthly change in funds collected at that activity. The percentage is applied to all collections received that fiscal year, even though, for some collections, the revenue was generated in the prior fiscal year. For example, assume that at Activity X the stabilized billing rate is \$100 of which \$5 is to fund the capital asset program. The resulting percentage is therefore 5 percent (\$5 divided by \$100 = 5%). Each dollar of collections results in a \$0.95 (95¢) increase to account 1011.1, "Funds Collected - Operating Program," and a \$0.05 (5¢) increase to account 1011.2, "Funds Collected - Capital Program."

At the illustrative Activity X, the cash collections for this month were \$3.5 million. The usual entry to record a cash collection is as follows:

Dr 1011.1 Funds Collected - Operating Program \$3,500,000
Cr 1311 Accounts Receivable - Government - Current \$3,500,000

Computation of 5 percent of the cash collections for the month yields \$175,000. The entry to transfer \$175,000 between the cash accounts is:

Dr 1011.2 Funds Collected - Capital Program	\$175,000	
Cr 1011.1 Funds Collected - Operating Program		\$175,000

b. Fund Balance Decreases. The fund balance with Treasury of the Defense Business operations Fund is primarily reduced by disbursements made to pay liabilities or to purchase assets, goods, and services and reimbursements to other entities or to the Treasury. It is also reduced by cancellation of expired appropriations, non-expenditure transfers, and sequestration or rescission of appropriations.

(1) Funds Disbursed - Operating Program. General ledger account 1012.1, "Funds Disbursed - Operating Program - DBOF," has been established to record cash outflows that occurred due to activity attributable to the operating program (vice capital program). The usual entry to record a cash disbursement applicable to the operating program is as follows:

Dr 2110 Accounts Payable	
Cr 1012.1 Funds Collected - Operating Program	

(2) Funds Disbursed - Capital Program. General ledger account 1012.2, "Funds Disbursed - Capital Program - DBOF," has been established to record cash outflows that occurred due to activity attributable to the DBOF capital program (vice operating program). The usual entry to record a cash disbursement applicable to the capital program is as follows:

Dr 2110 Accounts Payable	
Cr 1012.2 Funds Collected - Capital Program	

(3) Advances Paid. A cash advance made for an anticipated procurement shall be recorded as a cash disbursement and an asset (account series 1410, "Advances to Others"). The usual entry for the payment of advances is as follows:

Dr 1410 Advances to Others	
Cr 1012.2 Funds Disbursed - Capital Program	

c. Fund Transfers. Fund transfers, as may be directed by the Under Secretary of Defense. (Comptroller), may be made to or from the "Funds With Treasury" account and processed through the U.S. Treasury as an increase or decrease to the appropriate Treasury symbol. Authorized fund transfers among or between Treasury symbols (accounts) shall be accomplished through preparation of a Non-Expenditure Transfer Authorization (Standard Form 1151).

9. Undistributed Collections and Undistributed Disbursements

a. Subsidiary accounts to general ledger account 1014, "Undistributed Collections," and general ledger account 1015, "Undistributed Disbursements," shall be established to account for undistributed cash transactions at the lowest organizational level to which they can be identified. The subsidiary accounts are:

1014.1 Undistributed Collections - DBOF Component Level
 1014.2 Undistributed Collections - DBOF Business Area Level
 1014.3 Undistributed Collections - DBOF Installation Level
 1015.1 Undistributed Disbursements - DBOF Component Level
 1015.2 Undistributed Disbursements - DBOF Business Area Level
 1015.3 Undistributed Disbursements - DBOF Installation Level

b. These subsidiary accounts are used to record collections (1014) or disbursements (1015) which are identified to:

(1) A DoD Component, but not to a business area (GLA 1014.1 and GLA 1015.1),

(2) A business area, but not to an installation (GLA 1014.2 and GLA 1015.2), or

(3) An installation, but not to a specific transaction (GLA 1014.3 and GLA 1015.3).

c. Collections or disbursements should be identified by the finance network to the lowest level to which they can be distributed. That level shall record the undistributed collection or undistributed disbursement and provide any action necessary to research the account for proper disposition.

d. The "Undistributed Collections" account is used to record collections reported by the finance network which cannot be identified to a specific organizational level or transaction. Amounts recorded in this account shall be researched for proper disposition by the lowest organizational level to which they can be distributed or identified. Erroneous collections reported by the finance network shall be reversed. Prior to financial report preparation, the remaining value in this account shall be transferred to Account 1311, "Accounts Receivable - Government - Current or Account 1313, "Accounts Receivable - Public - Current," based upon the best information available as to the proper account. Immediately after financial report preparation, the value previously transferred shall be reversed and reestablished within this account for further research. These latter transactions are necessary to properly reflect the fund balance with the U.S. Treasury as contained in finance network reports. The following illustrate entries to this credit-balance account:

Dr 1011.3 Funds Collected - Undistributed - DBOF
 Cr 1014.# Undistributed Collections
 ("#" represents the specific Undistributed Collections subsidiary account.)

To record amounts shown as collected on finance network reports but not shown on the records of the accounting entity.

Dr 1014.# Undistributed Collections
 Cr 1011.3 Funds Collected - Undistributed - DBOF

To reverse undistributed collections when identified to the proper activity.

Dr 1014.# Undistributed Collections
Cr 1311 Accounts Receivable - Government - Current
Cr 1313 Accounts Receivable - Public - Current

To transfer undistributed collections reported by the finance network prior to financial report preparation.

Dr 1311 Accounts Receivable - Government - Current
Dr 1313 Accounts Receivable - Public - Current
Cr 1014.# Undistributed Collections

To reverse undistributed collections reported by the finance network following financial report preparation.

e. The "Undistributed Disbursements" account is used to record the disbursements reported by the finance network which cannot be identified to a specific organizational level or transaction. Amounts recorded in this account shall be researched for proper disposition by the lowest organizational level to which they can be distributed. Erroneous disbursements reported by the finance network shall be reversed. Prior to financial report preparation, the remaining value in this account shall be transferred to Account 2111, "Accounts Payable - Government - Current" or Account 2113, "Accounts Payable - Public - Current," based upon the best information available as to the proper account. Immediately after financial report preparation, the value previously transferred shall be reversed and reestablished within "Undistributed Disbursements" for further research. These latter transactions are necessary to properly reflect the fund balance with the U.S. Treasury as contained in finance network reports. The following illustrate entries to this debit-balance account:

Dr 1015.# Funds Disbursed - Undistributed - DBOF
Cr 1012.3 Funds Disbursed - Undistributed - DBOF
(" #" represents the specific Undistributed Disbursements subsidiary account.)

To record amounts reported as disbursed on finance network reports, but not shown on the records of the accounting entity.

Dr 1012.3 Funds Disbursed - Undistributed - DBOF
Cr 1015.# Undistributed Disbursements

To reverse undistributed disbursements when identified to the proper activity.

Dr 2111 Accounts Payable - Government - Current
Dr 2113 Accounts Payable - Public - Current
Cr 1015.# Undistributed Disbursements

To transfer undistributed disbursements reported by the finance network prior to financial report preparation.

Dr 1015.# Undistributed Disbursements
Cr 2111 Accounts Payable - Government - Current
Cr 2113 Accounts Payable - Public - Current

To reverse undistributed disbursements reported by the finance network following financial report preparation.

10. Nonexpenditure Fund Transfers To or From the Business Operations Fund. Nonexpenditure transfers of funds may be received from, or may be made to, another appropriation or fund only as supported by an approved SF 1151, "Nonexpenditure Transfer Authorization." Typical budgetary and proprietary accounting entries applicable to transfer of budgetary resources to and from other appropriations and funds are illustrated below.

a. Transfers Out of Budgetary Resources

Dr 4511 Unallocated Apportionment - Direct Program
(or, if automatically apportioned)
Dr 4518 Unallocated Apportionment - Reserve for Anticipated

Entry to record a transfer to the business operations fund
from another appropriation or fund.
(This is an activity level entry only.)

C. RECEIVABLES

1. GENERAL INFORMATION. Volume 4, "Accounting Policy and Procedures," chapter 3, "Receivables," contains general information related to fund receivables.

2. General. Accounts receivable arise from claims to cash or other assets of other entities. Normally, there shall be no amounts in account 1311, "Accounts Receivable - Government - Current," and account 1313, "Accounts Receivable - Public - Current," at the end of a month due to uncollected

progress billings since collections for these billings shall be processed in the same month in which the billings are prepared.

3. Recognition of Receivables. A receivable should be recognized when a federal entity establishes a claim to cash or other assets against other entities, either based on legal provisions, such as a payment due date, or goods or services provided. If the exact amount is unknown, a reasonable estimate should be made.

4. Supporting Records. General ledger receivable balances shall be supported by detailed records of each amount receivable from each customer such as the date recorded, bill number, and date billed.

5. Reconciliations. At least quarterly, the subsidiary records shall be reconciled to the general ledger balances. Differences between subsidiary records and general ledger balances shall be investigated to determine the cause(s) of the difference. Errors found during the investigation shall be corrected.

6. Requirements for Separate Reporting of Receivables

a. Federal and Nonfederal Receivables. Receivables from federal entities are intragovernmental receivables, and should be reported separately from receivables from nonfederal entities. Intragovernmental receivables are claims of a federal entity against other federal entities.

b. Entity versus Non-Entity Receivables. Receivables should be distinguished between entity receivables and non-entity receivables as discussed below.

(1) Entity Receivables. Entity receivables are amounts that a federal entity claims for payment from other federal or nonfederal entities and that the federal entity is authorized by law to include in its obligational authority or to offset its expenditures and liabilities upon collections. (An entity may have receivables that, once collected, can be used as offsets to the entity's budget authority and outlays only when authorized by Congress [offsetting collections]. Before receiving the authorization, however, those receivables are non-entity receivables.)

(2) Non-Entity Receivables. Non-entity receivables are amounts that the entity collects on behalf of the U.S. government or other entities, and the entity is not authorized to spend. Receivables not available to an entity are non-entity assets and should be reported separately from receivables available to the entity.

7. Recognition of Losses Due to Uncollectible Amounts. Losses on receivables should be recognized when it is more likely than not that the receivables will not be totally collected. The phrase "more likely than not" means more than a 50 percent chance of loss occurrence. An allowance for estimated uncollectible amounts should be recognized to reduce the gross amount of receivables to its net realizable value. The allowance for uncollectible amounts should be reestimated on each annual financial reporting date and when information indicates that the latest estimate is no longer correct. Losses due to uncollectible amounts should be measured through a systematic

methodology. The systematic methodology should be based on analysis of both individual accounts and a group of accounts as a whole.

a. Individual Account Analysis. Accounts that represent significant amounts should be individually analyzed to determine the loss allowance. Loss estimation for individual accounts should be based on (1) the debtor's ability to pay, (2) the debtor's payment record and willingness to pay, and (3) the probable recovery of amounts from secondary sources including liens, garnishments, cross collections and other applicable collection tools.

b. Group Analysis. To determine the loss allowance on a group basis, receivables should be separated into groups of homogeneous accounts with similar risk characteristics. The groups should reflect the operating environment. For example, accounts receivable can be grouped by (1) debtor category [business firms, state and local governments, and individuals], (2) reasons that gave rise to the receivables [erroneous payments or trade accounts based on goods and services sold], or (3) geographic regions [foreign countries and domestic regions]. Within a group, receivables can be further stratified by risk characteristics. Examples of risk factors are economic stability, payment history, alternative repayment sources, and aging of the receivables. Statistical estimation by modeling or sampling is one appropriate method for estimating losses on groups of receivables. Statistical estimation should take into consideration factors that are essential for estimating the level of losses, including historical loss experience, recent economic events, current and forecast economic conditions, and inherent risks.

c. Bad Debts. Provisions made for an allowance for loss on refunds, claims, and accounts receivable shall result in a corresponding increase to the GLA 6129, "Bad Debts," expense account. Interest, penalties, and administrative charges shall be assessed on delinquent receivables due from the public and aggressive action taken to collect receivables in accordance with DoD Directive 7045.13, "DoD Credit Management and Debt Collection Program."

d. Writeoff of Uncollectible Receivables. Collection actions for receivables due from the public should be initiated in accordance with the provisions of OMB Circular A-129, "Policies for Federal Credit Programs and Non-Tax Receivables." Additionally, with regard to the write-off of amounts owed by the public, a supplement to the Treasury Financial Manual entitled, "Managing Government Credit," states that an agency will consider a debt uncollectible, terminate collection action, and write off the debt when one or more of the following five criteria apply:

(1) The debt is without merit. In these cases, the debt was never owed in the first place and should not have been classified as a debt.

(2) The debt cannot be substantiated. In these cases, the agency does not have or cannot produce the evidence or witnesses necessary to validate a claim and has not been able to obtain the voluntary repayment of the debt.

(3) The costs of further collection action will probably exceed the amount which could be recovered.

(4) The agency is unable to locate the debtor and finds that either (a) there is no security to be liquidated to recover the amount owed, or

(b) the statute of limitations has expired and the chances of recovering the debt do not justify retaining the debt as a receivable.

(5) The agency is unable to collect any substantial amount.

Further, debts due from the public that are \$100,000 or more must be referred to the Department of Justice for concurrence in terminating collection action. If the Department of Justice concurs with the decision to terminate collection action, the debt may be written off.

While the above criteria is specified by Treasury for writing-off receivables due from the public, similar criteria can be applied to receivables due from other Federal government entities.

8. Accounting Entries for Receivables. DoD receivables normally result from the performance of work authorized by the formal receipt and acceptance of customer reimbursable orders. Customer orders from the public, unless specifically authorized by law, require advance payment. However, receivables may also result from cash overpayments, erroneous payments, unliquidated advances or orders from other Government agencies and the public without payment in advance. When orders are received with advance payment, the performing activity is assured of reimbursement. However, when orders are received without advance payment, reimbursements may not always materialize. The following entries illustrate simplified transactions in the accounts where performance has been accomplished and revenue earned based on the acceptance of a reimbursable order without an advance. The ultimate purpose for this presentation is to demonstrate how both the proprietary and budgetary accounts are affected when uncollectible earned revenue (accounts receivable) must be written off.

- a. To record actual performance and recognition of revenue.

Dr 1310 Accounts Receivable
Cr 5200 Revenue From Services Provided

To establish the receivable and recognize earned revenue from performance. The sources of entry for the above entry are billing documents, interfund billings, job cost reports, receiving reports, payroll records, etc. (The above entry is accompanied by recognition of Reimbursements Earned - Unpaid in the budgetary accounts.)

- b. To record actual collection.

Dr 1011 Funds Collected
Cr 1310 Accounts Receivable

To record receipt of cash payment for reimbursable services. The source of entry for the above entry is cash collection vouchers. (The above entry is accompanied by recognition of Reimbursements Earned - Paid in the budgetary accounts.)

- c. To record allowance for uncollectible receivables.

Dr 6129 Bad Debts

Cr 1319 Allowance for Loss on Accounts Receivable

To record establishment of an allowance for uncollectible receivables. (There is no corresponding budgetary entry for this entry.)

- d. To record writeoff of uncollectible receivables.

Proprietary Account Entries

Dr 1319 Allowance for Loss on Accounts Receivable

Dr 6129 Bad Debts (If the allowance is not sufficient
OR if an allowance had not previously
been established)

Cr 1310 Accounts Receivable

To record actual write-off of bad debt.

Budgetary Account Entries. Whenever a receivable which was earned by performance on a reimbursable order is written off, appropriate entries in the budgetary accounts must be made to ensure that: (1) the uncollected reimbursement earned is liquidated by a charge to the direct program, and (2) the reimbursable program authority, established when the order was accepted, is removed as if it never existed. This requires the complete reversal of all transactions in the reimbursable program accounts relating to performance on the uncollected reimbursable order. The following transactions illustrate, in the budgetary accounts, the receipt of, and performance on, an accepted order without an advance and the subsequent entries required to liquidate the earned but uncollectible reimbursement. (The illustration uses accounts applicable under automatic apportionment of reimbursable authority. Identical entries, except using accounts applicable to a specifically apportioned reimbursable program, should be used when the reimbursable program is specifically apportioned.)

Automatic Apportionment

D. ADVANCES AND PREPAYMENTS

1. General Information. Volume 4, "Accounting Policy and Procedures," chapter 5, "Advances and Prepayments," contains general information related to advances and prepayments.

2. Advances. Advances are cash outlays made by a federal entity to its employees, contractors, other federal entities, or others to cover a part or all of the recipients' anticipated expenses or as advance payments for the cost of goods and services the entity acquires. Subsidiary records of individual advances shall be maintained to support the amount recorded in the general ledger account. The subsidiary record shall include the amount advanced, the date advanced, the applicable contract number, and the disposition of the advance. At least quarterly, the subsidiary record shall be reconciled with the general ledger balance.

3. Prepayments. Prepayments are payments made by a federal entity to cover certain periodic expenses before those expenses are incurred. Typical prepaid expenses are rents paid to a lessor at the beginning of a rental period. (Progress payments, cost reimbursement payments, and payments for partial deliveries made to a contractor or other federal entity based on partial completion of a contract or work request are not advances or prepayments but rather are payments based upon performance.)

4. Advances and prepayments should be recorded as assets. Advances and prepayments are reduced when goods or services are received, contract terms are met, progress is made under a contract, or prepaid expenses expire. A travel advance, for example, should be initially recorded as an asset and should be subsequently reduced when travel expenses are actually incurred. Amounts of advances and prepayments that are subject to refund (for example, a settled travel claim indicating the traveler owes part of the advance to the government) should be transferred to refunds receivable.

5. Advances and prepayments paid out by an entity are assets of the entity. On the other hand, advances and prepayments received by an entity are liabilities of the entity. In financial reports of an entity, advances and prepayments the entity paid out (assets) should not be netted against advances and prepayments that the entity received (liabilities).

6. Advances and prepayments made to federal entities are intragovernmental items and should be accounted for and reported separately from those made to nonfederal entities.

E. CASH MANAGEMENT

1. Definition. Cash management is defined as actions necessary to maintain appropriate levels of cash to meet operational and capital requirements.

2. Purpose. The purpose of the DBOF cash management policy is to maintain the minimum cash balance necessary to meet both operational requirements and to meet disbursement requirements in support of the capital program.

3. Discussion. Cash generated from operations is the primary means of maintaining adequate cash levels within the DBOF. The ability to generate cash is dependent on rates that recover full costs to include prior year losses; accurate work load projections; and meeting established operational goals. Cash shortage correction efforts, when required to meet cash requirements and prevent a violation of the Antideficiency Act, will initially focus on those business areas failing to meet operational plans and, therefore, contributing to cash shortages.

4. Cash Level Criteria. Effective cash management is directly dependent on the availability of accurate and timely data on cash levels and operational results. The present criteria are for cash levels to be maintained at 7 to 10 days of operational cost (\$1.5 to \$2.1 billion) and cash adequate to meet 4 to 6 months of capital disbursements (\$.5 to .9 billion). Improvements in management data as well as changes in operational needs and capital requirements may dictate subsequent changes in the established cash level criteria. The criteria will be reviewed at least annually by the Office of the DoD Deputy Comptroller (Program/Budget) as part of the budget review and documented in a Program Budget Decision.

5. Cash Management Plan. The Director for Revolving Funds, Office of the DoD Deputy Comptroller (Program/Budget), will develop a cash plan to facilitate the cash management process. The plan shall consider collections, disbursements, appropriations, and other cash transactions based on DoD Component estimates. This annual plan will be initially developed during the budget process and will be an integral part of the budget document. In addition, a monthly phasing of the cash plan is required to monitor execution. A monthly execution review should lead to increased management attention to reduce costs, emphasize timely billing and collection of revenue, and timely disbursements. Variances from collection and disbursement plans of \$50 million for each business area will be required to be resolved; and overall cash balances of less than \$1 billion will require immediate action to increase cash levels.

6. Cash Management Responsibilities. The division of responsibilities for cash management are as follows:

a. OFFICE OF THE DEPUTY COMPTROLLER FOR PROGRAM/BUDGET:

(1) Develop overall cash plans based on the impact of operations, appropriations, reprogramming, and other cash transactions.

(2) Monitor overall cash levels.

(3) Establish procedures to correct short-term cash shortages.

b. DEFENSE FINANCE AND ACCOUNTING SERVICE:

(1) Provide timely and accurate reporting of cash levels by Component and business area.

(2) Improve cash reporting with the goal of providing real time cash balances.

(3) work with DoD Components to correct finance and accounting problems and provide components details of DFAS changes to accounting reports.

(4) Insure collections/disbursements are consistent with policy.

(5) Take immediate corrective action to resolve cash shortages by implementing advance billing procedures when the overall cash level falls below \$1 billion and DFAS has determined that the cash shortage was not caused by an anomaly.

c. DOD COMPONENTS:

(1) Establish cash plans based on the approved budget.

(2) Monitor collections and disbursements to assess operational or financial problems.

(3) Take necessary action to correct operational problems contributing to deviations from cash plans.

(4) Ensure revenue recognition, progress billing, and collection policies are followed including the minimization of outstanding receivables.

(5) Work with DFAS to correct finance and accounting problems contributing to deviations from the cash plan.

CHAPTER 55

SUPPLY MANAGEMENT OPERATIONS

A. GENERAL. This chapter prescribes policy and unique accounting requirements applicable to the Supply Management business area.

B. AUTHORIZED CUSTOMERS. A Supply Management business area is authorized to sell items to:

1. A Federal Government-funded activity or an activity empowered to perform a Federal Government-legislated function.

2. A DoD-sponsored nonappropriated fund instrumentality.

3. A State Department-sponsored employee commissary located outside the United States.

4. A foreign government when an authorized contractual relationship has been established.

5. A Federal Government contractor, when the contract specifically provides for the purchase of items by the contractor from the Government.

6. Members of the Armed Forces and other individuals authorized by law when purchasing commissary and clothing items.

7. Other entities, when authorized by duly appointed officials.

C. FINANCING

1. Items for Sale. Resources of the Supply Management business area are available to finance the acquisition and repair of items to be sold to customers.

2. Commissary Support. The costs of providing and managing commissary items, including related operating costs incurred to support the mission of commissaries, shall be identified as commissary operating costs. These costs include, but are not limited to, costs incurred to support commissaries at a headquarters or regional level. Commissary operating costs shall be charged to, and reimbursed by, appropriations made available to the Defense Business Operations Fund for commissaries and the commissary trust revolving fund as prescribed in DoD 1330.17-R, "Armed Services Commissary Regulations."

D. ITEMS TO BE INCLUDED IN THE SUPPLY MANAGEMENT BUSINESS AREA

1. General. Generally, supplies held for the purpose of sale to other DoD Components or activities within a Component and, when authorized by legislation, items procured for sale to members of the Armed Forces and other individuals or organizations may be included in the Supply Management business area. The Under Secretary of Defense (Comptroller) and the Under Secretary of Defense (Acquisition and Technology) may designate an item to be procured by the Supply Management business area and may assign the management responsibility of any item to one DoD Component from another DoD Component.

DoD Components are encouraged to propose such assignments that would result in more efficient management of supplies.

2. Military Exchange Items. Items procured primarily for sale to members of the Armed Forces and other individuals or organizations authorized by legislation may be included in the Supply Management Business Area. These include clothing sold by a military clothing resale activity, and items sold in a ship's store.

3. Military Clothing Items. The Military Exchange systems are authorized to act as agents of the Supply Management Business Area for the purpose of selling military clothing items to members of the Armed Forces. Military clothing requirements in the Department of Defense shall be procured through the Supply Management Business Area and billed at standard prices.

a. The Military Services shall include the costs of new bag items in the military personnel appropriation budget request and new organizational items in the operation and maintenance appropriation budget request. A replacement item shall be deemed a new item for the purposes of this policy if the cost of a replacement item exceeds the cost of the prior item by more than 10 percent in constant dollars.

b. The military personnel appropriation budget and the operation and maintenance appropriation budget should be sufficient to fund the quantity of the initial buy of an item of clothing including the establishment of wholesale inventory levels. New clothing items required prior to receipt of appropriated funds shall be funded in these same accounts by reprogramming action.

c. New clothing items shall be phased in after the stocks of the item being replaced are attrited. The new item shall not be available for issue by the item manager until the stocks of the item being replaced are reduced to less than an amount mutually agreed upon between the item manager and the customer military personnel appropriation account manager. The item manager shall prepare a billing to the applicable military personnel appropriation account in an amount sufficient to cover the cost of the stocks of the item being replaced.

4. Fuel. Fuel requirements in the Department of Defense shall be procured through a Supply Management business area and billed at standard prices to DoD Funded customers. In isolated locations where the Defense Logistics Agency (DLA) has authorized local procurement but the Component Supply Management business area cannot directly procure the fuel, a DoD Supply Management business area shall process billings to the procuring account to stabilize the procurements at DoD standard prices.

5. Forgings and Castings. The availability of forgings, castings, and molds should assist in controlling the contract cost of future procurements of the same items. Therefore, the Supply Management business area may procure forgings and castings or production molds, when appropriate, for Supply Management business area items only after justification to and approval by the item manager. The justification for the procurement of forgings, castings, and molds should include an analysis of the stability of the design and the related technical requirements and anticipated savings from lower production costs on subsequent procurements because of the availability of Government provided

property, reduced leadtimes, and from increased competition. The acquisition cost of forgings, castings, and molds shall be determined for each item at the time of acquisition. Each forging, casting, and mold shall be assigned a stock number and recorded as an asset in an appropriate account. The cost of forgings, castings, and molds that are broken or lost shall be recorded as a current period operating expense. The item manager shall store, protect, and preserve forgings, castings, and molds for use as Government furnished material and Government furnished equipment on subsequent procurements.

6. Drawings and Technical Data. The Supply Management business area shall finance the procurement of drawings and technical data needed in support of design stable stocked items previously or currently procured by the Supply Management business area only after justification to and approval by the item manager. The justification for the procurement of drawings and technical data should include an analysis of the stability of the design and the related technical requirements for the item and anticipated savings from increased competition, improved quality standards, or increased capability to evaluate the usefulness of existing items in the supply system. The costs of the drawings and technical data for Supply Management business area items are normally included in the costs of operations (not materiel costs) for DoD Supply Management business areas and recovered in the standard price.

7. Spares. The Supply Management business areas will acquire initial and replenishment spares consistent with the materiel support date. Initial spares are spare and repair parts supporting newly fielded weapons systems during initial period of operation until the supply system can support the demand generated by the systems. Replenishment spares are those spare and repair parts required to resupply initial stockage.

a. Reparables. As defined in DoD 4140.1-R, "DoD Materiel Management Regulation," a reparable item is an item of supply subject to economical repair and for which the repair (at either depot or field level) is considered in satisfying computed requirements at any inventory level. Supply Management Business Areas are authorized to finance the transportation, acquisition, overhaul, progressive maintenance, renovation, rework, repair, manufacture, reclamation, alteration, and/or software support of reparable items.

E. INVENTORY GENERAL LEDGER ACCOUNTS

1. Authorized Inventory General Ledger Accounts. Inventory and related property accounts authorized for use at Defense Business Operations Fund activities are listed in chapter 7 of Volume 1, "General Financial Management Information, Systems, and Requirement," of this Regulation. Certain inventory accounts are authorized for use only in the Supply Management business area and Defense Commissary Agency. The inventory accounts authorized for use only in the Supply Management business area and Defense Commissary Agency are listed below. If one of the below listed accounts is not descriptive of a recurring and significant inventory event that affects the value of inventory at standard price, then an additional holding gain/loss subaccount(s) should be requested to be established for that purpose. Such requests should be forwarded to the Director for Accounting Policy, Office of the Deputy Under Secretary of Defense (Comptroller/Financial Management).

- 1520 Inventory, Met
 - 1521 Inventory Held for Sale
 - 1521.1 Inventory in Transit from Procurement
 - 1521.2 Inventory in Transit from DoD Entities
 - 1522 Inventory Held for Future Sale
 - 1523 Inventory Held for Repair
 - 1523.1 Exchange (DLR) Inventory in Transit
 - 1524 Inventory - Excess, Obsolete, and Beyond Repair
 - 1529 Inventory - Allowance
 - 1529.1 Allowance for Holding Gain/Loss - Inventory Held for Sale
 - 1529.1A Realization of Holding Gains/Losses
 - 1529.1B Purchases at Standard Price
 - 1529.1C Purchases at Cost
 - 1529.1D Materiel Returns at Standard Price
 - 1529.1E Materiel Returns - Credit Given
 - 1529.1F Materiel Returns Without Credit Given
 - 1529.1G Standard Price Changes-Gain
 - 1529.1H Accounting Adjustments-Gain
 - 1529.1J Assembly/Disassembly-Gain
 - 1529.1K Physical Inventory Adjustments-Gain
 - 1529.1L Incoming Shipments-Gain
 - 1529.1M Completed Inventory Repairs
 - 1529.1N Receipts of Materiel Without Charge
 - 1529.1P Other-Gain
 - 1529.1Q Latest Acquisition Cost Adjustment
 - 1529.1R Standard Price Changes-Loss
 - 1529.1S Accounting Adjustments-Loss
 - 1529.1T Assembly/Disassembly-Loss
 - 1529.1U Physical Inventory Adjustments-Loss
 - 1529.1V Incoming Shipments-Loss
 - 1529.1W Shrinkage and Other Adjustments-Loss
 - 1529.1X Actual Repair Costs
 - 1529.1Y Issues Without Reimbursement
 - 1529.1Z Other-Loss
 - 1529.2 Allowance for Holding Gain/Loss - Inventory Held for Future Sale
 - 1529.3 Allowance for Repair Costs
 - 1529.3A Estimated Repair Costs
 - 1529.3B Estimated Exchange Costs
 - 1573 War Reserve/Mobilization Stock
 - 1579.2 Allowance for Holding Gain/Loss - War Reserve/Mobilization Stock

2. Reconciliations. At least quarterly, line item accountability records shall be reconciled to balances recorded in the general ledger inventory accounts. Differences between line item accountability records and general ledger balances shall be investigated to determine the cause(s) of the difference. Reconciliations may be required more frequently to identify the cause(s) of the difference(s). Errors found during the investigation shall be corrected. Addendum 1, "Assessment of Inventory Amounts," included with this chapter provides further reconciliation guidance.

3. Adjustments for Physical Counts. Physical counts of inventories shall be taken in accordance with the procedures prescribed in DoD 4140.1-R, "DoD Materiel Management Regulation." In accordance with the procedures outlined in DoD 4140.1-R, the general ledger shall be adjusted for differences between the general ledger balances and the physical count.

4. Inventory Gains, Losses and Adjustments. Separate accounts shall be maintained to identify transactions that result in inventory gains, losses and adjustments. The accounts to be used in the Supply Operations business area are listed below. The use of subsidiary accounts as needed is optional.

7191 Inventory Gains

7291 Inventory Losses or Adjustments

7291.1 Shrinkage Losses

7291.2 Excess/Obsolescence/Spoilage Loss

7291.3 Other Inventory Losses

F. CAPITALIZED INVENTORY

1. Transfers-In Without Reimbursement. On hand and on order inventories of supplies financed by other appropriations and funds shall be recorded as contributed capital as required by 10 U.S.C. 2208 when the Supply Management business area undertakes management responsibility for the items. Bills for inventories on order at the time of the transfer shall be paid by the appropriation or fund ordering the item. This is appropriate since the appropriation or fund ordering the item was funded through the budget process to procure the item. As provided in 10 U.S.C. 2208, credits may not be made by a Supply Management business area to an appropriation or fund for capitalized inventories. However, stock withdrawal authorizations may be approved as provided in paragraph G.3. below. Capitalized inventory items shall be recorded as follows:

Dr 1521 Inventory Held for Sale	\$10,000	
Cr 1529.1N Receipts of Materiel Without Charge		\$10,000

Entry to record receipt of inventory items totaling \$10,000 provided from another appropriation or fund without reimbursement to that appropriation or fund. Documentation supporting this entry includes journal vouchers and receiving reports.

2. Transfers of Reimbursable Procurements. The Supply Management business area may record a liability for an item transferred from a non-DBOF account only when the item is undelivered at the time of the transfer and the obligation for the item on the books of the organization from which the item was transferred resulted from a reimbursable order from a customer. The liability recorded in the supply management records shall be liquidated by a payment to the transferring appropriation or fund based upon a payment to the Supply Management business area by the customer. The Supply Management business area shall record a liability for inventories transferred as follows:

Dr 1521 Inventory Held for Sale	\$10,000
Cr 2111 Accounts Payable - Government - Current	\$8,000
Cr 1529.1N Receipts of Materiel Without charge	\$2,000

Entry to record receipt of inventory items totaling \$10,000 for which reimbursement of \$8,000 will be provided. The difference in amount between the reimbursement amount and the inventory value is recorded to account 1529.1L. Documentation supporting this entry includes a customer order or requisition.

3. Stock Withdrawal Authorizations. When items are transferred from an appropriated account to a DBOF Supply Management activity, circumstances may exist in which sufficient funds are not available for the donating activity to subsequently purchase those items from the DBOF activity when needed. In such situations, the Under Secretary of Defense (Comptroller) may be requested to approve an authorization for issues without reimbursement. The request for a stock withdrawal authorization shall identify the amount of items capitalized from the customer's appropriation or fund and the estimated amount of the transferred items required by the customer until funds can be provided through the budget process. An approved stock withdrawal authorization permits the DBOF activity to issue items to the specified customer without reimbursement up to the authorized limit for a fiscal year. Once the limit has been reached, or the fiscal year has passed, issues shall be on a reimbursable basis. Stock withdrawal authorizations may not be recorded as a liability. An issue under a stock withdrawal authorization shall be recorded as follows:

Dr 3231 Transfers-Out to Government Agencies Without Reimbursement
Dr 1529.1A Realization of Holding Gains/Losses
Cr 1521 Inventory Held for Sale

Documentation supporting this entry includes material release orders and shipping documents.

4. Logistical Management Transfers. Logistical management transfers result from changes in the funding appropriation for an item. If the Under Secretary of Defense (Comptroller) and the Under Secretary of Defense (Acquisition and Technology) designate a logistical management transfer of item(s) from the supply management business area to an appropriation (see paragraph E.) or from an appropriation to the supply management business area, an increase or a decrease to inventory for a nonreimbursable transfer shall be recorded at the value of the item being transferred. A transfer-in of an item, once operations have commenced, will be recorded as in a., below. Items transferred-out shall be recorded as in b., below.

- a. Entry to record a logistical management transfer in.
Documentation supporting this entry includes material receipts and catalog data.

Dr 1521 Inventory held for Sale
Cr 1529.1L Incoming Shipments-Gain

- b. Entry to record a logistical management transfer out. Documentation supporting this entry includes material release orders, shipping documents, and catalog data.

Dr 3231 Transfers-Out to Government Agencies Without Reimbursement

Dr 1529.1A Realization of Holding Gains/Losses

Cr 1521 Inventory Held for Sale

5. Accounting for Customer Returns. Customer returns may constitute a significant impact on current period revenue and inventory holding gains for the DoD Supply Management business area.

a. Returns Without Credit. The value of customer returns for which credit is not granted shall be recorded as an inventory gain rather than a transfer without reimbursement. For example, see below.

Dr 1521.2 Inventory in Transit from DoD Entities \$1,000

Cr 1529.1F Materiel Returns Without Credit Given \$1,000

Entry to record customer returns without credit prior to its receipt.

Dr 1521 Inventory Held for Sale \$1,000

Cr 1521.2 Inventory in Transit from DoD Entities \$1,000

Entry to record receipt of inventory in transit. The documentation supporting this entry includes receiving reports and evidence. of inspection of returned items.

b. Returns With Credit. The value of customer returns for which credit is granted shall be accounted for as a decrease to current period revenues. For example, see below.

Dr 1521.2 Inventory in Transit from DoD Entities \$1,000

Cr 1529.1D Materiel Returns at Standard Price \$200

Dr 1529.1E Materiel Returns - Credit Given \$ 800

Cr 1311 Accounts Receivable - Government - Current \$800

Entry to record customer returns with credit prior to its receipt. (The above illustration demonstrates the return of a \$1,000 inventory item for which \$800 credit is granted.)

Dr 1521 Inventory Held for Sale \$1,000

Cr 1521.2 Inventory in Transit from DoD Entities \$1,000

Entry to record receipt of inventory in transit. The documentation supporting this entry includes receiving reports and evidence of inspection of returned items.

6. Transfers to Reutilization and Marketing (R&M). The loss, if any, on items declared excess, obsolete, or beyond repair is taken by the stockage point holding that item when the determination is made. [NOTE: The words "beyond

repair," in the context of this general ledger account, means damaged inventory that is not economical to repair.] After recordation of the loss, transfers of excess, obsolete or beyond repair items to a Defense Reutilization and Marketing Office (DRMO) shall, be accounted for as follows:

- a. Dr 7291.2 Excess/Obsolescence/Spoilage Loss
Cr 1524 Inventory - Excess, Obsolete, and Beyond Repair

Stockage point entry to record transfers to a DRMO.
The documentation supporting this entry includes material release orders and shipping documents. The value recorded in account 1524 is the estimated net realizable value of the excess, obsolete, or beyond repair item and not its standard price or latest acquisition cost. (See Addendum 2, Paras B.9/C.3.)

- b. Dr 1765 Property Awaiting Disposal
Cr 7193 Other Miscellaneous Gains

DRMO Entry to record transfers from a stockage point. The documentation supporting this entry includes material release orders and shipping documents. The value recorded in account 1765 should be the net realizable value.

G. FINANCIAL STATEMENT INVENTORY CATEGORIES

1. General. Inventory is tangible personal property, titled to the government, that is on hand or intransit (e.g., accepted at origin from a vendor, or moving between DoD activities) and is held for sale, future sale, repair, or pending transfer to disposal. The Supply Management business area and Defense Commissary Agency are the only Defense Business Operations Fund business areas that should hold inventory. Except for excess, obsolete, and unserviceable inventory, inventory shall be valued using the latest acquisition cost method. The following are not inventory:

- a. Items purchased by depot maintenance activities to be consumed in the process of repair and by other activities to be consumed in the course of operations shall be recorded and reported as "Operating Materials and Supplies," (Account Series 1510) versus "Inventory," (Account Series 1520) "Operating Materials and Supplies" shall be valued and reported at historical cost.

- b. Inventory excludes some other assets held for sale, such as (1) stockpile materials (including war reserve materiel), (2) seized and forfeited property, (3) foreclosed property, and (4) goods held under price support and stabilization programs. These items may be sold; the purpose, however, of acquiring them is not to provide a product or a service for a fee.

2. Recognition. Inventory shall be recognized when title passes to the purchasing entity or when the goods are delivered to the acquiring entity, whichever occurs first. Inventory expense shall be recognized upon a sale and the value of those goods shall be removed from inventory. Delivery or constructive delivery shall be based on the terms of the contract or other agreement regarding shipping and/or delivery.

3. Inventory Classifications. There are five general classifications of inventory -- Inventory Held for Sale; Inventory Held for Future Sale; Excess, Obsolete, and Beyond Repair Inventory; Inventory Held for Repair; and Inventory in Transit. A description of those five categories follow:

a. Inventory Held for Sale. This category of inventory includes most supply system materiel in issuable condition.

b. Inventory Held for Future Sale. This category will be used to report the value of stocks not expected to be consumed until after the completion of the budget year. That is, economic retention stocks, contingency retention stocks and potential reutilization/disposal stocks. (War reserve materiel is reported as stockpile materials, not inventory.)

c. Excess, Obsolete, and Beyond Repair Inventory. This is a single category composed of three elements. However, it is not necessary or expected that a separate record be kept of each element. The elements of this inventory category are provided solely for information and not for subaccount purposes. The elements of this category are:

(1) Excess inventory consists of items that are determined to be beyond economic and contingency retention stock levels and, as a result, reported as potential reutilization/disposal materiel. Until such materiel is actually declared excess and dropped from inventory, it shall be reported as "Inventory - Excess, Obsolete, and Beyond Repair."

(2) Obsolete inventory is inventory that is no longer needed due to changes in technology, laws, customs, or operations.

(3) Beyond repair inventory excludes unserviceable items but, instead, consists of items that are not expected to survive repair after technical evaluation at a maintenance activity and damaged inventory that is not economical to repair.

d. Inventory Held for Repair. These are inventory items that are not in issuable condition (but not beyond economic repair) and are awaiting repair before they are eligible for sale. A reparable item is an item of supply subject to economical repair and for which the repair (at either depot or field level) is considered in satisfying computed requirements at any inventory level. A depot level reparable item is one that is designated for repair at the depot level or that is designated for repair below the depot level, but if repair cannot be accomplished at that level, will have its unserviceable carcass either forwarded to the depot for repair or condemnation, or reported to its inventory control point (ICP) for disposition. A field level reparable item is one that is normally repaired below the depot level of maintenance and for which condemnation authority can be exercised below the depot level of maintenance.

e. Inventory In Transit. These are inventory items in transit from commercial and government suppliers. Account 1521.1, "Inventory In Transit from Procurement," and account 1521.2, "Inventory in Transit from DoD Entities," are used to record from whom the inventory is in transit. These accounts shall be used to record the initial acceptance of inventory items when title has passed

but the items have not been received and accepted into inventory. The following illustrate the most common entries to this account:

Dr 1521.1 Inventory In Transit from Procurement	\$10,000	
Cr 1529.1C Purchases at Cost		\$2,000
Cr 2113 Accounts Payable - Public - Current		\$8,000

Entry to record the value of inventory in transit from procurement for which the standard price is \$10,000 and the invoice cost is \$8,000.

Dr 1521.2 Inventory In Transit from DoD Entities	\$10,000	
Cr 1529.1E Materiel Returns - Credit Given		\$2,000
Cr 1311 Accounts Receivable - Government - Current		\$8,000

Entry to record the value of inventory in transit that is being returned by customers for credit.

Dr 1523.1 Exchange (DLR) Inventory in Transit	\$ 5,000	
Dr 1311 Accounts Receivable-Government-Current	\$ 3,000	
Cr 5101 Revenue from Goods Sold - DBOF		\$5,000
Cr 1529.3 Allowance for Repair Costs		\$3,000

Entry to record sale of inventory and the associated cost of the goods sold when a reparable item is exchanged for a ready for issue inventory item.

Dr 1521 Inventory Held For Sale	\$20,000	
Cr 1521.1 Inventory-In Transit from Procurement		\$10,000
Cr 1521.2 Inventory-In Transit from DoD Entities		\$10,000
Dr 1523 Inventory Held for Repair	\$ 5,000	
Cr 1523.1 Exchange (DLR) Inventory in Transit		\$ 5,000

Entries to record receipt of inventory in transit.

4. Relationship of General Ledger Inventory Accounts to Logistic Stratification Level and Supply Condition Codes. Inventory recorded in financial records should be identifiable to inventory recorded in logistic records and vice versa. To provide for such identification, stratification levels and supply condition codes are identified in subparagraph G.4.c. below to the financial inventory classifications. While supply system inventory reports within the logistics area are sometimes prepared more often, they are currently required only semiannually. However, financial inventory is reported monthly. Therefore, in order to report the value of inventory monthly, percentages must be derived from the last available stratification and perpetuated on a monthly basis until a new stratification is received.

a. Stratification Levels. Stratification is the process of applying the quantity of an individual item against the requirements for the same item in a prescribed priority and time sequence. The stratification levels are defined in DoD 4140.1-R, "DoD Materiel Management Regulation." The stratification levels currently in use within the Department of Defense are

- (1) Approved Acquisition Objective,
- (2) Economic Retention Stock,
- (3) Contingency Retention Stock and
- (4) Potential Reutilization/Disposal Materiel.

b. Supply Condition Codes. Supply condition codes classify materiel in terms of readiness for issue and use or identify action underway to change the status of materiel. Supply condition codes currently in use within the Department of Defense are defined in DoD 4000.25-2-M, "Military Standard Transaction Reporting and Accounting Procedures." Those supply condition codes are:

- (1) Code A - Serviceable (Issuable Without Qualification).
- (2) Code B - Serviceable (Issuable With Qualification).
- (3) Code C - Serviceable (Priority Issue).
- (4) Code D - Serviceable (Test/Modification).
- (5) Code E - Unserviceable (Limited Restoration).
- (6) Code F - Unserviceable (Reparable).
- (7) Code G - Unserviceable (Incomplete).
- (8) Code H - Unserviceable (Condemned).
- (9) Code I - NOT ASSIGNED.
- (10) Code J - Suspended (In Stock).
- (11) Code K - Suspended (Returns).
- (12) Code L - Suspended (Litigation).
- (13) Code M - Suspended (In Work).
- (14) Code N - Suspended (Ammunition Suitable for Emergency Combat Use Only).
- (15) Code O - NOT ASSIGNED.
- (16) Code P - Unserviceable (Reclamation).
- (17) Code Q - Suspended (Quality Deficient Exhibit).
- (18) Code R - Suspended (Reclaimed Items, Awaiting Condition Determination).
- (19) Code S - Unserviceable (Scrap).
- (20) Codes T-Z - NOT ASSIGNED.

c. Relationship of Logistic Categories to Accounting Classifications for Inventory. The following table shows the relationship of logistic supply categories to general ledger inventory accounts.

H. FINANCIAL STATEMENT VALUATION OF INVENTORY ITEMS

1. General. Within the Department of, Defense, inventory is reported on financial statements at its latest acquisition cost. Additionally, an allowance amount for unrealized gains and losses is also reported so that the net of the inventory at its latest acquisition cost less the allowance amount for unrealized gains and losses will yield an approximation of historical (actual) cost.

2. Latest Acquisition Cost. DoD inventory is normally an asset of the Supply and Commissary resale systems only. Except for excess, obsolete, and beyond economical repair inventory, inventory shall be valued using the latest acquisition cost method. The latest acquisition cost method provides that the last representative invoice price (i.e., the specific item's cost used in setting the current year stabilized standard price) shall be applied to all like

General Ledger Account	Stratification Level	Supply Condition Codes	
1521 Inventory Held For Sale	(1) Approved Acquisition Objective (AAO)	A	Issuable Without Qualification
		B	Issuable With Qualification
		C	Priority Issue
		D	Test/Modification
1522 Inventory Held For Future Sale	(1) Economic Retention Stock (2) Contingency Retention Stock	A	Issuable Without Qualification
		B	Issuable With Qualification
		C	Priority Issue
		D	Test/Modification
		E	Limited Restoration
		J	Suspended (In Stock)
		K	Suspended (Returns)
		L	Suspended (Litigation)
1523 Inventory Held for Repair	(1) Approved Acquisition Objective (AAO) (2) Economic Retention Stock (3) Contingency Retention Stock	N	Suspended (Ammunition Suitable for Emergency Combat Work Only)
		F	Reparable
		G	Incomplete
		M	Suspended (In Work)
		Q	Suspended (Quality Deficient Exhibits)
		R	Suspended (Reclaimed Items, Awaiting Condition Determination)
1524 Inventory - Excess, Obsolete, or Beyond Repair	(1) Approved Acquisition Objective (AAO) (2) Economic Retention Stock (3) Contingency Retention Stock	H	Condemned
		P	Reclamation
		S	Scrap
		
	(4) Potential Reutilization Stock	Condition Codes A - S	
1573 War Reserve/Mobilization Stock	(1) Part of Approved Acquisition Objective (AAO)	(Condition Codes do not distinguish War Reserve/Mobilization items from inventory items.)	

units held including units acquired through donation, non monetary exchange, return from end use or reutilization. For Commissary resale items and all other

items, including those obtained through local purchase and items not held in revolving funds, price changes based on latest invoice shall be posted during the first posting cycle after receipt of invoice. For price-stabilized items in the supply system price changes based on latest invoice shall be posted annually, unless other posting cycle is approved by the Under Secretary of Defense (Comptroller).

3. Inventory Values for Financial Statement Presentation. Inventory is reported on DoD financial statements at its latest acquisition cost less the allowance for unrealized gains and losses so that the net of the inventory will yield an approximation of historical (actual) cost.

a. Inventory Held for Sale and Inventory Held for Future Sale. Within the Department of Defense, inventory held for sale and inventory held for future sale shall be valued at its latest acquisition cost. For financial statement presentation, DBOF supply management business areas maintaining inventory values at standard [selling] price must adjust the inventory values at standard [selling] price to latest acquisition cost by removing operating cost recovery amounts and, if applicable, the prior year inflation amount from both the inventory at standard price value and the allowance for holding gain and loss account. Addendum 2, paragraph B.10., of this chapter provides an example of the month end adjustment process.

b. Inventory Held for Repair. Inventory held for repair shall be reported on DoD inventory reports and financial statements as described above. General ledger account 1529.3A, "Estimated Repair Costs," has been established to record, on an aggregate basis, the average cost to repair items that require repair. General ledger account 1529.3B, "Estimated Exchange Costs," has been established to record an estimate of operating costs to accept and process exchange items and includes carcass attrition (washouts) and transportation costs. When repairs are completed, the actual cost of repairs shall be charged to general ledger account 1529.1X, "Actual Repair Costs." Paragraph N.4. of this chapter illustrates this accounting process.

c. Excess, Obsolete, and Beyond Repair Inventory. Excess, obsolete, and beyond repair inventory shall be valued at its expected net realizable value. "Net realizable value" is the current salvage rate, expressed as a percentage of latest acquisition cost, as that rate is reported by the Defense Reutilization and Marketing Service (DRMS). The difference between the value of the inventory before identification as excess, obsolete, and beyond repair and its expected net realizable value after such identification shall be recognized as a loss (or gain) in current period operations. Any subsequent adjustments to its net realizable value shall be also recognized as a loss (or gain) in the period in which such adjustment occurs. [NOTE: Materiel transferred to the DRMS, whether from the supply system, other DBOF, or non-DBOF activities, non appropriated fund operations, or other agencies of the federal government, will be reported by the DRMS, not as inventory, but as other personal property (general ledger account 1765, "Property Awaiting Disposal") and valued by the DRMS at the current salvage rate as specified in this paragraph.]

d. Inventory in Transit. Inventory in transit from commercial vendors, general ledger account 1521.1, "Inventory in Transit from Procurement," shall be recorded at the value of material in transit based upon amounts paid or to be paid. Inventory in transit from another DoD stockage point, general

ledger account 1521.2, "Inventory in Transit from DoD Entities," shall be recorded at latest acquisition cost {e.g., standard price). Depot level reparable (i.e., carcasses) provided in exchange for serviceable items shall be recorded in general ledger account 1523.1, "Exchange (DLR) Inventory in Transit," at the same value (i.e., standard price) of a serviceable item. However, an allowance for repairs contra-asset account shall also be established to record the estimated cost of the repair and the surcharge associated with the exchanged item. The net of the DLR in transit amount and its allowance account shall equal the value of the carcass (see paragraph N.4. for an illustration of this process).

e. Valuation Illustration. As noted above, for financial statement presentation, DBOF supply management business areas maintaining inventory values at standard [selling] price must adjust the inventory values at standard [selling] price to latest acquisition cost. Addendum 2, paragraph B.10., of this chapter provides an example of the month end adjustment process. Basically, the procedure to revalue inventory to its latest acquisition cost is to deduct the operating cost recovery amount and, if applicable, the prior year inflation amount from both the inventory at standard price value and the allowance for holding gain and loss account. This procedure should be applied only to the inventory financial classifications of "Inventory Held for Sale," "Inventory Held for Future Sale," and "Inventory Held for Repair." Inventory reported as "Inventory - Excess, Obsolete, and Beyond Repair," should be recorded at its net realizable value and therefore does not have an allowance account associated with it. As an illustration, assume that the operating cost recovery percentage for all financial inventory categories was equal to 15 percent of the standard price. In that case, the following would result (accounting entries are illustrated in Addendum 2, paragraph B.10.):

	Inventory at Standard <u>Price</u>		Less <u>Surcharge</u>		Inventory at Latest Acquisition <u>Cost</u>
Inventory Held for Sale	\$17,850	-	\$2,675	=	\$15,175
Less: Allowance	<u>\$ 4,177</u>	-	\$2,675	=	<u>\$ 1,502</u>
Equals: Actual Cost	\$13,673				\$13,673
Inventory Held for Future Sale	\$ -0-				
Less: Allowance	<u>\$ -0-</u>				
Equals: Actual Cost	\$ -0-				
Inventory Held for Repair	\$ 5,250	-	\$1,050	=	\$ 4,200
Less: Allowance	<u>\$ 2,700</u>	-	\$1,050	=	<u>\$ 1,650</u>
Equals: Actual Cost	\$ 2,550				\$ 2,550
Inventory-Excess, Obsolete, and Beyond Repair	\$ 70				\$ 70
Less: Allowance	<u>N/A</u>				<u>N/A</u>
Equals: Realizable Value	\$ 2,550				\$ 70
Total Inventory	\$23,170	-	\$3,725	=	\$19,445
Less: Total Allowance	<u>\$ 6,877</u>	-	\$3,725	=	<u>\$ 3,152</u>
Equals: Cost (Value)	\$16,293				\$16,293

4. Holding Gains and Losses. Holding gains and losses, as reported on financial statements, are the difference between the latest acquisition cost of inventory and the historical (actual) cost of that inventory. Holding gains and losses result, in part, from changes in the value of inventory due to increases or decreases in the latest acquisition cost between the beginning of a reporting period and the end of the reporting period. Holding gains and losses are reported without operating cost recovery factors that may be added to items in inventory to determine standard (sales) price.

a. Unrealized Holding Gains and Losses. "Unrealized" refers to any gain or loss associated with inventory still held by the entity. Unrealized holding gains and losses pertain to the holding gains and losses associated with the inventory on hand during the reporting period that has not been sold or otherwise left the stocking point. Unrealized gains and losses are recorded in an allowance for unrealized holding gains/losses account. That account is a contra-asset account and is reported on the Statement of Financial Condition as an offset to the reported inventory valued at latest acquisition cost. The ending balance of the allowance for unrealized holding gains/losses shall be the cumulative difference between the historical cost, based on estimated or actual valuation, and the latest acquisition cost of ending inventory. The net of inventory at its latest acquisition cost less the amount of unrealized holding gains or losses results in an approximation of historical cost.

b. Realized Holding Gains and Losses. Realized holding gains and losses pertain to the holding gains and losses associated with inventory that has been sold, recapitalized, or otherwise disposed of during the reporting period. When a sale or other inventory transaction occurs, the previously recorded gain (or loss) in the allowance for unrealized gain/loss account is reduced thereby becoming realized as part of the cost of goods sold on the Statement of Operations.

5. Illustrative Accounting Entries for Inventory Transactions. Currently, the Military Departments and the Defense Logistics Agency account for inventory in a method different from each other. Even though the method of accounting is different, each method should yield the same inventory values for reporting on the Statement of Financial Condition and the costs of goods sold reported on the Statement of Operations. Addendum 2, "Accounting for Inventories when Using Standard Price Practices," of this chapter provides an illustration of inventory accounting for use by the Military Departments. Addendum 3, "Accounting for Inventories when Using Latest Acquisition Cost Practices," of this chapter provides an illustration of inventory accounting for use by the Defense Logistics Agency.

6. Year-End Closing/Adjusting Entry For Allowance Account. Annually, accounts subsidiary to an allowance account shall be closed to the parent account. The following accounting entries are appropriate.

a. Allowance for Holding Gain/Loss - Inventory Held for Sale. At fiscal yearend, after preparation of financial statements, the following closing entry shall be made. The purpose of the closing entry is to accumulate the net of all holding gains and holding losses so that the subsidiary accounts may start the new fiscal year with a zero (\$-0-) balance.

Dr 1529.1B Purchases at Standard Price
 Dr 1529.1D Materiel Returns at Standard Price
 Dr 1529.1F Materiel Returns Without Credit Given
 Dr 1529.1G Standard Price Changes-Gain
 Dr 1529.1H Accounting Adjustments-Gain
 Dr 1529.1J Assembly/Disassembly-Gain
 Dr 1529.1K Physical Inventory Adjustments-Gain
 Dr 1529.1L Incoming Shipments-Gain
 Dr 1529.1M Completed Inventory Repairs
 Dr 1529.1N Receipts of Materiel Without Charge
 Dr 1529.1P Other-Gain
 Dr 1529.1Q Latest Acquisition Cost Adjustment
 Cr 1529.1 Allowance for Holding Gain/Loss - Inventory Held for Sale

Dr 1529.1 Allowance for Holding Gain/Loss - Inventory Held for Sale
 Cr 1529.1A Realization of Holding Gains/Losses
 Cr 1529.1E Materiel Returns - Credit Given
 Cr 1529.1C Purchases at Cost
 Cr 1529.1R Standard Price Changes-Loss
 Cr 1529.1S Accounting Adjustments-Loss
 Cr 1529.1T Assembly/Disassembly-Loss
 Cr 1529.1U Physical Inventory Adjustments-Loss
 Cr 1529.1V Incoming Shipments-Loss
 Cr 1529.1W Shrinkage and Other Adjustments-Loss
 Cr 1529.1X Actual Repair Costs
 Cr 1529.1Y Issues Without Reimbursement
 Cr 1529.1Z Other-Loss

b. Allowance for Holding Gain/Loss - Inventory Held for Future Sale.

General ledger account 1529.2, "Allowance for Holding Gain/Loss - Inventory Held for Future Sale," has no subsidiary accounts. Therefore, there are no fiscal yearend closing or adjusting entries necessary.

c. Allowance for Repairs. No fiscal yearend closing or adjusting entry is necessary as the general ledger subsidiary accounts. 1529.3A, "Estimated Repair Costs," and 1529.3A, "Estimated Exchange costs," are relieved (debited) upon completion of repairs as follows:

Dr 1529.3A Estimated Repair Cost
 Dr 1529.3B Estimated Exchange Cost
 Cr 1529.1M Completed Inventory Repairs

I. PRICING OF INVENTORY ITEMS

1. Introduction. Policies and procedures to be used in the development of prices for Supply Management Business Area items are contained in volume 2, "Budget Formulation and Execution," of the DoD Financial Management Regulation, DoD 7000.14-R.

2. Standard Price. As a general rule, each cataloged item with a national stock number assigned which is managed by a DoD Inventory Control Point shall have a standard price for sales to all authorized customers, except as may be authorized elsewhere in this chapter. Components shall establish product prices at the lowest practical item level in order to promote cost

visibility/management and to motivate cost effective customer/supplier behavior. At a minimum prices should be established by Federal Supply Class (FSC) or other comparable level at which specific cost allocations can be made. Product pricing levels above the FSC must be approved by the Office of the Under Secretary of Defense (Comptroller). The standard sales price of each item shall be determined in advance of the execution year to allow for publication before the price is effective. The standard sales price becomes effective for billing purposes on the first day of the fiscal year. A standard price will not be changed during the fiscal year without the prior approval of the Office of the Under Secretary of Defense (Comptroller) except as provided for in paragraph I.5. of this chapter. However, the dollar amount of unfilled customer orders accepted at the previous fiscal year's standard price shall be adjusted (upon notification to the customer) to reflect the latest standard price when notice of the price change is received. Normally all recurring local procurements shall be cataloged and assigned a local standard price including any retail level cost recovery element except when the volume of local procurements of an item does not justify the assignment of a local standard price. In those cases, a local purchase of such a nonstandard item shall be priced based upon procurement cost plus any retail level cost recovery element.

a. Acquisition Cost. The most current cost of a representative procurement is the basis for establishing a standard price for an item. Acquisition cost may be calculated by dividing the most current cost amounts by the sum of their quantities. For items without a procurement history, an acquisition cost may be estimated based upon current manufacturer's price listings or market price quotations. The acquisition cost of an item procured by means of a multiyear contract may include up front costs such as setup costs that will not be incurred in future years. In those situations, the setup cost should be prorated over the total planned volume of items to be purchased under the contract.

b. Cost Recovery Elements for Wholesale-Managed Items. A cost recovery element (previously, and inaccurately, termed "surcharge") shall be included in the standard sales price of an item including direct deliveries from contractors, commercial items, nonstandard items, manufacturer's part numbered items, and other items without a standard price. Cost recovery shall consist of elements for operating costs including prior year gains and losses, transportation, inventory expenses, inventory maintenance, price stabilization, repair costs including attrition, and local cost recovery elements. Individual item prices will be established by including the cost recovery elements, by percentage or fixed amount, with the acquisition cost of the item. A percentage allocation of cost recovery elements to individual items should be used for those items for which the cost recovery elements vary closely with the acquisition cost of the item. A fixed amount should be used for those items for which the cost recovery elements do not closely vary with the acquisition cost. Proposed cost recovery elements shall be developed by wholesale division, inventory control point, or major material category as appropriate and submitted to the Office of the Under Secretary of Defense (Comptroller) for approval. The purpose of the cost recovery elements are to balance total revenues with total net operating costs, plus or minus changes in levels of assets, such as inventory or cash. Total net operating costs shall not include requirements funded by appropriations, such as war reserve appropriated amounts. The cost recovery elements shall encompass:

(1) Supply Operations Support Costs. The costs of operating wholesale inventory control points and wholesale supply depots shall be financed by the Supply Management business area. Such costs include civilian labor and benefits, military labor, supplies, purchased services, and other costs exclusive of costs, such as transportation and inventory maintenance, that are recouped by other cost recovery elements. The costs of performing equivalent functions at the retail (installation/area supply support) level shall not be included in the surcharge assessed by the wholesale activities.

(2) Centralized Command and Service Costs. The costs incurred by separate activities and functions that exist primarily to benefit the mission of a wholesale inventory control point and/or a wholesale supply depot. Mission support cost pools shall be established that identify costs incurred by activities and functions that directly provide benefits to wholesale inventory control points, and wholesale supply depots. These cost pools will include all costs (civilian labor and benefits, supplies, purchased services, and other costs) incurred in functions such as line management (command and control), staff management (policy functions), centralized service functions (e.g., procurement, accounting, personnel, ADP, etc). The portion of such overhead cost pools that directly benefit the Supply Management business area mission shall be allocated to, and reimbursed by, the Supply Management business area. The allocation shall be based upon the relationship of the cost of the benefits provided to the Supply Management business area to the cost for all activities or functions.

(3) Depreciation. Cost of depreciation on capital equipment and other applicable assets.

(4) Capital Surcharge. An element added, when needed, to fund the increment, if any, in excess of depreciation expense recovery that is necessary to finance the approved capital investment program.

(5) Shipping and Transportation. The term "shipping and transportation" includes costs for packing, crating, handling, transportation, and, where appropriate, port loading, and unloading. Items may be shipped from a stocking point (issues) or to a stocking point (returns).

(a) Inventory Issues. Costs to be included are transportation costs for items issued by the Supply Management Business Area. To the extent that first destination transportation is not included in the acquisition cost, an estimate of the cost shall be included in this element. Second destination transportation costs should be based on the assumption of lowest cost, generally surface transportation, delivery as adjusted by projected changes in the budget year. Second destination transportation costs financed by a Supply Management Business Area generally include only transportation within the continental United States (CONUS) and between overseas locations. An additional transportation charge shall be assessed for expedited delivery and delivery outside CONUS based on destination, e.g., Europe, Far East, Near East. For commissary items, the cost of transportation of items shipped to commissaries in Alaska and Hawaii shall be included in the price charged to the commissary and recovered by a special transportation cost recovery element included in the price charged to Alaska and Hawaii commissary customers.

(b) Customer Returned Items With and Without Credit. Costs to be included are Shipping and transportation costs only for items approved by an item manager for return from DoD customers to the Supply Management business area. The Supply Management business area shall reimburse transportation and other shipping costs only for items approved by an item manager for return from customers. Shipping and transportation cost for items that have not been approved by an item manager for return from customers shall not be paid by the Supply Management business area.

(c) Depot Level Reparable Exchange Carcasses. Costs to be included are shipping and transportation costs for the return of reparable exchange carcasses from customers. As a result of including a cost recovery factor into finance shipping and transportation costs for returns of carcasses from customers, the customer will not be charged separately for carcass returns.

(d) Lateral Redistribution. Costs to be included are shipping and transportation costs for lateral distributions of stock when directed by an item manager. When a shipment is made at the direction of an Integrated Materiel Manager (IMM), the supplying (issuing) activity shall be reimbursed by the IMM for the costs of packing, crating, handling, and transportation to move that materiel.

(6) Inventory Expenses. Normal inventory expenses to be included in this cost recovery element are the net of losses and gains from incoming and outgoing shipments, physical inventory adjustments, inventory losses as a result of shrinkage, theft, deterioration, damage contamination, defective items if not reimbursed by supplier, obsolescence, and adjustments to reconcile internal records. Obsolescence consists of the current replacement cost of new or modified items required to replace items no longer needed due to changes in technology, laws, customs, or operations (for example, modification or replacement of a weapon system or commodity). Extraordinary losses such as those due to armed hostilities, riot, or significant damage due to fire, flood, earthquake, storms, or other abnormal events are not normal inventory losses and should not be included in the cost recovery element for inventory expenses. Appropriations should be sought from Congress to fund extraordinary losses.

(7) Inventory Maintenance. The inventory maintenance cost recovery element finances the acquisition of inventories which are required over and above demand replacement (excluding mobilization requirements which are financed by appropriations) to maintain the level of material support at the currently approved position. The cost recovery element for inventory maintenance should be the net impact (increases and decreases) of changes to inventory levels anticipated during the period. In a declining force structure environment, the need for an inventory maintenance cost recovery element is not anticipated.

(8) Economic Adjustments. The economic adjustment element is designed to compensate for inflation or deflation, that is expected to occur on procurements during the period of time that the prices are in effect; adjust for prior year gains or losses; maintain the approved level of Funds with Treasury; and provide consistency with the budget for DoD customers. The Under Secretary of Defense (Comptroller) issues annual inflation guidance based on

the Administration's economic assumptions. Adjustments to product prices contained in the annual budget submissions and supporting congressional justification materials shall be based on that inflation guidance.

(9) Carcass Attrition (Washouts and Losses). Activities that manage maintenance and repair missions on an exchange carcass basis incur replacement cost for carcass washouts and losses. Carcass washouts (sometimes termed "condemnations") are carcasses that, during the initial inspection, are determined to be repairable but during the repair process are determined to be unrepairable and are also determined to require replacement. If the carcass is determined to be unrepairable because of customer cannibalization or other malicious damage caused by the customer, the customer shall be charged the difference between the exchange price and the current standard price and this cost shall not be included in the surcharge element. The second unique repairable cost to be included in this special cost recovery element is the replacement cost for carcasses lost, for example, in transit to the customer or to the supply system. Lost carcasses shall be investigated and necessary internal controls strengthened as required by DoD 7200.10-M, "Department of Defense Accounting and Reporting for Government Property Lost, Damaged, or Destroyed."

(10) Retail Losses. A cost recovery element to compensate for losses experienced at the retail supply activity level shall be included as a credit (reduction) in standard prices charged to retail activities. However, prices charged to customers of retail activities and commissaries shall not reflect this discount.

c. Cost Recovery Elements for Retail-Managed Items. A cost recovery element used by a retail level supply activity;

(1) Will include inventory (material) expenses. Inventory expenses applicable to the retail-managed items are the net impact of gains and losses at the retail level, obsolescence, and shelf-life deterioration.

(2) May include a special local cost recovery element, when approved by the Office of the Under Secretary of Defense (Comptroller), added to the cost of locally purchased items.

3. Foreign Military and Private Party Sales. As prescribed in Volume 15, "Security Assistance Policy and Procedures, of this Regulation, the selling price of Defense Business Operations Fund items to Foreign Military Sales customers shall be the current Defense Business Operations Fund price for that item.

4. Lateral Redistribution of Stock. An item manager may direct a lower stockage level to issue stock when the total cost of such action is lower or when the item manager does not have stock available to meet a requisition's response time and the lower level does--such action is termed "lateral redistribution." As provided in DoD 4140.1-R, "DoD Materiel Management Regulation," billing procedures associated with lateral redistributions directed by an item manager will ensure an issuing activity is reimbursed for both the standard price of the material and the standard packing, crating, handling, and transportation costs associated with a redistribution. The item

manager will bill the requesting activity for the standard price of the material and reimburse the issuing activity for the standard price of the material and the standard packing, crating, handling, and transportation costs.

5. Authorized Reductions of Standard Prices. DoD Components shall set product prices on an annual basis. Those prices cannot be changed during a fiscal year without justification to, and prior written approval of, the Office of the Under Secretary of Defense (Comptroller). The only exceptions to the requirement for prior approval from the Office of the Under Secretary of Defense (Comptroller) are:

- a. subsistence items sold to a commissary may be changed on a procurement lot basis;
- b. subsistence items sold for troop issue purposes may be changed on a monthly basis;
- c. clothing items required for a mandatory clothing bag may be changed when a related change occurs in the clothing allowance for military personnel.
- d. unit of issue changes;
- e. first time buys;
- f. price challenges or breakouts;
- g. discounted product prices (see Paragraph I.6.);
- h. customer requested product changes: and
- i. seasonal price variations for materiel normally bought for direct vendor delivery.

6. Discount Pricing. As a general rule, all product prices must reflect the full cost of the product and the related management activity. However, discount pricing is permitted under the following conditions:

- a. Prior approval of the Director for Revolving Funds, Office of the Under Secretary of Defense (Comptroller) for an item for which a Component desires to charge the customer a discounted price. The request to discount an item price should be accompanied with an analysis of the cost (profit/loss) impact anticipated as a result of charging a lower price.
- b. Age, condition, or model: Reductions from standard prices may be made subsequent to approval by the Director for Revolving Funds, Office of the Under Secretary of Defense (Comptroller) upon determination that there is an actual difference in utility or desirability of an item because of age, condition, or model for items being phased out of the system, items no longer being procured, items with limited remaining shelf life, items in a less than "fully serviceable" condition, and items in long supply, i.e., assets stratified as "potential reutilization stock."

7. Pricing for Additional/Premium Service. Components may establish and offer variable levels of service related to a product, at variable prices, to allow customers the opportunity to economize according to their needs. Appropriate fees may be established annually and may vary according to the item/class of items. Refunds (credits) will be made available for those instances where a customer has paid for a level of service which was not provided. This permissible policy is not intended to authorize a reduced charge for some customers. It is intended to authorize an additional charge for customers who ask, and are willing to pay, for enhanced service. Individual orders may be assessed additional cost recovery rates based on the following elements:

- a. Expedited delivery.
- b. Delivery outside the continental United States based on destination, e.g., Europe, Far East, Near East.
- c. Depot handling fees related to order issues only. This fee(s) will include a minimum charge for low priced orders, a standard charge for bin item issues, a standard charge for normal bulk item issues, and special charges for unusual bulk item issues, e.g., special handling and extraordinary quantities.

J. ISSUES WITHOUT REIMBURSEMENT. A Supply Management business area item may not be issued or transferred without reimbursement except as specifically authorized below:

1. Domestic Civil Emergency. A Supply Management business area item may be issued without immediate reimbursement when action is being taken to provide civil emergency relief assistance in accordance with the policies and procedures provided in DoD Directive 3025.1, "Military Support to Civil Authorities." However, an accounts receivable shall be established for such amounts. Subsequently, funding should be made available to cover the costs of the relief effort, and the Supply Management business area shall be reimbursed for any outstanding accounts receivable.

2. Civil Disturbances. A Supply Management business area item may be issued without immediate reimbursement when action is being taken to control a civil disturbance in accordance with the policies and procedures provided in DoD Directive 3025.12, "Employment of Military Resources in the Event of Civil Disturbances." However, an accounts receivable shall be established for such amounts. Subsequently, the Supply Management Business Area should be reimbursed for any outstanding accounts receivable based upon the procedures provided in DoD Instruction 7200.9, "Financing and Reporting Costs of Military Resources Used in Civil Disturbances," and Volume 6, Chapter 11 of this Regulation.

3. Foreign Disaster. The State Department is responsible for initiating and financing foreign disaster relief efforts pursuant to the Foreign Assistance Act of 1961. Procedures for issues of Supply Management business area material to assist in the event of a foreign disaster and reimbursements shall be in accordance with DoD Directive 5100.46, "Foreign Disaster Relief."

4. NATO Country. A Supply Management business area item may be issued to a NATO country without reimbursement under a replacement-in-kind arrangement under DoD Instruction 2010.10 (reference (s)). Nonreimbursable issues under this authority shall be changed to a reimbursable issue within 12 months if not replaced by the NATO country.

5. Military Emergency. A Supply Management business area item may be issued without immediate reimbursement when a Federal official or military officer has certified that an emergency exists under Section 3732, Revised Statutes, as implemented by DoD Directive 7220.8, "Policies and Procedures Governing the Use of the Authority of Section 3732, Revised Statutes," or emergency provisions in the current DoD Appropriations Act. However, an accounts receivable shall be established for such amounts. When funding is made available to cover the costs of the emergency, the Supply Management business area shall be reimbursed for any outstanding accounts receivable.

6. Presidentially Directed Drawdowns. A Supply Management business area item may be issued to a foreign country without reimbursement when the President has directed a drawdown of defense articles from stocks under authority such as Sections 506 and 522, 22 U.S.C. 2318. The standard price of such issues shall be reported to the Director, Defense Security Assistance Agency for inclusion in subsequent foreign assistance budget requests and to the Office of the Under Secretary of Defense (Comptroller), Revolving Funds Directorate, in order to determine the cash impact of such issues. The cash impact shall be added to the economic adjustment cost recovery element.

7. War Reserve Assets. A Supply Management business area item may be issued without reimbursement when an item is designated as a war reserve asset and the issue has been approved to satisfy requirements of a mobilization of U.S. Armed Forces.

8. Deficiencies in War Reserve Requirements. A Supply Management business area item may be issued without reimbursement when an item is issued under the policies of DoD 4140.1-R, "DoD Materiel Management Regulation," to satisfy deficiencies in war reserve requirements or between activities within the Supply Management business area. Items issued at any level, wholesale or retail, to satisfy customer requisitions shall be reimbursable from war reserve reinvestment appropriations.

9. Disposal of Excess Items. After a request to, and receipt from, the item manager of a disposal release order, excess, obsolete, or unserviceable Supply Management business area items may be issued to a Defense Reutilization and Marketing Office (DRMO) without reimbursement from the DRMO.

10. Items Nearing Obsolescence. A Supply Management business area item may be issued without reimbursement when the item is not a war reserve asset, it has six months or less of remaining shelf-life and the item manager has granted approval for the item to be issued on a nonreimbursable basis.

11. Logistical Management Transfers. Logistical management transfers result from changes in the funding appropriation for an item. If the Under Secretary of Defense (Comptroller) and the Under Secretary of Defense (Acquisition and Technology) designate a logistical management transfer of item(s) from an appropriation to the supply management business area, an

increase to inventory for a nonreimbursable transfer shall be recorded at the value of the item being transferred. Normally, items transferred as a result of a logistical management transfer are transferred without reimbursement. However, under certain circumstances and with prior approval from the Office of the Under Secretary of Defense (Comptroller), transfers-in of inventory may be with reimbursement to the transferring account. Those conditions, all of which must be met, are:

a. The inventory was on order but undelivered to the transferring account at the time of the transfer.

b. The transferring account is not a business area within the Defense Business Operations Fund.

c. The inventory was ordered by the transferring account as a result of a reimbursable order from a customer of that account.

12. Other. When approval has been granted by the Secretary of Defense.

K. GOVERNMENT-FURNISHED MATERIAL (GFM). Consideration shall be given to the issuance of Supply Management Business Area items to a contractor in the development of contractual specifications. The use of GFM may limit the cost of an item, particularly for contractor overhead and profit, and may result in increased competition by encouraging more potential contractors to bid. Purposes for which GFM may be furnished include:

1. Fabrication. A Supply Management Business Area item issued by the direction of the item manager to a contractor for consumption in the fabrication, assembly, or disassembly of another Supply Management Business Area item for the benefit of the Supply Management business area shall be accounted for in account 1584, "Work in process - GFM." A Supply Management Business Area item issued by the direction of the item manager to a DoD activity for consumption in the fabrication, assembly, or disassembly of another item for the benefit of the Supply Management business area shall be accounted for in account 1583, "Work in process - Other Government Activities." The cost of the item consumed and other costs incurred in the fabrication, assembly, or disassembly of the new item shall be recorded as a portion of the procurement cost of the new item(s).

2. Repair Alteration, or Modification

a. Items Consumed in the Process of Repair of other Items. A supply Management business area item issued by the direction of the item manager to a contractor for consumption in the repair, alteration, or modification process shall be accounted for in account 1584, "Work in process - GFM." A Supply Management business area item issued by the direction of the item manager to a DoD activity for consumption in the repair, alteration, or modification process shall be accounted for in account 1583, "Work in Progress - Other Government Activities."

b. Items Issued for Repair. A reparable carcass or other item of inventory issued by the direction of the item manager to either a DoD activity or a contractor for repair, alteration, or modification shall be accounted for

in account 1523, "Inventory Held for Repair." Upon receipt of the repaired item, it shall be accounted for in account 1521, "Inventory Held for Sale."

3. Forgings and Castings. The cost of forgings and castings used as Government furnished material shall be included as a part of the acquisition cost of the item that includes the forging and casting in its production.

L. GOVERNMENT-FURNISHED EQUIPMENT (GFE). Machine tools, equipment, and test equipment used in the manufacture of Supply Management business area items may be purchased by the Government and provided as GFE under a contract when economically justifiable; for example, an economic buy, repair methodology, or life-of-type buy. Supply Management business areas may not be used to procure GFE for use in the manufacture of items funded with other appropriations or funds. The Supply Management business area shall finance the cost of the GFE by use of direct appropriations if the item being produced is for mobilization purposes. If the item is being produced, in significant quantities, for a combination of operating or mobilization purposes, the costs may be prorated according to the ratio of the needs for each purpose or assigned to the primary purpose. The Supply Management business area shall, maintain accountability for the GFE while in the hands of the contractor. Purposes for which GFE may be furnished include:

1. Testing. The costs of testing and inspection of a Supply Management business area item issued by direction of the item manager to a DoD or contractor facility for inspection or for testing purposes shall be charged to the Supply Management business area or appropriations available for those purposes. The costs of repairing an item damaged during testing or inspection or the standard price, if the item is destroyed beyond repair, shall be charged to the Supply Management business area or appropriations available for those purposes.

2. Forgings and Castings. The cost of molds provided to a contractor as Government furnished equipment for use in the manufacturing of a Supply Management business area item shall be accounted for as equipment in the hands of contractors in a subaccount to the appropriate inventory account. The contractor shall be held accountable for the return of the items in good condition upon completion of the contract.

M. LOANS AND LEASES

1. Authorized Recipients. Property items may only be loaned or leased to activities specified below for the stated purpose. The recipient shall be required to sign a receipt for the item. This receipt shall include a statement of the intended purpose of the loan or lease. Each loan or lease of an item shall be approved by the accountable office, the comptroller, or equivalent, of the activity responsible for accountability over the item. The approval shall include a description of the item including the price, condition, anticipated return date; and a certification that the loan or lease of the item will not jeopardize the capability to support national defense requirements. Property may be loaned to:

- a. DoD Funded Customers. Items may be loaned to a DoD funded customer for a maximum of 120 days to support an approved training exercise, a military emergency, or a natural disaster.
- b. U.S. Secret Service. An item may be loaned to the U.S. Secret service for a maximum of 120 days for purposes prescribed under the policies and procedures in DoD Directive 3025.13, "Employment of Department of Defense Resources in Support of the United States."
- c. Civilian Law Enforcement Officials. An item may be loaned to a civilian law enforcement activity for a maximum of 120 days for purposes prescribed under the policies and procedures in DoD Directive 5525.5, "DoD Cooperation with Civilian Law Enforcement Officials."
- d. State and Local Governments. An item may be loaned to a state or local government for a maximum of 120 days for a specific purpose, under the policies and procedures prescribed in DoD Directive 3025.1, "Military Support to Civil Authorities."
- e. National Veterans' Organizations. Under the authority of 10 U.S.C. 2541, an item (e.g., cots, blankets, pillows, mattresses, bed sacks, and other supplies) may be loaned to a recognized national veterans' organization for a maximum of 120 days to support a national or state convention or a regional youth athletic or recreational tournament sponsored by the veterans organization. A bond equal to the current standard price of the item shall be obtained before the item is loaned. The veteran's organization must pay for all expenses incurred in the delivery, return, rehabilitation, or replacement of the property.
- f. American National Red Cross. Under the authority of 10 U.S.C. 2542, an equipment item may be loaned to an organization formed by the American National Red Cross for a maximum of 120 days for the purpose of instruction and practice needed to aid the Army, Navy, or Air Force in time of war. 10 U.S.C. 2542 requires that a bond for the care and safekeeping of the loaned property equal to twice the value of the property shall be obtained before the item is loaned.
- g. Inaugural Committee. Under the authority of 10 U.S.C. 2543, items may be loaned to an Inaugural Committee established under 36 U.S.C. 721 to support an inauguration of the President of the United States for a period not to exceed 9 days beyond the inauguration ceremony. A bond equal to the current standard price of the item shall be obtained before the item is loaned. The Inaugural Committee shall pay for all expenses incurred for the delivery, return, rehabilitation, replacement, or operation of the property.
- h. Boy Scout Jamborees. Under the authority of 10 U.S.C. 2544, cots, blankets, commissary equipment, flags, refrigerators, and other equipment may be loaned to the Boy Scouts of America for the use of Scouts, Scouters, and officials who attend any national or world Boy Scout Jamboree. In addition, services and expendable medical supplies, as may be necessary or useful to the extent that items are in stock and items or services are available may be furnished without reimbursement. Items may be loaned for a maximum of 120 days. A bond equal to the value of the loaned items shall be obtained before

the items are loaned. No expense shall be incurred by the United States Government for the delivery, return, rehabilitation, or replacement of such equipment.

i. Humanitarian Relief. Under the authority of 10 U.S.C. 2544, nonlethal excess supplies may be made available for transfer to the Department of State for its distribution for humanitarian relief. The term "nonlethal excess supplies" means property, other than real property, of the Department of Defense that is excess property as defined in regulations of the Department of Defense; and that is not a weapon, ammunition, or other equipment or material that is designed to inflict serious bodily harm or death.

j. Foreign Countries or International Organizations. An item may be leased to an eligible foreign country or international organization under the authority of the Arms Export Control Act. Policy and procedures for the lease of material to foreign countries and international organizations is contained in Chapter 12 of DoD 5105.38-M, "Security Assistance Manual," and volume 15 of the DoD Financial Management Regulation, "Security Assistance Policy and Procedures," DOD 7000.14-R, Section 713. Refer to these references for approval channels and expense requirements in addition to paragraph 2 and 3 below.

k. Other Leases. Under the authority of 10 U.S.C. 2667, a non-excess Supply Management Business Area item may be leased to an organization when the Secretary of Defense or the Secretary of the Military Department has determined that the item is not needed for DoD use during the proposed lease period and the lease will promote the national defense or otherwise be in the public interest.

2. Approvals. Each loan or lease of an item shall be approved by the comptroller, or equivalent, of the activity responsible for accountability over the item. The approval shall include a description of the item including the price, condition, anticipated return date; and a certification that the loan of the item will not jeopardize the capability to support national defense requirements.

3. Expenses. The recipient shall pay for any transportation, packing, crating, and handling costs associated with the loan or lease of the item. At the time of return of the item, the recipient shall be required to pay any costs necessary to restore the item to its original condition or to pay for any item the recipient does not return within the approved period of the loan or lease.

N. REPARABLES

1. Standard Price. The standard price for reparable items, including the cost recovery elements, shall be developed consistent with the policies prescribed for other Supply Management Business Area items. Sales of reparable items made without a return shall be priced at the standard price. Exchange arrangements are not authorized for customers outside the Federal Government except for a Foreign Military Sales (FMS) customer investing in Cooperative Logistics Supply Support Arrangements (CLSSA). Sales to customers outside the Federal Government shall be priced in accordance with Volume 11A, Chapter 1, "General Reimbursement procedures and Supporting Documentation," [currently in

Chapter 26 of, DoD 7220.9-M, "DoD Accounting Manual,"] and Volume 15, "Security Assistance Policy and Procedures," of this Regulation.

2. Exchange Price. For the issue of a reparable item in which the requisitioner indicates a carcass will be returned, the customer will be charged the exchange price, i.e., the established repair cost plus the appropriate cost recovery elements. The exchange price for reparable items shall be determined by a homogeneous grouping such as National Stock Number (NSN), Federal Supply Classification (FSC), subclassification, repair category, or materiel category. The exchange price may consist of a percentage factor times the standard price. The exchange price shall be established before the beginning of each fiscal year for each homogeneous group and provided to customers and shall remain constant throughout the execution fiscal year.

3. Calculation of Exchange Price. The exchange price shall be calculated on the most representative unit repair cost of the item plus the appropriate cost recovery elements to recover the cost of managing the item. The same cost recovery elements used in the standard price calculation shall be used in the calculation of the exchange price plus cost recovery elements for carcass attrition (washout and loss) and shipping and transportation costs for returns of carcasses from customers. If the standard price is less than the exchange price, a review of the standard price and the exchange should be made to validate their accuracy. If the standard price is less than the exchange price because new items are not currently being acquired, the standard price shall be increased 20 percent over the exchange price to incentivize the customer to return the carcass to the wholesale system.

4. Illustration of Accounting for Inventory Held for Repair. Most items held for repair are obtained as the result of an exchange transaction. The process consists of the sale of a serviceable item in exchange for an item that needs repair plus a promise to pay (accounts receivable) or the actual payment (cash) for the difference in value between the two items. If the item needing repair has not been received at the time of exchange, an in-transit account shall be established to account for the due-in. Upon receipt of the item needing repair, it is sent to a repair facility. While at the repair facility, the item continues to be accounted for by the supply system as inventory held for repair and not as work in progress. Upon return of the repaired item, it becomes available for sale and is placed into the appropriate inventory for sale account. The accounting entries to accomplish this process are illustrated below.

(1) Exchange of Serviceable Item for Reparable Item. Inventory items requiring repair are generally obtained from customers as a partial exchange for a serviceable inventory item. The remaining exchange should be an account receivable equal to the selling price of the serviceable item less the estimated repair and exchange cost of the exchange item. The estimated repair and exchange costs shall be established on an aggregate basis, using an average cost to repair. Inventory held for repair shall be valued at the same value as a serviceable item. However, contra-asset accounts (i.e., account 1529.3A, "Estimated Repair Costs," and account 1529.3B, "Estimated Exchange Costs") shall be established for the estimated repair and exchange cost. An exchange of a serviceable item for reparable item is illustrated by the following accounting example:

Dr 1523.1 Exchange (DLR) Inventory in Transit	\$5,250	
Dr 1311 Accounts Receivable-Government-Current	\$2,700	
Cr 5101 Revenue from Goods Sold - DBOF		\$5,250
Cr 1529.3A Estimated Repair Costs		\$1,650
Cr 1529.3B Estimated Exchange Costs		\$1,050

Entry to record sale of inventory when a reparable item is to be exchanged for a ready for issue inventory item. In this case, the current standard price of the exchanged item is \$5,250 and the estimated repair cost for the item is \$1,650. (Note: The estimated repair cost need not be established for the particular item to be exchanged but, instead, may be an average cost to repair exchange items of the same type.)

(2) Receipt of Reparable Item.

Dr 1523 Inventory Held for Repair	\$5,250	
Cr 1523.1 Exchange (DLR) Inventory in Transit		\$5,250

Entry to record receipt of exchange (DLR) inventory. The exchange item is recorded at its standard price. (A standard allowance for repair was established at the time the exchange transaction occurred -- see above.)

(3) Reparable Items Sent to Repair Facility. Reparable items sent to a repair facility shall continue to be reported by the supply systems as "Inventory Held for Repair," and not as work in progress by the supply system while items are at a repair facility.

(4) Receipt of Repaired Item from Repair Facility. When the repair is actually made, the value of the repaired item included in Account 1523, "Inventory Held for Repair," shall be relieved from that account and reclassified to Account 1521, "Inventory Held for Sale." The amount payable to the repair facility for the repair is recorded in Account 1529.1X, "Actual Repair Cost," and as an Account Payable. Receipt of repaired items is illustrated by the following accounting example:

Dr 1521 Inventory Held for Sale	\$5,250	
Cr 1523 Inventory Held for Repair		\$5,250
Dr 1529.1X Actual Repair Costs	\$1,500	
Cr 2111 Accounts Payable-Government-Current		\$1,500
Dr 1529.3A Estimated Repair Cost	\$1,650	
Dr 1529.3B Estimated Exchange Cost	\$1,050	
Cr 1529.1M Completed Inventory Repairs		\$2,700

Entry to record receipt of repaired items from a repair facility. In this illustration, although the estimated repair cost was \$1,650, the repair facility charged only \$1,500 for the repair work.

[Note: In many instances, the amount charged by a DoD repair facility is equal to the estimated repair cost.]

0. WAR RESERVE MATERIALS

1. Definition. War reserve/mobilization item are those materials that, in addition to peacetime assets normally available on any given date, are necessary to equip and support the increase in military requirements forecasts contingent on an outbreak of war and sustain operations until resupply can be effected. War reserve materiel includes secondary items procured and/or stored in support of wartime scenarios established in Defense Planning Guidance or contingency operations identified in specific Operational Plans. Within the Defense Business Operations Fund, war reserve/ mobilization stock shall be classified as an element of stockpile materials. War reserve materials, are not held with the intent of selling in the ordinary course of business. Stockpile materials are strategic and critical materials held due to statutory requirements for use in national defense, conservation or national emergencies. (National Defense Stockpile materials are accounted for within the National Defense Stockpile Transaction Fund, which is not part of the DBOF. Stockpile materials are discussed in Volume 4, Chapter 4, of this Regulation.)

2. Funding for War Reserve Materials. War reserve materiels shall be funded from appropriations made direct to the DBOF. Such appropriated amounts shall be reflected as a separate goal within the applicable Supply Management or Commissary Resale business area annual operating budget letter. Items such as ammunition and/or principal and major end items procured for war reserve shall not be DBOF-funded, but shall be funded through amounts available to Component/Defense Agency procurement appropriations.

3. Accounting for War Reserve Materials. Purchases of DBOF-funded war reserve items shall be accounted for at the same level of detail as items procured for peacetime requirements. The value of war reserve items shall be recorded in a separate general ledger accounts, or appropriate subaccounts, to retain separate visibility of such assets. The general ledger accounts established for those purposes are account 1573, "War Reserve/Mobilization Stock," and account 1579.2 "Allowance for Holding Gain/Loss - War Reserve/Mobilization Stock." War reserve items are not available for sale in the ordinary course of business; therefore, cost of war reserve items shall be separately maintained and reported from inventory costs to ensure that the unit cost targets for the Supply Management business are not affected.

4. Valuation of War Reserve Materials

a. Latest Acquisition Cost. War Reserve materials shall be valued on the basis of latest acquisition cost.

b. Allowance for Holding Gains and Losses. General ledger account 1579.2, "Allowance for Holding Gain/Loss - War Reserve/Mobilization Stock," shall be established to account for valuation changes.

c. Exception to Valuation of War Reserve Materials. The carrying amount of war reserve materials that have suffered (a) a permanent decline in value to an amount less than their cost or (b) damage or decay shall be reduced to the expected net realizable value of the materials. The decline in value shall be recognized as a loss in the period in which it occurs.

5. Disposition of War Reserve Materials. War Reserve materials are held in reserve to be available for transfer without reimbursement when the issue of a war reserve asset has been approved to satisfy requirements of a mobilization of U.S. Armed Forces. However, if authorized, war reserve and other stockpile materials may be sold. The accounting for each of those possibilities is as follows:

a. Transfer Without Reimbursement. An issue of war reserve without reimbursement shall be recorded as follows:

Dr 3231 Transfers-Out to Government Agencies Without
Reimbursement
Cr 1573 War Reserve/Mobilization Stock

Documentation supporting this entry includes material release orders and shipping documents.

b. War Reserve Materials Authorized For Sale. War reserve materials are not held with the intent of selling in the ordinary course of business. However, they may be sold when authorized. When war reserve materials are authorized to be sold, those materials shall be disclosed, as applicable, as inventory held for sale (Account 1521, "Inventory Held For Sale"). The materials authorized for sale shall be valued using the same basis as used for other same commodities normally held for sale. The accounting entry to reclassify war reserve material as inventory held for sale is:

Dr 1521 Inventory Held For Sale
Cr 1573 War Reserve/Mobilization Stock

5. Financial Statement Disclosure Requirements. Notes accompanying financial statements shall include:

- a. General composition of war reserve materials.
- b. Basis for valuing war reserve materials; including valuation method and any cost flow assumption.
- c. Changes from prior year accounting methods, if any.
- d. Restrictions on the use of war reserve materials.

P. RETURN OF ITEMS TO THE SUPPLY MANAGEMENT BUSINESS AREA

1. Customers Who May Return Items. A customer within the Federal Government may return an item to a Supply Management Business Area. Section 2208 of 10 U.S.C. states, "The appraised value of supplies returned to working capital funds by a department, activity, or agency may be charged to that fund. The proceeds thereof shall be credited to current applicable appropriations and are available for expenditure for the same purposes that those appropriations are so available. Credits may not be made to appropriations under this subsection as a result of capitalization of inventories . . ."

2. Customers Who May Not Return Items. A customer outside of the Federal Government may not return an item to a DoD Supply Management Business Area. If such a customer has an item to return, the DoD Supply Management Business Area

may buy the item back from the customer as described in Volume 15, "Security Assistance Policy and Procedures," of this Regulation.

3. Credit Options. Credits for returned items shall be granted by the item manager based upon receipt, inspection, and classification of the item.

a. Return of a Fully Serviceable Consumable or Repairable Item. When approved by the item manager, a credit shall be granted to a Federal Government customer in the amount of the current standard price less the current fiscal year's approved cost recovery elements for the return of a fully serviceable consumable or repairable item that is within the approved acquisition objective. Credit shall be granted by the item manager based upon receipt, inspection, and classification of the item. A return that stratifies to a war reserve requirement does not qualify for credit.

b. Return of Repairable Carcass When Part of an Exchange Transaction. When approved by the item manager, a credit shall be granted to (1) a Federal Government customer or (2) a Foreign Military Sales (FMS) customer investing in Cooperative Logistics Supply Support Arrangements (CLSSA) for the return of a less than fully serviceable, economically repairable item when the item is within the approved acquisition objective. Such credit shall be in the amount of the current standard price, less the exchange price. (The exchange price is the total of the established repair cost and the appropriate cost recovery elements.) A returned item that stratifies to a war reserve requirement does not qualify for credit.

c. Return of a Repairable Carcass When not Part of an Exchange Transaction. When approved by the item manager, a credit shall be granted for the return of a repairable carcass from a Federal Government funded customer without an exchange if the Supply Management Business Area forecasts a need for the carcass within the approved acquisition objective. The credit shall be in the amount of the value of the carcass to the Supply Management Business Area but not more than the current standard price, less the exchange price. (The exchange price is the total of the established repair cost and the appropriate cost recovery elements.)

d. Return of Defective Items. A credit shall be granted to a customer at standard price for defective items issued by a Supply Management Business Area, including specification defects, when a customer's quality deficiency report has been validated.

4. Credits Applied Toward Future Requirements. Credits granted may be applied against future customer demands in the current fiscal year for items or directly credited to the current year available funds of the customer.

5. Shipping Costs. Shipping costs include packing, crating, handling, transportation, port loading, and unloading. The Supply Management business area shall reimburse transportation and other shipping costs only for items approved by an item manager for return from customers. Shipping and transportation cost for items that have not been approved by an item manager for return from customers shall not be paid by the Supply Management business area.

Q. EXCESS ITEMS DISPOSITION

1. Items of Excess Items to Reutilization and Marketing. Excess, obsolete, or beyond repair Supply Management business area items may be transferred without reimbursement, when authorized by the responsible National Inventory Control Point Manager, to a Defense Reutilization and Marketing Office (DRMO). Any DoD-funded customer may obtain any item from a DRMO, without reimbursement to the supply Management business area even if the item was previously a Supply Management business area item. A DRMO shall issue an item without reimbursement to a Supply Management business area when the item is required to satisfy a Supply Management business area requirement.

2. Issues of Excess Items to Other DoD Activities. An issue of a Supply Management business area item excess to the needs of the National Inventory Control Point Manager may be made directly to a DoD-funded customer without reimbursement to satisfy deficiencies in mobilization reserve requirements. In accordance with paragraph I.4. of this chapter, a lateral redistribution of an item excess to the immediate needs of a retail activity from that activity, to another, when directed and controlled by a wholesale manager, shall be without reimbursement from the receiving activity. Rather, the wholesale manager shall bill the receiving activity for the standard price of the material and reimburse the issuing activity for the standard price of the material and its standard packing, crating, handling, and transportation costs.

R. CONTRACT AUTHORITY FOR SUPPLY MANAGEMENT OPERATIONS

1. General. Based upon the authority in 10 U.S.C. 2210, the OMB apportions anticipated contract authority at the beginning of a fiscal year for the amount of the approved Supply Management business area program. This anticipated contract authority becomes realized contract authority when obligations are incurred by the Supply Management business area. Unfunded contract authority is the amount that obligations incurred are in excess of customer orders accepted. Contract authority provided to Supply Management business area is subject to apportionment as required by the Antideficiency Act in accordance with the procedures prescribed in OMB Circular A-34, "Instructions on Budget Execution."

2. Budgetary Resources. Supply Management business area budgetary resources available for use during a fiscal year consist of any appropriated and reappropriated amounts made available; the net of any nonexpenditure transfers into and out of the Supply Management business area and other Federal Government accounts; balances made available from the previous fiscal year; and apportioned anticipated contract authority. Normally, obligation authority for Supply Management business area activities is derived from two primary sources. These sources are (a) contract authority and, (b) appropriated funds for war reserve/mobilization purposes. Supply Management, business area liabilities are payable from the fund balance with Treasury. The two primary sources for the fund balance with Treasury for DoD Supply Management business areas are (a) collections from customers and (b) appropriations.

a. Appropriated Balances Brought Forward. At the end of each fiscal year, unused balances of funds appropriated to the Supply Management business area shall be used to offset the need for anticipated contract authority. Such amounts are not available for use until they are reapportioned and

reflected on the supporting financing schedule as an increase to the limit imposed for obligation authority on an approved apportionment in the new fiscal year.

b. Anticipated Contract Authority. The OMB may approve and apportion anticipated contract authority in the amount of the approved Supply Management Business Area operating program.

(1) A request for apportionment of anticipated contract authority forwarded to the OMB shall be recorded as follows:

Dr 4211 Anticipated Reimbursements - Specific Apportionment
Cr 4440 Revolving Funds Available for Apportionment

Entry to record a request for apportionment of anticipated reimbursements forwarded to the OMB. The documentation supporting this entry is a DD 1105, "Apportionment and Reapportionment Schedule."

(2) The receipt of the approved apportionment request shall be recorded as follows:

Dr 4440 Revolving Funds Available for Apportionment
Cr 4514 Unallocated Apportionment - Reimbursable
Program - Current Period

Entry to record the receipt of the approved apportionment request. The documentation supporting this entry is an approved DD 1105, "Apportionment and Reapportionment Schedule."

(3) Allocations issued shall be recorded as follows:

Dr 4514 Unallocated Apportionment - Reimbursable
Program - Current Period
Cr 4543 Allocations Issued - Reimbursable Program -
Current Period

Entry to record allocations issued. The documentation supporting this entry is an approved allocation document.

(4) Allocations received shall be recorded as follows:

Dr 4550 Internal Fund Distributions Received
Cr 4563 Unallotted Allocations - Reimbursable
Program - Current Period

Entry to record allocations received. The documentation supporting this entry is an approved" allocation document.

(5) Allotments issued shall be recorded as follows:

Dr 4563 Unallotted Allocations - Reimbursable Program -
Current Period
Cr 4573 Allotments Issued - Reimbursable Program -
Current Period

Entry to record allotments issued. The documentation supporting this entry is an approved allotment document.

(6) Allotments received shall be recorded as follows:

Dr 4582 Allotted Reimbursable Program - Current Period
Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period

Entry to record allotments received. The documentation supporting this entry is an approved allotment document.

c. OMB Footnote. The OMB apportionment of anticipated reimbursements as anticipated contract authority currently includes a footnote, consistent with the following:

Pursuant to 10 U.S.C. 2210(b) obligations/commitments may be incurred in excess of the amount of the apportioned resources actually realized in the amount of contract authority approved, but not in excess of the total apportioned. The estimated unfunded balance of this contract authority pursuant to 10 U.S.C. 2210(b) of \$_____ on September 30, 19xx is increased by \$_____ provided that this amount is automatically reduced to the extent that orders are realized.

d. Realized Contract Authority. Anticipated contract authority becomes realized contract authority when obligations are incurred. Therefore:

(1) At the end of each month, the balance of apportioned, anticipated reimbursements recorded in account 4211, "Anticipated Reimbursements - Specific Apportionment" shall be adjusted by the net change in operating obligations incurred during the month as recorded in account 4820, "Undelivered Orders - Reimbursable Program," account 4920, "Accrued Expenditures - Unpaid - Reimbursable Program," and account 4940, "Accrued Expenditures - Paid - Reimbursable Program." For example:

Dr 4131 Contract Authority - Without Liquidating Appropriation
Cr 4211 Anticipated Reimbursements - Specific Apportionment

Entry to record realized contract authority. Documentation supporting this entry includes reports of obligations incurred.

(2) At the end of each fiscal year, the cumulative balance in account 4131, "Contract Authority - Without Liquidating Appropriation," shall be supported and adjusted as necessary to equal the results of the following Computation:

(a) Add the year-end balances in accounts 4800, "Undelivered Orders," 4910, "Accrued Expenditures - Unpaid - Direct Program," and 4920, "Accrued Expenditures - Unpaid - Reimbursable Program."

(b) From this sum subtract the sum of the year-end balances in accounts 4230, "Unfilled Customer Orders," 4251, "Reimbursements Earned-Uncollected-Automatic Apportionment," 4252, "Reimbursements Earned - Uncollected - Specific Apportionment," and 1010, "Fund Balance With Treasury."

(c) The cumulative from inception balance in account 4131, "Contract Authority - Without Liquidating Appropriation," should equal the results of this computation. If not equal, the 4131 account shall be adjusted to equal the result. For example, if the contract authority should be adjusted down as a result of this computation:

Dr 4211 Anticipated Reimbursements - Specific Apportionment
Cr 4131 Contract Authority - Without Liquidating
Appropriation

Documentation supporting this entry includes a journal voucher documenting the above required process.

e. Liquidation of Realized Contract Authority. The receipt of customer orders liquidate realized contract authority. Customer orders received are requisitions and other orders accepted for items to be furnished on a reimbursable basis. Budgetary resources provided from a customer order are available to fund obligations, provided that, in the case of orders from the public, an advance has been collected. Throughout the fiscal year, the cumulative amount of resources available from customer orders is adjusted to the extent that orders are canceled, or revised upward or downward because of standard price changes, quantity adjustments, etc. The amount of budgetary resources available for obligation from customer orders is the sum of orders received from Federal Government accounts that represent valid obligations of the ordering account, plus advances received on orders accepted from the public. Orders from the public include orders received from state and local governments. These budgetary resources shall replace the budgetary resources apportioned as anticipated reimbursements and should be accounted for at the departmental level based upon the net change in customer orders received during the month as recorded in account 4222, "Customer Orders Accepted - Specific Apportionment," as follows.

(1) Activity Level Processing. The receipt of a customer order at the activity level shall be recorded as an increase to customer orders accepted and an increase to unfilled customer orders. This is necessary because supply operation business areas receive obligation authority based upon anticipated reimbursements without regard to the timing of the receipt of the customer order. If the normal accounting for the receipt of a customer order

is used, duplicate obligation authority from the receipt of the order would occur at the allotment level. The required entries are:

Dr 4232 Unfilled Customer Orders - Specific Apportionment
Cr 4222 Customer Orders Accepted - Specific
Apportionment

Entry to record acceptance of a customer order at the activity level for supply operations business areas. The documentation supporting this entry includes customer requisitions and reimbursable orders accepted.

(2) Departmental Level Processing. For apportioned business areas, these budgetary resources shall replace the budgetary resources apportioned as anticipated reimbursements at the departmental level based upon the net change in customer orders received during the month as recorded in account 4222, "Customer Orders Accepted - Specific Apportionment," as follows.

Dr 4222 Customer Orders Accepted - Specific Apportionment
Cr 4131 Contract Authority - Without Liquidating
Appropriation

Entry to record replacement of obligational authority provided through contract authority with obligational authority provided through customer orders. Documentation supporting this entry includes reports of customer orders accepted.

f. Unobligated Budgetary Resources. At the end of each fiscal year, any unobligated balances of appropriated funds applicable to apportioned business operation fund business areas shall be used to offset the need for unfunded contract authority. Such funds are not available for use until they are reapportioned and reflected on the supporting financing schedule as an increase to the limit imposed for obligation authority on an approved apportionment in the new fiscal year. Any unobligated balance at the end of the fiscal year is adjusted to zero. For example:

Dr 4543 Allocations Issued - Reimbursable Program -
Current Period
Cr 4211 Anticipated Reimbursements - Specific Apportionment

Entry to eliminate anticipated contract authority at the Departmental level.

Dr 4614 Uncommitted/Unobligated Allotments - Reimbursable
Program - Current Period
Cr 4582 Allotted Reimbursable Program - Current Period

Entry to eliminate anticipated contract authority at the allotment level. Documentation supporting this entry includes a withdrawal of an allotment of funds.

S. MULTIPLE YEAR CONTRACTS

1. General. Multiyear contracts permit the purchase on one contract of more than one annual program increment of items in order to obtain a maximum economic advantage. For example, an economic order quantity in a multiyear contract may exceed a normal annual buy and yet be advantageous to the Government. Supply Management business areas are authorized to use multiple year contracts to procure items from a single contractor. Sole source items with a stable demand projection that are procured from a single contractor shall be evaluated to determine if the items should be acquired by means of a multiple year contract. As with multiyear contracts funded by procurement appropriations, the Supply Management Business Area may purchase items in an amount corresponding to the economic order quantities deemed appropriate for procurement in each year. Components, parts, and raw material for use in manufacture of items being acquired under a multiyear contract may be procured in quantities exceeding the current annual requirement when it is more economical and cost effective to do so. This is referred to as advance economic order quantity (EOQ) procurement. Advance EOQ procurements integral to multiyear contracts shall be funded in the most economical manner. They may be funded fully in single year increments on a termination liability basis, or included in a multiyear contract along with the nonrecurring contract costs. Under 10 U.S.C. 2306, the Department of Defense is authorized to enter into multiyear contracts containing cancellation clauses that may include both nonrecurring and recurring costs. This law specifies congressional reporting requirements based on cancellation ceilings. Further, annual DoD Appropriations Acts may contain specific language requiring limitations on the use of multiyear contracts. For example, total procurements under a single multiple year contract may not exceed \$500 million or a termination liability under a single contract may not exceed \$20 million without the approval of the Congress under the provisions of the current DoD Appropriations Act. In addition, a single proposed multiple year contract in excess of \$100 million or \$10 million in estimated termination liability shall be submitted to the Office of the Under Secretary of Defense (Comptroller) for approval prior to awarding the contract. Each separate option to extend a multiple year contract shall be considered as a single multiple year contract for the purposes of this approval requirement. The DoD Components shall refer to annual guidance contained in Under Secretary of Defense (Comptroller) Multiyear Procurement Appropriation Language Guidance Memoranda for specific requirements and restrictions imposed by the Congress.

2. Obligations. The Supply Management Business Area shall obligate the minimum amount required for the period of the contract.

a. If the contract provides for annual terms with options to extend the terms in subsequent years, the obligation shall be for the amount required to be procured by the Government in the first year. The obligation for each option year shall be recorded when the option is exercised.

b. If the contract provides for minimum quantities over a period of more than one year, the obligation shall be recorded for the sum of all of the minimum quantities times the agreed price. If the contract provides for minimum dollar amounts for a period of more than one year, the obligation shall be recorded for the sum of the minimum dollar amounts.

3. Cost of Items. The cost of items procured by multiple year contracts shall be the amount paid for each item. If termination costs are incurred or if minimum guaranteed amounts are not met for items procured, the additional costs paid under the terms of the contract shall be recorded as Supply Management Business Area materiel obligations.

T. BUDGETARY ACCOUNTS

1. General. Budgetary accounts are used to control and account for obligation authority received from appropriations and contract authority, both apportioned by OMB. Supply Management Business Areas are subject to apportionment as required by the Anti-Deficiency Act in accordance with the procedures prescribed in OMB Circular A-34, "Instructions on Budget Execution."

2. Allocations. The general provisions of the annual Appropriations Act provide that "Except in amounts equal to the amounts appropriated to working capital funds in this Act, no obligations may be made against a working capital fund to procure war reserve material inventory unless the Secretary of Defense has notified the Congress prior to any such obligation." Obligation authority for mobilization purposes shall be allocated and allotted separately as direct program. Obligations for mobilization purposes are defined in Volume 2, "Budget formulation and Execution," of this Regulation. Operating obligations consist of all obligations that do not meet the criteria defined for mobilization and shall be allocated and allotted separately as reimbursable program. Obligations shall be accounted for and reported separately as mobilization and operating. Subaccounts to the budgetary accounts prescribed by this Regulation shall be established by the Defense Finance and Accounting Service to satisfy these requirements.

ASSESSMENT OF INVENTORY AMOUNTS

Determinations as to the reasonableness of amounts shown in the general ledger accounts and reported in financial statements shall be based on a top-down approach. This approach is necessary because the size of DoD inventories normally precludes a 100 percent physical inventory.

a. As a first step, the balance in the inventory general ledger account shall be compared to logistic records. This comparison shall reconcile differences resulting from inventory receipts and issues that were not posted to the general ledger accounts but that were recorded in logistic records or vice versa. The purpose of this reconciliation is to support a management determination that the balances in the accounting system and the logistics system are in substantial agreement.

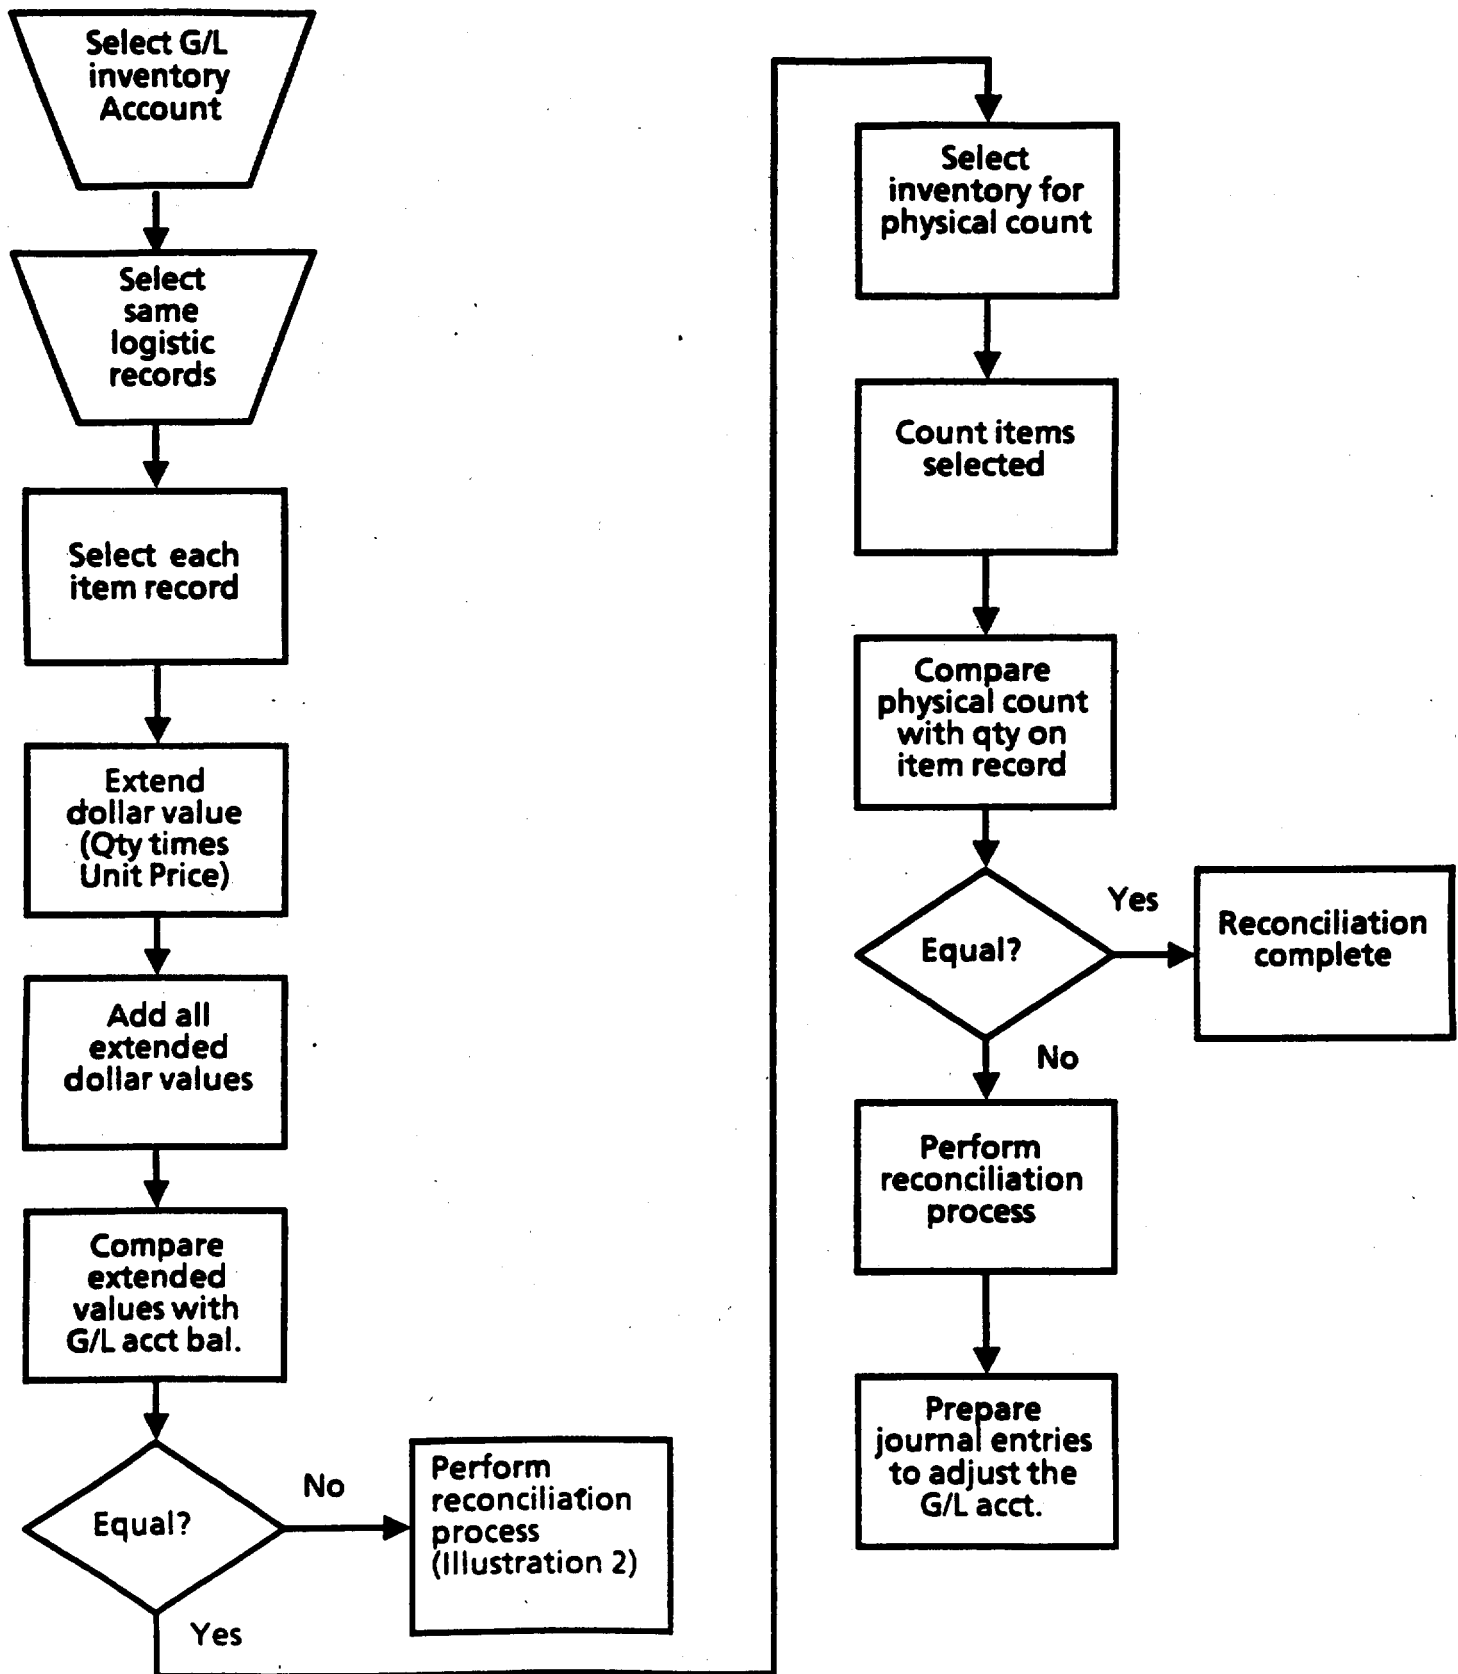

b. When the reconciliation of the logistic records to the general ledger account balances is completed, physical inventories shall be taken to ensure that the number of items reflected in logistic records are reasonably accurate. The reconciliation process is displayed in illustrations 1 through 4 of this addendum. Illustration 4 is a work sheet intended to demonstrate the overall reconciliation of the general ledger accounts with the logistic records. As such it is usable for both stages of the reconciliation process.

c. Physical counts of DoD inventories shall be taken periodically and must be designed to provide a reasonable assurance that logistic records accurately reflect on hand quantities. The sizes of these inventories preclude a 100 percent count except in unusual circumstances such as a major breakdown in internal controls. Therefore, it is frequently necessary to use statistical sampling techniques. Acceptable statistical sampling techniques are widely prescribed and any acceptable technique may be used so long as every item included in inventory has a probability of selection. When a DoD Component elects to use statistical sampling techniques the results must be such as to provide reasonable assurance that the general ledger accounts are accurate with a 90 percent level of confidence and a precision level of + or - 2.5 percent.

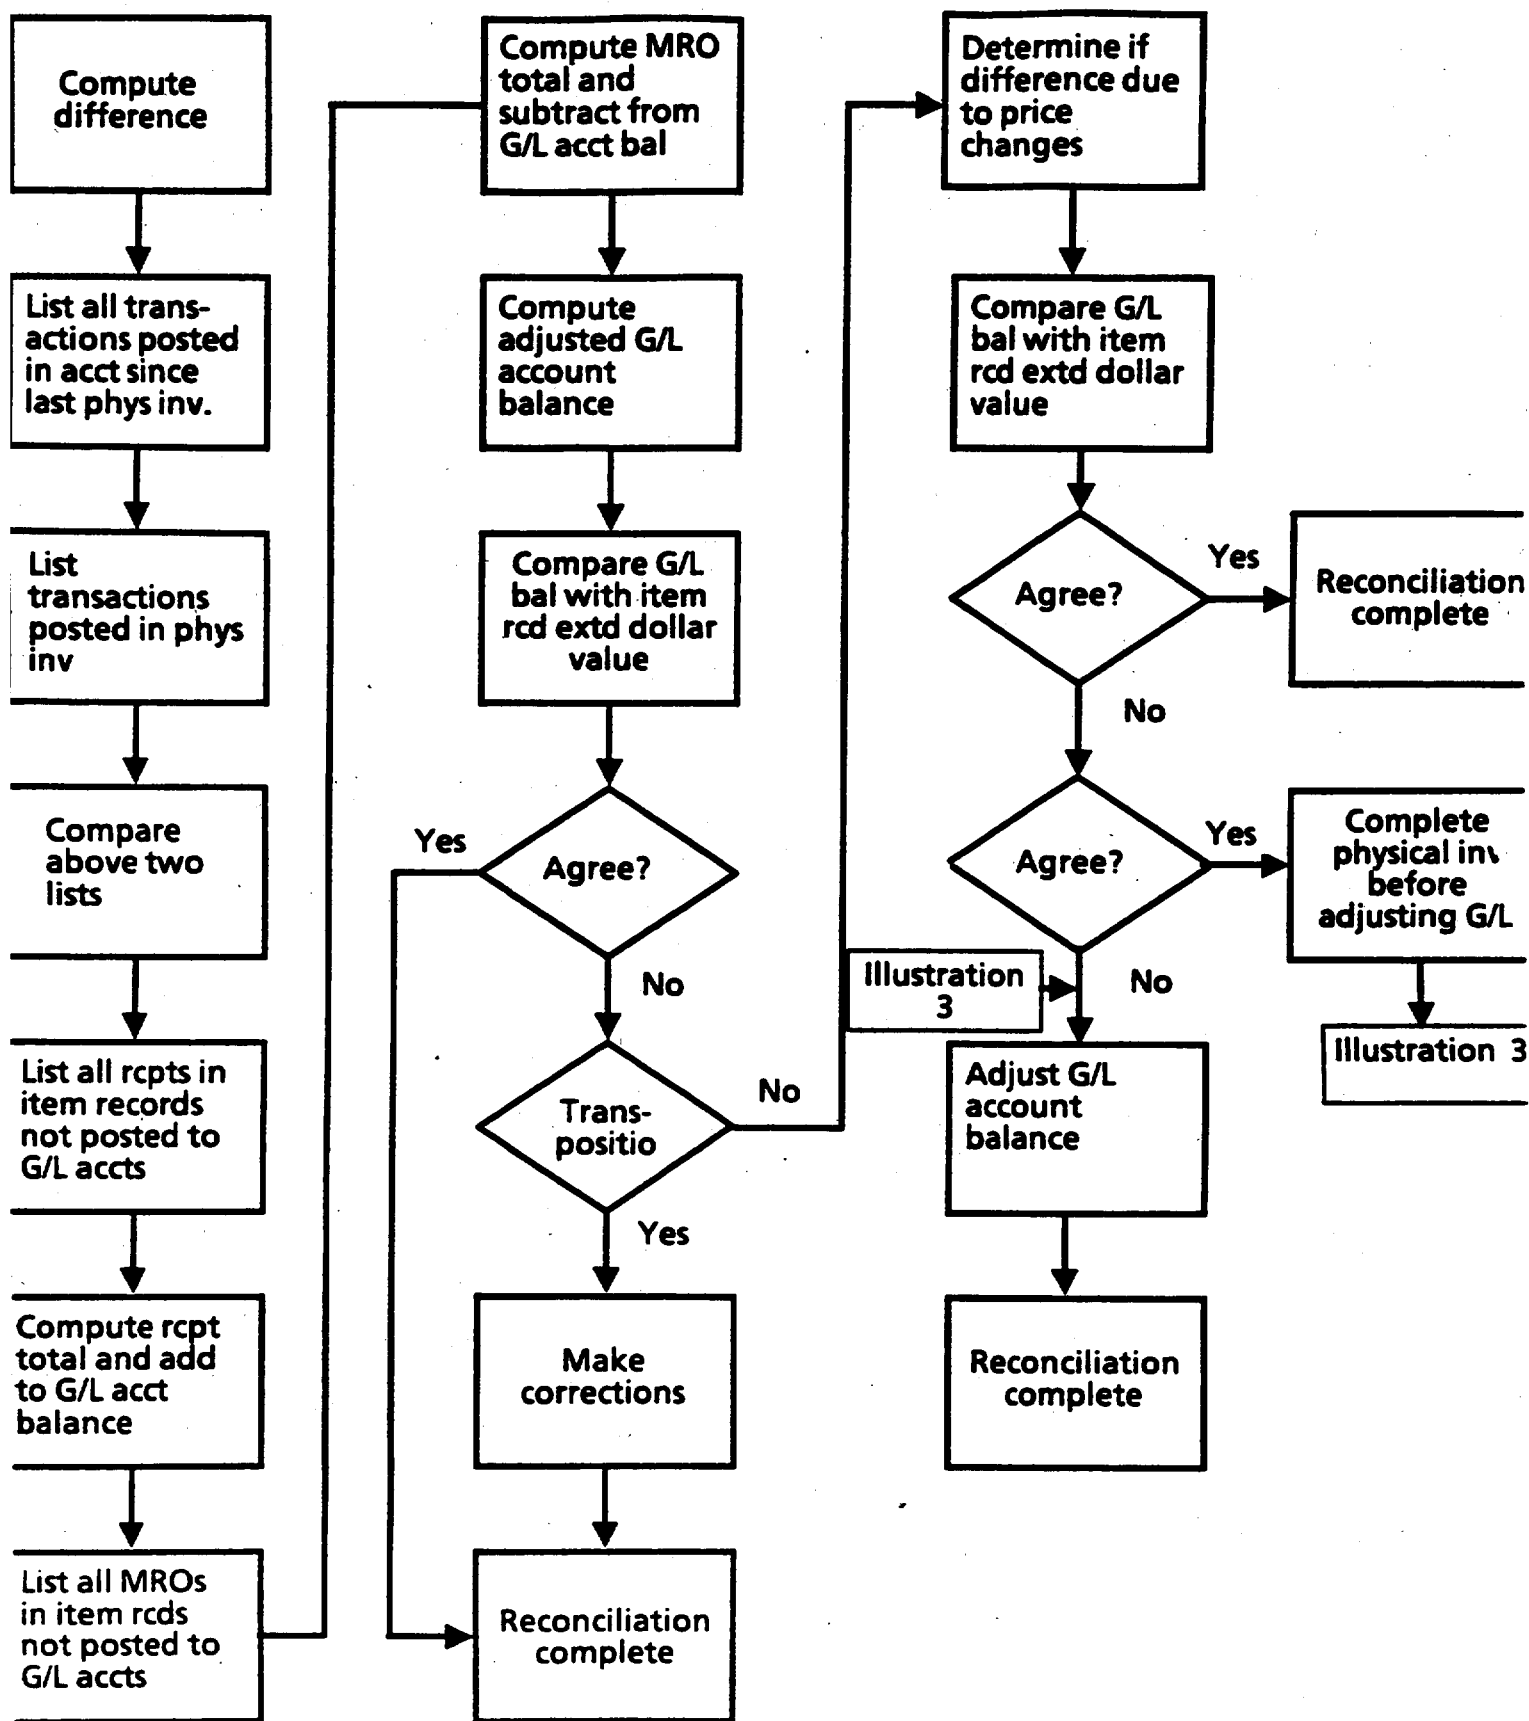

d. Care must be taken to consider infloat documentation, i.e., receipts and issues before reaching any conclusions that property records are not accurate.

e. Adjustments to logistic records and financial records shall be made only for those specific items where the physical counts or supporting documentation (e.g., receiving reports, inventory records, issue documents) disclose overages or underages. However, there should be a statistical projection of the dollar impact on the financial records. If the dollar value is material, the sample size should be increased and another estimate of the impact made. If this estimate also discloses a material impact then a complete inventory shall be taken or the financial statements qualified to disclose the fact that the reported inventory values are inaccurate. Failure to conduct required physical inventories shall be disclosed as a material weakness in Section 4 of the Federal Managers' Financial Integrity Act statement if the inventory dollar value is significant.

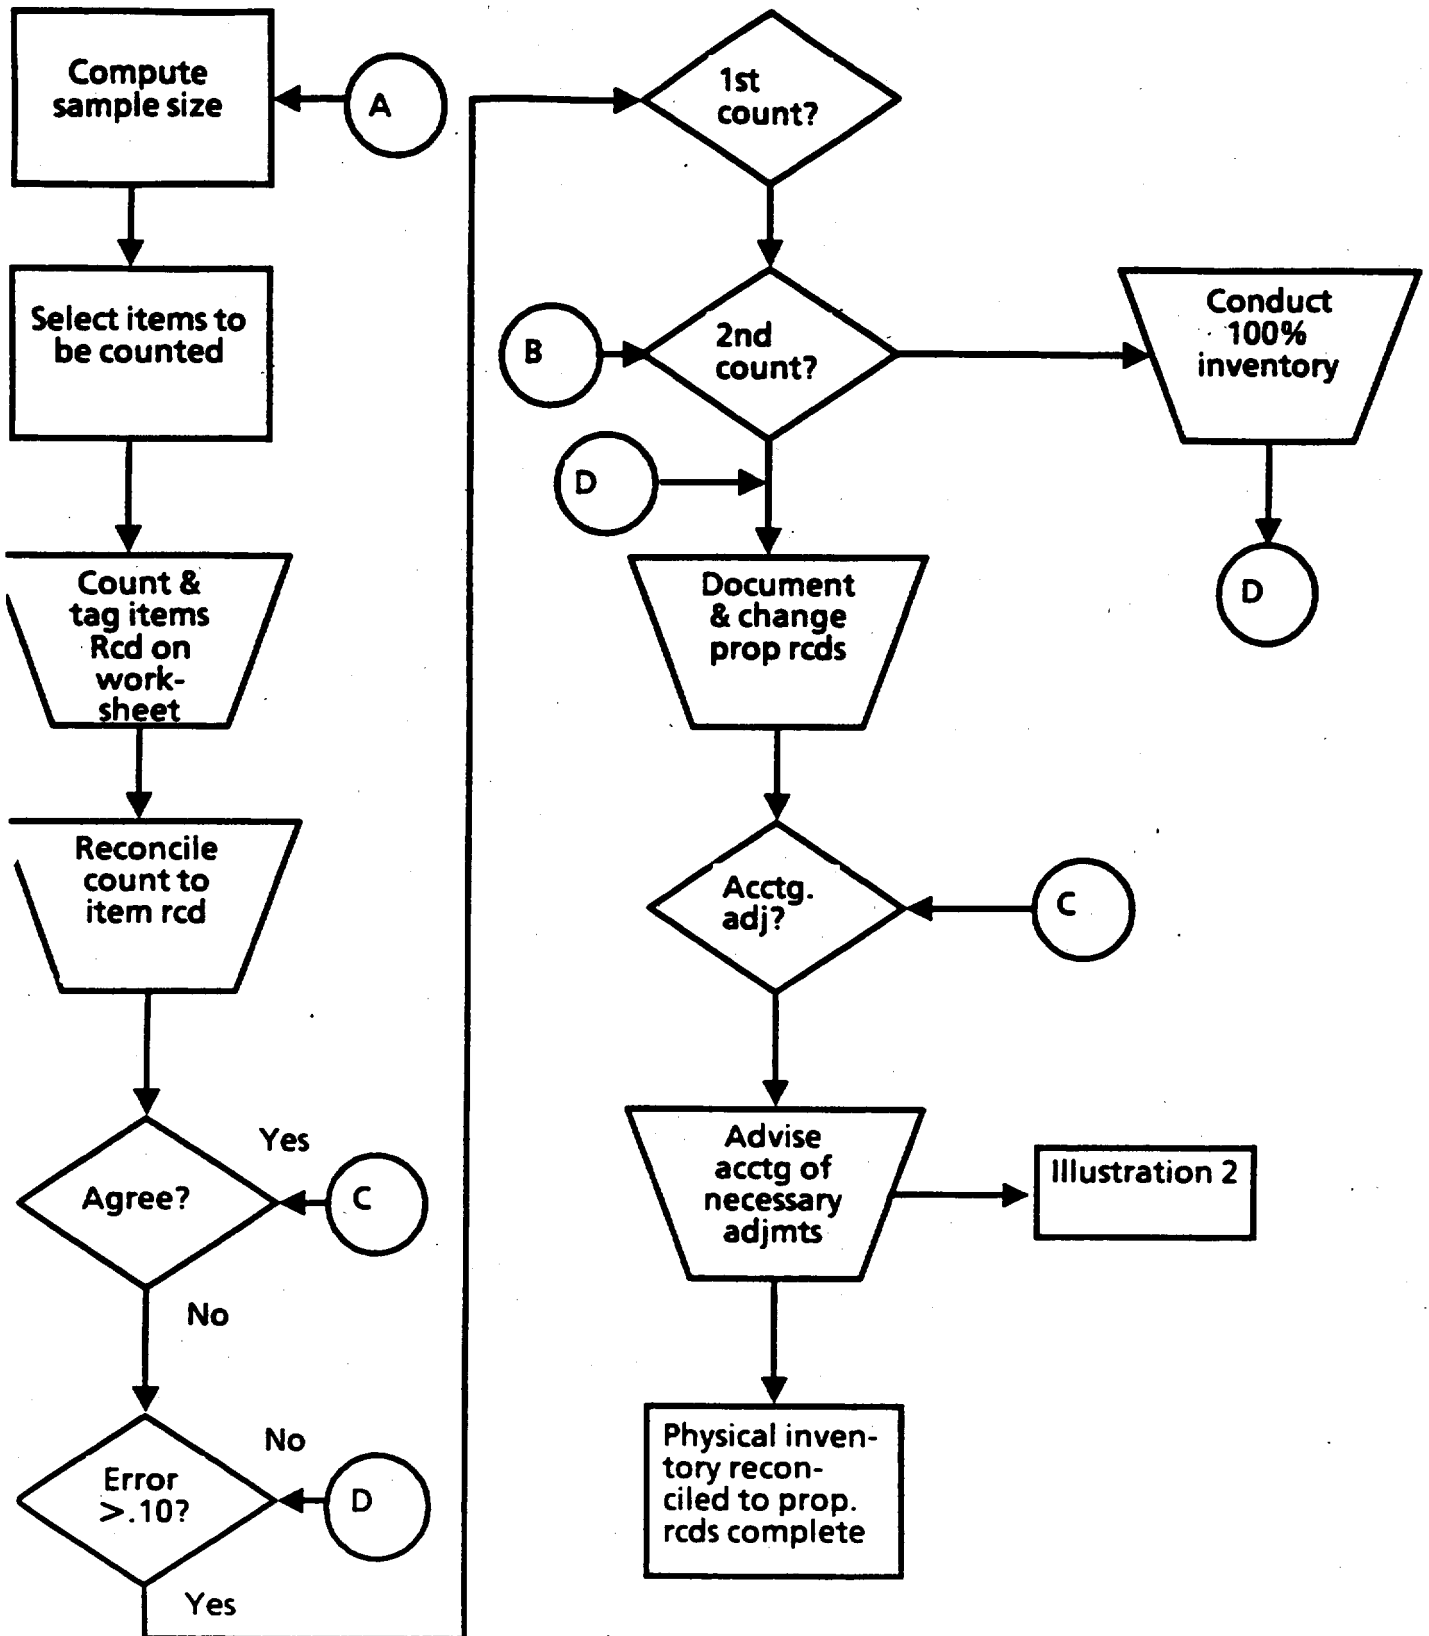

f. Adjustments to the general ledger accounts and the item logistic records shall be supported by a DD Form 200 "Report of Survey," prepared in accordance with DoD Manual 7200.10-M, "Department of Defense Accounting and Reporting for Government Property Lost, Damaged, or Destroyed." DD Form 200 is used for preparing the government property lost, gained, damaged or destroyed report on inventory.

ACCOUNTING ILLUSTRATION

ACCOUNTING FOR INVENTORIES WHEN USING STANDARD PRICE PRACTICES

A. GENERAL

1. The military departments record inventory at its standard [sales] price. As a rule, that value changes only once a year and is effective as of the first day of a fiscal year. The standard price includes cost recovery factors (commonly termed "surcharges") to recover operating costs and anticipate price inflation changes. The difference between the standard price of an inventory item and its acquisition cost is an unrealized gain which will not become realized until that item is classified as potential excess, sold or otherwise leaves the supply management stocking point. Holding gain and loss accounts have been established to accumulate the value of holding gains and losses during the fiscal year. When inventory is sold or otherwise disposed, the previously unrealized holding gain or loss is realized and recorded in account 1529.1A, "Realization of Holding Gains/Losses." The holding gain and loss accounts are:

- 1529.1A Realization of Holding Gains/Losses
- 1529.1B Purchases at Standard Price
- 1529.1C Purchases at Cost
- 1529.1D Materiel Returns at Standard Price
- 1529.1E Materiel Returns - Credit Given
- 1529.1F Materiel Returns Without Credit Given
- 1529.1G Standard Price Changes-Gain
- 1529.1H Accounting Adjustments-Gain
- 1529.1J Assembly/Disassembly-Gain
- 1529.1K Physical Inventory Adjustments-Gain
- 1529.1L Incoming Shipments-Gain
- 1529.1M Completed Inventory Repairs
- 1529.1N Receipts of Materiel Without Charge
- 1529.1P Other-Gain
- 1529.1Q Latest Acquisition Cost Adjustment
- 1529.1R Standard Price Changes-Loss
- 1529.1S Accounting Adjustments-Loss
- 1529.1T Assembly/Disassembly-Loss
- 1529.1U Physical Inventory Adjustments-Loss
- 1529.1V Incoming Shipments-Loss
- 1529.1W Shrinkage and Other Adjustments-Loss
- 1529.1X Actual Repair Costs
- 1529.1Y Issues Without Reimbursement
- 1529.1Z Other-Loss

NOTE: Every event that results in a change in the standard price value of existing inventory should be reflected in one of the holding gain or loss accounts specified above. If one of the above accounts is not descriptive of a recurring and significant inventory event that affects the value of inventory at standard price, then an additional holding gain/loss subaccount(s) should be requested to be established for that purpose. Such requests should be forwarded to the Director for Accounting Policy, Office of the Under Secretary of Defense (Comptroller/Financial Management).

2. Through use of the above allowance accounts, inventories should be reported on the Statement of Financial Condition and cost of Goods Sold at latest acquisition cost and operating results should not be adversely affected by unrealized gains and losses in inventory values and differences between monthly and annual reporting processes.

3. For financial statement presentation, inventory is shown at its latest acquisition cost. The cost of inventory items sold is shown, in accordance with Statement of Federal Financial Accounting Standards No. 3, "Accounting for Inventory and Related Property," at an approximation of its historical (actual) cost. The inventory accounts minus the unrealized gains or losses amount in the allowance account will approximate inventory at acquisition cost.

4. The following illustration provides an explanation of the accounting necessary to properly record the DBOF supply management inventory for those supply management business areas which maintain inventory values at standard (selling) price. The illustration demonstrates the affect on unrealized holding gains due to standard price adjustments, purchases, inventory returns, and other transactions. The illustration also demonstrates the computations necessary to properly adjust cost of goods sold to the actual cost of the items sold.

5. The accounting for, and reporting of, inventory requires the cooperation of, and information from, both the entity at which daily transactions occur and the entity that uses the transaction data. For reporting purposes, the transactions described herein may be recorded at the reporting level if the transaction level does not have the capability to do so at this time. As soon as systems permit, the transactions should all be recorded at the transaction level. Many, but not all, of the accounting entries contained within this addendum should be prepared at the transaction level. The transaction level should be able to recognize many of the holding gain and loss accounts as a reclassification of existing accounts. The significant difference is that those accounts are classified differently than they were previously. The reclassification was necessary so that the unrealized holding gain or loss would be recognized only when inventory is sold or otherwise leaves the supply management stocking point.

6. Roughly, the following steps shall be performed in accounting for, and reporting of, inventory at its latest acquisition cost. The following direction must be consistently followed. Any changes to the following steps should be proposed to the Director for Accounting Policy, Office of the Under Secretary of Defense (Comptroller/Financial Management). DoD Component system or other differences may require deviation from the following steps; however, prior to implementation, those deviations must be approved by the Director for Accounting Policy.

Step 1 Establish initial inventory allowance account to identify cost recovery factors, prior year inflation, repair costs, and write-down of potential excess at the amount of the last adjustment contained in the FY 1994 Chief Financial Officer Act financial report submission. (NOTE: This is a one-time step to initially establish the allowance account at the same value as reported on the prior year CFO submission. For following years, the

inventory allowance account will be continued at its then current amount.)

- Step 2 Monthly, Stratify on-hand inventory by authorized levels using most current stratification data available. (Currently, inventory stratification data is updated only quarterly. That data, when received, is the most current stratification data available and shall be used for 3 months until the next quarterly stratification report is available.) Stratification levels include:
- Approved acquisition level
 - Authorized retention
 - Potential excess
- Step 3 Stratify on-hand inventory by:
- Reparables
 - Non-Reparables (Consumables)
- Step 4 Stratify on-hand inventory by:
- Serviceable
 - Unserviceable
- Step 5 Remove cost recovery factors (i.e., surcharges) and, if applicable, prior year inflation factors from all on-hand inventories.
- Step 6 For unserviceable portion of on-hand reparable inventories, remove repair cost percentage.
- Step 7 For potential excess and unserviceable portion of non-reparable on-hand inventories, adjust to net realizable value. (Annually, the adjustment percentage changes. Currently, it is approximately 2 percent of sales price.)
- Step 8 For in-transit inventories, determine:
- Amount from contractors
 - Amount of reparable
 - Serviceable
 - Unserviceable
- Step 9 For in-transit inventories, determine if:
- Amount from contractors is at acquisition cost
 - Amount of reparable is at sales price less cost recovery and inflation factors and repair cost
- Step 10 For in-transit inventories, remove, cost recovery factor (i.e., surcharges) and prior year inflation factors
- Step 11 For unserviceable portion of in-transit reparable inventories, remove repair cost percentage if necessary
- Step 12 For non-reparable portion of in-transit unserviceable inventories, adjust to net realizable value

Step 13 prepare journal vouchers to record in the allowance account all gains and losses to inventory occurring during the month, e.g.

- Purchases at sales price and purchases at cost
- Customer returns without cost
- Sales price gains and losses
- Physical inventory and accounting gains and losses
- Incoming shipments gains and losses
- Shrinkage, damage, and other losses

Step 14 prepare journal vouchers to record decrease in allowance account based upon the percentage of allowance account to inventory times total sales for:

- Sales to customers
- Transfers to disposal

Step 15 Prepare journal vouchers at the end of the month to adjust on-hand and in-transit inventories as described above in order to establish inventory at latest acquisition cost.

B. MONTH ONE

1. ESTABLISH INITIAL INVENTORY ALLOWANCE AMOUNT. As of October 1, 1994, general ledger account 1529.1, "Allowance for Holding Gain/Loss - Inventory Held "for Sale," general ledger account 1529.2, "Allowance for Holding Gain/Loss - Inventory Held in Reserve for Future Sale," and general ledger account 1529.3, "Allowance for Repairs," should be established to identify cost recovery factors (i.e., surcharges), prior year inflation, repair costs, and write-down of potential excess at the same amount of the last adjustment contained in the FY 1994 Chief Financial Officer Act financial report submission. This is a one-time step to initially establish the allowance account at the same value as reported on the prior year CFO submission. For following years, the inventory allowance account will be continued at its then current amount. For illustration purposes, assume the initial allowance amount for "Inventory Held For Sale" is \$7,000. The following tables are included to assist in the understanding of the inventory accounting process. The entries may be made at the transaction level or summarized at the monthly reporting level but not at both levels. The table to illustrate the beginning inventory position for "Inventory Held for Sale," is:

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$34,500	\$7,000	\$27,500

2. ADJUSTMENT OF INVENTORY TO NEW STANDARD PRICE

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$34,500	\$7,000	\$27,500
B.2.	-0-	\$ 500	\$ 500	\$-0-
B.3.	10	\$ 3,500	\$ 500	\$ 3,000

4. CUSTOMER RETURNS OF MATERIAL WITHOUT CREDIT

Dr 1521 Inventory Held for Sale \$1,050
 Cr 1529.1F Materiel Returns Without Credit Given \$1,050

Entry to record a return of 3 inventory items from customers for which a credit is not granted. The Standard Price of each item is \$350 (3 x \$350 = \$1,050).

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (cost)
Beginning Inventory	100	\$34,500	\$7,000	\$27,500
B.2.	-0-	\$ 500	\$ 500	\$-0-
B.3.	10	\$ 3,500	\$ 500	\$ 3,000
B.4.	3	\$ 1,050	\$ 1,050	\$-0-

5. CUSTOMER RETURNS OF MATERIAL WITH CREDIT

Dr 1521 Inventory Held for Sale \$1,050. 1/
 Cr 1529.1D Materiel Returns at Standard \$1,050 1/

Dr 1529.1E Materiel Returns - Credit Given \$ 600 2/
 Cr 1311 Accounts Receivable-Government-Current \$ 600 2/

Entry to record a return of 3 inventory items from customers for which a credit of \$200 per item is granted.

1/ The Standard Price of each item is \$350 (3 x \$350 = \$1,050).

2/ \$200 credit per item x 3 items = \$600

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$34,500	\$7,000	\$27,500
B.2.	-0-	\$ 500	\$ 500	\$-0-
B.3.	10	\$ 3,500	\$ 500	\$ 3,000
B.4.	3	\$ 1,050	\$ 1,050	\$-0-
B.5.	3	\$ 1,050	\$ 450	\$ 600

6. SALE OF INVENTORY WITHOUT AN EXCHANGE

Dr 1311 Accounts Receivable-Government - Current \$14,000 1/
 Cr 5101 Revenue from Goods Sold - DBOF \$14,000 1/

Dr 6500 Cost of Goods Sold \$14,000 2/
 Cr 1521 Inventory Held for Sale \$14,000 2/

Entry to record sale of inventory and the associated cost of the goods sold. (Although the revenue and the cost of goods sold are, under the standard price method, initially recorded at the same value, a month-end adjusting entry adjusts the balance recorded as Cost of Goods Sold to the actual cost.)

1/ 40 items are sold for \$350 per item for a total of \$14,000.

2/ The standard price is \$350 per item for a total inventory reduction of \$14,000 (40 items x \$350 = \$14,000). [See month-end adjusting entry for adjustment of the "Cost of Goods Sold" account.]

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$34,500	\$7,000	\$27,500
B.2.	-0-	\$ 500	\$ 500	\$ -0-
B.3.	10	\$ 3,500	\$ 500	\$ 3,000
B.4.	3	\$ 1,050	\$ 1,050	\$ -0-
B.5.	3	\$ 1,050	\$ 450	\$ 600
B.6.	(40)	(\$14,000)		N\A

7. SALE OF INVENTORY WITH AN EXCHANGE

Dr 1523.1 Exchange (DLR) Inventory in Transit	\$5,250	<u>1/</u>
Dr 1311 Accounts Receivable-Government-Current	\$2,700	<u>2/</u>
Cr 5101 Revenue from Goods Sold - DBOF	\$5,250	<u>3/</u>
Cr 1529.3A Estimated Repair Costs	\$1,650	<u>4/</u>
Cr 1529.3B Allowance for Surcharge	\$1,050	<u>5/</u>
Dr 6500 Cost of Goods Sold	\$5,250	<u>6/</u>
Cr 1521 Inventory Held for Sale	\$5,250	<u>6/</u>

Entry to record sale of inventory and the associated cost of the goods sold when a reparable item is exchanged for a ready for issue item. Fifteen carcasses are exchanged for ready for issue items.

- 1/ 15 carcasses needing repair are to be sent, but have not yet been sent, in partial exchange for the items sold. The in-transit carcasses are recorded in Account 1523.1, "Exchange (DLR) Inventory in Transit," at their standard Price of \$5,250 [\$350 Standard Price x 15 carcasses = \$5,250. An estimated repair cost is established -- see note 4/ below.)
- 2/ The \$2,700 amount billed is the difference between the \$5,250 standard price of the items less the \$2550 value of the exchanged carcasses.
- 3/ 15 items sold for \$350 per item = \$5,250
- 4/ 15 carcasses x \$110 estimated cost to repair a carcass = \$1,650
- 5/ Approximate surcharge included in ready for issue inventory items. In this case, about 20%. [20% x \$5250 = \$1050]
- 6/ The standard price is \$350 per item for a Inventory Held for Sale reduction of \$5,250 (15 items x \$350 = \$5,250). [See month-end adjusting entry for adjustment of the "Cost of Goods Sold" account.]

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (cost)
Beginning Inventory	100	\$34,500	\$7,000	\$27,500
B.2.	-0-	\$ 500	\$ 500	\$ -0-
B.3.	10	\$ 3,500	\$ 500	\$ 3,000
B.4.	3	\$ 1,050	\$ 1,050	\$ -0-
B.5.	3	\$ 1,050	\$ 450	\$ 600
B.6.	(40)	(\$14,000)		N/A
B.7.	(15)	(\$ 5,250)		N/A

Exchange (DLR) Inventory in Transit				
Transaction	Quantity	Standard Price	Allowance for Repair	Amount Paid (Cost)
B.7.	15	\$ 5,250	\$ 2,700	\$ 2,550

8. RECEIPT OF EXCHANGE (DLR) INVENTORY

Dr 1523 Inventory Held for Repair \$5,250
 Cr 1523.1 Exchange (DLR) Inventory in Transit \$5,250

Entry to record receipt of exchange (DLR) inventory. The exchange item is recorded at its standard price. (A standard allowance for repair was established at the time the exchange transaction occurred -- see #7 above.)

Inventory Held for Repair				
Transaction	Quantity	Standard Price	Allowance for Repair	Amount Paid (Cost)
B.8.	15	\$ 5,250	\$ 2,700	\$ 2,550

Exchange (DLR) Inventory in Transit				
Transaction	Quantity	Standard Price	Allowance for Repair	Amount Paid (cost)
B.7.	15	\$ 5,250	\$ 2,700	\$ 2,550
B.8.	(15)	(\$ 5,250)	\$ 2,700	\$ 2,550
Total	-0-	-0-	-0-	-0-

9. REVALUATION OF EXCESS OR BEYOND REPAIR INVENTORY

Inventory is revalued to its net realizable value (approximately, 2 percent of standard price) when (1) it is stratified as potential reutilization/disposal [i.e., potential excess], (2) regardless of stratification level, carries a condition code of "H - Condemned," "P - Reclamation," or "S - Scrap," or (3) determined to be beyond repair [i.e., not able to be repaired]. The loss on revaluation writedown shall be recognized in the period in which the writedown occurs. The loss shall not include unrealized gains associated with

that inventory. The illustration below is to recognize the loss associated with items stratified as potential excess.

Dr 1524	Inventory - Excess, Obsolete, and Beyond Repair	\$ 70	<u>1/</u>
Dr 1529.1A	Realization of Holding Gains/Losses	\$ 819	<u>2/</u>
Dr 7291.2	Excess/Obsolescence/Spoilage Loss	\$2,611	<u>3/</u>
Cr 1521	Inventory Held for Sale	\$3,500	<u>1/</u>

Entry to reclassify inventory items when those items are stratified as potential excess. In this illustration, 10 items with a carrying value of \$350 per item = \$3,500 were declared potential excess. [NOTE: In this illustration, these potential excess items are to be subsequently transferred to reutilization. See "Month 2," transaction 3 on pages 85-86.]

- 1/ 10 items with a Standard Price of \$350 per item = \$3,500 were determined potentially excess. Items declared potentially excess should be valued at net realizable value (currently, approximately 2 percent of standard price).
- 2/ When items move between inventory categories, the allowance accounts in the respective inventory categories are decreased/increased respectively. In this case, items are moving from the "Inventory Held for Sale" category to the "Inventory - Excess, Obsolete, and Beyond Repair" category. The amount of the allowance is determined through use of the percentage amount determined in the month-end adjustment of cost of goods (see item 10 below). The percentage amount, in this illustration, is 76.60 percent. $76.60 \text{ percent} \times \$3,500 = \$2,681 - \$3,500 = \$819$.
- 3/ The \$3500 carrying value of the inventory less the \$70 salvage value and less the \$819 allowance equals the \$2,611 loss.

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (cost)
Beginning Inventory	100	\$34 ,500	\$7,000	\$27,500
B.2.	-0-	\$ 500	\$ 500	\$ -0-
B.3.	10	\$ 3,500	\$ 500	\$ 3,000
B.4.	3	\$ 1,050	\$ 1,050	\$ -0-
B.5.	3	\$ 1,050	\$ 450	\$ 600
B.6.	(40)	(\$14,000)		N/A
B.7.	(15)	(\$ 5,250)		N/A
B.9.	(10)	(\$ 3,500)	(\$ 819)	N/A

Inventory - Excess, Obsolete, and Beyond Repair				
Transaction	Quantity	2% of Standard Price	Allowance Amount	Amount Paid (Cost)
B.9.	10	\$ 70	N/A	N/A

10. MONTH END ADJUSTMENT OF INVENTORY VALUES TO LATEST ACQUISITION COST

a. The preceding processes are designed for those DBOF supply management business areas maintaining inventory values at standard [selling] price. For financial statement presentation, the inventory values at standard [selling] price must be adjusted to latest acquisition cost. DOD Components that value inventory at the standard (selling) price of that inventory shall revalue that inventory to its latest acquisition cost for financial reporting purposes.

b. The procedure to revalue inventory to its latest acquisition cost is to deduct the cost recovery (surcharge) amount and, if applicable, the prior year inflation amount from both the inventory at standard price value and the allowance for holding gain and loss account. For example, assume that the surcharge factor is 15 percent. Then, inventory at standard price would be reduced in valuation by 15 percent with an equal reduction (by dollar amount, not percentage amount) made to the allowance for holding gain loss account. If the potential excess and beyond repair (i.e., not repairable) inventory has been previously recorded in the financial inventory category, "Inventory - Excess, Obsolete, and Beyond Repair," should be recorded at its net realizable value and does not have an allowance account associated with it. If the entry to adjust the value of potential excess inventory has not been previously made, as indicated in transaction B.9. above, then the entry should be made at this time. The end-of-month entries to adjust inventory recorded at, standard [selling] price to its latest acquisition cost are:

INVENTORY HELD FOR SALE

The purpose of the following entry is to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr 1529.1Q Latest Acquisition Cost Adjustment	\$2,675	
Cr 1521 Inventory Held for Sale		\$2,675

INVENTORY HELD FOR REPAIR

The purpose of the following entry is to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr 1529.3B Estimated Exchange Costs	\$1,050	
Cr 1523 Inventory Held for Repair		\$1,050

NOTE: The following inventory accounts are not used in this illustration. However, the month-end adjusting entry for them, when they are applicable are as follows:

INVENTORY IN TRANSIT FROM PROCUREMENT

Generally, inventory in transit from commercial sources is at acquisition cost and no month-end adjustment is necessary. However, if inventory in transit from commercial sources is valued at standard price, then the following is necessary to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr 1529.1Q Latest Acquisition Cost Adjustment	
Cr 1521.1 Inventory in Transit from Procurement	

INVENTORY IN TRANSIT FROM DoD ENTITIES

The purpose of the following entry is to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr 1529.1Q Latest Acquisition Cost Adjustment	
Cr 1521.2 Inventory in Transit from DoD Entities	

INVENTORY HELD FOR FUTURE SALE

The purpose of the following entry is to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr 1529.2 Allowance for Holding Gain/Loss -
 Inventory Held for Future Sale
 Cr 1522 Inventory Held for Future Sale

c. The result of applying the adjustment shall result in an equal, but opposite, adjustment for financial statement presentation purposes to the ending inventory value and that inventory's unrealized holding gain as shown below:

<u>Inventory Category</u>	<u>Standard Price</u>	<u>Adjustment Amount</u>	<u>Latest Acquisition Cost</u>
Inventory Held For Sale	\$17,850	\$2,675	\$15,175
Inventory Held for Repair	<u>\$ 5,250</u>	<u>\$1,050</u>	<u>\$ 4,200</u>
TOTAL	\$23,100	\$3,725	\$19,375

<u>Allowance Category</u>	<u>Pre-Adjustment Value</u>	<u>Adjustment Amount</u>	<u>Post-Adjustment Value</u>
Latest Acquisition Cost Adjustment	\$4,177	\$2,675	\$1,502
Allowance for Repair	<u>\$2,700</u>	<u>\$1,050</u>	<u>\$1,650</u>
TOTAL	\$6,877	\$3,725	\$3,152

d. The end of month adjustments shown above shall be reversed immediately after financial statement preparation. The reversing entries are:

INVENTORY HELD FOR SALE

Dr 1521 Inventory Held for Sale \$2,675
 Cr 1529.1Q Latest Acquisition Cost Adjustment \$2,675

INVENTORY HELD FOR REPAIR

Dr 1523 Inventory Held for Repair \$1,050
 Cr 1529.3B Estimated Exchange Costs \$1,050

NOTE: The following inventory accounts are not used in this illustration. However, the month-end adjusting entry for them, when they are applicable, are as follows:

 Inventory Held for Future Sale

11. MONTH-END ADJUSTMENT OF COST OF GOODS SOLD

Dr 1529.1A Realization of Holding Gains/Losses \$4,504 1/
 Cr 6500 Cost of Goods Sold \$4,504 1/

In the preceding entries (transactions B.6. and B.7.), account 6500, "Cost of Goods Sold," was debited for the standard price of inventory sold. The purpose of this entry is to adjust account 6500 to the cost (vice standard price) of inventory sold. The standard price (i.e., sales price) will generally be more than the cost due to the inclusion of cost recovery elements in the selling price.

1/

INVENTORY HELD FOR SALE

	Cost	Unrealized <u>Gain</u>	Standard <u>Price</u>
Beginning Inventory	\$27,500	\$7,000	\$34,500
Price Change		\$ 500	\$ 500
Purchases	<u>\$ 3,600</u>	<u>\$2,000</u>	<u>\$ 5,600</u>
TOTAL	<u>\$31,100</u>	<u>\$9,500</u>	<u>\$40,600</u>
Excess Inventory	(\$ 2,681)	(\$ 819)*	(\$ 3,500)
Cost of Goods Sold	<u>(\$14,746)</u>	<u>(\$4,504)*</u>	<u>(\$19,250)</u>
Ending Inventory (at Standard)	\$13,673	\$4,177	\$17,850
LAC Adjustment (see B.10.)		<u>(\$2,675)</u>	<u>(\$ 2,675)</u>
Ending Inventory (at LAC)		<u>\$1,502</u>	<u>\$15,175</u>

* Cost of Goods Sold Computation

\$9,500 Unrealized Gain + \$40,600 Standard Price = .234
 .234 x \$3,500 Excess Inventory at Standard Price = \$819 gain reduction
 .234 x \$19,250 Goods Sold at Standard Price = \$4,504 realized gain
 \$19,250 Goods Sold at Standard Price - \$4,504 realized gain = \$14,746

C. MONTH TWO

1. PURCHASE OF INVENTORY ITEMS

Dr 1521 Inventory Held for Sale	\$8,750	<u>1/</u>
Cr 1529.10 Purchases at Standard Price	\$8,750	<u>1/</u>
Dr 1529.1C Purchases at Cost	\$7,750	<u>2/</u>
Cr 2110 Applicable Accounts Payable Series	\$7,750	<u>2/</u>

1/ The standard price of each item is \$350 (25x \$350 = \$8,750)

2/ The purchase cost of each item is \$310 (25x \$310 = \$7,750)

The unrealized gain per item is \$8,750 - \$7,750 = \$1,000

Entry to record \$310 per item purchase of 25 inventory items with a standard price of \$350 per item.

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	51	\$17,850	\$4,177	\$13,673
C.1.	25	\$ 8,750	\$1,000	\$ 7,750

2. REPAIR OF EXCHANGED INVENTORY

Dr 1521 Inventory Held for Sale	\$4,550	<u>1/</u>
Dr 1524 Inventory - Excess, Obsolete, and Beyond Repair	\$ 14	<u>2/</u>
Dr 7291.2 Excess/Obsolescence/Spoilage Loss	\$ 686	<u>3/</u>
Cr 1523 Inventory Held for Repair	\$5,250	<u>4/</u>
Dr 1529.1X Actual Repair Costs	\$1,500	<u>5/</u>
Cr 2111 Accounts Payable-Government-Current	\$1,500	<u>5/</u>
Dr 1529.3A Estimated Repair Costs	\$1,650	<u>6/</u>
Dr 1529.3B Estimated Exchange Costs	\$1,050	<u>6/</u>
Cr 1529.1M Completed Inventory Repairs	\$2,700	<u>6/</u>

1/ \$4,550 = the \$350 Standard Price x 13 repaired items. [Note that this amount does not equal the \$5,250 amount recorded in account 1523, "Inventory Held for Repair." In this illustration, the reason for this is because although 15 items were sent for repair, the repair facility determined that 2 of the 15 exchanged items could not be repaired. [\$350 Standard Price per item x 2 items = \$700. \$5,250 - \$700 = \$4,550].

2/ Two of the carcasses could not be repaired. The standard price of the items was \$350 x 2 items = \$700. The net realizable value is approximately 2 percent. \$700 x 2% = \$14.

- 3/ The loss is equal to the \$700 standard price of the two items less the \$14 net realizable value = \$686.
- 4/ Upon, receipt of repaired items, GLA 1523, "Inventory Held for Repair," is always reduced (credited) in the amount that was established for the repaired items.
- 5/ 13 of the exchanged carcasses could be repaired. \$1,500 was the amount charged by the repair facility for 13 repaired carcasses.
- 6/ Upon receipt of repaired items, GLA 1529.3A and GLA 1529.3B are always reduced (debited) in the amount that was established for the repaired items.

Inventory Held For Sale

C.4.	6	\$ 2,100	\$ 2,100	N/A

5. SALE OF INVENTORY WITHOUT AN EXCHANGE

Dr 1311 Accounts Receivable-Government - Current \$22,750 1/
 Cr 5101 Revenue from Goods Sold - DBOF \$22,750 1/

Dr 6500 Cost of Goods Sold \$22,750 2/
 Cr 1521 Inventory Held for Sale \$22,750 2/

Entry to record sale of inventory and the associated cost of the goods sold. The sales price will generally be more than the latest acquisition cost due to the inclusion of cost recovery elements in the selling price.

1/ 65 items are sold for \$350 per item for a total of \$22,750.

2/ The standard price is \$350 per item for a total inventory reduction of \$22,750 (65 items x \$350 = \$22,750). [See month-end adjusting entry for adjustment of the "Cost of Goods Sold" account.]

Inventory Held For Sale				
Transaction	Quantity	Standard Price	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	51	\$17,850	\$4,177	\$13,673
C.1.	25	\$ 8,750	\$1,000	\$ 7,750
C.2.	13	\$4,550	\$1,200	\$ 3,350
C.4.	6	\$ 2,100	\$2,100	N/A
C.5.	(65)	(\$22,750)		

6. MONTH END ADJUSTMENT OF INVENTORY VALUES TO LATEST ACQUISITION COST

a. The procedure to revalue inventory to its latest acquisition cost is to deduct the cost recovery (surcharge) amount and, if applicable, the prior year inflation amount from both the inventory at standard price value and the allowance for holding gain and loss account. For example, assume that the surcharge factor is 15 percent. Then, inventory at standard price would be reduced in valuation by 15 percent with an equal reduction (by dollar amount, not percentage amount) made to the allowance for holding gain loss account. If the potential excess and beyond repair (i.e., not repairable) inventory has been previously recorded in the financial inventory category, "Inventory - Excess, Obsolete, and Beyond Repair," should be recorded at its net realizable value and does not have an allowance account associated with it. If an entry to adjust the value of potential excess inventory has not been previously made, then the entry should be made at this time. The end-of-month entries to adjust inventory recorded at standard [selling] price to its latest acquisition cost are:

INVENTORY HELD FOR SALE

The purpose of the following entry is to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding, gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr	1529.1Q Latest Acquisition Cost Adjustment	\$1,575	
	Cr 1521 Inventory Held for Sale		\$1,575

NOTE: The following inventory accounts are not used in this illustration. However, the month-end adjusting entry for them, when they are applicable, are as follows:

INVENTORY HELD FOR REPAIR

The purpose of the following entry is to remove, for financial reporting purposes, surcharges [and, if applicable, prior year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

Dr	1529.3B Estimated Exchange Costs	
	Cr 1523 Inventory Held for Repair	

INVENTORY IN TRANSIT FROM PROCUREMENT

Generally, inventory in transit from commercial sources is at acquisition cost and no month-end adjustment is necessary. However, if inventory in transit from commercial sources is valued at standard price, then the following is necessary to remove, for financial reporting purposes, surcharges [and, if applicable, prior

year inflation] from both the inventory at its standard price and unrealized holding gains. After this adjustment, the inventory will be at Latest Acquisition Cost. Immediately after financial report preparation, the entry shall be reversed.

ACCOUNTING ILLUSTRATION

ACCOUNTING FOR INVENTORIES WHEN LATEST ACQUISITION COST PRACTICES

A. GENERAL

1. The Defense Logistics Agency records inventory at its latest acquisition cost. That value may change with each acquisition made during a fiscal year. The difference between the actual cost of items held in inventory and the value of those same items if they were acquired at the latest acquisition cost is an unrealized gain which will not become realized until that item is sold or otherwise leaves the supply management stocking point. Holding gain and loss accounts have been established to accumulate the value of holding gains and losses during the fiscal year. When inventory is classified as potential excess, sold or otherwise leaves the stocking point, the previously unrealized holding gain or loss is realized and recorded in account 1529.1A, "Realization of Holding Gains/Losses." The holding gains and accounts are:

1529.1A	Realization of Holding Gains/Losses
1529.1B	Purchases at Standard Price
1529.1C	Purchases at Cost
1529.1D	Materiel Returns at Standard Price
1529.1E	Materiel Returns - Credit Given
1529.1F	Materiel Returns Without Credit Given
1529.1G	Standard Price Changes-Gain
1529.1H	Accounting Adjustments-Gain
1529.1J	Assembly/Disassembly-Gain
1529.1K	Physical Inventory Adjustments-Gain
1529.1L	Incoming Shipments-Gain
1529.1M	Completed Inventory Repairs
1529.1N	Receipts of Materiel Without Charge
1529.1P	Other-Gain
1529.1Q	Latest Acquisition Cost Adjustment
1529.1R	Standard Price Changes-Loss
1529.1S	Accounting Adjustments-Loss
1529.1T	Assembly/Disassembly-Loss
1529.1U	Physical Inventory Adjustments-Loss
1529.1V	Incoming Shipments-Loss
1529.1W	Shrinkage and Other Adjustments-Loss
1529.1X	Actual Repair Costs
1529.1Y	Issues Without Reimbursement
1529.1Z	Other-Loss

NOTE: Every event that results in a change in the quantity of inventory, the value of existing inventory, or both should be reflected in one of the holding gain or loss accounts specified above. If one of the above accounts is not descriptive of a recurring and significant inventory event, then an additional holding gain/loss account(s) may be established for that purpose.

2. For financial statement presentation, inventory is shown at its latest acquisition cost. The cost of inventory items sold is shown, in accordance with Statement of Federal Financial Accounting Standards No. 3,

"Accounting for Inventory and Related Property," at an approximation of its historical (actual) cost.

3. The following simplified illustration provides an explanation, in accounting terms, of the accounting necessary to properly record the DBOF supply management inventory for those supply management business areas which maintain inventory values at the latest invoice price. The illustration demonstrates the affect on unrealized holding gains due to purchases, latest acquisition cost adjustments, inventory returns, and other transactions. The illustration also demonstrates computation necessary to properly adjust cost of goods sold to the actual cost of the items sold.

B. MONTH ONE

1. ESTABLISH INITIAL INVENTORY ALLOWANCE AMOUNT. As of October 1, 1994, general ledger account 1529.1, "Allowance for Holding Gain/Loss - Inventory Held for Sale," general ledger account 1529.2, "Allowance for Holding Gain/Loss - Inventory Held in Reserve for Future Sale," and general ledger account 1529.3, "Allowance for Repairs," should be established to identify cost recovery factors (i.e., surcharges), prior year inflation, repair costs, and write-down of potential excess at the same amount of the last adjustment contained in the FY 1994 Chief Financial Officer Act financial report submission. This is a one-time step to initially establish the allowance account at the same value as reported on the prior year CFO submission. For following years, the inventory allowance account will be continued at its then current amount. For illustration purposes, assume the initial allowance amount for "Inventory Held For Sale" is \$2,000. The following tables are included to assist in the understanding of the inventory accounting process. The table to illustrate the beginning inventory position for "Inventory Held for Sale," is:

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000	\$27,500

2. PURCHASE OF INVENTORY ITEMS

Dr	1521 Inventory Held for Sale	\$3,000	
	Cr 2110 Applicable Accounts Payable Series		\$3,000

Entry to record purchase of 10 inventory items at \$300 per item.
(If the purchase quantity and price is a representative purchase,
then that price shall be the "Latest Acquisition Cost.")

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000	\$27,500
B.2.	10	\$ 3,000	\$ -0-	\$ 3,000

3. ADJUSTMENT OF INVENTORY TO LATEST ACQUISITION COST.

Dr 1521 Inventory Held for Sale \$ 500
 Cr 1529.1Q Latest Acquisition Cost Adjustment \$ 500 1/

Entry to adjust value of other inventory items in stock to the latest acquisition cost when the recorded value of those items is LESS than the latest acquisition cost. [Assume that 100 items are in inventory and the previous latest acquisition cost was \$295 per item. Those items require revaluation to the current latest acquisition cost of \$300. The revaluation will then require recognition of a \$500 unrealized gain -- 100 items @ \$5 adjustment per item = \$500.]

1/ Gains or losses associated with the valuation of inventory, although recognized, are not realized. Realization of the gain or loss occurs only when an item of inventory is sold or otherwise disposed.

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000	\$27,500
B.2.	10	\$ 3,000	\$ -0-	\$ 3,000
B.3.	N/A	\$ 500	\$ 500	N/A

4. CUSTOMER RETURNS OF MATERIAL WITHOUT CREDIT

Dr 1521 Inventory Held for Sale \$900
 Cr 1529.1F Materiel Returns Without Credit Given \$900

Entry to record a return of 3 inventory items from customers for which a credit is not granted. The Latest Acquisition Cost of each item is \$300 (3 x \$300 = \$900).

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000,	\$27,500
B.2.	10	\$ 3,000	\$ -0-	\$ 3,000
B.3.	N/A	\$ 500	\$ 500	N/A
B.4.	3	\$ 900	\$ 900	\$-0-

5. CUSTOMER RETURNS OF MATERIAL WITH CREDIT

Dr 1521 Inventory Held for Sale \$900 1/
 Cr 1529.1D Materiel Returns at Standard \$900 1/

Dr 1529.1E Materiel Returns - Credit Given \$600 2/
 Cr 1311 Accounts Receivable-Government-Current \$600 2/

Entry to record a return of 3 inventory items from customers for which a credit of \$200 per item is granted.
1/ The LAC of each item is \$300 (3 x \$300 = \$900).
2/ \$200 credit per item x 3 items = \$600

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000	\$27,500
B.2.	10	\$ 3,000	\$ -0-	\$ 3,000
B.3.	N/A	\$ 500	\$ 500	N/A
B.4.	3	\$ 900	\$ 900	\$-0-
B.5.	3	\$ 900	\$ 300	\$600

6. SALE OF INVENTORY

Dr 1311 Accounts Receivable-Government - Current \$19,250 1/
 Cr 5101 Revenue from Goods Sold - DBOF \$19,250 1/

Dr 6500 Cost of Goods Sold \$16,500 2/
 Cr 1521 Inventory Held for Sale \$16,500 2/

Entry to record sale of inventory and the associated cost of the goods sold.

1/ 55 items are sold for \$350 per item for a total of \$19,250.

2/ The latest acquisition cost is \$300 per item for a total inventory reduction of \$16,500 (55 items x \$300 = \$16,500).

[See month-end adjusting entry for adjustment of the "Cost of Goods Sold" account.]

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000	\$27,500
B.2.	10	\$ 3,000	\$ -0-	\$ 3,000
B.3.	N/A	\$ 500	\$ 500	N/A
B.4.	3	\$ 900	\$ 900	\$-0-
B.5.	3	\$ 900	\$ 300	\$ 600
B.6.	(55)	(\$16,500)		

7. REVALUATION OF EXCESS INVENTORY

Dr 1524 Inventory - Excess, Obsolete,
 and Beyond Repair \$ 70 1/
 Dr 1529.1A Realization of Holding Gains/Losses \$ 319 2/
 Dr 7291.2 Excess/Obsolescence/Spoilage Loss \$2,611 3/
 Cr 1521 Inventory Held for Sale \$3,000 1/

Entry to reclassify inventory items when those items are stratified as potential excess. [NOTE: In this illustration, these potential excess items are transferred to reutilization and marketing in the following month. See "Month 2," transaction 3 on page 101.]

1/ 10 items with a carrying value of \$300 per item = \$3,000 were determined potentially excess. Items declared potentially excess should be valued at net realizable value (currently, approximately 2 percent of standard [sales] price -- in this

illustration, the sales price is \$350 per item x 10 items = \$3500 x 2 percent = \$70).

- 2/ When items move between inventory categories, the allowance account in the respective inventory categories are decreased/increased respectively. In this case items are moving from the "Inventory Held for Sale" category to the "Inventory Held for Future Sale" category. The amount of the allowance is determined by adding the net value of the allowance account from which the inventory is to be transferred and then dividing that net total by the number of items in inventory. In this case, the net total of the allowance account is \$3,700 [\$2,000 beginning balance + \$500 price change gain + \$1,200 gain on customer returns = \$3,700]. $\$3,700 \div 116 \text{ items} = \31.90 per item x 10 items = \$319. An alternative computation is to use the percentage amount determined in the month-end adjustment of cost of goods. That percentage amount, in this illustration is 89.37 percent. $89.37 \text{ percent} \times \$3,000 = \$2,681 - \$3,000 = \$319$.
- 3/ The \$3000 carrying value of the inventory less the \$70 salvage value and less the \$319 allowance equals the \$2,611 loss.

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	100	\$29,500	\$2,000	\$27,500
B.2.	10	\$ 3,000	\$ -0-	\$ 3,000
B.3.	N/A	\$ 500	\$ 500	N/A
B.4.	3	\$ 900	\$ 900	\$-0-
B.5.	3	\$ 900	\$ 300	\$600
B.6.	(55)	\$16,500)		
B.7.	(10)	(\$ 3,000)	(\$ 319)	N/A

Inventory - Excess, Obsolete, and Beyond Repair				
Transaction	Quantity	2% of Standard Price	Allowance Amount	Amount Paid (Cost)
B.7.	10	\$ 70	N/A	N/A

7. MONTH-END ADJUSTMENT OF COST OF GOODS SOLD

Dr 1529.1A	Realization of Holding Gains/Losses	\$1,754	<u>1/</u>
Cr 6500	Cost of Goods Sold		\$1,754 <u>1/</u>

Entry to record sale of inventory and the associated cost of the goods sold. The sales price will generally be more than the latest acquisition cost due to the inclusion of cost recovery elements in the selling price.

INVENTORY HELD FOR SALE

1/

	Cost	Unrealized Gain (Loss)	LAC
Beginning Inventory	\$27,500	\$2,000	\$29,500
Price Change		\$ 500	\$ 500
Purchases	<u>\$ 3,600</u>	<u>\$1,200</u>	<u>\$ 4,800</u>
TOTAL	<u>\$31,100</u>	<u>\$3,700</u>	<u>\$34,800</u>
Excess Inventory Transfer	(\$ 2,681)	(\$ 319) *	(\$ 3,000)
Cost of Goods Sold	<u>(\$14,746)</u>	<u>(\$ 1,754) *</u>	<u>(\$16,500)</u>
Ending Inventory	<u>\$13,673</u>	<u>\$ 1,627</u>	<u>\$15,300</u>

* Cost of Goods Sold Computation

\$3,700 Unrealized Gain + \$34,800 LAC = .1063
 .1063 x \$3,000 Excess Inventory at LAC = \$319 realized gain
 .1063 x \$16,500 Cost of Goods Sold at LAC = \$1,754 realized gain
 \$16,500 Cost of Goods Sold at LAC - \$1,754 realized gain = \$14,746

Inventory Held For Sale

Cost of Goods Sold	\$14,746			\$14,746

C. MONTH TWO

1. PURCHASE OF INVENTORY ITEMS

Dr 1521 Inventory Held for Sale \$7,750
 Cr 2110 Applicable Accounts Payable Series \$7,750

Entry to record purchase of 25 inventory items at \$310 per item.
 (If the purchase quantity and price is a representative purchase,
 then that price shall be the "Latest Acquisition Cost.")

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	51	\$15,300	\$1,627	\$13,673
C.1.	25	\$7,750	N/A	\$7,750

2. ADJUSTMENT OF INVENTORY TO LATEST ACQUISITION COST.

Dr 1521 Inventory Held for Sale \$ 510
 Cr 1529.1Q Latest Acquisition Cost Adjustment \$ 510 1/

Entry to adjust value of the 51 inventory items in stock to the latest acquisition cost. [The latest acquisition cost of the 51 items in stock was \$300 per item. Those items require revaluation to the current latest acquisition cost of \$310. The revaluation will then require recognition of a \$510 unrealized gain -- 51 items @ \$10 adjustment per item = \$510.]

1/ Note that under the latest acquisition cost method, gains or losses associated with the valuation of inventory, although recognized, are not realized. Realization of the holding gain or loss occurs only when an item of inventory is sold.

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount paid (Cost)
Beginning Inventory	51	\$15,300	\$1,627	\$13,673
C.1.	25	\$7,750	N/A	\$7,750
C.2.		\$ 510	\$ 510	N/A

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	51	\$15,300	\$1,627	\$13,673

C.2.		\$ 510	\$ 510	N/A
C.4.	6	\$1,860	\$1,860	\$-0-

5. SALE OF INVENTORY

Dr 1311 Accounts Receivable-Government - Current \$22,750 1/
 Cr 5101 Revenue from Goods Sold - DBOF \$22,750 1/

Dr 6500 Cost of Goods Sold \$20,150 2/
 Cr 1521 Inventory Held for Sale \$20,150 2/

Entry to record sale of inventory and the associated cost of the goods sold. The sales price will generally be more than the latest acquisition cost due to the inclusion of cost recovery elements in the selling price.

1/ 65 items are sold for \$350 per item for a total of \$22,750.

2/ The latest acquisition cost is \$310 per item for a total inventory reduction of \$20,150 (65 items x \$310 = \$20,150).

[See month-end adjusting entry for adjustment of the "Cost of Goods Sold" account.]

Inventory Held For Sale				
Transaction	Quantity	Latest Acquisition Cost	Allowance Amount	Amount Paid (Cost)
Beginning Inventory	51	\$15,300	\$1,627	\$13,673
C.1.	25	\$ 7 , 7 5 0	N/A	\$7,750
C.2.		\$ 510	\$ 510	N/A
C.4.	6	\$ 1,860	\$1,860	\$-0-
C.5.	(65)	(\$20,150)		

6. MONTH-END ADJUSTMENT OF COST OF GOODS SOLD

Dr 1529.1A Realization of Holding Gains/Losses \$ 2,721 1/
 Cr 6500 Cost of Goods Sold \$ 2,721 1/

In the preceding entry (transaction C.5.), account 6500, "Cost of Goods Sold," was debited for the latest acquisition cost of inventory sold. The purpose of this entry is to adjust account 6500 to the historical cost (vice latest acquisition cost) of inventory sold.

1/

INVENTORY HELD FOR SALE

	Cost	Unrealized Gain	LAC
Beginning Inventory	\$13,673	\$1,627	\$15,300
Purchases	\$ 7,750		\$ 7,750
Price Change		\$ 510	\$ 510
Physical Inventory Gain		<u>\$ 1,860</u>	<u>\$ 1,860</u>
TOTAL	<u>\$21,423</u>	<u>\$3,997</u>	<u>\$25,420</u>
Cost of Goods Sold	<u>(\$17,429)</u>	<u>(\$2,721)</u>	<u>(\$20,150)</u>
Ending Inventory	\$ 3,994	\$1,276	\$ 5,270

* Cost of Goods Sold Computation

\$3,977 Unrealized Gain + \$29,450 LAC = .1350
 .1350 x \$20,150 Goods Sold at LAC = \$2,721 realized gain
 \$20,150 Goods Sold at LAC - \$2,721 realized gain = \$17,429

CHAPTER 56

OPERATING MATERIALS AND SUPPLIES

A. GENERAL

1. General Information. General information on materials and supplies may be found in Volume 4, Accounting Policy and Procedures," chapter 4, "Materials and Supplies," prescribes the accounting policy and related requirements necessary to establish financial control over DoD materials and supplies, including stockpile materials. This chapter includes information specific to the operation of the Defense Business Operation Fund and its activities.

2. Definition. Operating materials and supplies consist of tangible personal property to be consumed in normal operations. Excluded from "operating materials and supplies" are (a) goods that have been acquired for use in constructing real property, (b) stockpile materials, and (c) inventory. [See following distinction between operating materials and supplies and inventory.]

3. Distinction between Operating Materials and Supplies and Inventory. "Inventory" consists of items acquired for the specific purpose of sale to others. The Supply Management business area and Defense Commissary Agency are the only DBOF business areas that should hold inventory. All DBOF activities, including those within the Supply Management and Defense Commissary Agency business areas, generally hold operating materials and supplies for use in their normal day-to-day operations. As an example of the distinction, items when held by the Supply Management business area for sale are classified as "Inventory." Those same items, when sold to, for example, a Depot Maintenance activity for use in the process of repair or other operations of the activity are classified as "Operating Materials and Supplies." DBOF business area should report as operating materials and supplies items purchased both commercially and from the supply system including "office" supplies and other materials consumed in the performance of mission.

4. Acceptance and Utilization of Customer-Furnished Material. Customer-furnished material shall be accepted and utilized only in those instances in which it is the general policy of the customer to furnish the materials involved. Customer-furnished materials shall be accounted for and reported to customers separately and shall be related to specific end products in such a manner as may be required by those customers.

B. CATEGORIES OF OPERATING MATERIALS AND SUPPLIES

1. The categories of operating materials and supplies are discussed in Volume 4, Chapter 4, of this Regulation. A summarization of those categories are:

1. Account 1511 - Operating Materials and Supplies Held for Use. Materials and supplies that do not exceed the amount expected to be used within 30 days unless justifying documentation supporting a supply in excess of 30 days is developed and maintained for review. A typical accounting entry to record Operating Materials and Supplies Held for Use is:

Dr 1511 Operating Materials and Supplies Held for Use
Cr 2111 Accounts Payable-Government-Current

If the materials and supplies were originally recorded as "in transit," (see subparagraph d. below) the following entry is applicable:

Dr 1511 Operating Materials and Supplies Held for Use
Cr 1514 Operating Materials and Supplies in Transit

b. Account 1512 - Operating Materials and Supplies Held for Future Use. Materials and supplies maintained because they are not readily available in the market or because it is likely they will be needed subsequently. While it is possible that items may be procured for direct placement in this category, it is more likely that items will migrate from Operating Materials and Supplies Held for Use. A typical accounting entry to record Operating Materials and Supplies Held for Use is:

Dr 1512 Operating Materials and Supplies Held for Future Use
Cr 1511 Operating Materials and Supplies Held for Use

c. Account 1513 - Excess, Obsolete, and Unserviceable Operating Materials and Supplies. This consists of:

(1) Operating materials and supplies that exceed the amount on hand that can be used within one year.

(2) Operating materials and supplies that are no longer needed due to changes in technology, laws, customs, or operations.

(3) Operating materials and supplies that are physically damaged and cannot be consumed in operations.

A typical accounting entry to record Excess, Obsolete, and Unserviceable Operating Materials and Supplies is:

Dr 1513 Operating Materials and Supplies - Excess, Obsolete
and Unserviceable
Dr 7293 Other Miscellaneous Losses
Cr 1511 Operating Materials and Supplies Held for Use
Cr 1512 Operating Materials and Supplies Held for Future Use

d. Account 1514 - Operating Materials and Supplies in Transit. Materials and supplies for which an invoice has been received prior to physical receipt of the invoiced materials and supplies. A typical accounting entry to record Operating Materials in Transit is:

Dr 1514 operating Materials and Supplies in Transit
Cr 2111 Accounts Payable-Goverment-Current

When the materials and supplies are received, the following accounting entry should be recorded:

Dr 1511 Operating Materials and Supplies Held for Use
Cr 1514 Operating Materials and Supplies in Transit

e. Account 1515 - Operating Materials and Suppiles Under Development-DBOF. This account is used by the Defense Business Operations Fund to accumulate the cost of non-capital assets in the process of development or manufacture for use and retention by the performing activity. Upon completion of the asset, its value is transferred to account 1511. (Capital assets in the process of development or manufacture for use and retention by the performing business area activity are accounted for within account 1725.). A typical accounting entry to record Operating Materials Under Development is:

Dr 1515 Operating Materials and Supplies Under Development
Cr 6000 Series of Operating Program/Expenses

When the asset is completed, account 1515 shall be relieved through the following accounting entry:

Dr 1511 Operating Materials and Supplies Held for Use
Cr 1515 Operating Materials and Supplies Under Development

C. CONSUMPTION OF OPERATING MATERIALS AND SUPPLIES

1. Items to be Used or Consumed in Operations. Items purchased by DBOF activities to be consumed in the performance of their missions shall be recorded and reported as "Operating Materials and Supplies," (Account Series 1510) versus "Inventory," (Account Series 1520). "Operating Materials and Supplies" shall be valued and reported at historical cost.

2. Items Used or Consumed in Operations

a. Operating Expense. Operating materials and supplies consumed by DBOF activities in the performance of their missions shall be recorded and reported as an operating expense in the period they are issued for consumption (this is termed the "consumption method of accounting"). In certain cases, operating materials and supplies may be reported as an operating expense when purchased (this is termed the "purchase method of accounting"). The purchase method of accounting may be used within the Defense Business Operations Fund only for those operating materials and supplies that are not significant in dollar amount and are in the hands of the end user (e.g., performing cost center) for use in normal operations (as an example, pre-expended bin supplies). A typical accounting entry to record the consumption or issuance for consumption of operating materials and supplies is:

Dr 6121 Supplies and Materials

Cr 1511 Operating Materials and Supplies Held for Use

Entry to record consumption or issue for consumption of operating materials and supplies.

b. Work in Process. Some DBOF activities, primarily those involved in the provision of service-type operations, recognize operating materials and supplies as an expense of the period in which the materials and supplies are used or issued for use and, as a result, do not use a "work in process" general ledger account. Other DBOF activities, primarily those involved in depot maintenance or other industrial-type operations, who routinely perform tasks that take more than a month, transfer the expense to a work in process account so that costs may be matched to revenue upon completion of the task. Guidance relating to accounting for work in process is included within chapter 57 of this volume. Items to be used or consumed in the production of goods and services for sale shall not be recorded within a work in process account until such time as they are issued for use or consumption in response to a customer order. Prior to such release, those items shall be classified as "Operating Materials and Supplies." A typical accounting entry to record the assignment of operating materials and supplies cost to work in process is:

Dr 1581 Work in Process - In House

Cr 6121 Supplies and Materials

Entry to record assignment of supplies and materials cost to work in process.

3. Disposition of Completed Products. Completed products in response to a customer order may not be retained as assets (i.e., finished goods) of DBOF activities. Upon completion, goods and services resulting from customer orders shall be billed promptly to customers. Delay or deferment of billing pending customer acceptance of finished work is not authorized. Parts and supplies manufactured for internal DBOF use shall be transferred, upon completion, to the operating materials and supplies account." A typical accounting entry to record the completion of a task previously recorded in work in process is:

Dr 6500 Cost of Goods Sold

Cr 1581 Work in Process - In House

Entry to transfer of work in process to cost of goods sold upon completion of a task previously recorded in work in process.

D. DISPOSAL OF EXCESS MATERIALS

1. Policy. It is DBOF policy that each business area record all of its costs and develop billing rates to recover its costs. In certain circumstances, however, exceptions may be granted to the policy that all costs must be recovered through billing rates. Exceptions are granted in the following ways:

a. Annual budget guidance provided by the Under Secretary of Defense (Comptroller) for the formulation of budgets and rates will identify specific gains or losses, if any, that may not need to be returned or recouped in the DBOF rate structure for the applicable budget year.

b. Additional gains and losses, beyond those specified by the Under Secretary of Defense (Comptroller) in budget formulation guidance, also may be proposed as part of the Components annual budget submission. All such amounts must be approved by the Office of the Under Secretary of Defense (Comptroller) prior to being included in the Component's congressional/President's budget submission, and implemented.

c. Specific request that realized gains or losses be excepted from the requirement to be returned or recouped in DBOF rates should be submitted individually, on a case-by-case basis, and will be favorably considered only if the DoD Component can demonstrate that not recouping the loss through DBOF rates would be in the best interest of the Department of Defense and would not adversely effect the DBOF.

2. Application of Policy. DBOF activities shall, in all instances, account for the loss resulting from the disposal of excess materials. However, if approved by the Office of the Under Secretary of Defense (Comptroller), the loss resulting from that disposal need not be included in subsequent year stabilized billing rates. As stabilized billing rates are developed to result in an Accumulated Operating Result of \$-0-, the following entries shall be made:

Dr 1513 Operating Materials and Supplies - Excess, Obsolete
and Unserviceable
Dr 7293 Other Miscellaneous Losses
Cr 1511 Operating Materials and Supplies Held for Use
Cr 1512 Operating Materials and Supplies Held for Future Use

Entry to recognize loss resulting from disposal of excess, obsolete,
or unserviceable operating materials and supplies.

Dr 3321 Net Results of Operations - DBOF
Cr 7293 Other Miscellaneous Losses

Entry to close loss on excess operating supplies and materials
to Net Operating Results.

Dr 3311.2 Cumulative Results of Operations-DBOF-Deferred
Cr 3321 Net Results of Operations - DBOF

Entry to close Net Operating Results to Cumulative Results of
Operations (aka Accumulated Operating Results). Note that
general ledger account 3311, "Cumulative Results of Operations,"
is subdivided into two subsidiary accounts. Account 3311.1 is
the account on which stabilized rates are developed to result
in a \$-0- balance. Account 3311.2 is the account in which
losses and gains are recorded that are not, in the immediate
future, to be included in stabilized rate development.

E. VALUATION OF OPERATING MATERIALS AND SUPPLIES

Operating materials and supplies shall be valued on the basis of
historical (i.e., the amount paid for the materials and supplies by the
receiving activity) cost. Donated operating materials and supplies shall be

valued at their fair value at the time of donation. Excess, obsolete, or unserviceable operating materials and supplies shall be valued at their estimated net realizable value. The difference between the carrying amount of the operating materials and supplies before identification as excess, obsolete or unserviceable and their estimated net realizable value shall be recognized as a loss (or gain) in current period operations. Any subsequent adjustments to net realizable value shall also be recognized as a loss (or gain).

F. FINANCIAL STATEMENT DISCLOSURE REQUIREMENTS FOR OPERATING MATERIALS AND SUPPLIES. Notes accompanying financial statements shall include:

1. General composition of operating materials and supplies.
2. Basis for determining operating materials and supplies values; including valuation method and any cost flow assumption.
3. Changes from prior year accounting methods, if any.
4. Balances for each of the categories of operating materials and supplies described above.
5. Restrictions on the use of materials.
6. Decision criteria for identifying the category to which operating materials and supplies are assigned.
7. Changes in the criteria for identifying the category to which operating materials and supplies are assigned.

CHAPTER 57

WORK IN PROCESS AND CONSTRUCTION IN PROCESS

A. WORK IN PROCESS

1. Contents of Work In Process. BBOF activities, primarily those involved in depot maintenance or other industrial-type operations, who routinely perform tasks that take more than a month, record operating costs within a work in process account so that costs may be matched to revenue upon completion of the task. Work In Process consists of the costs of the direct materials, direct labor, direct purchased services, and indirect costs, including general and administrative costs, used in producing customized personal property whether fabricated by the DoD or by a non-DoD organization under contract. When the costs are incurred by a Defense Business Operations Fund activity, the related costs, regardless of the source of funding, shall be accumulated by job order. Work in process accounts bring the costs under financial control and segregates them from current accounting period expenses. Examples of work in process are:

a. Costs of additions, alterations, improvements, rehabilitations, and replacements of DoD fixed assets exclusive of construction in process.

b. Costs of maintaining and producing DoD equipment and inventory.

2. Types of Work In Process. Work In Process may consist of: Work In Process - In House; Work In Process - Contractor; Work In Process - Other Government Activities; and Work In Process Government Furnished Material (GFM).

3. Basis for Valuation of Work In Process. Work in Process - In-House shall be recorded at the actual cost of direct labor and direct materials used in completion of job order and, shall also include an allocation of indirect expenses and general and administrative (G&A) expenses. "Work In Process - Contractor" and "Work In Process - Other Government Plants" shall be valued at the amount paid or payable to those entities (based upon the unpaid amounts of requests for progress payments, cost reimbursements, and other invoices received). Work In Process - Government Furnished Material (GFM) shall be valued at the issued items' standard price and quantity. The GFM account shall be supported by records that identify quantities of items and dollar amounts by contract number.

4. Relief of Work In Process. The direct costs and allocated indirect costs and G&A expenses recorded in work in process accounts shall be transferred upon completion or termination of the job to cost of goods sold or, if the completed work is to be retained for use by the producing activity, to an applicable asset or, if it does not meet the DoD capitalization criteria, an expense account. ("Completion" includes that portion of work financially complete under the percentage of completion revenue recognition policy.) The amount relieved shall be the costs incurred that are associated with the revenue earned. The costs incurred ordinarily will not be equal to the revenue

earned. The costs incurred may be more than, or less than the revenue earned depending upon whether a loss or gain was taken on the work performed.

B. ACCOUNTING FOR OPERATIONS AND WORK IN PROCESS

1. Accounting for Operations. The following illustrate typical budgetary and proprietary accounting entries applicable to in-house work of customer orders. Operating expenses recorded in the 6000 series of the general ledger accounts should be designated as direct expense or indirect expense; for example, general ledger account 6111, "Personnel Compensation - Civilian," should be designated to separately record and accumulate direct civilian labor from indirect civilian labor. The following illustrative budgetary and proprietary accounting entries shall be recorded at the activity (performing) level only.

a. Payroll

Dr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
Cr 4920 Accrued Expenditures - Unpaid -
Reimbursable Program

Dr 6111 Personnel Compensation - Civilian (Direct)
Dr 6111 Personnel Compensation - Civilian (Indirect)
Dr 6113 Personnel Benefits - Civilian (Direct)
Dr 6113 Personnel Benefits - Civilian (Indirect)
Cr 2211 Accrued Payroll - Civilian
Cr 2213 Accrued Payroll - Civilian - Employer Share of
Fringe Benefits

Budgetary and proprietary entries to record accrual of civilian employee compensation earned during the period.

b. Supplies and Materials

Dr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
Cr 4920 Accrued Expenditures - Unpaid -
Reimbursable Program

Dr 1511 Operating Materials and Supplies Held for Use
Cr 2113 Accounts Payable - Public - Current

Budgetary and proprietary entries to record invoice for supplies and materials received.

Dr 6121 Supplies and Materials (Direct)
Dr 6121 Supplies and Materials (Indirect)
Cr 1511 Operating Materials and Supplies Held for Use

Proprietary entry to record issue of supplies and materials Parts and materials issued to a specific job shall be recorded as a direct cost. Parts and materials issued for the general use of a cost center (production indirect) or for general administration of

an activity (G&A) shall be recorded as an indirect costs (There is no budgetary entry for movement of amounts between proprietary accounts.

c. Assignment of Direct Costs

Dr 1581 Work In Process - In-House
Cr 6111 Personnel Compensation - Civilian (Direct)
Cr 6113 Personnel Benefits - Civilian (Direct)
Cr 6121 Supplies and Materials (Direct)

Periodic, but not less than monthly, entry to record assignment of direct costs to work in process.

d. Allocation of Indirect Costs

Dr 1581 Work In Process - In-House
Cr 6600 Applied Overhead

Periodic, but not less than monthly, entry to record allocation of indirect expenses to work in process.

e. Payment of expenses incurred

Dr 4920 Accrued Expenditures - Unpaid - Reimbursable Program
Cr 4940 Accrued Expenditures - Paid - Reimbursable Program

Dr 2211 Accrued Payroll - Civilian
Dr 2213 Accrued Payroll - Civilian - Employer Share of
Fringe Benefits
Dr 2113 Accounts Payable - Public - Current
Cr 1012.1 Funds Disbursed - Operating Program

Entry to record payment of civilian payroll and other expenses.

f. Adjustment of Over and Under Applied Overhead

Dr 6600 Applied Overhead
Dr 7293 Other Miscellaneous Losses
Cr 7193 Other Miscellaneous Gains
Cr 6111 Personnel Compensation - Civilian (Indirect)
Cr 6113 Personnel Benefits- Civilian (Indirect)
Cr 6121 Supplies and Materials (Indirect)
Cr 6125 Depreciation of Equipment

Periodic, but not less than annual, entry to record closure of indirect expenses to the applied overhead account. Variances between actual indirect expenses and applied indirect expenses are accounted for as a gain or loss as illustrated above.

2. Accounting for Work in Process. Four "Work in Process" subsidiary accounts control applicable work, payments, and property that receive special attention. "Work in Process-In-House," "Work in Process - Contractor," and "Work in Process - Other Government Activities," identify the performing

activity. "Work in Process - Government-Furnished Material," identifies that portion of Government property furnished to contractors and subcontractors for the performance of DoD contracts for other than real property.

a. Work in Process - In-House (Account 1581). "Work in Process - In-House" is used to record the cost of work in process performed by DoD personnel. A subsidiary account shall be maintained to accumulate the costs of each job order and facilitate the transfer of costs to the cost of goods sold account. Sources of entries to this account include billings under contracts for material, supplies, and equipment; documented assignments of costs accumulated in cost pools; issue and transfer documents; receiving and shipping reports; invoices; payment vouchers; payroll records; reports of completed work in process; and documented losses. The following illustrate the most common entries to this account:

- (1) Dr 1581 Work in Process In-House
Cr 6000 Expense Accounts series (Direct)

To record the assignment of costs incurred.

- (2) Dr 1581 Work in Process - In-House
Cr 6600 Applied Overhead

To record the allocation of applied indirect and other overhead costs to work in process.

- (3) Dr 1581 Work in Process - In-House
Cr 1766 Equipment Not in Use

To record the value of equipment incorporated into DoD in-house work in process.

- (4) Dr 1581 Work in Process - In-House
Cr 1582 Work in Process - Contractor
Cr 1583 Work in Process - Other Government Activities
Cr 1584 Work in Process - Government-Furnished Material

To record work performed by other entities (subcontractors) that is to be incorporated into work that will be completed in-house.

- (5) Dr 6500 Cost of Goods Sold
Cr 1581 Work in Process - In-House

To record the value of DoD in-house work in process that is completed in response to a customer order.

b. Work in Process - Contractor (Account 1582). "Work in Process - Contractor" is used to record the cost of work in process performed by DoD contractors. Subsidiary accounts shall be maintained for each contract to track the value of work performed as represented by progress payments. Sources for entries to this account include contractor requests for progress payments, invoices, payment vouchers, property acceptance documents, accounting records,

and documented losses. The following illustrate the most common entries to this account:

(1) Contract Work on Customer Orders

Dr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
Cr 4820 Undelivered Orders - Reimbursable Program

Issuance of order to contractor to perform work.

(2) Progress Payment Made To Contractor

Dr 4820 Undelivered Orders Reimbursable Program
Cr 4920 Accrued Expenditures - Unpaid
Reimbursable Program

Dr 1582 Work In Process - Contractor
Cr 2113 Accounts Payable - Public - Current
Cr 2130 Contract Holdbacks

Progress billing received from contractor for partial completion of ordered work (A portion is withheld from payment pending successful completion of contract).

Dr 4920 Accrued Expenditures - Unpaid - Reimbursable Program
Cr 4940 Accrued Expenditures - Paid - Reimbursable Program

Dr 2113 Accounts Payable - Public - Current
Cr 1012.1 Funds Disbursed - Operating Program

Progress payment made to contractor for partial completion of ordered work.

(3) Contractor Delivery of Ordered Work

Dr 4820 Undelivered Orders - Reimbursable Program
Dr/Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
(If the Accrued Expenditure - Unpaid differs
from the amount of the undelivered order.)
Cr 4920 Accrued Expenditures - Unpaid - Reimbursable
Program

Dr 1582 Work In Process - Contractor
Dr 2130 Contract Holdbacks
Cr 2113 Accounts Payable - Public - Current

Final billing received from contractor for delivery of ordered work.

(4) Release of Delivered Work to In-House Work

Dr 1581 Work in Process - In-House
Cr 1582 Work in Process - Contractor

To record the liquidation of "Work in Process - Contractor" when related work is to be incorporated into other work being performed in-house.

(5) Release of Delivered Work to Customer

Dr 6500 Cost of Goods Sold
Cr 1582 Work in Process - Contractor

To record the liquidation of "Work in Process Contractor" when related work is completed and accepted for delivery to a customer in response to its order.

c. Work in Process - Other Government Activities (Account 1583).

"Work in Process - Other Government Activities" is used to record the cost of work in process performed by other Federal Government Agencies. A subsidiary account shall be maintained for each contract to track the value of work performed as represented by progress payments. Sources for entries to this account include interagency agreements, invoices, payment vouchers, property acceptance documents, and documented losses. The following illustrate the most common entries to this account:

(1) Dr 1583 Work in Process - Other Government Activities
Cr 2111 Accounts Payable - Government - Current

To record value of work performed by another Government Agency as represented by requests for progress payments.

(2) Dr 1581 Work in Process - in-House
Cr 1583 Work in Process - Other Government Activities

To record the liquidation of "Work in Process - Other Government Activities" when related work is to be incorporated into other work being performed in-house.

(3) Dr 6500 Cost of Goods Sold
Cr 1583 Work in Process - Other Government Activities

To record the liquidation of "Work in Process - Other Government Activities" when related work is completed and accepted for delivery to a customer in response to its order.

d. Work in Process - Government-Furnished Material (Account 1584).

"Work in Process - Government-Furnished Material" is used to record the value of that portion of Government personal property furnished to contractors and subcontractors (including other Federal Agencies) for the performance of DoD contracts. Government property, in this case, includes all personal property acquired directly by the Department of Defense and made available for incorporation into personal property end products to be delivered under DoD

contracts or to be consumed or expended in the performance of those contracts. A subsidiary account shall be maintained for each contractor that is furnished Government property. The subsidiary accounts shall be subdivided by contract. Increases to this account shall be supported by documentation evidencing issues of Government material to contractors, whether from inventory or from another contractor in accordance with DoD instructions. Decreases to this account shall occur only when the end item is accepted by the Department of Defense and received into inventory or the material is returned to inventory or otherwise disposed of at DoD's direction. Periodically, but at least annually, this account shall be reconciled with the property accountability records maintained by the contractor. This reconciliation involves coordination with the assigned property administrator for the contract. Property administrators shall be provided financial data on the value of GFM for use in completing contract close out or termination. On contract completion or termination the account shall be adjusted to reflect the disposition of unused GFM provided to the contractor for use in meeting contractual requirements. Sources for entries to this account include-shipping and issue documents, property acceptance documents and property administrator reports, material-return documents, collection and deposit documents, settlement agreements and documented losses. The following illustrate the most common entries to this account:

- (1) Dr 1584 Work in Process - Government-Furnished Material
 Cr 1511 Operating Materials and Supplies Held for Use
 Cr 1766 equipment Not in Use

To record the value of Government property furnished to contractors for the performance of DoD contracts for other than real property.

- (2) Dr 1511 Operating Materials and Supplies Held for Use
 Dr 1766 Equipment Not in Use
 Dr 6120 Other Services
 Cr 2113 Accounts Payable - Public - Current
 Cr 1584 Work in Process-Government-Furnished Material

To record the value of Government property that is:

- (a) Incorporated into end products accepted by DoD for final payment.
- (b) Consumed or expended in the performance of DoD contracts.

- (3) Dr 1511 Operating Materials and Supplies Held for Use
 Dr 1766 Equipment Not in Use
 Cr 1584 Work in Process-Government-Furnished Material

To record the value of Government-provided property returned by the contractor.

- (4) Dr 1320 Claims Receivable-Public or Other Losses
 Cr 1584 Work in Process-Government-Furnished Material

To record claim for the loss, damage, or destruction of Government property furnished in connection with DoD contracts.

C. ACCOUNTING FOR CONSTRUCTION IN PROCESS

1. Purpose. The "Construction in Process" accounts are used to accumulate costs of DoD real property construction projects. Included in this category is equipment that is installed as an integral part of the real property and that normally cannot be removed without dismantling the property. Examples of such equipment include heating and air conditioning systems, overhead cranes, elevators, etc. These costs include direct labor, direct material, purchased services and overhead. All of these costs, including those financed as "minor construction," are recorded in "Construction in Process" accounts as long as the construction project is expected to meet the DoD capitalization criteria. The recording of costs in "Construction in Process" accounts brings the costs under financial control and segregates them from expenses.

2. Construction Overhead. Construction overhead includes any cost of construction in process that benefits more than a single construction project. Overhead may include costs for supervision and other indirect labor, supplies and materials, transportation, depreciation of other assets used in construction of the asset in process, etc. Construction overhead must be collected in cost pools and allocated to specific construction projects in proportion to the benefits received. Often, a common single element such as square feet, direct labor hours, direct labor dollars, etc. is used to allocate overhead costs. However, other methods, such as total cost, may also be used. The objective is to select an overhead allocation base that best represents the beneficial or causal relationship between the expenses incurred and all benefiting or causing segments.

3. Subsidiary Accounts. There are four "Construction in Process" subsidiary accounts to control applicable work and property that receive special attention. "Construction in Process - In-House," "Construction in Process - Contractor," and "Construction in Process - Other Government Agencies" identify who is performing the construction. "Construction in Process - Government-Furnished Material" identifies that portion of Government property furnished to contractors and subcontractors for the performance of DoD construction contracts.

4. Construction Funded by Other than the DBOF. Construction in process at a DBOF activity, but not funded by the DBOF activity, shall not be accounted for as construction in process by the DBOF activity although the asset, when completed, will be used in DBOF operations. Construction in process of this nature is, as a rule, financed by a Military Construction appropriation and is accounted for by the DoD construction agent (the Army Corps of Engineers or Naval Facilities Engineering Command). The DoD construction agent either performs or contracts for the actual work, as applicable, when it is responsible for the construction. The DoD accounting entity that is to receive the constructed property financed by other than DBOF funds does not account for the construction costs until it accepts accountability for the completed asset.

5. Termination of Projects. When construction projects are terminated before completion, the circumstances must be examined carefully to determine suitable write-offs and other applicable accounting adjustments.

6. Construction in Process (Account 1720)

a. "Construction in Process" is used to record the costs of direct labor, direct material, and overhead incurred in the construction of property and plant. On completion, these costs shall be transferred to the proper capital asset account as the acquisition cost of the item.

b. This account is a summary account used for financial control and reporting purposes. No entries are posted to this account.

7. Construction in Process - In-House (Account 1721)

a. "Construction in Process - In-House" is used to record the cost of construction performed by DoD personnel.

b. Subsidiary accounts shall be maintained for each construction project to facilitate the transfer of costs to the applicable real property account.

c. The following entries illustrate the most common use of this account:

(1) Dr 1721 Construction in Process - In-House
Cr 1511 Operating Materials and Supplies Held for Use
Cr 1750 Equipment
Cr 6000 Expense accounts series

To record the costs incurred by the Department of Defense for construction in process.

(2) Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1721 Construction in Process - In-House

To record the value of DoD in-house construction projects completed.

d. Sources of entries to this account include billings under contracts for materials, supplies, and equipment; documented assignments of costs accumulated in cost pools; issue and transfer documents; receiving and shipping reports; invoices; payment vouchers; payroll records; reports of completed construction projects; and documented losses.

8. Construction in Process - Contractor (Account 1722)

a. "Construction in Process - Contractor" is used to record the value of work performed by contractors other than other Government Agencies in accordance with the terms of the applicable construction contracts. Progress payments for such work are discussed in Subpart 32.5 of the Federal Acquisition Regulation. Other types of payments, such as cost reimbursements also are included in this account.

b. Subsidiary accounts shall be maintained for each construction project to facilitate the transfer of costs to the applicable real property account.

c. The following entries illustrate the most common use of this account:

- (1) Dr 1722 Construction in Process - Contractor
Cr 2113 Accounts Payable - Public - Current

To record the allowable costs of construction in process reported by contractors other than Federal Government Agencies.

- (2) Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1722 Construction in Process - Contractor

To transfer completed projects to the applicable real property accounts.

d. Sources of entries to this account include contracts, contractor requests for progress payments, invoices, payment vouchers, construction acceptance documents, accounting records, and reports of survey.

9. Construction in Process - Other Government Activities (Account 1723)

a. "Construction in Process - Other Government Activities" is used to record the value of work performed by other Federal Agencies for the construction of facilities, utilities, and ground improvements not yet accepted by the Department of Defense.

b. Subsidiary accounts shall be maintained for each construction project to facilitate the transfer of costs to the applicable real property account.

c. The following entries illustrate the most common use of this account:

- (1) Dr 1723 Construction in Process - Other Government
Activities
Cr 2111 Accounts Payable - Government - Current

To record the allowable costs paid for construction being performed by another Federal Agency.

- (2) Dr 1730 Buildings
Dr 1740 Other Structures and Facilities
Cr 1723 Construction in Process Other Government
Activities

To transfer completed projects to the applicable real property accounts.

d. Sources of entries to the "Construction in Process - Other Government Activities" account include invoices, payment vouchers, construction acceptance documents and reports of survey.

10. Construction in Process-Government-Furnished Material (Account 1724)

a. "Construction in Process - Government-Furnished Material" is the account for recording the value of that portion of Government property furnished to contractors and subcontractors (including other Federal Agencies) for the performance of DoD construction contracts. "Government property" in this case includes all personal property acquired directly by the Department of Defense and made available for incorporation into construction end products to be delivered under DoD construction contracts or to be consumed or expended in the performance of those construction contracts.

b. Subsidiary accounts shall be maintained for each contractor and contract that is furnished Government property.

c. The following entries illustrate the most common use of this account:

(1) Dr 1724 Construction in Process - Government-
Furnished Material
Cr 1511 Operating Materials and Supplies Held for Use
Cr 1750 Equipment

To record the value of Government property furnished to contractors for the performance of DoD construction contracts.

(2) Dr 1730 Buildings (a)
Dr 1740 Other Structures and Facilities (a)
Dr 6000 Expense Accounts series (b)
Cr 1724 Construction in Process -
Government-Furnished Material

To record the value of Government property that is as follows:

(a) Incorporated into or attached to a construction end product accepted by the Department of Defense.

(b) Consumed or expended in the performance of DoD construction contracts.

(3) Dr 1511 Operating Materials and Supplies Held for Use
Dr 1750 Equipment
Cr 1724 Construction in Process - Government-Furnished
Material

To record the value of Government property returned by contractors.

(4) Dr 1320 Accounts Receivable - Claims Receivable - Public
Cr 1724 Construction in Process - Government - Furnished
Material

To record a claim against a contractor for the value of the loss, damage, or destruction of Government property furnished in connection with DoD construction contracts.

- (5) Dr 7293 Other Miscellaneous Losses
Cr 1724 Construction in Process - Government-Furnished
Material

To record the nonrecoverable value of the loss, damage, or destruction of Government property furnished in connection with DoD construction contracts.

d. Sources of entries to this account include shipping and issue documents, construction acceptance documents and property administrator reports, material-return documents, collection and deposit documents, settlement agreements, and documented losses.

11. Capital Assets Under Development-DBOF (Account 1725)

a. "Capital Assets Under Development-DBOF" is the account used by the Defense Business Operations Fund to accumulate the cost of capital assets that is being manufactured, constructed, or otherwise developed for use and retention by the performing activity. (General ledger account 1515, "Operating Materials and Supplies Under Development," is the counterpart of this account used to accumulate the cost of non-capital assets -- See Chapter 56.) The total cost to develop or manufacture a capital asset consists of, but is not limited to; direct and indirect labor, directly related material, contractual and reimbursable support cost, applicable overhead, and allocated general and administrative costs incurred in the development or manufacture of a capital asset. Software development (programs, routines, and subroutines) cost shall also include the computer operating costs for testing, developing, and parallel processing. The total cost of developing or manufacturing assets for use by any segment of the business area, including installation and other costs necessary to place the asset in use, shall be accumulated in the construction-in-process general ledger account 1725, "Capital Assets Under Development-DBOF" Upon completion, delivery and installation of the developed or manufactured asset, the account shall be relieved and the amount in that account capitalized to the applicable asset account. The capital asset shall then be depreciated by the business area at which it is installed.

b. The following entries illustrate the most common use of this account:

- (1) Dr 1725 Capital Assets Under Development-DBOF
Cr 6000 Expense Accounts series (Direct)

To record the assignment of costs incurred.

- (2) Dr 1725 Capital Assets Under Development-DBOF
Cr 6600 Applied Overhead

To record the allocation of applied indirect and other overhead costs to assets under development.

- (3) Dr 1750 Equipment
Dr 1830 Automated Data Processing Software
Cr 1725 Capital Assets Under Development-DBOF

To record the value of completed assets to their applicable asset classification.

CHAPTER 58

CAPITAL ASSETS

A. CAPITAL INVESTMENT PROGRAM

1. General Information. General information on capital assets may be found in Chapter 6, "Fixed Assets," Volume 4 of this regulation.

2. Purpose. This chapter provides guidance on the Capital Investment Program for the Defense Business Operations Fund (DBOF) and prescribes the accounting principles and policy that shall be followed in accounting for the Capital Investment Program.

3. Overview

a. The primary goal of the Capital Investment Program within the DBOF is to establish a capability for reinvestment in the infrastructure of business areas in order to facilitate mid and long term cost reductions. The objective is to improve product and service quality and timeliness, reduce costs and foster comparable and competitive business operations. The Capital Investment Program provides the framework for planning, coordinating, and controlling DBOF resources and expenditures to obtain capital assets.

b. This policy applies to all activities, or groups of activities, within the Department of the Army, Department of the Navy, Department of the Air Force, or a Defense Agency chartered under the DBOF.

B. POLICY

1. Managers at DBOF activities shall identify, prioritize, justify, and budget for capital asset purchases.

2. The capital investment program shall be carried out within the guidelines established by public law, DoD policies, and other regulatory constraints.

3. Only those capital investment projects that have been included in a President's budget for the DoD Component may be financed through the Capital Investment Program except that under certain circumstances, as prescribed in paragraph C.5., during the year of execution, substitutions may be made for projects when operational necessity warrants.

4. The Capital Investment Program shall not be used to establish an in-house capability for operations that are more economically available through commercial contract except as permitted under OMB Circular A-76, "Performance of Commercial Activities."

5. All capital assets developed, manufactured or otherwise procured by a activity for use of that activity shall be funded through the DBOF capital budget, except those capital assets identified in paragraph D.5. below.

6. DBOF reimbursement rates shall include an amount estimated, considering the expected workload, to be sufficient to fund the approved Capital Investment Program.

7. Projects that meet the DoD investment capitalization threshold, both as to cost and useful life must be:

- a. capitalized and depreciated,
- b. funded as part of the capital budget, and
- c. accommodated within approved capital budget authority limits.

8. Projects that meet the DoD investment capitalization threshold also reduce the available capital budget authority.

9. Projects that fail to meet the DoD investment capitalization threshold shall be funded as an operating expense.

10. Each DoD Component will develop procedures to ensure that:

- a. Capital investment funds are used only for approved projects.
- b. Every attempt is made to effect timely installation and to realize productivity improvements estimated in budget submissions.

11. Management improvement initiatives shall be expensed as provided in Chapter 62, paragraph E.2. unless specifically directed otherwise by the Under Secretary of Defense (Comptroller).

C. CAPITAL INVESTMENT PROGRAM REQUIREMENTS

1. Each proposed acquisition of a capital investment shall be documented and reviewed to ensure that the asset satisfies all of the following criteria:

- a. Is more economically feasible to purchase than to lease.
- b. Meets the Department's long-range planning and programming objectives as identified in long range strategic plans.
- c. Results in satisfying a documented need that cannot be met as effectively and efficiently by existing equipment and facilities.
- d. Complies with DoD Directive 4275.5, "Acquisition and Management of Industrial Resources" and DoD Directive 4270.4, "Unspecified Minor Construction, Emergency Construction, and Restoration of Damaged or Destroyed Facilities," as well as, other applicable policies and regulations governing the lease and acquisition of equipment and facilities.
- e. Includes workload projections that take into account the results of interservice decisions, workload posture planning decisions, readily available commercial alternatives, and other reasonable options for accomplishing workload.

f. Accomplishes the objective for which the capital asset is justified. The criteria should include, but is not limited to: improved efficiency (savings) or effectiveness; required new capability and capacity that cannot be met with current equipment or facilities; replacement of unsafe, beyond economical repair, or inoperative and unusable capital assets; and mandated environmental, hazard waste reduction, or regulatory agency (state, local or Federal) requirements.

g. Meets or exceeds the DoD capitalization criteria.

h. Includes, as appropriate, a pre-investment cost or economic analysis that identifies the reasons and associated expected benefits of the purchase in accordance with the requirements at paragraph F. of this chapter for an analysis for DBOF capital investments. An economic analysis must be completed prior to requesting a capital asset be included (1) in the Office of the Secretary of Defense (OSD) budget submission (2) in the President's Budget submission, or (3) in any request for substitution or reprogramming involving a capital project.

2. A post-investment analysis, as required by paragraph F.10. of this chapter, will be prepared annually by each DoD Component in accordance with the requirements for an economic analysis for DBOF capital investments.

3. Documentation supporting capital investment projects requests shall be prepared in accordance with the requirements in paragraph F. of this chapter for an economic analysis for DBOF capital investments. The economic analysis and the post-investment analysis documentation will be retained and remain available for review, audit or evaluation for five years after the capital asset is placed in use.

4. Capital Investment Limitations

a. When a request for capital investment is granted, the capital budget section of the Annual Operating Budget (AOB) will designate the maximum amount of funds that may be committed and obligated for capital investments.

b. With the exception of those capital assets identified in paragraph D.5. below, capital investments will be limited to the capital budget amount approved in the AOB.

c. The AOB will list separately each capital project with costs that are estimated to be equal to, or greater than \$500,000. Projects estimated to cost less than \$500,000 will not be listed separately on the AOB, but the AOB will identify, by category--minor construction, equipment, automated data processing equipment (ADPE), and software, the total amount approved for all such projects. Approved funding limits for capital budget obligations will be provided as dollar value limitations within program year, and for all program years available for execution in the fiscal year that the AOB is issued. A DBOF activity may purchase, develop, manufacture, construct, or otherwise acquire approved capital assets only to the extent that amounts are authorized on an approved AOB. The DoD Components will list all approved capital projects in AOBs subsequently issued to subordinate commands and activities.

d. Section 342, "Capital Asset Subaccount," of the National Defense Authorization Act for Fiscal Year 1993 (Public Law 102-484) provides that "The Secretary of Defense may award contracts for capital assets of the DBOF in advance of the availability of funds in the subaccount, to the extent provided for in appropriations Acts." That legislative provision made contract authority available for the DBOF Capital Investment Program. Contract authority is statutory authority that permits obligations to be incurred in anticipation of receipts to be credited to the DBOF. By definition, contract authority is unfunded and must subsequently be funded through the collection of amounts for goods and services sold to customers before obligations incurred under the contract authority can be liquidated.

e. Dollar value limitations for capital budget obligations are provided on the approved ROB by program year. The AOB limitation by program year is subject to Title 31, United States Code, Section 1341, "Limitations on Expending and Obligor Amounts," and Section 1517? "Prohibited Obligations and Expenditures." Exceeding the limitation contained in the capital budget section of the AOB can result in an Antideficiency Act violation.

5. Reprogramming

a. Budget formulation and congressional reviews require a firm, annual program consisting of specific, justified projects to support the Capital Investment Program. Only those capital asset projects that have been approved by Office of the Under Secretary of Defense (Comptroller) (OUSDC)) will be included in the President's Budget. However, in the year of execution, actual investment requirements can change relative to previously approved projects and funding levels. Accordingly, appropriate reprioritizing and substitutions are permitted in accordance with provisions of this chapter.

b. Approved capital investment projects and associated dollar amounts will be reflected in the AOB by program year. Substitutions and additions of capital projects must comply with the requirements in paragraph C.1. All capital projects that are cancelled or postponed, as well as added projects, adjustments in estimates to approved projects, and projects selected as substitutions or replacements for cancelled or postponed projects must be identified in capital budget requests forwarded to the OUSDC).

c. An economic analysis must be completed for all additional, substitute or replacement projects before reprogramming approval is requested. The economic analysis should be prepared in accordance with the requirements in paragraph F. of this chapter for an economic analysis for DBOF capital investments.

d. No project should be continued solely because it was previously approved or because funds are available.

e. The following approval levels and dollar threshold apply changes to projects approved in the Capital Budget section of the AOB including reprogramming, substitutions, cancellations and additions:

(1) All adjustments or changes to capital projects that are equal to, or greater than \$500,000 shall be approved by the OUSD(C).

(2) All adjustments or changes between categories of capital projects (i.e. minor construction, equipment, ADPE, and software) or business areas that increase a category or a business area by a cumulative amount equal to, or greater than \$500,000 within a program year shall be approved by the OUSD(C).

(3) The DoD Components shall develop and issue internal written policies to establish approval levels and dollar thresholds for adjustments or changes to capital projects, or between categories of capital projects approved in the AOB including reprogramming, substitutions, cancellations and additions.

6. Financing

a. The Capital Investment Program is financed by resources of the DBOF. Funds for this purpose are accumulated in the corpus through the inclusion in customer rates of expected depreciation on purchased capital assets and, if applicable, any additional capital surcharge needed to meet the capital needs of the DBOF.

b. Section 342 of the National Defense Authorization Act For Fiscal Year 1993 requires DoD to establish a capital asset subaccount. Account 1011.1, "Funds Collected - Operating Program - DBOF," and account 1011.2, "Funds Collected - Capital Program - DBOF," are established to separately identify collections applicable to the operating program and capital program to comply with section 342. Additionally, account 1012.1, "Funds Disbursed - Operating Program - DBOF," and account 1012.2, "Funds Disbursed - Capital Program - DBOF," are established to separately identify disbursements applicable to the operating program and capital program.

c. To avoid an Antideficiency Act violation, cash disbursements should not be made in excess of the total cash available to a DBOF activity, business area, DoD Component, or the total cash available to the DBOF.

D. CAPITAL INVESTMENTS

1. Capital Equipment, other than Automated Data Processing Equipment (ADPE) and Telecommunications. The development, manufacture, transfer, and acquisition of all capital assets for the primary use or benefit of DBOF activities shall be classified as capital investments. A capital investment purchase may be established for any purpose approved by the OUSD(C).

2. ADPE and Telecommunications Equipment. AS defined in Office of Management and Budget (OMB) Circular A-11, "Preparation and Submission of Budget Estimates," ADPE and telecommunications equipment is equipment or an interconnected system or subsystem of equipment used in the automatic acquisition, storage, manipulation, management, movement, control, display, switching, interchange, transmission, or reception of data or information.

3. Software. As defined in OMB Circular A-11, software includes system programs, application programs, commercial-off-the-shelf (COTS) software, independent subroutines, data bases, and software documentation. This category includes software development or acquisition for the general benefit of the DBOF activity but does not include software developed or acquired for a specific customer. Software developed or acquired for a specific customer should be charged to and reimbursed by the requesting customer.

4. Minor Construction. A minor construction project includes all work and costs necessary to construct or improve a complete and usable building, structure, or other real property. Minor construction projects which meet or exceed the DoD capitalization criteria but do not exceed the amount specified by 10 U.S.C. 2805 for funding such projects in the Military Construction appropriation shall be financed as a capital purchase.

5. Exclusions From the Capital Investment Program. The following are mandatory exclusions from the Capital Investment Program and must be financed directly from appropriated funds:

a. Major range and test facility items (equipment and minor construction) that meet the DoD investment capitalization criteria for use by Major Range and Test Facility Bases operating within the DBOF.

b. Military and tenant support functions.

c. Aircraft, ships, barges, and general-purpose passenger-type vehicles.

d. Equipment and minor construction projects purchased to meet mobilization requirements, but not used during peacetime operations.

e. Equipment initially procured and usually furnished as part of a weapon system and/or support system to include initial common support equipment for depot maintenance in support of new weapon systems.

f. Equipment normally funded by appropriated funds and provided to contractors as Government-furnished equipment to be incorporated into, used in conjunction with, or consumed in the production of, an end product. (Such equipment should be funded by appropriated funds and provided to the applicable DBOF activity at no cost to the DBOF activity.).

g. Minor construction projects-for a non-DBOF activity or a military support function.

h. Construction and facility investment projects that exceeds the amount specified by 10 U.S.C. 2805 for funding such projects in the Military Construction appropriation.

i. Environmental projects financed or submitted for funding by the Defense Environmental Restoration Account.

j. Capital investments for morale, welfare, and recreation.

k. Such other exclusions as may be approved by the OUSD(C).

6. Capitalization Criteria

a. DoD Components shall capitalize and report in financial records all assets developed, manufactured, transferred, or acquired by the DBOF including computer software purchased or developed, when the following criteria are met:

(1) Acquisition cost, book value, or, when applicable, the estimated fair market value equals, or exceeds, the expense/investment funding threshold used by the Congress for appropriating DoD operating (expense) and Procurement (investment) appropriations. Transfers of capital assets shall comply with paragraph E.5.c.; and

(2) Estimated benefit period or useful life to the Department of Defense of 2 years or more.

b. Acquisition cost is the original purchase or development cost including transportation, design, installation, and other related costs necessary to put the asset in the place and form in which it shall be used.

c. Software acquisition or development cost incurred by DBOF activities (or, in absence of known amounts, a reasonable estimate thereof) for projects ordered or requested in prior years and delivered, installed, and operational after October 1, 1991 shall be capitalized by the DBOF activity if they otherwise meet the requirements of paragraph D.6.a. above.

(1) The acquisition cost criteria, in the case of computer and other systems, is applied on the basis of the cost of a complete system rather than on a unit cost of individual items of equipment which, when aggregated, become a system. Incremental deliveries of these projects shall be capitalized if the aggregate cost meets the criteria above.

(2) Computer software that is integrated into hardware, and is necessary to operate the hardware rather than to perform an application, is capitalized as hardware.

d. When the expense/investment funding threshold changes, a capital asset capitalized within the DBOF at a previous threshold will continue to be capitalized and depreciated at the threshold at which it was originally capitalized.

7. Depreciation Criteria

a. Depreciation shall be calculated and accumulated using the straight-line method based on the capitalized amount less residual value when residual value is expected to be 10 percent or more of the acquisition cost. That is, the capitalized amount less estimated residual value shall be divided equally among accounting periods during the asset's useful life.

b. Depreciation shall commence in the month following (a) the date of receipt shown on the asset receiving document or (b) the date the asset is installed and ready for use (regardless of whether it is actually used). Depreciation shall be recorded in equal amounts each month thereafter until

the asset is fully depreciated, disposed of, or otherwise transferred. If an asset remains in use longer than its estimated useful life, it shall be retained on the accounting record, at its residual value (which can be \$-0-) until its final disposition.

c. Depreciation of equipment acquired with a procurement appropriation for a mobilization requirement and facilities acquired with a military construction appropriation will be reflected on the DBOF financial statements but will not be recovered in rates. Addendum 1 to this chapter illustrates the accounting for such assets. Chapter 70 contains the fund financial reporting formats and instructions.

d. Equipment and minor construction projects purchased primarily to meet mobilization requirements will not be depreciated.

e. Any other exclusion from funded depreciation requires prior approval by the OUSD(C).

f. The following depreciation schedule established for Defense Business Operation activities shall be used:

Facilities construction projects (including minor construction)	20 Years
Equipment, other than ADPE	10 Years
ADPE and Telecommunications Equipment	5 Years
Software	5 Years

g. Methodology and Alternative Depreciation Schedules

1. DBOF activities may request an alternative methodology for computing depreciation expenses, and/or an alternative estimate of useful life. Requests for an alternative methodology for computing depreciation expenses or depreciation schedules should be submitted for a determination of approval, through the appropriate DoD Component channels, to the OUSD(C), Directorate for Accounting Policy.

2. Requests for an alternative methodology for computing depreciation expenses or depreciation schedules should identify, but should not necessarily be limited to: (1) type and function, of the capital asset (2) alternative methodology for computing depreciation expenses or depreciation method proposed to be used; (3) commercial benchmark used to determine applicability or estimated useful life of the asset; and (4) rationale for the alternative. The OUSD(C), Directorate for Accounting Policy, will notify the DoD Component when a determination is made.

E. ACCOUNTING FOR CAPITAL ASSETS

1. Capital assets used by a DBOF activity in providing goods or services must be recognized in the property and financial records of that DBOF activity. Capital assets include, but are not limited to; physical plant and property, (including government owned facilities, property acquired under a capital lease, leasehold improvements to property acquired under a capital lease or an operating lease), equipment and software. Financial records for assets capitalized in a DBOF activity must:

- a. Be supported by formal depreciation schedules,
- b. Have all depreciation expenses recorded,
- c. Include depreciation expenses in rates charged, except for depreciation of facilities acquired through military construction appropriations or other exclusions approved in accordance with paragraph D.7.e. above.

2. The following three criteria must be met for an item to qualify as an asset and be reported as such in a DBOF entity's financial statements:

a. The asset must embody a probable future benefit that will contribute to the entity's operations. In applying this criteria, the concept of benefit has traditionally been referred to as "service capacity" which is the ability of an item to directly assist an entity in achieving its mission. Service capacity has value because it is consumable or exchangeable for other benefits. Real property assets (e.g., buildings) financed by a military construction appropriation provide a service capacity to the DBOF in that they house DBOF operations thus allowing the DBOF activity to achieve its mission. Also, DBOF is responsible for assuring that the maximum benefit is always available since it pays for utilities, maintenance, and upkeep. The exchangeability part of the benefit criteria (the ability to sell, trade, or donate property) need not be present for an item to qualify as an asset in the federal sector if consumption of the item provides benefit to the entity.

b. The entity that reports the asset must be able to obtain the benefit and control access to the benefit inherent in the asset. The second criteria of an asset, control over the benefit, refers to an entity's ability to direct who derives the benefit, the timing of when the benefit is derived, and under what conditions it is derived. Directing the use of the benefit has traditionally been based on (1) possession or (2) the ability to exert significant influence over the benefits; either of which is obtained through legal ownership or an agreement with the owner. In instances in which a DBOF activity maintains possession of property through agreements which provide for DBOF's possession for as long as needed, without a termination date and without reimbursement, such arrangements are generally considered as providing sufficient influence over the use of the property to satisfy the control criteria. Once termination occurs, however, as in the case of a base closing where DBOF conducts operations, control no longer exists; hence, the property will no longer meet the control criteria of an asset.

c. The transaction or event giving the entity a right to and control over the benefit must have already occurred. . The third criteria, is an agreement (express or implied) that allows DBOF to occupy and/or use property without reimbursement for as long as needed.

3. DBOF activities that meet the criteria in paragraph E.2. above shall record the capital asset in their property and financial records; record depreciation on the capital asset; and record improvements to the capital asset.

4. Facilities Used by DBOF Activities

a. DBOF activities that are sole occupants/tenants of a government owned facility or hold a capital lease (as opposed to an operating lease) on an entire building and sublet portions of that building and meet the criteria in paragraph E.2. above shall record the capital asset in their property and financial records.

b. DBOF activities which are joint occupants/tenants of a Government owned facility and meet the criteria in paragraph E.2. above shall determine which occupant/tenant will record the capital asset in their property and financial records by applying the following criteria in descending order of application:

(1) Occupant/tenant that can substantiate preponderant use (via direct labor hours, actual hours, population, square footage, metered output, etc.) of an asset in the production of goods or services for their customers.

(2) Occupant/tenant that have exclusive responsibility for the maintenance, repair, upkeep, and replacement (Military Construction) of the asset.

5. Assets Held by DBOF Activities for Mobilization Requirements. DBOF activities shall assume ownership of assets acquired through use of a procurement appropriation that are held to meet a mobilization surge capability.

6. Sources of Capital Assets. Subject to availability of sufficient resources and compliance with other DoD/Federal requirements, capital assets may be developed, manufactured, transferred, or otherwise procured for use by DBOF activities upon identification in, and approval of, the capital budget section of an activity's AOB. Regardless of the ultimate use of the asset, costs incurred in the development, manufacture, or acquisition of the asset must be identified, captured, and recorded as execution against a specific Capital Budget project.

a. Acquisition of Capital Assets for Business Area Use. The total cost incurred by a DBOF activity to develop, manufacture or acquire a capital asset consists of, but is not limited to; direct and indirect labor and non-labor, contractual cost net of authorized discounts paid; reimbursable support cost, applicable overhead, and general and administrative costs incurred when appropriate: plus any associated costs for transportation, installation, and other related costs necessary to put the asset in the place and in the form in which it shall be used. Software development (programs,

routines, and subroutines) cost also shall include the computer operating costs for testing, developing, and parallel processing.

b. Capital Assets Centrally Acquired

(1) Business areas, such as the Joint Logistics Systems Center, may from time to time be designated as a central agent to procure capital assets for customers within the DBOF. The procuring business area shall issue contracts to commercial sources or funded orders to other DBOF activities and DoD Components as necessary, to satisfy the requirement.

(2) Capital assets may be sold or transferred to customers of the central agent at negotiated "selling or transfer prices. Negotiated selling or transfer prices shall include the total cost of the capital asset which consists of contractual cost net of discounts taken, reimbursable support cost, applicable overhead, general and administrative costs incurred in the acquisition of the asset plus any approved surcharges.

(3) A capital asset acquired by a central agent and distributed and installed in one or more business areas shall be capitalized in the financial records of each business area and depreciated.

(4) When the share of the cost of a capital asset distributed and installed at a business area fails to meet the investment capitalization criteria, it nevertheless shall be capitalized and depreciated if the aggregate initial cost of the asset distributed to all business areas, satisfies the investment threshold.

(5) Capital assets acquired by a central agent may be delivered directly from a vendor/contractor to the receiving business area. Central agents shall record all deliveries and receipt of capital assets in their financial records until such time as an order is completed and sold or transferred to a customer. The ultimate cost of the completed asset shall include all incremental deliveries and all additional costs incurred by either, or both, the central agent and the receiving customer in the acquisition and installation of the asset.

c. Transfer of Capital Assets

(1) Capital assets that are transferred to a DBOF activity and have preexisting depreciation schedules and accumulated depreciation shall be capitalized to the fund at their book value plus any associated costs for transportation, installation, and other related costs necessary to put the asset in the place and in the form in which it shall be used.

(2) Capital assets that are transferred to a DBOF activity and have no preexisting depreciation schedules and accumulated depreciation shall be capitalized to the fund at their original acquisition cost, or reasonable estimate thereof when acquisition cost cannot be reasonably determined, plus any associated costs for transportation, installation, and other related costs necessary to put the asset in the place and in the form in which it shall be used. The DBOF activity shall then record accumulated depreciation in an amount equal to the amount that would have been recorded if the asset had been depreciated based on its (the DBOF activity's) normal depreciation

policy. The net value (original acquisition cost less accumulated depreciation) shall be recorded as an equity increase. For example, assume an asset that was originally acquired by the transferor three years past for \$50,000 is transferred to a DBOF activity. The asset is one that has a five year useful life. The following accounting entry should be made to record the asset on the records of a DBOF activity:

Dr	1750 Equipment	\$50,000	
	Cr 1759 Accumulated Depreciation		
	on Equipment		\$30,000
	Cr 3220 Transfers In from Others		
	Without Reimbursement		\$20,000

Entry to record transfer in of an asset without reimbursement from another DoD entity.

Depreciation after the transfer shall be calculated based on the net asset amount recorded. The DBOF will then begin recording depreciation expenses on these assets and reporting them in the financial records.

(3) Capital assets that (1) are donated to a DBOF activity by organizations outside the DoD and (2) meet the capitalization criteria shall be capitalized to the DBOF at estimated fair market value plus any associated costs for transportation, installation, and other related costs necessary to put the asset in the place and in the form in which it shall be used. Depreciation of the donated asset shall be calculated based on the asset amount recorded. The DBOF will then begin recording depreciation expenses on these assets and reporting them in the financial records.

(4) Capital assets that are transferred out of a DBOF activity to another DoD activity, Government Agency or others shall be transferred at the recorded acquisition cost less accumulated depreciation as of the date of transfer. The accounting entries for these transfers are prescribed in paragraph E.6.b. below. Disposal of a capital asset--whether at a gain or a loss--shall be in accordance with Chapter 62 of this Volume and Part of the DoD Financial Management Regulation.

d. Capital Assets Acquired for Customers

(1) Statutory limitations and restrictions imposed on appropriated or other funds of the DBOF's customer(s) are not changed by the placement of an order with the DBOF. A DBOF customer cannot use its appropriated funds to do indirectly i.e., through placement of an order with a DBOF activity, what it is not permitted to do directly. Thus, the availability of an appropriation cannot be expanded or otherwise changed by placing a customer order with, or otherwise transferring amounts to the DBOF. Appropriated funds cited on reimbursable orders are available only for the purposes permissible under the source appropriation and remain subject to the same restrictions. The ordering activity is primarily responsible for the determination of the applicability of the ordering appropriation. However, if instances arise where the ordering appropriation is not appropriate for the purpose provided, then the order should be returned with a request for an appropriate appropriation cite.

(2) Capital assets which are acquired specifically for a particular customer order and do not have a recurring use for other workload or customer orders shall be charged to the customer order, provided the appropriation or fund cited in the order is appropriate for that purpose. Such assets shall be the property of the customer and, as such, are not subject to depreciation expense recovery by a DBOF activity.

(3) The total cost incurred by a DBOF activity in developing, manufacturing or acquiring capital assets for a customer shall be accumulated in the work-in-process account. Customers shall be billed the negotiated sales price. The selling price shall include the total cost of the capital asset which consists of contractual cost net of authorized discounts taken, reimbursable support cost, applicable overhead, general and administrative costs when appropriate, any associated costs for installation, modification, testing, transportation, and other related costs in developing or acquiring the asset, plus any approved surcharges.

7. Improvements and Upgrades of Existing Capital Assets

a. Improvements and upgrades that increase the capacity or operating efficiency of an existing capital asset, and for which the cost is equal to or greater than the expense/investment funding threshold used by the Congress for appropriating DoD operating (expense) and Procurement (investment) appropriations, should be capitalized even though the improvement or upgrade may not extend the useful life of the asset. The depreciation schedule of existing capital assets shall be revised to include the acquisition cost of a capitalized improvement or upgrade. Below are criteria for use in determining whether the useful life of the original asset should be revised. In either situation, revision of depreciation expense and/or useful life is measured prospectively and accounted for in the current and future periods. No adjustment shall be made to prior depreciation.

(1) If the cost of the improvement or upgrade is greater than 50 percent of the net book value (original acquisition cost less accumulated depreciation) of the existing asset, then the improvement or upgrade is analogous to the purchase or manufacture of a new asset. Accordingly, investment amounts will be added to the current net book value of the existing asset and a new depreciation value computed which will depreciate the new value over the useful life of the asset determined from the month that the improvement or upgrade became operational.

(2) If the cost of the improvement or upgrade is less than 50 percent of the net book value (original acquisition cost less accumulated depreciation) of the existing asset, then the cost of the improvement or upgrade is depreciated over the remaining useful life of the existing asset.

b. Improvements and upgrades costing less than expense/investment funding threshold used by the Congress for appropriating DoD operating and Procurement appropriations are recorded as an expense even though the improvement or upgrade could extend the useful life of the asset.

8. Capital Asset Accounting Pro Forma Illustrations

a. An illustration of selected accounting entries to be recorded in a DBOF's financial records is as follows:

(1) Record Capital Budget at Component Level

Dr 4550 Internal Fund Distributions Received
Cr 4567 Unallotted Capital Authority-DBOF

Entry to record at the Component/Agency level the capital budget received from the DoD Level.

(2) Issue Capital Budget to Installation Level

Dr 4567 Unallotted Capital Authority-DBOF
Cr 4577 Capital Authority Issued-DBOF

Entry to record the capital budget issued to the installation level from the Component/Agency level.

(3) Record Capital Budget at Installation Level

Dr 4585 Capital Program-DBOF
Cr 4615 Capital Authority Available-DBOF

Entry to record the capital budget at the installation level received from the DoD Component.

(4) Order Placed for Capital Equipment

Dr 4615 Capital Authority Available-DBOF
Cr 4825 Undelivered Orders-Capital-DBOF

Entry to record an obligation for the purchase of capital equipment.

(5) Capital Asset Received

Dr 4825 Undelivered Orders-Capital-DBOF
Cr 4922 Accrued Expenditures-Unpaid-Capital-DBOF

Dr 1750 Equipment
Cr 2110 Accounts Payable

Entry to record the receipt and recognize the accounts payable for a capital asset.

(6) Payment for Capital Asset

Dr 4922 Accrued Expenditures-Unpaid-
Capital-DBOF
Cr 4944 Accrued Expenditures-Paid-
Capital-DBOF

Dr 2110 Accounts Payable
Cr 1012.2 Funds Disbursed-Capital
Program-DBOF

Entry to record the payment for the purchase of a capital asset.

b. A DBOF activity transfers out a capital asset to another Government Agency for which depreciation has previously been recorded.

(1) Transfer-Out of Capital Asset with Recorded Depreciation to another Government Agency

Dr 3231 Transfers-Out to Government Agencies
Without Reimbursement
Dr 1759 Accumulated Depreciation on Equipment
Cr 1750 Equipment

Entry to record the transfer-out of a capital asset to another Government Agency where depreciation has previously been recorded.

(2) Transfer-Out of Capital Asset with Recorded Depreciation to Others

Dr 3232 Transfers-Out to All Others
Without Reimbursement
Dr 1759 Accumulated Depreciation on Equipment
Cr 1750 Equipment

Entry to record the transfer-out of a capital asset to others where depreciation has previously been recorded.

c. A transfer-in to a DBOF activity of a capital asset for which depreciation has previously been recorded.

Receipt of Capital Asset Transferred-In with Recorded Depreciation

Dr 1750 Equipment
Cr 1759 Accumulated Depreciation on Equipment
Cr 3220 Transfers-In from Others Without
Reimbursement

Entry to record the transfer-in of a capital asset from another DoD activity where depreciation has previously been recorded.

8. General ledger account definitions are provided in Volume 1 of the "DoD Financial Management Regulation."

F. COST AND ECONOMIC ANALYSIS OF DBOF CAPITAL INVESTMENT PROGRAM PROJECTS

1. Purpose. The purpose of this policy is to:

a. Clarify techniques and procedures for analysis and documentation of capital projects with investment costs less than \$100,000 as well as those of \$100,000 or more. Capital projects are those that are expected to meet the capitalization criteria specified in paragraph D.6. of this chapter.

b. Outline the process for capital project economic analysis and cost comparison justifications in support of the Planning, Programming, Budgeting, and Execution System.

2. Related Materials

a. OMB Circular A-94, "Guidelines and Discount Rates for Benefit-Cost Analysis of Federal Programs," October 1992.

b. DoDI 7041.3, "Economic Analysis and Program Evaluation for Resource Management," October 1972.

c. DoD 7000.14-R, "Department of Defense Financial Management Regulation," Volume 2B, Chapter 9, May 1994.

d. OUSD(C) Inflation Indices issued annually to DoD Components for use in preparation of PPBES submissions and cost estimates.

3. Analytical Justification - General Policy

a. Capital Investment Program projects within the DBOF are essential in maintaining efficient and effective business operations. It is imperative that expenditure of funds for these projects be justified based on sound analytical evaluation to ensure competitive operations reflected in a structure supporting the lowest price to the customer.

b. Funding requests for projects in the four Capital Investment Program categories identified in paragraph D. of this chapter shall be justified and supported by a formal, pre-investment analysis. Either an economic analysis or cost comparison as discussed in this document is required to justify investment projects for Capital Budget "submissions, reprogramming requests, or substitution of projects. The scope of analysis shall be tailored depending on dollar value of the project as outlined in paragraphs F.5. and F.6. below. These analyses shall be maintained by the originating office of the DoD Component as project documentation support for the Capital Budget submission as well as program execution. The Capital Investment Program categories are:

(1) Capital Equipment (Other than ADPE & Telecommunications)

(2) ADPE and Telecommunications Equipment

(3) Software

(4) Minor Construction (less than \$300,000)

c. Capital Investment Program projects in the four investment categories above shall also be identified according to one of the following primary reasons for justifying the investment:

(1) Replacement. Unsafe, beyond economical repair, or inoperative/unusable assets.

(2) Productivity. Improved efficiency (savings) or effectiveness.

(3) New Mission. Required new capability or capacity that cannot be met with current equipment or facilities.

(4) Environmental. Investment for environmental or hazardous waste reduction including regulatory agency mandated requirements.

4. Analytical Justification - General Policy Exemptions. There are two instances for which an exemption applies to the requirement to perform a pre-investment analysis. In both instances, an exception justification statement shall be prepared documenting the requirement or authority for the exemption claimed. Exemption statements shall be validated as would a pre-investment analysis and approved through DoD Component review channels. The two instances are:

Environmental, hazardous waste reduction, or regulatory agency (state, local, or Federal), mandated requirements; also includes directed action by higher DoD or Component authority which precludes choice among alternatives.

b. DoD instruction or directive waive the requirement (e.g., equipment age or condition replacement criteria).

5. Analytical Justification - Investment Projects under \$100,000

a. Investment projects estimated to cost under \$100,000 shall be justified using an abbreviated approach which compares the costs of feasible alternatives to the status quo. The cost comparison initially shall be prepared in constant base year dollars and shall present a differential cost display by year for up to a six year evaluation period beginning with the budget year for which investment funds are requested.

b. Documentation for a cost comparison shall describe the functional process performed; define the need/requirement/objective; identify workload projections; address feasible alternatives; present total costs attributed to each alternative and the differential costs/monetary benefits expected in constant and current dollars over the six year evaluation period; provide significant assumptions, constraints, estimating methods, rationale and data sources.

c. The following economic indicators (defined in paragraph F.7. below) shall be developed and summarized in the Cost Comparison: Payback and Benefit to Investment Ratio (BIR). These values shall be used in conjunction with the above documentation elements in determining the recommended project alternative when there is more than one under evaluation. Payback shall be the primary indicator from cost comparisons to rank order projects up to \$100,000 within the investment categories of each business area.

d. Addendum 2 presents a recommended outline and format for the cost comparison reflecting the above documentation elements. Complete documentation for a cost comparison may be 3-5 pages although this may vary depending on the number of alternatives considered and complexity of the project.

6. Analytical Justification - Investment Projects \$100,000 or More

a. Investment projects estimated to cost \$100,000 or more shall be justified using conventional, analytical techniques pertaining to economic analysis for evaluation of alternatives relative to the current situation or status quo. The economic analysis shall be prepared on a net present value (NPV) basis and shall comply with applicable DoD or Component guidance as well as functional program guidance. The economic analysis initially shall be prepared in constant base year dollars and shall present a differential cost display by year over the project's expected economic life beginning with the budget year for which investment funds are requested. The expected economic life used in estimating the costs and benefits of an alternative shown on the Economic Analysis Format shall be the same as the depreciation period for that asset as shown in paragraph D.7.f. above.

b. Documentation shall describe the functional process performed; define the need/requirement/objective; present and explain workload projections; identify feasible alternatives; present total costs and the differential costs/monetary benefits in constant, discounted, and current dollars over the expected economic life of the project; highlight NPV of the alternatives; present estimating methods/relationships, and data sources; identify significant constraints, assumptions and variables; treat sensitivity and uncertainty of key parameters; and address all other quantifiable benefits as well as any intangible benefits influencing the recommended course of action. Quantifiable benefits are all outputs/results achieved in return for investment dollars associated with an alternative. Numerical values such as dollars saved or physical/performance attributes are measures of quantifiable benefits. Intangible benefits are qualitative in nature such as improved morale or quality of life considerations.

c. The standard criterion used in evaluating investment alternatives based on economic principles is NPV which is the difference between the discounted present value of monetary benefits and the discounted present value of investment costs. In addition to NPV, economic indicators for "Payback" and "Benefit to Investment Ratio (BIR)," (defined in paragraph F.7. below) shall be developed and summarized in the economic analysis. These values shall be used in conjunction with the above documentation elements in determining the recommended project alternative when there is more than one under evaluation. NPV and BIR shall be the primary financial

measures from economic analyses used to rank order projects of \$100,000 or more within the investment categories of each business area.

d. Addendum 3 contains a recommended outline and format for the economic analysis reflecting the above documentation elements. Automated economic programs and reports may be used if the programs provide reports comparable to the requirements of Addendum 3.

e. With regard to automated information systems investments and functional program evaluations within the DoD, the pre-investment analysis process shall comply with the requirements identified below. Care shall be exercised in consideration of the type and program responsibility for the respective economic analyses to assure efficient preparation and submission to the appropriate business area and Capital Investment Program category.

(1) Major Automated Information System Review Council (MAISRC) Systems. MAISRC Systems shall comply with economic analysis preparation, display, milestone, and dollar threshold requirements for automated information systems governed by DoDD 8120.1, "Life-Cycle Management of Automated Information Systems," DoDI 8120.2, "Automated Information Systems Life-Cycle Management Process, Review, and Milestone Approval Procedures," DoDI 7920.4, "Baselining of Automated Information Systems," and DoD 7920.2-M, "Automated Information system Life-Cycle Management Manual."

(2) Functional Economic Analyses. Functional Economic Analyses (FEAs) shall comply with DoD economic analysis requirements in support of functional program business cases governed by DoD Series 8000 Instructions and authorities referenced in paragraph F.2. of this chapter.

f. All automated information systems investments shall be supported by an economic analysis for each phase of the acquisition review and approval process prescribed by DoD and Component regulatory authority.

7. Economic Indicators

a. The economic indicators as defined and discussed below shall be used in both cost comparisons and economic analyses for Capital Investment Program projects.

(1) Payback. Used to compare the period of time, in years, necessary for an alternative to repay its investment cost from monetary benefits expected; also used as a value to compare and rank order competing projects; computed using current dollars. Calculated and presented as whole and fractional part of a year (i.e., 2.73 years).

(2) Benefit to Investment Ratio (BIR). Used to compare project alternatives in terms of all expected monetary benefits inclusive of whole and partial manpower productivity savings resulting from increased efficiency and other cost avoidances achieved over the total project life under evaluation; also used as a value to compare other projects. Calculated, using discounted constant dollars, as an index value and rounded to the second decimal place (e.g., 3.74). The value must be greater than one to be cost beneficial; the larger the ratio the greater the advantage.

b. The computation of BIR shall be limited for Capital Investment Program projects to a six year evaluation period for cost comparisons and a project's expected economic life for economic analyses. If the expected economic life of a proposed capital asset/alternative is less than the six year period for a cost comparison, the evaluation period shall be shortened to match. Additionally, the cost comparison DIR shall be computed using constant dollars only since discounting does not apply to the cost comparison analysis.

c. Some projects may not generate sufficient expected monetary benefits to payback within the specified evaluation period for cost comparisons. In these instances, annual benefits shall be extrapolated beyond the evaluation period for purposes of determining the Payback.

d. Automated information systems economic analyses, in accordance with paragraph F.6.e. above, also include a "Savings to Investment Ratio (SIR)" economic indicator. Savings to Investment Ratio (SIR) is used to compare project alternatives in terms of hard savings expected (i.e., funds no longer required in the budget and program out years) relative to the investment cost of each alternative over the total project life under evaluation; also used as a value to compare other projects; computed using discounted constant dollars.

8. Operations Versus Investment Cost Elements for Analysis of DBOF, Capital Investment Program Projects. The following elements are illustrative of those considered in estimating the costs associated with a Capital Investment Program project for either a cost comparison or economic analysis. These cost elements may be augmented as needed. Operations cost elements apply to the status quo and all feasible alternatives while investment cost elements apply only to the alternatives. Operations costs should be estimated on a total cost basis including all direct and indirect labor, applicable overhead, and general and administrative costs. Operations costs may include non-recurring (one time) as well as recurring costs.

OPERATIONS COSTS

Consumable Supplies

Lease/Rent

Utilities

Other

INVESTMENT COSTS

Acquisition

Transportation *

Installation *

Testing*

Training *

Other

* May be applicable if not included in acquisition cost.

9. Budget Formulation and Execution

a. Capital Investment Program project justifications shall be used in support of program planning as well the budget formulation process. Initial supporting, pre-investment analyses shall be completed approximately eighteen months prior to the year of execution and then reassessed approximately six months before year of execution. In addition to budget formulation, either an economic analysis or cost comparison shall be used to support a project substitution or to accomplish a reprogramming request.

b. DoD Component business areas are encouraged to rank order all projects within Capital Investment Program category (as shown in paragraph F.3.b. above) based on NPV and the economic indicators discussed above as well as other essential criteria (e.g., exemptions) deemed appropriate by Component activities. The prioritization process shall facilitate timely substitution of worthy projects for those no longer justified and subsequently drop out.' The priority sequencing process shall result in a listing that is periodically updated as Component or business area priorities change.

c. Capital Investment Program projects shall be submitted in accordance with Volume 2B, Chapter 9 of this Regulation.

(1) Investment projects of \$500,000 or more shall be supported by a summary of the results of the economic analysis including an explanatory narrative of the need/requirement, workload projections, feasible alternatives, significant assumptions, estimating methods, data sources, NPV, Payback, BIR, dollar benefits expected, and other support of the recommended project. An appropriate exemption justification statement shall be included as applicable in lieu of economic analysis summary results.

(2) Investment projects of \$1.0 million or more shall have a copy of their supporting economic analysis submitted to the DoD Component for review and retention.

10. Post-Investment Analyses. Annually, each activity within the DBOF shall prepare post-investment analyses for ten percent of the number of capital investment projects, but not less than five projects, that were completed during the previous fiscal year and had been justified wholly or partially on the basis of economic considerations (e.g., productivity improvements). The projects selected for post-investment analysis shall be a representative sample of the completed investment projects. The format and technique for each post-investment analysis shall be similar to the cost comparison or economic analysis used for the project justification. The post-investment analyses shall be retained for ready review for five years.

ACCOUNTING ILLUSTRATION

INVESTED CAPITAL USED

A. GENERAL

1. Revenue and expenses associated with reimbursable orders must be matched and reported on the Statement of Operations. Likewise, the use of assets, as measured by depreciation of those assets, which are not included in reimbursement rates is a financing source against which expenses Must be matched and reported on the Statement of Operations. To accomplish this requirement, general ledger account 5790 has been established.

2. Assets used by the Defense Business Operations Fund (DBOF) may be made available in one of two ways:

a. Assets may be purchased by use of DBOF (97X4930) resources. Assets purchased through use of DBOF resources are accounted for as an exchange of assets (DBOF cash for the acquired asset) as demonstrated by the following accounting entry:

Dr 1730 Buildings	\$ 60,000	
Dr 1740 Other Structures and Facilities	\$ 48,000	
Cr 1012.2 Funds Disbursed -		
Capital Program - DBOF		\$108,000

b. Assets may be acquired through resources other than those made available to the DBOF for its use. Assets of this type (generally buildings, structures, and facilities financed by a Military Construction appropriation and assets financed by a Procurement appropriation for mobilization requirements) are accounted for as an increase to the applicable asset account and a corresponding increase in equity as demonstrated by the following accounting entry (and more fully explained in this Addendum):

Dr 1730 Buildings	\$240,000	
Dr 1740 Other Structures and Facilities	\$120,000	
Cr 3211.2 Assets Capitalized		\$360,000

Account 5790, "Invested Capital Used," a credit balance account, is a general ledger account established to match, as a financing source, the current period depreciation of assets acquired through resources other than those made available to the DBOF (97X4930) for its use.

B. ILLUSTRATION. The following simplified illustration provides an explanation, in accounting terms, of the accounting necessary to properly recognize revenue and associated expense applicable to invested capital.

1. Identification of Expense to Financing Source. Assets used by the DBOF may be financed through use of DBOF resources (97x4930) or they may be financed by other sources and donated or otherwise made available to the DBOF for its use. The assets acquired must be identified to their original financing source so that the depreciation of those assets can be properly identified.

Financing Source	Account 1730 <u>Buildings</u>	Account 1739 Monthly <u>Depreciation</u>	Account 1740 Other Structures and Facilities	Account 1749 Monthly <u>Depreciation</u>
97X4930	\$60,000	\$ 250	\$48,000	\$ 200
Donation/Other	<u>\$240,000</u>	<u>\$1,000</u>	<u>\$120,000</u>	<u>\$ 500</u>
Total	\$300,000	\$1,250	\$168,000	\$ 700

2. Recognition of Accrued Expenses

Dr	6126 Depreciation of Real Property	\$1,500	
	Cr 1739 Accumulated Depreciation on Buildings		\$1,000
	Cr 1749 Accumulated Depreciation on Other Structures and Facilities		\$ 500

To record monthly real, property depreciation on donated/Military Construction financed assets. (As shown in preceding table, \$1,500 [\$1,000 + \$500] of the depreciation is applicable to assets used by the DBOF but financed by resources other than those available to the DBOF.)

Dr	6126 Depreciation of Real Property	\$ 450	
	Cr 1739 Accumulated Depreciation on Buildings		\$ 250
	Cr 1749 Accumulated Depreciation on Other Structures and Facilities		\$ 200

To record monthly real property depreciation on assets acquired with DBOF financial resources.

3. Reduction of Invested Capital (Account 3211.2). The amounts to be recorded in account 5790 shall be equal to the amount of depreciation/depletion/amortization expenses recorded in the 6100 series of accounts that are applicable to assets used by the DBOF but financed by resources other than those available to the DBOF. In this illustration, those expenses total \$1,500.

The following entry illustrates the use of this account:

Dr	3211.2 Assets Capitalized	\$1,500	
	Cr 5790 Invested Capital Used		\$1,500

To record, as a financing source, the monthly benefit received from the use of non-DBOF assets. The benefit received shall be equal to the depreciation-expense recorded for those assets during the same period.

4. CLOSING OF ACCOUNTS AT FISCAL YEAR END

Dr 3321 Net Results of Operations - DBOF	\$ 23,400	
Cr 6126 Depreciation of Real Property		\$ 23,400
Dr 5790 Invested Capital Used	\$ 18,000	
Cr 3321 Net Results of Operations-DBOF		\$ 18,000
Dr 1012.2 Funds Disbursed - Capital Program - DBOF	\$108,000	
Cr 3211.4 Net Treasury Balance-DBOF		\$108,000

5. NOTES:

a. Account 5790, "Invested Capital Used," should equal the amount of depreciation expenses recorded for assets used by the DBOF but financed by resources other than those available to the DBOF.

b. The balance in account 5790 should be reported within the "Revenues and Financing Sources" section of the Statement of Operations on the line for "Other Revenue and Financing Sources."

c. The accrued depreciation expense should be reported within the "Expenses" section of the Statement of Operations on the line for "Depreciation and Amortization."

d. The Journal Voucher used to generate the third entry in paragraph B.4. above to close general ledger account 1012.2, "Funds Disbursed - Capital Program - DBOF" to general ledger account 3211.4 shall be retained indefinitely. A copy of the Journal Voucher shall be forwarded to the Defense Finance and Accounting Service-Cleveland Center. Upon receipt of the Journal Voucher from a DBOF activity, the Defense Finance and Accounting Service-Cleveland Center shall make the following accounting entry:

Dr 3211.4 Net Treasury Balance-DBOF	\$108,000	
Cr 1013.2 Funds with Treasury - Capital Program - DBOP		\$108,000

CHAPTER 59

LIABILITIES

A. GENERAL STANDARDS

1. General Information. General information relating to liabilities may be found in Chapter 8, "Liabilities" Chapter 9, "Accounts payable," Chapter 10, "Accrued Personnel Liabilities," and Chapter 13, "Other Liabilities," of Volume 4 of this regulation.

2. Definition of the Term "Liability". A liability is a probable and measurable future outflow of resources arising from past transactions or events.

3. Liabilities Covered by Budgetary Resources (Funded Liabilities). These are liabilities incurred which will be covered by available budgetary resources. Budgetary resources include: (a) new budget authority; (b) offsetting collections credited to an appropriation or fund account; (c) recoveries of unexpired budget authority through downward adjustments of prior year obligations; and (d) unobligated balances of such resources at the beginning of the year or transferred in during the year.

a. Intragovernmental Funded Liabilities. Intragovernmental liabilities, for the Defense Business Operations Fund, are claims against the DBOF by non-DBOF DoD and other federal entities. Intragovernmental liabilities include accounts payable to non-DBOF DoD and other federal entities and other current liabilities such as advances and Prepayments received from those entities.

b. Governmental Funded Liabilities. Governmental liabilities, for the Defense Business Operations Fund as well as for other DoD entities, are amounts that the federal government or an entity within the federal government owes to nonfederal entities. The term "nonfederal entities" encompasses domestic and foreign persons and organizations outside the U.S. Government. The term "public" is also used to represent nonfederal entities. Governmental liabilities include accounts and interest payable to nonfederal entities, other liabilities due to nonfederal entities, and advances and prepayments received from nonfederal entities.

4. Liabilities Not Covered by Budgetary Resources (Unfunded Liabilities). These are liabilities incurred which are not covered by available budgetary resources. These include liabilities resulting from the receipt of goods or services in the current or prior periods, or the occurrence of eligible events in the current or prior Periods, for which revenues or other sources of funds necessary to pay the liabilities have not been made available through Congressional appropriations or earnings of the entity. Notwithstanding an expectation that the appropriations will be made, whether they in fact will be made is completely at the discretion of the Congress.

a. Intragovernmental Unfunded Liabilities. These are liabilities, not covered by available budgetary resources, that arise from transactions among federal entities.

b. Governmental Unfunded Liabilities. These are liabilities, not covered by available budgetary resources, that arise from transactions with nonfederal entities.

5. Recognition of Liabilities. A liability should be recognized when it is incurred, regardless of whether it is covered by available budgetary resources. Financial statement disclosure should be made for liabilities that are not covered by available budgetary resources.

B. SPECIFIC STANDARDS

1. Accounts Payable. Accounts payable are amounts owed by a federal entity for goods and services received from, progress in contract performance made by, and rents due to other entities. Accounts payable are not intended to include liabilities related to on-going continuous expenses such as employees' salary and benefits, which are covered by other current liabilities. Amounts owed for goods or services received from federal entities represent intragovernmental transactions and should be reported separately from amounts owed to the public.

2. Recognition of Accounts Payable. When an entity accepts title to goods, whether the goods are delivered or in transit, the entity should recognize a liability for the unpaid amount of the goods. If invoices for those goods are not available when financial statements are prepared, the amounts owed should be estimated. When a contractor provides the government with goods that are also suitable for sale to others, the liability usually arises when the contractor physically delivers the goods and the government receives them and takes formal title. However, when a contractor builds or manufactures facilities or equipment to the government's specifications, formal acceptance of the products by the government is not the determining factor for accounting recognition. Constructive or de facto receipt for facilities or equipment constructed or manufactured according to agreements or contract specifications occurs in each accounting period based on an estimate of work completed under the contract or agreement. The estimate of such amounts should be based primarily on the federal entity's engineering and management evaluation of actual performance progress and incurred costs. As a rule, actual performance progress and incurred costs are evidenced by progress billings from the contractor and are verified by the contract administrator.

3. Interest Payable. Interest payable should be recorded for the amount of interest expense incurred and unpaid. Within the DoD, interest payable results primarily from late payment of bills by a DoD activity (see provisions in 31 U.S.C. 3901 through 3907, Prompt Payment) and on refunds (see provisions in 26 U.S.C. 6611). The provisions of the Prompt Payment Act require that interest penalties be paid from funds available to carry out the programs for which the penalty was incurred, that is, interest penalties under the Prompt Payment Act shall be charged directly to the account that funds the payment of the underlying liability.

4. Other Current Liabilities. The term "other current liabilities" is used to report current liabilities that are not recognized in specific categories such as accounts payable; interest payable; debt owed to the public, Treasury, or other entities; and liabilities for loan guarantee losses. Other current liabilities due to federal entities are intragovernmental liabilities that should be reported separately from those due to employees and the public. Other current liabilities include unpaid expenses that are accrued for the fiscal year for which the financial statements are prepared and are expected to be paid within the fiscal year following the reporting date. Examples of "other current liabilities" are:

a. Accrued employees wages, bonuses, and salaries for services rendered in the current fiscal year for which paychecks will be issued in the following year.

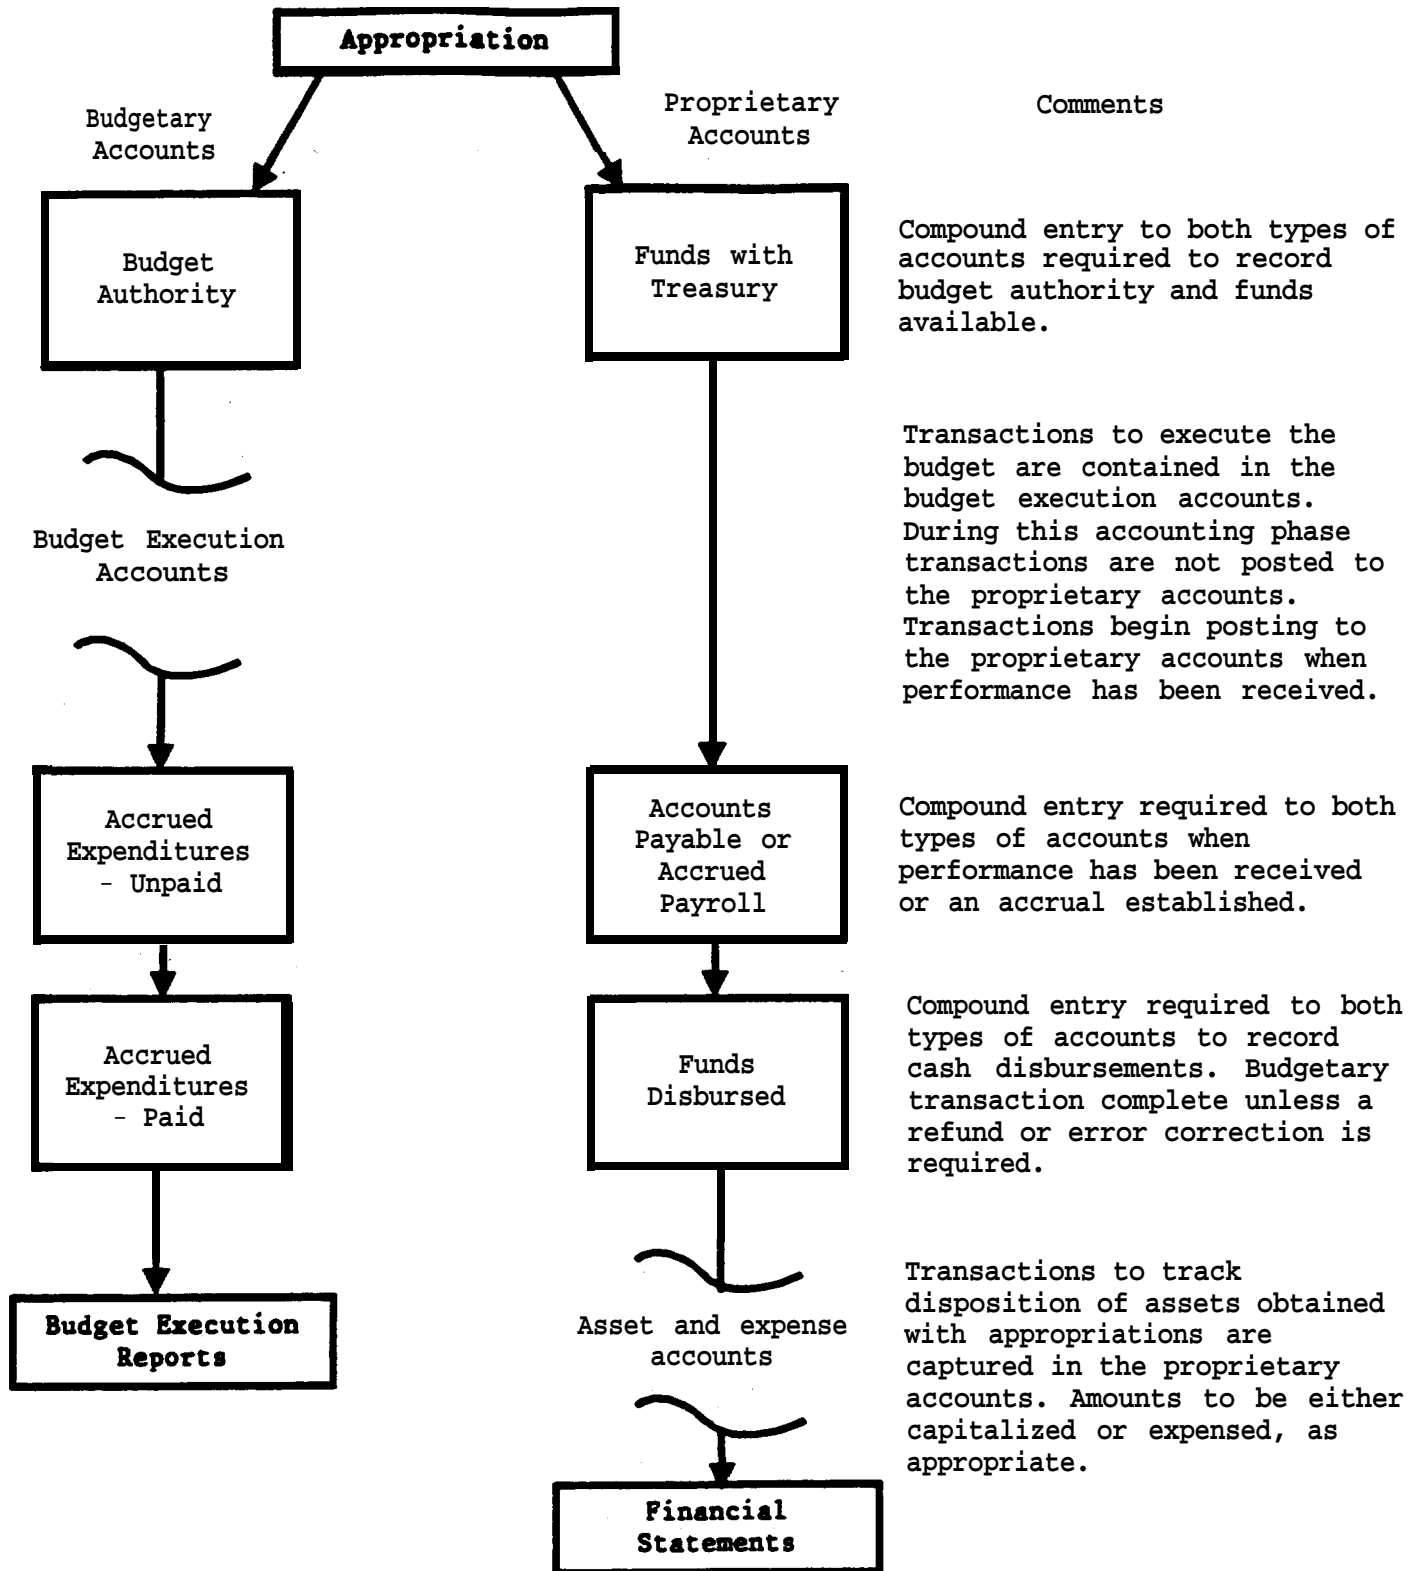

b. Advances and prepayments received for goods to be delivered or services to be performed. An advance equal to the price of an item shall be collected before delivery or shipment of an item to customer who is not chartered, sanctioned, authorized, or under contract to perform a function of the Federal Government. Federal Government nonappropriated fund instrumentalities are authorized to perform a morale, welfare, and recreation function for the Federal Government. Before revenues are earned, the current portion of the advances and prepayments should be recorded as other current liabilities. After the revenue is earned (goods or services are delivered, or performance progress is made according to engineering evaluations), the entity should record the appropriate amount as a revenue or financing source and should reduce the liability accordingly.

5. Relationship of liabilities to obligations. A federal entity, under budgetary accounting, records an obligation (i.e., an undelivered order) when the entity places a purchase order or signs a contract. An obligation, once incurred, reduces an entity's resources available for obligation. Budgetary accounting entries are required to record the amounts obligated and to reduce the available budget authority. For financial reporting purposes, liabilities are recognized when goods and services are received or are recognized based on an estimate of work completed under a contract or agreement. When liabilities are recognized, the undelivered order recorded in budgetary accounts is reduced and an accrued expenditure-unpaid is recorded. Addendum 1 illustrates this relationship.

6. Supporting Records. Supporting records shall be maintained for all liabilities. The supporting record shall identify the amount owed by individual transaction the date recorded, and the identity of the payee. At least quarterly, the supporting records shall be reconciled with the general ledger balance. All differences shall be investigated and all errors corrected.

7. More specific and detailed information on the accounting for liabilities are contained in Volume 4, "Accounting Policies and Procedures," of this Regulation.

BUDGETARY AND PROPRIETARY ACCOUNTING RELATIONSHIPS

Addendum 1

CHAPTER 60

EQUITY

A. EQUITY

General information relating to equity may be found in Chapter 16, "Equity," of Volume 4 of this regulation. The equity accounts authorized for use by the Defense Business operations Fund are listed below. A description of each account and illustrative accounting entries are contained in paragraph B. of this chapter. The Defense Business Operations Fund equity accounts are:

- 3211 Capital Investment - DBO
 - 3211.1 Appropriations Available
 - 3211.2 Assets Capitalized
 - 3211.3 Liabilities Assumed
- 3220 Transfers In from Others Without Reimbursement
- 3230 Transfers Out to Others Without Reimbursement
 - 3231 Transfers Out to Government Agencies Without Reimbursement
 - 3232 Transfers Out to All Others Without Reimbursement
- 3310 Cumulative Results of Operations
 - 3311.1 Cumulative Results of Operations - DBOF
 - 3311.2 Cumulative Results of Operations - DBOP- Deferred
- 3320 Net Results of Operations
 - 3321 Net Results of Operations - DBOF

B. EQUITY ACCOUNT DESCRIPTION AND ILLUSTRATION

1. Account 3211, Capital Investment - DBOF. Accounts subsidiary to the summary account 3211, "Capital Investment - DBOF," have been established to meet the financial reporting requirement of the Defense Business Operations Fund. The necessary subsidiary accounts are shown below:

a. Account 3211.1, Appropriations Available. Account 3211.1, "Appropriations Available," shall be used to record amounts appropriated or reappropriated to establish or increase the working capital of the Defense Business Operations Fund. Increases occur upon appropriation or reappropriation. Decreases occur primarily when the appropriation is used. Decreases also occur when previously appropriated and/or reappropriated amounts are returned to the U.S. Treasury or to another appropriation or fund. Chapter 52, "Budgetary Resources," of this Part contains additional information on the use of this account. Sources of entries to the "Appropriations Available" account include TFS Form 62,00, "Department of the Treasury Appropriation Warrant," and SF-1151, "Nonexpenditure Transfer Authorizations." The following illustrate the most common entries to this credit-balance account:

Dr 1013 Funds With Treasury
Cr 3211.1 Appropriations Available

To record the receipt of capital appropriated for the Defense Business Operations Fund.

Dr 3211.1 Appropriations Available
Cr 5700 Appropriated Capital Used

To record the use of an appropriation.

NOTE : Account 5700; "Appropriated Capital Used," is an account established to disclose an appropriated financing source. The above entry serves to reduce the appropriated balance. More information on account 5700 and associated expense entries is contained in Chapter 53 of this part. At fiscal year end, Account 5700 is closed to account 3321, "Net Results of Operations - DBOF."

Dr 3211.1 Appropriations Available
Cr 1013 Funds with Treasury

To record the return to Treasury of capital appropriated for the Defense Business Operations Fund.

b. Account 3211.2, Assets Capitalized. Account 3211.2, "Assets Capitalized," shall be used to (1) record, as an increase, the net book value of assets such as operating materials and supplies, work in process at contractor plants, work in process at other Government plants, and contributed assets that were initially recorded to account 3220, "Transfers-In From Others Without Reimbursement" and (2) record decreases due to the transfer out, donation, or other disposal of contributed capital assets that were initially recorded to account 3231, "Transfers-Out To Other Government Agencies Without Reimbursement," and 3232, "Transfers-Out To All Others Without Reimbursement." Transfers-in and transfers-out are initially recorded to, as applicable, to account 3220, "Transfers-In from Others Without Reimbursement," account 3231 "Transfers-Out to Government Agencies Without Reimbursement," and account 3232 "Transfers-Out to all Others Without Reimbursement." Additionally, account 3211.2 shall be reduced (debited) monthly, at a minimum, by the amount of depreciation expense recorded that month on donated and other assets financed by other than DSOF resources. The offsetting (credit) entry shall be to a financing source account 5790, Invested Capital Used,". Those accounts are closed, at the end of a fiscal year, to "Assets Capitalized." Sources of entries to the "Assets Capitalized" account are property records and journal vouchers. The following illustrate the most common entries to this credit-balance account:

Dr 3220 Transfers-In From Others Without Reimbursement
Cr 3211.2 Assets Capitalized

To close the value of assets transferred-in without reimbursement during the fiscal year.

Dr 3211.2 Assets Capitalized
Cr 3231 Transfers-Out To Other Government Agencies Without
Reimbursement
Cr 3232 Transfers-Out To All Others Without Reimbursement

To close the value of assets transferred out without
reimbursement during the fiscal year.

Dr 3211.2 Assets Capitalized
Cr 5790 Invested Capital Used

To record, as a financing source, the monthly benefit received
from the use of non-DBOF assets. The benefit received shall
be equal to the depreciation expense recorded for those assets
during the same period.

c. Account 3211.3, Liabilities Assumed. Account 3211.3, "Liabilities Assumed," shall be used to (1) record the sum of the amounts assumed without accompanying payment for accrued annual leave and other liabilities transferred-in, and (2) record holdbacks on progress billings from contractors at the time of initial capitalization (if payment in the form of cash or other assets was not received in sufficient amount to cover the liability). Sources of entries to the "Liabilities Assumed" account are journal vouchers. The following illustrates common entries to this debit-balance account:

Dr 3211.3 Liabilities Assumed
Cr 2130 Contract Holdbacks

To record the amount of holdbacks on progress billings from
contractors transferred in without accompanying payment upon
reorganization of an appropriated fund activity to a Defense
Business Operations Fund activity.

Dr 3211.3 Liabilities Assumed
Cr 2221 Accrued Annual Leave - Civilian (Unfunded)

To record the amount of unfunded annual leave transferred in
without accompanying payment upon reorganization of an
appropriated fund activity to a Defense Business Operations
Fund activity.

2. Account 3311.1, Cumulative Results of Operations - DBOF. Account 3311.1, "Cumulative Results of Operations - DBOF," is authorized for use by Defense Business Operations Fund activities. Account 3311.1, "Cumulative Results of Operations - DBOF," shall be used primarily to accumulate the net difference between expenses and financing sources since inception through the annual closing of the balance in account 3321, "Net Results of Operations - DBOF," and account 7400, "Prior Period Adjustments." The following illustrates common entries to this debit/credit-balance account:

Dr 3321 Net Results of Operations - DBOF
Cr 3311.1 Cumulative Results of Operations - DBOF

Entry to record, at fiscal year end, a net gain from operations.

Dr 3311.1 Cumulative Results of Operations - DBOF
Cr 3321 Net Results of Operations - DBOF

Entry to record, at fiscal year end, a net loss from operations.

Dr 7400 Prior Period Adjustments
Cr 3311.1 Cumulative Results of Operations - DBOF

Entry to record, at fiscal year end, prior period adjustments that result in a net increase to equity.

Dr 3311.1 Cumulative Results of Operations - DBOF
Cr 7400 Prior Period Adjustments

Entry to record, at fiscal year end, prior period adjustments that result in a net decrease to equity.

NOTE: Account 7400, "Prior Period Adjustments" is not closed to "Net Results of Operations." Rather, it is closed directly to account 3311, "Cumulative Results of Operations - DBOF," at the end of each fiscal year. Account 7400, "Prior Period Adjustments," is used ONLY to correct errors of entries that were made, or not made, in prior years to accounts, such as revenue, expense, gain, and loss accounts, that were closed to and thereby affected equity.

3. Account 3311.2. Cumulative Results of Operations - DBOF - Deferred.
Account 3311.2, "Cumulative Results of Operations - DBOF - Deferred," is authorized for use by Defense Business Operations Fund activities. Account 3311.2, "Cumulative Results of Operations - DBOF - Deferred," shall be used to disclose any portion of accumulated operating results that has been deferred for recovery from, or return to, customers in the subsequent fiscal year stabilized rate or standard price development. Entries to this account:

a. Shall not be made unless authorized by the next higher command. Documentation to demonstrate higher level authorization shall be retained for, and made available for audit.

b. Shall be traceable to specific direction received from the Office of the Under Secretary of Defense (Comptroller) to defer recovery or return of accumulated operating results.

c. Shall agree with amounts reported on Part V, "Recoverable Operating Results," of the DBOF Monthly AR 1307 Statement of Operations.

The following illustrates common entries to this debit/credit-balance account:

Dr 3311.2 Cumulative Results of Operations - DBOF - Deferred
Cr 3311.1 Cumulative Results of Operations - DBOF

Entry to record a deferral of a negative accumulated operating results. (This entry must be supported by a specific authorization from the next higher command.)

Dr 3311.1 Cumulative Results of Operations - DBOF
Cr 3311.2 Cumulative Results of operations - DBOF -
Deferred

Entry to record a deferral of a positive accumulated operating results. (This entry must be supported by a specific authorization from the next higher command.)

4. Account 3321, Net Results of Operations - DBOF. Account 3321, "Net Results of Operations - DBOF," is authorized for use by Defense Business Operations Fund activities. Account 3321, "Net Results of operations - DBOF," shall be used to accumulate the net difference between expenses and financing sources during a fiscal year. Account 3321 is closed to account 3311, "Cumulative Results of Operations - DBOF," at the end of each fiscal year. The following illustrates common entries to this debit/credit-balance account:

Dr 5101 Revenue From Goods Sold - DBOF
Dr 5201 Revenue From Services Provided - DBOF
Cr 3321 Net Results of Operations - DBOF

Entry to close the revenue accounts at the end of the fiscal year.

Dr 7110 Gains on Disposition of Assets
Dr 7190 (Series) Other Gains
Dr 7300 Extraordinary Items (Gains)
Cr 3321 Net Results of operations - DBOF

Entry to close the "gain" accounts (7100 series) at the end of the fiscal year.

Dr 3321 Net Results of Operations - DBOF
Cr 6500 Cost of Goods Sold

Entry to close the cost of sales account at the end of the fiscal year.

Dr 3321 Net Results of Operations - DBOF
Cr 7210 Losses on Disposition of Assets
Cr 7290 (Series) Other Losses
Cr 7300 Extraordinary Items (Losses)

Entry to close the "loss" accounts (7200 series) at the end of the fiscal year.

CHAPTER 61

PROGRESS BILLINGS, REIMBURSEMENTS, AND REVENUE RECOGNITION

A. REIMBURSEMENTS

1. General Information. General information relating to topics discussed in this chapter may be found in Chapter 17, Revenue, Expenses, Gains, and Losses," and Chapter 19. "Revenues," of Volume 4 of this regulation.

2. Reimbursement Principles. As a general principle, each activity operating under the Defense Business operations Fund shall be reimbursed for the costs of all goods and services ordered and produced as a result of those orders. Defense Business Operations Fund billings and reimbursements from ordering activities for services or goods provided shall be accomplished in the most efficient and expeditious manner available to reduce or eliminate the need for additional Defense Business Operations Fund working capital. The nature of the Defense Business Operations Fund requires ordering agencies to budget, control, and account for the cost of all goods and services ordered. As a result, a Defense Business Operations Fund activity:

a. Shall bill ordering activities for all costs incurred as a result of an accepted order.

b. Shall bill order cancellation or reduction costs. When a job order is canceled or reduced in scope after a DBOF activity has commenced work or incurred costs on the order, the costs incurred, plus the applied overhead (that is, indirect and other normally allocated overhead (G&A) costs) plus costs associated with the cancellation or reduction shall be charged to the customer. Examples of directly associated cancellation or reduction costs to be charged to customers are advance planning costs, non creditable direct material, special test equipment, necessary preservation and/or shipment effort, and any additional effort necessitated by the cancellation and/or reduction; for example, salvaging of material. In addition, costs charged to customers should include the costs of salaries payable to employees hired specifically to work on the canceled order until the employees are, or could have been, separated through a reduction in force or other appropriate action (taking into account appropriate administrative lead time), or reassigned to other direct jobs. Costs which are indirectly associated with cancellation or reduction actions shall not be charged to the customer. Although normally allocated G&A costs shall be charged to cancelled or reduced customer orders, underapplied overhead costs that may result in the DBOF activity as a whole from a reduced workload base shall not be charged to the customer canceling or reducing their order but shall be recorded against the net operating results of the performing DBOF activity.

c. Shall not enter into any arrangement to "offset" services received and services furnished.

3. Reimbursement for Contingency Operations and Humanitarian Efforts. All DBOF business areas, including transportation services provided by the United States Transportation Command (USTRANSCOM), operate on a reimbursement basis with users paying for goods and services provided. Payment for contin-

gency operations, including deployment or other emergency response for military or humanitarian assistance is no exception: The users ordering the DBOF service must pay the bill, and no orders are to be accepted without funding. The Military Department Headquarters is responsible for determining which level within the Military Department will pay (that is, the unit, major command, or Military Department level). This process also applies when a Unified Combatant Command tasks a Service-funded unit to perform a mission (such as transportation of military personnel or a quipment by the USTRANSCOM). The Military Department that controls the equipment or personnel is responsible for payment of costs incurred to accomplish the mission. The sole exception to this policy occurs when the USTRANSCOM receives an order from the Joint Chiefs of Staff requiring transportation of non U.S. owned equipment and/or non U.S. personnel such as unreimbursed efforts in support of the United Nations. In those instances, the Army will pay Military Traffic Management Command (MTMC) costs, the Navy will pay Military Sealift Command (MSC) costs, and the Air Force will pay Air Mobility Command (AMC) costs. Bills maybe centralized for more convenient processing if appropriate; however, billings shall be forwarded to the appropriate Military Department within 30 days from commencement of the contingency operation or humanitarian effort. Payment of these bills, including transportation bills, by the Military Departments must be made in a timely manner. This guidance does not address any contingency operations designated by the Secretary of Defense as a "National Contingency Operation" under the provision of United States Code title 10, Section 127. Special rules apply for such an operation and those rules should be promulgated separately in conjunction with any designation by the Secretary of Defense under the provisions of that section.

4. Reimbursement Bases. Billings to the Department of Defense and other Federal Government customers shall be developed on the basis of either stabilized unit prices (also termed standard prices), or stabilized rates. All other ordering activities; that is, private parties and concerns including those not officially representing the Federal Government; state and local governments; and foreign military sales shall reimburse the Defense Business Operations Fund activity for the full costs incurred by the Federal Government. Full costs are determined by application of the stabilized rates or unit prices as those stabilized rates and prices are set to achieve an accumulated operating result of \$-0- in the budget year. Defense Business Operations Fund rates and unit prices, once established in the budget process, shall be held stable for the applicable fiscal year, unless changes are specifically approved by the Under Secretary of Defense (Comptroller). Stabilized rates and unit prices shall be established to recover operating expenses estimated to be incurred for the applicable fiscal year and to provide sufficient working capital for the acquisition of fixed assets as approved by the Under Secretary of Defense (Comptroller). (That is, stabilized rates and unit prices shall be established at levels intended to provide for estimated revenues to equal estimated costs plus approved surcharges for the applicable fiscal year for which the rates and unit prices are established.) Stabilized rates and unit prices must be billed to the customer for the work performed. Gains or losses resulting from under or over applied stabilized rates and/or prices shall be carried forward for inclusion in subsequent year stabilized rates and/or prices.

5. Advance Payment Billings. Orders from the Public, including State and local governments, must be accompanied by an advance. In addition, on an exception basis, advances may be requested if directed by the Under Secretary of Defense (Comptroller) or other authorizing official, on orders from DoD and other Federal Government accounts. Revenue billings to customers shall reflect due credit for the advances received.

6. Progress Payment Billings. As a rule, reimbursement for the costs incurred in producing goods and services ordered by customers shall be made on a progress payment basis. Exceptions to the rule include orders that are expected to cost \$25,000 or less or are expected to be completed within 60 days of acceptance. It is important to note the differences among advance payment, progress payment, and revenue billings. Advance payment billings are those made prior to the start of work and incurrence of costs associated with the ordered good or service. Progress billings are those made prior to, or during the start of work but always after the incurrence of costs associated with the ordered good or service. Revenue billings are those made after the start of work but only to the extent that evidence establishes that revenue has been earned. In no case shall an advance payment, progress payment, or revenue billing be processed that would result in the total billed amount exceeding the amount of the order. Billings and collections for progress payments shall be accomplished at least monthly including applicable labor, material, overhead, and surcharges as well as the value of material in inventory that is identified and held in reserve for specific orders, and amounts of work in progress in contractors' plants and other Government plants that are identified to specific orders. The billings should be made as late as possible in the month so that they shall include the above items to the maximum extent possible and still permit the orderly processing of the collection in the same month. Every effort should be made to reduce the billing and collection lag so that a greater portion of the costs shall be recovered in the same month they are incurred.

7. Revenue Recognition Policy

a. General. Revenue and associated costs must be recognized in the same accounting period. Revenue must be recognized in the same manner (that is, a standard policy for recognizing and reporting revenue must apply) for all activities within a DBOF business area. The amount of revenue recognized cannot exceed the amount specified in the order.

b. Depot Maintenance Business Area Activities. Activities in the Depot Maintenance business areas (includes: Army Ordnance and Other Maintenance Facilities; Navy Shipyards, Aviation Depots, and Ordnance Facilities; Marine Corps Other Maintenance Facilities; and Air Force Aviation Depots) shall recognize revenue using the following policies:

(1) Completed Order Method. The completed order method shall be used for all orders that have an estimated value of less than \$1,000,000, or a planned production cycle of less than 12 months. Under this method, both the revenue earned and the associated costs incurred in completing an order will be recognized when the order is completed. A work-in-process account shall be used to capture and hold costs prior to their recognition as a cost of goods sold.

(2) Percentage of Completion Method. The percentage of completion method shall be used for all orders that have an estimated value of \$1,000,000 or more, and a planned production cycle of 12 months or more. Under this method, the revenue earned on an order will be recognized monthly based on the ratio that the costs incurred to date on that order bear to the total costs estimated to be incurred on the order when it is completed.

c. Transportation Business Area Activities. Activities in the Transportation business area shall recognize revenue based upon receipt of a cargo manifest or the commencement of travel.

d. Supply Management Business Area Activities. Activities in the Supply Management business area shall recognize revenue, and related costs, when an item is dropped from inventory for sale or other revenue generating disposition.

e. Commissary Resale Business Area Activities. Activities in the Commissary Resale business area shall recognize revenue, and related costs, at the point/time of sale, or when an item is otherwise disposed.

f. Distribution Depots Business Area Activities. Activities in the Distribution Depots business area shall recognize revenue, and related costs, based on one of the following events:

<u>Event</u>	<u>Revenue Recognized Upon</u>
Receipt of Items	Receipt of an Item
Issuance of Items	Issuance of an Item
Other Services	Rendering of Service

In the event that a service is rendered, revenue shall be considered earned, and recognized, and associated costs shall be reported, at the time that the service is rendered/performed, but not less frequently than monthly.

g. Navy Research and Development Business Area Activities. Activities in the Navy Research and Development business area shall use the following revenue recognition policy:

(1) For end-item production orders:

(a) Completed Order Method for all orders that have an estimated value of less than \$1,000,000, or a planned production cycle of less than 12 months. Under this method, both the revenue earned and the associated costs incurred in completing an order will be recognized when the order is completed. A work-in-process account shall be used to capture and hold such costs prior to their recognition as a cost of goods sold.

(b) Percentage of Completion Method for all orders that have an estimated value of \$1,000,000 or more, and a planned production cycle of 12 months or more. Under this method, the revenue earned on an order will be recognized monthly based on the ratio that the costs incurred to date on that order bear to the total costs estimated to be incurred on the order.

(2) For Service orders (all orders other than those for end-item production orders):

(a) Service-type revenue recognition method shall be used for all service orders (orders other than those involving the production of end-items). Under this method, revenue shall be considered earned, and recognized, and the associated costs reported, at the time that the service is rendered/performed, but no less frequently than monthly. Thus, service type orders shall be considered as rendered/completed, and revenue and costs recognized, at least monthly.

h. Other Business Area Activities. Activities in all other business areas (includes Financial Operations, Base Support, Information Services, Industrial Plant Equipment Reutilization & Marketing Technical Information, Logistics Support Activities and Printing & Publications) not discussed in paragraphs A.6.b. through A.6.g. above shall use the service-type revenue recognition policy. Under this method, revenue shall be considered earned, and recognized, and the associated costs reported, at the time that the service is rendered/performed, but not less frequently than monthly. Thus, service type orders shall be considered as rendered/completed, and revenue and costs recognized, at least monthly.

8. Revenue Billings. The customer funding an order shall be billed for the revenue recognized, or when advance payments or progress payments have been previously billed, those advance or progress payments shall be relieved to the appropriate revenue account. Revenue to be recognized under the percentage of completion method should not be measured by progress billings as progress billings are intended to reimburse costs incurred and, as such, are not intended to measure the order's percentage of completion. In no case shall the total amount of revenue recognized and billed exceed the amount of the order.

9. Types of Orders. There are two general classifications of orders -- Service type and End-Item type.

a. Service Type Orders. The following are description of applicable projects and work that should be classified as service type orders:

(1) Research and Development. Includes the conduct and support of research and development, including basic research, theoretical studies, scientific experiments, applied research, feasibility studies, systems engineering, design studies, weapon systems analysis and operations research, developmental engineering (including developmental engineering in connection with procurement, production and modification) and fabrication of experimental models and prototypes. Does not include production of items for service testing or engineer-user testing. These latter examples are end-product type orders.

(2) Transportation Services. Includes traffic management and transportation (air, land, and sea) services. Also include operation of ports, port facilities and related sub-installations, including holding and reconsignment points engaged in cargo and passenger transshipment activities. Also includes the operation of docks, piers, terminals or similar facilities, and wharfage, ferrying, lighterage and stevedoring.

(3) Communication and Information Services. Includes communication services and data processing services (other than financial services and technical information) rendered.

(4) Financial Operations. Includes provision of finance and accounting procedures, systems and operations by the Defense Finance and Accounting Service.

(5) Technical Information. Includes central collection and dissemination for DoD technology base information. Includes provision of access to, and transfer of, scientific and technical information. Also includes provision of computer, modeling, data services, and response to requests for solutions to technological problems of the Military Departments.

(6) Printing Services. Includes revenues of activities whose primary mission is printing and reproduction services as well as printing performed by other activities for tenants, satellites or other off-post activities.

(7) Distribution Depots. Includes management and procurement of designated national stock numbers for all DoD customers.

(8) Supply Operations. Includes receipt, reclamation, storage, and issue of consumables and reparable items.

(9) Contract Management. Includes expediting the products and services delivered by industry, assuring that the specifications of the contract are met and paying contractor invoices for these items. Also includes surveillance of contractor operations to assure compliance with contractual requirements and determining the effectiveness of contractor quality control systems and inspection procedures, and officially accepting materiel on behalf of the Government after certifying its conformance to contract provisions. Also includes provision of on-site assistance to program managers, such as representation and participation in meetings and informal Program/contract reviews.

(10) Base Support. Includes facilities maintenance, family housing services, other housekeeping services, and administrative functions, provided to tenants and others. Also includes provision of utility services (steam, electricity, water, sewage disposal, and gas).

(11) Engineering Services. Includes provision of technical and engineering assistance in matters relating to various weapon systems and industrial plant equipment and associate system when they do not relate to research and development projects. Also includes repair service and quality evaluation; that is, inspecting, calibrating, testing, evaluating, trimming and re-engineering of items.

(12) Support of Reserve (Under and Unutilized) Capacity. Includes maintenance of unutilized capacity and support of underutilized capacity.

(13) Commissary Services. Includes operation of Defense commissaries. Also includes provision of troop issue subsistence and programming of the replacement of War Reserve Material rotation rations.

(14) Reutilization and Marketing Service. Includes the reuse of excess and surplus property within the government and other authorized agencies, donation to local governments, and the sale of the remaining property to the public on a competitive basis.

(15) Other Services. Includes services not otherwise classified.

b. End-Product Type Orders. The following are description of applicable projects and work that should be classified as end-product type orders:

(1) Overhaul and Repair. Overhaul or a complete rebuilding of parts, assemblies, subassemblies, and end items.

(2) Manufacture and Assembly. Includes furnishing customers with new end-items and components, manufacture of prototypes or items furnished to the customer for test.

(3) Ordnance. Includes the receipt, segregation, DeMilitarization, storage, assembly/disassembly, test, maintenance, and issue or shipment of ammunition, ordnance, and weapons.

(4) Construction and Conversion. Includes construction and conversion of property and equipment.

(5) Alteration and Modification. Includes alteration and modification of property and equipment.

(6) Other Products. Includes products not otherwise classified such as the production of research and development items for service testing or engineer-user testing.

B. ACCOUNTING ENTRIES

1. General. Accounting entries which may help to illustrate and further explain the preceding concepts follow. The accounting entries illustrate the general entries required when the reimbursable program is automatically apportioned. Essentially the same entries are required when the reimbursable program is specifically apportioned., but using accounts designated for that purpose.

2. Acceptance of Customer Order

a. Without Advance Payment

Dr 4581 Automatic Reimbursement Program
Dr 4231 Unfilled Customer Orders - Without Advance -
Automatic Apportionment
Cr 4221 Customer Orders Accepted - Automatic Apportionment
Cr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period

Entry to record acceptance of a customer order not accompanied by an advance payment.

b. With Advance Payment

Dr 4581 Automatic Reimbursement Program
Dr 4233 Unfilled Customer Orders - With Advance -
Automatic Apportionment
Cr 4221 Customer Orders Accepted - Automatic Apportionment
Cr 4614 Uncommitted/Unobligated Allotments - Reimbursable
Program - Current Period

Dr 1011.1 Funds Collected - Operating - DBOF
Cr 2312 Unearned Revenue - Advances from the Public

Entry to record acceptance of a customer order accompanied by an advance payment.

3. Progress Billing to Customers

Dr 4251 Reimbursements Earned - Uncollected -
Automatic Apportionment
Cr 4231 Unfilled Customer Orders - Automatic Apportionment

Dr 1311 Accounts Receivable - Government - Current
Cr 2994 Progress Billings to Others

Progress billing to a customer prior to completion of the customer order.

Dr 4253 Reimbursements Earned - Collected - Automatic
Apportionment
Cr 4251 Reimbursements Earned - Uncollected -
Automatic Apportionment

Dr 1011 Funds Collected
Cr 1311 Accounts Receivable - Government - Current

Progress billing collected from a customer.

4. Revenue Recognition - Percentage of Completion

Dr 4251 Reimbursements Earned - Uncollected - Automatic
Apportionment
Cr 4231 Unfilled Customer Orders - Automatic Apportionment

Dr 6500 Cost of Goods Sold
Dr 1311 Accounts Receivable - Government - Current
Dr 2994 Progress Billings to Others (See NOTE 1//)
Dr 2312 Unearned Revenue - Advances from the Public
(See NOTE 2//)
Cr 1581 Work In Process - In-House
Cr 1582 Work in Process - Contractor
Cr 5100 and/or 5200 Revenue

Entry to recognize revenue prior to completion of work on customer order.

NOTE 1//: Revenue to be recognized under the percentage of completion method should not be measured by progress billings. However, the amount, if any, of previous progress billings shall be reduced by the amount of revenue recognized. There may be a balance remaining in account 2994, "Progress Billings to Others," as the progress billing may include all or a portion of items such as material and subcontract costs. The remaining amount, to the extent that it does not exceed the amount of the reimbursable order, shall be recognized as applicable in subsequent revenue billings.

NOTE 2//: Advances received from Federal Government customers prior to cost incurrence or work completion are recorded in account 2311, "Unearned Revenue - Advances from Government Agencies and Funds." Advances received from non Federal Government customers, including State and local governments, prior to cost incurrence or work completion are recorded in account 2312, "Unearned Revenue - Advances from the Public." As revenue is recognized, the applicable "Unearned Revenue" account is adjusted in a corresponding amount.

5. Reimbursement Received for Work on Customer Orders

Dr 4253 Reimbursements Earned - Collected - Automatic
Apportionment
Cr 4251 Reimbursements Earned - Uncollected -
Automatic Apportionment

Dr 1011 Funds Collected
Cr 1311 Accounts Receivable - Government - Current

Entry to record reimbursement for work on customer order.
This entry is appropriate for both periodic recognitions of revenue under the percentage of completion method and for completed work.

C. REQUIREMENTS OF ORDERS FOR WORK TO BE PERFORMED

1. DoD Components (or any activity thereof) ordering work or services from a Defense Business Operations Fund financed activity shall use a project

order whenever such an order may be issued under the requirements of DoD Instruction 7220.1, "Regulations Governing the Use of Project Orders." When orders for work or services cannot qualify as project orders, they may not be so designated. Examples of orders that do not qualify as project orders are printing requests, orders for transportation of personnel and material, utility services, and other service orders -- including orders covering the cost of maintaining unutilized and underutilized plant and equipment. An order, when accepted by the performing activity, shall be obligated by the issuer of that order at that time. Any order for recurring services or for any object that may not be obligated by the ordering agency beyond the end of the current fiscal year shall be limited to the cost of performance within that fiscal year.

2. Each project order or other, order accepted by a Defense Business Operations Fund activity shall state specifically the basis of reimbursement to the Defense Business Operations Fund for the cost of work or services ordered, as between fixed price or cost reimbursement. The terms and conditions for pricing orders set forth in DoD Instruction 7220.1 shall apply to all project orders accepted by a Defense Business Operations Fund activity. Policy applicable to reimbursements from other than Federal Government accounts is contained in Part A, chapter 21, "Reimbursements," of this volume. All orders accepted by a Defense Business Operations Fund activity shall be in writing; for a purpose authorized by law; executed before cancellation of the issuing appropriation; and must call for specific goods, real property, work, or services. Orders placed with a Defense Business Operations Fund activity shall not be subject to accounting and reporting requirements similar to those applicable to allotments.

3. As a general rule, no work or service should be performed by a Defense Business Operations Fund activity except on the basis of reimbursable orders received and accepted that constitute obligations of Federal Government ordering activities or advances from non Federal Government entities. Work for customers may begin in advance of receipt and acceptance of a formal order under two circumstances. They are as follows:

a. Letter of Intent Orders. When it is desirable, in the interest of economical operations, to incur limited costs in advance of the receipt of a regular order for an authorized program for which customer funds are available, such work or services may be undertaken on the basis of a letter of intent. This letter constitutes an obligation of the ordering activity in a stated amount sufficient to cover the advance costs that may be incurred.

b. Commanding Officer's Orders. When it is necessary to begin work of an emergency nature prior to the receipt of an order, a commanding officer's order or similar order may be issued by the commander of the Defense Business Operations Fund activity subject to the following conditions:

(1) The Defense Business Operations Fund-activity must have written assurance that an order shall be issued promptly or shall have equivalent documented communication. The use of such orders should be limited to situations in which there are bona fide emergencies arising from unforeseen

urgent requirements. A commanding officer's order must not be used as a normal procedure to circumvent administrative leadtimes that should be considered in advance planning.

(2) A commanding officer's order shall expire within 30 days from the date of issuance.

(3) A commanding officer's order shall be issued on a local form and shall be approved and signed by the commanding officer or an authorized representative.

4. Each Defense Business Operations Fund activity shall record promptly all orders accepted and shall account continuously for the status of all orders in terms of deliveries, billings, and unfilled balances, so as to provide a basis for scheduling production or operations, determining backlogs of work and the need for additional orders or reduced activity, preparing operating budgets and forecasts, and informing customers promptly concerning changes in delivery schedules.

D. PRICING FOR SOFTWARE SERVICES

1. General. Central design activities (CDAs) and their customers should, through negotiation, define specific near-term tasks, identify deliverables and fix the price for each negotiated task. Full requirements may not be known early in the system design and development phases. The nature of requirements refinement could discourage use of firm fixed price agreements for software development until detailed system design specifications are approved by the functional customer. To help balance financial risk between CDAs and their customers, a range of pricing strategies are available to provide CDAs and their customers the flexibility needed to deal with variations in project size and complexity.

2. Pricing Strategies. The following pricing strategies are available for use:

a. Time and Materials. These are support agreements based on fixed rates for fully loaded billable direct labor hours, and material at cost (supported by time and cost reporting project control and accounting systems). Under this approach, CDAs base their estimates on available data. Then, they track variations to the estimates and review them to track variations to the estimates and review them to determine causes. Analysis enables estimate revisions, risk assessments, and initiation of corrective action. This type of agreement is appropriate for a development service such as application prototyping, where accurate resource predictions are not possible. Once the CM understands the target environment and associated risk areas, the pricing strategy will be either Firm Fixed Price for Increments of a Development effort or Firm Fixed Price for a Single Increment.

b. Firm Fixed Price Level of Effort. These agreements obligate a CDA to devote a specified number of support hours (fully loaded billable direct labor hours) over a stated time period for a fixed dollar amount. This type of agreement is appropriate for software maintenance support during the operations and support phase of an automated information system's (AIS) life cycle, where affordability is a major concern. This pricing strategy should not be used

during the development or production and deployment phases of an AIS's life cycle. During these phases, the preferred pricing strategy is fixed price for increments of a development effort.

c. Firm Fixed Price for Increments of a Development Effort. With "incrementally-priced" development agreements, a CDA works with the customer to define specific near-term tasks, identify deliverables, and fix the price for each agreed upon task or increment. For example, a CDA could limit the fixed price proposal for a new project or major modification to perform systems studies and develop a statement of requirements. Once the project progresses beyond this stage, the CDA continues to limit proposals to near-term (e.g., 6-month period) project deliverables. Under this approach, a CDA provides customers with estimates of total project costs for budget purposes. Depending on the level of detail used to develop the estimate, the CDA distinguishes for the customer between rough order of magnitude estimates, estimates suitable for budgeting, and detailed estimates. A CDA has the latitude to renegotiate agreements if customer requirements change. To balance financial risk for development programs, a CDA should develop means to assist customers in managing to fixed prices on increments of a project, resisting the temptation to estimate a substantial portion of the production requirement before the start of, or very early in, full-scale development.

d. Firm Fixed Price for a Single Increment. These agreements provide the customer a firm fixed price for completion of a total project, as a single increment. This type of agreement is appropriate for projects where customer requirements are well understood, easily defined, supported by precedent, and the detailed design specifications are approved by the customer. In these instances, risk to the CDA is lowest, and the customer should be able to obtain a firm fixed price for completion of even large projects at the beginning of the development effort.

E. BILLING, COLLECTION AND ACCOUNTING FOR SALES OF MATERIAL FROM SUPPLY SYSTEM STOCK

1. Scope. The automated billing system described in this chapter (commonly referred to as the "Interfund Billing System," normally encompasses all supply system sales and purchases of materiel, including perishable subsistence, bulk petroleum, oil, lubricants and into-plane aviation fuels issues.

2. Exceptions

a. The Interfund Billing System is not mandatory for Military Assistance Grant Aid sales and where only limited materiel sales occur between DoD Activities. In these cases, it may be more expedient to process billings through use of Standard Form 1080, "Voucher for Transfer Between Appropriations and/or Funds," or other approved billing documents than to utilize the Interfund Billing System.

b. The Interfund Billing System does not apply to sales made to other Federal Government Agencies, State and local governments, nonappropriated fund activities, individuals and commercial firms. Such issues will be billed and collected by "check issue" procedures.

c. The provisions of this section do not cover sales of major end items such as complete aircraft, ships, tanks, space vehicles and missiles, certain General Services Administration (GSA) stock fund sales and orders handled by Military Interdepartmental Purchase Requests (MIPRs) except for certain MIPRs issued to GSA as outlined in paragraph D.14. below.

3. Policy. Operating procedures, including the standard mechanized instructions and formats, to bill, collect and account for sale of materiel from supply system stock are contained in DoD Manual 4000.25-7M, "Military Standard Billing System (MILSBILLS)."

4. Billing, Collection and Accounting Policies for DoD Sales

a. Reimbursable sales will be billed based upon the drop from inventory date pursuant to requisition edit (to determine supply availability) by a supply activity, except that billings for sales of:

(1) Perishable subsistence, foreign military sales, and Military Assistance Grant Aid shipments will be based on constructive delivery.

(2) Bulk petroleum, oil, and lubricants (POL) will be based on receipt documentation provided that the documentation is received by the billing office within 15 days of the date of delivery. Otherwise, billing will be based on the quantity discharged from tankers or the quantity issued from inventory for delivery by other modes of shipment.

b. The accounting and finance officer servicing the supplying activity will effect automatic collection for sales of Supply Management Business Area materiel, including loss allowances and returns, and appropriation financed materiel from funds of the ordering activity. In all instances, Supply Management Business Area sales shall be billed separately from sales of appropriation financed materiel.

5. Principles of the Interfund Billing System

a. The billing office will credit the appropriation or fund of the selling activity that owns the materiel and/or finances the accessorial charges and charge the appropriations/funds of the purchasing activity.

b. The billed offices will record the disbursements for charges billed in the month in which the bills are received. Billed offices must match line items billed to line items ordered by requisition number. When the charge is determined to be invalid by the billed office, it will be entered in a suspense account as stated in paragraph D.10. below. Billed offices will exert every effort to charge the correct account initially so that transactions entered in the suspense accounts will be held to a minimum.

c. Billing offices will report the amounts collected (credits) and amounts of charges made to the ordering activities' appropriations/funds as evidenced in the summary billing cards to their central accounts offices, as listed in Chapter 2 of DoD Manual 4000.25-7M, "Military Standard Billing System (MILSBILLS)." The central accounts offices serving the selling activities will report the charges by appropriation/fund to the central accounts offices serving the purchasing activities. The central accounts offices serving the

purchasing activities shall use those reports of charges by appropriations/funds to monitor field activities to ensure that all charges have been recorded as disbursements or otherwise properly accounted for.

d. Interfund Billing System transactions will be reported separately from the regular accounts of the accounting and finance offices (see paragraph D.12.b.).

6. Preparation of Bills. Bills will be prepared at least monthly and may be prepared more frequently when the amounts involved are significant or more frequent billing is necessary to maintain an adequate cash balance. The last monthly bill will be forwarded by the fifth workday of the following month. Collections for all interfund billings processed under these procedures will be credited to the accounts of the billing activity in the month the bills are prepared.

7. Cancellation of Confirmed Requisitions. In those instances that a customer orders a special program requirement item (items required to support special programs or projects of a non repetitive nature) and subsequently cancels the order, the customer shall be billed for, as applicable (If billing is not accomplished within 90 days after cancellation of the requisition, the customer will be advised of potential or estimated charges):

a. The ordered special program requirement, at inventory standard prices, when a procurement order was processed which will result in receipt of materiel "in-excess" of the authorized acquisition objective through the end of the budget year.

b. Contract termination costs when a procurement order was processed which can be economically cancelled.

8. Billing for Direct Deliveries of Materiel from Contractors in Lieu of Shipments from Stock. When an inventory manager is out of stock; does not carry an item; or otherwise requests direct delivery of materiel from a vendor; the sale will be recorded and billed based on (a) notification of receipt of materiel by the customer, (b) notification of shipment by the vendor, or (c) payment to the vendor, whichever occurs first. However, for bulk POL sales (b) and (c) will not apply if the notification of receipt of materiel by the customer is received by the billing office within 15 days of the date of delivery.

9. Billing Adjustments/Allowances

a. In the interest of economy, an ordering activity or consignee will only request the billing office to grant adjustments/allowances under the criteria described below. Losses or gains will be absorbed by the ordering activity:

(1) Between DoD Activities. When the value is less than \$100 per line item.

(2) Between DoD and Other Than DoD Activities. When the value is \$25 or less per line item.

b. In accordance with the above criteria, billing offices will determine whether the request should be granted or denied and advise the ordering activity (customer). Billing offices will reply to customer requests as promptly as possible, but not later than 60 days after receipt of the request for adjustment. This reply is advisory and will not be recorded in the accounting records of the billed office.

c. Customers may forward a followup request if a reply has not been received within 60 days after initial request for adjustment/allowance.

d. Billing offices will grant credit for each approved adjustment and include these in the next billing along with other charges and credits.

e. Instructions to process billing adjustment requests and responses are in Chapter 7 of DoD Manual 4000.25-7M, "Military Standard Billing System (MILSBILLS)."

10. Accounting and Reporting for Transactions in the Suspense Account F3885, "Undistributed Intragovernmental Payments"

a. Suspense account F3885 has been established by the Treasury Department to provide billed offices with an account symbol for recording charges subject to adjustment (other than shipping adjustments) or considered to be improper pending correct classification of the transaction. Amounts recorded in that account will be included in disbursements reported to the Treasury Department on "Statement of Interfund Transactions," DD Form 1400, or, in lieu thereof, on an approved automated listing.

b. Transactions which clear the suspense account by recording the charges to the correct appropriation or fund will be processed outside disbursing channels. These transactions will also be reported to the Treasury Department on "Statement of Interfund Transactions" (see paragraph D.12. below).

c. Each DoD Component will ensure that only transactions which cannot be charged against correct appropriations/funds or correctly classified are recorded in suspense account F3885 and only after unmatched transactions are reviewed and every effort is taken to properly reconcile the charge. When prices, items, or quantities billed are different from the prices, items, or quantities requisitioned, the billed office will check with the ordering activity or consignee to see if substitute items or quantities have been supplied. (The supplying activity is responsible for advising of item substitutions or changes. See paragraph D.13.c. below.)

d. Each DoD Component will establish procedures governing the submission of full and timely reports to their central accounts office of transactions entered in the suspense account. These procedures will provide for maintenance of appropriate summary controls over these transactions. Balances in these accounts will be cleared as of September 30, each year. The offsetting charges will be applied to the purchasing appropriations/funds on an estimated basis. This action will be treated as a fiscal year-end adjustment which will be reversed on October 1 of the subsequent fiscal year.

11. Maintenance of Billing Files. DoD Component billing offices will maintain history files for 3 years after the billing month for sales within the Department of Defense, General Services Administration, and to other Government Agencies, and for billings supporting Foreign Military Sales.

12. Treasury Reporting

a. The billed office will summarize the reimbursements and disbursements processed under the Interfund Billing System, including transactions processed through the suspense accounts, and furnish them to the office which prepares the Statements of Transactions and Accountability reports.

b. Central accounts offices will submit to the Office of Secretary of Defense and the Treasury Department a monthly DD Form 1400, "Statement of Interfund Transactions", or approved automated listing, for appropriation financed materiel and Supply Management Business Area materiel to reflect credits to the selling appropriation or fund and/or debits to the buying appropriation or fund.

13. Recording of Obligations by DoD Ordering Activities

a. The requisitioning activity will enter the fund code (see DoD Manual 4000.25-1-M, "Military Standard Requisitioning and Issue Procedures (MILSTRIP)" to be charged on the requisition.

b. The supplying activities will advise of item substitutions or changes in prices and quantities immediately after the requisition edit to determine supply availability provided proper "M&S" codes are stated in the requisition (DoD Manual 4000.25-1-M, "Military Standard Requisitioning and Issue Procedures (MILSTRIP)", and forward a priced copy of the shipping document with the shipment.

c. The requisitioning activity is responsible for administrative control of funds for obligations incurred. To preclude overobligation of funds, the ordering activity will review price and quantity changes and substitution notices received and notify its billing office. Where change of prices, quantities or substitutions would result in an apparent/potential overobligation status, the ordering activity should advise the supply activity billing office of requisitioned items to be canceled or adjusted to avoid an overobligation.

d. In cases where the ordering activity has not received quantity change or substitution notices insufficient time to cancel or adjust the quantity to be shipped, the ordering activity will record in its records those items or quantities for which funds are available. The balance will be recorded in the suspense account until resolved. Resolution may include disposition of materiel arranged by mutual agreement between the ordering activity and the supplying activity. Billing adjustments will be recorded as appropriate.

e. Errors in billings which result in incorrect charges to appropriations or funds causing apparent overobligations or over expenditures shall not be considered violations of the Anti-Deficiency Act. These errors will be corrected as soon as possible.

14. Billing, Collection and Accounting for GSA Sales Simplified Intra-Governmental Billings and Collection System (SIBAC)

a. Billing and collection for sales of General Services Administration (GSA) materiel from stock or direct delivery, including accessorial or administrative costs for overseas supply support to DoD Components will generally conform with policies contained in this section and supplemented by procedures in DoD Manual 4000.25-7-M, "Military Standard Billing System (MILSBILLS)." Procedures for preparation and distribution of the monthly Statement of Intra-Governmental Transaction by GSA are contained in Chapter 2; DoD Manual 4000.25-7-M. Sales of fuel (Washington, D.C. area), self-service stores, Federal specifications and consolidated purchases of automobiles refrigerators, etc., will be billed and paid in accordance with Chapter 3, DoD Manual 4000.25-7-M.

b. GSA billings are rendered only after there is evidence of actual delivery of materiel or receipt of evidence of shipment.

c. A DoD Component ordering materiel by a Military Interdepartmental Purchase Request (MIPR), may request direct citation of its funds on contracts awarded by GSA for direct delivery by the contractor. In this instance, the contractor will bill the ordering DoD activity directly. As an alternative, when the ordering activity uses MIPRs, it may establish a separate MILSTRIP billing address in accordance with DoD Manual 4000.25-1-M. If one of these alternatives is not used, MIPRs will be consolidated with interfund billings.

CHAPTER 62

EXPENSES

A. GENERAL

An expense is an outlay, or other using of an asset, or the incurring of a liability (or a combination) as a result of an entity's efforts to perform its mission. Expenses are an application of budgetary resources made available to DoD Components. Goods and services ordered and received are recorded in the budgetary accounts as accrued expenditures and in the proprietary accounts as an expense, a capital item, or an inventory item. The proprietary accounts maintain financial control over the resources provided to the Department of Defense and assure full accountability once the budget execution process has been completed. Full financial control over all material, labor, supplies, etc., is maintained until consumed (expensed), sold or transferred to another Federal Agency in accordance with statutory authority. The treatment of expense items by Defense Business Operations Fund entities is different from the treatment accorded to expenses related to appropriation funded activities. For Defense Business Operations Fund entities, all expenses, unless specifically exempted by higher management, are costs that shall be recovered through billings to customers. General information relating to expenses can be found in Chapter 18, "Expenses," of Volume 4 of this regulation.

B. MILITARY PERSONNEL EXPENSE

1. General. Prior to the establishment of the Defense Business Operations Fund, military personnel" were assigned to a DBOF activity as a "free" resource--that is, the cost of military personnel was not paid by the DBOF nor was that cost included in reimbursable billings of the activity to its customers. After establishment of the DBOF, that process was changed. Now, the cost of military personnel involves two separate processes. The first involves the payment to military personnel appropriations for the budgeted amount of military personnel for a business area--regardless of the actual number of military personnel assigned. The second involves the costing. of military personnel to jobs or cost centers for work performed at the business area activity. This does not result in duplicate transactions but does (1) ensure that military personnel appropriations are not underfunded due to variances between budget and actual numbers of military personnel assigned to DBOF activities, (2) ensure that customers are charged--through the rate structure--only for the number of military personnel budgeted to be at a DBOF activity, while (3) providing a tool to identify the actual cost of work performed. Under current policies, the cost of military personnel, at civilian equivalent rates, is:

a. Charged by the applicable military personnel appropriation to the DBOF in an amount equal to the dollar amount estimated at the time of budget formulation regardless of the number and grade of military personnel subsequently actually assigned to the DBOF activity.

b. Reimbursed to the applicable military personnel appropriation by the DBOF in an amount equal to the dollar amount estimated at the time of budget formulation regardless of the number and grade of military personnel subsequently actually assigned to the DBOF activity.

c. Included by the performing DBOF activity in its stabilized billing rates to DBOF customers. The stabilized billing rate shall be developed based on the military personnel dollar amount estimated at the time of budget formulation regardless of the number and grade of military personnel subsequently actually assigned to the DBOF activity.

d. Included by the performing DBOF activity in its operating costs. DBOF activities shall disclose, on the Statement of Operations, an adjustment to net operating results to result in a \$-0- variance between the amount paid to the applicable military personnel appropriation and the amount costed to customer orders. The adjustment makes readily visible the value of military personnel services received for which payment was not made or, conversely, the value of military personnel for which payment was made but services not received.

2. Civilian Equivalency Rate. The civilian equivalency rate of military personnel shall be included in the stabilized rate billed to all DBOF activity customers. Military personnel may be assigned to Fund activities for mobilization purposes, sea/shore rotation flexibility, or for career progression. In addition, military personnel are subject to duties and responsibilities as a result of their military position that do not apply to civilian employees and that may not be of direct benefit to the DBOF activity. These activities include short-term military training, guard duty, inspections, and other military related activities. To adjust for these differences, the military personnel appropriations are reimbursed at the civilian equivalency rate, and the balance of required funding is included as a direct appropriation to the affected Military Personnel appropriation. The civilian equivalency rate policy recognizes that if the military requirements did not exist, some positions now staffed by military personnel could be staffed with civilians at a lower cost to the business area.

3. Reimbursement to the Military Personnel Appropriations. DBOF activities shall, for payment of military personnel costs to military personnel appropriation accounts:

a. Provide Obligational Authority. Obligational authority shall be provided to the applicable military personnel appropriations equal to the total dollar amount for the number and grade of military personnel included in the approved budget of the DBOF activity. (As the budgeted amount is based on the civilian equivalency rate and the civilian equivalency rate for military personnel is less than the military composite pay rate, the military personnel appropriations is responsible for including any difference in its appropriation requests.) Obligational authority shall be provided to the applicable military personnel appropriation through issuance, by the DBOF, of a reimbursable order or other appropriate document as requested by the military personnel appropriation manager. The document providing the obligatory authority shall cite the applicable DBOF treasury account symbol (97X4930.xx). The provision of obligatory authority to the military personnel appropriation(s) shall result in the obligation of the applicable DBOF Treasury account in that same amount. The

obligational authority provided to the military personnel appropriations may, in accordance with an agreement between the military personnel appropriation manager and the DBOF activity manager, be provided either:

(1) At the beginning of each quarter of the execution fiscal year in an amount equal to one-fourth of the annual total budgeted dollar amount priced at civilian equivalent rates for the military workyears included in the approved budget of the DBOF activity, or

(2) At the beginning of the execution fiscal year in an amount equal to the full annual total budgeted dollar amount priced at civilian equivalent rates for the military workyears included in the approved budget of the DBOF activity.

b. Accounting entries for the recordation of the quarterly/annual obligation for military personnel are shown below.

Dr 4614 Uncommitted/Unobligated Allotments -
Reimbursable Program - Current Period
Cr 4821 Undelivered Orders - Without Advance
-Reimbursable Program

Entry to record obligation of the DBOF for the budgeted cost (at the civilian equivalency rate) for the budgeted dollar amount of military workyears. The obligation is to provide obligational authority to the applicable military personnel appropriation for subsequent payment of military personnel by the military personnel appropriations.

c. Payment to the military personnel appropriations for the budgeted cost of assigned military personnel. Payment shall be made by the DBOF to the applicable military personnel appropriation in the last month of each fiscal year quarter as reimbursement for military personnel. The quarterly payments shall equal, in total, the full amount of the obligational authority provided to the military personnel appropriations. The final quarterly deposit must be made on or before the last day (September 30) of the fiscal year. In the event of an unresolved dispute between the military personnel appropriation manager and a DBOF activity on the amount of the deposit, the additional amount requested by the military personnel appropriation manager shall be immediately provided. Upon resolution of the dispute, the DBOF activity shall be provided a refund, if any is due, of the applicable amount. Accounting entries for the recordation of the periodic deposit are shown below.

Dr 4821 Undelivered Orders - Without Advance
- Reimbursable Program
Cr 4940 Accrued Expenditures - Paid - Reimbursable Program

Dr 1452 Prepaid Expenses-Military Personnel-DBOF
Cr 1012.1 Funds Disbursed - Operating Program

Entry to record payment of military payroll expense.
(Payment shall be made to the applicable military personnel appropriation.)

4. Military Personnel Costing Process

a. Military Personnel Cost Classification. Military personnel may be classified as either direct, indirect, or general and administrative (G&A) depending upon the organizational placement of a military member within a function and the work performed by that member.

b. Inclusion of Military Personnel Costs in Stabilized Billings to DBOF customers. Stabilized rate billings shall, in addition to other operating and capital program factors, include a factor sufficient to reimburse the DBOF for military personnel costs at the budgeted civilian equivalency amount.

c. Inclusion of Military Personnel Costs in DBOF Costs of Operations. The cost, to the DBOF, of military personnel is the amount paid by the DBOF for the services of those personnel. The amount paid by the DBOF is fixed at the time of budget formulation. However, during budget execution the actual number, grade, or both of military personnel may differ from the estimated amount included within the budget. The actual amount of military personnel services, in terms of number and grade, shall be applied to work performed and, since it is based on actuals rather than estimates, is likely to result in a variance between the amount applied by the DBOF to customer work and the amount paid by it to military personnel appropriations. DBOF activities shall disclose, on the Statement of Operations, an adjustment to net operating results to result in a \$-0- variance between the amount applied to work performed and the amount paid to the applicable military personnel appropriation. The adjustment makes readily visible the value of military personnel services received for which payment was not made or, conversely, the value of military personnel for which payment was made but services not received.

(1) Recognizing Military Personnel as a Job Cost. DBOF activities shall account for the actual amount of military personnel costs at the civilian equivalency rate for the number and grade of military personnel assigned to the DBOF activity. DBOF activities shall accumulate and allocate to customer orders, through a labor distribution system, the actual military personnel costs at the civilian equivalency rate. There are 2080 total hours available during a fiscal year for military personnel. A portion of those 2080 hours generally are not available due to leave or other absences. A cost allocation system should provide for such contingencies. Accounting entries for the recordation of military personnel costs are shown below.

Dr 6131 Purchased Services-Military Personnel Costs
Cr 1452 Prepaid Expenses-Military Personnel-DBOF

Entry to record accrual of military employee cost incurred during the period.

(2) Adjustment of Military Personnel Cost. The applicable military personnel appropriations are paid an amount exactly equal to the total dollar amount for military personnel included in the approved budget of DBOF activities. The amount paid is recorded as an increase (debit) to account 1452, "Prepaid Expenses-Military Personnel-DBOF," and a decrease (credit) to "Funds Disbursed" (see paragraph 3.c. above). The actual amount of military personnel cost applied to work performed is recorded as an increase (debit) to account 6131, "Purchased Services - Military Personnel Costs," based on the

civilian equivalency rates for the actual number and grade of military personnel assigned and a decrease (credit) to account 1452. As a result, a variance may result between the amount paid to military personnel appropriations and the amount applied to work performed. That variance will result in a debit or credit amount in account 1452 at the end of the fiscal year. The variance in account 1452 could be the result of several factors, for example, differences in the numbers of actual versus budgeted military personnel; differences in the grade/rank of actual versus budgeted military personnel; or differences in the hours of actual versus budgeted workload. The dollar amount of variance between the amount paid to the military personnel appropriations and the amount recorded as a cost of DBOF operations is required to be shown as an adjustment to Net Operating Results on the DBOF Statement of Operations for rate development use. The amount of the adjustment is the amount necessary to result in a \$-0- balance in Account 1452 at the end of each fiscal year. The purpose of the adjustment is to assure that future stabilized rates do not include those variances. If, for example, the amount of military personnel costs applied to work performed exceed the amount paid to military personnel appropriations inclusion of that variance in stabilized rate development would unnecessarily increase DBOF customer rates. Therefore:

(a) If Military Personnel Costs Applied to Work Performed is Greater than the Amount Paid to Military Personnel Appropriations. Account 1452, "Prepaid Expenses - Military Personnel - DBOF," as it relates to military personnel payments, will contain a credit balance if the amount of military personnel costs applied to work performed is more than the amount paid or payable to military personnel appropriations. In those instances, the following adjusting accounting entry is required at fiscal year end only:

Dr 1452 Prepaid Expenses-Military Personnel - DBOF
Cr 3311.1 Cumulative Results of Operations - DBOF

Entry to transfer the variance amount between actual versus budgeted military personnel cost when the actual amount is greater than the budgeted amount.

(b) If Military Personnel Costs Applied to Work Performed is Less than the Amount Paid to Military Personnel Appropriations. Account 1452, "Prepaid Expenses - Military Personnel - DBOF," as it relates to military personnel payments, will contain a debit balance if the amount recorded as military personnel expense is less than the amount paid or payable to military personnel appropriations. In those instances, the following adjusting accounting entry is required at fiscal year end only:

Dr 3311.1 Cumulative Results of Operations - DBOF
Cr 1452 Prepaid Expenses-Military Personnel-DBOF

Entry to transfer the variance amount between actual versus budgeted military personnel cost when the actual amount is less than the budgeted amount.

(3) Reporting on Statement of Operations. The fiscal year end Statement of Operations as of September 30 shall show the Net Operating Results of the DBOF which includes all revenues, costs, gains, and losses. However, military personnel applied costs that vary from budgeted military personnel

costs are excluded from stabilized rate development. Therefore, the Statement of Operations shall show an adjustment of Net Operating Results to arrive at the amount that is to be used for stabilized rate development. The adjustment shall be equal to the adjustment amount recorded to Account 3311.1, "Cumulative Results of Operations-DSOP" [see subparagraphs 4.c.(2)(a) and (b) above]. When the military personnel expense is more than the amount paid to military personnel appropriations, the adjustment shall be shown as a positive amount. When the military personnel expense is less than the amount paid to military personnel appropriations, the adjustment shall be shown as a negative amount. The adjustment shall be shown on Part V of the DBOF Statement of Operations (AR 1307) as follows:

Net Operating Results
(+/-)Difference Military Personnel Reimbursement/Applied Costs
= Recoverable Operating Results

C. DEPRECIATION EXPENSE

1. Capitalization Criteria. The investment capitalization criteria for unit cost operations. shall be aligned with the expense/investment funding threshold (currently \$50,000) used by the Congress for appropriating DoD operating (expense) and Procurement (investment) appropriations. Activities shall allocate to work performed the depreciation expense of assets, including computer software, for those assets that have a purchase cost or, when applicable, an estimated fair market value equal to, or in excess of, the expense/investment funding threshold; and have an estimated useful life of 2 years or more.

2. Depreciation Expense versus Capital Surcharge. The purpose of asset depreciation is to record a decrease in value of property through wear, deterioration, or obsolescence. Depreciation is therefore the recognition of an expense in the current period for an outlay that occurred in a previous period. Thus, depreciation expense recovery (through inclusion in stabilized rates or prices) results in a cash accumulation that can be used to acquire assets to replace those that are wearing out. Recovery of depreciation expense is the primary financing source for the DBOF Capital Investment Program. However, it is possible that at times depreciation expense recovery may not, by itself, be sufficient to finance the desired Capital Investment Program. In those instances and if approved by the Office of the Under Secretary of Defense (Comptroller), an additional element may be added to the stabilized rates and prices to finance the incremental difference. That additional element, is termed a "Capital Surcharge." It is important to note that "Capital Surcharge" is not an expense and is not displayed as such on the Statement of Operations. A "Capital Surcharge" is one of many elements that may be used in computation of the stabilized billing rate or price. The stabilized billing rate or price, when billed, is recorded as revenue. Since there is no counteracting expense for a capital surcharge, it should result in a positive Net Operating Result. To avoid the return of the capital surcharge through lower future stabilized rates/prices, Part V of the DBOF Statement of Operations (AR 1307) has been designed to disclose capital surcharges to result in "Recoverable Operating Results." As a simplified illustration, assume that a stabilized rate consisted of only two elements -- (1) depreciation expense recovery of \$8 per hour and (2) capital surcharge of \$2 per hour. 1000 hours

were billed. Actual depreciation expense was \$8000. [Note: Actual depreciation expense will seldom, if ever, be exactly equal to depreciation expense recovery and its recovery is based on an estimate.] A simplified Statement of Operations would then show:

Revenue	\$10,000
Expenses	
Depreciation	<u>\$ 8,000</u>
Net Operating Results	\$ 2,000
(-) Capital Asset Surcharge	<u>\$ 2,000</u>
Recoverable Operating Results	<u>\$ -0-</u>

3. Residual Value of Depreciable Assets. Residual value is the estimated salvage value of an asset at the end of its useful life. A capital asset in use shall not be depreciated below this value. The residual value of DoD capital assets is deemed to be 10 percent of the initial capitalized amount of the fixed asset unless the entity controlling the asset can determine that a different (greater or less) residual value is more appropriate. The residual value, regardless of the amount, shall be used in the depreciation calculation. Once established, the estimated residual value should not increase over the life of the asset, even if the fair market value of the asset becomes greater than its original acquisition cost.

4. Calculation of Depreciation Expense

a. Depreciation shall be calculated and accumulated using the straight-line method based on the original acquisition cost or reasonable estimate thereof less residual value. That is, the capitalization amount less estimated residual value shall be divided equally among accounting periods during the useful life of an asset. As stated in Chapter 58, paragraph D.7.g., Fund activities may request an alternative methodology for computing depreciation expense. Requests for an alternative methodology for computing depreciation expenses should be submitted for a determination of approval, through the appropriate DoD Component channels, to the OUSD(C/FM), Directorate for Accounting Policy. Acquisition cost shall include the purchase price plus transportation, design, installation, and other costs necessary to put the asset in the place and in the form in which it will be used.

b. Depreciation shall commence in the month following (a) the date of receipt shown on the asset receiving document or (b) the date the asset is installed and ready for use (regardless of whether it is actually used). Depreciation shall be recorded in equal amounts each month thereafter until the asset is fully depreciated, disposed of, or otherwise transferred. If an asset remains in use longer than its estimated useful life, it shall be retained on the accounting record, at its residual value (which can be \$-0-) until its final disposition.

c. If multiple cost centers use the same computer system, building or equipment, the depreciation or amortization shall be prorated based upon levels of usage or benefit received for each cost center. If, under unusual conditions, a computer system, building, facility, or equipment does not have a use identifiable to a direct or indirect cost center, the depreciation cost shall be charged to a general and administrative (G&A) expense account.

d. Assets that have been removed from use, regardless of the period and for whatever reason, shall continue to be depreciated during that period.

e. Land is not subject to depreciation. However, when land and building(s) are purchased together, the depreciable base is total cost less the cost of the land and the residual value of the building(s).

5. Cost Classification. Depreciation expense is classified as either indirect or general and administrative (G&A) depending upon the organizational location of the asset and the use to which it is put. However, it may be charged as a direct expense only if depreciation costs of all like assets used for similar purposes are charged in the same manner.

6. Depreciable Assets and Useful Life. Depreciable assets shall be recorded in one of the following specified asset categories and shall be assigned a useful life not to exceed that specified below for the applicable category. As stated in Chapter 58, paragraph D.7.g., Fund activities may request an alternative estimate of useful life. Requests for an alternative depreciation schedule should be submitted for a determination of approval, through the appropriate DoD Component channels, to the OUSD(C/FM), Directorate for Accounting Policy. If an asset remains in use longer than its estimated useful life, it shall be retained on the accounting record, at its residual value until its final disposition.

Asset
Category

Useful Life

Buildings

20 Years

Includes structures to house or shelter facilities, equipment, or to provide working space for an installation's operations. The depreciation period shall not exceed the expected useful life of the asset. (Note: Historical buildings, statues, etc. are not depreciated.)

Structures and Facilities

20 Years

Includes special purpose assets such as automated warehouse retrieval systems, fixed cranes, etc. Structures and facilities may be housed in a building or may be independent. If housed in a building, they shall be accounted for separately from the building even though they may not be operated independently from the building. However, they may not be depreciated over a period exceeding the useful life of the building in which they are housed.

Leasehold Improvements

20 Years

Includes changes or modifications to a leased building, structure, or facility in a way that substantially extends its useful life, increases its potential rate of output, increases its operating efficiency, or decreases its operating cost. These factors are distinguished from repairs or maintenance, which tend to keep an asset in or near its original efficiency without materially adding to its life, productivity, or efficiency. The depreciation period shall not exceed the lesser of expected useful life of the asset or the lease period.

Assets Under Capital Lease

See Applicable
Asset
Category

A capital lease substantially transfers all the benefits and risks inherent in the ownership of property to the lessee, who accounts for the lease as an acquisition of an asset and the incurrence of a liability. Assets under a capital lease should be depreciated using the same guidelines applied to other capital investments.

Equipment (Non Combat)

Industrial Plant Equipment	10 Years
Office furnishings and Equipment	10 Years
ADP Hardware/Software	5 Years

The depreciation period of equipment shall not exceed the expected useful life of the asset.

D. DEPRECIATION EXPENSE OF DBOF ASSETS AND FACILITIES USED BY DBOF ACTIVITIES

1. DBOF Acquired Assets. DBOF assets are those assets acquired through expenditure of resources available to the DBOF or, if not so acquired, are the responsibility of the DBOF to replace or otherwise use funds generated through depreciation expense recovery in operations or acquisition of other capital assets. As a general rule, the DBOF is not authorized to acquire, through use of its resources, real property. The accounting entries to recognize depreciation expense of DBOF assets are:

```
Dr 6125 Depreciation of Equipment
    Cr 1759 Accumulated Depreciation on Equipment
    Cr 1769 Accumulated Depreciation on Military Equipment
    Cr 1819 Accumulated Depreciation on Assets Under
           Capital Lease
    Cr 1839 Accumulated Amortization on Automated
           Data Processing Software
```

2. Facilities Used By DBOF Activities. As a general rule, the DBOF is not authorized to acquire, through use of its resources, real property. These assets are not acquired through expenditure of resources available to the DBOF and are not the responsibility of the DBOF to replace or otherwise use funds generated through depreciation expense recovery in DBOF operations to acquire real property or other capital assets. Chapter 58, of this Volume provides guidance on accounting for real property assets by DBOF activities. The accounting entries to recognize depreciation expense of real property assets are:

```
Dr 6126 Depreciation of Real Property
    Cr 1739 Accumulated Depreciation on Buildings
    Cr 1749 Accumulated Depreciation on Other
           Structures and Facilities
```

Simultaneous with the above entry, an accounting entry shall be made to recognize the benefit received (equal to the depreciation expense recognized) from the use of real property assets. That accounting entry is:

Dr 3211.2 Assets Capitalized
Cr 5790 Invested Capital Used

The applicable depreciation expense account (e.g., Account 6126, "Depreciation of Real Property,") and Account 5790, "Invested Capital Used," shall both be closed to Account 3321, "Net Results of Operations - DBOF." Those amounts shall be equal, but opposite. The closing entries are:

Dr 3321 Net Results of Operations - DBOF
Cr 6126 Depreciation of Real Property

and

Dr 5700 Appropriated Capital Used
Cr 3321 Net Results of Operations - DBOF
